The fact is that we have not had a really adequate tariff act from a protective standpoint since the Dingley bill of 1897. That act came at the end of the depression of 1893. During that depression the evils of low tariff rates were made apparent. The Republicans in 1896 elected William McKinley, a pronounced protectionist, and a Senate and House of protectionists. The Dingley Tariff Act that that Congress passed and that William McKinley signed was a real protective tariff act. Under it, the country, except for the brief currency panic of 1907, prospered. No succeeding act has carried as effective protection to American industries as did that act. Each succeeding Republican act has felt, especially in the Senate, the effect of a combination of Democrats and low-tariff Republicans, which kept down rates and put on the free list the products of American factories, while the Democratic act of 1913 put even agricultural products on the free list.

The World War prevented us from feeling fully the effect of the 1913 act. When the depression struck us in full force in 1929 we were under the tariff act of 1922, containing many rates which had been placed too low, over the voice and vote of Republican leaders who were stanch protectionists. The same influence in the tariff act of 1930 kept some of the rates in that law too low. For this shortsightedness we have been paying the penalty for 10 years and are now daily paying it in increased unemployment and lowered wages.

This situation it may require a Republican Congress and a Republican President to remedy. Still, if conditions continue bad, the Roosevelt administration may act. No more ardent low-tariff President ever went into that office than James Buchanan. But because the condition of the country demanded it, he signed, on March 3, 1861, the Morrill bill, the first Republican tariff act. History, slightly varied, may repeat itself before the close of Mr. Roosevelt's term.

In this Congress the Republican Party faces the duty of supporting the protective tariff effectively as applied to one agricultural product, wheat.

Senator NORBECK, of South Dakota, introduced at the last session a bill applying to wheat, hogs, and cotton, which was reported favorably and passed the Senate unanimously. It was, however, reconsidered the next day and not again reached during the few remaining days of that session. The Norbeck bill simply applies well-thought-out ideas originating some 10 years ago in our own Department of Agriculture, adopted in principle into the legislation of Germany, France, Spain, and Italy, and more recently in the British wheat act of May 10, 1932.

The Norbeck bill has now been introduced in the House of Representatives by Representative JONES, of Texas, chairman of the House Committee on Agriculture, and favorably reported. So far as it applies to wheat, it is, in principle, correct. Wheat differs from most crops in a few important particulars: It will grow on land not fitted for anything else except minor cereals and grazing; it requires little moisture; after it is sown it can not be cultivated. Consequently the labor it requires is the preparation of the ground by plowing, harrowing, summer fallowing, and then the sowing of the seed, and, later, the harvesting, threshing, and hauling.

It is said, and in a sense correctly, that this does not require more than 39 days a year, but while probably technically correct, the statement is not a fair one. After the grain has been threshed, sacked, and hauled to the elevator the wheat farmer always has chores to do, fences to mend, machinery to repair, fertilizer to be handled and spread. Then, too, the time of plowing is not fixed and certain. The trained farmer waits until soil conditions are at the best. Instances are known where a wheat farmer actually worked on his farm every week day in the year, except during the months of December, January, and February. Then, too, the wheat farmer has no 8-hour day. His work is from sunrise to sunset. Still the wheat farmer can not put in 300 days' work a year.

The wheat farmer is, of course, entitled to have the rental value of the land added to the value of his labor, and also depreciation on his machinery. The man of whom I am speaking is a farmer who raises wheat solely or principally. His number is decreasing, and the tendency everywhere is against the large farm for wheat only and toward diversified farming on a plan of rotated crops. He is entitled to the same standard of living as a man of equal physical and mental equipment working in a factory 300 days a year.

That man's standard of living is, normally, annually, 300 times his daily wage or salary, and this being a protective country, such wage or salary is protected by a tariff rate, or its equivalent.

So we find ourselves faced with the same problem which Germany, France, Italy, Spain, and England are also trying to settle by legislation. In our case we want to give the wheat farmer the same standard of living as the 300-day man. As an American citizen he is entitled to it. We really have three alternates: We can take the tariff off wheat, ruin the industry and render less valuable many million acres of land now devoted to wheat; or we can do nothing, except maintain our 42-cent tariff, wait the slow process of reduced acreage, ruining many farmers in the process, and, from then on, pay substantially the world price, plus the tariff, for our wheat; or we can accept, in principle, the Norbeck bill. The idea of that bill is that, for the purpose of the bill, the domestic consumption of wheat is fixed by proclamation, at the average for the five years next preceding. When a miller buys wheat from a farmer for domestic use he draws up a certificate showing the amount of wheat so purchased and from whom. Of this certificate he gives the farmer a copy. The original copy he sends to the United States Treasury with an amount of money per bushel, fixed by statute, as the tariff equivalent. The farmer sends his copy, too, to the Treasury, and ultimately gets what the miller paid in, except that the Treasury deducts its cost of administration and, if the amount of wheat bought for domestic production is greater in any year than the proclaimed amount, then each bushel has a proportionate reduction, so that on each bushel sold for domestic consumption the same tariff equivalent is paid.

Wheat is a necessity. If we want some of our fellow citizens to grow it, we must assure them of the tariff-protected American standards of living of men similarly physically and mentally equipped, but fortunate enough to be in work where they can annually draw 300 days' wage.

Of course the consumer, who gets his tariff benefits, too, but in other ways, pays the added cost, though in practice it will be so subdivided and absorbed that he will never know it. Still, in principle, he does and should pay.

Wheat being a necessity, if we ruin the industry, we then are at the mercy of the foreign grower, not only as to price, but in case of war, as to whether we have wheat at all.

It is no mere rhetoric to speak of the ruin of the wheat industry. That process is well under way. There are many wheat farms whose operations since and including 1920—13 years—show a net loss. The United States Department of Agriculture states the average cost of producing a bushel of wheat this year to have been $1.10 a bushel. West of the Mississippi the farmers' average net realization has been less than 30 cents a bushel. At that rate it will not take long to complete the ruin of the industry.

With this low price goes loss of the farmers' purchasing power; as that purchasing power goes, the market towns dependent on the wheat farmer become insolvent and dwindle in size, then the county towns of larger size and, finally, the State's big cities.

But it should be borne in mind that a great city of diversified manufacture like New York starts to get hit the minute the farmer is hurt and gets hit, progressively, as the village, the county seat, and the wheat State's big cities get hit.

The loss of the farmer's purchasing power is a large part of the reason why 1,000,000 people are unemployed in New York City to-night.

There is, of course, a constitutional question, but such questions are usually capable of solution by thought and study.

My thought as to an American farm product is the same as to an American industrial product, that is, ours is one country, which must give both the farm product and the industrial product every chance to succeed and the benefit of every doubt. We city people know that our loaf of bread is the same size whether wheat is 25 cents or $1.50 a bushel. It means little to us as individuals but everything to the farmer.

As hogs are a year-around industry, the arguments which apply to wheat do not apply to them.

Cotton has an export side, such as no other agricultural product has, and, frankly, I have not given that phase of the question enough study to have formed an opinion as to whether cotton should be in the Norbeck bill. As to agriculture generally, the opening of factories and the increase of industrial wages will give agriculture the better market which it needs. The same thing is true of other basic industries, such as lumber, oil, and mining.

How can we prosper unless our basic industries prosper? We have our choice. We can bring them up to higher standards of living than their present pitiful price realization permits, or we can each and all have our own standard of living go down. Only in an absolute monarchy can a privileged class enjoy luxurious living at the expense of the toil and suffering of an underprivileged class. Ours is a country of equality of opportunity. When times are so prosperous, generally, that the standard of living of the average man comprises comfort and some luxuries, inequalities of the standard of living are neither noticed nor objected to. In fact, with some justice, they are defended as the reward of exceptional service, exceptional industry, or exceptional ability. But when the standard of living of the average man eliminates all luxury and some comfort, and not only poverty but want and hunger and destitution abound the individualistic system must either justify itself by increasing the minimum standard of living of people able and willing to work or suffer deprivation with them. The justification of the individualistic system is national economic well-being. Ordered liberty under that system has given us that in the past and can give it to us again. What is needed in that connection I have already referred to.

To sum up: To put our unemployed at work all Americans must think and work for America. Paul concisely said, "He that careth not for his own is worse than an infidel." If time permitted I could prove that if we do that it is best for foreign nations, too. Dean Bonham in his book Business Adrift does it. We should grow and manufacture in America for Americans everything which Americans can grow and manufacture. For the time being in order to put our 10,000,000 at work we should do that, even if some of the articles grown or manufactured cost us more than we can import them for. Our situation is not so desperate as to justify the nonimportation of noncompeting articles or an absolute embargo on the products of the free labor of any country.

For the time being exclusion of the products of State monopolies and of convict, forced, or indentured labor and the enactment and enforcement of adequate tariffs are all we need.

There is no necessity of making ourselves 100 per cent self-contained, though we could do it if we had to. But it is better policy to encourage imports which do not endanger our own labor.

There are many other pressing and interesting questions, but they can not all be discussed, even inadequately, in one evening. Among them are foreign debts, both public and private; balancing the Budget; currency; silver; the farm problem; economy; taxes. Each of these is important, and most of them have something to do with employment. Each is being thought about, discussed, and worked over. The solution of none is simple or easy. None of them should be neglected, but the things to do first are clearly those I have discussed to-night. Common sense indicates that.

We need common sense, toleration, and vision. Some old terms will need new definitions. I have never myself liked the terms "radical" and "conservative." They are incapable of definition as to present-day occurrences. Nothing, governmentally considered, could possibly be more radical, and even unsound, than some of the authorized activities of the Reconstruction Finance Corporation, yet its creation is commended by those ordinarily termed conservative. Not even in the present emergency should we do basically destructive things, but we have done, are doing, and will do a number of things which only the existence of an emergency and a crisis justify.

I can not close without a brief reference to three outstanding Americans. The way in which President Hoover has led us in this depression will, in history, receive high commendation. Our country, under his leadership, has handled its part of the world-wide depression better than any other country has handled its part under its leadership. As Republicans, we owe President Hoover a debt of gratitude for the masterly way he stressed the tariff in the recent campaign. We are once again, and largely due to his forceful leadership, stanchly the party of the protective tariff.

On one public question I frankly disagree with the President. Section 338 of the tariff law of 1922 makes it his duty to raise the tariff rates against any country which fails to accord us equality of tariff treatment. This duty the tariff act of 1930 continues unchanged. No major country, except Italy and Germany, gives us equality of tariff treatment. The President does nothing. On the face of the statute, he clearly should. The law should be enforced.

President-elect Roosevelt has not only been intrusted by the people with the greatest public office on earth, but he shares with President Hoover the period of the greatest responsibility in our country since Lincoln. We should not raise against his administration mere partisan obstruction. His suggestions should receive not only careful, but considerate attention and be honestly, frankly, and temperately discussed. It should be kept in mind that, speaking generally, Republicans and Democrats are affected alike by the acts of government. By captious criticism and willful misrepresentation we can hamper Mr. Roosevelt, but such means will hurt Republicans even more than Democrats. As the present minority party, we owe the country and Mr. Roosevelt's administration the duty of just, candid, and honest criticisms when criticisms are justified; but a "smear Roosevelt" campaign for party advantage is not justified, would do our country no good, and might do it some harm. We can not hurt our country to help our party. The "smear Hoover" campaign may have hurt him some, temporarily, but, unquestionably, it lowered respect for all government. It hurt our country.

We all mourn Mr. Coolidge's death. We deeply regret that it came at a time when he was so greatly needed. But, in his death, as in his life, he does great service. If we doubted the fundamental soundness of our national appreciation of character, the universal grief at Mr. Coolidge's death reassures us.

The Nation sincerely and universally mourns a public man who chose to be, and was, God-fearing, upright, and clean living; who braved the ill will of influential, nation-wide organizations by denying them what they demanded when he thought them wrong; who in public office preached economy at a time when the spirit of the country was prodigal; who never deviated a hair's breadth from his conception of public duty, regardless of whom he offended; who was at all times simply himself; who never sought public popularity nor put the popular demand of the movement above his devotion to the public interests, and who gave practically his entire life to useful and able public service without ostentation or parade.

A nation which discerningly mourns the loss of a man of simple living, courage, rugged honesty, devotion to duty, strong convictions tenaciously adhered to, deep religious convictions and abiding faith in the future of our country, demonstrates anew its solid foundation of virtue and morality and justifies the faith of its founders and the devotion of its patriot dead.

TREASURY AND POST-OFFICE APPROPRIATIONS

The VICE PRESIDENT. The Chair lays before the Senate the unfinished business, House bill 13520.

The Senate proceeded to consider the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. HALE. Mr. President, before the junior Senator from Nevada [Mr. ODDIE], who has charge of the Treasury and Post Office Departments appropriation bill, proceeds with the consideration of the bill, I desire to submit a few remarks upon the situation with reference to the appropriation bills which are to come before the Senate.

Less than six weeks remain of the present session of Congress. During those six weeks the 11 appropriation bills that each session confront the Congress have to reach their final passage and be enacted into law if the Seventy-second Congress is to carry out, perhaps, the most important work for which it was elected to office by the people of the United States, namely, that of providing the necessary appropriations to run the Government. Never in my fairly long experience in the Senate has a more difficult or more critical situation faced the annual appropriation bills. Without the hearty cooperation of the Senate—all of the Senate—the task of enacting into law these bills, all of them necessary

to the maintenance of the Government, will be impossible. Should all or any of these bills fail of passage before March 4, they must, of course, be passed before July 1, or resolutions to continue last year's appropriations will have to be enacted if the Government is to be kept up.

That an extra session of Congress will be called before July 1 is probably true. That at such an extra session it might be found possible to consider and pass the necessary appropriation bills that this Congress has failed to pass before July 1 may also be true, but why any patriotic Senator in this Chamber—and I believe that we are all, according to our lights, patriotic—should wish to put over to the extra session of the Congress these appropriation bills is beyond my power to conceive. A clear field for the consideration of very vital legislation will be needed at the extra session, and the shorter the time that the Congress stays in session the better it will be for the business of the country.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Maine yield to the Senator from New York?

Mr. HALE. I yield.

Mr. COPELAND. May I ask the Senator does he think there is an effort being made to put the appropriation bills over to an extra session?

Mr. HALE. No. I am not going into that at all. I do not know that any thought of that kind is in the mind of any Senator, but I want to be sure, if it is, that it is removed.

Mr. COPELAND. I should say that the way to do would be to put the bills before us, and I think the Senate will pass them.

Mr. HALE. I am not going to take up the time of the Senate at any great length, and I do not think the Senator will object to what I have to say.

Mr. President, I recall the war sessions of Congress in 1917 and 1918, when, on account of the crisis that faced the country, politics were laid aside and Democrats and Republicans worked side by side and shoulder to shoulder to bring our country through the crisis. It was far and away the most pleasant service that I have enjoyed during the 16 years I have been a Member of the Senate. Just as serious a crisis—perhaps even a more serious one—faces us to-day. There is just as much call to-day for us to lay aside politics and fight shoulder to shoulder with members of the opposing political faith to bring our country through the present financial crisis as there was in 1917 and 1918 to bring us through the war crisis.

Naturally, as a Republican, I favored last fall the retention of my party in power. I believed that my party was best fitted to bring this suffering country of ours back to prosperity; but the people of the country decided otherwise. By an overwhelming vote they put the Democratic Party in control of the Government, and I can honestly say that I hope that they make a success of it. The future of the country may well depend upon their making a success of it, and I say God speed to them. I may or may not support the measures that their program, when they have determined upon it, will call for, but I hope and trust that politics will not influence my decision. And especially I hope and trust that neither I nor any other Republican Senator will, for the seeming sake of party advantage and to put the party in power in a hole, resort to any practice that will prevent that party from functioning and functioning promptly.

The Democrats of the Senate, I believe, want the appropriation bills passed at this session of Congress so that they may have a clear field for the difficult problems that will confront them at the extra session of Congress. I sincerely hope that every member of my party will join in a concerted effort to give them that clear field, and I, for my part, as chairman of the Committee on Appropriations, shall do everything in my power to see that the appropriation bills get through before March 4.

Mr. BLAINE. Mr. President, will the Senator yield for a question?

The VICE PRESIDENT. Does the Senator from Maine yield to the Senator from Wisconsin?

Mr. HALE. I yield.

Mr. BLAINE. Without questioning the sincerity of the Senator from Maine, I wanted to inquire whether or not his expressions were designed as self-serving declarations for the future?

Mr. HALE. I am perfectly willing to stand on what I say.

Mr. President, I fully realize the difficulties and uncertainties in attempting to compare our Budget estimates for the fiscal year 1934 with estimated receipts for the same period. In the first place the fiscal year 1934 does not start until the 1st day of next July, nearly six months off. No one can tell exactly what will happen in that time. If, as we all hope, this depression is near its end and better times are approaching, our estimated deficit can easily be met.

Our Budget estimates for the fiscal year 1934 amount to $4,403,178,030. In case no public-debt retirements are made, we should deduct $534,070,321 from our 1934 estimates, leaving $3,869,107,711 to be met. Deducting from this sum the estimated postal receipts of $625,000,000, we have remaining $3,244,107,711. Deducting from this sum our estimated receipts of $2,949,162,713, we have a difference pointing to a deficit of $294,944,998. The latest action figures, through the action of Congress up to date, on the nine departmental appropriations have reduced our Budget estimates the sum of $55,252,386; and unless the Senate adds to the appropriations, this sum at least may be deducted from the $294,944,998, leaving an estimated deficit of $239,692,612.

The President in his message to Congress on January 17 states that our estimated income for the fiscal year 1934 is likely to fall short under present world conditions by anywhere from $100,000,000 to $300,000,000. Adding his average figure of $200,000,000 to the $239,692,612 would bring the estimated deficit to $439,692,612.

If Congress maintains its reduction of the Budget estimates for the bills yet to be considered, that reduction, of course, will reduce this sum accordingly.

In the President's message of January 17, based upon his modified estimates of expenditures, which includes a proposed decrease of $121,000,000 for the Veterans' Service and $55,000,000 for an additional cut of 11 per cent in salaries, he divides the expenditures for the Government into six groups, as follows:

1. Interest on the public debt, which can not be reduced	$725,000,000
2. Trust funds, tax refunds, District of Columbia budget, contributions to civil-service pensions, post-office subsidies to air and foreign mail, which are represented by fixed obligations, and other similar items on which there is no opportunity to reduce	310,900,000
3. Public works and their maintenance (excluding military, naval, and veterans' construction, which are in following items) has been reduced practically to commitments and contracts outstanding	305,000,000
4. Expenditures on military establishments	612,700,000
5. Expenditures on veterans have been reduced in the Executive proposals by $121,000,000	818,400,000
6. All other expenditures of the Government, including the legislative, the judiciary, law enforcement, prisons, foreign affairs, fiscal and tax service, public health, education, forests, fisheries, aids to agriculture, labor, commerce, safety of life at sea, inspection of food products, and a multitude of vital services, including the post office as represented by the remaining deficiency and all other independent establishments except the Veterans' Bureau	461,000,000
Total	3,233,000,000

From this table it is made clear that of the estimated expenditures of $3,233,000,000 for the coming year, all but about $461,000,000 represent expenditures that may not under existing law or obligations of the Government be reduced, with the exception of the appropriations for the Army and Navy, which probably can not, with due regard for the defense of the country, be further greatly reduced. The $461,000,000 represent the ordinary running expense of the Government aside from those for the Army and Navy and the District of Columbia, including the cost of running the Post Office Department over and above the re-

ceipts to the Government from that department, and deducting contractual obligations of about $22,000,000.

It must be borne in mind that the ordinary running expenses of the Government have been reduced by the Budget over the same running expenses for the current year a good many million dollars and the House has made still further cuts. Obviously, whatever further economies may be made, no cut in any way commensurate with the probable deficiency for the year can possibly be made in these running expenses of the Government. Unless the Congress sees fit to change existing law, either to produce more revenue or to cut off obligations under existing law, we shall in the next fiscal year, even with the suspension of any payment to the sinking fund, face a deficiency in balancing our Budget of between four and six hundred million dollars.

Mr. ODDIE. Mr. President, I ask unanimous consent that the formal reading of the bill may be dispensed with, and that the bill be read for amendment, the committee amendments to be first considered.

I also ask unanimous consent that the so-called economy provisions contained in the bill may be considered after the main Post Office and Treasury provisions in the bill shall have been disposed of, and that the reading of the economy provisions may be dispensed with at this time.

I was not a member of the Economy Committee. The Senator from Connecticut [Mr. BINGHAM] is chairman of that committee and the report of that committee is incorporated in this bill. I will not at this time state what is my attitude with respect to some of those provisions, because we shall discuss them when we reach them. I oppose some of them. I will ask the Senator from Connecticut, as chairman of that committee, to explain those provisions when they are reached in order.

The VICE PRESIDENT. Is there objection to the request of the Senator from Nevada?

Mr. McKELLAR. Mr. President, may I ask the Senator from Nevada just what his request is? I understand him to ask that the main body of the appropriation bill be considered and after that that we take up the economy provisions.

Mr. ODDIE. Yes.

Mr. McKELLAR. I have no objection to that course.

The VICE PRESIDENT. Without objection, the formal reading of the bill is dispensed with, the bill will be read for amendment, and the amendments of the committee will be first considered. The Secretary will state the first amendment when it is reached in the reading.

The Chief Clerk proceeded to read the bill.

The first amendment of the Committee on Appropriations was, under the subhead "Public Debt Service," on page 10, line 5, after the words "in excess of," to strike out "32¼ cents" and insert "35 cents," so as to read:

Distinctive paper for United States securities: For distinctive paper for United States currency, national-bank currency, and Federal reserve bank currency, not exceeding 2,000,000 pounds, including transportation of paper, traveling, mill, and other necessary expenses, and salaries of employees, and allowance, in lieu of expenses, of officer or officers detailed from the Treasury Department, not exceeding $50 per month each when actually on duty; in all, $550,000: *Provided*, That no part of this appropriation shall be expended for the purchase of such paper at a price per pound in excess of 35 cents.

Mr. KING. Mr. President, I was wondering, in view of the general decline in prices of commodities, what reason there was for increasing the allowance or the maximum price that might be paid for distinctive paper for United States securities?

Mr. ODDIE. Mr. President, replying to the question of the Senator from Utah, I will quote from the statement of the Treasury Department, appearing on page 3 of the Senate committee hearings, as follows:

With regard to the appropriation for distinctive paper for United States securities, I invite your attention to the proviso on page 10, lines 3 to 5, to the effect that no part of this appropriation shall be expended for the purchase of this distinctive paper at a price per pound in excess of 32¼ cents. The appropriation for this fiscal year carries a similar restriction, but at a price per pound of 38 cents. The contract for distinctive paper for the current year is at the rate of 32¼ cents, and the proposed limitation would restrict purchases during the next fiscal year within the limits of the present contract price. The current price of 32¼ cents is the lowest paid for distinctive paper in 20 years, and the placing of a restriction at that low level for the future might lead to serious consequences should it be impossible to contract for the paper within the limitation imposed. I believe it to be very unsound business practice to fix any limitation of this nature. Should conditions arise whereby the department should be unable to obtain a bid within the limitation, the department would be in the position of being unable to contract for the paper required for its currency and security printing. If Congress were not in session at the time so that remedial legislation could be obtained, we would be confronted by a very serious situation. It is not the practice to place such limitations in appropriations, expenditures from which are to be made under competitive bidding, and it is particularly inadvisable to apply it in the case of distinctive paper, in view of the serious consequences which might arise.

Mr. President, the committee decided that that 32¼ cents should be raised to 35 cents; and after the testimony that was given I believe it is a wise thing to do.

Mr. VANDENBERG. Mr. President, will the Senator yield for a question?

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Michigan?

Mr. ODDIE. I yield.

Mr. VANDENBERG. Referring to the report accompanying the bill, can the Senator tell me whether the estimated total savings are figured after making the economy section effective, or before making it effective?

Mr. ODDIE. After.

Mr. VANDENBERG. I thank the Senator.

Mr. ODDIE. In other words, the amounts provided for in the economy provisions have been deducted from the amounts in the bill.

Mr. VANDENBERG. So that the entire bill, including the economy section, must be adopted if the savings indicated in the report are to be achieved?

Mr. ODDIE. Yes; that is right, Mr. President.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. TYDINGS. Mr. President——

The VICE PRESIDENT. The Senator from Maryland.

Mr. TYDINGS. Has the Senator from Nevada yielded the floor?

Mr. ODDIE. No.

Mr. TYDINGS. Then, before action is taken on the amendment I should like to have something to say about it.

Mr. ODDIE. I hope the Senator will have an opportunity to say something right now.

Mr. TYDINGS. I can not let the amendment go by.

Mr. ODDIE. I ask unanimous consent that the vote be withdrawn.

The VICE PRESIDENT. The Chair has not announced the result. The Chair recognized the Senator from Maryland, who has the floor.

Mr. TYDINGS. Mr. President, I do not want to take the Senator from Nevada off the floor; but now that we are getting on to the routine of taking up the appropriation bills, I think it well to face the real financial facts.

For three years now the Government has been running behind. It has been adding a billion or more dollars of deficit every year to the national debt. Obviously, we can not go on indefinitely borrowing on the future, because we are only heaping up expenses that must be paid eventually by the taxpayers.

I think we are at the time when we should cut down the routine expenditures of the Government and live within our means. I do not believe we should appropriate, for general purposes, more money than we are going to take in. If we are to pursue the policy of normal appropriations, then we must make up our minds to raise taxes; and who is going to pay the new taxes? The 12,000,000 unemployed? The victims of the 5,000 bank failures? The million farmers who have lost their homes under mortgage foreclosures or for delinquent taxes? How are we to bring the Budget under control unless this Congress makes up its mind that

it must cut down normal governmental expenditures and live within its means?

What are the facts for the coming year?

The expenditures for the year 1934, as projected in the Budget estimate, are $3,974,800,000. What is the revenue? Two billion nine hundred and forty-nine million one hundred thousand dollars. That estimate of revenue is a rosy estimate based, when made, upon facts that do not now exist.

In other words, we shall be about a billion and a half dollars short, if we continue to appropriate with the estimated revenues only to meet those appropriations.

The income tax is estimated to yield $1,010,000,000.

Miscellaneous internal revenue, such as stamps, gasoline taxes, and so forth, $981,000,000.

Customs receipts, $320,000,000.

Miscellaneous receipts, $638,000,000. The latter total includes $329,000,000 representing payments of principal and interest due from foreign governments on indebtedness to the United States. Three hundred and twenty-nine million dollars of this estimated revenue is supposed to be collected from foreign governments, some of which already have refused or are withholding the payments contained in this estimate.

If we take the estimated expenditures of $3,974,800,000, and subtract therefrom the estimated receipts of $2,949,100,000, we have a probable deficit of $1,025,700,000; and I say with the utmost of conservatism that the deficit will be closer to two billion than it will to one billion, as every Senator upon this floor knows. Therefore we will go out in the market and borrow that $2,000,000,000 and add it to the national debt, and make just that much higher hurdle for the taxpayers to overcome in the future in interest on the national debt and requirements for the sinking fund on the national debt.

Think of this startling figure! We are now paying out every year $725,000,000 in interest alone upon the national debt. Twenty-five per cent of our Budget now goes for interest on our national obligations, and more than that percentage of our revenue is necessary to meet interest charges alone. Three-quarters of a billion dollars we must now appropriate every year, first taxing the people to get it, for interest upon the national debt; and unless we draw the line now and face the facts, and if this depression does not respond as we hope it will to the treatment soon to be applied to it, we are but postponing the day of a return of confidence and of sound governmental finance, and making our task the more difficult when we do really undertake to do the work which must be done.

Now, I should like to have the attention of Senators for just one moment upon this particular phase of the matter: Where do we get the money to run this Government?

I hold in my hand a package of cigarettes—Chesterfield cigarettes—20 of them in the pack. Upon that pack is a tax of 6 cents, represented by the little blue stamp on its top. Suppose a man smokes a pack a day, or 300 packs a year. That means that he pays $18 in his cigarette taxes alone to the National Government. If he is a carpenter making $4 a day, he has to work four and a half days just to pay his cigarette taxes. He has to give up four and a half days' earnings to pay that one tax. The ridiculous part of it is that here is this Congress appropriating money to help the farmer, appropriating money so that he may raise next year's crop, appropriating $500,000,000 to handle his surpluses, and then we levy 15 per cent of all governmental taxes upon one agricultural commodity—tobacco.

If there is any consistency in that policy, I should like some one to point it out.

My State happens to be a tobacco-producing State. If you want to see some impoverished farmers, go into southern Maryland, where they raise tobacco and where it is the main crop, and look at the condition of the banks, and look in the clerks' offices for the unpaid and defaulted mortgages; and yet in the name of agriculture we are levying 15 per cent of all governmental taxes—income taxes and all kinds combined—upon one little agricultural commodity. Senators have qualms about the sales tax, but do not hesitate to levy a sales tax upon the products of the soil.

I want to say to those Senators who represent tobacco States that we have been asleep. We have not looked after our constituents. While millions of the people's money flow out to take care of other products which bear no taxation whatsoever, the products of our State represent the strongest single crop under the structure of governmental finances, and we have sat in this Chamber and permitted that condition to exist.

Senators who have qualms about the sales tax do not mind taxing the people upon their gasoline, their candy, their chewing gum, their radios; but if a person buys a $5,000 or $25,000 oriental rug, he pays no sales tax whatsoever. If he buys a $2,500 grand piano, although we will all concede that that is a luxury, he contributes not a dollar upon that transaction. But the tobacco farmer in Maryland and Virginia and North and South Carolina and Kentucky and elsewhere must bear 15 per cent of the entire burden of the National Government in the form of a tax upon the product he produces.

There is not a man who will stand on this floor now and say that that is right or fair or just. If there is one, I shall be glad to pause and give him a chance to make that assertion. There is not a man who will say that that is fair taxation; and this from a Congress wherein every day men rise upon the floor and say, "We must do something for agriculture," and "We must help the farmers to hold their farms"; and then we permit this taxation policy to exist, which penalizes one agricultural product in a few States to the extent of bearing one-seventh or one-eighth of all the burden of taxation necessary to run the National Government!

It is high time, I say to my associates from those States where tobacco is produced, that we fight this thing out, spread the base, and make other commodities more in the class of luxuries than tobacco bear their fair proportion of the national load.

For some little time we were reducing the national debt. According to the figures of the Secretary of the Treasury, we find that on June 30, 1919, the national debt was at its peak, being $25,484,000,000. By June 30, 1930, it reached its lowest point of $16,185,000,000—a reduction from all sources of about $9,000,000,000. But where is it to-day? It is going back to the high peak even faster than it came down; and so great is it at this time that $750,000,000 alone out of estimated revenues of $3,000,000,000, or 25 per cent of all revenues, is required for mere interest charges alone!

Another thing I would like to point out at this time is the need for refunding our national debt at a lower rate of interest than that which it now bears. Liberty bonds, upon the best security under God's sun, are bearing 4½ per cent interest, a major part of the $750,000,000 of interest charges upon the national debt each year. I would like to see those men who want stability in government, who want governmental expenses cut, bring in their Liberty bonds as a patriotic gesture, and lay them down and take new securities at 2 or 2½ or, at the utmost, 3 per cent, upon the best security in the world. People put their money into savings banks and get 3 per cent upon it. Why should not the holders of Liberty bonds bring them in, in a patriotic gesture, when the country needs money, and start there to reduce this $750,000,000 interest charge upon the national debt?

Mr. SMITH. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. SMITH. Can the Senator give us the total interest we have to collect as payment on the still outstanding Liberty bonds, which bear from 4 to 4½ per cent interest?

Mr. TYDINGS. I have not the exact figures, but I believe it is substantially an accurate statement to observe that this year, upon six months' notice, I believe, the Treasury could call in about $8,000,000,000 of Liberty bonds which are bearing 4¼ and 4½ per cent interest and refund them.

In Great Britain, with a tremendous debt, with the Government unable to balance its budget, a patriotic appeal

was made to the people. They were all asked to surrender their bonds which are the equivalent of our Liberty bonds. "Minute men," so to speak, addressed groups throughout all England. Was the campaign successful? Ah, yes; over in England it was successful. The people, although they could not afford it, surrendered their bonds, their governmental obligations, and took new obligations at a lower interest rate. That was over in England, where it seems to me that quality difficult to define, which we call patriotism, exists to a keener degree than it does in some other parts of this terrestrial sphere.

Mr. SMITH. Mr. President, what is the total amount, as estimated, that we have to pay in the form of interest on the Liberty bonds?

Mr. TYDINGS. I would say to the Senator that at the close of the last fiscal year, in round numbers, it was shown that the interest charge on the entire national debt was about $725,000,000 annually, and the overwhelming portion of that $725,000,000 was attributable to the interest necessary to be paid on the Liberty bonds. So that the bulk of that expenditure of $750,000,000, which it is now, in round numbers, is due to the fact that the holders of Liberty bonds are receiving 4¼ and, I believe, in one case 4½ per cent upon those Government obligations.

Mr. President, it strikes me that what I have suggested would be a magnificent gesture; and may I point out to the Senator from South Carolina that if that gesture were made it would save this Government $200,000,000 a year, more money than we will save by the so-called economy bill.

I hope that the next administration will put on a patriotic campaign, as was done in England, and that we will seek to refund the Government obligations at a lower rate of interest than now prevails, so that we may effect this saving to the American taxpayer.

Mr. President, of course in the national-debt figures from which I quoted I did not include many of the expenditures made by the Reconstruction Finance Corporation. I think the Government now has bought over a billion dollars' worth of their paper. Part of that was the $500,000,000 subscription which we made when its notes were first offered. The Government took the notes and handed the Reconstruction Finance Corporation the money, which in turn made loans with it to the people and the projects and the communities of the country. It was nothing more nor less than a dole. We got into that matter without anybody's calling it by its right name. Men who had qualms about the dole did not hesitate to advocate the dole dressed up under the name of community relief. The only difference was that it was an aggregate dole and not an individual dole, and we have the word of some communities now which will never be able to pay their debts that they are going to return the money, and of course we assuage our consciences and their scruples and their philosophy because we surrounded it with appropriate rhetoric.

I want to deal particularly at this time with the so-called excise taxes, for the excise tax is the thing which to me is absolutely astounding the more I consider it and the more I realize how 20 or 30 things which are almost the necessities of life have been used as the sole props to bear up this thing we call government while everything else escapes.

First, there is gasoline, which is a necessity, an absolute necessity, almost as much of a necessity as food, because without gasoline how much food could we produce?

Then there are trucks. The farmers of Maryland, of Utah, or any other State have farm trucks, and we did not hesitate to tax them.

I might call the whole list, but what justice is there in picking out 5 or 10 or 15 articles and saddling upon those articles the entire cost of government? I would much rather exclude the necessities of life, and medicine, to any reasonable degree, and spread the rest of the load, through a sales tax, over the remainder of the things which we use.

The thing that outrages me more than anything else is that one agricultural product, namely, tobacco, has to furnish 15 per cent, or one-seventh, of all the revenue which this Government receives, one agricultural product, in a Congress which continually talks about helping the farmer.

On tobacco we raised $400,000,000 of revenue this year, and in good years we raise even more than that; and, as I said a moment ago, the man who smokes a package of cigarettes a day must work four and a half days a year, at a salary of $4 a day, to pay his annual cigarette tax alone. How many people of this Nation realize that? How many carpenters, how many mechanics, how many of the employed who are getting $4 a day, realize that four and a half days of their time are taken up to pay one tax alone, the cigarette tax?

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER (Mr. PATTERSON in the chair). Does the Senator from Maryland yield to the Senator from New York?

Mr. TYDINGS. I yield.

Mr. COPELAND. I am much impressed by the argument used by the Senator. He spoke a moment ago about a general sales tax as a substitute for the inequities and unfair application of our present law. I think the Senator spoke of medicines. I assume the Senator would exempt medicines and the real necessities of life.

Mr. TYDINGS. Of course. Let me make that plain. At this time I would exempt all essential, ordinary foods. I would exempt cheap clothing and cheap shoes. I would exempt medicines. I would spread the tax on all other things, and make them bear their fair proportion of the expenses of running this Government. If we do not do that, then we must discriminate against one article and in favor of another, as I have shown.

Mr. COPELAND. The Senator will recall that last year the Senator from Massachusetts [Mr. WALSH] and I offered an amendment proposing a sales tax, but exempting the necessities and medicines.

Mr. TYDINGS. I voted for it.

Mr. COPELAND. The Senator voted for it, I know. We did exempt the necessities, the articles mentioned by the Senator. We exempted clothing and shoes and all the absolute essentials. Of course, we would have then really a graduated tax. It would be a tax upon the rich, it would be a tax upon expenditures for grand pianos and diamonds, spoken of by the Senator. Those who spent the most and who were most able to spend the money would be the ones who would bear the tax. I am sure the Senator has in mind to make clear to the country, in what he is saying, that what he proposes is not a tax upon the poor, as the tax the Senator mentions upon tobacco is in many instances, but that with the exemptions proposed, it would be a graduated tax placed upon those well able to pay. Am I right?

Mr. TYDINGS. The Senator is right. Let me tell the Senator from New York what we have taxed. Those who could not stand a modified sales tax, excluding the necessities of life, could vote with alacrity for a tax upon these articles.

First of all, tobacco manufactures, $400,000,000, raised from the people on tobacco, a thing that is a necessity. I would rather eat a little less and have my tobacco than to eat a whole lot and have none. I like to smoke tobacco.

Mr. FLETCHER. Mr. President, I want to ask the Senator whether that tax of $400,000,000 the Senator said applied to tobacco includes cigar manufactures and cigarette manufactures.

Mr. TYDINGS. It does. The next thing we took up was oleomargarine. There is a luxury for you! Oleomargarine we taxed in this special bill, the butter of the poorest people in the United States, of the East Side of New York, and parts of east Baltimore, and parts of Chicago, where we are now contributing millions of dollars. We did not hesitate, because a lobby had appeared here, to do injustice and to discriminate against the bread and butter of the poorest people in this country at this hour.

I say it is a legislative crime to tax the food of the poorest and then get up and say in the next breath, "We will not put a tax upon the poor." There are millions of families in

this country which can not eat butter now, which can not afford butter, and a good many of them do not even have oleomargarine upon their bread.

My State is a big dairy State. I know they propagandized me along with the others to put oleomargarine out of existence so that they could sell more milk. This business of penalizing one part of the population to help another part of the population is one of the things that has brought us right to where we are to-day; and unless we stop it and face around and stand up and make a few enemies for the good of this country, our present condition will continue to exist.

What was the next thing we taxed? Lubricating oils.

Mr. SMITH. How much did the Government get out of oleomargarine?

Mr. TYDINGS. The Government collected on oleomargarine $1,753,573.78, the poor's contribution to the deficit, the contribution of the man out of work, the contribution of the little boy and girl—to speak accurately if not sentimentally—whose father is now out of work, whose food allowance has been cut down, but they have to furnish this little $1,750,000 a year because a powerful lobby told us we had to put the oleomargarine people out of business.

Mr. LEWIS. Mr. President, may I ask the Senator if the oleomargarine price was increased?

Mr. TYDINGS. Yes; because a special tax was put upon it.

Mr. McKELLAR. Mr. President, may I inquire of the Senator what effect it had upon the price?

Mr. TYDINGS. The tax was cleverly disguised. The real purpose of that tax was absolutely to stop the manufacture of oleomargarine, as the Senator from Tennessee knows, under the guise of taxation. Here was a perfectly honest business that was singled out because of the greed, the inordinate greed and selfishness, of one section of humanity who wanted to hog all the trade in relation to that class of products.

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Utah?

Mr. TYDINGS. I yield.

Mr. KING. I assume from the observations of the Senator that he is denouncing the policy which not infrequently has been adopted by our Government of destroying legitimate business under the guise of taxation.

Mr. TYDINGS. That is true.

Mr. KING. I was in the House when the oleomargarine bill was passed. I voted against it. I thought then it was an abuse of the taxing power, and I think so still. I think our legislative body upon a number of occasions has violated not only good morals but has violated the law and a proper interpretation of all constitutional inhibitions.

Mr. TYDINGS. And—not to be said to its credit—may I add that usually when such a discrimination has been made it has been made against little business in favor of more strongly organized business, which is no compliment to the Senate and the House of Representatives.

Lubricating oil. A necessity? Every farmer who has a little Delco plant or a cream separator or a truck or an automobile or a tractor and every little manufacturer of the same uses lubricating oil. We could not take the sales tax, but we could put it on lubricating oil. We could not put it on baby-grand pianos or $5,000 rugs or $150 suits of clothes or $300 to $500 dresses or ermine capes or $50 to $75 men's and women's hats or $15 shoes, but we could take it on lubricating oil. We could not penalize the poor, but we could take it on lubricating oil, and we could take it on the carpenter's cigarettes. Let me say to my friend from South Carolina [Mr. BYRNES], who gives me his attention, that we raised $400,000,000 on tobacco alone, or one-eighth of all the governmental revenues, but we could not have a sales tax.

On what else did we put it? Malt, brewer's wort, grape concentrates—all agricultural products—and what we would not take directly for making good honest-to-goodness beer we take indirectly from making illegal beer, and then some people wonder why Congress gets cussed up and down the streets and highways of the country!

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from New York?

Mr. TYDINGS. I yield.

Mr. COPELAND. Will the Senator read from the record what was the estimate of the return from the tax on brewer's wort?

Mr. TYDINGS. It is estimated that for 1933 the sum of $22,000,000 will be raised from the tax on brewer's wort, malt, and grape concentrates altogether.

Mr. COPELAND. Has the Senator the figures for the preceding year?

Mr. TYDINGS. No; quite appropriately they have been omitted.

Mr. COPELAND. I want to invite the Senator's attention to the fact that in a colloquy with the Senator from Utah [Mr. SMOOT] covering two or three days I pointed out that there would be no material revenue because of the way this subterfuge was dealing with the beer question. But the Senator from Utah said we would get $96,000,000—$96,000,000.

Mr. TYDINGS. The Senator from Utah is not to be blamed because, may I say in his behalf, I could take every-one of these items and show that they yielded only from one-half to three-quarters as much as was estimated at the time.

Mr. COPELAND. This year it is less than one-tenth as much, so that balancing the Budget was an absolute failure in every particular and especially as regards brewer's wort.

Mr. TYDINGS. Here is where we really get out of the high-sales-tax class and levy a tax upon a luxury. We tax matches! Everybody knows the poor people use no matches. Only the rich people use matches. The idea of a poor person having the effrontery to have a box of matches in his home! [Laughter.]

Gasoline! Why, the rich people can cook on most every kind of appliance, but many of the poor people, particularly in the summer time, have coal-oil and gasoline stoves, to say nothing of their trucks, their Delco plants, and what not.

Here is where we really committed the supreme inconsistency. We taxed electrical energy. May I invite the attention of the Senator from Nebraska [Mr. NORRIS], because I know that he was very anxious to have the poor people not taxed on electrical energy; but I find that those of us, whoever they may be, who could not shoulder a modified sales tax could tax electrical energy.

Mr. WHEELER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Montana?

Mr. TYDINGS. I yield.

Mr. WHEELER. I want to say to the Senator that I hope this is not a filibuster. I am very anxious to have the bill passed that is now before us so we can consider some important relief legislation to relieve the poor farmers and the poor people about whom we heard so much when the Glass bank bill was pending. I want to see that legislation brought forward. I want to see what kind of legislation it is going to be.

Mr. TYDINGS. This is a filibuster in the interest of the taxpayers and not against them, let me say to the Senator from Montana.

Mr. WHEELER. I am trying to get some relief for the poor people about whom we heard so much when the Glass bill was pending, and I want to see what that relief will look like.

Mr. TYDINGS. We raised $138,000,000 by a gasoline tax, may I say to the Senator from New York [Mr. COPELAND], and of course only the rich people pay that, as he knows. Electrical energy brought another $31,000,000, and of course no poor farmer and no poor man of Baltimore city or New York City ever has an electric light. The rich pay it all.

Toilet preparations! There is one place where we stepped fairly out of the character.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Nebraska?

Mr. TYDINGS. Certainly.

Mr. NORRIS. Before the Senator leaves the question of electrical energy, will he tell the Senate the story of just how that got into the law? Has he forgotten what happened at that time?

Mr. TYDINGS. No.

Mr. NORRIS. I think it would be worth while, even if the Senator should be charged with a filibuster, to tell again the story and to tell the truth about how that tax got into the law.

Mr. TYDINGS. May I say that the way it got in was that it was not direct current we were taxing, but it was alternating current, and although we attempted to tax the direct current, yet when we wound up after the bill came back from conference we found that we were taxing alternating current, and I think the Senator understands.

Mr. NORRIS. I was in hopes the Senator would tell the story correctly. He is telling us a fable now. [Laughter.] I wish he would tell just how that item got into the bill. If he does, he will tell what is already in the record, of course, but it will be exceedingly interesting to hear again how that item got into the bill and how the people resented it at the polls and what happened to some of those who put it in the bill.

Mr. TYDINGS. Much as I would like to comply with the Senator's request, I know he is going to tell about it, and I am sure I could not do it with as complete knowledge of what occurred as the Senator himself.

Mr. BLAINE. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Wisconsin?

Mr. TYDINGS. Certainly.

Mr. BLAINE. If the Senator will recall, the junior Senator from Nebraska [Mr. HOWELL] offered an amendment to impose the tax upon power companies instead of the consumer. How did the Senator from Maryland vote on that question?

Mr. TYDINGS. I am not certain, but I think the Senator will find I voted against each and every one of those special commodity taxes and then supported the sales tax offered by the Senator from Massachusetts [Mr. WALSH], which exempted food and clothing and medical supplies.

Mr. BLAINE. But this amendment gave the Senate an alternative. The proposition was to levy the tax against the consumer.

Mr. TYDINGS. Yes; but I maintained this policy that I will vote for no special tax on commodities; and, although I have not the record here, I think it is almost completely consistent in that respect. And I further asked to be excused from voting on the bill at final passage because it did not balance the Budget and was a tissue of tax discriminations.

Mr. BLAINE. I think the Senator will find he voted against the Howell amendment.

Mr. TYDINGS. I probably did, but may I say I voted against every other amendment to tax any special thing; and I supported the sales tax, and I think that makes my position absolutely consistent. Does not the Senator think so?

Mr. BLAINE. If the Senator is opposed to taxing power, I can not understand how he could vote for the sales tax.

Mr. TYDINGS. If the Senator will pardon me, if we exempt food, if we exempt cheap clothing, if we exempt farmers' tools, if we exempt medicine, we have certainly gone as far in exempting the poor man as I think it is possible to go.

Mr. BLAINE. But may I invite the Senator's attention to the fact that the sales-tax amendment embraced a very large number of items, as I recall, running into the hundreds, that would have been paid by the poor and particularly the farmers of the country.

Mr. TYDINGS. That is true. I do not think we can adopt any form of taxation that somebody will not have to pay. I do not think we can adopt any form of taxation that the farmer will not have to pay a lot of it. But may I say to the Senator from Wisconsin that one-seventh of all the taxes which we attempt to collect are collected on one agricultural product, tobacco. Is that the way to help the farmer, to take one agricultural product and make it bear one-seventh of all the taxes laid by the Government?

What else did we tax? Automobile trucks, other automobiles, motor cycles, radio sets, mechanical refrigerators, sporting goods, firearms, candy and chewing gum, soft drinks, telephone, telegraph, radio, cable, transportation by oil lines, and so forth. It was the most outrageous discriminatory sales tax bill ever passed by the American Congress—a discriminatory sales tax bill. That is exactly what it was, and nobody can refute it—a discriminatory sales tax bill, in places bearing the hardest upon the poorest people of the country, and passed by the very men who in many cases refused to support a sales tax which would have given the poor class of our citizens a break on the onerous proposition of taxation. It was nothing more nor less than the grossest kind of discriminatory sales tax, and I challenge anyone in this Chamber to say it was not. I pause for a reply if there be one who wants to argue that point.

We all know it was a sales tax, but it was a sales tax upon 20 or 25 things, some of them food and all of them necessities of the average poor man; but we could not vote to put a tax upon the baby-grand piano or the $25,000 oriental rug! Oh, no! The poor man was buying too many of those rugs; he had a baby-grand piano in every room in his house; and therefore we eliminated the tax upon those things because, forsooth, we did not want to do an injustice to the poor. It was much better to tax his gasoline and candy and tobacco and the products of agriculture than to tax, as my friend from Massachusetts [Mr. WALSH] proposed, that class of articles which would have relieved the poor from the extreme burden of taxation.

Now, we come down to the bill which is before us. The bill proposes to appropriate substantially the same amount of money that we appropriated in a like bill last year. Every Senator who votes for it tells the American people that he is going to put another deficit of $1,500,000,000 upon their backs by his action. We can not appropriate more money than we are taking in without putting more taxes upon the American people. We may postpone levying them, but eventually we are going to make the American people pay the deficit.

Mr. KING. Mr. President——

The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from Utah?

Mr. TYDINGS. Yes; I yield.

Mr. KING. Does not the Senator think he is rather too modest in suggesting the maximum deficit?

Mr. TYDINGS. I know I am.

Mr. KING. In view of the shrinking revenues I think the deficit will be, perhaps, $2,000,000,000 or more for the next fiscal year, unless we increase taxes.

Mr. TYDINGS. May I prove that what the Senator has said is absolutely true? The deficit of a billion dollars, which I have suggested, does not take into consideration the more than $400,000,000 which, under the law, the Treasury is supposed to apply to the national debt.

As the Senator knows, the policy has been to pay off a certain amount of our national debt every year even during the depression. How? By going out in the open market with more Government securities, borrowing $450,000,000, and then paying it out of the Treasury, and winding up at the exact point whence we started. The deficit is going to be closer to $2,000,000,000 than to $1,000,000,000. At 3 per cent interest that means $60,000,000 of additional taxes annually upon the American taxpayers for interest alone. Sixty million dollars a year! And who is going to pay it? The man who uses gasoline, the man who uses electrical energy, the man who uses wort.

If we could now get a beer bill through the Senate that would permit the manufacture of the kind of beer the people really want, we could raise a great amount of additional revenue. Just try it and see how far we will get when we undertake to carry the content out to decimal points, 85 places. We will not raise money in the way that people are willing it should be raised. Oh, no; we have got some superspiritual quality within ourselves that enables us to know what the people should have better than they themselves know.

I am not going to dwell on beer. I had enough of that at the last session, when I saw I was simply in a valley in a wilderness with nothing but echoes coming from both sides. However, in view of the last election it seems that some people in this country were not altogether out of sympathy with my humble remarks at that time, and many who had held the most rigid antagonism to the nefarious thing we call "beer" somehow concluded that there was beauty in its amber, music in its foam, rest in its drink, and revenue in its sale.

Mr. President, I have pending at the desk a resolution directing the Committee on Appropriations not to recommend appropriations in excess of the money the Government is going to receive.

If I thought there was the faintest glimmer of hope of even a fragment of that resolution surviving debate, I would be glad to engage in a filibuster for whatever my physical powers are worth to accomplish that end. However, I doubt it will be adopted. Only the other day in one of the committees, which was considering an appropriation for the Indians, I asked the expert who was there what a certain appropriation of $12,000 was for. He replied it was to teach the Indians how to raise agricultural commodities. I inquired how many families there were on the reservation, and he said a thousand. I asked, "How much is their gross agricultural income as of 1929 on the 1929 price level?" He replied, "$30 a family." "Well," I said, "$30 to a family; and how many families?" He answered, "A thousand families." How many are a thousand times 30? Thirty thousand. How much do you suppose, Mr. President, we are appropriating to teach those Indians to do that? We are appropriating $12,000 a year, and $30,000 was the gross return. I then offered an amendment to that item to cut it in half, and made the perhaps conceited utterance that if they would give me the $6,000 I would take two experts out there who would do all the work which had formerly been done by those employed under the $12,000 appropriation. I still stand ready to make good that statement. But to continue with that incident, did the amendment carry? No, Mr. President; the same old appropriation went right on through. The taxpayers were not present; those who wanted the appropriation were present, and was it not easier to give it to them and not make enemies than to withhold it? Why, of course. Then why not take the easiest way, which we did? Hence we are going to get $6,000 worth of work out of $12,000 of the taxpayers' money.

Mr. WHEELER. Mr. President——

The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from Montana?

Mr. TYDINGS. I yield.

Mr. WHEELER. I am glad the Senator brought that subject up, because I am in accord with him. We have been carrying on an investigation of the Indian Bureau, and have come to the conclusion that the ruthless extravagance and wasteful expenditures of money of that agency of the Government ought to stop. I very much hope that the next Congress will do something radical to cut out a lot of the useless bureaus we have. We have a lot of so-called Indians, for instance, whom we call "wards," who have about one-sixteenth Indian blood in their veins, whose names ought to be eliminated from the rolls of the Indian Bureau.

What is true of that bureau is true, in my judgment, of every single bureau of the United States Government, in the Interior Department, in the Agricultural, and in every other department of the Government.

Let me say further to the Senator that even if we did eliminate all those things, we could not balance the Budget. We could, however, give the people who put up the money a run for the money which they pay in taxes, and that ought to be done.

Mr. TYDINGS. Mr. President, if the Senator will permit an interruption at that point—and I thank the Senator for his suggestion—I want to make my position absolutely clear so that I will not be misunderstood. I do not want to throw out of work anybody who is now employed, but what I do lay down, as a basically sound proposition, is that whatever money we have to spend over and above the pure essentials in operating the Government ought to be applied to all the people and not merely to a group whose services we may not need. God knows we have got need enough for all the money we can raise; and I lay it down as a proposition that if there is one department that is not needed, it can be done away with, and if only $100,000 be saved, it is not fair to keep that department in operation. Why? Because we have taken those who occupy places in such a department and given them preferential treatment and every other member of the distressed army of unemployed at this time is entitled to equal treatment. We ought to cut expenses, and if we are going to spend the money anyway, we should spend the money which we will not require, after we have cut the expenditures, for some program that will help all the people and not center it in a few spots, while 12,000,000 of the unemployed pound the pavement hunting any kind of a job which will give them a few pennies.

Mr. WHEELER. Mr. President——

The VICE PRESIDENT. Does the Senator from Maryland yield further to the Senator from Montana?

Mr. TYDINGS. I yield.

Mr. WHEELER. During the investigation of the Indian Bureau, let me say to the Senator, we found it almost impossible to tell how much money had been appropriated for the different activities. As a result, the committee has recommended to Congress that we simplify the appropriation bill so that anybody visiting an Indian reservation or asking for information may tell immediately how much money is spent for this particular item or that particular item. Furthermore, what we have recommended in that particular instance, I think, should be done in all the other departments. We ought to simplify the appropriation bills so that the layman may understand them. At the present time it takes a Philadelphia lawyer to understand them and to find out how much money is appropriated, because items are duplicated.

Let me call the attention of the Senator to just one other thing. My attention has recently been called to what seems to me a very important thing, and that is that we ought to have one centralized purchasing bureau instead of having, as we now have, different purchasing agencies for almost every branch of the Government. We ought to conduct the Government as a business affair; but, instead of that, when one goes into the great cities of the United States or into the States he finds a Government purchasing agent for this department, a purchasing agent for that department, and a purchasing agent for the other department.

Furthermore, the Government has warehouses in different places filled with goods which are rotting. No one can tell how great the loss is to the Government. I am told that we could save a tremendous amount of money if we had a unified purchasing agency and let each activity of the Government put in a requisition for just what it needs and nothing more.

If the Senator will pardon me for just a moment further, we found, as a matter of fact, some of the Indian reservation warehouses filled with goods that had been there for 10, 12, or 15 years, and I am told warehouses in the city of Washington are filled with goods that have been there for 10 or 15 years, some of them rotting and some of them out of date, because of the fact that there has been no systematic method of purchasing under a general purchasing office; that the expense of the accounting systems of the Govern-

ment of the United States by reason of that is doubled and trebled, and that they can not keep any accurate system of accounting throughout the departments.

Mr. TYDINGS. I am going to consume but a few minutes more. I simply want to say, in conclusion, that if a judge sat there where the Vice President sits who had no vote in this body and who was looking over the action of this Congress he would be absolutely unable to reconcile what goes on here. First of all, we appropriate millions of dollars for farm relief, and then tax the farmers more than we tax anybody else if they happen to raise tobacco. We appropriate money to save the farmer from having his farm taken from him under a mortgage foreclosure or for delinquent taxes, and then penalize every farmer through special class taxation and make it impossible for him to pay his interest and the principal of his mortgage.

I wish to address my friend from Nebraska [Mr. HOWELL], who has quite often upon this floor pointed out the difficulty that confronts the farmers. I do not think there is any tobacco raised in his State, but when he is complaining about the treatment given to the agricultural producers of Nebraska I ask him to remember that the farmers of my State, among others, are paying $1 out of every $8 which the Government receives in revenue. Those of us who come from States where tobacco is grown have got to be alive to this situation. For my part, at the very first opportunity that comes I am going to do my best to remove this discrimination, which has no justification either in law or in equity.

Not only that, but the wealthier men of the country, who continually write and ask for a reduction in governmental expenditures, if they want to set a good example for the country, should turn in their Liberty bonds bearing 4¼ per cent interest and be satisfied to take securities bearing a lower rate of interest, because I submit that a Liberty bond is the best security at the present time in the world, and the holder of a Liberty bond has no moral right, except that of contract, to occupy a preferred status when 12,000,000 people are out of employment and distress exists all over the country. I should like to see American business men follow the example of English business men who, when Great Britain was faced with unbalanced budget after unbalanced budget, brought in their government bonds—over $2,000,000,000 of them—surrendered their right of contract in a great patriotic movement, and went away with securities bearing a less rate of interest.

There is where we can save $200,000,000; and oh, how shortsighted many of our wealthier business men are! They may keep their Liberty bonds at 4¼ per cent, but it only means higher income-tax brackets for them; and in the end they will pay more money to the Government than they would have to pay were they actuated by the promptings of the smallest amount of patriotic consideration.

Finally, I say that right in this Congress, if we really were going to tackle our job vigorously and honestly and straightforwardly, we would repeal this whole commodity-tax proposition, pass a sales tax, exempting food and cheap clothing, farmers' implements and tools, and medicines and spreading the burden over the entire purchasing population, and keep our income taxes where they are and keep our inheritance taxes where they are until we weather this storm.

I submit that it is absolutely ridiculous to vote against a sales tax upon the ground that it taxes the poor and then vote for 20 special taxes upon the poor people of the country. The words may excuse our conduct, but the conduct itself will not excuse it. All we have done is to select 20 objects instead of 125 or 150 or 500 or a thousand objects for taxation.

Finally, I leave this word and I enter this motion:

Mr. President, I move that the pending bill be recommitted and amended in line with the following resolution (S. Res. 327):

That the Committee on Appropriations be, and it is hereby, instructed by the Senate to reduce any and/or all appropriation bills sufficiently so that the aggregate of all appropriations for the fiscal year 1934 shall not be in excess of $2,949,100,000, which figure represents the total estimated revenue for the fiscal year 1934, and that no provision be made in any appropriation bill for any retirement of the national debt during said fiscal year 1934.

The VICE PRESIDENT. The question is on the motion of the Senator from Maryland [Mr. TYDINGS].

Mr. KING. Mr. President, the Senate should be grateful to the Senator from Maryland for challenging attention to what ought to be manifest to all, that there will be a large deficit before Congress concludes its labors if we adhere to the course we are now following.

I think it would be disastrous—that is not too strong a term—if this Congress should adjourn without having made provision for balancing the Budget. I realize that the suggestion of a balanced Budget has been derisively received in certain quarters; but we will learn, as many governments have discovered, the unwisdom—indeed the danger—of a policy under which expenditures are made in excess of revenues derived.

A business man who does not balance his budget, whose expenses are in excess of his receipts, will find himself in the bankruptcy court; and the Government of the United States, notwithstanding its prestige and its supposed great wealth, can not continue indefinitely a policy that annually creates deficits. The expenditures of the Federal Government for the fiscal year 1930–31 was approximately $1,000,000,000. For the following fiscal year it was nearly $3,000,000,000. This year it will be approximately $2,000,000,000; and with the complacency if not recklessness of the present Congress, with its apparent unconcern regarding expenditures, and with its apparent determination not to make sufficient reductions in appropriation bills, the deficit for the next fiscal year may exceed $2,000,000,000.

Mr. President, I have been greatly concerned in looking over the appropriation bills that have been reported by the House—I hope I am not transgressing parliamentary rules when I refer to the other branch of the National Legislature—at the manifest results that will follow the imprudent appropriations carried in such measures, and my concern has been increased when an examination of the bills, reported by the Senate Appropriation Committee, revealed that inadequate reductions were made in the same.

For a number of years there have been but few voices raised in the Senate against the hundreds of measures considered carrying appropriations, large and small—many of them lacking in merit, and all adding to the burdens which industry is compelled to bear. Many appropriation bills have been reported by committees, in which improper and unjust items and provisions appeared; but little opposition to the same has been manifested. I pay tribute to my colleague, the senior Senator from Utah [Mr. SMOOT], as one of the members of the Committee on Appropriations who have opposed many extravagant and improper provisions in appropriation bills, and sought to reduce Federal expenses. The Appropriations Committee as well as the Senate will miss the earnest and faithful services of my colleague in his efforts to bring about a balanced Budget and to restrict the appropriations of the Federal Government.

Mr. President, I regret to say that upon this side of the Chamber, since I have occupied a seat in this body, there have been too few voices raised in behalf of economy. I have subjected myself not infrequently to criticism from some of my colleagues and from Democrats in public life and outside of public life for what was denominated by some as intemperate criticism of my own party. Nor was criticism for my opposition to many appropriations and measures calling for Federal expenditures confined to members of my own party. I should be more willing to criticize my own party for what I conceive to be unwise and improper appropriations than I should be to criticize the party on the other side of the aisle.

Democrats ought to know better than to support un-Democratic policies and measures, or appropriations not imperatively demanded for legitimate governmental purposes. We have avowed repeatedly, in platforms and in public speeches by Democratic leaders, that we would observe the strictest

economy in all governmental concerns, and reduce to the minimum the burden of taxation resting upon the people. But I regret that my party has not always lived up to its ideals and solemn declarations.

Mr. SMOOT. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Utah yield to his colleague?

Mr. KING. I do.

Mr. SMOOT. I do not want to take the time now, but before this session closes I hope to call the attention of the Senate to the fact that legislation that is passed by the Senate at every session of Congress makes necessary increased appropriations to carry it out. Hardly a thing is said on the floor of the Senate when those propositions are made and the bills are before the Senate. They pass without our considering what will be necessary in the future, who is going to pay for the law, and what it is going to cost the Government. Yet these measures pass here at every session of Congress, piling up laws that require appropriations, and the Appropriations Committee has to report the funds necessary to carry out the law.

If any Senator will go into this question for the last 20 years and ascertain where the great increases have been made in the appropriation bills year after year, he will find that they are the result of some action of Congress that created some kind of a commission or some organization, or added to this department and that department activities that are never considered, I think, as they ought to be by both branches of Congress; but after the measure becomes a law the Appropriations Committee can not do anything else than appropriate the money necessary to carry out the action of Congress.

Mr. KING. Mr. President, I am glad my colleague has called attention to a point which, perhaps, I did not sufficiently emphasize and which may be urged as an excuse for some of the very large appropriations which appear in appropriation bills. The Appropriations Committee too often is handicapped by laws which impose upon it the duty of reporting appropriations for which such enactments provide. I agree with my colleague that many unwise and, indeed, improper enactments impose upon the Appropriations Committee the duty of increasing and swelling inordinately many appropriation bills reported by it.

Mr. FESS and Mr. McKELLAR addressed the Chair.

The VICE PRESIDENT. Does the Senator from Utah yield; and if so, to whom?

Mr. KING. I yield first to the Senator from Ohio. Then I will yield to the Senator from Tennessee.

Mr. FESS. Mr. President, for several years there has been agitation—and I have had sympathy with it—to authorize the President to make consolidations, abolitions, and other arrangements by which the expenses of the executive departments can be reduced. I have had sympathy with that movement and intend to support it if it is renewed in the new administration; but I am raising this question, which has been raised by the senior Senator from Utah [Mr. SMOOT]:

Suppose we give that authorization, as I think we will, could it extend to the abolition of any agency created by act of Congress without its coming back here for approval? If it could not, we would not give the President authority to save much money, and that is a feature which must be considered when the matter comes up.

Another thing that worries me is that the actual expenditure for the Government as a going concern is so small in comparison with these fixed charges that we can not get rid of that I become discouraged when I think about the prospects of our success in greatly reducing the expenses of the Government. I think the situation is a very serious one. I have not much hope that by act of Congress we will do, by piecemeal, anything. We have had experience along that line. I should like to authorize the President to do it, but I am still in doubt whether any general authority would be sufficient to repeal the acts creating these special bureaus.

Mr. KING. Mr. President, I share the discouragement which the Senator from Ohio states he feels with respect to the difficulties to be encountered in effecting reforms in the administration of the affairs of the Government and in bringing about reductions in Federal expenses. I also place an interrogation mark behind the question as to the power of the President without authority from Congress to change existing laws, abolish Federal agencies, and modify statutory organizations and repeal statutes carrying continuing appropriations that will go on as long as the rivers flow to the sea. In view of the constitutional question presented, if the President shall be given authority to abolish statutory organizations, bureaus, departments, and effect important changes in the administrative structures and instrumentalities of the Government, it might be wise, either in advance or immediately after he shall have completed his work, to enact a statute authorizing or ratifying and confirming his acts.

Mr. FESS and Mr. McKELLAR addressed the Chair.

The VICE PRESIDENT. Does the Senator from Utah yield; and if so, to whom?

Mr. KING. I yield first to the Senator from Ohio. Then I will yield to the Senator from Tennessee.

Mr. FESS. I am just wondering what accumulation of pressure from all over the United States will come to each individual Senator and Representative when we come to ratifying a recommendation of the President to abolish these various agencies.

Mr. KING. If the Senator were now in the shoes of some Democratic Senator or Congressman and were compelled to listen to the appeals for positions and protests against abolishing offices, bureaus, and Federal agencies, he would have some little realization of the pressure that will be encountered in the future.

I now yield to the Senator from Tennessee.

Mr. McKELLAR. Mr. President, I think we should give the President this power; but I have no doubt that when he makes his report he will ask for legislation confirming it. It will be the only possible way to carry it out in a manner that would save money to the Government.

Aside from that, however, I want to call the attention of the Senate to the fact that on the calendar of the Senate which I hold in my hand we find listed innumerable bills, many of them involving small amounts, which ordinarily pass by unanimous consent, frequently at the close of a day's session. They carry authorizations for appropriations, and every year they have accumulated and accumulated on the calendar, until it is almost impossible for the Committee on Appropriations to find enough money to pay the extravagant expenses that are brought about by the so-called inconsequential acts of the Congress.

Mr. SMOOT. Mr. President——

The VICE PRESIDENT. Does the junior Senator from Utah yield to his colleague?

Mr. KING. I yield to my colleague.

Mr. SMOOT. I quite agree that it is going to be next to impossible to make any reorganization of the departments of our Government unless Congress passes a bill authorizing somebody to do it without having to refer back to the Congress for action.

In 1922 I spent months and months, together with others, in preparing a plan of consolidating bureaus and of reorganization of the departments of our Government. But just as soon as we reported a bill to carry out the plan it became evident that we could not possibly pass such a bill through the Senate or the House. There was not an employee of the Government who would have been affected in any way who did not appeal to his Senator and his Representative to see that that legislation was defeated. If that legislation had been passed and had become a law, we would never have had the agencies which to-day exist in our Government. There would have been the great departments, which would have been consolidated at that time, and I think the result of the consolidation and the result of the saving of money to the Government would have been so easily seen by every Senator and every Representative, as well as the people of the United States generally, that the law would not have been changed very quickly.

I hope the day will come when Congress will pass a measure reorganizing the departments of this Government and the President of the United States will sign the measure. I say without a moment's hesitation that we will be able to save 20 per cent of all the expenses of our Government just as soon as that action is taken.

That is one thing I will not be here to help in, but I would have liked very much to be in the Senate and to have seen that accomplished, because there is nothing more necessary, if we are ever to cut the expenses of the Government.

Mr. KING. Mr. President, I know that my colleague and other Senators during President Harding's administration attempted to carry out the program to which he has just alluded. They found no particular encouragement from Representatives or Senators or from the people. Indeed, the moment it was suggested that reforms were to be effectuated which would abolish or consolidate bureaus and offices, organized minorities with tremendous power and with persistence unparalleled beseiged Congress and the lobbies of the House and the Senate were filled with their resounding tread and echoed with their denunciation of any plan that reduced expenses or abolished executive bureaus and instrumentalities.

It may be that we will have to elect a President, if we have not just done so—and I think we have—who will courageously and resolutely accomplish these reforms. It may be that the President will have to declare that he is not a candidate for a second term, that he is going through with a program of economy, of reorganization, of reform regardless of opposition from any quarter, and that he will bring the Government of the United States back to the foundations designed by the founders of this Republic. We may need a Jackson; we may need a man with the courage, not to say the impetuosity, of a Theodore Roosevelt, to effectuate these reforms, but sooner or later there will come to the White House—and I hope that the next President of the United States will be the man—one who possesses the courage, the ability, and the fortitude to go through with this tremendous undertaking.

My colleague has referred to the fact that a saving of 20 per cent could be effected by a proper reorganization of the Government. Senators will recall that a number of years ago an able Senator upon the other side of the Chamber, Senator Aldrich, of Rhode Island, declared that by proper economies and administrative reforms there could be a reduction of $300,000,000 annually in the expenses of the Government. That was at a time when the expenditures of the Government were not much more than five or six hundred million dollars annually. Now they are approximately $5,000,000,000.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield to me?

Mr. KING. I yield.

Mr. WALSH of Massachusetts. No man in this Chamber has more persistently and more consistently advocated economy in government than has the distinguished Senator who has just yielded to me and is now addressing the Senate. I have not had an opportunity to give as complete and as extensive study to this subject as has the Senator from Utah, but I have reached the conclusion—and I would like to have the Senator's opinion about this—that the most effective way, in fact, the only way, by which we will get real economy in the Federal Government, is by giving the President of the United States the power to veto separate items of an appropriation bill.

Mr. KING. I agree with the Senator that such veto power would be an effective method in reducing expenses..

Mr. WALSH of Massachusetts. I am glad to have the Senator agree with me. All legislation is usually a compromise between different groups, the claims of different sections of the country, and that it is practically impossible to get 500 Members of Congress, however hard some of us try, really to bring about what the country needs in this hour—that is, drastic economy. With the power lodged in one man, responsible to the whole country, to no particular State or group, and with the authority to say, "This particular item must come out of this appropriation bill. This department does not need that much money; they can not have it, and they will not have it." With the support he could get from his party followers in the Congress, we would be sustained in a program of real economy through the exercise of the veto power. I ask the Senator whether we could make any better and more effective move toward real economy than to provide a constitutional amendment giving the President the power to veto separate items in an appropriation bill?

Mr. KING. Mr. President, I am in favor, if it requires a constitutional amendment, of submitting the question to the people.

Many of the States have discovered that because of logrolling and conflicting interests appropriation bills have come to the executives which were loaded with improper, not to say infrequently corrupt, provisions, and then the people of such States have felt constrained to amend their constitutions and give their governors the right to veto specific items of appropriations.

Mr. WALSH of Massachusetts. That is just the experience my own Commonwealth had, and in its constitutional convention, held in 1917 and 1918 to revise the constitution, an amendment was submitted to the people, and adopted, providing for that very thing, and it has been very successfully administered and has resulted in bringing about much economy in the expenditures of the State government.

An incident which happened here the other day illustrates the need for such an amendment. Regardless of the merits or demerits of the President's position on the amendment offered to the deficiency appropriation bill by the Senator from Tennessee, the President was forced to veto a whole appropriation bill, with some appropriations in that bill which were absolutely essential, which were needed to feed the hungry. Because the President did not have the power to veto a specific item, he had to veto the whole appropriation bill and send it back for Congress to begin all over again to legislate. I inquire of the Senator from Utah if he agrees with me that in all probability a constitutional amendment would be required to bring that about?

Mr. KING. Perhaps the Senator is right. I have not examined into that question carefully, but if it is needed then I am in favor of the constitutional amendment. Let me add further that I believe that if the President now has the authority to veto specific items, we ought to adopt a reorganization plan which would change many of the departments and agencies and obliterate and abolish some.

Mr. WALSH of Massachusetts. The Senator is right and sound in his position, as he usually is, and may I add that I agree with what the senior Senator from Utah [Mr. SMOOT] stated; and I do not mind saying, as a Democrat, that I think the attitude of the members of my party in another section of this building is a matter of regret because of their rejection of the recommendations of the present President of the United States consolidating many bureaus. They ought to welcome any action, by any President, at any time, which would result in cutting down these appropriations and eliminating all superfluous bureaus. Indeed, if they were thinking of their own selfish political interests, they would put the difficult and thankless job upon the present President as much as possible, and not save it to bring trouble and trial to the one about to be inaugurated President of the United States.

I thank the junior Senator from Utah for yielding to me.

Mr. BANKHEAD. Mr. President, will the Senator from Utah yield to me?

Mr. KING. I yield.

Mr. BANKHEAD. I am in very full accord with the views of the Senator from Massachusetts about the importance of allowing the President to veto items in an appropriation bill. In fact, I am so strongly for that, that I have prepared a bill, and have it ready to introduce. I have delayed introducing it, however, on account of the very question which has been presented, as to whether such a thing can be brought about by statute or whether a constitu-

tional amendment is necessary. I wanted to ask the Senator from Massachusetts whether he had given careful consideration to whether a constitutional amendment was necessary or not.

Mr. WALSH of Massachusetts. I have; and I have introduced in previous sessions a constitutional amendment to bring about that desirable end.

Mr. BANKHEAD. The Senator thinks it can not be done without an amendment to the Constitution?

Mr. WALSH of Massachusetts. That is my opinion.

Mr. GEORGE. Mr. President, will the Senator from Utah yield to me?

Mr. KING. I yield.

Mr. GEORGE. I desire to concur most heartily in what the Senator from Utah, the Senator from Massachusetts, and other Senators have said with regard to the reorganization of the Government. There is not a question of doubt but that the one practical way to accomplish economy is in the actual reorganization of the Government and the elimination of a great many duplicating and a great many perfectly useless or well-night useless agencies.

Some months ago I prepared a bill, which was reported by the Finance Committee and which was on the calendar, the substance of which, in part at least, was incorporated in the previous economy bill, so called. I regret to say that I did not get vigorous and enthusiastic support in the Senate for that measure, which would have vested on the President large power, as large, I think, as we can under the Constitution vest in him. But I am pleased to say that I did have very able assistance from some Senators on this side, and particularly from some Senators on the other side of the aisle, notably the junior Senator from Michigan [Mr. VANDENBERG], and others who were most active and most energetic in endeavoring to bring about the passage of that necessary legislation.

Coupled with the largest power that can be given the President under the Constitution to reorganize and to eliminate and to abolish agencies and bureaus and commissions, I think it undoubtedly is correct to say that the President must also have ultimately, in view of our constantly mounting costs of Government, the power to veto special items in appropriation bills. I do not think there can be any doubt that a constitutional amendment is necessary to give the President that power.

Mr. KING. Mr. President, may I suggest to my friend from Georgia this proposition? I am inclined to think the Senator from Massachusetts and the Senator from Georgia are correct that a constitutional amendment is required. But if Congress should now enact a law authorizing the President to veto any item or more than one item in an appropriation bill and he exercised that authority and did veto an item, and Congress regarded his action as a valid exercise of authority, and the officials of the Government, as well as the people, proceeded upon the theory that the action of the President was valid, in that situation could the validity of the law or the action of the President be successfully challenged?

Mr. GEORGE. The Senator from Utah propounds a very interesting question, but I think that unless there were action by the Congress subsequent to the veto of the particular item which might have the effect of reenacting the appropriation bill with the alterations indicated by the President, there could be a successful challenge.

Mr. KING. The Senator may be right, and yet if the President vetoed an item in an appropriation bill and otherwise accepted the bill, and all other provisions of the bill were carried into effect and accepted by all persons, governmental and private, that might be affected by it, there might arise the question as to who could challenge the action of the President in vetoing the particular item. If anyone could successfully challenge that particular item, would it nullify all of the other features and provisions of the bill? I am merely speaking without giving the matter the consideration which it demands.

Mr. DICKINSON. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Utah yield to the Senator from Iowa?

Mr. KING. I yield.

Mr. DICKINSON. In view of the discussion I merely want to suggest that the President is the Budget officer of the country. He submits every item of the Budget that is covered into appropriation bills. In view of the trend of the discussion here, if we go over the appropriation bills for the past 10 years we will find that Congress has reduced the estimates of the President year after year, and only occasionally is there a special item goes through for which there is not a Budget estimate existing. It seems to me a veto by the President prior to the time the Budget estimate is sent up has the practical effect about which we are talking, because of the rigid rule with reference to refusing to put items in appropriation bills for which there is not a Budget estimate already in existence.

Here is another thing. If we permit the President to veto a special item in an appropriation bill we are opening the door to say to him, "You may veto section 7 of a legislative bill," a thing that we never want to suggest, because that would give him legislative veto power over the acts of Congress.

Mr. KING. May I say to the Senator that the President is limited as are the Committees on Appropriations by virtue of enactments which call for appropriations, large and small. The President, in preparing his Budget, properly assumes the binding force of such laws, and, therefore, includes recommendations for appropriations, both general and special. There are tens of millions, perhaps hundreds of millions in the aggregate, of appropriations carried in appropriation bills which the President, in preparing his Budget, feels constrained to include therein, and to recommend that Congress make necessary provision for the same.

Mr. DICKINSON. He should veto the legislation first, and then the appropriation to carry out the legislation.

Mr. KING. But bills were passed under the administration of a number of Presidents, among them being Presidents Wilson, Harding, and Coolidge, which provided for continuing appropriations—measures which perhaps Mr. Hoover might not have approved. If he had been in the White House he might have vetoed such bills. But having been enacted into law, the President can not nullify them and feels constrained even though not approving of the laws, to recommend the appropriations called for in the statutes.

Mr. DICKINSON. In furtherance of my suggestion I have just been handed a memorandum indicating that since the enactment of the Budget law we have reduced the appropriations in Congress below the Budget estimates by approximately $350,000,000.

Mr. KING. It was more than that. I do not want to be considered as partisan, and did not intend to mention this matter, but the Congress of the United States, extravagant as it has been and approving as it has done unjust and unwise measures, in my judgment, has been more provident and more considerate of the taxpayers than the Executives who have occupied the White House since the Budget law was enacted. Congress has appropriated less by over $400,000,000 than has been recommended by the Presidents succeeding Mr. Wilson.

Mr. TYDINGS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Maryland?

Mr. KING. I yield.

Mr. TYDINGS. The Senator a moment ago made the statement, in which I concur, namely, that the pending deficit, as now projected, would be close to $2,000,000,000. Is it not a fact, may I ask the Senator from Utah, that unless we make a retrenchment of appropriations now, the new administration is going to be forced very early to project an entirely new and additional tax bill?

Mr. KING. That is my opinion.

Mr. TYDINGS. Is it not a fact that unless we make up our minds to reduce expenses we are going to put additional taxes upon the masses of the people?

Mr. KING. I think so.

Mr. TYDINGS. Unless we really reduce expenditures in some form along the lines which I myself have suggested, are we not really indirectly voting for increased taxes?

Mr. KING. Yes; and voting additional burdens upon the Democratic administration and upon ourselves.

Mr. VANDENBERG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Michigan?

Mr. KING. I yield.

Mr. VANDENBERG. Does the Senator think we can ever accomplish the executive reorganization of the departments if we retain the congressional veto upon the orders of the President in that aspect?

Mr. KING. That is a question difficult to answer. A popular President, in the execution of a popular idea—and I feel sure reorganization of the Government would meet with popular approval—might carry through a measure or inaugurate a measure which Congress would be constrained to approve.

Mr. VANDENBERG. But let us confront the precise situation and the realities. We now face the necessity for drastic retrenchment and reorganization of the bureaus, departments, and so forth. We have just witnessed the impossibility of achieving even an incidental step in that direction by presidential order so long as Congress, with its diverse interests, retains the veto. The pending bill retains the congressional veto upon Executive power to reorganize. I submit to the Senator that in this situation—not some abstract situation of the future but the one in which we find ourselves—and with the advent of the Senator's own President elect, would he be unwilling to leave to his own party President elect an unrestricted power of reorganization and consolidation of the bureaus and departments?

Mr. KING. The Senator has placed me on the "spot." [Laughter.]

Mr. VANDENBERG. That is just what I wanted to do. Let me supplement my statement to this effect, that if none of the Senator's own party's Senators are willing to move to amend the bill to give his party President unrestrained authority in this aspect, I shall make the motion myself.

Mr. BANKHEAD. Mr. President, I will state to the Senator that such a motion will be made on this side of the aisle.

Mr. BROOKHART. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Iowa?

Mr. KING. I yield.

Mr. BROOKHART. With reference to the proposition made by the Senator from Maryland [Mr. TYDINGS] about having to increase taxes, I would like to ask the Senator, if we would restore prosperity in this country, whether that would not balance the Budget right away and reduce taxes at the same time?

Mr. KING. Mr. President, I do not want to be led into a discussion of the forces that are necessary or the measures necessary to bring about prosperity. There are those who believe that the return of prosperity will be delayed by unwise legislation; that the operation of normal conditions—the application of the laws of supply and demand—the increase in trade and commerce—are the most potent factors in the restoration of prosperity.

Mr. BROOKHART. The Senator will concede that if prosperity were restored and normal business conditions restored, the revenues of the Government would balance the Budget. Is not that true?

Mr. KING. Undoubtedly a return of prosperity or any considerable advance from the present depressed condition would materially increase the revenues; and if Congress exercised wisdom and proper economy, the Budget would be balanced. An extravagant and reckless Congress could unbalance any budget, no matter how large the revenues. But the moment that the sunlight breaks through the clouds and illumines the dark recesses of our economic system, there will be an increased demand for appropriations, and any revenues that find their way into the Treasury will be applied for by those who regard the Federal Treasury as a copious fountain accessible to the most vigilant and vociferous.

Mr. BROOKHART. Every time we increase taxes in a depression it deepens the depression, does it not?

Mr. KING. That may not be categorically answered. An unbalanced Budget, even in times of depression, may result in greater depression. If there were no compensations flowing from a balanced Budget, the Senator's position might be correct, but there are from a policy that maintains the credit of the Government. Many people in the depths of sorrow and in periods of deep depression have saved their liberties and their country by the greatest possible sacrifices and by the surrender of practically all their property. In my opinion, it is important that the credit structure of the Government be unimpaired. If it should be, no one can accurately foretell the disastrous consequences that would result. It were better to bear heavy burdens of taxation, even in this period of economic confusion, than to continue creating deficits and sowing the seeds of doubt and uncertainty as to the solvency of the Government.

Mr. BROOKHART. We balanced the Budget at the last session, did we not?

Mr. KING. Oh, no!

Mr. BROOKHART. We pretended to do so.

Mr. KING. I do not want to be critical. I think we intended to balance the Budget. We relied upon the recommendations of the Secretary of the Treasury, and I am not criticising him because he misjudged the economic situation, as I think all of us did; I did not contemplate that conditions would continue as adverse as they have been and as they are. Relying upon the recommendations of the Secretary of the Treasury, who very frankly explained his views to the Finance Committee, we attempted to balance the Budget and thought we had succeeded, but it soon became apparent that we had failed.

Imports into the United States were less, and consequently the customs receipts were less. The incomes of individuals and corporations were less, the result being that the revenues of the Government were far short of the appropriations.

Mr. BROOKHART. Is it not a fact that we never have balanced the Budget and never will? We have always had a deficit or surplus or something of the kind, and this thing of balancing the Budget is merely a fetish.

Mr. KING. I do not agree with the Senator. There have been surplus revenues during many years of our country's history. The Senator will recall that Mr. Cleveland challenged the attention of Congress to the excess of revenues and recommended legislation to reduce taxes. It is true that there have been deficiencies in appropriations—but that was not caused by lack of revenue. Occasionally emergencies arise or a situation develops not anticipated by the departments which necessitate expenditures and thus create deficits. Perhaps under the law many of the deficits ought not to have been created, but for years departments have incurred deficits which Congress approved by passing deficiency bills.

Mr. BROOKHART. For many years under Mr. Mellon's régime we had a surplus over his estimates, did we not?

Mr. KING. My recollection is that the revenues exceeded the estimates, but any surplus was available to apply upon the bonded indebtedness of the Government.

Mr. BROOKHART. Finally the depression came along, and now we have a deficit every year.

Mr. KING. What does the Senator mean to infer from that?

Mr. BROOKHART. I mean to infer we had better be spending our time restoring prosperity in this country rather than trying to reduce Government expenses or Government salaries 1⅔ per cent or some petty little thing like that.

Mr. KING. Let me say to the Senator that many of the suggestions made here and elsewhere for the restoration of prosperity are attempts to lift ourselves out of the depression by our boot straps; and that reminds me of the statement of the able Senator from Oklahoma, when he suggested that we pass a bill to purchase boot straps to be furnished those who think we can lift ourselves out of the depression by our boot straps.

Mr. TYDINGS. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Maryland?

Mr. KING. I yield.

Mr. TYDINGS. The Senator from Iowa said a while ago that it was very bad policy to put new taxes on the people during the depression. I agree with him; but, unless we cut down governmental expenses, we shall be forcing Congress into a position where it will have to impose new taxes on the people in a depression. I therefore, having had his view on that question, hope he will vote to make our expenditures no greater than our income, and save the people in this depression from the imposition of new taxes.

Mr. BROOKHART. Mr. President——

Mr. KING. I should like to proceed, but I will yield to my friend from Iowa.

Mr. BROOKHART. Talk about lifting ourselves out of the depression by our boot straps! How did we lift ourselves into it? I think we let ourselves down into it with our boot straps.

Mr. KING. We did not lift ourselves in; we foolishly plunged in.

Mr. BROOKHART. And we can easily get out by proper legislation.

Mr. KING. Yes, Mr. President; we have heard here for years and years wise men say that we must have proper legislation, and many suggestions have been made from time to time. Some of them have been sound; many of them have been unsound; and some of the policies proposed were wholly impracticable, and if carried into execution would have been not beneficial but most injurious.

However, I want to refer very briefly to the position taken by my friend from Michigan [Mr. VANDENBERG]. I compliment him for the position which he has taken upon the question of the reorganization of the Government. I think if we had followed him and the Senator from Georgia [Mr. GEORGE] at the last session of Congress our position to-day would have been more secure and we would have relieved the Democratic administration, which will come into power on the 4th of March next, of a burden which I am sure many would like to shun. I regret that we did not follow the leadership of the Senators from Georgia and Michigan, because it would have averted some of the difficulties that are now before us.

I hesitate to answer categorically the question, which was a fair one, propounded by the Senator from Michigan. I will say very frankly I am rather reluctant—it may be by reason of my legalistic training—to give to the Executive power which belongs to the Congress; but, Mr. President, knowing the power of active minorities, the power of the organizations that infest the Capitol and project themselves into every part of the country, I am rather dubious about reforms being effectuated in the machinery of the Government if the task is left to Congress.

Mr. VANDENBERG. Mr. President, may I suggest further in that aspect that it is almost too much to expect of human nature that over 500 minds in the two branches of Congress can meet upon so perplexing, technical, and intricate a proposition as is governmental reorganization; and that, if we are earnestly and sincerely in pursuit of good results, at least for the term of this emergency, we must place authority and responsibility coextensively in one place, and then demand results.

Mr. KING. Mr. President, I am inclined to think the Senator from Michigan is right.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Tennessee?

Mr. KING. Yes.

Mr. McKELLAR. The Senator will recall that this is a very different provision from the one that was put in the last bill which proposed to give the President the right to consolidate agencies of the Government. In that bill it was provided that a resolution adopted by either House of Congress disapproving a plan proposed by the Executive for the consolidation and readjustment of governmental agencies would make such action void; and the other House did disapprove such a plan the other day. But this bill provides:

> That if Congress within such 60 calendar days shall pass a concurrent resolution disapproving of such Executive order, or any part thereof, such Executive order shall become null and void to the extent of such disapproval.

Under that provision both bodies will have to act; they will have to act within 60 days; so that it is a very different provision from that which was enacted at the last session of Congress.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Florida?

Mr. KING. I yield.

Mr. FLETCHER. Under that provision Congress can disapprove of any portion of such an Executive order and does not have to approve or disapprove the order in its entirety.

Mr. McKELLAR. No; whatever it leaves alone for 60 days becomes the law.

Mr. KING. Mr. President, I have been diverted from the observations which I intended to submit in support of the position taken by the Senator from Maryland [Mr. TYDINGS]. The question of the consolidation of Government agencies is one of vital importance, and I sincerely hope the next President of the United States and the Congress will address themselves to the working out of a plan that will meet the situation.

There are too many bureaus and agencies and instrumentalities not only in the Federal Government but in the States. There are duplications in the State organizations. I am told that in some of the States there are two or three hundred agencies and commissions. The people are being robbed of their substance, indeed of their homes, by the mounting costs brought about by the extravagance and improvidence of governments, State and national.

In the Federal Government there are too many agencies, commissions, and departments; and yet there are persons who insist upon the creation of additional departments and bureaus. Some person wants to achieve distinction and conceives the idea of creating a new department. Many have the itch for publicity; many of them are representatives of fantastic schools, or socialistic organizations, that desire to project the Federal Government into private activities and to have the Federal Government take over the functions which belong to school districts, counties, municipalities, States, and individuals. It is time that there should be a drastic reform in the executive and administrative bodies.

I am disappointed that some Democrats, who attended the Chicago convention and who subscribed to the Democratic platform, do not respond to the demands for economy demanded in the platform.

Mr. Roosevelt promised that the Democratic Party would reduce Federal expenditures 25 per cent, and yet we have measures brought before us in both branches of Congress—if I may be permitted to include the other branch of Congress and not breach parliamentary rules—that do not carry out the platform pledge. An examination of the bill before us reveals the fact that there are millions if not tens of milions of dollars that might be excised from the bill to the advantage of the Government itself and obviously to the advantage of the taxpayers of the United States.

The mounting costs of the Government are alarming. The present occupant of the chair [Mr. FESS in the chair] made

an observation a few moments ago with which I am not quite in accord, if I understood him correctly. The substance of his statement was that it would be difficult to effectuate some of these economies without unduly injuring certain activities of the Government.

I noticed the other day a statement made by Mr. Babson—and great currency was given to it—in which he attempted to show that the expenditures of the Government, aside from those incurred for military and naval purposes and the payment of interest, and so forth, were inconsequential. I have before me a statement compiled from Government records which shows that on January 30, 1932, the number of civil employees of the Government approximated 800,000, with a cost in salaries of $1,055,970,639. That was nearly a quarter of a billion dollars more than it cost to run the entire Government in the year 1914 or 1915 or 1916. Including the salaries in the military branches of the Government, the employees number more than 1,230,000, whose salaries are $1,315,690,467.

And the costs are increasing. During the past year there have been added, as I have been advised, to the Federal pay rolls, in the classified service and outside of the classified service, 40,000 names; and quite recently the President of the United States—I think unwisely and improperly—blanketed a large number of the unclassified employees of the Government into the civil service and raised a large number of them from lower brackets to higher brackets, thus increasing the compensation which is to be paid by the Federal Government. So we have, Mr. President, a burden resting upon the taxpayers of the United States of more than a billion and a quarter dollars annually to meet the salaries of the employees of the Federal Government.

The expenditures of the Federal Government are approximately $5,000,000,000, and the expenditures of the counties and municipalities and States are more than $9,000,000,000, so that we have an aggregate of $15,000,000,000 which must be wrung from the people in the form of taxes in this period of depression. They can not pay this stupendous sum. Properties are being sold under the hammer because the tax-gatherer can not wring from the poverty-stricken people sufficient money with which to meet the tax levies. There must be reductions. The entire earnings of all the people of the United States for the fiscal year ending June 30, 1932, were less than $35,000,000,000, and for the fiscal year ending June 30, 1933, evidently their earnings will be less than that.

So that we have substantially fifteen thirty-fifths of all the earnings of the people of the United States consumed in the expenditures of Government. It is a burden too great to be borne. If we want to hasten the day of prosperity and bring a little sunlight to the people in distress, let us reduce the expenditures; let us cut out the red tape, the overlapping, the waste, and extravagance that we find, not only in the Federal but in the State and municipal Governments.

I have a chart before me that has been prepared by the National Industrial Conference Board, which shows that in 1932 the Federal Expenditures were more than $4,500,000,000, the State expenditures were more than $2,364,000,000, and the local expenditures amounted to more than $8,250,000,000, or a total of $15,769,000,000; yet, in the face of that stupendous cost, we are approaching the consideration of these appropriation bills without any apparent purpose to reduce the expenses of the Federal Government to proper limits.

I wish I had time to go into the mounting expenses of some of these bureaus. Let me mention several of them. I am glad to state that there is one meritorious provision in this bill among many, and that is the abolition of the Bureau of Efficiency—an organization against which I have protested for years. It was born in 1917 and asked for $41,000. It was claimed that but a few employees were required to visit the departments for the purpose of pointing out extravagance and waste that existed, and to suggest greater efficiency. Soon, like all other Federal agencies, it began to expand, and its appetite for power increased, until in 1930 it obtained an appropriation of $242,000 and in 1932, $200,270. I am glad this organization is to be abolished. I have had a bill pending for several years to accomplish that result.

The Bureau of Foreign and Domestic Commerce: Now I want to challenge the attention of my Republican friends and some of my Democratic friends who have accepted this unwise and unsound policy that is receiving the support of many newspapers and many fine organizations, not to buy anything except that which is produced in the United States, and to place an embargo upon all imports, and to have no commercial relations with the rest of the world; yet we have a Bureau of Foreign and Domestic Commerce ostensibly for the purpose of extending our commerce and finding markets for our surplus products. That bureau started out in 1914 with $174,860. Its expenses increased like the snowball rolling down the mountain. It increased in size and in demands. Its appropriation soon reached $1,228,624. Not satisfied, in 1924 it reached nearly $3,000,000; in 1925, the same; in 1926, $3,117,000 plus; in 1927, $3,264,922; in 1928, $3,771,867; in 1929, $4,267,982; in 1930, $4,718,224; in 1931, nearly $5,000,000; and in 1932, $5,349,891.

I say in passing that the Department of Commerce has been one of the most wasteful, inefficient, and extravagant Federal agencies created by an unwise Congress. We only need to go down to the new Department of Commerce Building to observe the grandiose views that have found expression and have controlled those who have been in charge of that department, and to perceive the waste in the building for which the taxpayers have to pay.

The Bureau of Education started out as a modest little violet with $89,000, just to be a sort of a repository for reports that might come in, to assemble data as to the character of the schools of the United States; but it began to expand. Its appropriation soon reached $120,000; then $165,000; and it continued to grow, until in 1931 it was $433,925. In addition, there was appropriated $1,172,000 for education in Alaska, and $2,550,000 for the agricultural colleges. But the Bureau of Education was not satisfied, and it has been demanding additional sums to perform work which was wholly unnecessary, and to obtain data which any man with a good stenographer and with a little patience could have obtained within a few weeks by corresponding with the proper educational officials within the various States.

The Bureau of Mines started out as a small organization with $664,000 in 1914, and it has increased in power and in appropriations until in 1930 its appropriation was nearly $3,000,000.

The Bureau of Standards is an organization that ought to receive attention at the hands of Congress. It reaches out into all sorts of fields into which it should not enter. It is a grasping organization, performing work that is wholly unnecessary and advancing propositions with which it has, or should have, no concern whatever. In 1914 it started out with $627,000 plus. It continued to increase—$690,000; $734,000; $956,000—leaving off the odd figures—then $1,250,000; then $1,749,000; then, in 1920, nearly $2,000,000; in 1921, $1,306,000; in 1922, $1,500,000; in 1923, $1,500,000 plus; in 1924, $1,643,000; in 1925, $1,864,000; in 1926, $1,929,000; in 1927, $1,971,000; in 1928, $2,225,000; in 1929, $2,479,000; in 1930, $2,673,000; in 1931, $3,440,000; and in 1932 it exceeded $3,000,000.

So these agencies, organized by some mysterious power that is exercised over unwise Congressmen and Senators, grow and expand until they become so strongly entrenched that they defy the efforts of Congress to minimize their authority or to reduce the appropriations which they are demanding and receiving.

The appropriation for the Coast and Geodetic Survey increased from $1,000,000 in 1914 to more than $3,000,000 in 1932.

The Bureau of Customs: In 1914 there was $11,000,000 appropriated. Now, with the customs receipts less than one-third or approximately one-third of what they were a few years ago, they obtain $23,990,000—absolutely wasteful, absolutely indefensible. The bill before us, as I recall—I

have only seen it since I came into the Chamber—attempts no important reductions in those appropriations.

Why, Mr. President, when we were collecting over $600,000,000 of revenues at the ports of entry, the appropriations were materially less than they are at the present time.

So it is with other bureaus, and with the Internal Revenue Bureau. I thought I had here the figures with respect to some of those other bureaus; but the same progressive increase is found in every branch of the Government. Those who have been entrenched in office feel that they are there for life, and that they can continue to increase their authority and power, and obtain from the Treasury of the United States increased appropriations.

The Senator from Maryland [Mr. TYDINGS] is right in challenging the attention of the Democratic Members of this body to the pledges which we have made, and to the condemnation that will be visited upon the party if we have not the courage and the patriotism to reduce these burdensome expenditures of the Government, and effectuate reforms in the administrative organization of the Government.

The total appropriations of the Federal Government in 1873 were only $300,000,000. I have before me the figures showing the total expenditures of the Government for each year for 50 years, but I shall mention only a few.

In 1890 the entire expenses of the Government—the Army, the Navy, every branch of the Government—were only $395,000,000.

In 1900 they were only $600,000,000.

In 1909 they were $1,000,000,000.

In 1910 they were $1,000,000,000. I am not giving the odd figures.

In 1912, 1913, 1914, 1915, 1916, and 1917, they were $1,000,000,000 plus—all the expenses of the Government. Senators will remember that in 1916 there were many activities of the Government necessitated because of the anticipation that the United States might be drawn into the world conflict; and yet in those years $1,000,000,000 plus was the aggregate of the annual expenditures of the Federal Government. Now it is nearly $5,000,000,000, and any attempt to reduce the expenses is met with persistent opposition. Federal employees organize, and they and the Federation of Labor and thousands of people that are influenced by them communicate with Senators and Representatives demanding that there shall be no reductions in many of the expenditures of the Federal Government.

I confess that I share the feeling expressed by the able Senator from Ohio [Mr. FESS], that I am disappointed in the prospects for the reduction of expenditures and for the effecting of reforms in the administration of our Government.

Mr. BLAINE. Mr. President, will the Senator suffer an interruption?

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Wisconsin?

Mr. KING. Yes; I yield.

Mr. BLAINE. I know how familiar the Senator is with the expenditures of the Federal Government; but I observed during the course of his remarks some comparisons which the Senator made regarding which those who are not so familiar with the expenses of the Federal Government will find their minds quite in confusion.

For instance, the Senator referred to an analysis of public expenditures made by Mr. Babson. As I recall, in the breaking down of the expenditures into various departments, the expenditures of the Federal Government proper, exclusive of the Army and Navy, the costs of past, present, and future wars, are something over $600,000,000, and in connection with that the Senator stated that there were 800,000 civilian employees in the United States whose aggregate salaries amounted to a billion and a quarter dollars.

A person who is not familiar with the expenditures, who has not a knowledge of the expenditures, will find, when he attempts to analyze those two propositions, the total expenditures as suggested by Mr. Babson of over $600,000,000, and the 800,000 civilian employees, with salaries aggregating a billion and a quarter, that he can not just figure out how that occurs, because the salaries alone to which the Senator refers are double the amount stated by Mr. Babson for the expenditures of the Government.

Mr. KING. Mr. President, this concrete example, I think, will be illustrative of the situation. Take the Army and the Navy. I recall examining the last Army and Navy appropriation bills, and I discovered that there were approximately 60,000 civilian employees in these two departments, and, of course, the compensation paid them constituted no inconsiderable part of the more than $700,000,000 appropriated for the Army and the Navy. So that when Mr. Babson was giving the costs of the Army and Navy at $700,000,000 plus, he did not assume that any part of that consisted of many millions of dollars paid to the thousands and tens of thousands of civilian employees.

Mr. BLAINE. So that the civilian employees to whom the Senator refers include those employees who are under the Army and the Navy in the various departments which have certain authority and jurisdiction respecting the administration of laws with regard to past wars, and present preparation for future wars.

Mr. KING. Yes.

Mr. BLAINE. Of the 800,000 civilian employees, only a portion are employed in the Government service outside of the undertakings which have to do with wars past and preparation for future wars.

Mr. KING. As an illustration, let us take the Veterans' Bureau. I am only speaking from memory, because I have not examined the figures for more than a year, but nearly $50,000,000 annually which Mr. Babson ascribes to wars, past and future, were paid to the employees of the Veterans' Bureau. I could refer to other organizations to further illustrate this matter, and which would demonstrate that the salaries and compensation of all Federal employees approximate the total to which I have referred.

Mr. BLAINE. I think the Senator has performed a service in pointing out that these civilian employees to whom he refers are in such large numbers that not by any means is there any appreciable number of them engaged in the operation of the Government, outside of cost of past and preparation for future wars.

Mr. FESS. Mr. President, will the Senator yield to me?

Mr. KING. I yield.

Mr. FESS. I note that this item of expenditure for civilian employees also includes the value of quarters, subsistence, and other facilities and services.

Mr. KING. I think the Senator is in error. The Senator will find at the top of the sheet the cost for the group, salary cost, and that is broken up into civil and military, and the number given here is 732,000 plus, with the cost of civil employees of $1,550,000,000. I do not think that includes the other item to which the Senator refers.

Mr. FESS. I note that the word "salary" has a footnote which says that these items are included in the salaries.

Mr. KING. The Senator may be right.

Mr. FESS. The Senator has explained that the Veterans' Bureau, which might properly be regarded as a part of the War Department, is not the War Department, and that would fall under the civil list.

Mr. KING. Yes.

Mr. FESS. I could not understand, after looking over our appropriation bills, where the $600,000,000 came in as a proper expenditure of the Government; and yet we have over a billion dollars for salaries alone. That was confusing to me, and especially when I was proceeding on the theory that we had only about $600,000,000 from which to cut, if we would proceed along the lines along which we are proceeding, and the others would be fixed charges, in regard to which I did not know what we could do in the way of cuts.

Mr. KING. Mr. President, if we should reduce expenditures in the civil list along the lines indicated by Senator Aldrich, of Rhode Island, a number of years ago, we could, together with other reductions justified and required, reduce the total appropriations demanded by the Budget at

least $700,000,000. I have repeatedly stated during the past few months that the appropriations for the next fiscal year should be reduced at least $800,000,000 below those of last year, and approximately that amount below the President's Budget recommendations. To this end the Senate should bend its efforts, and Congress should also effect consolidations and reforms in the machinery of the Government that will result in lasting benefits to the people.

Mr. FESS, Mr. TYDINGS, and Mr. ODDIE addressed the Chair.

The VICE PRESIDENT. The Senator from Ohio.

Mr. FESS. I was going to say that, whatever sympathy I have for what is attempted to be done here, this really would not be the time to do it. If we are going to reach the limit suggested through giving authority to the President, it would seem to me that the appropriations now recommended must be made for this year, and the authority can not be granted now and could not be operative upon these appropriations. I rather think it would be unwise to recommit the pending bill to the committee, although I have great sympathy with what the Senator from Maryland is trying to get.

Mr. TYDINGS. Mr. President, I grant there is something in what the Senator from Ohio says, but I hazard the prediction that the day will never come when it will be the appropriate time to make retrenchments in government. It will always be "next year." For the last four years, when resolutions have been pending to cut appropriation bills, the statement has always been, "We can not do that now, but next year we are going to do it."

There is a certain place that is paved with good intentions, and I am afraid the country will be in the situation of that place unless we make up our minds to do this here and now.

Mr. FESS. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. FESS. I think the Senator's statement accurately describes what has been our experience, but, in my judgment, the sentiment has never been quite so strong that the retrenchment suggested must be made and can not be made in any other way except to give the President some such authority. I am convinced that such authority will be given in the next Congress.

Mr. TYDINGS. There is a great deal in that, too, Mr. President, but as far as I am concerned, I do not believe in passing the buck to the President of the United States. I am here in my own capacity, as a representative of a State, just as every other Senator is, and I want here and now to say that I do not want to pass the buck to the President, but I am ready to pull my share of the load. Shifting responsibility is the easy way out, but Congress ought to tackle the problem itself.

We are spending now $4,000,000,000 a year; we have a population of 125,000,000 people, and that means $32 per capita per year, or over $100 a family, to support this Government. I know there are 12,000,000 families right now that can not pay that hundred dollars a year. So, if they are subtracted from the balance of the families, it means that those who are contributing to the Government are paying a great deal more than $100 a year per family.

In the face of the present depression, to live in the future, to borrow money to run this Government and not cut down its expenses is only doing the country an injustice, because it means that in the very next session of Congress we shall have to pass a tax bill carrying very much higher rates than would have to be levied if we should make the proposed reductions now.

I am a member of the Committee on Appropriations, and, without reflecting upon the membership of that committee, we have been proceeding in making appropriations upon the theory that nothing is wrong in the United States. We have been making normal appropriations. We have not realized that one of the best ways to help the United States is to reduce taxes. If we want to restore confidence in this country and put the country on the upward turn, we can do two things by one act which will accomplish that—first, reduce taxes; second, restore confidence in the American Government. Do that and we will find we have laid the foundation, the very best foundation we can lay in this country, for the recovery of all the people who are now in distress. Until we do that we simply leave a great barricade in the highway of recovery. We will have to come to it sooner or later.

For three years, now going into the fourth, we have been running behind hundreds of millions of dollars a year; in fact, billions of dollars. We are building up the national debt so high that soon it will take $1,000,000,000 a year just to pay the interest on it. Thirty-two dollars a family just to pay the interest on the public debt! I do not want to cut down anybody's salary. I do not want to throw anybody out of employment who now has a Government position. My observation is that that is only cheeseparing, anyhow. The thirty or forty million dollars saved in that way are not a drop in the bucket.

What I do want to call to the attention of the Senate again, finally, is the fact that a million farms have been sold under mortgage foreclosures and for delinquent taxes during the last four years; that 5,000 banks have failed; that 12,000,000 people are out of employment; that there is a cotton surplus carried over from 1932 to 1933 equivalent to a whole year's supply of cotton for the world; that there is stagnation all around; and that we can not go on spending money upon the plane of prosperous years without heaping up a tremendous burden which is only going to retard recovery and not assist the Nation when it needs assistance.

Mr. DILL. Mr. President, will the Senator yield to me?

Mr. TYDINGS. I yield.

Mr. DILL. As I understand it, the Senator's resolution would cut the expenditures to the amount of the revenue, so that no new taxes would be necessary?

Mr. TYDINGS. That is what I hope to do. But may I say that the revenue stated in the resolution, $2,900,000,000, will not be raised by $400,000,000. Part of it is national-debt payments, part of it is based upon estimates of receipts which even the Treasury Department now admits will not be gathered in in the form of taxes.

Mr. DILL. The Senator expects to avoid the payments into the sinking fund and bring that amount down?

Mr. TYDINGS. Yes.

Mr. DILL. And the Senator's motion now is to instruct the committee to take this percentage out of the pending bill?

Mr. TYDINGS. That is right.

Mr. DILL. I am certainly glad that the Senator has brought this motion up.

Mr. TYDINGS. I did not intend to go into this, but I am going to talk about veterans. Fortunately, I am one myself and, with what humble abilities I had, served under fire in France, just as millions of others did.

I know of people, officers particularly, who are receiving pensions under the emergency officers' retirement act, who are on the Government pay roll twice, once in the pensions they receive and once as National Guard officers, again as paid officials, and who are practicing their professions at the same time. Does anyone here believe that the emergency officers' retirement act, giving large benefits to a certain class of emergency officers, was intended to cover the case of a man who could earn three salaries besides his pension?

It is absolute waste and unbelievable with 12,000,000 people out of employment, but we do not seem to have the ambition, for want of a better term, to go into the thing and do justice. There are places in this Government where, without any injustice to any man who served his country at home or abroad during the war, we could make tremendous cuts amounting to millions of dollars, and be generous as well to every man who is entitled to consideration by his Government. But do we do it? Am I going to ask the President of the United States, as the Senator from Ohio suggests, to do this because I am afraid to do it myself?

Without casting any reflection upon anyone, the only reason why we do not do it is political fear. Let us tell the truth about it. What are we afraid of? What is the object in being a United States Senator if one can not be the cap-

tain of his own soul, if every little group can frighten us out of doing what we know to be our proper duty? I do not want the job if I have to have it that way. I admit it may sound a little high hat and bigheaded, but it is true, nevertheless. If we can not vote reasonably our own sentiments here, then who wants the position? [Laughter.] I do not want it on such conditions!

But, Mr. President, we will not tackle this thing in the right way. The only way we will ever get these expenditures reduced is not to expend more money than we are collecting. It is an exhibition of absolute cowardice to appropriate all this money year after year, when we are living in the future, because forsooth we will not undertake the job of doing what every one of us knows should be done.

Furthermore, so far as I am concerned, a man who has served a long time as an officer or an enlisted man in the Army or Navy is entitled to his retired pay, whether it be $5,000 or $6,000 or $10,000 a year. But if he goes into private life after he has retired, particularly in times like these, and earns $15,000 or $20,000 or $10,000 by serving in some private concern, I would take his retirement pay away from him while he is working for that private concern. The Government gives the retirement pay to him with the idea that his work is done and that he can go and enjoy the sunset of his life in leisure. When he goes out and supplants some other man in the field of private endeavor, then he has no right, in my judgment, to accept his retirement pay, and I will vote to that effect if I have an opportunity to do so.

These are a few places where over $150,000,000 can be saved, and we do not have to pass the buck to the President of the United States to do it. We can do it right in this Chamber if we want to do it. It will not be two weeks before there will be a huge relief bill here for the poor and unemployed. The Senator from Illinois [Mr. GLENN] will rise in the Senate and tell about conditions in Chicago, but we will not have the money to take care of the starving people out in Chicago. We can not afford it. We begin to get scared. I would much rather cut down expenses and, if we are to appropriate money, take the savings and give them to the unemployed who are victims of a cycle through no fault of their own than to keep people upon the pay roll or keep activities in existence which are not needed in this time of depression. I see no reason for giving anybody a preferred status at this time.

Mr. President, I want to leave this discussion with these words: That every man who will not vote to cut down expenses is retarding recovery. He is making it necessary for a new tax bill to be passed, for new burdens to be put upon the people who are already losing their all because of the burdens they now have. I hope, therefore, that we will realize that we must put our own house in order by keeping the expenditures within our income, so the country will come to believe that competency once more walks in the halls of legislation and that the Government is being run on an economical basis, that in these times we have measured up to our duty, before we charge others with falling down on theirs.

Mr. McKELLAR. Mr. President, the resolution submitted by the Senator from Maryland as Senate Resolution 327 reads as follows:

Resolved, That the Committee on Appropriations be, and it is hereby, instructed by the Senate to reduce any and/or all appropriation bills sufficiently so that the aggregate of all appropriations for the fiscal year 1934 shall not be in excess of $2,949,100,000, which figure represents the total estimated revenue for the fiscal year 1934, and that no provision be made in any appropriation bill for any retirement of the national debt during said fiscal year 1934.

I shall vote for the resolution. It will be remembered that last year some of us took a very active part in seeking to reduce the expenditures of the Government. I submitted a motion first to abolish 29 useless bureaus of the Government. I think everybody considered and admitted that they were useless. But the next morning, after the motion was made, bureaucrats all over Washington began to telephone their Senators; and instead of abolishing those 29 useless bureaus, I think perhaps we even increased the number. One of them was a bureau dealing with the Mediterranean fruit fly, another with grasshoppers, and various other things that mean nothing except expenditure of the Government's money. The only reduction that the Senate voted was $1,000,000, as I recall it.

Thereupon I took another tack and sought to reduce expenditures by 10 per cent of all appropriations for the present fiscal year. We got such a provision incorporated in five bills, and there was a large reduction; but when we came to the Army and Navy, instead of reducing by 10 per cent, like we did in the other bills, the Senate declined to make any reduction at all, and really increased the appropriations for the Army and Navy, and for the other departments.

Mr. TYDINGS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Maryland?

Mr. McKELLAR. I yield.

Mr. TYDINGS. When we refuse to appropriate money for the unemployed, how can we justify our conduct in retiring a man because he is 64 years old and paying him $5,000 or $6,000 a year retirement pay and then permit him to go out into private life, where he works three times as hard as he ever did for the Government, and makes a larger salary and at the same time draws his retirement pay? How can we justify conduct like that?

Mr. McKELLAR. I agree with the Senator. I do not think we can justify it. I am very happy to say that under the various plans that were offered, including those offered by myself last year, there was a reduction under what the President recommended to Congress of $334,000,000. That was a very excellent reduction, but it was not enough. I believe that what is now proposed by the Senator from Maryland, to reduce our expenditures to $3,000,000,000, is a wise proposal and would furnish ample money to run the Government just as effectively as it is now being run.

Mr. President, I want to invite the attention of Democrats to our party pledge to the American people made last summer, as follows:

We advocate an immediate drastic reduction of governmental expenditures by abolishing useless commissions and offices, consolidating departments and bureaus, and eliminating extravagance to accomplish a saving of not less than 25 per cent of the cost of Federal Government.

Mr. President, in order to carry out that pledge something like this will have to be done. We must make a heroic effort otherwise we can not accomplish anything. I believe this is a heroic effort upon the part of the Senator from Maryland, and I heartily approve of it.

Let us see for a moment what our condition is. Two and one-half years ago the Government had a deficit in round numbers of $1,000,000,000; in other words, we expended for governmental purposes $1,000,000,000 more than we collected in taxes from the people. A year and a half ago that deficit had increased by the enormous sum of $3,000,000,000, in round numbers—not a total of $3,000,000,000 but a total of $4,000,000,000. When it reached that tremendous figure the President said it was necessary to balance the Budget. We were told, of course, acting in perfectly good faith, I have no doubt, that it would take a tax bill of $1,140,000,000 to balance the Budget. The Congress passed that bill. Did it balance the Budget? Not at all. Instead of balancing the Budget let us see what happened.

The first six months of this year—speaking now of the fiscal year—our deficit reached the enormous total of nearly $1,200,000,000, and if we continue at that rate to the end of the fiscal year on the 1st of next July it will probably reach $2,500,000,000 more, making a grand total of $5,500,000,000 deficit for the past three years. Something must be done. We have learned that we can not increase taxes to balance the Budget. It was said the $1,140,000,000 would balance the Budget, and yet we find it unbalanced for the first six months of this year to the extent of $1,200,000,000.

That remedy has failed. What is the real remedy? The real remedy and the only remedy is to live within our income.

We have no moral right to expend more money than we have collected or to expend money that we have not collected in order to carry on the ordinary operations of the Government. If there were extraordinary expenditures we might be privileged to borrow, but not for the ordinary conduct of the Government. We ought to reduce our expenditures. There is but one way to reduce them, and that is to reduce them.

I remember that last year it was said that if a 10 per cent reduction should be adopted, the committees could not handle the appropriation bills, that it would not be workable, that it would not be feasible. We tried it out in five departments, and it worked perfectly. It will work again if we put this limitation on the bills. I do not see how any Democrat who stood by his party last fall, who subscribed to its pledges, when the roll is called, as it will be called this afternoon perhaps, can vote except to carry out the provisions of his own platform.

Mr. TYDINGS. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Maryland?

Mr. McKELLAR. I am glad to yield.

Mr. TYDINGS. The other day we appropriated $150,000,000 for seed loans. There may be some crops where it is necessary. But may I point out to the Senator that in the county where I live over 98 per cent of the taxes have already been collected—an unusual record—and yet we have investigators going over that county, drawing $3,000 or $4,000 a year, looking into the matter of lending the people money to raise next year's crops, and at the same time we are trying here to deal with a surplus upon which we have just wasted $500,000,000, or most of it. I say it is an absolute outrage; there is no consistency in the congressional policy at all.

Mr. HALE. Mr. President, will the Senator yield for a question?

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Maine?

Mr. McKELLAR. I yield to the chairman of the Committee on Appropriations.

Mr. HALE. I simply wanted to ask when we appropriated $150,000,000 for seed loans at this session of Congress. I do not recall any such appropriation. When was it made?

Mr. TYDINGS. The Reconstruction Finance Corporation——

Mr. McKELLAR. It is authorized.

Mr. TYDINGS. It is authorized and they have investigators all over the country——

Mr. McKELLAR. It was an authorization instead of an appropriation.

Mr. TYDINGS. If the Senator will allow me to finish my remark——

Mr. McKELLAR. All right.

Mr. TYDINGS. Let me say that in every county in this Nation investigators, drawing two, three, or four thousand dollars a year, are going around and lending farmers money, most of whom can take care of themselves; and many of those loans will never be paid back to the taxpayers.

Mr. McKELLAR. Talking about not being able to save, what are we doing? We are granting right now the most remarkable subsidies that any government has ever granted in the history of time. Listen to this. On pages 56 and 57 of the bill I find this provision:

> For transportation of foreign mails by steamship, aircraft, or otherwise, including the cost of advertising in connection with the award of contracts authorized by the merchant marine act of 1928 (U. S. C., title 46, secs. 861–889; Supp. V, title 46, secs. 886–891x), $35,500,000.

It has not been 10 years since we paid less than two and one-half million dollars for the transportation of all our foreign mails. We do not now have as much foreign mail as we had then, and yet we are appropriating $35,500,000 by this bill for the transportation of foreign mails. What is the excuse? The excuse is that it is for the purpose of building up our merchant marine, and yet when we come to look into the matter we find that foreign-owned ships are participating in this appropriation. Do they perform any real service? In answer to that question, I want to quote the testimony of one of the shipowners, whose company operated a line to Africa. The witness was the vice president of the company. He was asked, "How much mail do you carry?" "Well," he said, "not a great deal." "That is not very definite. How much do you carry?" He finally admitted that he carried a hatful of mail. "How much do you get for carrying a hatful of mail to Africa?" "We get $400,000 a year." Four hundred thousand dollars a year!

In another case a shipowner had a ship which he bought from the Government on 20 years time and on partial payments, which he operated from San Francisco, as I remember—at any rate, it was on the Pacific coast, I know—to Tierra del Fuego, I believe, in Patagonia, South America. He was asked, "How much mail do you carry?" He finally admitted that he carried, if I recall the figures aright, 3 letters and 45 pounds of parcels post. "How much do you get for carrying that mail?" "I get a subsidy from the United States Government of $102,000."

Yet we are proposing in this bill, if we shall vote for it—and I am going to give the Senate an opportunity to vote it down—to vote an appropriation for a subsidy of $35,500,000, when men and women are starving in the land, when riots—food riots, if you please—are occurring in some of our cities. It is indefensible. With the condition of our Treasury as it is, with a deficit of five and one-half billion dollars in the last three years, I do not see how, in the name of heaven, any Senator can vote to give these vast subsidies to steamship companies.

Mr. ODDIE. Mr. President——

Mr. McKELLAR. I yield to the Senator from Nevada.

Mr. ODDIE. Mr. President, in commenting on the statement of the Senator from Tennessee as to the amount paid to steamship companies for carrying a small quantity of mail, it is only fair to state that the purpose of the merchant marine act which Congress passed was to provide—

> for the actual transportation of foreign mails; the development of naval and military auxiliaries, and the development of foreign and domestic trade and commerce.

Under that act various shipping companies have expended many millions of dollars in building, under Navy specifications, faster and better ships in American shipyards, employing American labor. So the story should go out to the American people at the same time the Senator's remarks go out that there is more to this item than merely the carrying of a certain number of pounds of mail for a given amount. The shipping companies have agreed to do certain things before they have gotten the money.

Mr. McKELLAR. I am delighted the Senator has brought that out. These companies have agreed to do certain things. What have they agreed to do? We investigated the building of new ships, and it was found that the Government itself, under a revolving fund of the Shipping Board, has been engaged in lending these very shipowners money at one-quarter of 1 per cent interest, three-eighths per cent interest, one-half per cent interest, three-quarters per cent interest, and in some instances even as high as one and a half per cent interest. That is just another subsidy which we are giving to the shipowners, who need no subsidy.

The vice president of one of the shipping concerns that came before our committee testified that his company was worth $250,000,000; that it discounted its bills; that it was paying dividends regularly; that it had no bonded indebtedness, no indebtedness of any kind, and yet was drawing a subsidy from the Government of $1,200,000 a year for carrying a few hatfuls of mail to South America and Central America. Mr. President, such things are indefensible. I am glad the Senator mentioned the fact he did. Talk about the building of new ships! Yes; they are building them on Government money at such rates of interest as I have indicated, and not only that, but I am told on good authority that the majority of these shipping concerns which have borrowed Government money at such ridiculously low rates of interest are in default on even those rates of interest.

Mr. TYDINGS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Maryland?

Mr. McKELLAR. I yield.

Mr. TYDINGS. I should like to remind the Senator that in a certain committee, of which both of us are members, there is now in the offing an appropriation of $8,000,000 with which to irrigate some new land, and by actual calculation it will cost the land which is going to be irrigated $75 an acre. In other words, the number of acres proposed to be irrigated divided into the appropriation gives a result which shows a cost of $75 an acre, and I have not the slightest doubt in the world that the appropriation will go through. So the Government is going to spend on one project at the rate of $75 an acre.

Mr. McKELLAR. Mr. President, the Senator is not only right in that statement, but in this bill and in other bills that come before the Appropriations Committee it would be the easiest matter in the world to eliminate unnecessary expenditures, to cut off these subsidies, to cut off this legalized graft, if I may so speak of it, and bring the appropriations down within the reasonable terms of the resolution of the Senator from Maryland.

Let me call attention to another matter. Listen to this provision which is in the bill we are about to pass:

That not to exceed $7,000,000 of this sum—

That is, of the $35,500,000—

may be expended for carrying foreign mail by aircraft under contracts which will not create obligations for the fiscal year 1935 in excess of $7,000,000.

What does that item mean? An aircraft concern, known as the Pan American Line—not an American but a Pan American line—which operates aircraft to various cities in Central America and South America, is to receive $7,000,000. Are they carrying mail? Hardly a hatful. Are they carrying passengers? They are carrying hardly any at all. I obtained a statement not long ago from this very company, and their entire income, as I remember, was less than seven and a half million dollars, and $7,000,000 of it came from the subsidy paid by the American Government. Is there any use for it? No. They will laugh and tell you that the only reason they are running this line is to get the $7,000,000; and what air concern would not do it? It is an easy "pick-up," "easy money." It is nothing but legalized graft; that is all it is—$7,000,000 to this air company whose planes fly around Central and South America.

But that is not all. There is a provision in this bill providing subsidies to aircraft companies of $19,000,000. Under the present arrangements practically all the aircraft companies have combined into four great corporations. I can not name them, but the Eastern Air Transport Co. is one and three big aircraft companies running to the Pacific coast constitute the others. They are drawing from the Government for operating those airships $19,000,000 a year. People in Detroit, Mich., are hungry; the Government has to help take care of them; and, in order to put my own State in the same boat, let me say that Nashville, Tenn., is borrowing from the Government in order to feed its starving people; and yet this body is about to vote, under these circumstances, out of an empty Treasury—out of a worse than empty Treasury, out of a Treasury that is $5,500,000,000 in the hole—to appropriate $19,000,000 for these companies that need no appropriation.

Why do I say that? I have received a petition from the people of Knoxville and Bristol, Tenn., and probably from other places asking me to vote for a subsidy to the Eastern Air Transport Co. that wanted to establish a line operating through those cities to Washington and thence to New York. I declined to do it. I said I would vote for no subsidy about the matter. I was held up to scorn and ridicule about it; and what happened? Why, last Monday morning the Ludington Air Line, drawing not one cent of subsidy from the Government, independently operated, put in a line from Nashville to Knoxville to Bristol to Washington, and on to New York—they already had one from here to New York—carrying whatever comes to them, whatever it may be, without any subsidy at all.

I say all honor to such a line as that. I am glad to see aircraft built up; but, oh, Senators, we ought not to take the taxes of the people and give them to these four favored institutions. We have no moral right to do it. It is a wicked thing for us to do; and I say that the sooner we cut these subsidies out of the bill, the better it will be.

Mr. TYDINGS. Mr. President, will the Senator yield right there?

Mr. McKELLAR. I yield to the Senator from Maryland.

Mr. TYDINGS. May I ask the Senator as a practical proposition whether the Appropriations Committee can not do this job if it makes up its mind to do it?

Mr. McKELLAR. Why, it would be the easiest thing in the world. It was argued here on the floor last year that if, under a similar resolution, we sent back five bills to the Committee on Appropriations, the committee could not reduce them; but we did send them back, and the committee did reduce them, and they passed, and we saved that much of taxes to the American people.

Mr. HALE. Mr. President, will the Senator let me answer the question of the Senator from Maryland?

Mr. McKELLAR. Surely; I am glad to yield.

Mr. TYDINGS. And will the Senator from Tennessee permit me to answer the Senator from Maine?

Mr. McKELLAR. Certainly.

Mr. HALE. As I stated this morning when I was trying to get the Republicans of the Senate to expedite the passage of the appropriation bills, the President, in a recent message, has explained to us that of the appropriations that are in the Budget for the next fiscal year, only about $461,000,000 are appropriations that can be lowered.

Mr. TYDINGS. Mr. President, let me call to the attention of the Senator a point that never has been discussed in that particular connection. We have $8,000,000,000 of Liberty bonds callable this year. We have a $2,000,000,000 deficit which we will have to go out into the market and borrow this year. I put it up to the Senator, as a business proposition, if we can not borrow $8,000,000,000 at a lower rate of interest than we can borrow $10,000,000,000?

Mr. HALE. I do not see what that has to do with this matter.

Mr. TYDINGS. It has a whole lot to do with it, because we are now spending 25 cents out of every tax dollar just to pay interest on Government obligations.

Mr. HALE. I am talking about the appropriations and the Senator's proposition that we cut down the appropriations to the amount of our estimated revenues. I have shown this morning that our deficit will probably be somewhere between four and six hundred million dollars.

Mr. TYDINGS. Why, if the Senator from Tennessee will permit me, that is absolutely an unreliable, though well-intentioned, statement.

Mr. HALE. I can assure the Senator that it is well-intentioned.

Mr. TYDINGS. First of all, take the item of $480,000,000 in the Senator's estimate. Three hundred and some odd million dollars of that amount he expects to get from foreign governments, part of which have not paid their installments now, and we all know that in June some more of them are not going to pay them.

Mr. HALE. But, Mr. President, let me correct that statement. When I say "between four and six hundred million dollars deficit," I take into consideration what the President stated, and that was that our revenues would probably be from one to three hundred million dollars less than the $2,900,000,000 that has been estimated, and that is on account of those very foreign debts.

Mr. TYDINGS. No; as the expenditures are now projected, we are appropriating roughly $4,000,000,000. The President himself admits that with revenues coming up to the estimates, and with foreign-debt returns coming in, we are only getting $2,900,000,000 of revenue. If, now, we take off $300,000,000 more because the estimates are above the

revenues, that means that we are getting in $2,600,000,000 with which to pay $4,000,000,000 of bills.

Mr. HALE. Quite right; but when it is estimated that the expenditures will be a little over $4,000,000,000, we must take away from that amount $534,000,000, because everyone knows that we are not going to reduce the principal of the public debt this year. We must also take away $625,000,000 which comes in as receipts from the Post Office Department.

Mr. TYDINGS. And we must take away from our revenues, in addition to the amounts the Senator mentions, the foreign-debt payments, which we have not gotten and are not going to get.

Mr. HALE. I have already taken that into consideration in my figures.

Mr. TYDINGS. Oh, no; if we take off that $380,000,000 I can assure the Senator that the other commodity taxes will not yield the $2,600,000,000.

Mr. HALE. I have taken the $200,000,000 from that.

Mr. McKELLAR. Mr. President, I think we are getting off the track. Of course, everyone here knows that every single appropriation made by Congress, except the interest on the public debt, can be reduced. There is not any appropriation that can not be reduced except the interest on the public debt. Of course, we all realize that.

Mr. HALE. Mr. President——

Mr. McKELLAR. I yield to the Senator from Maine.

Mr. HALE. I should like to complete my explanation to the Senator from Maryland.

If we have only $461,000,000 of expenditures that can be reduced, it is perfectly impossible to reduce such expenditures three or four hundred million dollars and still expect the Government to go on.

Mr. President, the President of the United States has made an honest attempt, through the Budget, to cut down the expenditures of the Government, and we all want to see it done. The House has made a very exhaustive research into the matter under Democratic control, and has further cut down the appropriations somewhere around $50,000,000. I do not see that there is much chance for a further cut.

Mr. McKELLAR. But last year the same thing was done. That was done by the President last year, and that was approved by the House last year; and yet this body, just by taking a vigorous and determined stand for economy, cut down the appropriations, with the help of the House afterward, $334,000,000 below what the President and the Bureau of the Budget had sent down here, and we can do it again.

Mr. HALE. No; we can not. We have got down to hardpan now.

Mr. McKELLAR. Yes; we can do it again if we just have the courage. That is what it takes to cut down these appropriations.

Mr. TYDINGS. Mr. President——

Mr. McKELLAR. I yield to the Senator from Maryland.

Mr. TYDINGS. The Senator will recall that the President of the United States came right into this Chamber a year ago and went right to that desk and read a statement in which he said that if we would raise $300,000,000 more we would balance the Budget. We raised the $300,000,000 of new taxes, and we have a $2,000,000,000 deficit.

Mr. McKELLAR. Two and a half billion dollars.

Mr. TYDINGS. Now, what is the use of fooling ourselves? We have been fooling ourselves for three years. I may say that I did not vote for the last tax bill, and stated that it would not balance the Budget. I am no expert on financial matters, but every man here who wanted to know the truth knew that the last tax bill would not balance the Budget, and I shall be glad to bet the Senator a new suit of clothes that the deficit now will be larger than the figure he says.

Mr. HALE. It may be larger; it may be very much larger, depending on whether or not the country comes back to prosperity.

Mr. McKELLAR. Mr. President, I want to say this: Our deficit every month is the enormous sum of $200,000,000. We can tell what it is by the day if we divide $200,000,000 by 30. It is nearly $7,000,000 a day; and yet when Great Britain's budget was unbalanced simply $600,000,000, a year or two ago, it caused a political revolution. She remedied it; but we go along blindly and continue to appropriate for subsidies, for legalized graft, paying no attention to the condition of our Treasury.

Now, Mr. President, I want to call attention for a moment to the excuse that is made about these contracts. It is said that the shipping subsidies must be continued because the companies have contracts, because the Postmaster General has made contracts to carry on that shipping. Let me explain just one of these contracts, to show Senators what kind of a contract they make.

For instance, the Postmaster General and the Shipping Board wanted to give a certain shipping company going down to South America three contracts. What did they put in the advertisement? That bids would be considered only from shipping companies having certain kinds of refrigeration facilities; and the advertisement was so worded that but one concern in all the world could bid on the contracts. No other concern bid, because the others did not have that kind of refrigeration; and that company got those three contracts at the highest possible price because they had the specified refrigeration, and no other companies had it. It was a dishonest contract in law, whatever may have been the good intentions as a matter of fact. It was a dishonest contract, legally speaking, and it ought not to be carried out; and, by the way, I am going to offer an amendment that none of these appropriations shall be paid to this company unless they show that they are legal contracts, and that by a court order.

As to the $19,000,000 and the $7,000,000 that is appropriated in this bill for aircraft companies, the Postmaster General has the power to decrease both the price and the routes and decrease the services, so that no such sum as this should be appropriated in any event. He has a perfect right, under the contracts, to bring about this reduction.

So, Mr. President, I say that I am going to vote for this motion to recommit with instructions. We can not keep up this kind of a government. There is no telling what will come if we continue to vote money from the Treasury when there is no money in the Treasury. We shall have to go out and borrow it before we can apply it for these gifts, for these subsidies, for these inordinate expenditures, for these wicked and extravagant expenditures; and I hope that the Senate will vote in favor of the motion of the Senator from Maryland [Mr. TYDINGS].

Mr. DILL. Mr. President, I am glad the Senator from Maryland [Mr. TYDINGS] has made this motion. The Senate at this session has not done a single constructive thing for the good of the American people, as I see it. Here is an opportunity to do something to assure the American people that there will not be any new taxes from Washington, D. C., in the coming year, at least; and if there is any one thing they need to be assured of now, it is that they are not going to have more taxes.

If we are not going to cut these appropriations until they equal expenditures, what are we going to do? There are only two things to do. One is to borrow. We have borrowed now about $5,000,000,000 because of the deficits that the Hoover administration has brought upon this Government by the way it has run it—the most expensive experiment in peace time in the history of the world—and it is unthinkable that we shall continue to borrow money to pay the running expenses of the Government as we have been doing during the past three years.

The other alternative is to raise taxes. Nobody can mention any kind of a tax that we can levy at this time that will not be extremely burdensome to the whole country. This talk about a sales tax at this time is more indefensible than at any time in our country's history. I was reading some statistics a few days ago, presented in one of the McGraw-Hill publications, to the effect that people with incomes of $3,000 and less bought nearly 75 per cent of the goods that were consumed in this country last year and that the people whose incomes were above $3,000 bought about

25 per cent of the goods that were bought and consumed. Yet the people with incomes of $3,000 or less had 30 per cent of the savings of the United States, and the people with incomes above $3,000 had 70 per cent of the savings, and a sales tax such as has been recommended by the President to be imposed to meet the present deficit would place a tax upon that 75 per cent of the business that is already bearing so many taxes it can hardly continue to operate without going into bankruptcy.

The other method of raising taxes is by added income taxes. I have always believed in higher taxes on the big incomes, the higher the incomes the higher the taxes; but every fair-minded man knows there are very few people living now who are making big incomes, there are very few big inheritances being passed down, and if we come down into the smaller brackets, where we will get money by income taxes, we place a burden upon that class of people who offer the only hope for recovery from the present condition.

We are all familiar with how in the last campaign we talked about reducing expenditures. We wrote a platform in Chicago, we elected a President, on a promise to cut expenditures 25 per cent. The Senator from Maryland has come forward with the only practical program to do that thing. Yet we find coming from the other side of the Chamber the same old argument that we can not do it.

We will have a President in the White House who will do it if we put the responsibility on him and give him the power. Cut these expenditures, and give him the authority proposed, and we will not have a new tax bill at the special session. I submit that no man on either side of this aisle, knowing the condition of this country as it is to-day, can face his constituents after advocating more taxes by the Federal Government.

I know we are going to have a tax on beer, but the purpose of that tax should be to abolish some of the nuisance taxes which are now in existence and substitute the tax on beer when it comes.

The statisticians tell us that the total taxes in this country last year amounted to $14,000,000,000. Nobody knows how much money that is, but it is bringing bankruptcy and tax sales all over this country every day.

Mr. TYDINGS. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Washington yield to the Senator from Maryland?

Mr. DILL. I yield.

Mr. TYDINGS. I would like to point out to the Senator that I believe the total income of the people was about $38,000,000,000, so that the figure he gives as to the amount paid out in taxes in one form or another is almost 35 per cent of the people's income.

Mr. DILL. I think the Senator is making it very high when he says it was $38,000,000,000. I think it was nearer $30,000,000,000.

Mr. LOGAN. Mr. President, I believe that the Senator has stated the total cost of the Government, the expenses, and not the total tax payments. I think the tax payments reached only about $9,000,000,000. The rest of the expenditures probably were in the nature of indebtedness incurred. I think the cost of all government reached about $15,000,000,000, but I think there was a deficit of four or five billion dollars that has not been paid yet.

Mr. DILL. The Senator may be right. My memory of the statement was that it referred to taxes. In any case, if the people did not pay it last year in taxes, they will pay it in the future in taxes.

Mr. KING. With interest.

Mr. DILL. Yes, with interest, as the Senator suggests. It seems to me that the first duty of the Members of the Congress is to get this Government on a basis of spending no more than it collects.

Talk about balancing the Budget; the only decent way to balance the Budget, after three years of deficits that run into the billions, it to quit spending money. Additional taxes have been imposed to add to even what we have been receiving, and still the deficit grows.

If the pending bill is sent back and the committee is instructed to make these cuts, and they make the cuts, and give the new President the power proposed to be given him, I venture to predict that he will keep within the appropriations, and we will be able to assure this country that we are going to run the Government on the basis of its income, and not on the basis of borrowing more money.

In light of the fact that in every part of this Union today the people are clamoring for relief, it seems to me that the Senate ought to show that it has some realization of the way the American people feel, by passing an order to the Committee on Appropriations of the Senate to cut the appropriations until they meet the provisions of the resolution.

I am not going to delay the Senate; I do not want to talk any more, because I believe the time has come when the Senate ought to pass these bills. We ought to pass every appropriation bill, so the people will know they are not going to have more taxes in the year that is ahead.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Chaffee, one of its clerks, announced that the House had concurred in the concurrent resolution (S. Con. Res. 41) authorizing the enrollment with an amendment of the bill (S. 5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes.

The message also announced that the House had passed without amendment the following joint resolutions of the Senate:

S. J. Res. 239. Joint resolution authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and for other purposes; and

S. J. Res. 240. Joint resolution to provide for the quartering, in certain public buildings in the District of Columbia, of troops participating in the inaugural ceremonies.

INVESTIGATION BY THE COMMITTEE ON FINANCE

Mr. HARRISON. Mr. President, I ask the Senators in charge of the bill if they will not permit me to have the Senate consider and pass a resolution which I would have urged if I had been in the Chamber when the chairman of the Committee on Finance made his report. It is merely to carry out the provisions of the resolution which authorizes the Committee on Finance to obtain the views of leading financiers and economists as to finding some way out of the economic diversion in which we find ourselves. I am sure there will be no objection.

Mr. ODDIE. Will it lead to any extended discussion?

Mr. HARRISON. It will lead to none at all.

Mr. ODDIE. I am willing to yield if it will lead to no discussion.

Mr. WALSH of Massachusetts. Mr. President, I wanted to suggest the following perfecting amendment to the resolution:

> The Committee on Finance is authorized and directed to take such steps as are reasonably calculated to ascertain (1) what causes have given rise to the developments in the field of commerce, industry, agriculture, and finance which during the last three years have been generally described as the economic depression or crisis, (2) what the trend of these developments is likely to be, and (3) what concrete and specific measures, public or private, if any, should be taken to alter or affect their trend. The committee is authorized and directed to consult all persons an expression of whose views is thought likely to contribute to the determination of the said causes, and the formulation of constructive public policy.

This language would make the investigation assume a less general and a more definite character. I know how anxious the Senator from Mississippi is, and I, too, am anxious, to have action taken immediately on this subject, so I will not press my amendment. I think the scope of the resolution is such that we can approach the inquiry by the committee

in the manner outlined in my proposed amendment or substitute. I have no objection.

The PRESIDING OFFICER. Is there objection to considering the resolution?

There being no objection, the Senate proceeded to consider the resolution which had been reported from the Committee on Finance with an amendment, on page 1, to strike out, beginning with line 9, on page 1, the words "For the purposes of the resolution the committee, or any duly authorized subcommittee thereof, is authorized to hold such hearings, to sit and act at such times and places during the second session of the Seventy-second Congress, to employ such clerical and other assistants, to require by subpœna or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, and to make such expenditures as it deems advisable. The cost of stenographic services to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of the committee shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman," so as to make the resolution read:

Resolved, That the Committee on Finance, or any duly authorized subcommittee thereof, is authorized and directed to make an investigation and study of the present economic problems of the United States with the particular object of obtaining the views of such economists, financiers, and other persons as in the opinion of the committee may be able to offer constructive suggestions with respect to the solution of such problems.

The amendment was agreed to.

Mr. WALSH of Massachusetts. Mr. President, does this mean that the Finance Committee will immediately and actively and continuously conduct the authorized investigation, so that we may have the advantage of the information of the best economic students in this country as to what, if anything, we can do to help remedy the present depressed and discouraging economic outlook.

Mr. HARRISON. That is the object and purpose of the resolution.

Mr. WALSH of Massachusetts. Let us move promptly and submit an economic program to the Senate that will reduce unemployment and restore business to normalcy.

The PRESIDING OFFICER. The question is on agreeing to the resolution as amended.

The resolution as amended was agreed to.

AIR MAIL CONTRACTS

Mr. KING. Mr. President, several days ago I submitted a resolution, which is lying upon the table, reading as follows:

Whereas it has been reported that there is in contemplation the letting of new air mail contracts and the extension of existing air mail contracts, some of which provide for service which will parallel existing lines; and

Whereas before further contracts or extensions should be made it is desirable that full investigation be made by the Congress with a view to determining whether such contracts or extensions are improvident or not desirable in the public interest: Therefore be it

Resolved, That it is the sense of the Senate that the Postmaster General should not let any new air mail contracts or renew or extend existing air mail contracts until the Congress shall hereafter specifically so provide.

I shall not ask for the consideration of the resolution at this moment, but later in the day, if I can get the floor, if it will not interfere too much with the pending measure, I shall ask that the resolution be considered.

I want to say that my information is that many of these contracts made by the Postmaster General have been improvident and unfair to the taxpayers of the United States. They have tended to a monopolistic control of this facility of our Government. I think the Postmaster General should be restrained by some measure which will keep him from making new contracts for lines, some of which would parallel existing lines, and some of which, under the guise of extensions, would be for the purpose of rehabilitating bankrupt organizations, or organizations almost bankrupt.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. McKELLAR. Has the Senator any information that Postmaster General Brown contemplates making any new contracts?

Mr. KING. Yes.

Mr. McKELLAR. I want to call the Senator's attention to the evidence of the Postmaster General before the Committee on Appropriations on December 20 last, as follows:

Senator McKELLAR. How many miles do you propose to increase during the next year?

Postmaster General BROWN. We have no plans. Of course, I will not be with the Post Office Department much longer, and I do not want to do anything that would embarrass the administration of my successor.

As the committee understood it at the time, Postmaster General Brown virtually stated that there would be no increases in these air routes. If he had taken any other position, I think the committee would have made a report in reference to it.

As the senior Senator from Utah [Mr. SMOOT] says, he did say that very thing. I do not know that he does propose such a thing, but surely I can not understand how he would propose to increase the mileage after having made a statement before the committee such as that I have just read.

Mr. KING. I hope the Senator from Tennessee is correct, but I have received some information which indicates that some contracts are to be let, or they are denominated extensions, which will consume a part of the $19,000,000 appropriated at the last session of Congress for this sort of contract. The information I received seemed to be so accurate, and was so authoritative, that I felt constrained to submit the resolution which I have read.

Mr. NYE. Mr. President, will the Senator yield to me?

Mr. KING. I yield.

Mr. NYE. The question has been raised as to whether or not there is any doubt at all as to what the Postmaster General's plans are. I am going to ask that there be incorporated in the RECORD at this point an article appearing in the United States Daily of to-day, January 26, revealing declarations by the Postmaster General before a House committee on yesterday with respect to extensions which he does have in mind granting at once.

Mr. KING. Exactly. That is the information to which I referred.

Mr. McKELLAR. Will not the Senator from North Dakota ask that the article be read?

Mr. NYE. It is very brief, Mr. President, and I think it would be well to have it read.

Mr. McKELLAR. I think that would be well. We would like to know what is proposed.

The PRESIDING OFFICER. The clerk will read the article.

The legislative clerk read as follows:

[From the United States Daily, January 26, 1933]

CHANGES PROPOSED IN AIR MAIL LINES—ADDITIONS AND ABANDONMENTS TO EFFECT SAVINGS, POSTMASTER GENERAL BROWN SAYS

Discussing reallocation of some of the air mail routes, the Postmaster General, Walter F. Brown, testifying before the House Committee on the Post Office and Post Roads January 25, told of Post Office Department plans and activities in respect to air mail contracts.

Replying to a question by Representative KELLY, Republican, of Pittsburgh, Pa., as to the danger of concentration of holdings of stock in these air lines and possible monopoly of contracts, the Postmaster General asked if the committee would authorize him to tell contractors that the committee would disapprove any such concentration of control over the lines. The Postmaster General was assured that the committee would disapprove any such monopoly and that, if necessary, it would recommend legislation in conformance with that position.

The Postmaster General said reallocations of air mail routes would result in substantial economies of operations. He told of abandonments of certain parts of the service, elimination of some duplications, and the opening of several extensions of routes, which, he said, are expected to effect a reduction in average airplane mile cost from 61.8 cents to a little more than 45 cents.

Information made available after the close of the executive session of the committee was as follows:

The committee did not dissent from the changes the Postmaster General outlined. One route described would open a new line from Boston to Milwaukee by the American Airways and Northwestern Airways which would run from Boston to Albany, Buffalo to Detroit via Canada, and Detroit to Milwaukee via Muskegon,

Mich., connecting at Milwaukee with a route to the Northwest through Winnipeg, Canada. Another new route would be by the Transcontinental Air Express from Los Angeles to San Francisco, Evansville, Ind., Louisville, Ky., Columbus, Ohio, to Toledo, and from Columbus to Chicago. Part of this route already is in operation.

The Postmaster General indicated there is no plan to let a contract to the Ludington Lines for mail service over its lines from Nashville, Tenn., to New York City via Washington, D. C. He also said there is no change in the air mail between Wichita, Kans., and Oklahoma City.

The Postmaster General's testimony was in executive session and statements, made from authoritative sources of the committee, are subject to possible correction or enlargement.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Tennessee?

Mr. KING. I yield.

Mr. McKELLAR. I want to refer to the testimony of the Postmaster General appearing at page 38 of the hearings on the Treasury and Post Office Departments appropriation bill on December 20 last, where he said:

We have no plan to increase the mileage.

Mr. KING. Mr. President, if I properly interpret the statement just read as submitted by the Senator from North Dakota, it indicates a purpose upon the part of the Postmaster General, under the head of extensions, to let new contracts. My information is that some time ago a meeting was held, participated in by a number of persons operating or contemplating the operation of air lines, at which the Postmaster General was present. It was there discovered that a number of the airplane routes conducted by private persons were not making any money. Some of the companies were in an almost insolvent or bankrupt condition. A plan was there discussed of saving some of the companies—of course, at the expense of the taxpayers of the United States.

The $19,000,000 has not yet all been expended, though a number of improvident contracts, in my opinion, have been made. Monopolistic control has been sought of the air mail routes, and, in my opinion, the Postmaster General has not been sufficiently responsive to the demands for legitimate and proper competition. My information is that the Postmaster General contemplates, as an extension, letting a contract for a line over Michigan and some of the other routes referred to in the article just read. It seems to me, in the light of the statement just read, that we are justified in the adoption of the resolution which I have offered; but action upon it, as I have stated, I shall not ask to be taken now.

The appropriation bill before us carries an enormous amount for the Post Office Department. That department shows a deficit of considerably more than $100,000,000. I think reforms are needed in the Post Office Department. It has been too extravagant, too wasteful, and there is justification for a demand that the amount carried for the Post Office Department shall be reduced at least 10 per cent.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

Mr. BANKHEAD submitted an amendment intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was read, ordered to lie on the table, and to be printed, as follows:

To amend section 407 (in the committee amendment providing for reorganization of executive departments) by adding thereto the following: " *Provided further*, That any Executive order made by the President under the provisions of this title within 12 months after the approval of this act shall be immediately effective without transmitting the same to Congress."

The PRESIDING OFFICER. The question is on the motion of the Senator from Maryland [Mr. TYDINGS] to recommit the bill to the Committee on Appropriations with instructions.

Mr. TYDINGS. On that motion I ask for the yeas and nays.

Mr. ODDIE. Mr. President, I will say just a few words on the motion of the Senator from Maryland. I think it should be stated clearly that the bill as it has come from the Appropriations Committee of the Senate carries $194,806,236 less than the bill passed last year, and carries $32,887,000 under the estimate of the Bureau of the Budget.

The House worked on the bill for a long time. I refer Senators to the House hearings, which are interesting and complete. The Senate Committee on Appropriations worked diligently on the bill and I refer to the Senate committee hearings. The committee has done its best in cutting down the appropriations carried in the bill to as low a figure as could safely be done without crippling the various activities of the Government. If these activities are crippled, the American people will suffer, more men will be thrown out of work, wages will be further reduced, and the whole picture will be gloomy.

Mr. President, the committee has done its best; and I feel, personally, that the bill is a satisfactory bill. We would all like to see various items cut if it was possible without crippling the Government activities, but I feel that such severe cuts as are suggested by the Senator from Maryland will absolutely ruin some of our governmental functions.

I shall not at this time answer some of the statements made by the Senator from Tennessee [Mr. McKELLAR] regarding air mail and ocean mail contracts. That matter has been thrashed out on the floor of the Senate during the last several years. The Senator has made many statements regarding them last year which were answered and controverted on the floor of the Senate. I could answer them again, but I am not going to do so just now, in view of the pending motion. When we reach those features of the bill, we can discuss them. I will merely refer the Members of the Senate to the Senate committee hearings. There are some valuable statements in those hearings relating to the air mail and ocean mail contracts which prove their value conclusively. The American people should know that there are two sides to the question. There has been much misleading data and propaganda put out to them which is biased and misleading relating to these matters, and which is doing harm.

Mr. President, I am willing the matter should come to a vote, but I feel that it will be a mistake for the Senate to send the bill back to the committee. I do not think the cuts demanded in the motion of the Senator from Maryland can be carried into effect without doing serious injury to our Government and our people and industries.

Mr. DILL. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Washington?

Mr. ODDIE. I yield.

Mr. DILL. The Senator from Nevada stood here a year ago and protested just as vigorously that we could make the 10 per cent cut then proposed in the Post Office and Treasury Departments appropriation bill, and which the Senate ordered; yet it was done and we did cut that much off of the appropriations. Therefore some of us hesitate to take too seriously the Senator's protest to-day.

Mr. ODDIE. But this bill relates to the fiscal year ending in 1934. Last year we were considering the bill relating to the fiscal year ending in 1933.

Mr. DILL. Absolutely; but the Senator will recall that he was just as sure then that we could not cut it 10 per cent as he is now sure that we can not make this cut.

Mr. ODDIE. We did not cut it 10 per cent last year. I think it was pointed out that the cut would have resulted in seriously crippling various governmental agencies.

Mr. DILL. The report made back to the Senate was that the bill had been cut in accordance with the directions of the Senate. I do not know whether it was or not.

Mr. ODDIE. No; not the Treasury and Post Office Departments bill, but some other bill.

Mr. DILL. The Senate committee then violated its instructions.

Mr. ODDIE. The committee reported the bill back to the Senate without that 10 per cent cut, and the Senate approved the bill as reported.

Mr. President, I think we should have a quorum, so I suggest the absence of a quorum.

Mr. TYDINGS. Mr. President, I had asked for the yeas and nays before the Senator from Nevada took the floor. I renew my demand for the yeas and nays.

The yeas and nays were ordered.

Mr. BRATTON. Mr. President, I hope the Senator from Nevada will withhold his request for a quorum for the present.

The PRESIDING OFFICER. Does the Senator from Nevada withhold the suggestion of the absence of a quorum?

Mr. ODDIE. I will withhold it for the present if there is to be further discussion on the motion of the Senator from Maryland.

Mr. BRATTON. Mr. President, some criticism has been directed against the Appropriations Committee for its failure to reduce the figures in this bill and in other bills. No doubt much of that criticism is merited. As a member of the committee I am entirely willing to bear my full share of it. But let me remind the Senate—and I am a party to this also—that from week to week, from month to month, from session to session, we pass authorizing bills, authorizing appropriations in large sums for this, that, and the other. We sometimes do that without much consideration. Then the Committee on Appropriations is confronted with the obligation to include those matters in the appropriation bills. The fault originates in the passage of the various authorizing bills. I take a full share of this condemnation to myself when I say that we should be more careful in passing authorizing measures.

Mr. KING. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Utah?

Mr. BRATTON. I yield.

Mr. KING. Does the Senator take the position that an authorization is a compulsion to carrying appropriations in appropriation bills?

Mr. BRATTON. Virtually so. It is generally regarded so.

Mr. KING. I agree with the Senator that it is usually regarded as a direction, but I have not been able to bring my mind to accept the view that it is compulsory upon the Appropriations Committee to add the amounts so authorized. An authorization, for instance, for a reclamation project or for the development of some river or harbor may or may not be more than a direction that it shall be considered. I do not regard it, though I may be in error, to be compulsory upon the part of the committee to include the appropriation in an appropriation bill.

Mr. BRATTON. Mr. President, I intend to vote for the resolution offered by the Senator from Maryland [Mr. TYDINGS]. The party to which I pay allegiance, in its platform adopted at Chicago last June, pledged the taxpayers of the country a reduction of 25 per cent in the appropriations of the National Government. I believe it is incumbent upon every Member on this side of the Chamber to lend his best efforts to effect that platform promise.

There is one thing very noticeable. Whenever it is undertaken to retrench any expenditures, those who are opposed to it urge that " we can economize elsewhere, but not here." That argument is made over and over again. We are confronted with it every time we undertake to reduce Government expenditures.

I would be willing to vote for the resolution of the Senator from Maryland if it required the committee to apply the 25 per cent horizontal cut from beginning to end of the bill. Then, if the economy section is written into the bill, the President elect, through the exercise of that authority, can conform the activities of the departments to the amount of money provided.

It is my belief that we will never effect substantial economies except through a system authorizing the Chief Executive to consolidate and merge and abolish services and activities of the Government. It is a drastic step that is proposed in the economy section of the bill. I grant that. But I intend to support it, because the taxpayers of the country will never get substantial economies otherwise.

Mr. President, a few days ago I introduced a resolution authorizing the appointment of a joint committee of the Senate and the House to consider the advisibility of abolishing the Department of Commerce and the transfer of its indispensable services to other departments. It is my belief that the expenses of that department are out of all proportion to the benefits derived from it.

I have before me a table showing the appropriations made for the several departments during the last 10 years. In the Department of Commerce the appropriations have risen from $22,115,621.94 in 1924 to $45,213,200.19 in 1933—an increase of more than 100 per cent in the appropriations for that one department in a period of only 10 years.

What good are we receiving, what return are we getting from an annual expenditure of over $45,000,000 for that department when many of its services overlap and duplicate those of other departments? Mr. President, we may well turn our attention to the matter of dispensing with that department and transferring its services deemed to be indispensable to some other department.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Nebraska?

Mr. BRATTON. I yield to the Senator from Nebraska.

Mr. NORRIS. I came into the Chamber after the pending motion was made. I understand it to be a motion to recommit the bill.

Mr. BRATTON. It is.

Mr. NORRIS. With instructions to reduce it by 10 per cent?

Mr. BRATTON. There is no amount fixed; but it is proposed to recommit the bill with instructions to reduce the appropriations carried in the several bills to such an amount that the Government will be enabled to operate within its income. Obviously the Senator from Maryland [Mr. TYDINGS], who submitted the motion, has in mind similar action in the case of all the appropriation bills, designed to bring our total appropriations within our income.

Mr. NORRIS. Mr. President, if the Senator from New Mexico will permit me to interrupt him further, I desire to say this idea has entered my mind: I remember that at the last session of Congress we took similar action as to several appropriation bills. I voted against referring the first of those appropriations back to the committee, but after we had submitted several appropriations to that treatment it seemed to me we ought to pursue that course as to all of them. After that I voted to send those bills back to the committee.

I want to ask the Senator what assurance have we, if the motion shall prevail, that we shall be able to get the same treatment on other bills? The Senator will remember that at the last session when appropriation bills were recommitted reductions were made in some of them, but when it came to the Army appropriation bill and the naval appropriation bill those bills were not subjected to that kind of treatment.

Mr. McKELLAR. In the case of those bills the proposition was defeated by a few votes.

Mr. NORRIS. Yes. If we could have assurance that all the appropriation bills were going to be treated alike, some of us would feel more inclined to support a proposition of this kind; but if there shall be done what was done at the last session, namely, reduce all appropriations excepting those for the Army and Navy, and have such appropriations increased rather than reduced, what assurance can we have that if we send this bill back with the object stated in view, we are going to be able to send all the other bills back in the same way?

Mr. BRATTON. Mr. President, if the Senator will recall, we took the action last year after one of the bills, to wit, the bill providing for the Department of Agriculture, had passed both branches and was in conference. We began too late. This, however, is the first appropriation bill to be considered during the present session of Congress. The only assurance we can have that similar treatment will be accorded all the appropriation bills is the solemn determination in the mind of each one of us to accomplish the end

contemplated by the Senator from Maryland, namely, that when we shall have passed all the appropriation bills the combined sums appropriated will be within the revenue of the Government.

That would not necessarily mean that we should have a 25 per cent cut in this bill, and a 25 per cent cut in the next bill, and so on, with each one of them; it may be that the sums will vary upward and downward, here and yonder; but, as I understand, the purpose contemplated by the resolution sponsored by the Senator from Maryland—the Senator has now returned to the Chamber and I hope he will give ear—it is that in the matter of the appropriation bills to be passed at this session of Congress the total sum appropriated by them shall be a sum equal to or less than our contemplated revenue; in other words, that we shall be on a self-sustaining basis instead of increasing the deficit already confronting us.

Mr. TYDINGS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Maryland?

Mr. BRATTON. I yield.

Mr. TYDINGS. The Senator has stated the object which I seek to obtain by the resolution, namely, of not spending more than we are going to take in.

May I make, in furtherance of that, the single observation, that a great deal of the complaint due to a reduction of salaries or what not is very just, because we only made a reduction in a single item rather than in the Government expenditures as a whole; and that if we apply the reduction to everything there will be less dissatisfaction by those affected?

Mr. BRATTON. Mr. President, I was discussing the enormous increase in the appropriation for the Department of Commerce.

Mr. VANDENBERG. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Michigan?

Mr. BRATTON. I yield.

Mr. VANDENBERG. Before the Senator pursues that subject, can he explain this for my information: Suppose that the total economy contemplated by the pending motion were prorated among the various bills, how much would the appropriations in the pending bill have to be reduced in order to come within the curtilage of this amendment?

Mr. BRATTON. That I can not tell the Senator; I do not have that information.

Mr. TYDINGS. Mr. President, may I answer that question?

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Maryland?

Mr. BRATTON. I yield.

Mr. TYDINGS. May I point out to the Senator that in the early part of my remarks I indicated four or five different places in the appropriations for the Government where approximately $200,000,000 would be saved without any, at least, apparent, injustice to any one? I do not mean to say that necessarily this bill might have to be pared at all; but what I do mean to say is that we should contemplate all the money we are going to receive and cut our cloth to fit the person we are about to clothe, which is the Government.

For example, I pointed out—if the Senator from New Mexico will permit me further—that a number of Army officers who are receiving from four to six thousand dollars a year in retirement pay were going into private industry and earning tremendous salaries. In my judgment, during this emergency, if they can make more in private undertakings than they were receiving when they were in active service in the Army, we ought, at least, to reduce their allowances if not wipe them out altogether. Furthermore, there are emergency officers who are receiving from $225 to $250 a month, and I referred to one officer who was on three Government pay rolls besides practicing his profession, and I thought we could attend to him, and that we should make cuts all through this structure, and not just go back to the Government employees and pare 10 per cent from their salaries and consider that our work was done.

Mr. VANDENBERG. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield further to the Senator from Michigan?

Mr. BRATTON. I yield.

Mr. VANDENBERG. I cordially agree with the exhibits submitted by the Senator from Maryland, but the amounts involved are utterly infinitesimal in respect to the grand total that is involved in this contemplation. If we are not to be reasonably consistent in our treatment of each bill, will it not be necessary for us to make all our appropriations this year in one single bill—if we are to achieve safely and dependably the results the Senator has in mind?

Mr. BRATTON. I think not. We can arrive at that figure with reasonable accuracy by considering the amounts heretofore appropriated, the revenues heretofore received, and the contemplated revenue. Then we can prorate the necessary reductions among the various bills with reasonable accuracy. But, Mr. President, the governing principle, the decisive consideration in the whole equation, is to put the Government on a balanced Budget basis by keeping our appropriations within our income, just as a successful business man or a successful household must do. Let us determine, first, how much money we may reasonably expect and then appropriate accordingly.

Mr. VANDENBERG. Mr. President, agreeing cordially to the principle announced, I return to my original question. Has the Senator any figures whatever to indicate the extent of the responsibility which we would confront if we should undertake to implement his theory?

Mr. BRATTON. I have not; and that is the very reason the Senator from Maryland has proposed that the bill be recommitted to the Committee on Appropriations, in order that such fact may be ascertained and the figures be made to conform to that formula. That is the purpose of the resolution. We can not do it on the floor of the Senate; of course not; but the committee, with the aid of experts and accountants and actuaries, should be able, without great difficulty, to determine the amount of reduction that is necessary in each of the several appropriation bills in order to bring their total figure within the Nation's income.

Mr. MOSES. Mr. President, may I ask the Senator a question?

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from New Hampshire?

Mr. BRATTON. Certainly.

Mr. MOSES. Would not that be a mere rule of thumb? That is to say, by taking the sum total of this appropriation and applying the rules of proportion to determine the reduction which should be made in terms of dollars and cents. The whole picture would not be before the committee in my opinion. I submit to the Senator from New Mexico that a far better and more effective way of dealing with the whole subject would be to take each appropriation bill as it comes here, recommit it, and then let it lie in the committee, so that the remainder of the present session may be free for the consideration of other measures. Then, when the extra session comes, as it must come soon after the 4th of March, there will be ample time between then and the 30th of June to make up and formulate the appropriation bills along the terms of the glittering promise made by the Senator from Washington, and we shall not be subject to the criticism of having handicapped the new administration by forcing extravagant appropriations upon it for the first fiscal year of its existence.

Mr. BRATTON. I am sure the Senator from New Hampshire would be the last one to embarrass the incoming administration, and I acquit him of any such desire. [Laughter.]

Mr. ROBINSON of Arkansas. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Arkansas?

Mr. BRATTON. I yield.

Mr. ROBINSON of Arkansas. I should like to ask a question, having in mind some practical considerations. This resolution contemplates a reduction of how much in the aggregate, I inquire of the author of the resolution?

Mr. TYDINGS. According to the President's figures, it would be $500,000,000, in round numbers.

Mr. HALE. Mr. President, I should like to question that.

Mr. TYDINGS. The Senator himself made that statement on the floor of the Senate not over an hour ago.

Mr. HALE. I was referring to the situation provided the postal revenues were deducted.

Mr. TYDINGS. May I say to the Senator from Arkansas that a reading of the President's message, as I recall, shows $496,000,000 as the needed reduction.

Mr. ROBINSON of Arkansas. Mr. President——

Mr. BRATTON. I yield.

Mr. ROBINSON of Arkansas. I understand the figures as stated by the Senator from Maryland to be approximately correct, although, to be accurate, as I remember, they were $492,000,000. The question in my mind is, first, whether the Appropriations Committee considered the proposal made by the Senator from Maryland; whether an effort was made before reporting the bill to apply the principle now invoked in the resolution?

Mr. BRATTON. I may say to the Senator from Arkansas that no such effort was made.

Mr. ROBINSON of Arkansas. If the Senator will indulge me for a brief statement——

Mr. BRATTON. I do.

Mr. ROBINSON of Arkansas. It may be important to take into consideration in this connection the question as to what will be the status of the general appropriation bills if this rule shall be adopted and whether it is possible within the view of the committee to execute it.

Mr. BRATTON. Let me say to the Senator——

Mr. ROBINSON of Arkansas. Will it result in the defeat of the appropriation bills and passing them over beyond the end of the present session?

I realize that there is no motive of that kind in the mind of the author of the resolution. I realize that he is prompted by a very important consideration. I think two-thirds of the people of this country believe that that is the practical way to balance the Budget; but I point out the further fact that the figures here relied on of the amount necessary to balance the Budget—namely, $492,000,000—are in all probability inaccurate, and that a much larger sum actually will be required to accomplish the purpose of a balance.

I see that the chairman of the Finance Committee, the Senator from Utah [Mr. SMOOT], nods his head in approval, and other important Members of the Senate. I think, while we are discussing this subject, we might just as well enter into the consideration of that phase of it.

It is my judgment, from the limited study I have been able to make, that $800,000,000 would be much nearer the figure required to balance the Budget than $490,000,000 or $500,000,000. So that is a question of strategy of the very greatest importance to all of us—whether, first, we desire to take a course which may defer the disposition of these appropriation bills beyond the end of the present session and leave that load on the incoming administration, as well as the many other important burdens which we all know must be borne after a new President is inaugurated.

I realize that there may be a few Senators who would not be loath to see that end accomplished. In my opinion, this problem of balancing the Budget is not so simple as some have stated it to be. It is difficult to accomplish that end in a time when prices are constantly falling and earnings are continuously diminishing. No one more than I would like to see the principle in the resolution of the Senator from Maryland applied, but I want to be frank and not offensive to anyone. I doubt whether the Senate of the United States has the courage or the ability to carry out the resolution if it is agreed to.

The Senator from New Mexico [Mr. BRATTON] a few moments ago said a thing that is literally true: We are all the time talking economy, and talking of balancing the Budget, but we have not done either to any very great degree. When we talk of economy in the abstract, we are all in accord. When we come to apply it in detail, or to specific appropriations, we immediately divide hopelessly into factions, with the result that very little is accomplished.

I think the thing for the Senate to do before passing the resolution of the Senator from Maryland is to make up its mind whether we are going through on this proposition. If we are not going through on it, then the resolution ought not to be agreed to.

Mr. KING. Mr. President, will the Senator yield?

Mr. ROBINSON of Arkansas. I have not the floor. I had concluded all I had to say. The Senator from New Mexico has the floor.

Mr. KING. Will the Senator from New Mexico permit an interruption?

Mr. BRATTON. Yes; I yield to the Senator from Utah.

Mr. KING. May I suggest to the leader upon this side that I entirely agree with him. I think the deficit will be nearer $800,000,000 than the amount indicated by the able Senator from Maryland, and that figure I stated some time ago.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. BRATTON. I yield.

Mr. TYDINGS. I do not say that that is the correct figure. I have something more to say on that subject.

Mr. ROBINSON of Arkansas. Mr. President, may I ask the Senator from Maryland, in the time of the Senator from New Mexico, what he thinks the approximately correct figure is to-day?

Mr. TYDINGS. Mr. President, without the foreign-debt payments, and with the decrease in revenues anticipated, I believe it will be close to a billion dollars; and may I say that the purpose of my resolution was at least to conform with the highest authority in the Government, rather than to have no reduction at all.

Mr. BRATTON. Mr. President, suppose we take the figure of $500,000,000 as a basis for our calculations, and let us assume that it proves to be inaccurate, that it is too small: Is it not better to economize by the amount of $500,000,000 than to forego any effort at economy? Is it not better to save that much than none? We would have that much less deficit; we would have that much more economy; we would have that much more contribution toward the stability of Government as a contribution to the restoration of industry in this country.

Mr. VANDENBERG. Mr. President, may I ask the Senator one more question at that point?

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Michigan?

Mr. BRATTON. Yes.

Mr. VANDENBERG. As a practical proposition, however, if we are not going to apply the sum total pro rata on the various bills, how can we determine what our problem is in respect to each bill except as we wait until all bills are before us?

Mr. BRATTON. Mr. President, I realize the force of the suggestion of the Senator from Michigan. We know that our appropriations for last year were $4,977,000,000 plus. We know what the total appropriation for each department was. We know that if we are going to cut our appropriations $500,000,000 it must come out of those departments for which we appropriated almost $5,000,000,000 last year. If $500,000,000 is the mark that we are going to shoot at, then we must evolve a well-considered program, and apportion that sum by way of reductions among the several bills in the best way that we can devise.

Bear in mind all the time, Mr. President, that if the economy provision attached to this bill is enacted into law, the Executive will be able to conform the activities of the several departments to the amount of money appropriated. If necessary to consolidate some, if necessary to terminate others, if necessary to do away with overlapping and duplication here and yonder in order to bring the expenditures within the amount of money appropriated, he has the authority to do those things under the provision proposed in this bill.

Mr. SMOOT. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Utah?

Mr. BRATTON. I yield to the Senator from Utah.

Mr. SMOOT. I desire to ask the Senator if, in his proposition, he includes the permanent appropriations?

Mr. BRATTON. Yes, Mr. President. I have before me a statement prepared by the Treasury Department which includes the annual, supplemental, deficiency, and permanent annual and indefinite appropriations. It appears to include the appropriations of every kind and description.

Permit me to say in that connection that we are talking about our increase in expenses. One of the chief causes of our increase in expenses has been in the independent offices—that is, bureaus, commissions, directors, supervisors, supersupervisors, and so on.

In 1924 our appropriation for independent offices was $522,000,000 plus. Ten years later it was $1,873,000,000, or an increase of almost 300 per cent, because we created one bureau and one commission and one service after another. Always the original cost is increased from year to year; and we are now confronted with the severe indictment that during the last 10 years the appropriation for independent offices has increased from $522,000,000 to $1,873,000,000, or almost 300 per cent.

Mr. DICKINSON. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Iowa?

Mr. BRATTON. Certainly.

Mr. DICKINSON. Is it not true that most of that increase is the Veterans' Bureau, which is carried in that bill?

Mr. BRATTON. No doubt a great part of it is, but not all by any means.

Mr. DICKINSON. I want to suggest that this is the Treasury-Post Office bill. The Senator, being a member of the Economy Committee as well as myself, heard the testimony of many people with reference to where economies could be made. If we are to reduce Government expenditures another $500,000,000 or $800,000,000 we shall practically have to wipe out what we call the civil functions of the Government—the various bureaus and departments of the Government—or else we shall have to reduce the veterans' compensation, or the Army and the Navy. Is not that true?

Mr. BRATTON. I do not agree with that. When we do away with our unnecessary services, and our duplication and overlapping in the ordinary and useless operating expenses of the Government we shall have absorbed hundreds of millions of dollars.

Mr. DICKINSON. Is it not true that in the Post Office Department 85 cents of every dollar that is appropriated goes to the payment of labor and that any reduction that amounts to anything in that department means another individual out of employment or the reduction of some one's salary?

Mr. BRATTON. Undoubtedly it involves some reductions in salaries.

Mr. President, I was talking about expenses in other departments. I have prepared, and intend to introduce shortly, a bill to consolidate the Departments of Agriculture and Interior. Substantial savings could be effected if that were done.

Those two departments overlap and duplicate perhaps more than any other two departments of the Government. They both deal with internal affairs. They travel along similar lines. They deal with common subjects; yet we have the two departments with two sets of overhead, with enormous duplications, enormous overlapping, and enormous waste.

In 1924 the appropriation for the Department of Agriculture was $110,000,000. In 1933 it was $372,000,000, or an increase of more than 250 per cent in that department.

In 1924 the appropriation for the Department of the Interior was $343,000,000. Of course at that time the Veterans' Administration was under that department. In 1933, for that department, after being freed of the Veterans' Administration, the appropriation was $82,000,000.

The appropriations for the two departments combined were more than $425,000,000 in 1933. We can effect enormous savings by consolidating those two departments and without sacrificing any beneficial service in either of them.

Mr. BLAINE. Mr. President, will the Senator yield for a question?

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Wisconsin?

Mr. BRATTON. Yes.

Mr. BLAINE. Do the figures the Senator is giving include the seed-loan provisions in the Agricultural Department?

Mr. BRATTON. I do not so understand.

Mr. BLAINE. They are exclusive of the amount appropriated for seed loans?

Mr. BRATTON. That is my understanding, although I am not certain of that.

Mr. BLAINE. The Senator assumes that the amount named by him is for administration only?

Mr. BRATTON. Yes.

For those two departments we are appropriating more than $400,000,000. Why can they not be consolidated and the services now performed by both of them be performed under one head, one directing, administrative officer, with enormous savings? I believe we can save $75,000,000 annually by consolidating those departments.

Mr. KENDRICK. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Wyoming?

Mr. BRATTON. I always take pleasure in yielding to the Senator from Wyoming.

Mr. KENDRICK. I desire to ask the Senator from New Mexico if he does not see the possibility of great economies in connection with the Interior Department in a plan that would transfer the public lands now held by the Federal Government to the States in which they are located?

Mr. BRATTON. Yes, Mr. President, and I join the Senator from Wyoming in expressing the earnest and fervent hope that those lands will be ceded to the States at some date in the near future. It would give the lands a better degree of husbandry, they would be better protected, they would be conserved, they would be put to a beneficial use, they would be income-bearing and revenue-bearing. It would be better in every respect.

Mr. KENDRICK. I may say, if the Senator will permit further, that nearly every State in which public lands of any considerable acreage are now located has an organization complete within the State for handling the lands, the same as they are now handled by the Federal Government.

Mr. BRATTON. Yes. The Senator from Wyoming speaks from an abundance of close study and ripe experience in these matters.

If the two departments concerned could be consolidated under one head, with the elimination of one set of overhead expenses, with the elimination of duplication and waste, with a measurable degree of economy and efficient administration, in my opinion we could save $75,000,000 to the taxpayers of this country without sacrifice of any beneficial service in either of the two departments. It seems to me, Mr. President, that we may well give early consideration to that proposal.

Returning to the resolution proposed by the Senator from Maryland, because that is the matter now pending, we will never economize unless we begin. If we vote down the resolution and pass this appropriation bill we will do the same with each succeeding appropriation bill, and in the end we will have appropriated an enormous sum of money, far beyond our revenue, and our deficit will increase instead of diminish.

I hope that we will cut these appropriation bills, and at the same time enact the provision giving the President the power to consolidate and merge and abolish services, in order that, through the administration of that power, he may conform the expenditures to the money appropriated. That is the only way, in my opinion, we are going to effect economies.

Mr. President, we can scarcely abolish a single bureau. We propose in this bill to abolish the Bureau of Efficiency,

and while nobody can tell what it has done of a helpful character, I am not certain that the provision will remain in the bill. I am not so sure that Congress can abolish the Bureau of Efficiency, let alone effect substantial economies in reconstructing the fabric of our Government.

The only way we are going to do that is to confer the power upon the President. It is a drastic step, but we are dealing with a desperate situation. The question confronting Congress is whether we are going to do it by a method we are reluctant to adopt or not do it at all. Those are the two alternatives confronting us. We can take the one, or travel the other course. We can either confer the power upon the President, or waive all efforts to economize, and continue to appropriate $4,500,000,000 annually.

I shrink from the suggestion of increased taxes. What this country needs is economy, a reduction of the tax burden. It is all right to say that we are going forward under heavy steam and with lavish expenditures, as we did five years ago, or thereabouts. An individual does not free himself of a desperate financial situation by continuing to spend more and more money. He must economize in order to free himself of an embarrassing financial situation. The same is true of the Government.

We have reached an important question. The Senator from Arkansas never declared a truer assertion than he did a few moments ago when he said that we must determine whether we are going through with the program, or not undertake it. We had better resolve, individually and collectively, that we are going through with the program. We promised it in our platform. I think that provision appealed to the electorate of the country as much as any other provision in the Democratic platform, and a failure to make a good-faith effort to perform that promise in my opinion would be almost a breach of faith. We are obligated, solemnly obligated, to undertake the task, and now is the time to begin. If we shrink from it in connection with this bill, of course we will not take the step on a subsequent bill. The solemn duty of deciding the question confronts us individually and collectively.

I intend to vote for the resolution of the Senator from Maryland, and let this bill go back to the committee. Then we can begin the study, we can undertake the task, we can ascertain how much we must cut, and then we can apportion it among the several bills to the very best of our ability, making allowance for human fallacy, human mistakes. We can do the very best possible, and then trust the Government to get along.

Mr. President, I remember when we were making some cuts a year ago we were told that if we made them, we would virtually disrupt the Government. We made them, and, so far as I know, the Government went along fairly well, and its business has been conducted in a fairly satisfactory way. We are confronted with that argument every time we undertake to economize.

Mr. SMITH. Mr. President, will the Senator yield to me?

Mr. BRATTON. I yield.

Mr. SMITH. I have not heard the resolution proposed by the Senator from Maryland, but I know that last year an attempt was made to recommit the appropriation bills with the recommendation, or the order, or the command, to reduce them a certain percentage. I happen to know of one of the appropriation bills which will be reported to this body, in which the appropriation will represent a cut of something like 60 per cent of what it was last year. It may be all right, and no harm may be done to the public welfare in the discharge of the functions of the particular department concerned by that cut. What I would like to know is, are we to pass a resolution calling for a specific reduction in the appropriations for every one of the departments, or ascertain where we may make major cuts and minor cuts, so that the aggregate would bring about the result, rather than make a flat direction for a reduction in every department?

Mr. BRATTON. Mr. President, perhaps the Senator was not in the chamber when the Senator from Maryland interposed his motion. It does not provide any specified reduction. It is a motion to recommit the bill, with the view of having the aggregate appropriations in the several appropriation bills reduced to the point where our appropriations will not exceed our revenue. Of course, it does not mean a flat 25 per cent of this bill and a flat 25 per cent in each of the others, or anything of the kind. The purpose of it is to cut the total appropriations to the point where they will be within our revenue, leaving the Committee on Appropriations and the Senate itself, of course, free to vary the cuts in the best way possible.

Mr. SMITH. Mr. President, I should like to ask the Senator a further question.

Mr. BRATTON. I yield.

Mr. SMITH. Does the Senator think that it would be practicable and beneficial all around to attempt to do what we call balancing the budget—I never heard of that phrase before last year, and I do not know that the budget was balanced, but that is neither here nor there—and cut our appropriations to such a point that our prospective income would take care of the appropriations? Does the Senator think that is practicable within one year? Or should we use such discretion as would be necessary gradually to bring such a condition about?

Mr. BRATTON. Mr. President, perhaps it should be spread over two or three years. I myself have thought that, but the Senator from South Carolina and I and every other Member on this side of the aisle is pledged to a 25 per cent reduction in our appropriations; and unless we begin, we will never make that cut, either 2, 3, or 10 years from now. If we fail to begin with this bill, we will not begin at this session.

Mr. SMITH. The only thing I was concerned about was that I did not like the proposition put forward last year when a committee, after they had worked over the matter, reported a certain bill. Without giving any very cogent reasons, we recommitted the bill with directions for a flat cut, to find some items the appropriations for which could be cut so that the total would result in a 10 per cent cut. I know that there are certain items which have been carried from year to year which can be dispensed with, and I know that there are certain economies which can be effected, but I would prefer, in voting to recommit the bill, to recommit it with the idea that the committee is not to reduce it any specified amount, but every amount which they think is legitimate and right, whether it is 10, 12, 15, or 20 per cent. That was my object in making the inquiry I submitted.

Mr. BRATTON. I doubt not that the Senator from Maryland would agree to the feasibility of spreading the 25 per cent retrenchment over two or three years, but the point is that we must begin some time.

Mr. SMITH. I think we have begun very wholesomely on a bill in the consideration of which I have just been a party. I think we have acceded to what has already been done to the extent of about 55 or 60 per cent reduction. That was in connection with a bill where the appropriation could very well, perhaps, be so reduced. But there are other appropriations which perhaps we can not reduce; and now that I have gotten the attitude of the Senator, which is in accord with mine—that is, that wherever possible we should make reductions without detriment to the service—I want to call attention to another thing. I think the Senator from Maryland this morning referred to a fact which is very vital. We are paying some four or five hundred million dollars interest on bonds which were sold at a time of emergency; and now that we are in just the reverse of that condition, it seems to me the holders of those bonds ought to exhibit the same patriotism that has been forced upon the majority of the American people by circumstances over which they have no control, until they are bled white, and yet, without batting an eye, or a word of criticism, they are paying, and we are distributing to the fortunate class who furnished gold for the prosecution of the war, four or five hundred million dollars.

Mr. BRATTON. Yes, Mr. President.

Mr. TYDINGS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Maryland?

Mr. BRATTON. I yield.

Mr. TYDINGS. I should like to say to the Senator from South Carolina that the present appropriation bill carries $2,075,210 more than the bill for the same department contained last year.

Mr. BLAINE. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Wisconsin?

Mr. BRATTON. I yield.

Mr. BLAINE. I desire to ask the Senator a question so I may obtain the information. Is it contemplated by the resolution offered by the Senator from Maryland and discussed by the Senator from New Mexico to reduce the compensation now provided by law for the totally disabled veterans of the World War in the ratio that may be provided under the resolution?

Mr. BRATTON. That is not as I understand it. I understand that matter was not specifically mentioned one way or the other in the resolution. The resolution contemplates a reduction in the total appropriations. It does not specify how much any particular item or any particular bill shall be reduced. That is left to the Committee on Appropriations first and then to the Senate itself. The object is to cut the appropriations to the point where they will bear some relation to our income.

Mr. BLAINE. But it would authorize the committee to reduce the compensation of totally disabled veterans?

Mr. BRATTON. It probably would. The committee has that authority without a resolution. It could reduce the compensation now and bring such a report to the Senate, and see what the Senate would do with it.

Mr. BLAINE. The resolution is rather a mandatory proposition so far as the committee is concerned, is it not?

Mr. BRATTON. It is general. It is directed to the whole subject matter of the total appropriation as compared to our income.

Mr. President, I have said all that I desire to say on the subject. We must determine now whether we are going to undertake to curtail these expenditures and effect some economies for the taxpayers of the country. The Senator from South Carolina [Mr. SMITH] said the taxpayers had been bled white; indeed they have been, and we continue to appropriate enormous sums of money.

Permit me to say in that connection that the per capita tax burden in the country is $92. That means that for every man, woman, and child, regardless of color or race, there is placed a total tax burden of $92. Of that amount $28 goes to the National Government; on an average, $12 goes to the State; and the remainder, which is about $49, goes to local governments; that is, county, city, and school. It is the general belief throughout the country that the vast majority of all taxes are levied by the Federal Government and are paid to the Federal Government. That is a mistake. More than one-half of the taxes paid throughout the country are imposed by local authorities, are paid to the local authorities, and are consumed by local functions. Less than one-third of the taxes paid in this country go to the Federal Government.

Of course, the Federal Government must do its part in effecting reductions in taxes. The Federal Government can not escape that responsibility. But substantial reductions and substantial relief will never be enjoyed by the taxpayers of the country until the States and local authorities join. I hope the taxpayers of the country, those who have been bled white, those who are bearing an unbearable burden now, will understand that more than two-thirds of the taxes they pay go to the States and to the local authorities and not to the Federal Government.

I do not minimize the importance of the Federal Government's joining. It must act in concert. It must reduce its shares of the taxes. But the vast majority of the taxpayers who are bleeding white to-day should insist that local authorities and State authorities join with the Federal Government and should demand a reduction there as well as here.

Mr. BYRNES obtained the floor.

Mr. WALSH of Massachusetts. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Massachusetts?

Mr. BYRNES. I yield.

Mr. WALSH of Massachusetts. Mr. President, may I ask the intention of the leader on this side of the Chamber? In my humble judgment, this is one of the most important and vital motions that will be presented to the Senate during the present session. The question involved here is one of tremendous importance. It means a study of every activity of the Federal Government with the end and purpose in view of retaining only those departments of the Federal Government that are absolutely necessary to carry on an efficient government. It means, if the motion prevails, that we have chosen that course rather than the course of levying additional taxes. It would seem to be the attitude to which the Democratic Party has committed itself.

May I suggest to the leader on this side that before we have a vote on this question there be a conference of the members of the now minority, but soon to be majority, with the purpose in view of not merely passing this resolution but of setting our faces and our minds in the direction of realizing what it means, namely, that we must vote for every recommendation to cut down every appropriation wherever and in whatever direction it leads?

Unless we have that purpose in mind we are simply making a gesture and simply declaring a policy which we do not intend to carry out. I hope an early opportunity, before the vote is taken, may be had for some constructive and united action upon the soon to be majority party so we may go forward with a determination to settle our party policy, particularly if we are to decide not to levy any more taxes but intend to reduce to the minimum the expense of the Government.

Mr. SMITH. Mr. President, will my colleague yield to me?

The VICE PRESIDENT. Does the Senator from South Carolina yield to his colleague?

Mr. BYRNES. I yield.

DISTRIBUTION OF GOVERNMENT-OWNED COTTON—CONFERENCE REPORT

Mr. SMITH. Mr. President, I ask that the motion of the Senator from Utah [Mr. KING] to reconsider the vote by which the conference report on the bill (H. R. 13607) to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress may be laid before the Senate for consideration at this time. I think the Senator has had sufficient time to consider the matter and that he should let us dispose of it this afternoon.

Mr. KING. Mr. President, I hope the Senator will not call up the motion this afternoon. The Senator from Tennessee [Mr. MCKELLAR] is likewise interested in it. I have no objection to taking it up the first thing in the morning.

Mr. SMITH. It is a privileged matter, but I am loath to ask for a vote on the question in the face of the Senator's objection. If it is understood that Senators will be ready in the morning when I call up the report, because I want it disposed of one way or the other, I am willing that it shall go over; but I ask that they be prepared to make their statements and then let us have a vote.

Mr. BINGHAM. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Connecticut?

Mr. BYRNES. I yield.

Mr. BINGHAM. May I remind the Senator from Utah that last week he stated the matter might come up on Tuesday, which was day before yesterday. We have been waiting patiently for two days now for him to call up his motion to reconsider the vote by which the conference report was agreed to.

Mr. KING. But the Senator knows we have had the Glass bill before the Senate, and it has occupied the full time of Senators.

Mr. BINGHAM. But this is a conference report and is privileged, and we may move that it be taken up at any time. We have been trying to be courteous to the Senator, and I hope he will not ask for further delay.

Mr. KING. I shall join with the Senator from Connecticut in calling up the matter to-morrow morning.

RECESS

Mr. ODDIE. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Nevada.

Mr. BYRNES. I yield.

Mr. ODDIE. I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to; and the Senate (at 5 o'clock and 10 minutes p. m.) took a recess until to-morrow, Friday, January 27, 1933, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

THURSDAY, JANUARY 26, 1933

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Loving Father in Heaven, may we look well to this day. Let us cease to remember the sigh of regret and the tear of penitence and passionately affirm our divinity and the grace of the Cross that makes us forever Thine. Keep us mindful that self-control is by way of self-will, that liberality is by way of giving, and that magnanimity of soul is by way of self-denial. Let these be with us in beautiful fruition. Harken, Loving Father; every human heart is human, and in every bosom there are longings, yearnings, and strivings, yet so often our wills are feeble and helpless. O God, ever listen to our simple story of appeal and let it touch Thy right hand of Thy love and mercy. In the name of the Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, its principal clerk, announced that the Senate had passed joint resolutions of the following titles, in which the concurrence of the House is requested:

S. J. Res. 239. Joint resolution authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and for other purposes; and

S. J. Res. 240. Joint resolution to provide for the quartering, in certain public buildings in the District of Columbia, of troops participating in the inaugural ceremonies.

RECONSTRUCTION FINANCE CORPORATION

The SPEAKER laid before the House the following communication:

RECONSTRUCTION FINANCE CORPORATION,
Washington, January 25, 1933.

SIR: Replying to House Resolution 335, adopted by the House of Representatives on January 6, 1933, the Reconstruction Finance Corporation submits herewith a report of its operations from February 2, 1932, the date the corporation was organized, to July 20, 1932, inclusive. The resolution requested a report covering the months of February, March, April, May, and June, 1932. It is the understanding of the board that the intent of the resolution was to cover the entire period prior to the date the corporation began submitting monthly reports to the President and the Congress in accordance with section 201 (b) of the emergency relief and construction act of 1932. Such reports began with July 21, 1932, and, therefore, the inclosed report covers the period from July 1 to July 20, 1932, inclusive, as well as the months mentioned in the resolution.

The resolution requested the present status of each loan with respect to any repayments effected, and this report is made as of the close of January 6, 1933 (the date of the resolution), in connection with all loans authorized from February 2 to July 20, 1932, inclusive. It therefore embraces all changes in such loans up to January 6, 1933, inclusive, including increased authorizations, reductions by withdrawal or cancellation, and repayments.

The inclosed schedules show, in tabular form, with respect to each loan authorized by the corporation during the period mentioned, the following:

Loans authorized prior to July 21, 1932; increases in such authorizations after July 20, 1932; total authorized.

Authorizations reduced by withdrawal or cancellation.

Amounts not yet disbursed; amounts disbursed.

Repayments on principal; balances outstanding; collections not yet applied.

Appended to the schedules are notes which explain them in detail.

With respect to the question of the purposes for which each loan or commitment was made or intended to be made, the board desires to report that loans or commitments were made for one or more of the following purposes:

1. To banks and trust companies: To meet withdrawals or anticipated withdrawals of deposits; to pay indebtedness; to replenish reserves; to strengthen cash position.

2. To receivers or liquidating agents of closed banks: To pay liquidating dividend; to assist in reorganization.

3. To building and loan associations: To meet maturities; to meet withdrawals; to pay indebtedness.

4. To insurance companies: To pay claims—death, disability, fidelity, etc.; to make loans on policies; to pay surrender value of policies; to pay taxes; to protect assets; to strengthen cash position; to pay indebtedness; to grant extensions of mortgage loans and to prevent foreclosures.

5. To mortgage-loan companies: To meet bond and certificate maturities and interest; to pay indebtedness; to carry delinquent mortgage loans; to strengthen cash position; to meet guaranties on mortgages; to pay taxes and assessments; to carry owned real estate and avoid dumping on present market.

6. To credit unions: To meet withdrawals; to pay indebtedness.

7. To Federal land banks: To assure adequate funds to meet the demands for eligible farm loans and to enable the banks to continue to serve agriculture.

8. To joint-stock land banks: To pay bond interest; to pay indebtedness; to pay taxes; to carry delinquent borrowers.

9. To Federal intermediate-credit banks (commitments): To enable them to continue to serve agriculture.

10. To agricultural-credit corporations: To finance the operations of farmers and stockmen.

11. To livestock-credit corporations: To finance or refinance the operations of livestock growers.

12. To railroads (including receivers): To provide funds for additions and betterments; to meet maturing obligations, principal and interest; to pay accrued expenses, audited vouchers, wages, etc.; to pay other indebtedness.

The resolution also requests the amount of public money and public credit employed in the operations of the corporation during the period referred to. On February 2, 1932, the Secretary of the Treasury, on behalf of the United States of America, as provided in section 2 of the Reconstruction Finance Corporation act, subscribed for the entire amount of $500,000,000 of capital stock of the corporation. In response to the call of the board of directors of the corporation, as provided by law, the Secretary of the Treasury paid for such capital stock on the following dates in the amounts indicated:

Date:	Amount
Feb. 4, 1932	$150,000,000
Mar. 1, 1932	100,000,000
Mar. 24, 1932	100,000,000
Apr. 15, 1932	150,000,000
Total capital stock	500,000,000

In addition to the $500,000,000 of capital stock, the corporation, during the period from February 2 to July 20, 1932, inclusive, sold to the Secretary of the Treasury, as authorized by section 9 of the Reconstruction Finance Corporation act, its 3½ per cent notes, in the following amounts, on the dates indicated:

Date:	Amount
Apr. 27, 1932	$250,000,000
June 30, 1932	100,000,000
July 8, 1932	25,000,000
July 14, 1932	25,000,000
July 20, 1932	25,000,000
Total notes issued and sold, Feb. 2 to July 20, 1932	425,000,000

These notes matured on October 27, 1932. They were extended at maturity, as part of a larger issue of notes maturing April 30, 1933, and purchased by the Secretary of the Treasury.

Therefore, the total amount of capital stock and 3½ per cent notes sold by the corporation to the Secretary of the Treasury from February 2 to July 20, 1932, was as follows:

Capital stock	$500,000,000
3½ per cent notes	425,000,000
Total to July 20, 1932, inclusive	925,000,000
3½ per cent notes issued and sold to the Secretary of the Treasury July 21, 1932, to Jan. 6, 1933, inclusive	400,000,000
Making a total of capital and borrowings to Jan. 6, 1933, inclusive, of	1,325,000,000

Of this total amount, $132,500,000 was allocated and made available to the Secretary of Agriculture, in accordance with the provisions of section 2 of the Reconstruction Finance Corporation act, for the purpose of enabling the Secretary of Agriculture to make loans or advances to farmers. Of the sum so allocated and made available, $75,000,000 was paid to the Secretary of Agriculture, of which amount he has returned to the corporation $15,000,000. Of the unexpended balance of the amounts allocated and made available to the Secretary of Agriculture, $44,000,000 was used by the corporation in paying for the capital stock of regional agricultural credit corporations in accordance with the provisions of section 201 (e) of the emergency relief and construction act of 1932.

In this connection it should be stated that the funds of the corporation are kept on deposit with the Treasurer of the United States.

Respectfully,

ATLEE POMERENE, *Chairman.*

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

During the reading the following occurred:

Mr. UNDERWOOD. Mr. Speaker, this will be published, as I understand, in the RECORD of to-day. Is it necessary that this should be read at this time?

The SPEAKER. Without objection, the further reading will be dispensed with and it will be printed in the RECORD.

Mr. SNELL. Mr. Speaker, reserving the right to object, I think the Clerk should complete the reading of the communication.

The SPEAKER. Does the gentleman from New York object to its being printed in the RECORD?

Mr. SNELL. No; I think it should be printed in the RECORD, but I think the Clerk should finish reading the letter of transmission.

The Clerk completed the reading of the letter of transmission.

The SPEAKER. Under the terms of House Resolution 335, the report will go into the archives of the House and become a part of the public records in the office of the Clerk of the House.

LOANS FOR CROP PRODUCTION

Mr. JONES. Mr. Speaker, I ask the immediate consideration of Senate Concurrent Resolution No. 41.

The Clerk read as follows:

Senate Concurrent Resolution No. 41

Resolved by the Senate (the House of Representatives concurring), That the Secretary of the Senate be, and he is hereby authorized and directed, in the enrollment of the bill (S. 5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes, to insert, on page 2, line 9, of the engrossed House amendment, after the figures "1933," the following: ", or on livestock."

The SPEAKER. Is there objection?

Mr. CLARKE of New York. Reserving the right to object, I think there should be an explanation given the House regarding these words that are supposed to be inserted, showing that the rights of the Government are not in any way weakened by the incorporation of that language.

Mr. JONES. I will state that through a clerical error the words "or on livestock" were omitted, so that the Government would not have any lien on the livestock for feed furnished. This is to protect the Government.

Mr. CLARKE of New York. That was my understanding, but I wanted the RECORD to show it.

Mr. CHINDBLOM. Can the gentleman state how the error occurred?

Mr. JONES. The Senate amendment was to be included in the House bill, but in some way in the engrossment the words were omitted.

Mr. SUMMERS of Washington. Does the bill provide for summer fallowing?

Mr. JONES. The resolution itself does.

The SPEAKER. Is there objection?

There was no objection.

The resolution was agreed to.

INAUGURAL CEREMONIES

Mr. POU. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Joint Resolution 239, which is now on the Clerk's desk.

The Clerk read as follows:

Senate Joint Resolution 239

Resolved, etc., That the Director of Public Buildings and Public Parks of the National Capital, and such other officers of the District of Columbia and the United States as control any public lands in the District of Columbia, are hereby authorized to grant permits, under such restrictions as they may deem necessary, to the Committee on Inaugural Ceremonies for the use of any reservations or other public spaces in the city of Washington under their control on the occasion of the inauguration of the President elect in March, 1933: *Provided*, That in their opinion no serious or permanent injuries will be thereby inflicted upon such reservations or public spaces or statuary thereon; and the Commissioners of the District of Columbia may designate for such and other purposes on the occasion aforesaid such streets, avenues, and sidewalks in said city of Washington under their control as they may deem proper and necessary: *Provided, however*, That all stands or platforms that may be erected on the public space, as aforesaid, including such as may be erected in connection with the display of fireworks, shall be under the said supervision of the said inaugural committee, and no stand shall be built on the sidewalk, streets, parks, and public grounds of the District of Columbia, not including the area on the south side of Pennsylvania Avenue directly in front of the White House, except such as are approved by the inaugural committee and the building inspector of the District of Columbia, and no stands shall be built on the sidewalks or streets on the south side of Pennsylvania Avenue directly in front of the White House, except such as are approved by the inaugural committee, the building inspector of the District of Columbia, and the Director of Public Buildings and Parks: *And provided further*, That the reservations or public spaces occupied by the stands or other structures shall after the inauguration be promptly restored to their condition before such occupation, and that the inaugural committee shall indemnify the appropriate agency of the Government for any damages of any kind whatsoever upon such reservations or spaces by reason of such use.

SEC. 2. The Commissioners of the District of Columbia are hereby authorized to permit the committee on illumination, of the inaugural committee for said inaugural ceremonies, to stretch suitable overhead conductors, with sufficient supports wherever necessary, for the purpose of connecting with the present supply of light for the purpose of effecting the said illumination: *Provided*, That if it shall be necessary to erect wires for illuminating or other purposes over any park or reservaton in the District of Columbia the work of erection and removal of said wires shall be under the supervision of the official in charge of said park or reservation: *Provided further*, That the said conductors shall not be used for conveying electrical currents after March 8, 1933, and shall, with their supports, be fully and entirely removed from the streets and avenues of the said city of Washington on or before March 15, 1933: *And provided further*, That the stretching and removing of the said wires shall be under the supervision of the Commissioners of the District of Columbia, or such other officials as may have jurisdiction in the premises, who shall see that the provisions of this resolution are enforced, that all needful precautions are taken for the protection of the public, and that the pavement of any street, avenue, or alley disturbed is replaced in as good condition as before entering upon the work herein authorized: *And provided further*, That no expense or damage on account of or due to the stretching, operation, or removal of the said temporary overhead conductors shall be incurred by the United States or the District of Columbia.

SEC. 3. The Secretary of War and the Secretary of the Navy be, and they are hereby, authorized to loan to the Committee on Inaugural Ceremonies such hospital tents, smaller tents, camp appliances, ensigns, flags, and signal numbers, etc., belonging to the Government of the United States (except battle flags) that are not now in use and may be suitable and proper for decoration, and which may, in their judgment, be spared without detriment to the public service, such flags to be used in connection with said ceremonies by said committee under such regulations and restrictions as may be prescribed by the said Secretaries, or either of them, in decorating the fronts of public buildings and other places on the line of march, between the Capitol and the Executive Mansion and the interior of the reception hall: *Provided*, That the loan of the said hospital tents, smaller tents, camp appliances, ensigns, flags, and signal numbers, etc., to said committee shall not take place prior to the 23d of February, and they shall be returned by the 9th day of March, 1933: *Provided further*, That the said committee shall indemnify the said departments, or either of them, for any loss or damage to such flags not necessarily incident to such use. That the Secretary of War is hereby authorized to loan to the inaugural committee for the purpose of caring for the sick, injured, and infirm on the occasion of said inauguration, such hospital tents and camp appliances, and other necessaries, hospital furniture and utensils of all descriptions, ambulances, horses, drivers, stretchers, and Red Cross flags and poles belonging to the Government of the United States as in his judgment may be spared and are not in use by the Government at the time of the inauguration: *And provided further*, That the inaugural committee shall indemnify the War Department for any loss or damage to such hospital tents and appliances, as aforesaid, not necessarily incident to such use.

SEC. 4. The Commissioners of the District of Columbia and the Director of Public Buildings and Public Parks be, and they are hereby, authorized to permit telegraph, telephone, and radiobroadcasting companies to extend overhead wires to such points along the line of parade as shall be deemed by the chief marshal convenient for use in connection with the parade and other inaugural purposes, the said wires to be taken down within 10 days after the conclusion of the ceremonies.

Mr. SNELL. Mr. Speaker, I reserve the right to object in order to ask the gentleman from North Carolina a question. I understand that this is practically the same resolution that we have always passed heretofore in respect to previous inaugural ceremonies.

Mr. POU. It is.

Mr. SNELL. There is no special expense involved to the Federal Government? It is only granting permission to do certain things?

Mr. POU. That is correct.

Mr. BLANTON. Has this been considered by the gentleman himself?

Mr. POU. It has.

Mr. BLANTON. The gentleman has carefully examined the matter contained in the resolution?

Mr. POU. I have.

The SPEAKER. Is there objection?

There was no objection.

The joint resolution was ordered to be read a third time, was read the third time and passed, and a motion to reconsider laid on the table.

Mr. POU. Mr. Speaker, I ask unanimous consent for the present consideration of Senate Joint Resolution 240, which I send to the desk and ask to have read.

The Clerk read as follows:

Senate Joint Resolution 240

Resolved, etc., That the Director of Public Buildings and Public Parks of the National Capital is authorized to allocate such space in any public building under his care and supervision as he deems necessary for the purposes of quartering troops participating in the inaugural ceremonies to be held on March 4, 1933, but such use shall not continue after March 6, 1933. Authority granted by this resolution may be exercised notwithstanding the provisions of the legislative, executive, and judicial appropriation act for the fiscal year ending June 30, 1903, approved April 28, 1902, prohibiting the use of public buildings in connection with inaugural ceremonies.

The SPEAKER. Is there objection?

Mr. BANKHEAD. Mr. Speaker, reserving the right to object, I had a question directed to me this morning which I was unable to answer—and perhaps the gentleman from North Carolina can—with reference to the tickets that will be provided to each Member for the inaugural ceremonies here at the Capitol. My information is that seven tickets will be supplied to each Member for the ceremonies and that in addition to that one ticket of admission will be given to each Member for the services in the Senate.

Mr. POU. That is correct.

Mr. BANKHEAD. Is the Member holding that one ticket entitled to use it in addition to the seven in order to get out on the front to witness the inaugural ceremonies?

Mr. POU. I think he is. The ticket to the Senate entitles the holder thereof to go from the Senate Chamber out onto the platform where the President will deliver his inaugural address.

Mr. STAFFORD. Mr. Speaker, reserving the right to object, may I inquire of the chairman of the Committee on Inaugural Ceremonies what public buildings are contemplated to be or are available for the use of troops? I can not think of any public building being available for the use of troops.

Mr. POU. Frankly, I can not answer that question. All I know is that this resolution was sent down here on the recommendation of the inaugural committee. It has been approved by all of the departments.

Mr. STAFFORD. I can conceive of how we could loan tents and the like to troops that visit here, but I can not see where there would be any public buildings suitable for housing the troops.

Mr. CHINDBLOM. Are not some of the temporary buildings vacant at the present time?

Mr. BLANTON. Certainly, as well as the old Census Building. Several public buildings are vacant now.

Mr. STAFFORD. I am afraid those old worm-eaten buildings will not be good accommodations for the troops.

The SPEAKER. Is there objection?

There was no objection.

The Senate joint resolution was ordered to be read a third time, was read the third time and passed, and a motion to reconsider laid on the table.

DEPARTMENTS OF STATE, JUSTICE, COMMERCE, AND LABOR APPROPRIATION BILL, FISCAL YEAR 1934

Mr. OLIVER of Alabama. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14363, making appropriations for the Departments of State and Justice, and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1934, and for other purposes.

Pending that, I ask the approval of the House of a unanimous-consent agreement which has been reached by parties on both sides of the aisle interested in the item carrying appropriations for the enforcement of the prohibition law. That agreement is that if that item be reached this afternoon, and I think it will be, it shall be carried over and taken up immediately on the House resolving itself into the Committee of the Whole House on the state of the Union to-morrow, that the limit of debate upon that item and all amendments thereto shall be two hours, the time to be equally divided between the gentleman from Pennsylvania [Mr. SHREVE] and myself, and that one-half of the time under the control of the gentleman from Pennsylvania is to be allotted to the gentleman from Massachusetts [Mr. TINKHAM], on the Republican side, and one-half of my time is to be allotted to the gentleman from New York [Mr. GRIFFIN], on the Democratic side.

Mr. BLANTON. Mr. Speaker, I would not care to agree to that, because the gentleman from New York [Mr. GRIFFIN] and the gentleman from Massachusetts [Mr. TINKHAM] have ideas very much alike on that matter.

Mr. DYER. That is also true of the gentleman from Alabama and the gentleman from Pennsylvania.

Mr. BLANTON. The gentleman from Pennsylvania [Mr. SHREVE] and the gentleman from Alabama are reserving one-half of their time for those in favor of proper enforcement?

Mr. OLIVER of Alabama. Yes.

Mr. CHINDBLOM. Mr. Speaker, could not the gentleman include the provision that this matter shall come up to-morrow, immediately upon the House resolving itself into the Committee of the Whole House on the state of the Union for the consideration of this bill?

Mr. OLIVER of Alabama. I shall be very glad to include that.

The SPEAKER. What is the request of the gentleman?

Mr. OLIVER of Alabama. Mr. Speaker, the request is that the item carrying the appropriation for the enforcement of the prohibition law shall be taken up for consideration immediately on the House resolving itself into the Committee of the Whole House on the state of the Union to-morrow, that debate upon that item and all amendments thereto shall be limited to two hours, the time to be equally divided between the gentleman from Pennsylvania [Mr. SHREVE] and myself; that the gentleman from Pennsylvania [Mr. SHREVE] will allot one-half of his time to the gentleman from Massachusetts [Mr. TINKHAM], and that one-half of my time will be allotted to the gentleman from New York [Mr. GRIFFIN].

Mr. SHREVE. Mr. Speaker, permit me to say that the arrangement is entirely satisfactory to this side of the House.

The SPEAKER. Is there objection?

There was no objection.

Mr. OLIVER of Alabama. Mr. Speaker, may I make this brief statement? I said to the House yesterday, in view of the evident desire on the part of the House to cooperate with the committee, to finish this bill, that we would endeavor to make an agreement of this kind. From what I can learn, there is little question but that this bill can be finished to-morrow afternoon, with the promised cooperation on both sides of the aisle. There may be a few other items about which there is controversy, and we have already

reached a tentative understanding as to the time that will be devoted to the discussion of one or more of such controversial items.

The SPEAKER. The question is on the motion of the gentleman from Alabama.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14363, the Departments of State, Justice, Commerce, and Labor appropriation bill, with Mr. OLIVER of New York in the chair.

The Clerk read the title of the bill.

Mr. OLIVER of Alabama. Mr. Chairman, I will endeavor to take but a short time, and will be pleased to answer questions for information about the bill. The gentleman from Pennsylvania [Mr. SHREVE] will also take only a short time to make a statement pertinent to the bill.

Mr. BRIGGS. Will the gentleman make his statement uninterrupted and then submit to questions?

Mr. OLIVER of Alabama. I will be glad to follow that course.

It is the desire of the gentleman from Pennsylvania [Mr. SHREVE] and myself to be brief in presenting material facts which we feel the House may be interested to learn in advance of the reading of the bill. I know the House, as to appropriation bills, is really interested in factual statements, and my remarks will be along that line.

This bill carries appropriations for the four departments—State, Justice, Commerce, and Labor. The bill as reported by the committee reduces the appropriations for these departments as recommended by the President $5,284,742.60. That reduction, broken down as between these departments, is as follows:

Department of State, $800,162.60 under the estimate submitted by the President; Department of Justice, $2,448,437; Department of Commerce, $1,328,858; Department of Labor, $707,285; making the total, as stated, $5,284,742.60, under the amounts recommended by the President.

The House will be further interested in knowing that the appropriations which this committee recommends for 1934 represent a reduction under the appropriations carried for the same departments in the year 1932, the fiscal year ending July, 1932, of $37,496,641.05, approximately a reduction of 33 per cent, if the House approves the recommendations now submitted by the committee.

The following table shows, for each department, the appropriations for the fiscal years 1932 and 1933; the estimates for the fiscal year 1934; the amount recommended by the committee for 1934; the decrease in the amount recommended for 1934, compared with the 1933 appropriations and with the 1934 Budget estimates:

Department	Appropriations, 1932	Appropriations, 1933	Estimates, 1934
State	$18,809,942.54	$13,663,792.99	$12,997,626.60
Justice	51,469,855.81	45,996,000.00	44,282,487.00
Commerce	54,716,600.79	[1] 44,781,408.00	27,917,323.00
Labor	15,782,281.00	12,920,770.00	13,389,345.00
Total	140,778,680.05	117,361,970.89	108,586,781.60

Department	Recommendations, 1934	Decrease, bill compared with 1933 appropriations	Decrease, bill compared with 1934 estimates
State	$12,177,464.00	$1,486,328.89	$800,162.60
Justice	41,834,050.00	4,161,950.00	2,448,437.00
Commerce	36,588,465.00	8,192,943.00	1,328,858.00
Labor	12,682,060.00	238,710.00	707,285.00
Total	103,282,039.00	14,079,931.89	5,284,742.60

[1] Included in this total are appropriations amounting to $5,560,000 consisting of three separate appropriations carried in the emergency relief and construction act of 1932 over which the House Appropriations Committee had no jurisdiction, namely, $500,000 being for the Bureau of Aeronautics, $1,250,000 for the Coast and Geodetic Survey, and $3,810,000 for the Lighthouse Service. The appropriations for the first two bureaus named were made available only for the fiscal year 1933, while the amount carried for the Lighthouse Service remains available until expended.

Permit me to say that perhaps the only department that might justly complain—yet that department is not complaining because of these reductions—is the Department of Justice. This is the one department of the four, important as they all are, the work of which is not only useful but not dispensable. Due to the uncertain and rapidly changing factors that furnish the basis for making advance estimates for the needs of this department in the fiscal year 1934, the committee recognizes that some of its estimates for 1934 may be inadequate, and before the committee concludes its consideration of this department, we may ask to make available certain unexpended balances of the 1933 appropriation, or certain unexpended balances of a continuing appropriation for jail or prison construction.

These departments pay very substantial sums every year into the Federal Treasury. In 1932 the Department of State paid into the Treasury in cash $3,065,263.54. The Department of Justice, $15,888,102; the Department of Commerce, $6,640,080.80; the Department of Labor, $4,780,881.57. Our information is that the returns from each of these departments will be approximately the same, probably larger, in 1934, to wit, about $30,000,000.

In addition to that, your attention is directed to the important and valuable service, impossible to evaluate on a cash basis, that all of these departments render to the people of the Nation. It is reflected in a more tangible way, perhaps, by one bureau of the Department of Justice, the bureau of investigation and prosecution of crimes. At your leisure I invite you to read page 108 of the hearings, where in 1932 that department, with an appropriation of approximately $2,600,000, saved to individual taxpayers in the way of returned property in your district and in mine more than $2,340,000; and to the Government, in its investigations of claims now pending before the courts, more than $900,000, making a total saving over and above all expenditures of more than $400,000.

Mr. DYER. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. DYER. That is the bureau of which Mr. J. Edgar Hoover is the head?

Mr. OLIVER of Alabama. Yes.

Mr. DYER. He is a very efficient public servant.

Mr. OLIVER of Alabama. Yes; I think the Members of the House will give very general approval to that.

I repeat, the State, the Commerce, and the Labor Departments likewise render, as we all know, outstanding public service not susceptible of estimation in dollars and cents.

You will be interested in another phase of your committee's recommendation for the 1934 appropriations for these four departments. The President, you will remember, first submitted his estimates to the Committee on Appropriations early in November. When you met in December, in his message to Congress, the President suggested further savings, dependent on Congress approving two certain acts which he suggested; one involving a reduction of 11 per cent in salaries above $1,000 in addition to the 8⅓ per cent carried in the economy bill. This bill, as we bring it to you, carries a reduction under even these additional suggested savings of the President of more than $2,000,000. It carries under his Budget recommendations a saving of more than $5,200,000; under his suggested savings, if the legislation he proposes were passed, of more than $2,000,000. In other words, this committee has not been disregardful of what we felt was the desire of the House, wherever it could make reductions in appropriations without hurting the vital functions of the Government, it should be done.

The Department of State has 30 items in this bill, and we have reduced 22 of them. The Department of Justice has 55. You will find reductions in 41. The Department of Commerce has 95, and you will find reductions in 77. The Department of Labor has 12, and you will find reductions in 9.

Mr. Chairman, may I ask unanimous consent, without repeating it hereafter to insert as a part of my statement at the proper places, certain tables carried in the report of the committee, together with other parts of the report?

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. KELLER. Will the gentleman explain, when he comes to it, how this reduction would come?

Mr. OLIVER of Alabama. I shall be pleased to do so, and just as soon as I finish my general statement I will gladly answer any questions.

First take the Department of State. In the appropriation for the Department of State there has been a reduction of $800,162.60. This is reflected in the following table which gives a comparison of appropriations and estimates under the four groupings into which the activities of the department fall.

These reductions you will find discussed item by item in the committee report.

Group	Appropriations, 1933	Budget estimates, 1934	Amount recommended for 1934 by committee	Decrease, bill compared with 1933 appropriations	Decrease, bill compared with Budget estimates
Department in Washington, including passport agencies	$2,265,540.00	$2,083,012.00	$2,017,312.00	$248,228.00	$65,700.00
Foreign Service	10,357,438.00	9,841,296.00	9,263,221.00	1,109,217.00	578,075.00
International obligations	996,214.89	1,005,826.60	856,331.00	124,883.89	149,495.60
Judicial	44,600.00	47,492.00	40,600.00	4,000.00	6,892.00
Total regular annual appropriations	13,663,792.89	12,977,626.60	12,177,464.00	1,486,328.89	800,162.60
Permanent and indefinite appropriations	31,000.00	31,000.00	31,000.00		
Grand total	13,694,792.89	13,008,626.60	12,208,464.00	1,486,328.89	800,162.60

The larger part of the savings in the Foreign Service, which some of you may be interested in, is brought about by the fact we discontinued certain allowances only in recent years approved, and which the President recommended for 1934. One was post allowances, which Congress made no appropriation for in 1933. We do not carry it for 1934. The other is representation allowances. Congress denied this in 1933, and we deny it in 1934. The other is what may be termed the President's confidential fund, which last year Congress fixed at $130,000. The President recommended that it be increased to $200,000. We recommend for 1934 only $130,000. Your attention is invited to the comments on what we feel was an unauthorized use of a part of the fund last year. Another item, relating to heat, light, and quarters, was carried for the first time in the bill of 1931.

This item we reduced $189,825, the maximum amount allowed to any individual being $720. These constitute the major items entering into the total reduction.

Next take up the Department of Justice; and this is one department, we recognize, the services of which can not be dispensed with. We have 230 judges, and courts are held at more than 330 places. In one court alone, the Court of Claims, there are now pending against the Government claims amounting to $4,500,000,000, and in other courts there are cases against the Government involving many hundreds of millions more. Bearing this in mind, you can well understand that nothing should be done which would not give the Government funds sufficient to properly defend these cases. The cases pending in the courts have been handled, we feel, efficiently in the last few years, and Congress must recognize that with a change of administration will naturally come a change of officials in many important positions. The courts should mark time until new officials called to take charge of this important litigation shall have the opportunity to study the cases and thus be prepared to properly represent the interests of the Government.

In this connection I wish to call your attention to the very interesting table showing the growth of the criminal and civil business in the Federal courts since 1910.

Statement showing various classes of cases and other proceedings in the United States district courts commenced during the fiscal years 1910 to 1932, respectively

Fiscal year	United States civil cases	Criminal cases	Private litigation	Bankruptcy proceedings	Total
1910	3,170	14,864	10,618	18,053	46,705
1911	3,810	15,057	10,191	19,338	48,396
1912	4,001	15,953	10,992	19,745	50,691
1913	3,752	16,753	11,183	20,930	52,618
1914	4,142	18,399	12,146	22,959	57,646
1915	3,578	19,868	11,690	27,632	62,768
1916	3,500	20,243	13,852	27,368	64,963
1917	3,534	19,628	14,017	24,838	62,017
1918	2,877	35,096	13,879	20,385	72,237
1919	4,975	47,443	13,825	14,048	80,291
1920	5,726	55,587	16,383	13,558	91,254

Statement showing various classes of cases and other proceedings in the United States district courts commenced during the fiscal years 1910 to 1932, respectively—Continued

Fiscal year	United States civil cases	Criminal cases	Private litigation	Bankruptcy proceedings	Total
1921	9,722	54,487	22,453	22,812	109,474
1922	9,646	60,722	22,099	38,165	130,632
1923	10,909	71,077	19,717	41,304	143,097
1924	13,753	70,168	20,458	43,519	147,898
1925	16,319	76,136	21,716	45,641	159,812
1926	17,504	68,582	21,217	46,374	153,677
1927	17,888	64,614	22,968	48,758	154,228
1928	20,695	83,372	23,750	53,064	180,881
1929	24,307	86,348	20,980	57,280	188,915
1930	24,934	87,305	23,391	62,845	198,475
1931	25,332	83,747	24,000	65,335	198,414
1932	34,189	92,174	26,326	70,049	222,738
Total	268,353	1,177,623	407,851	824,000	2,677,827

If later the committee offers an amendment to provide funds, in the manner heretofore suggested, for any miscalculation in the estimates for the handling of this important work of the Government, I know it will have the thoughtful and sympathetic consideration of the House, because one case badly tried might involve a liability on the Government in excess of the total amount appropriated for all the activities of the Department of Justice.

The one item that has greatly grown, as you know, is the item of building and maintaining prisons. I am sure the House will be interested to know that we are not carrying any additional funds, other than what has been previously appropriated, for the construction of any additional Federal jails or prisons in 1934.

In 1929 you had only five. Look at the map before you and see how rapidly they have grown. You only had prisons at Atlanta, Leavenworth, Alderson, McNeil Island, and Chillicothe four years ago. Since then you have added Federal jails, prisons, and camps until they now number more than 15. This map shows the locations of all the prisons and jails that the Federal Government now owns, built and building.

Mr. KELLER. What do the round yellow stickers represent?

Mr. OLIVER of Alabama. The yellow stickers indicate sites purchased for prisons, but the committee recommends no appropriations for prison construction thereon.

Mr. KELLER. And the pyramids indicate what?

Mr. OLIVER of Alabama. The pyramids represent prison camps maintained at Army posts for the improvement of Government property.

Mr. KELLER. And what does the light blue indicate?

Mr. OLIVER of Alabama. The light blue represents two narcotic prisons. Appropriations have been made for but one, and that is located in Kentucky. I hope it will not be found necessary to make appropriations for the one contemplated in Texas.

This prison in Kentucky will care for all of your narcotic population now at the annex, Leavenworth Barracks, numbering about 1,800. The Northeastern Penitentiary, one of the most modern prisons in the world, recently completed in Pennsylvania, will easily care for 1,500, and more if necessary.

The prison in Michigan now under construction, which has a large acreage of land in connection with it and is of the jail type, will house between 500 and 600.

In that connection you will be interested in this statement of the number now confined in prisons and jails, on parole, and on probation. On June 30, 1932, the population in Federal prisons and reformatories was 13,698. We have approximately 12,000 at this time. On June 30, 1932, we had in jails 11,606, and this number, I learn, has been slightly reduced at the present time. The tendency is downward.

We had on probation on November 18, 1932, 25,499. This represents an increase in the year 1932 of more than 10,000. They came largely from jails where they were serving short sentences. In other words, you have relieved the Federal Government of the expense of maintaining more than 10,000 on whom short sentences had been imposed.

You will be interested, I think, in the further statement that the number who were paroled in 1932 was 3,328, and the number whose sentences will expire during the next 18 months, together with the number subject to parole in that length of time, is approximately 14,000. So you can well understand that the future looks promising in reference to some reduction in maintenance costs of these prisoners; and we have taken all this into account in submitting our recommendations to you.

I wish to pay this tribute to the very capable Director of the Bureau of Prisons. He is a man of long experience; is humane; and has endeavored to operate the prisons in a way which I feel you and the people of the Nation will give approval to.

Yesterday evening I put into the RECORD a contradiction of a newspaper report which sought to reflect upon the prison management at this time with reference to Al Capone.

Mr. SEGER. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. SEGER. I was not here during the very interesting statement that the gentleman made. As I understand, there was a considerable increase in the Federal prisons in the last 10 years.

Mr. OLIVER of Alabama. In the last four or five years.

Mr. SEGER. Has the gentleman available any statistics that will show what type of crime caused that?

Mr. OLIVER of Alabama. Prohibition; and these in the main involve short sentences. I have not here the information to answer the gentleman's inquiry definitely, but I will give it in the revision of my remarks. It is set forth in full in the hearings.

Mr. SEGER. I thank the gentleman.

Mr. OLIVER of Alabama. The following table answers the question of the gentleman from New Jersey [Mr. SEGER].

Statement showing number of Federal prisoners on June 30, 1932

	Federal prisons and reformatories	Jails
Prohibition	4,621	8,280
All other	9,077	3,326
Total	13,698	11,606

On probation Nov. 18, 1932 (estimated)	25,499
On parole Nov. 18, 1932	3,328

Released on parole from Federal institutions during the year ending June 30, 1932

Prohibition	3,351
All other	1,864
Total	5,215
Federal institutions	13,698
Jails	11,606
Probation	25,499
Parole	3,328
Total under restraint	54,131

We had 13,698, of which 4,621 were prohibition prisoners and 9,077 were nonprohibition prisoners.

We had in county jails, and so forth, 11,606 prisoners, of whom 8,250 were prohibition prisoners and 3,326 nonprohibition.

Taking up now the matter of probation, we began making appropriations in the year 1927. Neither the judges nor the Department of Justice nor the Committee on Appropriations felt at that time that we had a workable probation law, and the appropriations although limited were not expended. Only a few judges took advantage of the offer of Congress in 1927, and the yellow on this map represents the few sections where there were a few probation officers appointed by the judges that year. The next color represents the same condition, only a few took advantage although we continued the appropriation. They turned back into the Treasury at the end of each year large unexpended balances. The next color represents the growth in 1929, which was still very slight. Out in Illinois they took advantage of it. The next represents 1930, when California took advantage of it. Still, we had not amended the law so as to make it satisfactory to the judges or to the Department of Justice or to the Appropriations Committee, but we carried funds nevertheless in order to carry out the mandate of Congress that we provide funds for this purpose.

You then amended the law, and look how rapidly the probation system spread when the appropriations were available in 1931. This area is represented in green.

Then you find that in 1932 we continued the appropriation and increased it somewhat and added a number of probation officers in this area that was then being served, so as to make the system more efficient. The same is true in 1933, and then note how rapidly it grew with this 1933 appropriation. In this connection remember that this wide area is under the jurisdiction of 89 probation officers appointed by the court, who have to make reports to the Department of Justice. The department scans them carefully and their entire work is carefully supervised. We have 89 probation officers looking after 28,000 parolees and probationers. We will increase the number in 1934.

In this connection permit me to say that the report from the judges, as well as the probation officers, is this. Those who are subject to parole and to probation are seeking to rehabilitate themselves in gainful and lawful occupations, and even the fines imposed by the courts are being paid into the Federal Treasury by those out on probation. Only a comparatively small number of those now on probation or now on parole have been guilty of any violation of law since this clemency was extended to them.

Mr. CHIPERFIELD. Can the gentleman tell us what is represented by the white on the map?

Mr. OLIVER of Alabama. The white represents districts where there is now no probation officer, but some of the judges and some of the civic organizations are cooperating and carrying forward this probation work. Of course, this is not a thickly populated section, and it may be some of the judges do not find a probation officer necessary. There are very few violations of law in many of these sections. There are three other districts where the judges are now considering the matter, and they have appropriations available if they wish to make the appointments, and this will extend the work over into a part of the white section, the white representing the area where probation officers are not now serving.

In connection, generally, with the Department of Justice we have called attention in our report to the fact that we hope the next Congress will take steps to give authority to the courts to refuse to hold court at certain places. They now have discretionary authority, but it is right difficult for them to exercise it in view of local pressure. At present we are holding court in 333 places, and sometimes in these places where court is held and we must pay the traveling ex-

penses of the judge and the court officials, which are very large, the business of the court is very small. This is a matter that needs the attention of the future Congress, and in our report we have called it to your attention.

This map [indicating] represents a great number of places where, by separate acts, passed from time to time, we have provided for holding court, in many places simply to satisfy local pride.

Taking up now the Department of Commerce, I shall insert a table in my remarks showing information which some of the gentlemen have asked me to incorporate in my opening statement. This table will show the different activities of this department where reductions are reflected.

Bureau or office	Appropriations, 1933	Budget estimates, 1934	Amount recommended in bill for 1934	Increase (+) or decrease (−), bill compared with 1933 appropriations	Increase (+) or decrease (−), bill compared with 1934 Budget estimates
Office of Secretary	$1,153,200	$1,024,590	$959,590	−$193,610	−$65,000
Aeronautics Branch	9,053,500	7,750,780	7,660,780	−1,392,720	−90,000
Federal Employment Stabilization Board	75,000	69,395	65,000	−10,000	−4,395
Bureau of Foreign and Domestic Commerce	3,988,000	3,901,885	3,514,370	−473,630	−387,515
Bureau of the Census	862,125	1,953,985	1,903,000	+1,040,875	−50,985
Steamboat inspection and Bureau of Navigation	1,476,165	1,455,970	1,405,000	−71,165	−50,970
Bureau of Standards	2,137,280	2,167,320	2,056,045	−81,235	−111,275
Bureau of Lighthouses	13,659,280	9,209,770	9,114,600	−4,544,680	−95,170
Coast and Geodetic Survey	3,649,813	2,295,918	2,205,090	−1,444,723	−90,828
Bureau of Fisheries	1,976,020	1,831,075	1,765,740	−210,280	−65,335
Patent Office	4,890,700	4,606,950	4,424,950	−465,750	−182,000
Bureau of Mines	1,860,325	1,649,685	1,514,300	−346,025	−135,385
Total regular annual appropriations	44,781,408	37,917,323	36,588,465	−8,192,943	−1,328,858
Permanent annual appropriations	3,000	17,000	17,000	+14,000	----------
Total, annual and permanent appropriations, Department of Commerce	44,784,408	37,934,323	36,605,465	−8,278,943	−1,328,858

There is one particular matter I wish to call to your attention. Last year Congress authorized the consolidation of the Bureau of Navigation and the Steamboat Inspection Service. The President approved this consolidation and issued an Executive order to that effect. When the Budget estimates were submitted to us the committee was somewhat surprised to find there were separate appropriations still carried for these two services that you had directed to be consolidated, and instead of there being any savings the Budget recommended an increase of $100,000 over the amount available in 1933 for expenditure.

For this reason you will find that your committee brought together these items, and we think we have justified the reduction made in the estimates as submitted by the President. There is quite a substantial reduction. This is an important service, but we think it will function in a more orderly way and at least reflect the hope and expectation of this House that when we do confer upon the President plenary power to bring together different agencies of the Government we shall find larger savings in all the departments I have referred to unless it be the Department of Justice.

We have asked that the House give further consideration through its proper committees to limit the jurisdiction conferred upon some of the courts, especially the Court of Claims, to pass finally upon cases referred to them. In some cases claims amounting to more than $3,500,000, involving violations 125 or 150 years ago of old treaties. I think you should do the wise thing to make a restudy of these cases with a view of requiring the Court of Claims only to find the facts and report the same to Congress.

Mr. STAFFORD. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. STAFFORD. As to these cases which the gentleman has referred to involving old hoary claims that some claim agent or attorney has unearthed and thinks he can get a fee out of, is not the jurisdiction of the Court of Claims to find the facts and the amount of damage before they render final judgment?

Mr. OLIVER of Alabama. Authority is conferred upon the court to render final judgment against the Government, and often little permanent benefit comes to the Indians from amounts collected from the Federal Government.

Mr. STAFFORD. The inference being that the money went to the attorneys and agents?

Mr. OLIVER of Alabama. Perhaps so.

The gentleman will recall that in reference to Indian claims the law requires the court if judgment is rendered against the Government to assess interest and the interest in many cases, I learn, may exceed the original claim.

Mr. LEAVITT. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. LEAVITT. I think the gentleman is mistaken in his statement that the Indian claims carry interest from the time of origin of the claims in these claims 150 years old. Interest is paid from the time the judgment is rendered. That has been the case in all the bills since I have been here.

Mr. OLIVER of Alabama. There are about 58 of these claims, and if the gentleman will read the hearings he will find they are authorized to compute interest on these claims, or many of them, for a long period of time.

Mr. LEAVITT. The gentleman from Alabama will concede that this is a matter that ought to have more consideration and debate than we could have here on an appropriation bill.

Mr. OLIVER of Alabama. This committee has no jurisdiction of it, but I felt we should call it to the attention of Congress for consideration. We all know, and the gentleman from Wisconsin knows, that we too often hurriedly refer cases without consideration to the court, involving large liabilities against the Government, without a fair and just consideration thereof.

Mr. LEAVITT. Congress has referred these cases to the Court of Claims in the hope and belief that it will give them fair and just consideration.

Mr. OLIVER of Alabama. I appreciate the position of the gentleman, and I know that he would not do anything not entirely fair to the Government.

Mr. LEAVITT. The Indians are wards of the Government.

Mr. OLIVER of Alabama. All of us are human, and in answer to the strong appeal of our immediate sections sometimes we lose sight of the spirit of that law which says that no Member of Congress can appear before a court in the interest of anyone who claims money from the Government. I fear that unconsciously sometimes in our enthusiasm to assist our immediate neighborhoods—and I make this charge as a human failing applying to all alike—we forget the spirit that prompted Congress to place that inhibition on undue activities.

Mr. LEAVITT. No Member of Congress appears before the court.

Mr. OLIVER of Alabama. I understand that.

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. GARBER. The gentleman has been informative in his address, but in this deviation I am certain the gentleman would not want to assume the position of denying due process of law to the wards of the Government who are absolutely helpless.

Mr. OLIVER of Alabama. I simply suggested it. It is possible that it is largely my own individual opinion, but all of the five members of the committee thought it should be called to the thoughtful attention of the Members of Congress. We have not intended to cast any aspersion upon anyone, but simply to bring it to the attention of the House.

Mr. GARBER. Has the gentleman examined the jurisdictional bills that have been passed by the House?

Mr. OLIVER of Alabama. I shall ask the gentleman to let me pass on to something else.

Mr. GARBER. But just for the purpose of correcting one statement, and that is this: The jurisdictional bills of our very efficient Committee on Indian Affairs always provide that in the event recovery is had, the money shall be paid into the Treasury of the United States for the purpose of the health and education of the Indians and shall be paid out only subject to appropriation by Congress.

Mr. OLIVER of Alabama. There are some of the references that do not contain such wise limitations.

Mr. LEAVITT. Those are old cases.

Mr. OLIVER of Alabama. Perhaps so.

Mr. GARBER. That distinction should be made in the gentleman's statement. The policy of Congress in recent years has hedged this about so that the Congress passes on expenditures.

Mr. OLIVER of Alabama. I think the gentleman has qualified it to that extent, and I am glad indeed to accept the qualification which the gentleman from Montana and the gentleman from Oklahoma have called to my attention.

So far as the Department of Labor is concerned, I shall insert a table in my remarks, as well as other information. There are very few items carried in respect to that.

Mr. DYER. Would the gentleman insert in his remarks under the Department of Justice, if he can obtain them, the cases which he says aggregate the amount of $4,000,000? There are a lot of cases that do not amount to anything—that are dead.

Mr. OLIVER of Alabama. I shall endeavor to insert it, if I have time to do so.

Mr. DYER. The hearings do not give any information upon that.

Mr. OLIVER of Alabama. I had no opportunity to go fully into it.

Mr. DYER. I hope the gentleman from Alabama will continue with his explanatory remarks of the bill. He is helping us very much in a very important matter.

Mr. OLIVER of Alabama. I am now open to any questions which gentlemen wish to ask. I regret exceedingly that I should have made any statement that has aroused controversy. It is nothing in the world but a suggestion for future study. I am glad to have the corrections made by the gentlemen who are quite familiar with this matter and the limitations they have sought to impose on the general statement.

Mr. STAFFORD. Does the gentleman intend to continue as to the other departments? In my opinion, he will save time in the consideration of the bill if he will give an explanatory review of the bill in general debate.

Mr. NELSON of Missouri. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. NELSON of Missouri. It so happens that this morning in my mail I received letters from three constituents who write of frauds which they claim to have been perpetrated for years, where the Government has failed to take note of such alleged frauds until the losses have been very great. For instance, in the so-called Drake estate, the view was expressed that the Government is liable for failure to take proper action until a great number of people have been mulcted in that respect. Does the gentleman care to express any opinion upon that?

Mr. OLIVER of Alabama. No; I have not had the opportunity of giving any study to that particular matter. This is the first time that it has been brought to my attention.

Mr. ARENTZ. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. ARENTZ. Has the gentleman given any study to the advisability of coordinating the legal branches of the different bureaus?

Mr. OLIVER of Alabama. Yes.

Mr. ARENTZ. For instance, the Bureau of Indian Affairs has its own solicitor and its own set of lawyers, and the Interior Department has its lawyers. If a matter comes up in the Indian Bureau that needs investigation, that in turn is passed over to the Solicitor of the Interior Department and in turn passed over to a solicitor under the supervision of the Attorney General. Some one is especially picked out in the Attorney General's office.

Mr. OLIVER of Alabama. I am very glad that the gentleman called my attention to that, because he is always thoughtful in his survey of matters of this kind. He will find a very interesting hearing had on that subject with the Attorney General.

It is the thought of the committee that if the President is clothed, as we think he will be, with plenary authority, the coordination which the gentleman speaks of will be brought about, and it will result in very large savings.

Mr. JOHNSON of Missouri. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. JOHNSON of Missouri. I should like the gentleman to explain about the appropriation for the tubercular hospital as it affects Springfield, Mo.

Mr. OLIVER of Alabama. Would it not be better to let me do that when that matter comes up under the 5-minute rule? I do not want to take up too much time in general debate.

Mr. JOHNSON of Missouri. There was no appropriation made, as I understand.

Mr. OLIVER of Alabama. Last year, the gentleman will recall, the Bureau of the Budget recommended an appropriation of $325,000 or $350,000 for the building of a separate tubercular hospital at Springfield, Mo. The committee advised against it, and the Congress approved the recommendation of the committee. We are not recommending at this time any appropriation for that purpose. We are carrying, however, an appropriation from the jail fund that is now unexpended, and which has already been appropriated, and which we think should better be spent there in perfecting a plant that we know will be occupied. We are carrying a sufficient amount from this fund to build quarters for the superintendent in charge and for the nurses' quarters, and likewise for a fence around the institution.

Mr. JOHNSON of Missouri. But there is no appropriation for a separate fund for the hospital?

Mr. OLIVER of Alabama. There is no appropriation for a separate hospital.

Mr. JOHNSON of Missouri. And the Budget did request $285,000?

Mr. OLIVER of Alabama. They simply requested, without earmarking it, $285,000. We disallowed it entirely; and then, in order that the temptation to spend something that we thought was not required, we took from the appropriation that was a continuing appropriation an amount for carrying out what we thought was worth while at this important institution.

Mr. JOHNSON of Missouri. But nothing is provided for any tubercular hospital?

Mr. OLIVER of Alabama. None whatever.

Mr. KELLER. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. KELLER. I should like to know if the reductions in this bill are reductions of wages or salaries or in the number of employees?

Mr. OLIVER of Alabama. There are reductions in salaries, in that there may be required in 1934, some furloughs, as have been required in 1933. In that indirect way, that would work a reduction of salaries, but none other than what the 1933 appropriation, which was approved by the Congress, carried.

Mr. KELLER. It carries nothing in addition to the 8⅓ per cent reduction?

Mr. OLIVER of Alabama. No. Well, there are a few individual cases, where perhaps I may not be entirely correct in that general answer. For instance, in the Court of Claims, we are there eliminating the position of auditor, and also one custodian and two stenographers, and we have reduced the pay of the clerk, which we thought was too large. We have also reduced other items of expense in connection with one or two other minor places where it was discretionary with some one in the executive service to fix the pay, not fixed by classification. We have undertaken in one or two cases to reduce where we thought it was out of line with

what was generally being paid for that same service in other branches of the Government.

Mr. KELLER. I understood the gentleman to say that in the Court of Claims at the present time there are pending suits, the gross amount of which is beyond $4,000,000,000?

Mr. OLIVER of Alabama. That is correct.

Mr. KELLER. And the gentleman recommends that before the Court of Claims gives judgment it make a report on the facts to the Congress for appropriation?

Mr. OLIVER of Alabama. This was simply a suggestion, that the proper committee of the House give further study to this matter, with a view to seeing whether the authority heretofore conferred should not be limited. That is all. It was nothing but a suggestion from our committee, to call it to the attention of Congress and the proper legislative committee of the House.

Mr. KELLER. One further question: Would it not be wise if we compelled the Revenue Department to refer claims for income-tax refunds to the Committee on Appropriations before an appropriation is made to meet them?

Mr. OLIVER of Alabama. Well, that is for the House to determine as a matter of policy.

Mr. LEAVITT. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. LEAVITT. Is it not possible the gentleman has overlooked this fact in connection with the Indian claims: It is the policy of the Committee on Indian Affairs, and has been for a number of years, that there must be a showing of probable ground for the claim, and it must be restricted to certain laws and treaties on which the claim is to be based?

Mr. OLIVER of Alabama. Pardon me, but I can only yield for gentlemen to ask questions.

Mr. LEAVITT. I am asking whether the gentleman has not overlooked that, and that all the committee does is to report an act that is passed by the Congress, allowing the Indians to go into the Court of Claims, which court hears those cases, and the Congress, after that court has given judgment, both makes the appropriation and specifies how it shall be disbursed to the Indians or for their benefit?

Mr. OLIVER of Alabama. Yes. I stated to the gentleman that certainly among some of the cases there are those to which the limitations which the gentleman states his committee has imposed do not obtain.

Mr. LEAVITT. And because of that fact the committee adopted this more restricted attitude.

Mr. OLIVER of Alabama. It was predicated upon what was reported to us as being true in some of the then pending cases.

Mr. FIESINGER. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. FIESINGER. The gentleman has made the statement that certain property was returned to citizens of your district and my district in the United States. I wonder if the gentleman will amplify that by stating what kind of property was referred to?

Mr. OLIVER of Alabama. I shall be glad to put that in the hearings. For instance, last year a conservative estimate of the value of automobiles returned was more than $1,400,000.

Mr. FIESINGER. Were those taken in liquor cases?

Mr. OLIVER of Alabama. No. This has nothing to do with liquor. Those were stolen automobiles and were recovered in other States. Only recently in my own State there had been a number of cars stolen, and it was reported there was an organized gang operating in and out of the State.

I called the attention of this bureau to it. They placed a man on it, and I heard on yesterday, less than 30 days thereafter, that they had returned, I think, 22 cars and had indictments now pending in this short time against 11 offenders.

Mr. CONNERY. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. CONNERY. I notice there is a decrease of $30,135 in the Employment Service of the Department of Labor. Will the gentleman tell us about that?

Mr. OLIVER of Alabama. We carried the Budget estimate for this particular service.

Mr. CONNERY. Does the amount carried in the bill take care of all of the offices that are open now?

Mr. OLIVER of Alabama. I can not say that, but that was what the President submitted for this service for 1934, and we carried the Budget estimate; we did not disturb it.

There is just one item perhaps some of you might be interested in, which I will refer to before concluding, because it has been quite controversial, and that is the item of printing. Under the Department of Commerce the printing for the Bureau of Patents is very large. It is carried in a separate item. It seems there have been some conferences between the director of the printing establishment and the Director of the Bureau of Patents relative to securing some reductions, and there was a reduction made after the conferences. We sent for both of these gentlemen; and after we talked with the Director of the Bureau of Printing, we felt we could safely cut from what he said he thought he could do that work for, $150,000 further, and that is reflected here.

Mr. ARENTZ. Mr. Chairman, will the gentleman yield again?

Mr. OLIVER of Alabama. I yield.

Mr. ARENTZ. What check is being had on the special district attorneys that are appointed throughout the United States to represent the Government in certain cases?

Mr. OLIVER of Alabama. Only such check as we recognize the Attorney General through his assistants imposes.

Mr. ARENTZ. He comes before the committee and requests funds for the appointment of 1, 2, or 3 special attorneys, does he?

Mr. OLIVER of Alabama. No, no.

Mr. ARENTZ. Or does he appoint them himself?

Mr. OLIVER of Alabama. We give him a fund, since that is an estimated amount, and we have reduced that for the next fiscal year under what has been carried heretofore.

Mr. ARENTZ. I think it is an item that should be watched very carefully.

Mr. OLIVER of Alabama. My information is that it is watched very carefully. Many of these cases are so very involved and so very important, involving millions of dollars, that they must be handled for the Government by capable attorneys.

Mr. ARENTZ. I have one case in mind which was carried along for seven years and nothing accomplished in those seven years, and I do not see any reason why.

Mr. OLIVER of Alabama. If the gentleman will call that case to my attention, I will secure a special report in reference to it.

Mr. BRIGGS. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. BRIGGS. I notice in the estimates for the Department of Labor and Bureau of Immigration there was a decrease of $631,000, but apparently an increase of the amount which has been allowed by the Budget. Is that in connection with deportation proceedings?

Mr. OLIVER of Alabama. Yes. The President in his estimates to Congress increased the total item carried in this bill for every one of these departments. I may say this: That in 1933 for the Department of State there was available for expenditure as approved by the Congress $12,892,379.60. The President recommended $13,800,620.60. The Department of Justice had available for expenditure $43,957,671; the President recommended $44,282,487. The Department of Commerce had available for expenditure in 1933 $42,568,913, and the President in his estimates submitted an estimate of $37,917,223.

The Department of Labor had available for expenditure $12,095,000. The President recommended $13,389,345.

It will be found that we have cut all of these under the amount available for expenditure in 1933, and likewise even under the amount of the suggested savings dependent upon the passage of legislation which the President recommended.

Mr. BRIGGS. Will the efficiency or the ability of the Bureau of Immigration to carry forward deportations as far as

possibly can be done consistent with the law be in any wise impaired by reason of the cuts which have been made?

Mr. OLIVER of Alabama. The amount we have approved is larger than the amount that has been approved for 1933, and the only reason why we approved the increased amount was that we were informed the President contemplated very soon submitting for the consideration of the House an additional sum to cover the cost of deportations. So we carried an estimated amount which we understood was inserted to cover that same purpose in 1934. [Applause.]

[Here the gavel fell.]

Mr. SHREVE. Mr. Chairman, I wish first to express my very deep appreciation for the work that has been done for this committee by the distinguished chairman of the subcommittee having this bill in charge. He has a fund of information that will gradually develop as we go through the bill. I think we have had the most painstaking, most careful examination this year that has been made during the 10 or 12 years I have been connected with the committee.

Mr. Chairman, there is only one matter I am going to discuss to-day, because I think it is not necessary to take up the other matters, and that is the question of the Bureau of Foreign and Domestic Commerce.

Now, there is some misapprehension as to the Bureau of Foreign and Domestic Commerce. Some people think it is of Republican origin; that it started back some time when the Republican Party happened to be in power; but I want to say to you that I was in Congress away back yonder when the thing really did start, and it was Secretary Redfield who was active in the matter, as I shall show presently.

Mr. Chairman, I hope that my colleagues will bear with me while I recapitulate very briefly some of the conclusions concerning the work of the Department of Commerce, and especially the Bureau of Foreign and Domestic Commerce, which I have formed during my 12 years' service as a member of this subcommittee. Let me first take advantage of this opportunity to thank my colleagues on the committee and the entire membership of the House for the loyal support and highly valued cooperation always extended to me in getting this bill through during each of the 10 years when I had the honor to be chairman of the subcommittee. The country, and, indeed, the whole world, is to-day faced with a very different set of problems than those with which we had to deal when I assumed charge of this bill providing for the very important activities carried on by these four great Departments of State, Justice, Commerce, and Labor. Back there 12 years ago our most pressing necessity was to hold up our end in the postwar race for foreign markets. Carefully thought-out plans to accomplish these ends were put into effect through proper increases in the appropriations for the various services, but at no time were these appropriations permitted to exceed the bounds of provable necessity coupled with the assurance of definite returns to our taxpayers.

It was under these circumstances that a program of building up the foreign-trade promotive service in the Bureau of Foreign and Domestic Commerce was conceived and carried into effect through the succeeding years, through the cooperation of the Secretary of Commerce with the Republican and Democratic leaders of Congress. I suppose it is largely due to the development of these services to meet the peculiar needs of the postwar era that so many people in and out of Congress nowadays think of this organization as being one originated and developed by Secretary Hoover. Its true origin has been beclouded by its most recent activities in the minds of gentlemen of this House. This bureau is, and of necessity has to be, strictly nonpartisan in character, and I can personally testify that it is operated strictly upon that basis. I suppose it is entirely natural that some gentlemen try to take credit for their parties for any governmental services which prove themselves really valuable to the country but this fact does not alter the force of my statement. Far be it from me as a good Republican to yield any part of the credit due us for the successful development of these services, but fairness to my colleagues on the other side of the aisle makes it necessary to admit that the Bureau of Foreign and Domestic Commerce was created in 1912 following careful study by the House and Senate on a problem involving duplication of services by three then-existing bureaus concerned with foreign trade, namely, the Bureau of Statistics and the Bureau of Manufactures in the old Department of Commerce and Labor, and the Bureau of Trade Relations in the State Department. The appropriation act passed in August 1912 provided for the consolidation of the two bureaus in the Department of Commerce and Labor and eliminated the Bureau of Trade Relations by not voting funds.

The commercial attaché service was first suggested by Secretary Redfield in his annual report of 1914, when he recommended that a start be made with 14 attachés located in as many capitals. Funds for the new service with 10 attachés were provided in the appropriation bill for the fiscal year 1914–15. During a debate on the subject, Representative Calder pointed out that a referendum by the United States Chamber of Commerce on the advisability of establishing a commercial-attaché service had resulted in a vote of 624 in favor and only 3 against.

Furthermore, Secretary Redfield, in 1914, announced the opening of the first district offices of the bureau located at New York, Chicago, New Orleans, and San Francisco. Later in the year offices were also opened at Boston, Atlanta, Seattle, and St. Louis.

Again, in 1915, Secretary Redfield asked that the commercial-attaché service be doubled. Appropriations were increased from year to year until at the close of the fiscal year 1921, there were 84 Americans in the Foreign Service of the bureau at the following points: Berlin, Brussels, Bucharest, Buenos Aires, Constantinople, Copenhagen, The Hague, Johannesburg, Lima, London, Madrid, Melbourne, Mexico City, Paris, Peking, Prague, Rio de Janeiro, Rome, Santiago, Tokyo, Vienna, and Warsaw.

Then, in 1918, the question was raised by the House Appropriations Committee as to the wisdom of combining the commercial-attaché service with the consular service of the State Department.

Let me say that this matter was very carefully worked out through a study of the European situation, and then later by getting together the heads of the various departments we worked out a system which, I think, from that time down to now has produced very little overlapping in the various activities.

Mr. DYER. Will the gentleman yield?

Mr. SHREVE. I would rather not yield until I have finished my statement.

Mr. DYER. Just for a brief remark.

Mr. SHREVE. I will yield to the gentleman from Missouri.

Mr. DYER. I should like to have the gentleman from Pennsylvania [Mr. SHREVE], and also the gentleman from Alabama [Mr. OLIVER], accept from the entire membership of the House that served with them an expression of our appreciation for their fine service.

Mr. SHREVE. I thank you.

In March, 1920, the advisability of eliminating the commercial-attaché service was debated on the floor of the House when the appropriations bill was reported out with no funds for the service. Mr. Sisson, of Mississippi, finally offered an amendment to restore this appropriation, and it was accepted, after debate, by a vote of 210 to 39.

Commenting on this vote of confidence, Secretary Alexander remarked:

> The satisfaction felt by the business community with the work of the commercial attachés, as expressed graphically in the spring of 1920, when it appeared to them that an effort was being made to have Congress eliminate the service entirely by withholding an appropriation, has left no doubt in my mind as to the worth of the service.

So much for the contributions of the building up of this service, to my friends on the other side of the aisle, for which I want them to have all the credit possible.

The fact remains that during the past 12 years this organization has been developed under the careful supervision and frequent inspection of our subcommittee into a really

effective agency for promoting our foreign commerce. It would be foolish to ascribe to the efforts of this bureau all of our success in developing export trade during this period. But they should not be denied credit by any means for having done a really effective job in facilitating and assisting the remarkable increase in our exports from $3,832,000,000 in 1922 to $5,241,000,000 in 1929. Whatever the contributing causes, it must be admitted that the basic mission of developing our export trade was certainly accomplished.

I have observed from statements on the floor and sometimes in personal conversations here of late a growing tendency to deprecate the value of these services, especially in the present muddled condition of international trade, and I can not say too emphatically to the Members of this House that had they made close investigation of this organization and its able personnel, which has been the opportunity and pleasure of the members of this subcommittee, they would have no such doubts in their minds. It is true that our exports have fallen off. It is also true that they still amount to a substantial volume and that we can ill afford to neglect any means at our disposal of holding on to what we have and trying to build up in new ways. Foreign competition for the world's export trade is naturally keener, and such conditions as we are passing through now put an unusual premium upon them.

The gentlemen in Congress must keep it clearly in mind that foreign governments are increasing their corresponding services at this time and not decreasing them, and that we can not go so far in carrying out our very necessary economy programs that we shall cripple and handicap our industries by depriving them of vitally needed assistance in meeting this increased foreign competition. Now, as never before, our business men need alert, active, and efficient governmental cooperation in holding on to our export trade volume which even at depression prices still is giving us $1,618,000,000 annually and keeping employed at least 3,250,000 wage earners in this country who would otherwise be added to our already formidable army of the idle.

But it is not only in the foreign field that the services of this bureau are of outstanding value to our business men. Price competition in all lines of trade has rarely in our history been as severe as it is to-day. Manufacturers, wholesalers, and retailers are having to operate on greatly reduced gross margins if they are to remain in the picture at all, and it is absolutely vital in order to do this that they cut down their cost of doing business in every way possible. Production costs are lower in America, as is well known, than anywhere in the world, but distribution costs have been comparatively quite extravagant because there has been but little systematic effort to regulate and control them. Much has been done to remedy this situation. Organizations of retail grocers in Kentucky and Florida, for example, enlisted the bureau's cooperation in a campaign of this nature to weed out their unprofitable operations, and in both States there was a really dramatic decrease of 70 per cent in grocery-store failures in the year following the bureau's work. A group of confectionery manufacturers with whom I have had the opportunity of checking the results of these services assure me that 91 manufacturing plants scattered all over the country have profited greatly by the bureau's help in analyzing their selling operations, and that 13 out of these 91 firms which were directly benefited report definite savings in sales costs, which is obviously clear profit, amounting to $417,500. Members who wish to check up on the efficiency of this service will be able to do so with the leading confectionery plants in their States or districts, and I am sure they will be most pleasantly surprised at the warm enthusiasm which exists for these services of the Bureau of Foreign and Domestic Commerce throughout that trade in every section of the country. The same thing will be found to be true in the grocery and drug trades.

The question has been asked, especially of late, as to why we should continue to support such an organization as the Bureau of Foreign and Domestic Commerce in view of the fact that our export trade has declined. I trust that my remarks may be of some value to my colleagues who have not had the same opportunities to examine these operations intimitately as have members of this committee, in answering these questions.

In conclusion, I should like to stress the point that all of these services are so far as is practicable on a fee basis; that the bureau does not serve special groups but, on the contrary, results of any of its investigations either in foreign or domestic trade are impartially available to the general public; that business men cooperating with these domestic-survey programs contributed three times as much money as the bureau expended on the projects last year; that the bureau never undertakes a survey unless it has satisfied itself that the trade can not do the work for itself (usually because private firms will intrust a governmental agency with their individual sales and cost figures, whereas they will not give them to any private party, fearing disclosure); that while the receipts from fees charged and contributions on survey projects are by no means equivalent to the cost of operating this bureau, that business men in all of your districts, as well as my own, entertain the very decided conviction that they are entitled to some small return from the Government for the taxes they pay into our Treasury, which principle we have not failed to recognize a thousandfold in our generous provisions for the interests of agriculture and labor; and finally, that the entire expense of maintaining the Bureau of Foreign and Domestic Commerce is only 8.6 per cent of the total appropriation for the Department of Commerce. There are nine other bureaus in the department besides the Bureau of Foreign and Domestic Commerce and I am sometimes surprised to learn how few people realize that there are a large number of other activities being carried on in this department, such as the Lighthouse Service, Patent Office, Commercial Aeronautics Branch, Coast and Geodetic Survey, Bureau of Navigation and Steamboat Inspection, Bureau of the Census, and the Bureaus of Mines, Fisheries, and Standards. Thus nearly 65 per cent of the total appropriation for the Department of Commerce are devoted to purposes of public protection and safety—lighthouses, marine and aeronautical inspection, prevention of mining disasters, public protection against dishonest weights and measures—all of these big functions whose activities and responsibilities increase rather than shrink with the general shrinkage of business.

The thanks of the House are certainly due to my good friend and colleague, Mr. OLIVER of Alabama, for his indefatigable labors on this very complicated bill during all the years he has been on the committee as member and chairman. He has always provided for these services in a generous yet sane manner and now, when the great necessity for drastic economy arose, has certainly done his part for the general welfare in his skillful handling of this bill.

The Clerk read as follows:

OFFICE OF THE SECRETARY OF STATE

Salaries: For Secretary of State, Under Secretary of State, and other personal services in the District of Columbia, including temporary employees, and not to exceed $6,500 for employees engaged on piecework at rates to be fixed by the Secretary of State, $1,683,449: *Provided*, That in expending appropriations or portions of appropriations, contained in this act, for the payment for personal services in the District of Columbia in accordance with the classification act of 1923, as amended, with the exception of the four Assistant Secretaries of State and the legal adviser of the Department of State, the Assistant to the Attorney General and six Assistant Attorneys General, the Assistant Secretaries of Commerce, the Assistant Secretary and the Second Assistant Secretary of Labor, the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act, as amended: *Provided*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed as of July 1, 1924, in accordance with the rules of section 6 of such act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade in the same or a different bureau, office, or other appropriation unit, or (4) to prevent the payment of a salary under any grade at a rate higher

than the maximum rate of the grade when such higher rate is permitted by the classification act of 1923, as amended, and is specifically authorized by other law, or (5) to reduce the compensation of any person in a grade in which only one position is allocated.

Mr. McGUGIN. Mr. Chairman, I move to strike out the last word. I ask unanimous consent that I may proceed for 10 minutes.

The CHAIRMAN. Is there objection?

Mr. OLIVER of Alabama. Will the gentleman see if he can finish in five minutes. It is on the bill, I assume?

Mr. McGUGIN. No; I want to discuss this new tariff bill.

Mr. OLIVER of Alabama. Will the gentleman let me make this statement, not that I like to object, but we entered into an agreement with the House that general debate would be limited to yesterday and we had a night session in order to carry out this agreement. I hope the gentleman will take only five minutes.

Mr. McGUGIN. I may say to the gentleman that I could not speak yesterday. I have talked with the gentleman from Pennsylvania [Mr. SHREVE] and the gentleman from Wisconsin [Mr. STAFFORD] and they suggested that I come in under the 5-minute rule.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent that the gentleman be allowed to speak out of order for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. McGUGIN. Mr. Chairman, there is now on the table a petition to discharge the Ways and Means Committee in its consideration of a proposed tariff bill which will permit automatic increases in tariff in keeping with the depreciation of foreign currency.

I can not go along with that policy, and I wish to say to the House that this policy is a mistake and can not promote the welfare of this country, industry, or agriculture, or any other class of people in this country. We are suffering from a depreciated foreign currency, not alone in our home markets but likewise in our foreign markets. Not alone is American industry suffering but American agriculture is suffering. Industry can not regain any of its foreign markets for its manufactures by increased tariffs.

Agriculture is not going to get out from under the burden of selling its goods abroad for depreciated currency by increasing industrial tariffs. Industry is going to lose still more in its home markets so long as the American wheat farmer and cotton farmer must ship their goods abroad and sell them for depreciated currency.

I am a protectionist, and I favor protection to meet the ordinary condition growing out of the difference in wage standards in this country and abroad. But that is not this situation. This situation is depreciated foreign currency, and you can not reach it by tariffs. It will not serve the needs of industry. You can give American industry an embargo against foreign competition; you can run our tariffs to any height. Yet American industry will continue to lose a home market. Why? Because its best market in America is agriculture; and so long as agriculture must depend for its income upon shipping its products to Europe and selling them for depreciated currency, there is no chance for agriculture to provide a sufficient home market for American industry.

Industry is in a bad situation, but it is childish for American industry to complain that it can not compete with a foreign competitor who pays his wages in depreciated currency, pays ocean freight rates to America, and then pays the present tariff duties. What would industry say if it had to manufacture its products west of the Mississippi, pay discriminatory freight rates to the Atlantic coast, then pay ocean transportation to Liverpool, and then sell its products for depreciated currency?

This is the situation of agriculture as a result of depreciated currency, and industry is never going to have a market as long as this condition exists.

This problem is a monetary one, and you can not reach it by tariff. The direct way to do it is to reduce the content of the gold dollar one-third. If you do this, the British pound is again worth $4.86, not of dollars of 22.23 grains of gold, but dollars of 15 grains of gold; and until the value of our dollar either goes down or the value of foreign currency comes up there will never be a parity in foreign exchange, and we shall always have this evil of depreciated currency. No man knows how to increase the value of foreign currencies. We may not want to decrease the value of our gold dollar, yet we must either decrease the value of our gold dollar or continue to suffer the misery of American industry and agriculture growing out of depreciated foreign money.

It is an idle dream to try to meet this situation by more tariff, as it will not work. It will only prolong our agony another six months. As proof that more tariff will not solve the decreasing demands for American manufacturing companies, I cite the evidence which is now being placed before the Ways and Means Committee. This evidence before the committee discloses that the imports are constantly decreasing 30 per cent by value and 20 per cent by volume. It is the vanishing American market which is causing the trouble. So long as American agriculture must sell abroad for depreciated currency, the American market for all manufactured products, foreign and domestic, will dry up. There is no such thing as meeting foreign depreciated currencies for industry alone by tariff giving American industry a monopoly upon a vanished American market. [Applause.]

The Clerk read as follows:

PASSPORT AGENCIES

For salaries and expenses of maintenance, traveling expenses not to exceed $500, and rent outside the District of Columbia, for not to exceed five passport agencies, $62,705: *Provided*, That not to exceed $15,000 shall be available for salaries of temporary employees.

Mr. FERNANDEZ. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FERNANDEZ: Page 4, line 19, strike out "$62,705" and insert in lieu thereof "$65,405."

Mr. FERNANDEZ. Mr. Chairman, I offer this amendment to point out that the appropriation bill of last year provided an appropriation of $65,000 for six passport agencies in the United States, one of them to be located in New York, one in San Francisco, one in Chicago, one in Seattle, one in New Orleans, and one in Boston.

The appropriation of $65,000 was not sufficient, and it was necessary for the Department of State to close the office in Seattle.

This year the Department of State asked for an appropriation of $65,000 in round figures, which was approved by the Bureau of the Budget, or $2,700 more than the Committee on Appropriations has provided in this bill.

There is a limitation in this bill that not more than five offices in the United States shall be established. I have no quarrel with the chairman of the subcommittee or the committee on this point. I am willing to leave it to the Department of State as to where these passport agencies may be located, notwithstanding that Congress on its own initiative established these offices; but I make the point that the appropriation recommended by the subcommittee is not sufficient to maintain five offices in the United States, as testified by the Assistant Secretary of State and as I was advised in conversation with him on yesterday.

I am not making a fight for the office at New Orleans. I am frank to say that, in addition to the duties imposed on this gentleman by the passport agency at New Orleans, he also serves as dispatch clerk. He dispatches all of the supplies for the State Department, and I doubt seriously that this office would be discontinued; but I simply propose this amendment for the benefit of the Members from Boston, San Francisco, New York, and Chicago, as well as the community which I have the honor to represent here.

These passport agencies are not a burden on the Government. They are self-sustaining. I could refer you in this connection to the records if I wished to take up the time of the committee.

If we abolish the passport agency in any one of these principal cities, it means that the people applying for a passport must go to the clerk of the United States court. The clerk of the United States court has a multiplicity of duties to perform and is not an expert on foreign treaties. This knowledge is absolutely essential, as testified by the Assistant Secretary of State, to proper issuance and proper execution of a passport application. If the applicant does not go to the clerk of the United States court, he must go to the clerk of a State court, and when he goes to either one of these clerks, naturally, the fee, which would otherwise go to the Department of State, is retained or disposed of in accordance with existing law.

I submit to the chairman of the subcommittee that this amount is very small, $2,700, and I think it would be well for the committee to accept this amendment, which would insure this important service to the business interests of the people of the country. As an illustration, take the very interesting and quaint city of New Orleans that I come from. There were 435 passports issued and renewals granted, representing business necessity, rather than tourist travel, and the cost of operating this office amounted to $4,373.45, while the fees earned amounted to $2,370; and when you take into consideration that this officer is also the dispatch officer for the department, the fees have justified the maintenance of this service in the great city of New Orleans.

[Here the gavel fell.]

Mr. OLIVER of Alabama. Mr. Chairman, I appreciate the apprehension that the distinguished gentleman from Louisiana may have as to the sufficiency of this appropriation.

He has presented the facts in a most admirable way, and I am in sympathy with the attitude he assumes in reference to the importance of this service. The committee, however, went very carefully over the subject, and as the gentleman said, we have not undertaken to discontinue any office. The gentleman very correctly stated that it was well administered under the able direction of Mrs. Shipley, and no one anticipates that any injustice will be done in administering the funds. She was told that we would probably give a lump-sum appropriation to be spent in the discretion of the bureau, subject to the limitation attached, and I think she felt that would prove helpful. I have no fear that there will not be ample and sufficient funds to care for the passport work efficiently.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

RENT, HEAT, FUEL, AND LIGHT, FOREIGN SERVICE

For rent, heat, fuel, and light for the Foreign Service and the United States Court for China for offices and grounds, including annual ground rent of the embassy at Tokyo, Japan, for the year ending March 15, 1934, and, as authorized by the act approved June 26, 1930 (U. S. C., Supp. V, title 5, sec. 118a), for living quarters and not to exceed $439,236 for allowances for living quarters, including heat, fuel, and light, $1,328,000: *Provided*, That payment for rent may be made in advance: *Provided further*, That the Secretary of State may enter into leases for such offices, grounds, and living quarters for periods not exceeding 10 years: *Provided further*, That no part of this appropriation shall be used for allowances for living quarters, including heat, fuel, and light in an amount exceeding $720 for any ambassador, minister, or Foreign Service office: *Provided further*, That under this appropriation and the appropriation herein for "Contingent expenses, Foreign Service," not more than $3,000 shall be expended for custodial service, heat, fuel, and light in any Government-owned building used for residence or residence and office purposes for an ambassador or minister, and not more than $1,700 for such purposes in the case of any other Foreign Service officer, except that at any post at which the expenditures for such purposes for the fiscal year 1933 were in excess of the limitation of $3,000 in this last proviso in the case of an ambassador or minister there may be expended during the fiscal year 1934 an amount equal to the sum so authorized to be expended during the fiscal year 1933, but in no event to exceed $5,000; and during the incumbency of a chargé d'affaires the limitation on such expenditures shall be the same as for the occupancy of the principal officer.

Mr. STAFFORD. Mr. Chairman, I am interested in the paragraph providing for salaries of Foreign Service officers. I was interested in the statement that the committee had decided upon allowing all Foreign Service employees a maximum sum of $720. Was that extended under the so-called Linthicum Act whereby we raised the salaries of clerks in Foreign Service under the guise of providing heat, light, and quarters?

Mr. OLIVER of Alabama. I do not recall the name of the act, but it was passed in 1930. This item, however, carries no appropriation for that purpose.

Mr. STAFFORD. I am making the inquiry in connection with the gentleman's statement that the committee had decided to make appropriation for heat, light, and quarters of $720. Has the gentleman any information, now that I am interpellating him, whether there is any gradation of that amount, or is it to be paid to every clerk?

Mr. OLIVER of Alabama. There is a gradation, which the department fixes and will apply.

Mr. STAFFORD. I understand some of the amounts will be curtailed by reason of the cut in the general appropriation.

Mr. OLIVER of Alabama. Yes.

The Clerk read as follows:

RESCUING SHIPWRECKED AMERICAN SEAMEN

For expenses which may be incurred in the acknowledgment of the services of masters and crews of foreign vessels in rescuing American seamen or citizens from shipwreck or other catastrophe at sea, $1,000.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. I direct the attention of the chairman of the subcommittee to the paragraph at the top of page 11, limiting the employment for clerical services to American citizens in foreign missions. When that was proposed a year or so ago it was thought by some that it might be a hardship in the actual administration in the work of these offices to compel the State Department to employ only American citizens. Has the gentleman any information, as disclosed in the hearings, as to the operation of that restrictive clause?

Mr. OLIVER of Alabama. Mr. Chairman, the State Department feels, I think, that this is very satisfactory, and has made no complaint whatever to your committee.

The Clerk read as follows:

CONTRIBUTIONS, QUOTAS, ETC.

For payment of the annual contributions, quotas, and/or expenses, including loss by exchange, in discharge of the obligations of the United States in connection with international commissions, congresses, bureaus, and other objects, as follows: Cape Spartel and Tangier Light, coast of Morocco, $825; International Bureau of Weights and Measures, $4,342.50; International Bureau for Publication of Customs Tariffs, $1,400; Pan American Union, quota, $167,576.40, printing and binding $20,000; in all, $187,576.40; International Bureau of Permanent Court of Arbitration, $2,000; Bureau of Interparliamentary Union for Promotion of International Arbitration, $7,500; International Institute of Agriculture, at Rome, Italy, $5,400; Pan American Sanitary Bureau, $30,024.11; International Office of Public Health, $3,015.79; International Radiotelegraphic Convention, $7,527; Government of Panama, $250,000; International Hydrographic Bureau, $5,790; Foreign Hospital at Capetown, $50; International Trade-Mark Registration Bureau, $14,330.20; International Bureau for Protection of Industrial Property, $1,350; Gorgas Memorial Laboratory, $50,000, of which $5,000 shall be immediately available; American International Institute for the Protection of Childhood, $2,000; International Statistical Bureau at The Hague, $2,000; International Map of the World on the Millionth Scale, $50; and International Technical Committee of Aerial Legal Experts, $250; in all, $575,431.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word to inquire whether the paragraph just read is a transposition from some other part of the bill?

Mr. OLIVER of Alabama. I can quite understand how the gentleman should be confused, because he always follows these matters so carefully. Heretofore these items have been carried in separate paragraphs, and it was thought by the State Department, and approved by the Budget Bureau, that it would be well to incorporate all in one paragraph. The committee has so reported it. These are payments made because of treaty obligations or express statutes. All of the limitations heretofore carried are retained.

Mr. STAFFORD. In no instance is any appropriation carried which is not authorized by treaty or legal obligation?

Mr. OLIVER of Alabama. None whatever; and the gentleman will be interested to note that we have stricken out some that were dropped last year and which were inserted this year, as, for instance, the International Prison Commission, the International Council of Scientific Unions, the Convention Relating to the Liquor Traffic in Africa, this last small item being provided for by treaty.

Mr. STAFFORD. I recall that some years back there were appropriations carried which were not authorized by law, but which we passed by in the consideration of the bill in the House without objection. The committee has eliminated those former appropriations?

Mr. OLIVER of Alabama. Yes. The $55 carried for the Convention Relating to Liquor Traffic in Africa is provided for by treaty, but we have omitted to appropriate for it in 1934.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. Why is it that the United States Government contributes such a large sum, $167,576.40, as its quota for the Pan American Union?

Mr. OLIVER of Alabama. That is based on population. In other words, our contribution is based on our population as compared with that of the other countries. This varies from time to time.

Mr. BRIGGS. I can understand that there may be a proportionate amount based on population, and in time of prosperity that it might cost half a million dollars to conduct the Pan American Union, but in time of retrenchment and economy I should think it could be conducted for half that money. Why should the amount the United States is paying, whether based on population or otherwise, be apparently a fixed charge of $167,000?

Mr. OLIVER of Alabama. I am very glad the gentleman has asked that question. This is pursuant to an international agreement between our Government and other governments lying to the south of us. We have not felt we could disturb the amount, though we do believe that some of the amounts are larger than we should now authorize. I have called the Secretary's attention to that fact, in the hope that this can be corrected through proper channels. In other words, we have asked for an itemized statement, and wish to serve notice through the State Department on all of the countries interested that a revision of the personnel pay schedules should be made.

Mr. BRIGGS. I should think that that would meet a very warm response in view of the financial condition of the other countries of the Western Hemisphere.

Mr. OLIVER of Alabama. We hope so.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. BRIGGS. Yes.

Mr. STAFFORD. Will the chairman of the committee explain the appropriation of $250,000 for the Government of Panama? What is the nature of that?

Mr. OLIVER of Alabama. That is a continuing obligation on account of the land we took over for the Panama Canal.

Mr. STAFFORD. That is under the Hay-Buneau-Varilla treaty of 1894?

Mr. OLIVER of Alabama. It is a treaty obligation.

Mr. STAFFORD. And as to the Gorgas Memorial Laboratory, I am not acquainted with that.

Mr. OLIVER of Alabama. That is provided for by statute and requires a continuing annual appropriation of $50,000. Panama and a number of other South American countries contributed the land and building, and also make some contributions to maintenance.

The Clerk read as follows:

INTERNATIONAL BOUNDARY COMMISSION, UNITED STATES AND MEXICO

For expenses of meeting the obligations of the United States under the treaties of 1884, 1889, 1905, and 1906 between the United States and Mexico, and of compliance with public resolutions approved March 3, 1927, and February 14, 1931, and the act making appropriations for the Department of State for the fiscal year 1933, including operation of gaging stations where necessary and their equipment; personal services and rent in the District of Columbia and elsewhere; fees for professional services at rates and in amounts to be determined by the Secretary of State; travel expenses, including transportation of effects; printing and binding; subscriptions to foreign and domestic newspapers and periodicals; purchase, exchange, maintenance, repair, and operation of motor-propelled, passenger and freight carrying vehicles; drilling and testing of dam sites, by contract if deemed necessary without regard to section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5); equipment and such other miscellaneous expenses as the Secretary of State may deem proper, $120,000.

Mr. STAFFORD. Mr. Chairman, this may be the last occasion when I shall have the privilege of making my annual inquiry as to the status of this appropriation, which has been dragging along and dragging along for years—$120,000 for the International Boundary Commission of the United States and Mexico. What is the status of the work in which this commission is engaged, and why is it that we can not eliminate this appropriation some time, some day?

Mr. OLIVER of Alabama. The boundary commission and the water commission were consolidated, and we reappropriated the unexpended balances last year. We have reduced the appropriation this year. I am in sympathy with the views of the gentleman, and we would like to hasten the completion of this work. The boundary States are very much interested, and I am hopeful that we can see, in the not distant future, the completion of this undertaking.

Mr. STAFFORD. Has the gentleman any estimate as to when the work may be terminated?

Mr. OLIVER of Alabama. No. We could secure no estimate from anyone as to when it might be completed.

Mr. STAFFORD. The gentleman, I am sure, by reason of his service here, knows the legislative lethargy that pertains to commissions when they are once created. They go on like the water in the brook, running on forever and forever, and it is a most difficult task to have them finish their work. I know the gentleman is doing very assiduous work to try to terminate some of these performing commissions, with little work to do. I commend the gentleman for his energetic work in that direction.

The pro forma amendment was withdrawn.

The Clerk read as follows:

INTERNATIONAL BOUNDARY COMMISSION, UNITED STATES AND CANADA AND ALASKA AND CANADA

To enable the President to perform the obligations of the United States under the treaty between the United States and Great Britain in respect of Canada, signed February 24, 1925; for salaries and expenses, including the salary of the commissioner and salaries of the necessary engineers, clerks, and other employees for duty at the seat of government and in the field; cost of office equipment and supplies; necessary traveling expenses; commutation of subsistence to employees while on field duty, not to exceed $4 per day each; for payment for timber necessarily cut in keeping the boundary line clear, not to exceed $500; and for all other necessary and reasonable expenses incurred by the United States in maintaining an effective demarcation of the international boundary line between the United States and Canada and Alaska and Canada under the terms of the treaty aforesaid, including the completion of such remaining work as may be required under the award of the Alaskan Boundary Tribunal and existing treaties between the United States and Great Britain, to be disbursed under the direction of the Secretary of State, $40,000.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the subcommittee on appropriations what is the necessity for the continuation of this commission. It seems to me sometime ago I heard from a rather high official of the Government that it had practically nothing to do, and I think it is one of those commissions that has been recommended for abolishment in some of the suggestions from the executive department.

Mr. OLIVER of Alabama. This is a commission created by treaty, and Canada provides the same personnel that we do to carry on the work jointly. It is for the purpose of marking or keeping clear the border line. If the gentleman will read the report, he will notice we suggest that probably the work could be more economically carried on if some definite understanding was had between the two countries as to what part of the border the United States would keep up and what part Canada would keep up. I hope very much that in the near future some agreement of that kind can be worked out; if so, I feel this appropriation can be reduced.

Mr. BRIGGS. Is this the commission, the one that dealt for a while with the St. Lawrence waterway matter?

Mr. OLIVER of Alabama. No. That is an entirely different commission. This is only for the purpose of marking out the boundary line. The survey has been made, but the gentleman will recognize that very often it is obliterated by the growth of trees and they are constantly clearing it up so as to preserve the old markings.

Mr. KVALE. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. KVALE. Is it not true that this money is spent economically, and will save millions of dollars which might have to be spent in future years if the boundary had to be determined at that time, because now the markings are permanent and correct and the record is being kept accurate?

Mr. OLIVER of Alabama. That is correct, except I feel they may find a more economical way, if an agreement is had between the countries as to what part of the border the United States must keep up and what part Canada shall keep up. In that way we can avoid some overhead expenses.

Mr. BRIGGS. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. BRIGGS. If it is permanently marked, there ought not be any necessity for a commission to sit year in and year out to see that the markings are still there.

Mr. OLIVER of Alabama. If the gentleman will read the hearings and report, he will find that his suggestion is not out of line with the thoughts of the committee.

The pro forma amendment was withdrawn.

The Clerk read as follows:

WATERWAYS TREATY, UNITED STATES AND GREAT BRITAIN—INTERNATIONAL JOINT COMMISSION, UNITED STATES AND GREAT BRITAIN

For salaries and expenses, including salaries of commissioners and salaries of clerks and other employees appointed by the commissioners on the part of the United States, with the approval solely of the Secretary of State; for necessary traveling expenses, and for expenses incident to holding hearings and conferences at such places in Canada and in the United States as shall be determined by the commission or by the American commissioners to be necessary, including travel expense and compensation of necessary witnesses, making necessary transcript of testimony and proceedings; for cost of law books, books of reference and periodicals, office equipment and supplies; and for one-half of all reasonable and necessary joint expenses of the International Joint Commission incurred under the terms of the treaty between the United States and Great Britain concerning the use of boundary waters between the United States and Canada, and for other purposes, signed January 11, 1909, $30,400, to be disbursed under the direction of the Secretary of State: *Provided*, That traveling expenses of the commissioners, secretary, and necessary employees shall be allowed in accordance with the provisions of the subsistence expense act of 1926, as amended (U. S. C., Supp. VI, title 5, ch. 16).

Mr. GOSS. Mr. Chairman, I move to strike out the last word, for the purpose of asking the chairman, as we progress with the bill, if he will be willing to explain some of these permanent and indefinite appropriations carried for the different departments. This is an old subject that has been discussed. I notice in the State Department there are considerable amounts, and I take it there may be some duplications that are carried in the bill, although the three items in the Justice Department bill of $31,000 are not referred to in the bill at all.

Mr. OLIVER of Alabama. These appropriations carried in this bill are very limited.

Mr. GOSS. In this particular department; yes.

Mr. OLIVER of Alabama. Yes. The gentleman will find one is for pay of consular officers, for American seamen and officers, and the other for refunding moneys improperly received. That amounts to $4,000. The other is miscellaneous trust funds, which represent accumulations covering a period of years.

Mr. GOSS. In the Department of Justice, at page 42 of the report, there are considerable amounts. There is about $15,000,000.

Mr. OLIVER of Alabama. The gentleman is in error about that being a permanent appropriation.

Mr. GOSS. Well, it is headed under "Permanent and Indefinite Appropriations Continued."

Mr. OLIVER of Alabama. If so, that is inaccurate. That is a misprint, and I am glad the gentleman has called it to our attention.

Mr. GOSS. My point is, are we still appropriating beyond the permanent and indefinite appropriation?

Mr. OLIVER of Alabama. Oh, no; not at all.

Mr. GOSS. And then that heading on page 40 should be eliminated entirely?

Mr. OLIVER of Alabama. Yes.

Mr. GOSS. There is nothing permanent or indefinite in these appropriations?

Mr. OLIVER of Alabama. Nothing whatever in the items to which the gentleman refers.

Mr. GOSS. So that really all the permanent and indefinite appropriation is $31,000 contained in the Department of Justice?

Are there any others?

Mr. OLIVER of Alabama. The Department of State has $31,000. There is none in the Department of Justice.

Mr. GOSS. Are there any in the Department of Labor?

Mr. OLIVER of Alabama. Yes. One of $4,000 in the Department of Labor, naturalization fees. There is a small amount in the Commerce Department, which I will look up and give to the gentleman.

Mr. GOSS. While the gentleman is finding that, may I ask him if his subcommittee that acts on these bills has this year gone into the question of these permanent annual indefinite appropriations?

Mr. OLIVER of Alabama. The gentleman will find set out on page 56 of the report the permanent appropriations. The Department of Commerce has $17,000.

Mr. GOSS. That is all?

Mr. OLIVER of Alabama. Yes.

Mr. GOSS. Does the gentleman's committee ever go into these questions?

Mr. OLIVER of Alabama. We went into it simply for the purpose of ascertaining the sources from which such limited funds came. There is another committee which is now examining all permanent and indefinite appropriations.

Mr. BRIGGS. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. BRIGGS. Is not this the commission that had the St. Lawrence waterway project under consideration at one time?

Mr. OLIVER of Alabama. It considers all international problems that may be referred to it along the border line by the two Governments.

Mr. BRIGGS. Is it not a fact the State Department took out of the hands of the commission the handling of the St. Lawrence waterway and dealt with it as a diplomatic matter without the commission's action?

Mr. OLIVER of Alabama. Under the terms of the treaty nothing can be referred to this commission except by agreement of the two countries. In other words, application must first be made to the respective Governments and then it is for the two Governments to determine whether the matters involved are of sufficient importance to be referred to the commission.

[Here the gavel fell.]

Mr. BRIGGS. Mr. Chairman, I ask unanimous consent that the time of the gentleman from Connecticut be extended three additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. OLIVER of Alabama. This commission has no authority over any matter not referred to it by the two Governments.

Mr. BRIGGS. Is it not true this commission really has very little, in fact, scarcely anything to do?

Mr. OLIVER of Alabama. They have some very important matters now pending, and if the gentleman will read the hearings he will find this was very fully developed. One of the important matters referred to the commission was a damage claim of citizens of the State of Washington

because of the operation of a large chemical plant on the Canadian side. Also other international boundary questions have been referred to the commission of considerable interest and importance.

Mr. BRIGGS. In addition to the other boundary commissions we have?

Mr. OLIVER of Alabama. I feel sure that many of these commissions can be consolidated and some abolished, if plenary power is given to the President as has been suggested and which I heartily favor.

Mr. BRIGGS. What is this item of $58,000 in the next paragraph, granting the commission funds for the procurement of technical scientific equipment, purchase, exchange, hire, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles, and so forth?

Mr. OLIVER of Alabama. That is for the investigations which the Departments of the Interior and of Agriculture are carrying on for the commission, and it relates to questions that have been referred to the commission by our Government and the Canadian Government.

Mr. GOSS. On page 7 of the report there are a few contributions, quotas, and things we have omitted from this bill. It is not of any size; it amounts to about $11,000. What are these items? Are they to carry out treaties, such as the one with relation to the liquor traffic?

Mr. OLIVER of Alabama. That is the only treaty obligation.

Mr. GOSS. Would not that really come under the head of permanent appropriations?

Mr. OLIVER of Alabama. No; we make annual appropriations for all these obligations.

Mr. GOSS. That is what I am trying to get at, to find out what are considered permanent and what are considered annual. I think if it is something to carry out a treaty it might be considered permanent.

Mr. OLIVER of Alabama. Permanent appropriations do not require annual appropriations, but are continuing appropriations. All international obligations such as we have been discussing must be appropriated for annually.

Mr. COCHRAN of Missouri. Mr. Chairman, I rise in opposition to the pro forma amendment. I would like to ask the gentleman from Alabama what has been the result of the action of Congress in abolishing the Mexican Boundary Commission? Have any ill effects resulted from that action?

Mr. OLIVER of Alabama. None whatever; and we carry no appropriation therefor in 1934.

Mr. COCHRAN of Missouri. The thought behind the question is why can we not do the same with this commission. Is there anything in the treaty which requires a paid commission rather than our Secretary of State and his assistants to carry on this little work?

Mr. OLIVER of Alabama. The gentleman will find in the report that we have requested the Secretary of State to inform us what notice is required under the several treaties to be given before we can abolish many of these commissions, and I am very hopeful that proper notice may be given so that we can abolish some if not all of them.

The appropriation for the Mexican commission was not carried simply because the commission was not functioning. We refer to this in our report and suggested that if the matters in controversy are really to be ever settled they will have to be referred to a commission differently organized, and certainly not by the appointment of arbitrators in the way now followed.

Mr. COCHRAN of Missouri. Now I would like to ask the gentleman further in reference to the next paragraph containing the appropriation of $58,000. Can the gentleman give us any sound reason why the engineers of the Army or the officials of the Geological Survey can not do this work that we are appropriating $58,000 for?

Mr. OLIVER of Alabama. Government officials are doing it.

Mr. COCHRAN of Missouri. Why is this $58,000 needed?

Mr. OLIVER of Alabama. Because under our accounting system they require an appropriation for the State Department, so that the State Department may transfer the same to the other Government agencies which do the work.

Mr. COCHRAN of Missouri. None of this $58,000, then, is for salaries?

Mr. OLIVER of Alabama. Yes, some for salaries in the Interior Department and some for salaries in the Department of Agriculture.

Mr. COCHRAN of Missouri. Are the engineers of the Department of Agriculture, the Chief Engineer of the Army, and the engineers of the Geological Survey not paid from their own appropriations?

Mr. OLIVER of Alabama. A reduction appears in the appropriations carried for those departments equal to the amount here proposed to be allocated for the payment of such salaries. It is a confused system of bookkeeping. I think it should be corrected.

Mr. COCHRAN of Missouri. Why is it necessary to use this kind of bookkeeping? It is all Government work and should be simplified. It only means additional labor for the auditors and accountants.

Mr. OLIVER of Alabama. I agree with the gentleman that it should be simplified.

Mr. COCHRAN of Missouri. I want to say to the gentleman from Alabama that when we were holding hearings on the economy bill we took up this matter and we had a great deal of trouble getting any information to show that there was anybody who was doing any reasonable amount of work. We found nothing that would warrant the expenditure of such a vast sum of money by this commission. If we are going to have such a commission I think it would be far better to pay them a given amount daily, together with their expenses, while they are employed. I may say that the House on several occasions has cut the salary of members of the commission. Every time that the House has reduced the salary of the members of this commission, when the bill reaches the other body, the salary is restored. Why? Because of the personnel of the commission, consisting of two former Members of that body. It seems they have enough influence to keep the original salary year after year. I think it is time we were doing something to see that a reasonable amount is paid these men and not a salary such as they are getting now, which is not justified by the amount of work they are doing.

Mr. OLIVER of Alabama. The gentleman will be interested to know that this bill carries the same salary that the economy bill fixed for these officers, namely $5,000.

Mr. COCHRAN of Missouri. And I hope the gentleman will see to it that when the matter goes to conference, the salary remains at $5,000 and does not go back to $7,500 or $10,000, as it has in the past.

Mr. OLIVER of Alabama. Unless the House instructs me to vote otherwise, I shall insist that it stay at $5,000.

Mr. COCHRAN of Missouri. I am very glad to hear that statement coming as it does from the gentleman from Alabama, who will be one of the conferees.

The Clerk read as follows:

For the purchase of law books, books of reference, and periodicals, including the exchange thereof, for the Department of Justice, $7,500: *Provided*, That not to exceed $2 per volume shall be paid for the current and future volumes of the United States Code, Annotated.

ANTITRUST LAWS

Mr. PATMAN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, in connection with the Department of Justice, I want to discuss briefly the failure of the department to properly enforce the antitrust laws. During the last few years I think very little effort has been made to enforce the antitrust laws.

It is very necessary that people be prevented from setting the price of the articles they manufacture or sell. It is not fair to the other people of the country who are consumers of the particular article. It is true that when one's salary is reduced, if everything else that this wage earner purchases is reduced, there would be no change; but this is not the case. During the last two or three years the price of

all farm commodities has decreased. The farmer producing these commodities has been compelled to continue to buy at a high price, a set price, the commodities manufactured by these concerns violating the antitrust laws.

If we had a system in this country whereby when one produces a commodity, like cotton or wheat, when the price of that commodity decreases below the cost of production, his debts would decrease, his interest would decrease, his taxes would decrease, and all the other things that he must purchase would decrease, he would always be on a parity. Such a system as this we will never have; but we can make the dollar buy less of certain commodities and give the people a better deal. We know it is impossible to have a system that will permit such exact justice; but we can require these people who are violating the antitrust law to cease and desist in order that the commodities and articles that they produce may come down in value just the same as the production of the farmer or just the same as wages of employees. The best way to cure the whole situation is to expand the currency so commodity prices will increase. When that is done, however, we should still prevent price fixing against the public interest.

Mr. DYER. Will the gentleman yield?

Mr. PATMAN. I yield for a brief question.

Mr. DYER. Will the gentleman tell us, if he knows, in what way or in what cases or in what special instances the department has failed in the manner he has stated?

Mr. PATMAN. Yes; I will be very glad to do that. I am pleased that the gentleman has asked me the question.

You know some serious charges were made against what is known as the Aluminum Trust a few years ago. The charges were filed with the Federal Trade Commission. The Department of Justice also investigated the charges. I do not believe you can read these charges and the proof that was presented without believing that the charges were well founded. Was anything ever done? Nothing was done by either the Department of Justice or the Federal Trade Commission. Although the price of everything else has decreased from 25 to 75 per cent, the price of aluminum remains practically the same. Mr. A. W. Mellon controls the Aluminum Co. of America.

ALUMINUM

During the height of the boom, in 1929, aluminum sold for 23.9 cents a pound, and now it sells for 23.3 cents a pound. When demand decreases, ordinarily, the price of the commodity decreases, but this is not true of aluminum, because the Aluminum Co. of America has a fixed price. It has a fixed price because the Department of Justice permits it to violate the law.

The Aluminum Co. of America produces all the virginal aluminum in the United States and Canada, and I venture to say that if the price of aluminum had gone down with the price of cotton or had gone down with the price of wheat or had gone down with the reduction of wages, the Aluminum Co. of America would be in here wanting us to do something about it; but they have no incentive to do this, because the price remains the same.

I hope the gentleman will join us in an effort to get the Department of Justice to do something, even at this late day, against the Aluminum Co. of America violating the antitrust laws.

[Here the gavel fell.]

The Clerk read as follows:

CONTINGENT EXPENSES, DEPARTMENT OF JUSTICE

For stationery, furniture and repairs, floor coverings not exceeding $1,500, file holders and cases; miscellaneous expenditures, including telegraphing and telephones, postage, labor, typewriters and adding machines and the exchange thereof and repairs thereto, street-car fares not exceeding $300, newspapers, press clippings, and other necessaries ordered by the Attorney General; official transportation, including the repair, maintenance, and operation of 6 motor-driven passenger cars, 2 for the Attorney General, 1 for general use of the department, 2 for the Bureau of Investigation, and 1 for the Bureau of Prohibition for investigative work, delivery truck, and motor cycle, to be used only for official purposes, and purchase and repair of bicycles, $85,000: *Provided*, That this appropriation may be reimbursed for expenditures in connection with cars herein authorized for the Bureau of Investigation and Bureau of Prohibition from the appropriations for the expenses of said bureaus when approved in writing by the Attorney General.

MELLON'S ALUMINUM

Mr. PATMAN. Mr. Chairman, I move to strike out the last two words.

In connection with the enforcement of the antitrust laws, I want to invite the attention of this House to the fact that there is a particular reason——

Mr. TABER. Mr. Chairman, I make a point of order. I think the debate should be confined to the bill.

Mr. PATMAN. I am speaking in order and to the bill.

The CHAIRMAN. The Chair thinks the gentleman is in order.

Mr. PATMAN. The Aluminum Co. of America is owned principally by Mr. Mellon, the former Secretary of the Treasury. He owns and manipulates all the aluminum in the United States and Canada and practically all the aluminum in the world. He had considerable power as Secretary of the Treasury because he passed on all building contracts. He hired all the architects. No one could get a job drawing plans for public buildings unless Mr. Mellon employed him. He approved the plans and specifications for public buildings. When he was Secretary of the Treasury he had published in the Treasury Department a magazine edited by Government employees which had for its object and purpose to encourage and dictate to the architects that in their plans and specifications they substitute aluminum for iron or wood or steel in every place they could.

Why? Because he owns the aluminum, because it has a fixed price regardless of the price of wheat or grain or cotton. Mr. Mellon got a fixed price for aluminum.

That is one reason why Mr. Mellon is not holding the office of Secretary of the Treasury to-day. I know that many people do not like us to talk about it, but nevertheless it was a case of Mr. Mellon quitting under fire. He did not want the facts disclosed. He received a presidential pardon. The only thing that kept him from being impeached by Congress was the fact that he left the office. Congress could not have done anything else but impeach him if he had remained.

I know Members do not like to have me talk about that, but there are many reasons why the antitrust laws should be enforced. When money is scarce commodity prices go down where prices are not fixed and where companies have not acted in restraint of trade.

It is necessary that something be done to prevent the fixing of prices by those who would have people pay exorbitant prices for things they purchase.

MONEY IN CIRCULATION

Many people would have us believe that we have a lot of money in circulation. It was stated the other day that we had five and one-half billion dollars in circulation. Mr. Goldenweiser, the economist for the Federal reserve, estimates that we only have two billions in circulation to-day. By reason of the scarcity of money a decline in the prices of commodities and articles that are produced has been caused. Where the producers are not in a position to fix reasonable prices the prices of those commodities decline.

Therefore, it is necessary to enforce the antitrust laws. Much of our money is in foreign countries. Much of it is hidden. When Al Capone was convicted in Chicago the bootleggers of the Nation were served notice that if they continued to do business with the banks they were going to be apprehended and punished. Therefore, they quit doing business with banks, and it has been discovered lately that some of these bootleggers had as high as $500,000 buried under their houses or in their lockboxes and security boxes in banks, hidden and out of circulation entirely. Narcotic peddlers are evidently doing the same thing.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I can not yield. Many people engaged in crime are doing the same thing. They would be caught if they were to do business with the banks. For that reason the circulation of money is contracted. We can remedy that situation by putting more money in circulation to

make up for the hoarded money. Much of this money has been lost and destroyed and people presume that it is in circulation. Out of the money that is theoretically in circulation more than a billion dollars is in fifty, one hundred, five hundred, one thousand, five thousand, and ten thousand dollar bills, and is not in general use.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. SCHAFER. Mr. Chairman, I rise in opposition to the pro forma amendment. Following the testimony of one of the evils of prohibition, just presented by the gentleman from Texas [Mr. PATMAN], I invite him to go to the Clerk's desk and sign the petition which I have filed to discharge the Committee on the Judiciary from the consideration of the resolution providing for the repeal of the eighteenth amendment. He will thereby aid in curing this evil, wherein under prohibition bootleggers and highjackers and rum runners have made billions of dollars, as he has indicated.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. SCHAFER. I can not now. After a while I may have a little time to yield. I particularly ask the distinguished Democratic gentleman to sign this petition to correct that evil, and to carry out the pledge of the Democratic Party. The Democratic Party pledged immediate action on the eighteenth amendment and the sumptuary prohibition laws enacted thereunder, but still it seems that this session of Congress may adjourn without submitting the eighteenth amendment repeal resolution to the States because 43 Democratic Members repudiated their platform pledge. What are we faced with? If this session of Congress does not submit the eighteenth-amendment repeal, several years will roll by before the States will have an opportunity to act on the repeal, because 44 State legislatures are in session at the present time or will convene shortly; and if we wait until the special session to submit the repeal of the eighteenth-amendment resolution, many of the legislatures will have adjourned, and if it is to be ratified by legislatures they will not be able to do so promptly.

If we submit it for ratification by State conventions, the legislatures will not be in session to provide for the conventions; and in these trying times of the American taxpayer, when it is necessary to cut the cost of Government, I doubt whether some of the States would call special sessions of their legislatures to do their part in repealing the amendment. Therefore, if action is to be taken, if relief is to be granted within the next few years, the repeal resolution will have to be submitted at this session of Congress. The chief head waiter at the Democratic pie counter, Mr. Farley, in speaking in Baltimore recently, denounced the Republican lame ducks and the Republican Membership for obstructing the program of the Democratic Party, and he cited the vote on the eighteenth amendment repeal resolution as such an indication. The Associated Press dispatch of January 7, 1933, quotes Mr. Farley as stating:

"GLARING EXAMPLE" CITED

"The most glaring example of the subordination of public duty to partisan sabotage by the hold-overs from the political renovation of last November is the failure of the amendment designed to put an end to the disastrous experiment of national prohibition."

Farley said it is "really not extraordinary that the dying Republican administration should deem it of priceless political value to force a session of Congress on President Roosevelt in the early days of his administration.

"Such a session is a terror to a weak President. There is no question but that the Grundy session of 1929 crucified Mr. Hoover, exposing as it did the poverty of his leadership and his lack of policy."

All Mr. Farley has to do is to call upon 6 of the total of 43 Democratic Members who voted against the repeal resolution to come to the aid of their party. The responsibility does not rest on the Republican minority. It is ridiculous for Mr. Farley to go throughout the country and blame the Republicans for the failure of this Congress to submit the eighteenth amendment repeal resolution, in view of the fact that the RECORD shows that 43 Democrats voted against the resolution on Tuesday, December 5. The Democratic majority has been in control of the House for two years; and if it does not arrange for another vote on the eighteenth-amendment repeal at this session and a change in the vote of six of the Democratic Members, we will find that the Democratic promises, in so far as relief from the eighteenth amendment is concerned, are just about as near being kept as were the Democratic promises to keep us out of the World War.

Mr. COLE of Iowa. Mr. Chairman, will the gentleman yield?

Mr. SCHAFER. Yes.

Mr. COLE of Iowa. Is it not true that if the Democrats had supported the beer bill, it would have carried by 294 votes?

Mr. SCHAFER. I am not talking about the beer bill. It is true that the beer bill passed the House. If the votes for passage depended on Democratic Members alone, it never would have passed, for many of the Democratic majority which controls the House voted against it.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. SCHAFER. I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

Mr. OLIVER of Alabama. Mr. Chairman, I feel that the gentleman from Wisconsin has been entirely fair. It may be that we have departed somewhat from our rule of sticking to a discussion of the bill. I am quite willing to give the gentleman to-morrow two minutes of my time in discussion on the prohibition matter, and I feel sure the gentleman will assist us in that way in moving along with this bill.

Mr. SCHAFER. I should like to have the two minutes so that I could yield to the gentleman from Texas [Mr. PATMAN], who indicated that bootleggers and rum runners and highjackers were making many millions of dollars under the eighteenth amendment.

Mr. OLIVER of Alabama. Will the gentleman defer that until to-morrow, when I shall be glad to yield him two minutes?

Mr. SCHAFER. Mr. Chairman, I shall be glad to do so, and I ask unanimous consent to extend my remarks in the RECORD by including an Associated Press release of a statement made in the city of Baltimore by Mr. Farley, the head waiter at the Democratic pie counter.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

MISCELLANEOUS OBJECTS, DEPARTMENT OF JUSTICE

Conduct of customs cases: Assistant Attorney General, special attorneys and counselors at law in the conduct of customs cases, to be employed and their compensation fixed by the Attorney General; necessary clerical assistance and other employees at the seat of government and elsewhere, to be employed and their compensation fixed by the Attorney General, including experts at such rates of compensation as may be authorized or approved by the Attorney General; supplies, Supreme Court Reports and Digests, and Federal Reporter and Digests, traveling, and other miscellaneous and incidental expenses, to be expended under the direction of the Attorney General; in all, $101,500.

Mr. DYER. Mr. Chairman, I move to strike out the last word. I want to ask a question of the gentleman from Alabama [Mr. OLIVER] with reference to lines 9 to 12 on page 20, which provide for $122,000 for rent for the departments. I should like to know if it is not expected that the Department of Justice Building will be finished by the 1st of July?

Mr. OLIVER of Alabama. The committee went into that question, and it is our hope the building will be completed during the fiscal year, but we could get no definite promise. If it is completed, under the existing rental contract it can be vacated, and this amount will not be spent. We simply provided for the contingency, if not completed.

Mr. DYER. We will probably not have to use this money, then?

Mr. OLIVER of Alabama. Not all of it, we hope.

The pro forma amendment was withdrawn.

Detection and prosecution of crimes: For the detection and prosecution of crimes against the United States; for the protection of the person of the President of the United States; the

acquisition, collection, classification, and preservation of identification and other records and their exchange with the duly authorized officials of the Federal Government, of States, cities, and other institutions; for such other investigations regarding official matters under the control of the Department of Justice and the Department of State as may be directed by the Attorney General; hire, maintenance, upkeep, and operation of motor-propelled passenger-carrying vehicles when necessary; firearms and ammunition, such stationery, supplies, and equipment for use at the seat of government or elsewhere as the Attorney General may direct, including not to exceed $13,000 for taxicab hire, to be used exclusively for the purposes set forth in this paragraph and to be expended under the direction of the Attorney General; traveling expenses; payment of rewards when specifically authorized by the Attorney General for information leading to the apprehension of fugitives from justice, and including not to exceed $493,154 for personal services in the District of Columbia; $2,589,500.

Mr. McCORMACK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I notice this paragraph relates to the Bureau of Investigation. I wish to express briefly an opinion which I entertain with reference to the activities and efforts of this particular bureau. During my period of service in the House I have heard other departments or branches of government severely criticized, but on this occasion I am going to say a kind word for an activity of the executive branch of the Government.

The Bureau of Investigation is at least one bureau in the Federal Government toward which the least breath of scandal has never been directed. Its personnel are men who are conscientiously and fearlessly carrying out the serious duties that are imposed upon them by law.

I have never heard this bureau criticized or attacked, at least in my time, and I think the older Members of the House, Members longer in service than I, will agree to that statement in their time. Every one of those men is carefully selected, and never has there been the least breath of corruption attached to any one of them. They have serious duties to perform, and they perform their duties ably and well. This bureau is a credit to the Federal Government. It is under the leadership of a brilliant young man whom I greatly admire and whom I respect. Undoubtedly the high character of service rendered by those in the service of that bureau is as the result of the type of leadership which they enjoy. That young man down there whom I have observed, Mr. J. Edgar Hoover, Director of the Bureau of Investigation, I consider one of the finest public officials in the service of the Federal Government. I take this opportunity to make these few remarks so that at this particular spot in the reading of this bill, where appropriation is provided for with reference to the future activities of the Bureau of Investigation, to let Mr. Hoover and those who are working under him know that the Members of the National House of Representatives have watched their activities and are proud of the wonderful work they are doing, and we sincerely hope and trust that they will continue to render in the future the same high character of service they have rendered in the past.

Mr. DYER. Will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. DYER. I simply want to add to what the gentleman has so ably said about this work in the bureau. I have watched it carefully for 20 years, as the author of an act of Congress that has taken a great part of the time of this bureau, namely, the national automobile theft law. In my judgment, Mr. Chairman, and I think I voice the sentiment of the distinguished gentleman from Alabama [Mr. OLIVER] and the distinguished gentleman from Pennsylvania [Mr. SHREVE], the former chairman of this subcommittee, Mr. Hoover is one of the finest public officials of this Government, and his bureau is one of the most efficient, nonpartisan, nonpolitical bureaus that we have at this time.

Mr. McCORMACK. I thank my distinguished friend for his contribution, and I absolutely agree with him. My only purpose was to stay the reading of the bill for a few moments so that there might be a message sent from this Chamber to those in the executive branch of the Government that when they are rendering a high character of service, performing serious duties fearlessly and courageously, they will be recognized, and to send a message which will inspire them in the future to even higher levels and to a higher character of service than they have so ably rendered in the past. [Applause.]

Mr. OLIVER of Alabama. Will the gentleman yield?

Mr. McCORMACK. I gladly yield.

Mr. OLIVER of Alabama. I called attention to the efficiency of this bureau, in the absence of the gentleman from Massachusetts, and requested the House to read page 108 of the hearings where they would get a summary of the work that has been accomplished by the bureau.

Mr. McCORMACK. I thank the gentleman from Alabama. [Applause.]

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. McCORMACK] has expired.

The Clerk read as follows:

SALARIES AND EXPENSES, BUREAU OF PRISONS

Salaries and expenses: For salaries and expenses in connection with the supervision of the maintenance and care of United States prisoners, including not to exceed $179,163 for personal services in the District of Columbia and elsewhere, traveling expenses, and expenses of attendance at meetings concerned with the work of such bureau when authorized by the Attorney General; $204,000.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

This may not be the place for the inquiry which I wish to make about the action of the Director of the Bureau of Prisons in purchasing an automobile bus for the conveyance of Federal prisoners from various places in the United States to the Federal penitentiaries.

I follow these bills rather closely. Maybe I scrutinize them too carefully for my own good, but perhaps it is for the public's welfare; but I was really amazed when I learned that the Bureau of Prisons, presided over by a very capable man—and I join in the encomiums that the gentleman from Alabama gave him this morning—had purchased from some appropriation an automobile passenger bus for the sole purpose of conveying prisoners from various points in the country to the various penitentiaries.

I am one of those who do not approve of that character of expenditure. I consider it a waste, even though that distinguished bureau chief may be able to show that there is some economy in the transferring of prisoners by individual bus, operated by the Government. The attention of all of us has been called to the activity of the Government withdrawing traffic and other passenger service from the railroads. It is the unanimous opinion of everyone who has given it momentary thought that the railroads are a permanent institution in this country and must be maintained.

Yet we find the head of a bureau of the Government, without any express authority, investing the sum of thousands of dollars in the purchase of a bus for a service that could just as well be performed by the railroads, as it has been performed by them since the railroads were constructed.

I wish to inquire whether there is any specific authority for that appropriation that was made only in the last fiscal year?

Mr. ALLGOOD. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. I yield.

Mr. ALLGOOD. I wish to congratulate the gentleman from Wisconsin upon his stand for economy here and upon his profound knowledge of this question and the deep information he has upon the subject. I just wish to congratulate him upon the stand he has taken for economy.

Mr. DYER. Answer that question!

Mr. STAFFORD. That is a bouquet that I could hardly expect to come from such a gentleman, in view of the fact that when he was last on the floor he so graciously objected to my paying him a compliment by objecting to my continuing for two minutes. I accept the bouquet.

Mr. HILL of Alabama. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. I do not yield for any more bouquets.

Mr. HILL of Alabama. It is a case of two good economists being together, I may say.

Mr. STAFFORD. I am more than willing to accept a bouquet applicable to the gentleman's colleagues in the absence of the gentleman's other colleague [Mr. PATTERSON].

Mr. OLIVER of Alabama. I am very glad the gentleman asked the question, because it was not the misuse of funds. If anyone is to blame, Congress is to blame. Our committee must assume the responsibility, and so must Congress, of providing the funds for this purpose. We went into it and the committee understood the conditions under which the bus was to be procured and the purpose of its use. I think if the gentleman will read the hearings he will find it has been used in a very proper way and within proper limitations.

[Here the gavel fell.]

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for three additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. STAFFORD. Will the gentleman kindly inform me whether there was any express language that would put Congress on notice that it was the purpose to authorize the head of this bureau to purchase an automobile bus for this specific purpose?

Mr. OLIVER of Alabama. My recollection is that the hearings disclose it.

Mr. STAFFORD. Oh, the hearings! Yes; but the gentleman can not expect the Members of the House to read the voluminous hearings and be acquainted with the viewpoint of the committee. Was there anything in the report, was there anything in the stated words of the bill, which would give an indication to the Members of the House that this money was to be used for this singular and exceptional purpose?

Mr. OLIVER of Alabama. I do not now recall whether it was in the report or not.

Mr. STAFFORD. Mr. Chairman, I will withhold my caustic criticism of this action until I read the hearings, because I think such practices can not be justified in these straitened times, when we are on the verge of being obliged to take over the railroads because of their want of revenue, to have the Government go into competition with the railroads by buying a bus that is only used a part of the time, lying idle most of the time, being at the direction of this director to be sent to this place and that place to convey convicts to the penitentiaries, while the railroad service is going on continuously. I think it is false economy, but I will withhold further caustic and perhaps withering comment until I have read the testimony. [Applause.]

The Clerk read as follows:

UNITED STATES SUPREME COURT

Salaries: For the Chief Justice and eight Associate Justices; reporter of the court; and all other officers and employees, whose compensation shall be fixed by the court, except as otherwise provided by law, and who may be employed and assigned by the Chief Justice to any office or work of the court, including an additional assistant to the reporter of the court, if the court deems one necessary, to enable the reporter to expedite the publication of its reports, $279,173.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

As I read the report, the committee scaled down the recommendation of the Budget from $292,173 for the salaries of the Chief Justice and Associate Justices and other employees directely connected with the Supreme Court some $13,000. Was this done upon the recommendation of the Supreme Court?

Mr. OLIVER of Alabama. No. This is not a reduction from the salaries of the members of the Supreme Court. We could not scale down their salaries. This is on the help employed by the Supreme Court.

Mr. STAFFORD. Will the gentleman give some information as to the reason this appropriation was scaled down $13,000?

Mr. OLIVER of Alabama. The committee went into it very carefully and were unanimously of the opinion that the Supreme Court, in times like these, would gladly cooperate in effecting economies, and it is our thought that we have not denied them proper clerical and messenger assistance.

If the gentleman will read the hearings, he will find quite a large number of messengers carried for the Supreme Court, and our action here accords with reductions in the executive branches of the Government and with reductions carried for other courts. In this day and time no department or activity is so sacred that Congress should not interpose and endeavor to effect economies alike in all branches or departments of the Government.

Mr. STAFFORD. Mr. Chairman, the Supreme Court—and I do not make this statement to criticize the action of the committee—has always been rather sensitive and also aloof from making any proof to the Congress in justification of the estimates they present.

Mr. OLIVER of Alabama. The gentleman will find that the clerk of the Supreme Court submitted a statement as to their employees, and the committee felt this reduction was justified on the statement submitted.

Mr. STAFFORD. Mr. Chairman, I do not wish to express criticism of the committee, but I dislike to see any committee of Congress take any action against the estimate as furnished by the Supreme Court, a coordinate branch of government.

Mr. OLIVER of Alabama. The executive department is also a separate coordinate branch of the Government, and we have not hesitated to cut the recommendations of the President.

Mr. LAGUARDIA. Mr. Chairman, I rise in opposition to the pro forma amendment.

I wish to call the attention of the chairman to a matter for the future consideration of the committee, inasmuch as I, in all likelihood, will not be here on the next appropriation bill.

I called the attention of the House at the last session to the abuse of the assignment of district judges. I gave the complete list of the judges assigned to the southern and eastern districts of New York. I took that district as an example of the conditions. For example, there were some there who really were assigned owing to the needs for additional judges and who went there on the call of service. They were not subject to criticism and none was intended, but in that list I gave at the time was the case of a judge on the Atlantic seaboard being assigned to the Pacific seaboard, while at the same time a judge from the Pacific seaboard was assigned to the Atlantic seaboard. Surely no justification for that. This involved the cost of transportation and a per diem allowance. Now, if any district is constantly in need of additional judges, this situation ought to be corrected. If there are any districts which have too many judges, I believe one of those judges might be permanently assigned to another district where he is needed.

This constant shifting of judges from one place to another naturally entails a great deal of expense. For instance, I gave an example where a judge sitting in Brooklyn was assigned to Manhattan, just across the river, connected by a subway, and he received a $20 allowance for that day.

Mr. GOSS. Travel allowance?

Mr. LAGUARDIA. Yes. In addition to the assignment of district judges, another thing that must be looked into is that the circuit court judges ought to have their residence in the place where the court sits most of the time. In our circuit district there is one judge who lives in Connecticut. The circuit court of appeals invariably meets in New York City, and yet his expense charge during the year amounts to several thousand dollars.

Mr. GOSS. I am acquainted with one of these judges from Connecticut to whom the gentleman referred. That judge resented, as far as he could ethically, having to go down there and sit in that particular district.

Mr. LAGUARDIA. He is a circuit court judge and naturally must sit with the circuit court of appeals. The appellate courts spend most of the time in New York City.

Mr. GOSS. I understand; but it is not up to that judge; he is not looking for it. I want to make the record clear on that.

Mr. LAGUARDIA. It is the circuit court of appeals for that district. It seems to me we should provide the residence of these circuit court judges at the point where they are sitting most of the time. I am not criticizing him personally. I am criticizing the system. His residence ought to be fixed in New York. They sit most of the time at one place, and the place of residence ought to be there in order to avoid this traveling expense.

Mr. MILLARD. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. MILLARD. Will not the evils that the gentleman now complains of be corrected when prohibition is repealed?

Mr. LAGUARDIA. I am talking about circuit courts.

Mr. MILLARD. I refer to the first part of the gentleman's statement.

Mr. LAGUARDIA. It will be some time, I think, before the district courts will be able to catch up with their civil calendar, particularly in the southern and eastern districts of New York, where they are way behind in the admiralty and other calendars.

Mr. OLIVER of Alabama. I think the gentleman is correct in his statement. It is the fault of the system rather than the judges. I had a talk with the Chief Justice about the matter, and it is the hope of the American Bar Association that something can be worked out along the lines that the gentleman mentions.

Mr. LAGUARDIA. Just in that connection there is one defect that should be corrected, and that is this: No one has been able to state who relieves the judge after he is once assigned. In other words, the assignment of the judge is brought about by a call for a judge from the senior judge in the district making the call, but, certainly, they ought to have some rule about when he is to be relieved. If you will look at my list you will find that a judge may go to another district and sit for a few days, then return home and go back and sit for another few days, and traveling expense and per diem are allowed. The responsibility ought to be placed somewhere to relieve the judge at the proper time or after he has finished his work on that particular assignment.

The Clerk read as follows:

For necessary repairs, furnishings, and improvements to the Court of Claims buildings, to be expended under the supervision of the Architect of the Capitol, $4,500.

Mr. OLIVER of Alabama. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OLIVER of Alabama: On page 27, after line 19, insert:

"The Court of Claims is authorized and directed to prescribe a graduated schedule of charges to be made and collected for certified copies of its decisions and findings of fact. The minimum charge to be prescribed for any such copy shall not be less than 25 cents."

Mr. OLIVER of Alabama. I may say to the committee that this is in line with what obtains in other courts. I talked with the judges and they felt it was proper and something that should really have been provided for sooner.

Mr. DYER. I shall not enter any objection or make any point about it.

Mr. OLIVER of Alabama. It will result in money being paid into the Federal Treasury, just as money is now paid for certified copies of the opinions of other courts.

Mr. DYER. Mr. Chairman, I ask for recognition on the amendment.

Mr. Chairman, I want to call the attention of the committee to the system that grows up in the Government when we provide for additional employees, and so on.

In 1925 the Court of Claims came to the committee of which I am a member, the Committee on the Judiciary, and asked for legislation authorizing them to appoint seven commissioners.

We had hearings upon the matter, and the court represented to us that this was important and necessary, because following the World War their work had accumulated, and they were behind in many claims and could not reach them or attend to them promptly and, therefore, asked for the appointment of these commissioners. They asked for them as temporary commissioners, and the committee, of which I am a member, reported a bill authorizing the court to appoint seven commissioners at $5,000 per annum.

This legislation became law on February 24, 1925. Three years after this the court came back to the Committee on the Judiciary and asked for an extension. The court said they had not been able to catch up with their work and that they needed these commissioners for a similar period. We reported a bill extending the time three more years. This was on January 11, 1928.

About two years after this time they came back to us and asked not only for an extension of the time for these temporary commissioners but they asked us to report to the Congress and ask for authority to have these commissioners made permanent positions. They made a sufficient showing to justify the committee, as they thought, in taking this action. The salary was to be $5,000 per annum.

The House passed this legislation in view of the desire of the Court of Claims, as was stated to the committee, to catch up with its work growing out of the World War. This bill went to the Senate and some one over there, I do not know who it was, but evidently some Senator who wanted to favor, perhaps, one of the commissioners, had the salary increased from $5,000 to $7,500 for the seven commissioners.

All I know about the necessity for the present continuation of these commissioners, Mr. Chairman, is what I have read in the hearings of the Committee on Appropriations, wherein it has been stated by the chief justice of this court that they had furloughed during the present year three of the commissioners for three months at one time and then continued the furlough of these three commissioners for another three months, making a furlough of six months for three of the seven commissioners. As stated by the chief justice, this was done to conserve enough of the appropriation to take care of other employees and prevent the necessity, perhaps, of furloughing others.

As I read the hearings before the Committee on Appropriations, it seems that these three commissioners, after they had been furloughed for six months, evidently, came to the conclusion that they could not continue in this capacity for this length of time without pay.

[Here the gavel fell.]

Mr. DYER. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DYER. So it was stated by the chief justice that these three commissioners had resigned. Notwithstanding this, the hearings show that the court filled these three vacancies by appointing other commissioners.

I do not know whether some of the judges had favorites they wanted to put on as commissioners or not, but, Mr. Chairman, it seems to me peculiar that they needed only four commissioners for a period of six months and now come here and ask for a continuation of the services of all of them. The Committee on Appropriations, in the bill, has limited the number to five, although the law itself provides for seven.

Mr. Chairman, I would have gone into this matter myself in the committee of which I am a member and from which this legislation came providing for the appointment of these commissioners originally, to determine just what the facts are with respect to the necessity of continuing any of them, if I had been aware of the situation, because if they were needed only for the work growing out of the World War, certainly that work has not continued until this day.

This shows, Mr. Chairman, that when you provide officials for the Government it is most difficult to ever separate them from the service.

The gentleman from Alabama can make his own statement, but I talked with him on several occasions, and it is his opinion that all of these things that are incorrect, wherever there are needless officials, should be eliminated under the blanket authority which I am advised they are going to give the next President.

For that reason I do not offer any amendment, but simply make these remarks on the situation regarding this one item for the information of the committee.

Mr. MOORE of Ohio. Mr. Chairman, and members of the committee, eight years ago Congress inaugurated an innovation with respect to practice before the United States Court of Claims by authorizing the judges of the court to appoint seven competent persons as commissioners who shall "have and perform the general duties that pertain to special masters in equity." Suits filed in the Court of Claims are referred to the commissioners, who try the cases and hear the evidence, rule on its competency and make their reports to the court accompanied by the evidence. The case is then argued before the judges of the court on exceptions to the commissioner's report and on the legal questions involved.

The Court of Claims has the dual function of a trial court and of an appellate court, as appeals therefrom are taken direct to the Supreme Court of the United States by writ of certiorari.

Prior to the inauguration of the commissioner system the evidence in the cases before the court was taken by deposition before a notary public. That procedure entailed a large, voluminous record containing immaterial and incompetent testimony, a considerable length of time, and did not enable a court to judge in any way the demeanor of the witnesses while on the stand.

According to the Attorney General's report for the fiscal year ended June 30, 1932, about half of the suits in the Court of Claims carry interest, and it has been clearly established by the reports of the Attorney General and records of the Court of Claims that the commissioner system has been and is saving the Government each year, in interest alone, hundreds of thousands of dollars. During each year while the commissioner system has been in operation it has, by forcing cases to an early trial and ruling out incompetent evidence, saved the Government many times its total cost.

I trust that in passing this appropriation bill the House will do nothing to disrupt or disturb this system which is so vital to the proper administration of justice by one of the most active and important of existing courts, the United States Court of Claims. The correctness of this statement need not be further emphasized than to quote the following sentences from page 83 of the annual report of the Attorney General of the United States for the fiscal year ended June 30, 1932, as follows:

> During the year ended June 30, 1932, the Court of Claims disposed of 823 cases, involving $470,513,986.48. This is the largest number of cases finally disposed of in a court year during recent times.
>
> * * * * * * *
>
> A careful estimate of the pending cases, with actual and estimated amounts involved as to the principal and interest computed under the present law, shows the aggregate of pending claims to be $4,055,312,696.59.

As to the history of the origin of the Court of Claims I can do no better than quote from the address of Chief Justice Fenton W. Booth, given before the Federal Bar Association at Washington in 1929, as follows:

> Among the first bills introduced in the First Congress were several providing appropriations for the payment of private claims against the Government, and each succeeding Congress was confronted with not only similar but a constantly increasing volume of similar legislation, until finally the matter became a subject of concern, eliciting the efforts of our early statesmen to solve it.
>
> It is no reflection upon Congress to state that the adjudication of private claims against the Government should be intrusted to the courts. The attenion of Congress is centered upon public and important governmental questions; its facilities for obtaining testimony in such controversies are limited and procedure therewith unavoidably prolonged. Citizens of the country remote from the seat of government would be seriously handicapped, both as to the expense as well as obvious inability to secure testimony of greater probative value than ex parte affidavits, and in most instances absolutely precluded from personal appearance before committees. As a matter of demonstrated fact, to restrict the citizens of the United States to the single personal right of constitutional appeal to Congress for the redress of their grievances would, as to private claims, be the equivalent in most instances of the denial of justice.
>
> The Supreme Court of the United States recognized this fact long before it impressed Congress. Chief Justice Jay, the first Chief Justice of the United States Supreme Court, said in the memorable case of Chisholm *v.* Georgia:
>
> "I wish the state of society was so far improved and the science of government advanced to such a degree of perfection as that the whole Nation could in the peaceable course of law be compelled to do justice and be sued by individual citizens."
>
> And in several opinions of the same great court the subject was repeatedly referred to and favorably advanced. The constitutional right to petition Congress for relief was the single available remedy. Governments may not be sued except by their consent, and the increasing demand for the prompt settlement of just governmental debts, the interminable delay in their consideration and allowance, aroused such a formidable sentiment among the bench and the bar of the country, as well as the claimants themselves, that Congress, in February, 1855, passed an act creating the United States Court of Claims. The court at first was composed of three judges, and while the subject matter of its jurisdiction was most comprehensive, its real judicial power was exceedingly limited. The right to award a judgment against the United States was withheld. The findings and opinions of the court were transmitted to Congress for its approval and awards. Strange as it may now seem, the judgeships attracted accomplished lawyers and the initiatory work of the judges so far commended itself to Congress that in 1863 the court's jurisdiction was enlarged to what Congress then believed was authority to award judgments against the Government, with right of appeal to the Supreme Court by either party. The statute of 1863 contained a provision which took from the court's judgments the attribute of finality; the Secretary of the Treasury was given a modicum of supervisory power, and hence the Supreme Court declined to entertain appeals. In 1866 this error in legislation was corrected, and since then the court has occupied a distinct place in the Federal judiciary system of the country.
>
> The act of 1863 increased the personnel of the court to one chief justice and four associate judges, and as such it remains to this day.

The Court of Claims has a wide and most varied jurisdiction, including all claims against the United States Government with the exception of tort and pension claims. The present docket of the court includes a total of approximately 1,500 cases, embracing the following types of cases: Congressional reference, income tax, contract, ship, patent, cotton linter, railroad, Indian, dependency allowances, rental allowances, and others.

The work of the Court of Claims has been increased periodically from its inception. On page 44 of the Attorney General's report for the fiscal year 1921 we find the total number of cases pending June 30, 1921, to be 733, involving the sum of $197,316,447.07.

From page 83 of the report of the Attorney General for the fiscal year ended June 30, 1932, I previously quoted as follows:

> A careful estimate of the pending cases with actual and estimated amounts involved as to the principal and interest computed under the present law, shows the aggregate of pending claims to be $4,055,312,696.59.

A consideration of the tabulations on pages 83 and 84 of this report indicates 1,551 actual cases pending before the court. This shows within the last 10 years an increase of over 100 per cent in pending cases with a stupendous increase in the amounts involved.

It was early realized that the court needed additional assistance, due to the increase of the annual volume of business before it. As early as 1870 Justice Nott, of the Court of Claims, in Lawrence *v.* United States (6 C. Cls. 81), stated as follows:

> The increased business of the court has caused to suitors increased harassments and delays, and calls for increased means and facilities. It may be that if ordinary cases were referred to special commissioners in the first instance, both to take the testimony and report the facts, the law of those cases would be more carefully considered and the result more speedily reached. And these references might go on during the vacation, so that at the opening of the new term a large number of new cases would have well-nigh ripened into judgment. The exceptions of the respective parties to the findings would direct the scrutiny of the court to the essential facts, and the conclusions of the commissioner would reduce the arguments to the real points of legal controversy.
>
> Of no case referred to a commissioner will the court lose responsibility or control. The final hearing will still be before

the court, and there each party will be entitled to be fully heard, and to present by his exceptions any matter of which he deems himself aggrieved, either as to the law or the fact. The testimony and proofs must be returned with the report, and the court will look into them, so as to see whether any finding is sustained by or is against the weight of evidence. The arguments will be confined to the matters excepted to, and the cases can be set for hearing, when ready, upon any Monday of the term, without the delay of going upon the usual trial list.

The appointment of seven commissioners by the Court of Claims for a term of three years was authorized by an act approved February 24, 1925 (43 Stat. 964), and that portion of the act pertaining to and defining the duties of the commissioners is as follows:

To afford the Court of Claims needed facilities for the disposition of suits brought therein, said court is hereby authorized and empowered to appoint seven competent persons, to be known as commissioners, who shall attend the taking of or take evidence in cases that may be assigned to them severally by the court and make report of the facts in the case to the court. Any commissioner shall proceed under such rules and regulations as may be promulgated by the court, and such orders as the court may make in the particular case, and may have and perform the general duties that pertain to special masters in suits in equity. He may fix the times for hearings, administer oaths, examine witnesses, and receive evidence. Parties to the suit may appear before the commissioner in person or by attorney, produce evidence, and examine witnesses. Subpœnas for witnesses or for the production of testimony before the commissioner may issue out of the court by the clerk thereof and shall be served by a United States marshal in any judicial district to whom they are directed. The rules of the court shall provide for a finding and report of facts by a commissioner, to be filed in court with the testimony upon which the same is based, and for exceptions thereto in whole or in part, by the parties to the suit, and a hearing thereon within such reasonable time as the court's rules or order may prescribe. Nothing in this section shall be so construed as to prevent the court from passing upon all questions and findings without regard to whether exceptions were or were not taken at the hearings before the commissioner. Any person appointed as commissioner may be removed at the pleasure of the court. (Act of February 24, 1925, sec. 1, 43 Stat. 964; joint resolution of January 11, 1928, 45 Stat. 11.)

Such term of office was extended an additional three years by an act of January 11, 1928 (45 Stat. 51). Commissioners are now serving, pursuant to the provisions of an act approved June 23, 1930 (46 Stat. 799), at an annual salary of $7,500, the commissioners devoting their entire time to the duties of their office.

The duties of the commissioners are succintly and aptly defined in the original act of February 24, 1925, in the following phraseology:

Any commissioner shall proceed under such rules and regulations as may be promulgated by the court and such orders as the court may make in the particular case, and may have and perform the general duties that pertain to special masters in suits in equity. He may fix the times for hearings, administer oaths, examine witnesses, and receive evidence.

When the court has referred a case to a commissioner he proceeds to set hearings for the appearance of the parties before him and the taking of evidence in the case. While a great many of the hearings are held in Washington, the commissioner has the power and authority and does travel throughout the United States and its Territories to the localities where the witnesses reside, thereby reducing both the expense of the Government and plaintiffs which would otherwise arise from the necessity of bringing witnesses to Washington for protracted periods of testimony. The commissioner in the hearings rules on the evidence as to its competency, relevancy, and materiality, and as to the forms of questions. He thus segregates the main issues of the case in concrete form—a procedure which it will be readily seen lessens the burden upon the court in its consideration of the records of the cases before it. When the testimony is completed before the commissioner he files with the court his findings of fact in a report accompanied by the evidence adduced by the parties. Plaintiff and defendant are then given 30 days in which to file exceptions thereto, the exceptions inviting the scrutiny of the court to the essential facts, and the conclusions of the commissioner reducing the arguments of counsel to the main points of legal controversy. The final hearing is before the court, at which hearing the parties are fully heard on questions of both law and fact.

The assistance thus rendered the court is readily indicated from the annual reports to Congress by the Court of Claims, 1921 to 1932, inclusive.

Prior to the inauguration of the commissioner system in 1925 the average annual amount sued for by plaintiffs and disposed of by the court was $82,500,000; the average annual amount sued for by plaintiffs since the inauguration of the commissioner system and disposed of by the court has been $1,500,000,000; the average annual number of cases disposed of by the court prior to the inauguration of the commissioner system was 438; the average annual number of cases disposed of by the court since the inauguration of the commissioner system has been 735.

The mere fact that the court has been able to annually dispose of an average number of 735 cases, since the inauguration of the commissioner system, as compared to an average annual number of 438, prior thereto, is ample justification for the system as it now exists, with its personnel capable of conducting the hearing of cases involving a wide variety of subjects, such as intricate and highly technical patent cases, tax cases, contract cases, Indian cases, and cases arising through congressional reference.

I have previously quoted from the Attorney General's report for the fiscal year ended June 30, 1932, in order to show a comparison of pending cases and amounts involved as between June 30, 1921, and July 1, 1931.

I now again quote from the last report of the Attorney General as to pending cases as of June 30, 1932, with the estimated amounts and computed interest, as applied to various types of specific cases:

Tax cases:		
675 actual claims	$66,097,106.65	
Estimated interest	14,688,245.92	
		$80,785,352.57
Patent cases:		
41 actual claims	238,347,640.08	
Estimated interest	52,966,142.24	
		291,313,782.32
Indian cases:		
58 actual claims	1,072,006,278.34	
25 estimated claims	354,000,000.00	
Estimated interest	2,112,449,581.39	
		3,538,455,859.73
General and special jurisdictional cases: 777 actual claims		144,757,701.97
		4,055,312,696.59

It will be noted that the pending cases as estimated in this report comprise 799 interest-bearing cases as against 777 non-interest-bearing cases. The interest-bearing cases approximate 50 per cent of the number of cases now pending. The amount of interest carried by these interest-bearing cases as contained in the Attorney General's report is staggering to contemplate. The concrete figures of this report show that the interest alone reaches the aggregate amount of $2,180,103,969.55. A consideration of the interest feature, together with the fact that the average annual number of cases disposed of by the court since the inauguration of the commissioner system is 735, as against an average annual number of 438 prior to its inauguration, demonstrates in striking form the large saving of interest resulting under the present commissioner system. These figures indicate to any fair-minded person the absolute necessity of the commissioner system as an adjunct to the court in speeding up its work.

The question may be asked, How much does the system cost? I have here figures which have been obtained from the chief clerk of the Court of Claims and which are directly made up from the itemized, audited, and approved expense vouchers relating to the commissioners. They are as follows:

Salaries of seven commissioners	$48,125
Commissioners' transportation (annual average)	3,018
Commissioners' subsistence (annual average)	2,588
Stenographic assistance	13,427
Total annual cost	67,158

From this it will be seen that the total annual expenses of the present system, which operates to double the number

of cases disposed of per year by the court, are only $67,158, an infinitesimal amount when compared with the interest items alone as taken from the Attorney General's report of over $2,000,000,000. Now permit me to give some concrete examples. As previously pointed out to a committee of this House by Chief Justice Campbell, the former chief justice of the Court of Claims, in one group of six cases, referred to as the Brooks-Scanlon group, the plaintiffs sought judgments in excess of $40,000,000 with interest, and the court rendered judgments for a total of $4,959,603. Inasmuch as the commissioner who consolidated and tried these cases together saved, in the judgment of the chief justice, at least one year's time in bringing these cases to trial, there was a saving of interest in these six cases of $297,576, a saving sufficient to finance the entire commissioner system for more than four years.

Another case which is highly illustrative of the time saved and permits of a direct comparison as between the original method of taking testimony by deposition and procedure under a commissioner of the Court of Claims is the case of Grissinger *v.* United States, No. D–923.

This is an interest-bearing patent case, quite intricate in nature, involving long-distance telephone lines, together with their elaborate electrical equipment. The petition in this case was filed December 4, 1924. Plaintiff and defendant struggled along through a maze of expert testimony of a very technical nature and involving certain electrical tests which were made at the Bureau of Standards until January 16, 1929, a period of over five years. At that time defendant had only partially completed its testimony. The case was then referred to one of the commissioners of the Court of Claims, who is not only a lawyer, but an electrical and mechanical engineer as well, and who is versed in patent matters. Notwithstanding the fact that the defendant repeated all of the previous electrical tests before the commissioner and took much additional testimony, followed by plaintiff's rebuttal testimony, the commissioner completed the final hearing October 2, 1930, slightly less than one year and nine months after the case had been referred to him.

While no specific amount is mentioned in the petition in the case, the amount is nevertheless large, as it involves the sale to France by the United States Government of the telephone lines and long-distance equipment used and erected in France by the American Expeditionary Forces during the war.

This is an interest-bearing case and, as has been indicated by the comparative procedure, undoubtedly several years have been saved in the taking of testimony before a commissioner familiar with electrical and patent matters.

In five typical patent cases in which there is the total sum of $11,939,300 sued for, interest is accruing at the present time at the rate of 4 per cent, which amounts to $477,572 per annum, in the event the plaintiffs establish their claims in full.

In this connection, comparing these figures with the Grissinger case, the saving of even two years' interest, at 4 per cent, would amount to over $900,000. The interest for two years at 4 per cent on this group of five cases as compared with the annual cost of the commissioner system at $67,000, gives the interesting and startling fact that savings in interest in these five cases alone would support the entire commissioner system of the United States Court of Claims for a period of over 13 years.

The annual report of the Attorney General for the fiscal year ended June 30, 1932, informs us on page 84 that the percentage of recovery for the current year was approximately 1 per cent of the amounts claimed.

From the tabulations found on pages 83 and 84 of this report the total principal sum sued for in interest-bearing cases is found to be $1,376,451,025.07.

Applying to this sum the percentage-of-recovery figure of 1 per cent, as estimated by the Attorney General, we find that of this amount $13,764,510.25 will be recovered.

The annual interest on this latter sum, based on the economy act, which allows 4 per cent per annum, is $550,580.41. Making a most conservative estimate that the commissioner system saves six months in the trial and preparation of a case, this will amount to an annual saving of $275,290.20, or enough each year to support the entire system, inclusive of commissioners' salaries, stenographic assistance, traveling, and subsistence for more than three years.

We should not single out and select this trained personnel who is directly responsible for a huge saving to the Government for a reduction in salary. This trained personnel at the present time includes a tax expert, a patent expert, and a former Congressman who for years was prosecuting attorney in his State. These men now serve under a statute which makes no provision for retirement pay, yet they do work almost identical with that of a trial judge.

It is true in these years of depression that the most rigid economy should be exercised, but is it economy to select this small and highly trained personnel for a cut in salary that is not only unjust to these commissioners but may be reasonably expected to result in a substantial monetary loss to the United States Government?

Once more in this respect I refer to the report of the Attorney General for the fiscal year ended June 30, 1932, and direct to your attention the following figures:

> The total amount of judgments rendered against the Government during the year was $5,503,534.84, in cases in which the recovery sought was $470,513,986.48. The percentage of recovery for the current year was approximately 1 per cent of the amount claimed, but is $8,735,102.42 less than the amount awarded by the court in judgments during the preceding year. The total amount of the judgments entered in favor of the Government during the year on counterclaims was $1,591,691.24. Costs were collected from unsuccessful claimants during the year in the amount of $2,400.01.

The one percentage of recovery means but one thing, and that is this: The Court of Claims, with its present facilities for adequately investigating the multitudinous claims made on the Government, conspicuously stands out as the protector of the public moneys, and while it does this it has the facilities to carefully investigate each and every claim, hundreds of which must, according to these figures of the Attorney General, be of the utmost flimsiness.

And where do we find the first line of this protection? It exists in the personnel of the commissioners. They are the men who alone come in actual contact with the witnesses, and being present at the actual taking of the testimony are able to see the witnesses as they testify and thus contemplate their veracity and question the witnesses themselves. These are factors which, as every lawyer will admit, render them much more capable of weighing the evidence thus presented than even the most learned judge who assimilates his case from a mere printed record. Here is just where the Government wants and needs a group of highly trained and skilled lawyers, who can and do function not only to protect its citizens in the prosecution of their just claims but at the same time saves the Government from unjust claims.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama [Mr. OLIVER].

The amendment was agreed to.

The Clerk read as follows:

> Salaries and expenses, clerks of courts: For salaries of clerks of United States circuit courts of appeals and United States district courts, their deputies, and other assistants, travel expenses pursuant to the subsistence expense act of 1926, as amended (U. S. C., Supp. VI, title 5, sec. 821–833), and other expenses of conducting their respective offices, $1,856,580.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. In this item I believe the committee has reduced the Budget item by $110,000. The hearings disclose an itemized statement of the appropriation of $2,000,000.

The gentleman from Alabama in his prefatory remarks said that perhaps the committee did not like to be too drastic in cutting down the estimates of the Department of Justice. It occurs to me that in this instance it has gone too strong.

Mr. OLIVER of Alabama. I would like to ask, either at this or some other point, to later return for the purpose of offering an amendment whereby we will provide a fund for 1934 out of certain unexpended 1933 balances.

The CHAIRMAN. Will the gentleman specify what he wants to have passed?

Mr. OLIVER of Alabama. Lines 12 to 18, inclusive, page 29.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GOSS. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. GOSS. Could the gentleman indicate to the House what that might involve? As I understand, the gentleman will offer an amendment that will reappropriate all of the savings of this bill for any purpose.

Mr. OLIVER of Alabama. Oh, no; not of this bill at all. We estimate that by proper economies during the remainder of the fiscal year 1933, we can find some savings, and we will limit the amount of the reappropriation of certain savings thus effected, so that it may provide for estimates that we may have been in error about relative to the Department of Justice in 1934.

Mr. GOSS. That is, any part of the Department of Justice?

Mr. OLIVER of Alabama. No.

Mr. GOSS. Can the gentleman tell us what that is?

Mr. OLIVER of Alabama. We think that there will be some savings in prisons, on account of the fact that a number of prisons have not been operated the full year. We think there will be some savings even in the item carried for marshals. To show the gentleman how estimates made in advance are sometimes erroneous, we understood at one time that there would be a deficit under this item for marshals, and now we learn there may be an unexpended balance. I shall make known to the House at the time the amendment is offered what the facts are on which we predicate our belief.

Mr. GOSS. And what reappropriations it will be applied to?

Mr. OLIVER of Alabama. Absolutely. There is no desire, and there will be none, to reappropriate any of these unexpended balances for controversial items in the bill in 1934.

The Clerk read as follows:

PENAL AND CORRECTIONAL INSTITUTIONS

For all services, supplies, materials, and equipment in connection with or incident to the subsistence and care of inmates and maintenance and upkeep of Federal penal and correctional institutions, including farm and other operations not otherwise specifically provided for in the discretion of the Attorney General; gratuities for inmates at release, provided such gratuities shall be furnished to inmates sentenced for terms of imprisonment of not less than six months, and transportation to the place of conviction or bona fide residence at the time of conviction or to such other place within the United States as may be authorized by the Attorney General; expenses of interment or transporting remains of deceased inmates to their homes in the United States; maintenance and repair of passenger-carrying vehicles; traveling expenses of institution officials and employees when traveling on official duty, including expenses of attendance at meetings concerned with the work of the several institutions when authorized by the Attorney General, and including expenses incurred in pursuing and identifying escaped inmates; traveling expenses of members of advisory boards authorized by law incurred in the discharge of their official duties; rewards for the capture of escaped inmates; newspapers, books, and periodicals; firearms and ammunition; tobacco for inmates; and the purchase and exchange of farm products and livestock, when authorized by the Attorney General: *Provided*, That any part of the appropriations under this heading used for payment of salaries of personnel employed in the operation of prison commissaries shall be reimbursed from commissary earnings, and such reimbursement shall be in addition to the amounts appropriated herein.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent that the next paragraph, beginning with line 23, on page 33, and ending with line 10, on page 34, be postponed for consideration until to-morrow, just after action is taken on the item carrying appropriations for prohibition. Several gentlemen here are interested in offering amendments to this paragraph, and an agreement will be had as to reasonable time limit for debate. It will be in the interest of orderly procedure and save time. The gentleman from Ohio [Mr. COOPER] and others are interested, and I notified them that when this item was reached I would ask unanimous consent that it be taken up to-morrow as indicated, and that it would then be in order to offer proper amendments. When it was stated to the House that we thought we could get through with this bill to-morrow afternoon it was with the idea of giving fair and intelligent discussion to such items as Members had bona fide amendments to offer to, and that a reasonable time limit could be agreed on. I think there are three items, possibly four, in the bill of the character I refer to.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to pass over the next item without prejudice. Is there objection?

There was no objection.

The Clerk read as follows:

United States penitentiary, Atlanta, Ga.: For the United States penitentiary at Atlanta, Ga., including not to exceed $356,350 for salaries and wages of all officers and employees, $920,000.

Mr. OLIVER of Alabama. Mr. Chairman, here is another of the few items which the gentleman from Georgia wishes to offer amendments to. I ask unanimous consent that this be passed and returned to following the disposition of the other two postponed items.

The CHAIRMAN. The gentleman asks unanimous consent that the item on page 35, lines 8 to 11, inclusive, be passed over, to be considered immediately after the disposition of the paragraphs just passed over. Is there objection?

There was no objection.

The Clerk read as follows:

Construction: The sum of $150,000 is made available from the unexpended balance of the appropriation "Federal jails, construction," contained in the act making appropriations for the Department of Justice for the fiscal year 1932, for completing the remodeling and construction of the necessary buildings and appurtenances, purchase of mechanical equipment, and other expenses incident to the construction of buildings in accordance with the provisions of "An act for the establishment of a United States Industrial Reformatory," approved January 7, 1925 (U. S. C., title 18, sec. 832), to be expended under the direction and upon the written order of the Attorney General, or his authorized representative, by contract or purchase of material and hire of labor and services and utilization of labor of United States prisoners, as the Attorney General may direct, to be immediately available and to remain available until expended: *Provided*, That the Secretary of the Treasury, if in his discretion it would be impracticable to cause the plans, drawings, designs, specifications, and estimates for the remodeling and construction of the necessary buildings to be prepared in the office of the Supervising Architect of the Treasury Department, and the work of remodeling and constructing the said buildings to be supervised by the field force of said office, may contract for all or any portion of such work to be performed by such suitable person or firm as he may select.

Mr. OLIVER of Alabama. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. OLIVER of Alabama: Page 36, line 14, strike out "$150,000" and insert "$40,000."

Mr. OLIVER of Alabama. Mr. Chairman, that is for the purpose of limiting construction of additional buildings at Chillicothe.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Federal jails: For maintenance and operation of Federal jails, including not to exceed $411,201 for salaries and wages of all officers and employees, $600,000.

Mr. DYER. Mr. Chairman, I move to strike out the last word in order to ask the gentleman from Alabama a question. I understand that the item in respect to the Atlanta Penitentiary has been passed over, to be returned to to-morrow.

Mr. OLIVER of Alabama. Yes.

Mr. DYER. I have a letter here from a constituent complaining about the manufacturing of white duck in that penitentiary.

Mr. OLIVER of Alabama. The agreement to pass over the item in reference to prison industries until to-morrow contemplates that it will be in order to offer germane amendments in reference thereto.

Mr. DYER. That is what I wanted to do.

Mr. OLIVER of Alabama. The gentleman's rights will be protected under that unanimous-consent agreement.

Mr. DYER. I do not know what the facts are, except as I have gotten them from a constituent. I shall be very glad to hear to-morrow from the gentleman from Alabama. Do the hearings contain anything with reference to what we have done in providing work in the Federal penitentiaries? Are the hearings quite full about that?

Mr. OLIVER of Alabama. I will not say that the hearings are quite so full as perhaps we might have developed them, because we have not heard of any objection to this particular prison activity; but the gentleman will find this matter quite fully discussed in the hearings.

Mr. DYER. I was one of those who had something to do some years ago with the question of providing work for inmates of our institutions. I did it with the idea that it was not going to interfere with the private business, in that whatever they did there would go only to the Government itself. It is absolutely necessary to give those people some work.

Mr. OLIVER of Alabama. In presenting the viewpoint of the department and that of the Committee on Appropriations, I feel we are carrying out absolutely the spirit of the law, which the Committee on the Judiciary passed, and that the department is not violating that law either in spirit or letter.

Mr. BLANTON. Mr. Chairman, I rise in opposition to the pro forma amendment.

I wish to say to my friend the gentleman from Missouri [Mr. DYER] that I quite agree with him in his contention that this work should be confined to Government use and absorption, and that is just exactly what is being done.

The shoes that are manufactured at Leavenworth are for the convicts and for the use of the Army and the Navy, to a certain extent, and are all used by the Government.

The ducking, out of which some Government mail sacks are made, is all used by the Government, this duck being made at the Atlanta Penitentiary.

There was some question raised in the last session of this Congress about work done by convicts, and to find out how the people back home felt about this matter I brought the subject to the attention of my constituents in quite a number of speeches I made in my district during last summer. I took with me some samples of the duck made at Atlanta. I took with me some samples of the shoes made at Leavenworth, and I showed them to my audiences, and I explained the nature and scope of the Government's connection with those matters. I said, "Now, I want to find out how many of you are in favor of this work being done by convicts." I told them that such work not only keeps them busy and keeps up their morale and keeps them in a good frame of mind, but it gives each of them a small amount, a few dollars a month, to send home to their dependent fathers and mothers or wives and children. I said, "How many of you are in favor of continuing that business?" I was surprised to find that there was not a man in any audience who refused to stand up. They are all in favor of it throughout my district. If you will take it home to your people you will find there is not any antagonism whatever to that work.

The only reason I mentioned this was because of the reference made to it by the gentleman from Missouri [Mr. DYER].

Mr. PARKER of Georgia. Will the gentleman yield?

Mr. BLANTON. I yield.

Mr. PARKER of Georgia. I have been told that 25 per cent of the white duck that is being manufactured in the United States is being manufactured by the prisoners in the Atlanta Penitentiary. Are those figures correct?

Mr. BLANTON. No; they are not correct. They alleged that about "wide" duck, not "white" duck. But they are mistaken.

There are 12 kinds of duck manufactured in the United States, among them being tire duck for making tires, ounce duck which is lightweight duck for making suitings, awning duck for making outside awnings, belting duck for making machinery belts, numbered duck of various widths, also what is known as wide duck running from 26 inches to 144 inches in width, and sail duck for sails on boats. It is the Cotton Duck Association which has written to all of us asserting that 25 per cent of all the "wide" duck in the United States is manufactured at Atlanta Penitentiary, which is not correct.

Wide duck, as related to the various kinds of ducks, is less used than any of the others. The Government's biggest customer is the Post Office Department for mail bags, which require wide duck.

The "wide" duck manufactured for the last two years by the Government is only 12½ per cent, and not 25 per cent, as stated by factories. The estimate of 25 per cent was made by taking the Government output of all the various kinds of ducks and comparing it with only the one kind of duck manufactured by outside factories.

All of the duck manufactured in the Government penitentiary at Atlanta, when compared with all of the duck manufactured by all of the factories in the United States, amounts to only 1 per cent.

Considering cotton texture as a group, all of the products manufactured by the Government in the penitentiary only amounts to about 10 per cent of what the Government uses, and the Government buys the other 90 per cent from outside factories.

There are four manufacturers in the United States manufacturing duck that belong to the Cotton Duck Association, which is making this complaint. They constituted a monopoly and charged us fabulous prices until the Government opened its factory at Atlanta.

For want of work to occupy their minds convicts in Joliet Penitentiary burned down the mess hall at a cost of a million dollars. For want of work to occupy their minds at the State penitentiary at Columbus, Ohio, prisoners burned to death 350 inmates in a fire they started.

Our 1,200 convicts, which we are to carry at the new penitentiary at Lewisville, must have some work to do, and we ought to make them work.

Out of the duck made at Atlanta Penitentiary only about 20 per cent of the mail sacks are manufactured for the use of the Government of the United States.

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. BLANTON. Certainly; I yield.

Mr. COCHRAN of Missouri. Is it not true that 25 per cent of the ducking made in this country goes out of Atlanta Penitentiary, not for mail sacks alone, but as duck?

Mr. BLANTON. No; that is not true. The Cotton Duck Association alleged that 25 per cent of all "wide" duck manufactured was manufactured at the Atlanta Penitentiary, but that is not true.

Mr. COCHRAN of Missouri. The gentleman said only 20 per cent of the duck was used for mail sacks.

Mr. BLANTON. I said that I have been informed that only about 20 per cent of our mail sacks are manufactured from penitentiary duck. But, as I stated before considering the cotton textiles as a group, all of the cotton products manufactured by the Government at the Atlanta Penitentiary only amounts to about 10 per cent of what the Government uses, and it buys the other 90 per cent from commercial factories.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent to proceed for one minute.

The CHAIRMAN. Without objection it is so ordered.

There was no objection.

Mr. OLIVER of Alabama. Mr. Chairman, the rights of the House are fully protected with reference to this item now being discussed, and the reason we did that was that we might expedite the consideration of this bill and give assurance in advance that if any were interested in this item it would be taken up to-morrow under a fair time limit for discussion. I am sorry we have drifted into this discussion since the House will be given a fair opportunity to be heard on this question to-morrow.

Mr. DYER. Mr. Chairman, for that further purpose I ask unanimous consent that I may extend the remarks I have just made by including at this point a statement showing just what are the facts with reference to labor in prisons.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri [Mr. DYER]?

There was no objection.

The matter referred to is as follows:

FACTS WITH REFERENCE TO THE FEDERAL PRISON LABOR SYSTEM

DEPARTMENT OF JUSTICE,
BUREAU OF PRISONS,
Washington, December 17, 1932.

1. It has been definitely authorized by law (copy attached) and officially indorsed by the American Federation of Labor and the United States Chamber of Commerce.

2. This law has been conservatively operated by the Department of Justice.

3. The percentage of unemployment in Federal prisons is much less than the percentage outside; only about 10 per cent of our prisoners are employed in industries.

4. Preference is given to industries which will give the maximum of employment with a minimum of expenditure for machinery.

5. With the exception of equipping the new penitentiary with one small industry—that is, the metal-furniture industry—no expansions of prison industries have been authorized during the last year. All industries operated have been especially authorized by the Attorney General under the power given him by the law.

6. A revolving fund is reappropriated by the Committee on Appropriations each year.

7. The establishment and financing of all prison industry projects therefore comes annually before the Committee on Appropriations.

8. While there is occasionally a regrettable case of injury to a certain individual in private business, the Federal prison labor program has been, is being, and will be conservatively administered; and only where the benefit to the Government, its taxpayers, and the communities as a whole is clearly superior to the interests of individual concerns will the law be availed of.

In answer to statements appearing in the press recently, the Bureau of Prisons gives out the following facts in connection with the proposed establishment of an industry at the new penitentiary at Lewisburg, Pa.:

This penitentiary was specifically authorized by Congress in 1930, and the act provided that "the Attorney General may, in his discretion, establish industries, plants, factories, or shops for the manufacture of articles, commodities, and supplies for the United States Government" at this institution. On the same date Congress passed "An act to provide for the diversification of employment of Federal prisoners." As authorized by this act, Congress has appropriated a prison industries working capital fund "for the repair, alteration, direction, and maintenance of industrial buildings and equipment * * * connected with * * * such prison industries as are now established or may hereafter be established by the Attorney General at the several penal and correctional institutions."

Notwithstanding this express and definite authority, the Attorney General has during the past two years adopted the policy of not extending the operation of prison industries located at Federal institutions. While it is recognized that steady employment of prisoners is necessary for the maintenance of discipline, for the reduction in the cost of supporting prisoners, and for the better protection of society by turning out men capable of supporting themselves and their families, nevertheless the feeling has been that during years of industrial depression such a program should be conservatively applied, and therefore the records now show that not over 20 per cent of the Federal penitentiary population is employed in the manufacture of goods for the consumption of other departments.

The Federal prison labor law forbids the sale of goods on the open market. It restricts production in such a way that existing Government workshops may not be curtailed, and it prescribes other safeguards for the maintenance of prices and the conduct of such industries in the general interest of the Government and the reduction of the public tax bill. All semblance of private profit has been eliminated from the labor of Federal prisoners.

When the new penitentiary, from which so much is expected, was opened at Lewisburg it became apparent that some form of employment must be provided for the 1,200 or more prisoners soon to be quartered there. Unless this could be done, the money, the time, and the thought expended in making this the most modern of all Federal penal institutions would be wasted. Of all the needs for improving the character and disposition of the criminal classes, none is more vital than the provision for productive employment.

The Bureau of Prisons cast about to find some kind of indoor employment which would not only meet the restrictions of the law but would give a maximum of employment in proportion to the money invested. It must be remembered that the Federal prisons supply a market provided by the Government departments, which have very exacting specifications. It would be useless to attempt to get the departments to purchase prison products unless they strictly fulfilled the requirements of the departments. It is a well-known fact that in some instances machines must be employed in order to produce articles that can compete in quality with the products of commercial concerns who manufacture similar articles. The problem of the Bureau of Prisons is to produce a satisfactory article with the utmost utilization of hand labor and with the minimum of machine labor, which is almost exactly contrary to the predominant motive in private industry.

After a careful canvass of the Government departments it was decided that the manufacture of metal office furniture, particularly filing cabinets, met most nearly the requirements as stated above. From 125 to 150 workmen could be employed in a small metal-furniture plant, with a capital investment of less than $200 per workman. The figures show that the investment per workman in the modern textile mill is about $1,300 per workman, and apart from the large proportion of machines which are leased, the proportion of investment to operative in a shoe shop is about $700 per workman. It will be seen also that instead of showing a preference for machine-made goods in adopting this industry, the Bureau of Prisons has gone the limit in providing indoor work for prisoners in the production of articles which will be acceptable to Government departments with a minimum of machines.

It has recently been loosely stated that the bureau was installing in the Lewisburg Penitentiary sufficient steel-furniture equipment to "enable the manufacture of more steel furniture than all other private makers in the United States combined." The absurdity of such a statement is seen when it is considered that the contemplated output of steel filing cases for the prison shop for a year would not exceed a value of $40,000, whereas the census of manufacturers by the Department of Commerce reports that during the last year the value of all metal furniture produced in this country was $64,722,417.

The most recent estimate of the value of the purchases of metal furniture made by the Federal Government for all activities and for all purposes is approximately $1,000,000. Therefore, according to these figures, our output at Lewisburg would represent about 4 per cent of the Government's requirements, and less than seven-tenths of 1 per cent of the total aggregate value of metal furniture produced in this country.

The problem of prison labor is a perplexing one, even in normal times. It is extraordinarily difficult during the years of industrial depression. A moment's thought will show, however, that the trifling amount of competition provided by prison shops will have but little effect on a general industrial situation. Foreign competition, the mechanization of industry, and the paralysis of purchasing power are the contributing factors to the present situation.

Whatever industry is proposed for prisons, even though it be road building or reforestation, it will meet with determined opposition from the members of a certain craft or trade. If prison industry should be reduced to the point where all private firms must be satisfied, the unfortunate condition would be brought about whereby prisoners would stagnate in idleness and the public generally would suffer therefrom.

While it is important that every freeman who can possibly do so should have the opportunity to labor, it is also important that the public should not be saddled with the burden of thousands of idle and unproductive men in prison without the possibility of their making any return toward the reduction of the cost of their keep. The slight burden of prison competition is a burden which industry as a whole must bear. The effort of the Federal Prison Bureau has been, and will be, to distribute this burden equally and to eliminate private profit and unfair competition from its operations. The establishment of the little metal-furniture plant at Lewisburg is in direct pursuance of this policy and in strict conformity with the plan approved by Congress.

SANFORD BATES,
Director Bureau of Prisons.

DECEMBER 21, 1932.

ARGUMENTS IN FAVOR OF PRISON LABOR

DEPARTMENT OF JUSTICE,
BUREAU OF PRISONS,
Washington, December 17, 1932.

1. It helps reduce institution costs.

2. It aids in the maintenance of discipline.

3. It makes less likely the occurrence of prison riots and property destruction.

4. It trains men in habits of industry rather than deteriorates them through idleness.

5. It helps prevent crime by releasing men more fit to hold a job.

NOTE.—Of the 60 men released from Leavenworth who had been employed in the shoe factory not one had had his parole revoked after the lapse of more than a year from their discharge.

6. To the extent that the men employed in prison industries send these small earnings home, the community is relieved of the burden of supporting these dependents.

7. Under the Federal prison labor law all unfair competition has been removed.

8. There are no contractors in the Federal prisons.

9. There is no depressing of prices or flooding of private markets.

10. The output of prisons is distinctly limited—

(a) To meet the needs of Federal departments.

(b) So as not to curtail existing Government industries.

(c) On a diversified basis so that the burden will not fall on any one industry.

The Clerk read as follows:

Probation system, United States courts: For salaries and expenses of probation officers, as authorized by the act entitled "An act to amend the act of March 4, 1925, chapter 521, and for other purposes," approved June 6, 1930 (U. S. C., Supp. V, title 18, sec. 726), $434,543: *Provided*, That not to exceed $90,000 of this appro-

priation may be expended for traveling expenses: *Provided further*, That no part of the appropriation herein made shall be used to pay any probation officer a salary in excess of $2,600 per annum: *Provided further*, That no part of this or any other appropriation shall be used to defray the salary or expenses of any probation officer who does not comply with the official orders, regulations, and probation standards promulgated by the Attorney General.

Mr. GOSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Goss: Page 40, line 5, after the word "appropriation," insert the words "in this act."

Mr. OLIVER of Alabama. The committee will accept this amendment. It simply makes definite the intention of the committee.

Mr. DYER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I heard the statement this morning of the chairman of the subcommittee, the gentleman from Alabama [Mr. OLIVER], with reference to the probation system and the commendatory language he used with reference to this system. It is something new in our practice. Only a short time ago we provided for probation to prisoners and, as a result of that, the probationary system. I think it is one of the finest and best things that has been done. I have watched it very carefully in my home State and have had reports about its workings in other places. I find it has done a world of good, immeasurably so.

The only complaint I have is that there are some judges who have not taken advantage of it. They prefer to allow men who have pleaded guilty or who have been convicted of some minor offense to lie in jail and have the jails of this country crowded and filled to overflowing, as they are now, instead of taking advantage of the authority Congress has given them to put these men on probation and have a probation officer watch after them.

We have a fine lot of men in the probationary work. Those I have met here in Washington and out in the field are doing splendid work. I wish the judges would take advantage of this system and put a lot of these men on probation instead of putting them in jails and penitentiaries, especially in these times when if these people were let out they could support themselves and both they and the country be the better for it.

I want to commend the committee, yet I do not like to see them put a limitation upon the salaries of these probationary officers, because it is awfully difficult to get a good man who can do this work. You can not pick anybody and convert him into a probation officer; that can not be done. These men have to be men of experience; these men have to be men without bias—men who are absolutely free from all sympathies and suspicions. I do not think we ought to limit their pay, I will say to the distinguished gentleman from Alabama. I think that is one thing in this bill that ought not to be done. We ought not to limit their pay to $2,600 per annum, because we will lose some of the best men we have in this service; they will not stay and they will not be able to stay. You can not keep a man fitted for this work on it indefinitely at such a salary.

Mr. Chairman, if there is anything in the Government service that ought to be free of politics, free of everything in the world except efficient and honest discharge of duty, it should be the employees who have to do with the handling of our prisoners, our prisons, and our institutions. I believe we have, in a large measure, this character of men headed by a man who I believe to be one of the best in this whole country, Sanford Bates. I would like to see these men who have grown up and become efficient and qualified in the handling of prisoners stay and not see their salaries limited. I regret very much that there has been this limitation.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word.

I am very glad to hear my colleague, the gentleman from Missouri, state that these probation officers should be men of quality and character and free from political influence.

When we first passed the probation bill we had a civil-service provision in it. It was taken out in committee. Then we fought it out on the floor of the House. I still believe these officers ought to be placed directly under the civil service law and be selected from the civil-service list.

Now, Mr. Sanford Bates is what the gentleman from Missouri says he is, and we are very fortunate to have him at the head of the prison department, but he has nothing to do with the selection of these men. They are selected by the judges. I remember after we created the office of probation officer and we had them under civil service, one judge up North would not appoint a probation officer because the man he had in mind was too old for civil service, and another judge in the South would not appoint a girl probation officer because she was too young for civil service. That was the condition that existed, and we took the civil-service provision out of the law, but I still believe it ought to be under civil service.

We have a very good civil-service system in New York State, and there is a very good one in Massachusetts. The probation officers are under civil service in these States.

What the gentleman says about salary is quite true and I want to ask the chairman of the subcommittee if this proviso—

That no part of this or any other appropriation shall be used to defray the salary or expense of any probation officer who does not comply with the official orders, regulations, and probation standards promulgated by the Attorney General.

Does not that put some limitation on the appointing judge?

Mr. OLIVER of Alabama. Absolutely so, and that really accomplishes what the gentleman has in mind if there should ever be a tendency to abuse the appointing rights conferred. This system is working admirably at the present time, and the reports are very satisfactory. I believe it will continue so, and the probation officers have rendered a very efficient service.

Mr. LAGUARDIA. Is the man chosen for such work judged by standards of educational and scientific training, and fitness, or is the judge still free to select the one he wants?

Mr. OLIVER of Alabama. The judge is free to act for himself, but the salaries are in the hands of the Attorney General, so if some one was appointed who was not qualified to carry on the work, no salary would be allowed. The standards to which appointees must conform will be found in the hearings.

Mr. LAGUARDIA. That is some relief but I still believe this ought to be placed under civil service.

The CHAIRMAN. The question is on the amendment of the gentleman from Connecticut.

The amendment was agreed to.

The Clerk read as follows:

Aircraft in commerce: To carry out the provisions of the act approved May 20, 1926, entitled "An act to encourage and regulate the use of aircraft in commerce, and for other purposes" (U. S. C., title 49, secs. 171–184), as amended by the act approved February 28, 1929 (U. S. C., Supp. V, title 49, sec. 173d), including salary of Assistant Secretary of Commerce (provided for in the act cited above), and other personal services in the District of Columbia (not to exceed $276,375), and elsewhere; rent in the District of Columbia and elsewhere; traveling expenses; contract stenographic-reporting services; fees and mileage of witnesses; purchase of furniture and equipment; stationery and supplies, including medical supplies, typewriting, adding, and computing machines, accessories and repairs; purchase, including exchange (not to exceed $2,000), maintenance, operation, and repair of motor-propelled passenger-carrying vehicles for official use in field work; purchase and replacement, including exchange, of airplanes (not to exceed $45,500); purchase of airplane motors, airplane and motor accessories and spare parts; maintenance, operation, and repair of airplanes and airplane motors; purchase of special clothing, wearing apparel, and similar equipment for aviation purposes; purchase of books of reference and periodicals; newspapers, reports, documents, plans, specifications, maps, manuscripts, and all other publications; and all other necessary expenses not included in the foregoing; in all, $1,070,570.

Mr. GOSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Goss: Page 44, line 21, after "$1,070,570" insert "*Provided*, That none of the money appropriated in this act shall be used for the purchase of any airplane ordered after the approval of this act which is equipped or propelled by a Liberty motor or by any motor or airplane engine purchased or constructed prior to July 1, 1920."

Mr. OLIVER of Alabama. I understand this is the same provision that is carried in the Army bill.

Mr. GOSS. It is the same provision; yes.

Mr. OLIVER of Alabama. The committee has no objection and will be pleased to accept the amendment.

Mr. STAFFORD. Mr. Chairman, I think the amendment is surplusage and simply adds to the expense of government.

Mr. OLIVER of Alabama. They would not purchase any of these motors, I am sure; but if the gentleman wishes to put in this prohibition, it is all right.

Mr. GOSS. I may say to the gentleman from Wisconsin that the amendment simply applies to the purchase of airplanes and is the same provision as that carried in the Army bill.

Mr. STAFFORD. Mr. Chairman, I rise in opposition to the amendment.

I made the statement, which was supported by the chairman of the committee, that this is an added expense to the Government, because it is mere surplusage and entirely beyond the range of practical conception of being applicable. Liberty motors for a long time have not been used in any instance in any branch of the Government. They have been regarded as obsolete for years and years, and if the gentleman has any acquaintance at all with the use of the old Liberty motors, of which the Government had a large supply at the close of the war, he will agree that they are not used and have been regarded as surplusage and junk for many, many years.

Mr. GOSS. I may say to the gentleman from Wisconsin that there are a great many new employees coming into the Government after March 4 that may not be acquainted with that fact, and if the gentleman will look at line 13 he will find that it refers to the purchase of airplane motors, airplane and motor accessories and spare parts, and some one may be attempting to put something over here, and certainly this language ties it up so that any such thing as that would be impossible.

Mr. STAFFORD. Mr. Chairman, I give more credit to the intelligence of the incoming administration and those who are going to administer the fund, perhaps, than the gentleman from Connecticut. I think those who are going to administer the fund, so far as aircraft is concerned, will be up-to-date, live individuals, even though they be Democrats, and will not utilize old, obsolete, abandoned Liberty motors.

I still persist that the incorporation of this amendment is an added expense to the Government and is merely surplusage.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word.

I agree with what the gentleman from Wisconsin has said about the Liberty motors having been obsolete for years and years. This is quite true, but it took me 10 years to get this amendment in the Army appropriation bill.

When I came back from the war in the Sixty-sixth Congress I tried to prevent the further use of Liberty motors and the political influence was so strong, let me say to my colleague, that I was howled down.

I finally succeeded, through a resolution of inquiry, in obtaining a report from the War Department showing how many Liberty motors they had on hand. They had thousands and thousands of them on hand and there was a plan right after the armistice to build 20,000 additional Liberty motors and put each one of them in a case of oil. We defeated that.

When I came back in the Sixty-sixth Congress they were still using Liberty motors and they continued to use them in new planes, and conditions got so bad that we lost several planes and several lives by the persistent use of these obsolete motors.

It may be quite true, as the gentleman from Wisconsin has said, that, after going through what we have and since having this inhibition in the Army bill for the last four years, it may not be necessary now to have this provision; but there is a lot of this junk around and while I believe the Department of Commerce, which is intrusted with the supervision of safety in commercial aviation, would be the last department in the world to go out and buy a Liberty motor or use one that might be on hand, yet this will serve as notice that if this department is going to procure any planes, we do not want any Liberty motors.

The Liberty motor is obsolete. It was a good motor about two years before we put it in production in this country.

Mr. STAFFORD. Why not put in a limitation here that they shall not use any old shoes?

Mr. LAGUARDIA. Maybe that would be useful, too.

Mr. OLIVER of Alabama. If the gentleman will permit, I may say that this bureau is very much interested in improving the standard of all motors.

Mr. LAGUARDIA. There is no question about that.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut [Mr. GOSS].

The question was taken; and on a division (demanded by Mr. GOSS) there were—ayes 24, noes 1.

So the amendment was agreed to.

The Clerk read as follows:

District and cooperative office service: For all expenses necessary to operate and maintain district and cooperative offices, including personal services in the District of Columbia and elsewhere, rent outside of the District of Columbia, traveling expenses of officers and employees, purchase of furniture and equipment, stationery and supplies, typewriting, adding, and computing machines, accessories and repairs, purchase of maps, books of reference and periodicals, reports, documents, plans, specifications, manuscripts, not exceeding $1,200 for newspapers, both foreign and domestic, and all other publications necessary for the promotion of the commercial interests of the United States, and all other incidental expenses not included in the foregoing, $400,000: *Provided*, That the Secretary of Commerce shall require as a condition for the opening of a new office or the continuation of an existing office, except in cases where space is available in Federal buildings or in Federal buildings for the construction of which contracts have been let, that commercial organizations in the district affected provide suitable quarters without cost to the Government on and after September 1, 1932.

Mr. GOSS. Mr. Chairman, I move to strike out the last word. I have been interested in these cooperative offices. There is only one for New England, and that one is located in Boston. On inquiry at the Department of Commerce, I find that the gentleman—not that he has anything to do with it—has four or five offices in Texas, and manufacturers up in New England are anxious to get prompt and efficient service. We do not get that anywhere in the State of Connecticut.

I want to say this. The Department of Commerce wants to show what great work it is doing, and therefore, when an inquiry is made about the market in a foreign land, the department immediately acquaints the competitor who does not happen to have a district office.

In my district we are deprived of the privilege of information on foreign markets while other States have four or five offices.

Mr. OLIVER of Alabama. Our committee has for four or five years sought to discourage the establishment of these district offices. Many offices have been added on the insistence of another legislative branch.

The time has come when we feel that economy should be practiced, and business should know that the central office on inquiry can and will readily supply all the information now obtainable through any of the district offices.

Mr. GOSS. Yes; but it takes it a long time to get to us.

Mr. OLIVER of Alabama. We have not in any bill undertaken to say where offices should be established. When the gentleman from Pennsylvania [Mr. SHREVE] was chairman of the committee we carefully avoided interfering in the slightest with the Department of Commerce in the matter of locating district offices.

We are still carrying a lump sum, the amount of which we feel is adequate for the proper carrying on of such offices as are now established.

Mr. GOSS. How much is for cooperative offices?

Mr. OLIVER of Alabama. Does the gentleman understand what a cooperative office is?

Mr. GOSS. Yes; we have one in my town.

Mr. OLIVER of Alabama. We have one at Cleveland, one at Cincinnati, one at Rochester, N. Y., and the amount expended at such offices rarely exceeds $7,500.

Mr. GOSS. In many cases they are in the chamber of commerce.

Mr. OLIVER of Alabama. Yes.

Mr. GOSS. Congress is dealing with it, and we can not get a new office. I think it is only fair that New England, that only has one, should have more.

Mr. OLIVER of Alabama. We are not establishing offices anywhere. That power is vested in the Department of Commerce.

Mrs. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mrs. ROGERS. This will not in any way interfere with the district office, for instance, in Boston, will it? There will be the same number of personnel?

Mr. OLIVER of Alabama. I can not say that. That is for the Department of Commerce to determine. We have reduced this appropriation, and in the report it was stated that if they pursued the policy that obtained when offices were first established, there would be ample funds, by practicing economy, to maintain all of the offices on a basis capable of rendering efficient services.

Mrs. ROGERS. Is the department reasonably satisfied that this can be done?

Mr. OLIVER of Alabama. I can not say. If we accepted only the estimates of the department as to what they would like to have, we could make no reductions whatever, because their estimates often exceed the estimates submitted by the President. We have done what we feel is entirely fair to the Department of Commerce and to the taxpayer.

Mrs. ROGERS. The main office in Boston has done remarkable work. I should like to compliment the chairman of the present subcommittee, Judge OLIVER, and also the former chairman of the subcommittee, the gentleman from Pennsylvania, Mr. SHREVE, on the wonderful work they have done in developing the entire service of the Bureau of Foreign and Domestic Commerce. This bureau has been of great assistance both to big business firms and to the man who has only a very small shop.

Mr. GOSS. Mr. Chairman, will the lady yield?

Mrs. ROGERS. Yes.

Mr. GOSS. I agree with the lady; but I would suggest that she must be well acquainted with New England, and that we have only one district office for six States, while in other States there are four or five district offices in one State. The export trade of New England far exceeds the export trade of these other States.

Mrs. ROGERS. I agree with the gentleman that it is an extremely important service to New England, because, owing to the high freight rates, we must turn to our foreign trade a great deal. Already the district office has been responsible for many orders in foreign countries. The business men of New England have greatly appreciated the work done by its Bureau of Foreign and Domestic Commerce, also in assisting them with their trade problems in this country. Dr. Frederick M. Feiker, director of the bureau, in an outline he has written to me relative to the work in the Boston district office for the fiscal year ended June 30, 1932, states as follows:

> Ninety-eight out of over 1,900 firms currently served by that office reported a total of $2,552,687.20 of new business and savings. I believe that this figure is significant when compared with the cost of maintaining the Boston office, which at the present time is slightly over $30,000.
>
> This ample return to the taxpayer is found throughout the country. The 34 branch offices are currently serving approximately 25,000 firms. Of these, 1,738 reported $46,616,761.80 as the amount of business directly traceable to the aid and efforts of the bureau during the past fiscal year. This is a return of $8.75 on each $1 expended by the bureau during the same period, its appropriation for that fiscal year being $5,334,122.

I believe in economy wherever possible, but I should feel extremely sorry to have this fine service curtailed. Again I wish to thank the gentleman from Alabama, Judge OLIVER, and the gentleman from Pennsylvania, Mr. SHREVE, for their cooperation in the past in helping me to secure appropriations for added personnel in the Boston office and for trade commissioners to develop our trade in foreign countries.

The Clerk read as follows:

> Lists of foreign buyers: For all necessary expenses, including personal services in the District of Columbia and elsewhere, purchase of furniture and equipment, stationery and supplies, typewriting, adding, and computing machines, accessories and repairs, lists of foreign buyers, books of reference, periodicals, reports, documents, plans, specifications, rent outside of the District of Columbia, traveling expenses of officers and employees, and all other incidental expenses not included in the foregoing, to enable the Bureau of Foreign and Domestic Commerce to collect and compile lists of foreign buyers, $53,890: *Provided*, That the Secretary of Commerce may make such charges as he deems reasonable for lists of foreign buyers, special statistical services, special commodity news bulletins, and World Trade Directory Reports, and the amounts collected therefrom shall be deposited in the Treasury as "Miscellaneous receipts."

Mr. ALLGOOD. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

> Page 50, line 20, after the word "foregoing," strike out "$244,000" and insert "$144,000."

Mr. OLIVER of Alabama. Mr. Chairman, I reserve the point of order on that. I think that comes too late.

Mr. ALLGOOD. Mr. Chairman, I tried to get recognition at the time, but the reading clerk was reading at such a rapid rate that I lost track of it.

Mr. OLIVER of Alabama. I have no desire to take any advantage of the gentleman in that respect.

Mr. ALLGOOD. Mr. Chairman, I ask unanimous consent to return to the paragraph in order to offer the amendment.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk again reported the amendment.

Mr. ALLGOOD. Mr. Chairman, this appropriation is for statistics, for procuring and disseminating satistics in the Department of Commerce. Under present conditions I think that we can well dispense with so many statistics. The people are not so much interested in statistics. Not only is this true as to this item, but there are 28 other items in this section that could well be dispensed with. I have recently been back home, and the general complaint that I have heard is that Congress and the departments are needlessly spending large sums of money in sending out pamphlets and statistics and propaganda of every character from the Agricultural Department and from the Department of Commerce, and all the various departments. They are even criticizing the Members of Congress for filling up the CONGRESSIONAL RECORD with long speeches. What they want back home is economy, the kind of economy that will cut out these needless expenditures; and they are looking to this Congress and the next Congress to get down to sure-enough real economy on these measures.

I am presenting this amendment at this time to the House so that we can cut out $100,000 in furnishing the country statistics that the country does not want. The people are looking to this Congress to bring back prosperity and better times and to reduce expenses where appropriations are not needed, as in this item. I am confident that my amendment will not prevail, for there is always a tendency for the House to stand by the committee, and I know this practice has been carried too far for the best interests of our country. I realize that this committee has made reductions in many of these items. The report shows that they have made reductions in many items, but I contend that there are still other items that we can make reductions in. I feel, when these needless expenditures are brought to the attention of Congress, that Congress should further reduce them.

Mr. OLIVER of Alabama. Mr. Chairman, I withdraw the point of order. I recognize that it is not always easy for a Member to follow the Clerk and I have no desire to take advantage of anyone because he failed to offer his amendment at the proper time for that reason.

There is no doubt great merit in the statement made by my colleague in reference to some of the items carried in the bill. It is the hope, I think, of every Member of the House, and the earnest expectation, that Congress will con-

fer very plenary authority on the President elect to correlate all of these activities. I hope there will be one agency for the collection of statistics. I think great economies can be served in that way. Our committee has no legislative authority to do away with agencies that have been created but we have called attention to the possibilities of economies that may be had. We have lawyers scattered in different departments and all should be under one department. I think substantial savings can be made if legislation is passed to clothe the President with full authority over the executive departments and independent agencies of the Government to eliminate duplications and unnecessary activities. We have reduced this appropriation and feel that under the circumstances, in view of the very large demand for this particular information, further reductions should wait until there can be better correlation by the President when clothed with broad authority.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama [Mr. ALLGOOD].

The amendment was rejected.

The Clerk read as follows:

Total, Bureau of Foreign and Domestic Commerce, $3,506,870, of which amount not to exceed $1,600,000 may be expended for personal services in the District of Columbia.

Mr. OLIVER of Alabama. Mr. Chairman, in line 22, on page 53, I offer an amendment in order to correct a total. There is a mistake in the addition.

The Clerk read as follows:

Amendment offered by Mr. OLIVER of Alabama: Page 53, line 22, strike out "$3,506,870" and insert in lieu thereof "$3,514,370."

The amendment was agreed to.

The Clerk read as follows:

Salaries and general expenses: For salaries of shipping commissioners and employees in their offices; salaries of steamboat inspection as authorized by law, including clerks to boards of steamboat inspectors; to enable the Secretary of Commerce to provide and operate such motor boats and employ such persons (including temporary employees) as may be necessary for the enforcement, under his direction, of laws relating to navigation and inspection of vessels, boarding of vessels, counting of passengers on excursion boats, and to prevent overcrowding of passenger and excursion boats; to enable the Secretary of Commerce to carry out the provisions of the act entitled "An act to establish load lines for American vessels, and for other purposes," approved March 2, 1929 (U. S. C., Supp. VI, title 46, secs. 85–85g), and to secure uniformity in the admeasurement of vessels, including personal services; fees to witnesses; traveling expenses of the personnel of the bureau and field offices; materials, supplies, equipment, and services, including rent and janitor service; purchase, exchange, and repair of instruments; plans and specifications; insignia, braid, and chin straps; coats, caps, and aprons for stewards' departments on vessels; and other incidental expenses of field offices, including contract stenographic reporting services without reference to section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5); $1,308,000.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word in order to ask the chairman of the committee whether the fund provided for this consolidated bureau is sufficient to enable adequate and proper inspection of vessels by steamboat inspection officials, so that travelers may be assured of the seaworthiness of the vessels and that some of the great calamities of the past which arose from overcrowding of vessels will be less likely to occur.

Mr. OLIVER of Alabama. We think we have improved this appropriation by bringing together the district forces under the two agencies that have been consolidated, and likewise making one appropriation for the field service, and that economies can be effected and that by proper administration efficient service can be rendered along the lines indicated by the gentleman. Of course, the gentleman understands that shipping has greatly fallen off, and we have taken that into account. This amount makes available for them fully as much as they had during the present fiscal year.

Mr. BRIGGS. It is the opinion of the gentleman that they can adequately discharge their duties without limiting the number of inspections that are necessary to insure the safety of the public who make use of these vessels in going to and from ports of the United States and on the inland waterways?

Mr. OLIVER of Alabama. I think if it should develop at any time that, because of any increase in shipping, they could not make the required number of inspections, they could come before the Congress and make a proper showing and receive the funds, but from the facts as we learn them, we feel we are carrying sufficient funds for the proper administration and carrying on of this service in an efficient way.

Mr. BRIGGS. And if there is any additional need, they could come before a committee of this Congress and meet with a responsive hearing?

Mr. OLIVER of Alabama. Certainly. The inspections in 1929 were 4,029, and in 1932 they were 2,151; so the gentleman can see how they are falling off.

Mr. BRIGGS. Does the gentleman regard this as adequate for existing needs?

Mr. OLIVER of Alabama. That is what the committee felt, in view of the falling off of business.

Mr. BRIGGS. There is no desire to curtail the number of inspections?

Mr. OLIVER of Alabama. Not those that are necessary, no.

The pro forma amendment was withdrawn.

The Clerk read as follows:

BUREAU OF STANDARDS

Salaries: For the director and other personal services in the District of Columbia, $600,000.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. In the prefatory remarks of the gentleman from Alabama, to which I listened with rapt attention, the gentleman did not pass comment, as I recall, upon the appropriations for the Bureau of Standards.

Some years ago it was my high privilege, as a member of the Committee on Appropriations and the subcommittee on the legislative, executive, and judicial appropriation bill which then had jurisdiction of this item, to consider the activities of this bureau. I then came to the conclusion that the Bureau of Standards was engaged in activities, many of which could be discontinued. Each year they have come before the Committee on Appropriations with some new activity, true of a useful character, but largely beneficial to some special line of industry. It is my lurking opinion that if there is any activity that could be curtailed, much as it is supported by the industrial world, it is the Bureau of Standards. The committee only reduced the appropriation for salaries, over that recommended by the Bureau of the Budget, $30,980. I would like to have the gentleman's opinion, after a thorough study for these many years of this item, whether the Bureau of Standards, although they are doing commendable work of value to certain lines of industry, should not have their wings clipped, and clipped decisively so that we could save some money, and no one would be at a loss except a few favored employees and officials out there, and perhaps a few favored industries.

Mr. OLIVER of Alabama. We have cut this appropriation under the estimate submitted for 1934 by the President, $111,275, and we did it for the purpose of indicating to the President elect if he is given authority to bring together different activities and to do away with waste, that we feel the Bureau of Standards should be placed more on a sustaining basis, as is done in the Bureau of Patents. If they are performing a useful service to the outside business world, and there seems no doubt as to that, then the business world should contribute more largely to the expenses for maintaining the service. It is our opinion that if this matter is properly and carefully looked over you will find there can be further savings, and we indicated that in our report, in a general way—and yet, at the same time, the worthwhile work of this bureau can be continued.

Mr. STAFFORD. The gentleman refers to the recommendation of a saving of $111,000 on a total recommendation by the Budget of $2,167,000, a 5 per cent reduction.

Mr. OLIVER of Alabama. Yes.

Mr. STAFFORD. The gentleman's committee has reduced some items in this bill by a greater percentage. I

adverted to that before. Here we have various items, such as sugar-testing apparatus, standard gages, and so forth. Any person acquainted even slightly with the industrial world knows that the Ford Motor Co., for instance, employs at great expense an expert engineer who manufactures these standards that can be purchased by the public. Here we have testing railroad-track, mine, and other scales; high-temperature measurements, and other industrial research-running to $200,000. If there is any place in this bill where I think the committee could have used the pruning hook rightly, could have struck the dagger right in and perhaps given it a twirl and cut out maybe $400,000 or $500,000 without doing any violence, it is this service; and I am an industrialist.

Mr. GOSS. Why talk that way?

Mr. STAFFORD. Oh, the gentleman from Connecticut, who himself is an industrialist, says, "Why talk that way?" I do not want any industry with which I am connected to profit from the Government at the expense of the taxpayers.

[Here the gavel fell.]

Mr. ALLGOOD. Mr. Chairman, I rise in opposition to the pro forma amendment.

I am in accord with the gentleman from Wisconsin in regard to what he has to say on these items. I referred to them in speaking on an amendment I offered a few minutes ago. There are 28 items in the Bureau of Standards for which we are asked to appropriate money out of the people's Treasury for information and experiments which should be paid for by private parties and corporations.

It seems to me that Congress is subsidizing industry to a large extent by these appropriations. Take, for instance, the investigation of fire-resisting properties and the investigation of color standards, radio research, and mechanical appliances——

Mr. STAFFORD. Ad infinitum, ad infinitum of all kindred character.

Mr. ALLGOOD. Yes. There are 28 items. It seems to me we are subsidizing industry. Industry has spent its own money to the extent of millions of dollars along these lines. Corporations are perfecting these tests and this equipment, and it does seem as though here is one place where we could and should economize.

Now, I know it is hard when these people come here from the different departments and make out their case before the committee for the committee to turn them down; they are mighty hard to get around; they have been here many times, year after year, gentlemen, and know how to make out their case, but the time has come when appropriations for carrying on governmental activities which are not absolutely necessary should be discontinued.

Mrs. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. ALLGOOD. I yield.

Mrs. ROGERS. The Bureau of Standards has made extremely valuable tests. I can cite an instance where, I think, the Bureau of Standards has performed a particularly fine service. Five years ago I asked that they try to find out how to make a self-extinguishing match and a self-extinguishing cigarette. In an article in the January, 1928, quarterly of the National Fire Protection Association, Mr. P. D. Tole and Mr. F. M. Hoffluins stated:

> The property loss from fire attributable to matches and smoking is equal to approximately one-sixth of the loss from known causes, exclusive of exposure, according to statistics of the actuarial bureau of the National Board of Fire Underwriters. If this cause enters into the unreported loss estimate, the loss from unknown causes, and if it is the original cause of exposure fires in the same proportion, the total annual loss in this country from matches and smoking as original fire causes approximates nearly $90,000,000.

Millions of dollars, as you know, are lost every single year by fires started by cigarettes and matches that have been thrown away without being extinguished. The Bureau of Standards has made tests and has found out how to make self-extinguishing cigarettes and self-extinguishing matches. If we can get the manufacturers to take advantage of the results of these tests and make self-extinguishing cigarettes and matches we shall save millions of dollars in loss of property. You can see what a blessing it would prove to fire insurance companies; and as people are only too frequently burned to death in fires it would save human life.

[Here the gavel fell.]

Mr. OLIVER of Alabama. Mr. Chairman, I simply want to say that the work of the Bureau of Standards is very important. In other words, it is a laboratory, a great laboratory. They have rendered a very outstanding and helpful service. The committee felt that this matter should be carefully studied even before the beginning of the next year under powers which we think will be conferred on the new President with a view of effecting economies and of carrying out the very ideas that the gentlewoman from Massachusetts and the gentleman from Wisconsin and the gentleman from Alabama have expressed.

Mr. GOSS. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. GOSS. The gentleman knows, as does everyone who has studied the activities of the Government, that the Government is furnishing gratis, largely, services that should be paid for by those who receive the benefits.

Mr. OLIVER of Alabama. Yes.

Mr. GOSS. And there is where great economy can be effected.

Mr. OLIVER of Alabama. The gentleman understands our committee has no legislative authority. We have no authority to do what in many instances we feel should be done. Many matters referred to can only be accomplished by conferring very broad legislative authority on the President. Otherwise we can not bring about the very desirable ends which the gentleman from Wisconsin and the gentleman from Alabama have in mind.

Mr. GOSS. I hope in the investigation the gentleman will ascertain the very large amount industry is already contributing by having its own research men serve on these boards with the Bureau of Standards.

Mr. OLIVER of Alabama. That is a matter to be considered; there is no question about that.

The pro forma amendment was withdrawn.

The Clerk read as follows:

> General expenses: For fuel for heat, light, and power; office expenses, stationery, cleaning and toilet supplies, books and periodicals, which may be exchanged when not needed for permanent use; traveling expenses; street-car fares not exceeding $100; expenses of the visiting committee; expenses of attendance of American member at the meeting of the International Committee of Weights and Measures; purchase of gloves, goggles, rubber boots, and aprons; supplies for operation, maintenance, and repair of motor trucks and a passenger automobile for official use, including their exchange; and contingencies of all kinds, $64,000.

Mr. GOSS. Mr. Chairman, I reserve a point of order on the language "expenses of the visiting committee; expenses of attendance of American member at the meeting of the International Committee of Weights and Measures," for the purpose of finding out just what this is and whether it is authorized by law.

Mr. OLIVER of Alabama. This item has been carried for a number of years, and the committee has always considered it a proper item of expenditure.

Mr. GOSS. Does the gentleman know what this visiting committee is? Is this an international congress to decide whether we shall go on the metric system or something of that sort?

Mr. OLIVER of Alabama. Oh, no; it has nothing to do with that. My understanding is that it is a committee of outstanding engineers, who meet annually to make a survey of the activities of the Bureau of Standards and to make report thereon to the Secretary of Commerce. They serve without salary, but their traveling expenses are paid out of this appropriation.

Mr. GOSS. And this visiting committee is composed of Americans who are in this country?

Mr. OLIVER of Alabama. All of them. There is no question as to that.

Mr. GOSS. Mr. Chairman, I withdraw the reservation of a point of order.

The Clerk read down to and including line 22, on page 66.

Mr. OLIVER of Alabama. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. OLIVER of New York, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 14363, the State, Justice, Commerce, and Labor Departments appropriation bill, had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. WHITE, for five days, on account of important business.

SHALL THE STATE GO INTO THE LIQUOR BUSINESS

Mr. CELLER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of liquor distribution in the various States.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CELLER. Mr. Speaker, under leave to extend my remarks, I include the following address delivered by myself over station WEAF and a national red-chain hook-up, Thursday, January 26, 1933:

Shall the State go into the liquor business? I say emphatically "no." I believe liquor commissions appointed, or about to be appointed, by Governors Lehman, of New York, White, of Ohio, Cross, of Connecticut, Rolph, of California, and Ely, of Massachusetts, to study beverage distribution in their respective States after the eighteenth amendment shall have been repealed will deprecate the State's acting as a purveyor of liquor or as a master publican. Time will not permit of a discussion as to a model license system that I would advocate in place of State ownership. That must be left for another occasion. The lesson of my talk to-night is that the State shall stick to its own knitting and keep out of the liquor traffic. It should confine itself to reasonable regulations.

BUREAUCRACY

As my esteemed friend, Mr. Louis S. Rosentiel, a keen student of the subject, says, any State or Government ownership would mean a bureaucracy run rampant.

For example, setting up New York State in the liquor business would involve, conservatively, the sale of alcoholic beverages of several hundred million dollars per annum. To handle this huge volume of trade would necessitate the services of thousands of employees. What a splendid opportunity would be afforded for creating a huge political machine. The door would be opened wide to corruption and venality of all sorts. The risks which are always present in the entrance by the Government into any business must, in the nature of things, be especially aggravated were it to enter into the operation of a huge and monopolistic liquor business.

OUR SAD EXPERIENCES WITH STATE OWNERSHIP

I am certain that very few of my listeners know that we already have tried in this country State-ownership plans, called liquor dispensaries. However, they reeked with tyranny and corruption and were wherever adopted discarded.

The first American experiment with such a plan was undertaken in Athens, Ga., in 1891. It was, in some respects, similar to the systems now obtaining in Scandinavia and Canada. The city of Athens became the sole authorized purveyor of liquor, buying it wholesale and selling it in sealed packages. Drinking was not permitted in the city dispensaries. Administration of the scheme was under the control of commissioners appointed by the city government. Excesses soon developed. Chicanery, deceit, and bribery all crept in, and in 1908 it was discarded.

From Athens the plan had spread to South Carolina, where a State dispensary system was inaugurated in 1893. Commissioners in charge of the system organized dispensaries in cities and towns where a majority of the voters wanted them. The local establishments obtained their supplies from State dispensaries and sold them to purchasers in sealed packages. Profits from the trade of the central dispensary went to the State, and from the local dispensaries to the counties or municipalities.

As time went on, enforcement difficulties arose and rumors of corruption among the administrative personnel became widespread. Even Senator Tillman, one of the original protagonists, withdrew his support. Enforcement had become deplorably weak, and "blind tigers" flourished everywhere. In the later years of the system the owners of the speakeasies and the "blind tigers" openly bought their liquor from the dispensaries and were not greatly troubled by prosecution. The dispensary managers were paid salaries which varied with the amount of liquor sold, and this made it profitable for them to press their sales as if they had been private saloon keepers. Bootleggers became their best customers.

There was keen competition for jobs in the dispensary, and there was built up a great political machine. Scandal turned public opinion against this system, and it was abolished in 1910.

The dispensary plan was tried out on a local basis in four other Southern States—Alabama, Georgia, North Carolina, and Virginia. As many as 142 counties in the South adopted this system during the two decades, 1890 to 1910, but in many of them it did not long survive, because corruption had deplorably permeated the entire machinery. The coming of State prohibition in these States put an end to the distressing conditions.

Oklahoma thought she could contribute something to temperance legislation. She set up an alcoholic medical dispensary with State and local agencies empowered to sell upon doctors' prescriptions. The high hopes of its sponsors were soon dashed to the ground. The system became a nest of graft and thievery. Again the bootlegger had become the local agent's best customer. The people soon arose in wrath and banished the plan.

To resurrect now these State agencies would merely re-create the dishonesty and bribery that flourished during the tragic era of the dispensary systems in the South.

In one of the Southern States the governor of the State ran for the United States Senate and was defeated because it was charged that he had accepted rebates from wholesale whisky houses.

Remember, human nature has not changed in the years that have passed since county after county in the South voted out its dispensaries.

UNEMPLOYMENT

Furthermore, during the dreadful era of unemployment, preferred consideration must be given to such methods of sale as would embrace most jobs. Doubtlessly, State ownership would yield a minimum of jobs as against, for example, the English system of licensing, which would yield a maximum of employment.

PERSONAL PERMITS IMPRACTICAL

Any State or National control usually involves individual licensing.

The individual permit, as it prevails in Scandinavia and Canada, blacklists all persons known to be inebriates and incompetents; all others must present credentials showing their capacity to indulge in liquor and their ability to purchase.

Such a system involves an inquisitorial procedure, just as repugnant to the individualist as is the eighteenth amendment with its incessant "Thou shalt not." The permit system has in no wise prevented bootlegging in Canada ("Prohibition or Control"—"Canada's Experience with the Liquor Problem, 1921–1927," by Reginald E. Hose, p. 57).

Even in Sweden, where the Bratt system, which involves personal permits, obtains, "You can, if you are willing to work hard enough, get as drunk as in any other country, including the United States. You can have a bootlegger, if you are rash enough to trust his wares; you can get yourself invited to parties and drink more than your share of the refreshments; you can tempt a motbok (the personal permit) holder to sell you, at a considerable advance, his full monthly quota of spirits in addition to your own." (Drink: Coercion or Control, by Rheta Childe Dorr, at p. 135.)

In Norway it is likewise easy to borrow or pay for passbooks.

If there are leaks in the systems that obtain in compact countries like Sweden and Norway, where the populations are fairly homogeneous, imagine the irregularities which would flow from such a system forced upon a city like New York, Philadelphia, or Chicago, where the populations are heterogeneous and where there is every likelihood of innumerable loopholes for the evasion of the law. It would be utterly impossible to effectively operate a permit system in a State like New York, which has a population of 12,588,066.

LIMITATION OF PROFITS AS IN SCANDANAVIAN SYSTEMS

Some enthusiasts believe that the liquor traffic can be stripped of its old-time evils by removing all possibility of profits. Prohibition was an attempt to remove all profit by the complete abolition of the liquor traffic. See how it has dismally failed. There are some who believe that there should be a limitation of profits and that the amount of profits should be arbitrarily determined. All such limitation would be futile—rather encourage to go into the business the high-type citizen who is fair and honest. Limit the profits, and you will discourage the high type of citizen entering the business. The less intelligent and criminal classes would not worry about limitations. They would make as much as they please. If prohibition could not stop them, certainly limitations of profits would not deter. We have spent millions and millions of dollars for prohibition enforcement, involving the abolition of all profit, and yet we have a "Dutch" Schultze who has failed to pay taxes on an alleged income of over $1,000,000 a year. Alcoholic consumption in this country has not decreased during prohibition. The alcoholic profits have been enormous. You can not and should not limit liquor profits by law. It would be like attempting to forge a rope of sand.

In this connection it must be remembered that our people do not take willingly to such sumptuary legislation. They permit themselves to be controlled less, probably, than any other people except those in South America. Our history has been too short to develop a disciplined people, and only a disciplined people take readily to such limitations.

Furthermore, take, for example, hotel owners, with billions of dollars invested in their properties. On the whole, they are honorable men, entitled to a fair return. They would suffer greatly by limitation of profits. They would abide by the law, but the slick and dishonest would escape; they would avoid the law, undersell, and steal the business from legitimate operators. With ever-

increasing income and excess profit taxes, excise taxes, license fees, and other State and municipal imposts; limitation of profit would simply place a premium on bootlegging, which is practically tax exempt.

CANADIAN STATE CONTROL

It is hardly fair to state that because State liquor monopolies prevail in Canada, they should obtain in our own States. The two countries are in no wise comparable. Roughly speaking, the 49th parallel at the present time shows on one side a population of 9,000,000 and on the other side over 120,000,000. Canada has great unorganized wastes with huge virgin forests, millions of acres of wild underbrush and plains—it has a mere handful of people thrown over a continent. Here are the populations of the nine Provinces of Canada:

Quebec	2,874,000
Ontario	3,431,000
Alberta	731,000
Saskatchewan	921,000
British Columbia	694,000
New Brunswick	408,000
Manitoba	705,000
Nova Scotia	513,000
Prince Edward Island	88,000

One can hardly compare Nova Scotia or Prince Edward Island or New Brunswick with any of our more populous States. Even the largest Province, Ontario, has one-half the population of New York City. From the population standpoint alone, that which might succeed in a Canadian Province could not succeed in States like New York, Pennsylvania, Illinois, California, Ohio, New Jersey, Missouri, Massachusetts, Connecticut, and Indiana. From a standpoint of population, therefore, if there is any efficacy in the Canadian state-control system, it could only apply to small States, and even then it must be kept well in mind that the Canadian state systems are far from perfect. For example, the liquor bureaus or the state-control boards of the Canadian Provinces probably have been unduly importuned and embarrassed by the solicitation of unscrupulous and corrupt merchants and salesmen, desirous of having their goods purchased and sold. One of the Provinces has been led to adopt measures excluding salesmen or canvassers from even approaching members of the liquor commissions or their employees with the "object or purpose of promoting, inducing, or furthering the sale of any particular kind, class, or brand of beer or any other liquor" (Saskatchewan liquor act). It is readily discernible that such restrictive statutes are usually abortive. They finally become mere gestures. However, they are the straws which indicate the way the stream is flowing. State-control systems do not discourage and, on the contrary, may encourage bribery and other unwarranted and illegal methods inducing sales to the liquor commissions. It was just this kind of bribery, irregularity, and abuse that led to the overthrow of the dispensary system in our own southern States. Five States tried it—and 142 counties had this system or similar systems. We have had our lessons—we should not forget them.

Canadian authorities have had great difficulties in stamping out "swamp" whisky. This is similar to our illicit "moonshine" and our "bottled-in-barn" whisky. The Ontario Liquor Control Board, in its fifth report, deplores the prevalence of counterfeit labels, wrappers, seals, bottles, and barrels for the manufacture and sale of spirituous liquor. Defiance of the state-control board by forgery and counterfeiting is thus not uncommon.

In several of the Canadian Provinces not infrequently special favors are accorded such liquor houses as contribute most heavily to the campaign funds of the party in power. The Hon. E. C. Drury, former premier of the Province of Ontario, appearing before the Wickersham Commission, stated that bootlegging is carried on in the Province of Ontario to as great an extent now as in prohibition days. He stated there was much drunkenness and that arrests for drunkenness have not diminished; that liquor consumption and crimes have increased. Speaking of the Bratt or Swedish state control, one of the members of the commission, Judge William S. Kenyon, ardent dry, said that "it is based on a paternalism which would be rather odorous to citizens of this Republic."

Monte M. Lemann, another member of the Wickersham Commission, said of both the Canadian and Swedish systems: "I think the evils which would flow from any Federal dispensary system, either through direct Government control or through a corporation, the net profits of which, above a limited extent, would inure to the Government, would present governmental difficulties as serious as encountered in our present system. * * * It seems reasonably certain that any attempt to embark upon a paternalized permit system would not succeed in this country, would open the door to considerable corruption, and would transfer the bootlegger from the rich man to the poor man as his field of operation." Yet another member of the commission, its chairman, Mr. George W. Wickersham, speaking of the Swedish system, said: "I have great doubts if such a system would work in our country. I think the pressure to obtain books authorizing the purchase of liquor would be so irresistible that all benefits of the system would be lost."

Hon. Newton D. Baker, in a letter to me, stated: "With you I do not believe that personal permits are practical, and with you I do not believe that the Government will ever be permitted to go into the liquor business, both for the reason that it would involve an unendurable bureaucracy and also because I believe that there is a deep and widespread belief in this country that a partnership between our Government—national, State, or local—and the liquor business is offensive."

EXTENSION OF REMARKS—STATE, JUSTICE, COMMERCE, AND LABOR APPROPRIATION BILL

Mr. FINLEY. Mr. Speaker, Abraham Lincoln once said that no public question is ever settled in this country till it is settled right. And that was tantamount to saying that no public question is ever settled in this country till it is settled in harmony with the enlightened conscience and common sense of our people.

There never was a truer truth than that. No public question has ever been settled, and no public question ever will be settled to remain settled, till settled in harmony with the enlightened conscience and common sense of our people.

And that is doubly true of a question having in it a moral element. A purely political or economic question may be settled wrong and remain settled. For instance, our northern boundary line from the Great Lakes to the Pacific Ocean ought to be 54° and 40′ north latitude. But it was fixed at 49° north latitude, and while that settlement was wrong and lost us an empire in territory, it remains settled to this day. That question had no moral element in it.

But no public question having in it a moral element ever has been or ever will be settled, to remain settled, except in harmony with the enlightened conscience and common sense of our people.

Truth crushed to earth will rise again.
The eternal years of God are hers.

The question of slavery divided and distracted our people for more than a generation. No question in our country's history provoked more bitter debate or more rancorous feeling. There were times when it seemed that that question might be settled by compromise. There were other times when it seemed to be settled by sweeping political victories of advocates of slavery. Enactment of the fugitive slave law was hailed by proponents of slavery as settling the question by making the Federal Government a partner with the slaveholder and putting its whole power behind him. The Dred Scott decision, in substance that the black man had no rights which the white man was bound to respect, brought joy to adherents of the slavery cause as settling the question for all time.

But no public question having in it a moral element is ever settled in this country till settled in harmony with the enlightened conscience and common sense of our people. Tens of thousands of our people regarded as "a league with death and a covenant with hell" a system which authorized one class of our people to blot out of another class the image of Almighty God and reduce them to the status of beasts of the field. For them the question of slavery would never be settled to remain settled till the ideal of our Declaration of Independence that "all men are created equal, and endowed by Almighty God, with certain inalienable rights and privileges, among which are life, liberty, and pursuit of happiness," should become a reality in our Government. Neither the fugitive slave law, though passed by the Congress and the Senate, and approved by the President, the Dred Scott decision, though rendered by our court of last resort, nor any compromise, nor any political victory of slavery ended, or even abated, agitation against slavery by those who saw in it a monstrous moral wrong. For them that question could never be settled except in harmony with their conscience and common sense.

Lincoln voiced their spirit when he said:

But if a just God ordains that, for every drop of blood drawn by the lash, one shall be shed by the sword then must we say with one of old "The judgments of the Lord are true and righteous altogether."

Slavery would have ended peaceably years ago—and ended more justly to both slaveholder and slave, but for the madness of secession. No civilized country, and no section of a civilized country, can permanently withstand the embattled and marching conscience and common sense of the world.

Just now history seems to be repeating itself. We are in the midst of a nation-wide debate over control of the liquor traffic, dividing and distracting our people. Probably no Member of this House would be so reckless as to deny that that question has in it a large moral element. Wets may minimize that element and magnify asserted economic gains of a return to the system of control before prohibition. But wets surely realize that there are millions of our people who regard as "a league with death and a covenant with hell" any system of control which, for a money consideration, would authorize one group of our citizens to make drunkards, paupers, criminals, widows, orphans, wrecks, and castaways of all the rest of our citizens. If any wet imagines that those millions of our citizens will ever acquiesce in, compromise with, or surrender to such a system, let him read the story of the conflict over slavery in our own land.

The question of the liquor traffic will not be settled by the sword. The bitter lesson of '61 to '65 was learned at all too great a cost. The wounds taken on each unyielding side from Bull Run to Appomattox are all too newly healed. The liquor question will be settled at the ballot box and not on the battlefield. And when it is settled it will be settled in harmony with the enlightened conscience and common sense of our people. Never until then.

An army of Scotch Covenanters once confronted an army led by a bigot king bent on their destruction. Before the battle was joined, each covenanter knelt where he stood with upraised face. The foolish king cried out, "See, they kneel to me. They surrender. They sue for mercy!" "Nay, sire," said an officer of the king, "those men kneel only to Almighty God. And where each man kneels, there will he die." Where is the Anglo-Saxon whose pulse does not quicken at the scene?

But Mr. Speaker, high courage and splendid daring are exhibited otherwhere than on the battlefield. I was thrilled by the gentleman from Alabama [Mr. HUDDLESTON] on the first day of this session, when the Garner resolution was under consideration. Frail in body but robust in spirit, and speaking for those other Democrats who, like him, pledged to their convictions their political lives, their political fortunes, and their sacred honor, he lifted his hand to the Speaker and said: "Mr. Speaker, we who are about to die salute you." It was splendid. It was magnificent. The gentleman will never be the consummate orator more than he was in that hour. But, Mr. Speaker, I prefer to think of the gentleman not as a Spartacus, a pagan gladiator in a pagan arena, actor in a murderous pagan drama for the amusement of a bloodthirsty pagan Roman mob, but as Glaucus the Christian, refusing to renounce his faith, thrown to the lions in the devoted city of Pompeii, unharmed by the terrified beast, which sensed the city's imminent doom, led by the blind girl through the midnight darkness of falling ashes and obliterated sun, along the streets of the perishing city to the quay, there to take ship for sunshine and safety.

They only the victory win
Who hold to their faith unseduced
By the prize which the world holds so high,
Who dare for a high cause to suffer,
Resist, fight, if need be to die.

And I predict that the gentleman will remain a member of this body long after others who, on that day, and on that resolution "crooked the pregnant hinges of the knee where [political] thrift might follow [cowardly] fawning."

Mr. Speaker, I know, of course, that wets pretend to believe that the majority given the Democratic ticket on November 8 was a mandate to repeal the eighteenth amendment, and that prohibition is dead. Just so purblind advocates of slavery pretended to believe that the fugitive-slave law meant the death of abolition. Thus does history repeat itself. And thus do the gods make mad whom they would destroy.

Drys know that had the country given the Republican ticket even a greater majority than it gave the Democratic ticket wets would now be claiming that that was a mandate to end prohibition.

Drys know—and candid wets admit—that the result of the November election might more plausibly be construed as a repudiation of the Hawley-Smoot tariff law or any other Republican policy. The Hawley-Smoot law is a distinctively Republican measure, whereas the eighteenth amendment was a Democratic as well as a Republican policy. Besides, Democratic orators and writers spent twice as much time and occupied twice as much space denouncing the Hawley-Smoot law as the cause of the nation-wide depression as they did attacking the eighteenth amendment and the Volstead law. Moreover, the difference between the platforms of the two parties was not sufficient to account for the result. Drys reject and repudiate the flimsy pretense that the result of the recent election was a mandate on any proposition, except that the Democratic Party should take control of our Government and end, if they can, the business depression which was then torturing our people. And in such a mandate drys everywhere acquiesce.

But drys understand that that pretense was put forward by wets as a pretext to justify that burlesque of orderly legislation presented on the first day of this session, when attempt was made, even before the Senate and the President had been notified that the House was ready to receive a message or transact business, to ram through the House, under a rule allowing only 40 minutes' debate and forbidding amendment, a measure, recommended by no committee, which affected every man, woman, and child under the American flag, the spirit of which was that no dry community has any rights which a wet community is bound to respect. Thus was the Dred Scott decision paralleled. Thus did history repeat itself. Thus did the gods make mad those whom they would destroy.

The proceedings of that session will echo over our land for many a day. I do not know what sort of reactions other Members are receiving from "back home." But my constituents are wigwagging to me, "Hold the fort; we're coming." They may not arrive till the congressional elections two years hence. But they will be on hand then. And many an ambitious wet will wonder where they all came from.

The captain of the *Serapis* trumpeted to Capt. Paul Jones, "Do you surrender?" And Capt. Paul Jones trumpeted right back, "Surrender? Hell! I've just begun to fight!" Undismayed by damage done, and like Capt. Paul Jones, drys have just begun to fight.

KICKAPOO AND AFFILIATED INDIANS OF OKLAHOMA

Mr. PEAVEY. Mr. Speaker, in the unavoidable absence of the chairman of the Committee on Indian Affairs, I ask unanimous consent that I may be allowed to file a supplemental report on the bill (S. 4339) repealing certain provisions of the act of June 21, 1906, as amended, relating to the sale and encumbrance of lands of Kickapoo and affiliated Indians of Oklahoma.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent to file a supplemental report on the bill S. 4339. Is there objection?

There was no objection.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 5160. An act to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes.

ADJOURNMENT

Mr. OLIVER of Alabama. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 15 minutes p. m.) the House adjourned until to-morrow, Friday, January 27, 1933, at 12 o'clock noon.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Friday, January 27, 1933, as reported to the floor leader:

WAYS AND MEANS

(10 a. m.)

Continue hearings on depreciated currency bill.

LABOR

(10.30 a. m.)

Continue hearings on 5-day week and 6-hour day proposals.

BANKING AND CURRENCY

(10.30 a. m.)

Continue hearings on farm mortgage and silver bills.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

885. A letter from the Secretary of the Navy, transmitting draft of a bill to amend the act of June 10, 1926, entitled "An act to provide for the equalization of promotion of officers of the Staff Corps of the Navy with officers of the line" (44 Stat. 717; U. S. C., Supp. VI, title 34, sec. 348); referred to the Committee on Naval Affairs.

886. A letter from the Secretary of the Navy, transmitting draft of a proposed bill authorizing the Secretary of the Navy to enter into contract with the Annapolis Metropolitan Sewerage Commission for the disposal of the sewage of the United States Naval Academy, and for other purposes; referred to the Committee on Naval Affairs.

887. A letter from the Secretary of War, transmitting, for the consideration of Congress, draft of a bill to repeal the proviso contained in the act of Congress approved February 20, 1931 (Public, No. 692, 71st Cong.), to revive certain acts of Congress repealed by said proviso of the act approved February 20, 1931, and for other purposes; referred to the Committee on Military Affairs.

888. A letter from the chairman of the Reconstruction Finance Corporation, transmitting a report of activities and expenditures for December, 1932, together with a statement of loans authorized during that month, showing the name, amount, and rate of interest in each case (H. Doc. No. 531); referred to the Committee on Banking and Currency and ordered to be printed.

889. A letter from the Secretary of War, transmitting a list of documents and files of papers which are not needed nor useful in the transaction of the current business of the department and have no permanent value or historical interest; referred to the Committee on Disposition of Useless Executive Papers.

890. A letter from the Secretary of War, transmitting a report dated January 25, 1933, from the Chief of Engineers, United States Army, pursuant to the river and harbor act approved July 3, 1930, on preliminary examination and survey of Bakers (Baker) Bay, Columbia River, Wash., together with accompanying papers and illustration; referred to the Committee on Rivers and Harbors.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. ENGLEBRIGHT: Committee on the Public Lands. H. R. 188. A bill to extend the provisions of the forest exchange act, approved March 20, 1922, to certain lands adjacent to the Modoc National Forest, in the State of California; without amendment (Rept. No. 1916). Referred to the Committee of the Whole House on the state of the Union.

Mr. ENGLEBRIGHT: Committee on the Public Lands. H. R. 189. A bill to add certain lands to the Modoc National Forest, in the State of California; without amendment (Rept. No. 1917). Referred to the Committee of the Whole House on the state of the Union.

Mr. GILBERT: Committee on the District of Columbia. H. R. 11504. A bill authorizing the sale of certain Government property in the District of Columbia; without amendment (Rept. No. 1918). Referred to the Committee of the Whole House on the state of the Union.

Mr. GILBERT: Committee on the District of Columbia. H. R. 13378. A bill to amend sections 416 and 417 of the Revised Statutes relating to the District of Columbia; with an amendment (Rept. No. 1919). Referred to the Committee of the Whole House on the state of the Union.

Mr. WOODRUFF: Committee on Naval Affairs. H. R. 13367. A bill to confer the degree of bachelor of science upon graduates of the Naval Academy; without amendment (Rept. No. 1920). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. BLACK: Committee on Claims. H. R. 7473. A bill for the relief of James T. Webster and Mary A. Webster; without amendment (Rept. No. 1915). Referred to the Committee of the Whole House.

Mr. MAJOR: Committee on the Post Office and Post Roads. H. R. 13273. A bill for the relief of Ralph C. Irwin; with amendment (Rept. No. 1921). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Military Affairs was discharged from the consideration of the bill (H. R. 3257) for the relief of Barney E. Wells; and the same was referred to the Committee on Naval Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. JEFFERS: A bill (H. R. 14429) to amend the act of May 29, 1930, for the retirement of employees in the classified civil service; to the Committee on the Civil Service.

By Mr. HOGG of West Virginia: A bill (H. R. 14430) authorizing the Sistersville Ohio River Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Sistersville, Tyler County, W. Va.; to the Committee on Interstate and Foreign Commerce.

By Mr. McSWAIN: A bill (H. R. 14431) to credit certain services as cadets at the United States Military Academy; to the Committee on Military Affairs.

By Mr. HOWARD: A bill (H. R. 14432) to extend temporary relief of water users on irrigation projects on Indian reservations, and for other purposes; to the Committee on Indian Affairs.

By Mr. DOUGLAS of Arizona: A bill (H. R. 14433) to authorize the Secretary of the Interior to grant concessions on reservoir sites and other lands in connection with Indian irrigation projects and to lease the lands in such reserves for agricultural, grazing, or other purposes; to the Committee on Indian Affairs.

By Mr. HARLAN: A bill (H. R. 14434) to authorize Federal land banks to make loans to lessees of farm lands owned by a State and leased under 99-year leases, and for other purposes; to the Committee on Banking and Currency.

By Mr. COOPER of Ohio: A bill (H. R. 14435) to provide revenue by compensating for depreciation in foreign currencies and to protect American industries and American labor against the effects of competition based on depreciation of foreign currencies; to the Committee on Ways and Means.

By Mr. BYRNS: A bill (H. R. 14436) making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes; to the Committee on Appropriations.

By Mr. VINSON of Georgia. A bill (H. R. 14437) to authorize the Secretary of the Navy and the Secretary of Commerce to exchange a portion of the naval station and a portion of the lighthouse reservation at Key West, Fla.; to the Committee on Naval Affairs.

Also, a bill (H. R. 14438) to effect needed changes in the Navy ration; to the Committee on Naval Affairs.

By Mr. FISH: A bill (H. R. 14439) to provide for the immediate payment of the face value of their adjusted-service certificates to veterans who are unemployed and in need; to the Committee on Ways and Means.

By Mr. BULWINKLE: A bill (H. R. 14440) providing for loans or advances by the Reconstruction Finance Corporation for the purpose of securing the postponement of the foreclosure of farm mortgages for a period of two years, and for other purposes; to the Committee on Banking and Currency.

By Mr. DISNEY: A bill (H. R. 14441) authorizing the Secretary of the Interior to purchase certain lands in Ottawa County, Okla.; to the Committee on Indian Affairs.

By Mr. DICKSTEIN: Joint resolution (H. J. Res. 577) to provide for the return to the Philippine Islands of unemployed Filipinos resident in the continental United States, to authorize appropriations to accomplish that result, and for other purposes; to the Committee on Immigration and Naturalization.

MEMORIALS

Under clause 3 of Rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial from the Legislature of the State of Washington memorializing Congress to promptly enact into law H. R. 13999; to the Committee on Ways and Means.

Also, memorial from the Legislature of the State of Utah memorializing Congress to pass a bill authorizing an appropriation of $125,000,000 for highway construction; to the Committee on Roads.

Also, memorial from the Legislature of the State of Nebraska, memorializing Congress to act favorably upon any proposed legislation which will restrict and limit the perennial influx of cheap Mexican labor which seeks admission to the United States; to the Committee on Immigration and Naturalization.

By Mr. COLTON: Memorial from the Legislature of the State of Utah, memorializing Congress to appropriate to Federal aid for highways; to the Committee on Roads.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALMON: A bill (H. R. 14442) for the relief of Harvey Mincher; to the Committee on Pensions.

By Mr. BRAND of Ohio: A bill (H. R. 14443) granting an increase of pension to Mary C. Jenkins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14444) granting an increase of pension to Mary Eliza Dent; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14445) granting an increase of pension to Susan M. Nelson; to the Committee on Invalid Pensions.

By Mr. CARTWRIGHT: A bill (H. R. 14446) for the relief of G. D. Duncan; to the Committee on Claims.

By Mr. CARY: A bill (H. R. 14447) to authorize the transfer of certain land in Hopkins County, Ky., to James D. Meadors; to the Committee on World War Veterans' Legislation.

By Mr. CLANCY: A bill (H. R. 14448) for the relief of Karl F. Rindelhardt; to the Committee on Military Affairs.

By Mr. DISNEY: A bill (H. R. 14449) for the relief of T. L. Rippey; to the Committee on Claims.

By Mr. HOGG of West Virginia: A bill (H. R. 14450) granting an increase of pension to Lucy A. Cartmell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14451) granting an increase of pension to Sarah Haught; to the Committee on Invalid Pensions.

By Mr. KOPP: A bill (H. R. 14452) granting a pension to Belle Smith; to the Committee on Invalid Pensions.

By Mr. LARRABEE: A bill (H. R. 14453) granting a pension to Elmer S. Laymon; to the Committee on Pensions.

By Mr. MOREHEAD: A bill (H. R. 14454) for the relief of Emma Berlet Taylor; to the Committee on Claims.

By Mr. PARSONS: A bill (H. R. 14455) granting a pension to John W. Aldredge; to the Committee on Pensions.

By Mr. THOMASON: A bill (H. R. 14456) for the relief of R. L. Tankersley; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerks' desk and referred as follows:

9921. By Mr. AMLIE: Memorial of the common council of the city of Whitewater, Wis., urging enactment of legislation to permit municipalities to enact reasonable restrictions covering canvassers, etc., engaged in interstate commerce; to the Committee on Interstate and Foreign Commerce.

9922. By Mr. BOEHNE: Petition of Woman's Foreign Missionary Society of the Methodist Episcopal Church of Chandler, Ind., praying for the retention of the eighteenth amendment; to the Committee on the Judiciary.

9923. Also, petition of Mrs. Joe Craig, and others, of Grandview, Ind., praying for the retention of the eighteenth amendment; to the Committee on the Judiciary.

9924. By Mr. CLARKE of New York: Petition of Minnie M. Truman, 5 Potter Avenue, Oneonta, N. Y., and 29 citizens of Otsego County, opposing any legislation changing the per cent of alcohol contained in legalized beverages as specified in the Volstead Act, also opposing the enactment of House bill 13742; to the Committee on the Judiciary.

9925. Also, petition of Mrs. H. C. Tubbs, president Missionary Society of the Methodist Episcopal Church, Cooperstown, N. Y., opposing all legislation intended to nullify, weaken, or repeal the eighteenth amendment and the Volstead Act and approving adequate appropriations for law enforcement and a campaign of education in law observance; to the Committee on the Judiciary.

9926. Also, petition of C. H. Day and 37 residents of Burlington Flats, N. Y., protesting against the enactment of any bill legalizing the manufacture or sale of beer or any beverage containing more than one-half of 1 per cent alcohol; to the Committee on Ways and Means.

9927. Also, petition of H. A. Odell and 68 citizens of Edmeston, N. Y., protesting against the enactment of any bills legalizing the manufacture or sale of beer or any beverage containing more than one-half of 1 per cent alcohol; also petition of 39 citizens of Edmeston, N. Y., in behalf of the stop-alien representation amendment to the United States Constitution; to the Committee on the Judiciary.

9928. By Mr. CRAIL: Petition of Beverly Hills (Calif.) Chapter, Daughters of the American Revolution, favoring the Jeffers bill (H. R. 8549); to the Committee on the Judiciary.

9929. Also, petition of California division of the Izaak Walton League, protesting the elimination of appropriation for law enforcement of Hawes bass law; to the Committee on Appropriations.

9930. Also, petition of Los Angeles County Council of the Izaak Walton League, California, protesting the elimination of appropriation for law enforcement of Hawes bass law to protect game and wild life; to the Committee on Appropriations.

9931. By Mr. DELANEY: Petition of the William R. Warner Co. (Inc.), of New York, urging the passage of Senate bill 5149, a bill to prohibit the counterfeiting of drugs, etc.; to the Committee on the Judiciary.

9932. Also, petition of the New York State Horticultural Society, protesting against the farm allotment bill and urging the veto of this bill by the President; to the Committee on Agriculture.

9933. Also, petition of Abraham & Straus (Inc.), of Brooklyn, N. Y., urging the use of the 2-cent rate for first-class postage; to the Committee on Ways and Means.

9934. By Mr. FISH: Petition of 319 citizens of Orange and Dutchess Counties, N. Y., opposing legislative acts that

would legalize alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

9935. By Mr. GIBSON: Petition of the Mount Aeolus Grange, No. 432, East Dorset, Vt., opposing the importation of foreign meat into the United States; to the Committee on Ways and Means.

9936. By Mr. HAINES: Petition of Trinity Evangelical Lutheran Sunday School, of Fort Loudon, Pa., protesting against repeal of the eighteenth amendment or the Volstead Act; to the Committee on the Judiciary.

9937. By Mr. HARLAN: Petition of C. A. Bosch, 9 South Ludlow Street, Dayton, Ohio, and 136 other residents of the city of Dayton, protesting against the 10 per cent discriminatory and confiscatory tax on toilet goods and cosmetics; to the Committee on Ways and Means.

9938. By Mr. HOOPER: Petition of residents of third district of Michigan, urging vote for stop-alien representation amendment to the Constitution; to the Committee on Immigration and Naturalization.

9939. By Mr. KNIFFIN: Petition of A. W. Winegarden, superintendent of the Tedrow Christian Bible School, protesting against any legislative proposal intended to nullify, weaken, or repeal the eighteenth amendment and the Volstead Act; to the Committee on the Judiciary.

9940. By Mr. LAMBERTSON: Petition of the East Topeka Woman's Christian Temperance Union, signed by the president, Mrs. J. A. Alexander, of Topeka, and also the secretary, Mrs. Ida M. Duesler, of Topeka, Kans., for the improvement of the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

9941. Also, petition of the president of the Woman's Christian Temperance Union of Washington, Kans., Mrs. Myrtie Bonesteel; also its secretary, Mrs. Estella Hatter, for the improvement of the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

9942. By Mr. LINDSAY: Petition of William R. Warner & Co., manufacturing pharmaceutists, New York City, urging support of Senate bill 5149, prohibiting the counterfeiting of drugs, etc.; to the Committee on the Judiciary.

9943. Also, petition of the New York State Horticultural Society, at its annual meeting at Rochester, opposing the farm allotment bill; to the Committee on Agriculture.

9944. By Mr. MILLARD: Petition signed by members of the Woman's Christian Temperance Union of New Rochelle, N. Y., protesting against the return of beer and the repeal of the eighteenth amendment, presented by request; to the Committee on the Judiciary.

9945. Also, resolution adopted at the annual meeting of the New York State Horticultural Society protesting against the so-called farm allotment bill; to the Committee on Agriculture.

9946. Also, resolution adopted by the members of the executive committee of the men's Bible class of the Presbyterian Church of White Plains, N. Y., urging the passage of House bills 8549 and 5659; to the Committee on the Judiciary.

9947. By Mr. RUDD: Petition of the New York State Horticultural Society, opposing the enactment of the farm allotment bill; to the Committee on Agriculture.

9948. Also, petition of William R. Warner & Co. (Inc.), New York City, favoring the passage of the Copeland bill (S. 5149), to prohibit the counterfeiting of drugs, etc.; to the Committee on the Judiciary.

9949. By Mr. SHREVE: Petition of residents of Harbor Creek and North East, Erie County, Pa., for passage of the stop-alien representation amendment to the Constitution of the United States; also petition of Mrs. C. P. McDannell, president Woman's Christian Temperance Union of Cambridge Springs, Pa., urging passage of the Sparks-Capper stop-alien representation amendment to the Constitution of the United States; to the Committee on the Judiciary.

9950. Also, petition by the Woman's Christian Temperance Union of Corry, Pa., May E. Blair, secretary, urging the passage of the Sabbath observance law; to the Committee on the Judiciary.

9951. By Mr. STRONG of Pennsylvania: Petition of citizens of Freeport, Pa., and vicinity, in favor of the revaluation of the gold ounce; to the Commitee on Coinage, Weights, and Measures.

9952. By Mr. THOMASON: Petition of American Angora Goat Breeders Association recommending enactment of legislation to effect a refinancing of all first-mortgage amortization loans now outstanding through the joint-stock land banks and Federal land banks; to the Committee on Banking and Currency.

SENATE

FRIDAY, JANUARY 27, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

Mr. FESS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dale	Keyes	Sheppard
Austin	Davis	King	Shipstead
Bailey	Dickinson	La Follette	Shortridge
Bankhead	Dill	Lewis	Smith
Barbour	Fess	Logan	Smoot
Barkley	Fletcher	McGill	Steiwer
Bingham	Frazier	McKellar	Stephens
Black	George	McNary	Swanson
Blaine	Glass	Metcalf	Thomas, Idaho
Borah	Glenn	Moses	Thomas, Okla.
Bratton	Goldsborough	Neely	Townsend
Brookhart	Gore	Norbeck	Trammell
Bulkley	Grammer	Norris	Tydings
Bulow	Hale	Nye	Vandenberg
Byrnes	Harrison	Oddie	Wagner
Capper	Hastings	Patterson	Walcott
Caraway	Hatfield	Pittman	Walsh, Mass.
Carey	Hawes	Reed	Walsh, Mont.
Connally	Hayden	Reynolds	Watson
Coolidge	Howell	Robinson, Ark.	Wheeler
Copeland	Hull	Robinson, Ind.	White
Costigan	Johnson	Russell	
Couzens	Kean	Schall	
Cutting	Kendrick	Schuyler	

The VICE PRESIDENT. Ninety-three Senators have answered to their names. A quorum is present. The Senator from South Carolina [Mr. BYRNES] has the floor.

Several Senators addressed the Chair.

Mr. BYRNES. I yield to Senators for the transaction of routine business.

SENATOR FROM INDIANA

Mr. WATSON. Mr. President, I present the credentials of Hon. FREDERICK VAN NUYS, the man who beat me for the Senate out in Indiana and who will be my successor in the United States Senate. I ask that the credentials be read.

The credentials were read and ordered to be placed on file, as follows:

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT.

To all to whom these presents shall come, greeting:

Whereas it has been certified to me by the proper authority that at a general election held on the first Tuesday after the first Monday in November, 1932, the same being the 8th day of said month, FREDERICK VAN NUYS was duly elected to the office of United States Senator from the State of Indiana.

Therefore know ye that in the name and by the authority of the State aforesaid I do hereby certify that the said FREDERICK VAN NUYS was duly elected at said general election a United States Senator in the Congress of the United States from the State of Indiana for the term of six years commencing on the 4th day of March, 1933.

In witness whereof I have hereunto set my hand and caused to be affixed the seal of the State at the city of Indianapolis, this 27th day of December, A. D. 1932, the one hundred and sixteenth year of the State and of the independence of the United States the one hundred and fifty-sixth.

HARRY G. LESLIE, *Governor.*

By the governor:

FRANK B. MAYER, Jr.,
Secretary of State.

PETITIONS AND MEMORIALS

Mr. FESS presented a memorial of sundry citizens of Delaware, Ohio, remonstrating against the repeal of the eight-

eenth amendment to the Constitution or the repeal or modification of the national prohibition law, which was ordered to lie on the table.

Mr. GRAMMER presented a resolution adopted by Branch No. 18, Fleet Reserve Association, of Seattle, Wash., opposing any reduction in the pay of enlisted men of the Navy, which was referred to the Committee on Appropriations.

He also presented a petition of sundry citizens of the State of Washington, praying for the passage of the bill (H. R. 13790) to provide revenue, to provide employment for American labor, and to encourage the industries and agriculture of the United States by compensating for depreciation in foreign currencies, which was referred to the Committee on Finance.

He also presented a memorial of members of the Woman's Christian Temperance Union of Bellingham, Wash., remonstrating against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which was referred to the Committee on the Judiciary.

Mr. CAPPER presented a resolution adopted by the military committee of the Chamber of Commerce of Hutchinson, Kans., protesting against reduction in the appropriation for support of the National Guard, which was referred to the Committee on Appropriations.

He also presented a memorial of sundry citizens of Coffeyville, Kans., remonstrating against reduction in the appropriation for support of the National Guard, which was referred to the Committee on Appropriations.

He also presented a memorial of sundry citizens of Kansas City, Kans., remonstrating against the repeal of the eighteenth amendment to the Constitution or the modification of the national prohibition law, which was ordered to lie on the table.

He also presented resolutions adopted by an assembly of 200 persons in the Methodist Episcopal Church at Ransom, a public meeting at Ionia, and at a union public service sponsored by the Woman's Christian Temperance Union at Burr Oak, all in the State of Kansas, remonstrating against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

He also presented resolutions adopted by the Indianola Farm Bureau, of Augusta; the Ladies' Aid Society, of Redfield; and local chapters of the Woman's Christian Temperance Union of Bucyrus, Burr Oak, Canton, Delphos, Fort Scott, Great Bend, Haviland, Kansas City, Lost Springs, Lyndon, Phillipsburg, Reading, Redfield, Topeka, and Washington, all in the State of Kansas, favoring the passage of legislation to regulate and supervise the motion-picture industry, which were ordered to lie on the table.

Mr. COPELAND presented a memorial of members of the Woman's Christian Temperance Union of New Rochelle, N. Y., remonstrating against the repeal of the eighteenth amendment to the Constitution or the modification of the national prohibition law, which was ordered to lie on the table.

He also presented a resolution adopted by the executive committee, men's Bible class of the Presbyterian Church of White Plains, N. Y., favoring the passage of the so-called Dies bill, being the bill (H. R. 12044) for the exclusion and expulsion of alien communists, which was ordered to lie on the table.

He also presented a resolution adopted by the Merchant Tailors' Society of the City of New York, New York, N. Y., relative to the alleged failure of Congress to pass constructive legislation helpful to business and aiding in restoring prosperity, and protesting against delay in the balancing of the Budget, which was referred to the Committee on Finance.

He also presented a memorial of sundry citizens of Rochester, N. Y., remonstrating against further cuts in appropriations for the maintenance of the Marine Corps, which was referred to the Committee on Appropriations.

Mr. SHIPSTEAD presented a memorial of sundry citizens of Wadena County, Minn., remonstrating against the passage of legislation to repeal or modify the national prohibition law, which was ordered to lie on the table.

He also presented petitions of sundry citizens of Lake Benton and Polk County, in the State of Minnesota, praying for the passage of legislation known as the Frazier farm relief bill, which were referred to the Committee on Agriculture and Forestry.

He also presented petitions of sundry citizens of Duluth, Minn., praying for the passage of legislation to remonetize silver, which were referred to the Committee on Finance.

He also presented a resolution adopted by farmers of the Blue Earth County Holiday Association in convention assembled at Mankato, Minn., favoring the prompt passage of legislation to stabilize the currency and reduce the buying power of the dollar, which was referred to the Committee on Banking and Currency.

PROHIBITION AND ENFORCEMENT

Mr. SCHUYLER. Mr. President, I present numerous memorials of sundry citizens and religious and other organizations in the State of Colorado, remonstrating against the passage of legislation to repeal or modify the national prohibition act, which I request may lie on the table; and also that one of the memorials be printed in the RECORD, together with the names of the organizations from which received, the number of signers, and the names of the cities or towns.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

MEMORIAL OPPOSING THE BEER BILL

To the honorable the Senate of the United States, greetings:

Believing (1) That the eighteenth amendment is the best solution to the liquor question yet advocated;

(2) That beer, as authorized in the bill H. R. 13742, with 4 per cent alcoholic content according to volume, is intoxicating and therefore unconstitutional;

(3) That the free use of this beer would greatly endanger the public safety and general welfare in this speed age of travel;

(4) That it is to the best interest of the public to keep this Nation saloonless and sober, which will be impossible if this bill is enacted:

Therefore we, the undersigned adult residents of Canon City, State of Colorado, earnestly petition your honorable body not to pass H. R. 13742, or any other measure that would override the eighteenth amendment of the Federal Constitution, but instead employ means to make national prohibition more effective.

The number of signers of the memorials and the names of the cities or towns, together with the names of the organizations, are as follows: Canon City, Colo., 110; Sedgwick, Colo., 5; Dolores, Colo., 53; Ault, Colo., Ault Chapter, Woman's Christian Temperance Union; Denver, Colo., Washington Park Woman's Christian Temperance Union; Wray, Colo., 18; Loveland, Colo., 44; Englewood, Colo., churches and Woman's Christian Temperance Union; Denver, Colo., 1,115; Carr, Colo., 47; Denver, Colo., Highlands Woman's Christian Temperance Union; Grand Junction, Colo., 300; Las Animas, Colo., 130; Hotchkiss, Colo., Rogers, Mesa, and Hotchkiss Woman's Christian Temperance Union; La Junta, Colo., Presbyterian Church; Holyoke, Colo., Holyoke Woman's Christian Temperance Union; Loveland, Colo., 900; Otis, Colo., Otis Woman's Christian Temperance Union; Crawford, Colo., Crawford Woman's Christian Temperance Union; Grand Junction, Colo., Grand Junction Woman's Christian Temperance Union; Denver, Colo., South Broadway Christian Church; Colorado Congress of Parents and Teachers, Denver, 35; Julesburg, Colo., 17; Sterling, Colo., LeRoy Evangelical Church; Denver, Colo., First United Presbyterian Church; Burlington, Colo., 24; Loveland, Colo., 43; Denver, Colo., Barnum Methodist Church; Denver, Colo., Alameda Evangelical Church; Denver, Colo., 70; Denver, Colo., 150; Denver, Colo., 160; Denver, Colo., 55; Cedaredge, Colo., Cedaredge Woman's Christian Temperance Union; Wiley, Colo., Methodist Episcopal Sunday School, 16; Brighton, Colo., Brighton Woman's Christian Temperance Union; Fort Collins, Colo., 7; Cortez, Colo., 61; Montrose, Colo., Montrose Woman's Christian Temperance Union; Arvada, Colo., First Baptist Church; Grand Junction, Colo., First Baptist Church; Brush, Colo., Brush Woman's

Christian Temperance Union; Limon, Colo., Limon Woman's Christian Temperance Union; Denver, Colo., Hawley Woman's Christian Temperance Union; Bellvue, Colo., 37; Burlington, Colo., 18; Denver, Colo., Colorado Federation of Women's Clubs; Arvada, Colo., Arvada Presbyterian Church; Fleming, Colo., Fleming Woman's Christian Temperance Union; Denver, Colo., Grant Avenue Methodist Church; Sugar City, Colo., Methodist Episcopal Church; Bayfield, Colo., 24; Denver, Colo., 1,600; Fort Collins, Colo., 50; Longmont, Colo., Longmont Woman's Christian Temperance Union; Denver, Colo., Broadway Baptist Church; Wray, Colo., Wray Woman's Christian Temperance Union; Canon City, Colo., Canon City Ministerial Alliance; Jaroso, Colo., 45; Hotchkiss, Colo., Hotchkiss Woman's Christian Temperance Union; Montrose, Colo., mass meeting; Fort Lupton, Colo., mass meeting; Golden, Colo., mass meeting; Loveland, Colo., Loveland Woman's Christian Temperance Union; Loveland, Colo., mass meeting; Greeley, Colo., Epworth League; Sterling, Colo., Epworth League; Golden, Colo., 49; Longmont, Colo., 23; Golden, Colo., 22; Otis, Colo., Presbyterian Church; Golden, Colo., 19; Golden, Colo., 30; Burdett, Colo., Burdett Woman's Christian Temperance Union; Sterling, Colo., Sterling Woman's Christian Temperance Union; Sterling, Colo., First Presbyterian Church; LeRoy, Colo., Evangelical Church; Denver, Colo., Central Presbyterian Church; Sterling, Colo., Woman's Christian Temperance Union; Paonia, Colo., Paonia Woman's Christian Temperance Union; Colorado Springs, Colo., Woman's Christian Temperance Union; Golden, Colo., 10.

RECOVERY FROM DEPRESSION

Mr. SCHALL. Mr. President, I have just had read to me an article in the Minneapolis Star of January 25 reporting a speech of Doctor Weidenhammer, University of Minnesota. Coming from such a student of economics, of business administration, and investments, it brings a ray of hope that should be given all the space possible for its radiation. I wish to help by asking not only that it be printed in the RECORD, but that it be referred to the Committee on Banking and Currency.

There being no objection, the article was referred to the Committee on Banking and Currency and ordered to be printed in the RECORD, as follows:

[From the Minneapolis (Minn.) Star, January 25, 1933]

CRISIS PASSED, EDUCATOR SAYS—DEPRESSION HIT BOTTOM LAST JUNE, DOCTOR WEIDENHAMMER DECLARES

The depression has hit bottom and the Nation is on an upward climb, Dr. Robert Weidenhammer, professor of investments in the school of business administration at the University of Minnesota, told members of the Optimists Club at the Leamington to-day.

"The depression hit bottom in June last year," Doctor Weidenhammer said. "The first half of 1932 now appears like a nightmare. France withdrew gold, the bond market declined with nerve-racking monotony, the Kreuger and Insull scandals wiped out confidence in the giants of the last boom, and our banking system was threatened.

"To-day the crisis has passed, but recovery will be slow. There will be more failures and receiverships in 1933 than in 1932, but the security market has discounted them long ago. Inflation can and should be avoided. Recovery will lift prices, but the lifting of prices by inflation would not assure lasting recovery."

REPORTS OF COMMITTEES

Mr. JOHNSON, from the Committee on Commerce, to which was referred the bill (H. R. 6184) for the improvement of the inland waterway from Norfolk, Va., to Beaufort Inlet, N. C., reported it with an amendment and submitted a report (No. 1123) thereon.

Mr. BINGHAM submitted the views of the minority of the Committee on Commerce to accompany House bill 6184, just above reported, which was ordered to be printed as part 2 of Report No. 1123.

Mr. CUTTING, from the Committee on Military Affairs, to which was referred the bill (S. 3673) for the relief of George W. Edgerly, reported it with an amendment and submitted a report (No. 1124) thereon.

Mr. DICKINSON, from the Committee on Printing, to which was referred the joint resolution (S. J. Res. 238) relating to leave with pay for employees of the Government Printing Office, reported it without amendment and submitted a report (No. 1125) thereon.

FEDERAL AID FOR UNEMPLOYMENT RELIEF

Mr. LA FOLLETTE. From the Committee on Manufactures, to which was referred the bill (S. 5125) to provide for cooperation by the Federal Government with the several States in relieving the hardship and suffering caused by unemployment, and for other purposes, I report it back with amendments and submit a report (No. 1126) thereon.

I wish to give notice that at the first opportunity in the legislative situation when I may obtain recognition from the Chair I shall move to proceed to the consideration of this important relief bill.

The PRESIDENT pro tempore. The report will be received and the bill placed on the calendar.

ENROLLED BILL PRESENTED

Mr. VANDENBERG, from the Committee on Enrolled Bills, reported that on to-day, January 27, 1933, that committee presented to the President of the United States the enrolled bill (S. 5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CONNALLY:

A bill (S. 5532) to extend the time for the construction of a bridge across the Rio Grande at Boca Chica, Tex.; to the Committee on Commerce.

By Mr. VANDENBERG:

A bill (S. 5533) for the relief of the Acme Motor Truck Corporation (with accompanying papers); to the Committee on Claims.

By Mr. COPELAND:

A bill (S. 5534) for the relief of the J. M. Dooley Fireproof Warehouse Corporation, of Brooklyn, N. Y.; to the Committee on Claims.

A bill (S. 5535) for the relief of certain Army officers whose household and other effects were damaged on Government property; to the Committee on Military Affairs.

By Mr. NEELY:

A bill (S. 5536) to amend section 113 of the Judicial Code, as amended, with respect to the southern judicial district in the State of West Virginia; to the Committee of the Judiciary.

By Mr. JOHNSON:

A bill (S. 5537) to convey certain land in the county of Los Angeles, State of California; to the Committee on Military Affairs.

By Mr. SHORTRIDGE:

A bill (S. 5539) authorizing the Secretary of the Navy to grant a perpetual easement 15 feet in width to Pacific Gas & Electric Co., a California utility corporation, over, across, in, and upon the site of the lighter-than-air base, near Sunnyvale, in the county of Santa Clara, in the State of California, for an existing 20-inch gas main; and

A bill (S. 5540) to authorize the Secretary of the Navy and the Secretary of Commerce to exchange a portion of the naval station and a portion of the lighthouse reservation at Key West, Fla.; to the Committee on Naval Affairs.

By Mr. KING:

A bill (S. 5541) to permanently set aside certain lands in Utah as an addition to the Navajo Indian Reservation, and for other purposes; to the Committee on Indian Affairs.

By Mr. THOMAS of Oklahoma:

A bill (S. 5542) for the relief of Joseph Thompson (with an accompanying paper); to the Committee on Naval Affairs.

By Mr. DAVIS:

A bill (S. 5543) for the relief of N. C. Nelson; to the Committee on Claims.

CONSOLIDATION OF DEPARTMENTS OF AGRICULTURE AND INTERIOR

Mr. BRATTON. Mr. President, I stated yesterday on the floor of the Senate that I had prepared a bill to consolidate the Department of Agriculture and the Department of the

Interior, and that in my opinion we could save $100,000,000 annually by effecting that consolidation. I have completed the preparation of the bill and I ask consent to introduce it.

The bill (S. 5538) to establish a department of development and conservation, to abolish the Department of Agriculture and the Department of the Interior, and to transfer the functions thereof to the department of development and conservation, and for other purposes, was read twice by its title and referred to the Committee on Public Lands and Surveys.

PAN-AMERICAN MEDICAL ASSOCIATION

Mr. CONNALLY. Mr. President, I introduce and send to the desk a joint resolution. I ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. Let it be read for the information of the Senate.

The joint resolution (S. J. Res. 243) authorizing the President of the United States to extend a welcome to the Pan-American Medical Association, which holds its convention in the United States in March, 1933, was read the first time by its title and the second time at length, as follows:

Resolved, etc., That the President of the United States is authorized on behalf of the Government of the United States to extend a welcome to the Pan-American Medical Association, which is to hold its fourth congress, being its first congress held in an English-speaking nation, at Dallas, Tex., from March 21 to March 25, 1933.

Mr. CONNALLY. Mr. President, I do not care to consume any time in discussing the matter. I have consulted with the senior Senator from Idaho [Mr. BORAH], chairman of the Foreign Relations Committee, and there is no objection to the joint resolution.

There being no objection, the joint resolution was considered, ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF EMERGENCY RELIEF AND CONSTRUCTION ACT

Mr. FLETCHER submitted two amendments intended to be proposed by him to the bill (S. 5336) to amend the emergency relief and construction act of 1932, which were referred to the Committee on Banking and Currency.

AMENDMENTS TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. FRAZIER submitted two amendments intended to be proposed by him to House bill 13710, the Interior Department appropriation bill, which were ordered to lie on the table and to be printed, as follows:

On page 18, line 1, to strike out "$114,430" and insert in lieu thereof "$103,521.67," so as to read: "For expenses incidental to the sale of timber, and for the expenses of administration, including fire prevention, of Indian forest lands from which such timber is sold to the extent that the proceeds of such sales are sufficient for that purpose, $103,521.67, reimbursable to the United States as provided in the act of February 14, 1920 (U. S. C., title 25, sec. 413)."

And on page 46, line 6, after the word "Indians," to strike out the period and insert a colon and the following: "*Provided further*, That effective July 1, 1933, the Yankton Agency, S. Dak., as an independent agency, shall be discontinued."

AMENDMENTS TO TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. McKELLAR submitted an amendment intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 35, line 3, after the word "projects," to strike out "$50,000,000" and insert "$25,000,000," so as to read:

"For the acquisition of sites or of additional land, commencement, continuation, or completion of construction in connection with any or all projects authorized under the provisions of sections 3 and 5 of the public buildings act, approved May 25, 1926 (U. S. C., Supp. V, title 40, secs. 343–345), and the acts amendatory thereof approved February 24, 1928 (U. S. C., Supp. V, title 40, sec. 345), and March 31, 1930 (U. S. C., Supp. IV, title 40, secs. 341–349), within the respective limits of cost fixed for such projects, $25,000,000."

Mr. McKELLAR also submitted an amendment intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 16, line 16, after the word "each," to insert the following: "*Provided further*, That no refund or credit of any income or profits, estate, or gift tax in excess of $20,000 shall be made after the enactment of this act until a report thereof giving the name of the individual, trust, estate, partnership, company, or corporation to whom the refund or credit is to be made, the amount of such refund or credit, and the facts in connection therewith and all supporting papers are submitted by the Commissioner of Internal Revenue to the Comptroller General of the United States and approved by him, the papers to be returned to the Commissioner of Internal Revenue after final action on the proposed refund is taken by the said Comptroller General. This proviso shall not apply to refunds or credits made pursuant to a judgment of a court having jurisdiction of the subject matter, or a decision of the United States Board of Tax Appeals, which has become final."

THE JOURNAL

Mr. FESS. Mr. President, I ask unanimous consent for the approval of the Journal for the calendar days of January 25 and 26, 1933.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

MESSAGE FROM THE HOUSE—ENROLLED BILL SIGNED

A message from the House of Representatives by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the enrolled bill (S. 5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes, and it was signed by the President pro tempore.

NATIONAL PARK SERVICE—JACKSON HOLE

Mr. CAREY. Mr. President, I ask unanimous consent to have printed in the RECORD an article appearing in the Morning Eagle, of Cheyenne, Wyo., relating to the Jackson Hole area and the national-park system.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Cheyenne (Wyo.) Morning Eagle, January 24, 1933]

CONFIDENTIAL LETTERS TO ROCKEFELLER REVEALED HERE—NATIONAL PARK SERVICE STARTED MOVE TO ADD JACKSON HOLE AREA AS EARLY AS 1923

By Julian B. Snow, news editor the Wyoming Eagle

How the National Park Service initiated the present Rockefeller plan of purchasing a considerable portion of Teton County as a part of a park-extension program, and how John D. Rockefeller, jr., was warned by Horace M. Albright, assistant superintendent of the national parks, to take care "to say nothing" of the "ultimate plan of acquiring all of the private holdings in the Jackson Hole" was revealed here to-day in copies of letters purporting to have been written by Albright to Rockefeller as far back as February 16, 1927.

Copies of Albright's letters to Rockefeller and to others interested with him have been received by the Morning Eagle from highly reliable sources and reveal, among other interesting facts, the desire of the park superintendent to secure the aid of eastern financial interests to annex the beautiful Jackson Hole country to the park system.

On February 16, 1927, Superintendent Albright advised John D. Rockefeller, jr., that "should you feel that this is a matter that you would like to proceed with, I am sure it can be handled with excellent results along the following lines:

"1. Say nothing at the present time about the larger or ultimate plan of acquiring all of the private holdings in the Jackson Hole.

"2. Confine all activities to acquisition of holdings west of the Snake River in the area colored on the map you had, and which I return herewith.

"3. Buy in this area, through an agency or agencies, under a plan to organize a recreation and hunting club. If there were more grazing lands on the west side of the river, I would advocate operating as buyers for a land and cattle company * * *. A cattle company to operate on the east side later would be an ideal agency.

"4. Employ a firm of attorneys in Salt Lake City to coordinate buying operations and disburse funds. I have in mind the firm of Fabian & Clendenin * * *.

"5. Through these attorneys, acting for 'a recreation and hunting club' or some other hypothetical organization if a better one can be found, the lands could be acquired for cash * * *.

"6. As soon as possible the National Park Service and the General Land Office will plat on maps all of the other private holdings in Jackson Hole. I have the list of holdings as of December, 1923. There were then more than 402 owners of a little over 100,000 acres of land. The situation has not materially changed since then. The land, which includes the west side of the Snake, too, is worth on an earning basis, perhaps $1,000,000 annually, including value of improvements. I can not say what it could be acquired for, but investigation of value can be quietly secured this summer."

Later on in his letter the park superintendent points out that "it would attract undue attention to absolutely prohibit suddenly the taking up of other vacant public lands, and so, while we buy improved properties, others now lying untaken and unused might be settled. The answer is that practically every tract of land susceptible has been taken up under homestead laws—practically,

settlement has reached its limits considering national forests and other permanent withdrawals from permanent occupation * * *."

On September 25, 1923, in a confidential letter from Superintendent Albright to Mr. Hal G. Ewarts, of Hutchinson, Kans., Mr. Albright discussed "a proposition that is positively the most important game-conservation project in America to-day," and warns that the "utmost care must be exercised in discussing this idea, because the Forest Service is bound to fight it and kill it. The Jackson office of the Forest Service is lying awake nights figuring out ways to defeat the old extension plan."

In a letter to Mr. Thomas Cochran, 23 Wall Street, New York, Superintendent Albright as early as November 30, 1923, discussed the plan and again warned that "we must be very careful not to let it [the plan] become public property. The Forest Service, which hates to let go of an acre of land under any conditions and which has been fighting our whole extension project, would kill this new plan in a minute. We can not, therefore, let the idea get into the hands of any of Governor Pinchot's friends * * *."

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

Mr. TYDINGS. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Maryland?

Mr. BYRNES. I yield.

Mr. TYDINGS. After a preliminary remark of a moment, I would like to ask unanimous consent to withdraw the motion I made yesterday to recommit the pending appropriation bill, with a resolution thereto attached, and to submit therefor a new resolution, which I now have in my hand.

Before sending it to the desk may I say that the matter of the resolution was discussed this morning by those on this side of the aisle, and I think I am stating a simple fact when I say that it was the overwhelming thought of the conference that the resolution is sound and needed and should be applied as far as human limitations make it possible to be applied. I was very much gratified with the splendid cooperation of my colleagues who were present in their desire to accomplish what the resolution sought to accomplish, realizing that certain circumstances and inhibitions were present in the adoption of the resolution as it was presented, which restrictions will be explained by others than myself at some immediately later time.

I renew my request to withdraw the resolution I embodied on yesterday in my motion to recommit the pending bill and to offer the substitute, which I ask may be read.

The VICE PRESIDENT. Is there objection to the request of the Senator from Maryland to withdraw his resolution?

Mr. KEAN. Mr. President, I object.

Mr. NORRIS. Mr. President——

Mr. TYDINGS. Does the Senator from Nebraska object to the resolution's being read?

Mr. NORRIS. No; I am not objecting to the request, but before it is done I want to make a statement.

Mr. TYDINGS. Will the Senator let it be read and then make his statement?

Mr. NORRIS. Certainly.

The VICE PRESIDENT. The resolution will be read for the information of the Senate.

The legislative clerk read as follows:

Resolved, That it is the declared policy of the Senate that the appropriations in the aggregate shall be reduced at the earliest practicable time to a sum equal to that of the estimated revenue, and that the Committee on Appropriations is instructed to make a survey of all appropriation bills and to make reductions therein wherever possible without injuring the efficiency of essential services and conforming to a policy of strictest economy.

Mr. NORRIS. Mr. President, may I ask the Senator a question? The reading of the resolution indicated to my mind that it is not his purpose to recommit the bill. Is that correct?

Mr. TYDINGS. No; the economies hoped to be brought about by recommitting the bill to the Committee on Appropriations, where the proposed amendments have already been considered, will be offered on the floor so that an opportunity to reduce the appropriations in this bill will be laid before the Senate as a whole.

Mr. NORRIS. I want to submit to the Senator, inasmuch as his resolution does not recommit the bill, whether he ought not to wait until we dispose of the bill and see whether we do that thing? If we do not succeed in getting the reductions in this bill, then he might well offer his resolution.

Mr. TYDINGS. I will say to the Senator from Nebraska that it is not my desire at this time to press the resolution to a conclusion. I simply wanted to withdraw the pending resolution, which is now the immediate business before the Senate, indicate my reasons for withdrawing it and offering a substitute, and to let it lie on the table until we had acted on the bill.

Mr. NORRIS. I have no objection to that, but I thought when the Senator rose that his motion included recommitting the bill, and I want to say that as soon as I can get the floor I have an amendment to the bill which I want to offer. If, however, the bill is going to be recommitted, I want the amendment, which I wish to discuss briefly, to go with the bill.

Mr. SMOOT. Mr. President, will the Senator yield for a moment?

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Utah?

Mr. BYRNES. I yield.

Mr. SMOOT. I merely wish to say that we have marched up the hill and now we are marching down.

Mr. TYDINGS. I did not hear what the Senator from Utah said.

Mr. BYRNES. Mr. President, I have the floor.

Mr. ROBINSON of Arkansas. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield; and if so, to whom?

Mr. BYRNES. I yield to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. The Senator from Maryland has not asked for the present consideration of the resolution. The resolution declares a policy with which I believe the entire Senate will find itself in sympathy. The statement of the Senator from Utah that "we have marched up the hill and down again" is like a great many other statements he makes here; it is unfounded in fact; it is historically inaccurate; it is parliamentarily untrue. The principle of the resolution is entirely sound, and when the opportunity is presented its consideration will be asked of the Senate.

The VICE PRESIDENT. The Senator from New Jersey objected to the withdrawal of the resolution.

Mr. KEAN. I ask for the yeas and nays.

The VICE PRESIDENT. The Senator from South Carolina has the floor.

Mr. FLETCHER. Mr. President——

The VICE PRESIDENT. The yeas and nays have already been ordered. Does the Senator from South Carolina yield to the Senator from Florida?

Mr. BYRNES. I yield to the Senator from Florida.

Mr. FLETCHER. I suggest that the Senator who makes a motion may withdraw it. He does not have to ask unanimous consent for that purpose.

The VICE PRESIDENT. After the yeas and nays have been ordered it can not, under Rule XXI, be withdrawn or modified by the mover, but may be withdrawn or amended on motion adopted by a majority vote of the Senate.

Mr. FLETCHER. I did not know the yeas and nays had been ordered.

Mr. SWANSON. Mr. President, I understand the rules provide that that can be done unless the yeas and nays have been ordered.

The VICE PRESIDENT. The yeas and nays were ordered yesterday.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Idaho?

Mr. BYRNES. Mr. President, I dislike to yield any further at this time. I wish to be good natured about it, but I seldom occupy any time upon the floor, and I do wish to make a statement with reference to the resolution.

The Senator from Maryland [Mr. TYDINGS] rendered a distinct service by the introduction of the resolution presented by him yesterday, because he called the attention not only of the Senate but of the country to the necessity for the strictest economy. By the terms of the substitute resolution now offered by the Senator from Maryland there is no change of policy. There is a change only as to the method by which the result is to be accomplished and the time within which it is to be accomplished. Those changes must be made for several reasons.

Let us look at the figures. Reference is often made to the Budget estimate, and with such inaccuracy at times that I secured the figures from the clerk of the Appropriations Committee. According to those figures, the estimates for this fiscal year aggregate $4,403,000,000. There has been one deduction, in House Document 518, which reduces the total Budget estimates to this date to the sum of $4,379,000,000. When we deduct the public-debt retirement of $534,000,000 it leaves an estimated total expenditure of $3,845,000,000. When we deduct the revenues of the Postal Service it leaves $3,220,000,000.

What is the situation to-day? If on this day the appropriation bills, wherever pending, whether in the House committee or on the floor of the House or in the Senate committee or on the Senate floor, were approved by the President of the United States, there would be a reduction from the estimates of $53,722,779. To comply with the original Tydings resolution would require a reduction of $218,036,731.40 below the amount to which the bills have already been reduced.

Mr. President, whenever we undertake to fix a stated sum as the sum to which appropriations can be reduced, many difficulties confront us. In response to inquiries yesterday the Senator from Maryland stated that he believed reductions could be made in appropriations for the retirement of emergency officers. However, no such reductions can be made unless the proper legislative committees of the Senate and of the House of Representatives report bills and Congress first changes the basic law under which retirement pay is granted. It has been established time and time again that, so long as there is no change in existing law, an officer now entitled to retirement pay can, if the amount is not paid, go into the courts and secure judgment for the amount based on the law. Therefore, before the Appropriations Committee can make such reductions, the legislative committees of the Senate must recommend the proper legislation, and such legislation must be enacted by the Congress.

Members on this side of the aisle are not in charge of the committees having control of veterans' legislation. We have no opportunity to report, if we desired to do so to-day or any other day, legislation that would affect emergency officers. The Senate has a special committee appointed for the purpose of investigating that subject. That committee has not reported. The majority of the committee comes from the other side of the aisle and not from this side. So long as that is true, and until existing veterans' legislation as to emergency officers shall be amended, there can be no reduction except in the appropriations for administrative purposes of the bureau.

Where else can large reductions be made in the expenditures of the Government? Reductions can come only from that source or by a reorganization of the departments of the Government. How can we hope for a reorganization of the departments of the Government by the Congress? I can recall during the 14 years of my service in the other House the efforts which were made by the Congress to reorganize the departments, and which were always unsuccessful. The pending bill carries a provision for reorganization of the departments of the Government and gives to the President the power to abolish useless departments. If that power is courageously exercised there can be a reduction of Government expenses. The Senator from Maryland, anxious to cooperate in securing a reduction of the expenditures of the Government, does not want to be placed in the position of having a bill sent back to the committee when there is evidence on the floor of the Senate that many who really are not very anxious about reducing expenditures would like to have that accomplished in the hope that it would kill all the appropriation bills at this session and thereby prevent any reorganization. On the contrary, let us pass this measure, give to the President authority to reorganize in such a way, under the provisions of this bill, that there will be a chance for such reorganization to become effective without placing it in the power of one House of Congress alone to disapprove the action of the Executive when he shall undertake to abolish useless bureaus. We can then bring the expenditures within the income.

We can do much now. As the Senator from Maryland knows, in the Committee on Appropriations when this bill was under consideration there were offered four amendments which, if adopted, would have accomplished substantial savings in the expenditures of the Government. The Committee on Appropriations voted against those amendments, and now the question is whether we should recommit the bill to the tribunal where those amendments were lost, or whether we shall proceed to consider the bill on the floor of the Senate, where the amendments will be offered with some hope of being adopted, and we may be successful in accomplishing material savings in the appropriations carried in the bill. To recommit it, with instructions to reduce to a certain amount, would mean that those amendments would be lost and the savings would not be effected. For these reasons the resolution now offered by the Senator from Maryland is in exact accord with the principle of the resolution offered by him on yesterday.

One further thing. I said that our ability to reduce expenditures to any great extent must be dependent upon repealing or changing existing legislation authorizing the expenditures, many of them on a contractual basis. The Committee on Appropriations must provide the funds to carry out the directions of the Congress and the provisions of the law.

A statement was made on yesterday about the plank in the Democratic platform——

Mr. TYDINGS. Mr. President, before the Senator comes to that will he yield to me for a moment?

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Maryland?

Mr. BYRNES. Yes.

Mr. TYDINGS. The Senator has already pointed out that as to one of the places where there is an opportunity to make a large saving without doing injustice to anybody entitled to Government attention, it is impossible to make a saving by reducing the appropriation, because the first person denied compensation or bounty, as the case may be, could then go into the Court of Claims and get judgment against the Government. So, even though the appropriations were reduced, there would be no saving. That was primarily the reason, so far as I am concerned, why the resolution was modified.

Mr. BYRNES. Mr. President, the Democratic platform, to which reference was made on yesterday, contains this statement:

> We favor maintenance of the national credit by a Federal Budget annually balanced on the basis of accurate executive estimates within revenues, raised by a system of taxation levied on the principle of ability to pay.

"Accurate executive estimates"! The figures taken by the Senator from Maryland represent the estimates of revenue as furnished on December 5 by the Budget Bureau. The figures are $2,949,162,713; and yet within the last week the President of the United States has sent to the Congress a message in which he states that the revenues will not reach this sum; that already it is apparent that there will be a reduction in the revenues of between $100,000,000 and $300,000,000. So when we attempt to have the expenditures conform to the revenues as estimated by the Treasury at this time, it is an absolute impossibility unless from day to day we consult the Secretary of the Treasury. We now have no accurate estimates.

In addition, in the $2,900,000,000 of estimated revenue according to the Budget there is included the sum of $328,-

000,000 as receipts from foreign debt. How much will be received during the next fiscal year in payment of foreign debts due us is certainly a matter as to which there may be some difference of opinion.

In the Democratic platform there is the further declaration:

> We advocate an immediate and drastic reduction of governmental expenditures by abolishing useless commissions and offices, consolidating departments and bureaus, and eliminating extravagance, to accomplish a saving of not less than 25 per cent in the cost of Federal government, and we call upon the Democratic Party in the States to make a zealous effort to achieve a proportionate result.

What did the expenditures of the Government amount to upon the day that resolution was adopted? On that day the appropriations amounted to $4,800,731,779. No man, by any fair interpretation of the language of the platform, could construe it as meaning that we would advocate or seek to secure a reduction of 25 per cent of the public debt or the interest upon it. When those two items are eliminated, it means that we pledged ourselves to a reduction of $885,000,000 from the appropriations existing at that time, and which were the only appropriations that could have been in contemplation by those who drafted and voted for the adoption of that platform.

The President, in the Budget estimates sent to the Congress, makes a reduction of approximately $400,000,000. Since those bills have been received by the Congress, the bills as they stand to-day contain a reduction of an additional $55,000,000. If the Congress will adopt the economy provisions of this bill reported by the Senator from Connecticut [Mr. BINGHAM], a further $30,000,000 will be added, and if we will adopt also the provisions contained in this bill authorizing the reorganization of the Government, with the powers therein contained, I know that the next President of the United States will not hesitate one moment to exercise the power with courage in the reduction of bureaus, and before July 1, the beginning of the next fiscal year, the goal set by the platform of a reduction of $800,000,000 will have been attained.

Mr. BLAINE. Mr. President, will the Senator yield for a question?

Mr. BYRNES. I yield to the Senator from Wisconsin. I have not yielded the floor.

Mr. BLAINE. Do I understand that under the proposed power of reorganization of executive departments the President would have the power to abolish the Veterans' Bureau and the functions of the Veterans' Bureau?

Mr. BYRNES. Yes, submitting it to Congress; and if any President abolished the Veterans' Bureau and submitted it to Congress, and the Congress did not disapprove it, then the Veterans' Bureau should be abolished. If the President of the United States, elected by the people of the United States, should see fit to abolish that bureau—of course, the Senator and I know that he would never do it—but should he do it, and should the Congress, elected by the people, refuse to disapprove it, then I think it is about time that the Veterans' Bureau should be abolished.

Mr. BLAINE. In other words, the President would have power in effect to repeal all provisions of the law for pensions for old soldiers and widows, compensation for the disabled, and so forth?

Mr. BYRNES. No; my interpretation is not that he could do that. I am satisfied that he could not. Furthermore, while I dislike to enter into a discussion of the reorganization at this time, because at a later time I expect to do so in an orderly way, I will say that the bill lays down the standard, the policy of the Congress, and where an Executive order is filed, setting forth that the fact has been ascertained that certain functions overlap existing functions, and that the policy of the Congress having been declared that where there is such overlapping and where it is necessary in order to accomplish a reduction in expenditures that a bureau—the Efficiency Bureau, for instance—should be abolished, it is ordered that it be abolished. That order must be sent to the Congress, and the Congress has a chance to disapprove it if it sees fit.

Mr. BLAINE. One other question: Then the reduction would be made only respecting the operating expenses of the bureau or department.

Mr. BYRNES. Yes; that is right.

Mr. HASTINGS and Mr. NORRIS addressed the Chair.

The VICE PRESIDENT. The Senator from Delaware.

Mr. HASTINGS. Mr. President, I desire to congratulate the Senator from South Carolina [Mr. BYRNES] upon having convinced the Senator from Maryland [Mr. TYDINGS], who introduced this resolution some days ago, as well as his associates on the other side of the Chamber, of the impracticability of carrying out any such proposal as this.

The resolution of the Senator from Maryland provides:

> That the Committee on Appropriations be, and it is hereby, instructed by the Senate to reduce any and/or all appropriation bills sufficiently so that the aggregate of all appropriations for the fiscal year 1934 shall not be in excess of $2,949,100,000, which figure represents the total estimated revenue for the fiscal year 1934—

And so forth.

Undoubtedly it sounds very well to people living all over this country to have somebody propose what seems on the face of it to be a very sensible thing, namely, to cut down the expenses of the Federal Government to a point where the income will be sufficient to balance the Budget.

In order that I may show conclusively how impractical this proposition is, it will be necessary for me to quote some figures.

I want to say in reference to the Senator from Maryland [Mr. TYDINGS] that I know of nobody in this Chamber who is so little inclined to propound propositions for the mere purpose of being on the popular side of any question. My observation leads me to believe that heretofore his suggestions have been sound; and I am inclined to think that this motion and his speech must have been rather hastily conceived, or he would not have made the proposal in the first place.

The Budget requirements, as presented to the Congress, amount roughly to $3,790,000,000; but we must bear in mind in that connection that the President has recommended a reduction in salaries of $55,000,000 and a reduction in the appropriations for the veterans of $127,000,000, making a total of $182,000,000; and until legislation is had upon the subject recommended by the President I submit that the Appropriations Committee is in an entirely hopeless position so far as being able to do anything effective with these two subjects is concerned.

If we add that $182,000,000 to the $3,790,000,000, we have a total of $3,972,000,000; and if we deduct from it the retirement of the public debt, as is suggested in the resolution, of $534,000,000 we have left $3,438,000,000.

The estimated receipts being $2,949,000,000, we have left an amount of $489,000,000, representing the amount by which the Appropriations Committee is bound to see that the appropriations shall be reduced; and if we take the speeches made in connection with the subject and the very purpose of the resolution itself—namely, to balance the Budget by spending no more than is collected—it will be necessary to add to it $329,000,000 due from the foreign governments, none of which we may receive, and, as has just been stated a moment ago, nobody knows definitely how much of it, if any, will be received. That leaves us a total of $818,000,000 that we will be short when it comes to balancing the Budget.

In order that we may find out whether it can be done and upon what items we may make the reduction, it will be necessary, in the first place, to eliminate $725,000,000 of interest on the public debt. Nobody will contend that that can be reduced in any way except by making some further provision on the subject, which means further legislation, as suggested by the Senator from Maryland yesterday.

There is another important item, however, which is frequently overlooked by Members of Congress, and that amounts to $311,000,000. Those are trust funds, tax refunds, District of Columbia budget, contributions to civil-service pensions, Post Office subsidies to air and foreign mail which are represented by fixed obligations, and other similar items

which there is no opportunity to reduce. Then, if we add to that $305,000,000 for the contracts that have already been let for public works and their maintenance, we have a total of $1,341,000,000 from which no reduction can be made.

The balance of the Budget amounts to $2,097,000,000. If we take the amount which the Senator from Maryland suggests in his motion as the amount from which the Appropriations Committees may make their reductions, we find it amounts to 23½ per cent of the $2,097,000,000. There are three places from which that may come.

One is the military service. If we take 23½ per cent of that, we have a reduction of Army and Navy costs of $144,000,000. If we make the same reduction in the amounts paid to veterans, we have a reduction in the Veterans' Bureau of $221,000,000. We have a reduction in all other expenses of $121,000,000; making a total of $486,000,000.

If we add to that the probability that we will not receive this money from the foreign countries, then, if we are going to add nothing to the income, it will be necessary to reduce all of these items by 40 per cent instead of 23½ per cent. That means that the Army and Navy will be reduced by $245,000,000, and that the veterans will be reduced by $375,000,000, and that all others will be reduced by $206,000,000, making a total of $826,000,000.

Mr. President, in order that the country may not be disappointed at what the Congress can do—either the present Congress or the incoming Congress—I think it is well for them to know what the actual situation is. I think it is well for them to know, as the Senator from South Carolina [Mr. BYRNES] has pointed out, that before these reductions can be made in appropriations for the veterans, it is necessary for legislation to be had in the Congress; and I am surprised to hear the Senator from South Carolina say that the Members of the Senate on the other side have no voice in this. If the Senators on the other side of the Chamber, whether now or in the past or in the future, will demand that there be a substantial reduction in the appropriations for veterans, they will have at least some response on this side—whether enough to carry it through or not, I am not ready to say—but I say this is the first time it has been suggested in the Senate, so far as I know, that anybody is in a hopeless position when he believed some legislation ought to be had upon some particular subject. He can at least propose it.

I have no doubt the Senator from Maryland, in presenting his resolution had in his mind, the same as the Senator from South Carolina [Mr. BYRNES] had, the promise which the Democratic Party had made to the people of the Nation to reduce governmental expenditures by 25 per cent, by abolishing—this is how they are going to do it—

by abolishing useless commissions and offices, consolidating departments and bureaus, and eliminating extravagance.

The Senator from South Carolina, himself, says that they must be able by that method to reach the great sum of $885,000,000.

I call the Senator's attention to the fact that if he will take the 70 departments of the Government, about which so much has been said, and about which the people of this country have been led to believe great savings can be had, if he will take away from that total of 70, some 8 or 10 departments that he and everybody in the Senate will admit are necessary to remain there in order that the Government may function properly, the total sum expended by the other 60 of those departments in any one year amounts to but $21,000,000; and it is that $21,000,000 that we may be able to save by eliminating all of these various departments, assuming that the whole 60 can be eliminated.

Mr. BYRNES. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Delaware yield to the Senator from South Carolina?

Mr. HASTINGS. I will yield to the Senator; but before the Senator asks me a question let me propound one to him.

He says that it is not possible to do this by congressional action. We have for some 15 or 20 years in the past, he says, been trying to do it, and we have not been able to do it by congressional action, and the only way we will be able to do it is by submitting the question to the Executive, with full authority to act.

I call the Senator's attention to the fact that that is exactly what we have done. We did it in the last Congress, submitted it to the Executive, and he abolished some and made his consolidations, and what happened? A Democratic House, the very first opportunity they had, said it would not do. Then what further happened? We are told we must wait until a new President comes in, and that we must give to that new President, not this little bit of power, but must give to that President more power to abolish, if he wants to, any number of the governmental agencies he sees fit to abolish. That is the kind of an authority the Senator from South Carolina wants to give to the new President. I say that if that new President is entitled to have such authority as that, why is it that the Democratic House could not grant the present President the little bit of authority we attempted to give him?

Mr. BYRNES. Mr. President, I know the Senator from Delaware would not want to misquote me, and I simply wish to say to him that at no time did I say it would be necessary to make a reduction of $800,000,000 by reorganization. On the contrary, I stated that that was the total amount of reductions to be made in the appropriations to accomplish the 25 per cent reduction. The President of the United States, in the Budget submitted to Congress at this session, reduced the estimates below last year's appropriations to the extent of $357,000,000, and since that time the House has made reductions so that it will not be necessary to make reductions by reorganization of $800,000,000.

Inasmuch as the Senator asked me a question, I will answer it, and say that, so far as I am personally concerned, I thought some of the recommendations contained in the message submitted to the Congress by the President of the United States would promote efficiency, but the economy subcommittee of the Committee on Appropriations did not go into a consideration of them, because we were engaged in the preparation of the bill now reported to the Senate. However, the Senator from Delaware I think will agree that the President of the United States has not contended that in the Executive order submitted by him to the Congress there was any provision for the accomplishment of any material reduction of expenditures, and if the Senator from Delaware contends that any provision in that order would accomplish a reduction in expenditures, I would like to have him include in his speech the items which would accomplish that result.

The Director of the Budget told the House committee that he had participated in the drafting of the order, but made no contention that the provisions of that order would accomplish any reduction in expenditures, and expressed the opinion that the order would not do so.

Mr. HASTINGS. Mr. President, I want to say that if in my remarks I gave the impression that I understood the Senator from South Carolina to say that $885,000,000 would be saved by eliminating departments or consolidating departments, I want to correct any such impression. I did not so understand. I was at the time referring to the platform which the Senator from South Carolina read, the Democratic platform, which provides that 25 per cent can be saved by the consolidation and the elimination of departments; and they add one other very broad suggestion, namely, "extravagance." I do not know whether they referred to the appropriations for the veterans, whether they are referring to the amount being expended for the military service, or what they refer to by "extravagance." The obvious intention was that the people of the country who were to pass upon that platform should believe that "extravagance" meant money spent on things that could be accomplished for less money, and without in any sense depriving anybody who was receiving pensions or anything else from the Government anything, and without in any way lessening the governmental activities.

If it be true, as the Senator says, that there were no material savings in the President's Executive order, it is

further proof that the promise made in the Democratic platform upon this subject is absurd.

However, I understand now that the Senator from Maryland desires to withdraw his resolution and proposes the resolution which I hold in my hand, instead; and I want to point out how very emphatic this resolution is and what a great weight it will have upon the country if passed:

Resolved, That it is the declared policy of the Senate that the appropriations in the aggregate shall be reduced at the earliest practicable time to a sum equal to that of the estimated revenue; and that the Committee on Appropriations is instructed to make a survey of all appropriation bills and to make reductions therein wherever possible without impairing the efficiency of essential services and conforming to a policy of strictest economy.

If there is any Senator here who does not agree with that, then I should be greatly surprised. It is meaningless. It is as meaningless, I submit, as it is possible to express anything in seven lines written by anybody. It can hardly be said to emphasize a proposition that is admitted by all.

Mr. ODDIE and Mr. TYDINGS addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Delaware yield; and if so, to whom?

Mr. HASTINGS. I yield first to the Senator from Nevada.

Mr. ODDIE. I think the Senator from Delaware will find, after consulting members of the Committee on Appropriations, that the very thing suggested in the resolution just presented by the Senator from Maryland has been done by the committee.

Mr. TYDINGS. Mr. President, will the Senator yield to me now?

Mr. HASTINGS. I yield.

Mr. TYDINGS. Of course, I recall that the Battle of Hastings was fought not in 1066 but in 1932; but let us leave that angle out of it.

May I say to the Senator from Delaware that I think he will be fair enough to concede that even if we were to reduce the appropriations for emergency officers' retirement, notwithstanding the reduction in appropriations, because the law provides for these payments to emergency officers, the Supreme Court has held that such an officer can sue the Government and recover. The Senator will concede that, will he not?

Mr. HASTINGS. I have not read the decision.

Mr. TYDINGS. That is a fact, whether the Senator concedes it or not.

Mr. HASTINGS. Of course, if the Senator says it is a fact, I will admit it.

Mr. TYDINGS. If the Senator had been present yesterday and had listened to what I said, the Senator would have heard me say that that is one item where economy should be effected.

I can also carry that same philosophy farther, namely, that notwithstanding the reduction in appropriations, if the law provides that a certain individual is to receive a gratuity from the Government, he can get it, even though the appropriation is reduced.

May I say to the Senator in all frankness, if he will amend the resolution I have offered so that it will carry out the purpose which he says he has in mind, he will get not only my vote but my enthusiastic support. Before yielding back to the Senator, may I say that I will be very much surprised if the Senator attempts to amend this ambiguous resolution.

Mr. KEAN. Mr. President, will the Senator yield to me?

Mr. HASTINGS. I yield.

Mr. KEAN. I would like to ask the Senator from Maryland by what authority he thinks anybody can sue the United States without permission of the United States?

Mr. TYDINGS. The Supreme Court of the United States has already passed upon that question, and it has held that, where Congress has passed a law authorizing a pension and the gratuity is withheld on account of lack of appropriations, it is a charge on the Government, and judgment against the Government can be had. Does that answer the Senator?

Mr. KEAN. It can not be collected, however.

Mr. TYDINGS. What kind of a government is it that allows its judgments to go unpaid when they are found in a court of law? Talk about unbalancing the Budget. When, through legal processes devised by Congress a judgment is gotten against the Government, and the Government refuses to pay it, I would like to have the Senator explain what kind of a government that would be.

Mr. KEAN. I thought it was a fundamental principle of law that no subject could sue the sovereign, and I believe it is to-day.

Mr. TYDINGS. Does not the Senator know that we have provided courts all over this land——

Mr. KEAN. Not for the United States to be sued in.

Mr. TYDINGS. What do they do?

Mr. KEAN. One can not sue a State.

Mr. TYDINGS. Of course not.

Mr. KEAN. One can not sue a sovereign.

Mr. TYDINGS. But one can sue the Comptroller General of the United States, or one can sue the Treasurer of the United States, and if he gets a judgment against him, is it not equivalent to getting one against the Government?

Mr. KEAN. No.

Mr. TYDINGS. The Senator is a banker and not a lawyer.

Mr. BARKLEY. Mr. President, will the Senator from Delaware yield to me?

Mr. HASTINGS. I yield.

Mr. BARKLEY. While it is true that the subject, so-called, can not sue the sovereign without the sovereign's consent, it so happens that we have given our consent by general legislation, in the establishment of the Court of Claims here in Washington, and other courts elsewhere, into which any citizen of the United States may go and assert a claim against the Government of the United States. In the veterans' legislation itself we have provided that veterans who are entitled, especially in insurance cases and in many other cases, to remedies not allowed by the Veterans' Bureau they may go into courts and establish their rights.

Mr. HASTINGS. Mr. President, I agree very generally with what the Senator from Maryland says, but having that view as he does have it, it seems all the more remarkable to me that he should have insisted upon this resolution yesterday, and concluded his remarks by saying:

There is a certain place that is paved with good intentions, and I am afraid the country will be in the situation of that place unless we make up our minds to do this here and now.

I got the distinct impression that the Senator from Maryland believed that the only salvation for the country, the only way to reduce these expenses, was through passing his resolution; and I say to him that there were some teeth in that resolution, if one understood what the Senator meant, and I have undertaken to analyze it in order that the people of the country might understand what it meant, by showing what percentages and what amounts it would be necessary to cut in order to make the resolution a practical thing.

Now the Senator comes along with a different kind of a resolution, one which amounts to no more than a bread-and-butter note he sends to his hostess after he has enjoyed a nice dinner—not a thing in the world more than that, as I see it.

Mr. TYDINGS. Mr. President, I am sorry the Senator substitutes for logic and argument so many unnecessary adjectives and nouns. But I may call his attention again to the matter we are debating. How would the Senator amend the resolution so that it might comprise the situation I have just explained?

Mr. HASTINGS. I would not do anything with such a resolution. I would not pass any resolution. If I were as much convinced, and if I knew as well as the Democratic Party knows how these savings can be made, then I would propose the legislation which would carry with it the appropriations or the lack of appropriations. That is what I would do. I do not know how to do it, or I would do it. I am hoping that after the 4th of March I will be able to sit here and learn how it is possible to save this country by doing the thing which the Senator wants to have done by this wishy-washy resolution he proposes.

Mr. TYDINGS. Mr. President, will the Senator yield further?

Mr. HASTINGS. I yield.

Mr. TYDINGS. May I say that the Senator from Utah has introduced a bill, which is not wishy-washy, to accomplish that result, and the Senator's own party has a majority on the committee which has the bill and refuses to consider it and refuses to report it?

Mr. HASTINGS. What is that? Is that the beer bill?

Mr. TYDINGS. I thought the Senator knew.

Mr. HASTINGS. Is it the beer bill?

Mr. TYDINGS. Does the Senator mean to say he does not even know what his own party is refusing to consider?

Mr. HASTINGS. I do not know what the Senator is talking about.

Mr. TYDINGS. It deals with the emergency officers' retirement act.

Mr. HASTINGS. I thought the Senator was talking about the beer bill. He has talked so much about the beer bill, now in the Finance Committee, that I assumed it was the beer bill to which he was referring.

Mr. TYDINGS. If the Senator will yield, may I say I thought he was impelled by beer, rather than talk about the beer bill, so groggy were his statements. [Laughter.]

Mr. VANDENBERG. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Delaware yield to the Senator from Michigan?

Mr. HASTINGS. I yield.

Mr. VANDENBERG. Before the Senator leaves his quotation of the Senator from Maryland referring to the place that is paved with good intentions, let me remind him that there was another reference in the Senator's speech to that same place, as I recall. I am unable to find it in the RECORD this morning, but I find it in the newspapers:

> The only reason we do not do it—
>
> Referring, I suppose, to the passage of the resolution—
>
> is political fear. If I can not vote my own sentiments, then to hell with this job.

I cordially concurred in that statement when made, but it occurs to me that the withdrawal of yesterday's resolution and the substitution of to-day's resolution, particularly in the face of the demonstration submitted by the Senator from Delaware, at least confesses that the Senator from Maryland has changed his mind with respect to the proposition that it is nothing but political fear that is interfering with the objective to which he addressed himself yesterday.

Mr. TYDINGS. Mr. President, will the Senator yield further?

The PRESIDENT pro tempore. Does the Senator from Delaware yield further to the Senator from Maryland?

Mr. HASTINGS. I am anxious to yield the floor, if I get the opportunity.

The PRESIDENT pro tempore. The Senator from Delaware yields the floor. The Senator from Maryland is recognized.

Mr. TYDINGS. Mr. President, I think the Senator from Michigan even by way of jest was impelled more by sentiment than justice evidently to make the remarks he just made. May I say to the Senator from Michigan that I did not become wet after my party got wet, and I did not change my opinion about a whole lot of things. If he will look around, and perhaps in a looking-glass, he will see some who have.

Mr. VANDENBERG. Mr. President, the Senator embraces the usual expedient of one who finds himself unable to extricate himself from a difficult situation. As usual, he recurs to the liquor question as a final recourse. He refers to the fact that I have indicated my willingness to submit to the opinions of the American people as expressed in my own Commonwealth. I have no apology to offer for submitting to any such mandate upon the people.

At the same time the people ordered—I recall very distinctly being reminded yesterday by the Senator from Maryland—that Government expenses shall be reduced. I understand the present discussion relates to the reduction of Government expenses, and I came here this morning prepared to vote for the resolution submitted by the Senator from Maryland in that behalf. I am only submitting that the Senator is now retreating from his own position, in which I had hoped to have an opportunity to vote to sustain him.

Mr. TYDINGS. Mr. President, the Senator is ready to charge others with shortcomings which his own apparent conduct makes it unnecessary for others to charge to him. May I say to the Senator from Michigan that neither he nor any other man in this body need have any fear, because if this body will vote as courageously as the Senator from Maryland will vote for governmental economy we will have plenty of money to pay our bills.

Mr. VANDENBERG. I want to concur in that judgment of the Senator from Maryland with respect to my own opinion of him. I only regret that he seems to have cast a shadow upon his record by the performance of the last 24 hours.

Mr. TYDINGS. Mr. President, the Senator from Michigan really has a lot of good qualities after all. [Laughter.]

Mr. BINGHAM. Mr. President, out of justice to the Senator from Maryland [Mr. TYDINGS] and in view of the comment of the Senator from Michigan to the effect that he could not find in the RECORD the remark of the Senator from Maryland, I think it only fair to point out to the Senator from Michigan that on page 2592 I find the sentiment of the Senator from Maryland where he said that he does not want the job if he has to do it that way, and then went on to say:

> If we can not vote reasonably our own sentiments here, then who wants the position?

[Laughter.]

Mr. ROBINSON of Arkansas. Mr. President, an unusual issue has arisen in the Senate. I can not recall an instance previous to the present one when a Senator who made a motion to recommit a bill with instructions was denied the privilege of withdrawing it. Under the rule of the Senate he has that privilege until the yeas and nays are ordered. After that it requires consent of the Senate.

I made some remarks yesterday afternoon which I am not going to repeat now, but whatever may be the temporary personal or political advantages or disadvantages arising out of the existing situation, the fact remains that there are conditions which call for concert of action on the part of all who are interested in the cause of successful government. I know we play politics whenever we choose to do so. I do not censure any other Senator for doing that, because I myself indulge in the great American game whenever I find it advantageous to do so.

Mr. President, we have this situation: A Chief Executive who is the leader of one political organization; a House of Representatives which by a narrow margin is composed of a majority of an opposing political organization, and a Senate which has a majority of the same party which the Executive represents. It is always necessary under such conditions to compose differences in order that advances may be made. There are a number of Senators on the other side of the Chamber who are listening to me intently now, and whom I could name in person, who have pursued a course which I believe is founded on proper conceptions of our Government. There are others who indulge in the game of politics at a time when no such game ought to be played. I realize that a retort can be made, as I said in the beginning, that that is often a favorite game with me.

The Senator from Maryland [Mr. TYDINGS] has presented a resolution which is reflective of the sentiment of four-fifths of the people of the United States. They who are having their farms and their homes sold for taxes, they who have no business or occupation out of which to make a profit, find great difficulty in understanding why one branch of the legislative department fritters away its time in the discussion of relatively unimportant matters, in the discussion of questions not before it, in the debate of issues which it has no power to determine. The people are in my judgment insisting that we should get down to business and transact it as promptly and efficiently as possible.

I said a moment ago that I could not recall an instance in which a Senator who had made a motion had been denied the privilege of withdrawing the motion in order to make final action conform to the considerate judgment of himself and his associates. Fortunately, under the rules of the Senate the Senate is not dependent upon the caprice of one Senator for the decision of a question of that character. The Senate has the right to determine the question. The Senator from Maryland has stated or indicated that it is his purpose to bring forward Senate Resolution 327 and to amend it so as to substitute the language of the resolution which he offered this morning or sought to offer as a substitute for the previous resolution.

Senators have said that the pending resolution is impossible of accomplishment. I myself yesterday indicated to the Senate the opinion or implied the opinion that changes in the laws which the Congress has enacted will be necessary before reductions in Federal expenditures may be consistently made in accordance with the standard proposed in the resolution of the Senator from Maryland. But I challenge Senators to object to the principle of the resolution. It contemplates what any successful business man attempts to do in his private affairs. It contemplates a reorganization of governmental agencies, a reduction of their costs to a standard that will establish just and reasonable proportions between revenues and Government expenses.

We have this situation, Senators, which we must not forget, no matter what our political attitude may be. Revenues are constantly diminishing, because prices are falling, business is not active, earnings are approaching a minimum. It is necessary and desirable to cut off from appropriation bills every dollar that can be saved without impairing the essential services of the Government. I know that in working out the details there is infinite difficulty, and I do not claim any special knowledge applicable to the accomplishment of that end; but surely we are all agreed in a desire to accomplish the general purpose.

The Senator from Maryland has proposed, as a substitute for Senate Resolution 327, a declaration of policy on the part of the Senate that appropriations "shall be reduced at the earliest practicable time to a sum equal to that of the estimated revenues." One Senator at least has ridiculed that declaration of policy, but it is sound in every feature. He has declared that everyone is in accord with that policy. I wonder if that is true? I wonder if this great body recognizes the necessity of bringing about, as speedily as may be without disrupting necessary Government agencies or discontinuing primarily essential Government services, such a relationship between the revenues and the expenditures as will sustain the credit of our Nation and the honor of its authorized officials.

I realized yesterday, and I realize now, that it is practically difficult, so difficult as to cause us to hesitate, to carry out immediately the purposes of the motion of the Senator from Maryland, but no Senator here as yet has expressed himself in opposition to that purpose. The further provisions of the substitute resolution are:

> That the Committee on Appropriations is instructed to make a survey of all appropriation bills and to make reductions therein wherever possible without impairing the efficiency of essential services and conforming to a policy of strictest economy.

It is true that the language is general; it is true that it does not incorporate specific reductions in appropriations; but, if it be agreed to, and be loyally carried out, it will result in great good to the public.

Mr. President, never before in 20 years' service have I known of an instance where the maker of a motion has been denied the privilege of withdrawing it in order that other proposals may be made to conform to the views of himself and of his associates, and it is necessary to test the sense of the Senate on the subject. I felt yesterday and I feel now that it would be unfortunate to recommit this bill to the Committee on Appropriations. I do not want those who are going out of authority here to leave on the incoming administration the burden of making appropriations at an extraordinary session for the expenses of the Government as well as the burden of enacting legislation necessary to reestablish normal conditions, or approximately normal conditions, in this country; and I do not think that the Senate ought to insist upon prolonging this debate, in order that it might embarrass some Senator who is discharging his duty with ability and with courage, by insisting upon a vote upon his resolution.

For that reason, Mr. President, I move that the Senator from Maryland be permitted to withdraw the pending motion, the understanding being that he will call up Senate Resolution 327 at the earliest opportunity and seek to amend it in the manner which has been indicated by the resolution that he read into the RECORD this morning. If Senators wish further to fritter away the time of the Senate in debating the question as to whether he shall have the opportunity to do that, they are at liberty to do so; but I wish to see every reasonable and possible reduction made in the appropriation bills. I hope that amendments will be offered, some of which, I am sure, will be founded in honesty and in the interest of good government, reducing the appropriations in the pending bill, fought out on this floor, and the principle of conforming expenditures approximately to revenues adopted. It is for the reasons stated that I move that the Senator from Maryland be permitted to withdraw the pending motion.

The VICE PRESIDENT. The question is on the motion of the Senator from Arkansas.

Mr. McNARY obtained the floor.

Mr. ODDIE. Mr. President——

Mr. TYDINGS. Mr. President, will the Senator from Oregon yield? I will say to him that I shall be grateful if he will yield. I have been put in the position of offering a substitute resolution with no time at all to explain my position except in the time of other Senators. I shall only occupy five minutes.

Mr. McNARY. I should be very glad to accommodate the Senator, but the Senator from Nevada [Mr. ODDIE] first asked me to yield, and I now yield to him. I shall yield to the Senator from Maryland a little later.

Mr. TYDINGS. Will the Senator from Nevada yield to me?

Mr. ODDIE. I shall yield to the Senator from Maryland in just a moment. I should like first to make a few remarks on the resolution because I feel that in a way—I know not intentionally—the Committee on Appropriations has been reflected on by the resolution which the Senator from Maryland seeks to substitute for his first resolution.

Mr. President, the Committee on Appropriations has worked diligently on this bill. It has gone over the items carefully. It has had before it the heads of the various bureaus of the Government involved. It has questioned them at length, and it has arrived at the figures in this bill, not without debate and not without difference of opinion among the members of the committee on both sides. There are some very grave problems incident to this bill, a few of which were discussed yesterday at length in the Senate, those, for instance, relating to contracts for the air mail and for the transportation of ocean mail. Some of the Members, including myself, believe that to eliminate or materially reduce the amounts appropriated for those purposes will have a very damaging effect on the industries and on the people of our country. We believe that cutting out the appropriations for the ocean mail contracts will result in shutting down our American merchant marine and tying the ships up to the docks indefinitely; and we believe that eliminating appropriations for the air mail contracts will do away with a great activity which is performing a splendid service for the people and which the people want continued.

There are members of the committee, and those outside the committee, who believe that material reductions can be made in salaries of Government officials. I for one believe that that is the wrong way to obtain efficient economy. I believe if we cut wages and salaries further, as has been proposed and which will be effectuated if certain proposals before us shall be adopted, that the American standard of

living will be lowered, that the wheels of industry will be slowed down further than they are to-day. Mr. President, we can not afford to do a thing of that kind. Should we take such action I believe that industry will suffer and that a return to normal conditions will be seriously delayed.

I can say, from a knowledge of what has gone on in the Appropriations Committee—especially regarding the bill before us of which I have charge—that the committee has worked earnestly, and after studying the various items carefully has arrived at the figures contained in the bill. I do not feel that the bill should go back to the committee. I think the Members of the Senate are competent to handle these problems as they come before them. Every Member of the Senate will have ample opportunity to offer amendments to each one of the provisions of the bill, and these amendments will be given adequate consideration. I feel that it will be a waste of time and that it will be a blow at the efficiency of our Government if we send this bill back to the committee.

Mr. President, I feel, furthermore, that we are attacking this problem in the wrong way. I feel that instead of tearing down the foundation of our Government we should start to build up the structure. It is very largely a question of psychology. I think we should instill a little enthusiasm and optimism in the minds of the American people and help in that way to start the wheels of industry going, rather than to throw monkey wrenches into the machinery, as we are doing to-day by advocating these unwise, uneconomic, and damaging cuts in these necessary appropriations.

Mr. President, we are all earnest in this matter; we want to arrive at the best and wisest conclusion; we want this bill to go through in good form in order that our Government will function properly. I feel that if we send the measure back to the committee it will be doing a grave wrong to the industries and the people of the country.

Mr. TYDINGS. Mr. President, I shall be very brief. I offered the resolution yesterday in good faith. I believe it is the proper thing to do to restore confidence in the country. I also believe the country is tax conscious and that one of the surest ways to restore prosperity is to reduce the burden of taxation wherever possible.

When the Democratic conference assembled to-day I was very much gratified to find that practically everyone there was not only in sympathy with the letter of the resolution but with the spirit. Some who have given a great deal of thought to the matter immediately arose there and pointed out that there were several impediments to accomplishing the object sought to be attained by the resolution. It was pointed out that, in some instances, even though we should reduce appropriations for a particular purpose, such a reduction would not withhold the money from the Treasury, because an individual who had been given the right to a gratuity or compensation or an allowance by legislative act could immediately enter suit in the Court of Claims, and, under a recent ruling of the Supreme Court of the United States, would be entitled to get judgment for his money, anyway. I did not want to be in a position of cutting down appropriations and telling the people of America we had effected economies when, as a matter of fact, if existing legislation provided for the payment of money for which we had not appropriated, no economy would be realized.

Faced with the practical realities of the situation, there was only one thing to do, embarrassing personally as that action was to me, and that was to reword the resolution so that it would accomplish as much as the actual legal circumstances in the case would permit of accomplishment. For that reason, after some discussion there, I consented to the substitute in the hope that it would accomplish all that could be accomplished until Congress makes up its mind to revise some of the legislative acts for the appropriation of money which are now upon the statute books.

It was also pointed out that less than six weeks of the Congress remain; that no appropriation bills whatsoever have passed this body; that to those bills we must give hours and days of thought and time to see where further economies may be effected when they actually come before the Senate. We have 10 or 11 appropriation bills to consider, with less than six weeks in which to consider them. That means that we must consider about one and a half appropriation bills each week from now until the 4th of March, and none of them could be considered under this resolution until the Committee on Appropriations had made a survey of the whole field. I, therefore, thought that it would be unwise, in the face of the actual facts, to insist upon the resolution as originally drawn. However, Mr. President, I want to leave no misunderstanding in the mind of anybody that I shall by every reasonable vote I can cast in this Chamber attempt to carry out the purposes projected by the resolution submitted by me yesterday.

There may be those on the other side who, because I have frankly and willingly admitted that the resolution, perhaps, was drawn a little too hastily, want to make some sport of it. My answer to those on the other side who fall back on that line of trenches is that it is regrettable that they, themselves, did not draw a better one. So far as I have seen in this session, it is the only resolution anybody has offered to reduce the burdens of taxation upon the American people.

Mr. FESS. Mr. President——

The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from Ohio?

Mr. TYDINGS. I yield to the Senator from Ohio.

Mr. FESS. I can not speak for anyone except myself on this side; but when the Senator offered the resolution, coming as it did from the other side of the Chamber, and I realizing that it was an effort to keep a pledge made both in the platform and in the campaign—one that I think it is going to be very difficult, under the circumstances, to keep—I thought it was a source of great embarrassment to everybody for us, believing that we can not under the present situation without legislation reduce the expenditures a billion dollars; that it would give the Senator a chance to say, "Well, we tried to get the Republicans to do it, but they would not do it, and for that reason we are having these heavy expenditures." I was rather inclined to vote to recommit the bill on that basis, so as not to handicap the Senator's party in the solution of a problem that is going to be very difficult.

That was not political, because it comes from the Senator's side. I do not know how others feel, but I know that a few of us who have talked about the matter were ready to vote to recommit the bill. If we can eliminate the feature of it which would permit the charge to be made against the Republicans that we have not done what we could have done, I would very readily vote to permit the withdrawal of the resolution; but the Senator understands the situation with me.

Mr. TYDINGS. I thank the Senator for his observation; and may I say, so far as I am concerned, that I offered the resolution without any political thought at all and in the utmost good faith? The Senator from Ohio, I know, recalls, as others do, that I pointed out yesterday where in my judgment economies could be effected in the appropriations for emergency officers and others without doing any injustice to any emergency officer who was really disabled, or to veterans, or to retired Army and Navy officers——

Mr. FESS. Mr. President——

Mr. TYDINGS. Let me finish the sentence; but that we can not effect those economies merely through reducing the appropriations, because the legislation provides that certain amounts shall be paid to these people, and if we do not appropriate the money they simply get a judgment against the Government in the Court of Claims which we are in honor bound to pay.

Mr. FESS. That was the question I wanted to ask the Senator.

Mr. TYDINGS. That point was not raised in the debate yesterday. If some one had risen on this floor and pointed out that situation then, much that has gone on this morning never would have occurred, because I would have acquiesced in the suggestion to amend the resolution so as to provide the maximum amount of tax reduction which the legislative circumstances would permit.

Mr. President, I feel that this explanation acquits me of any desire to want to surrender my position one whit, but that those who are fair enough to view the facts must realize that there was little or no alternative except to offer the amended resolution which I have sent to the desk.

Mr. KEAN. Mr. President, we all know that there are thousands of people out of work. We all know that almost every business in the United States is running "in the red," and that many of them are simply keeping on their employees in the hope of better times.

Four-fifths of the people, as has been said, voted that this promised reduction in the expense of the Government should be made. I was glad when I saw this resolution offered by the distinguished Senator from Maryland [Mr. TYDINGS] yesterday, because it gave some hope to the American people that Congress really was going to make the necessary reductions in the expenses of the Government to meet the revenue which they receive.

Mr. COPELAND. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from New Jersey yield to the Senator from New York?

Mr. KEAN. I yield.

Mr. COPELAND. The Senator has in mind, I am sure, the fact that, eager as the Appropriations Committee is to effect economies, it is limited always by the laws upon the statute books. Consequently, we can not hope for these economies until Congress itself has changed many of the laws. That was pointed out so well this morning in our discussion.

Take, for instance, the ocean mail contracts: They are contracts already made. They can not be violated by our Government. Those contracts were made in accordance with law. Those laws must be changed if we are to avoid making such contracts in the future. Of course, these particular contracts would still be in effect even if the laws were changed; but there are many laws which the Senator from Maryland has pointed out which are here, and until Congress has the courage to change them we can not hope to effect these great economies.

I agree with the Senator that the economies should be effected. We must do everything possible to bring them about; but until we have action by the Congress itself, we can not hope to do the thing which is so desirable and so necessary.

Mr. KEAN. Mr. President, I will say that the Senator from Maryland is a member of this committee, that he stated here on the floor yesterday that these changes might be brought about, and that I was glad when I saw this resolution.

I have voted in this body, whether it was proposed by a Democrat or from this side of the Chamber, for almost every reduction in every appropriation that has been brought up. I think I supported almost every motion of the Senator from Tennessee [Mr. MCKELLAR] last year to reduce appropriations, one after another. I have stood for that right straight through, and I appreciate that reductions should and could be made.

We hear something about maintaining the standard of living of the American people. How can we maintain the standard of living of the American people when they can not get bread? How can we maintain the standard of living when they can not get any living? What we ought to do is to go through this bill and cut it, and we ought to cut the same way that the manufacturer has cut, the same way that the business man has cut. He has put in the knife and he has cut until he is getting down to the point where it makes no difference what his income is; his expenses are going to be somewhere near his income.

That is the reason why I object to the withdrawal of this motion, because I want to vote for it. I want to see it carried through, and I want to save this money to the taxpayers of the United States if I possibly can.

Mr. HALE. Mr. President, the Tydings resolution introduced yesterday, and the substitute resolution this morning introduced, provide for bringing down the appropriations of the Government to the amount of the estimated revenues.

The figures that have been given in debate refer not to appropriations but to expenditures; and, as the President explained in his Budget message, the two are not the same. In the expenditures for the year have to be taken into consideration carry-over appropriations from previous years, as not all of the appropriations that are made for one year are spent during that year.

The corrected figures as applied to these resolutions would be as follows:

The amount of the estimates for 1934 was $4,403,178,032. Recently a document has come up from the Budget calling attention to the fact that this should have been reduced $23,248,200, bringing the amount of the estimates for appropriations up to $4,379,929,832. If we take out of that the public-debt retirement of $534,070,321, we have left $3,845,859,511. Then if we deduct the postal revenues of $625,000,000, we have left $3,220,859,511. If we deduct from that the cuts that have been made by the House of $53,722,779.60, we shall have left $3,167,136,731.40; and if we deduct from that the estimated revenues of the Government, which are $2,949,100,000, a balance will be left of $218,036,731.40, which represents the amount of the suggested cut.

This, of course, does not take into consideration the President's statement that the estimated revenues of the Government would have to be cut down this year from one to three hundred million dollars; and if we take as a mean average $200,000,000—and it quite probably will be more—we shall have an appropriation deficit of $418,000,000.

Mr. President, the purpose of this resolution is clear. If it means anything, it means that the Senate is to go on record as in favor of cutting down the appropriations to the estimated revenues; and when I say "the estimated revenues" we will have, of course, to add to the $2,900,000,000 the post office revenues. Otherwise if the appropriations are cut down to the $2,900,000,000 and later on the estimated postal revenues of $625,000,000 should be received, we would have a $625,000,000 surplus of revenue over appropriations, and nobody asks that.

If it is the purpose of the Senate to make these cuts—I do not believe it can practicably be done—I explained yesterday that the cuts if made will have to be made on a very small portion of the appropriations. I have taken the matter up with the Director of the Budget, and have asked him to send me a statement showing exactly what appropriations could be cut under existing laws and contract obligations. If, however, the Senate wants to make the reduction, it will undoubtedly do so.

Mr. MCKELLAR. Mr. President, will the Senator yield?

Mr. HALE. I yield.

Mr. MCKELLAR. What reduction is the Senator speaking of now?

Mr. HALE. The reduction in the appropriations of the amount by which the proposed appropriations exceed the revenues.

Mr. BYRNES. Mr. President, will the Senator yield?

Mr. HALE. Yes.

Mr. BYRNES. A motion is pending to enable the Senator from Maryland to withdraw the motion to recommit.

Mr. HALE. I understand.

Mr. BYRNES. The Senator is not in favor of recommitting this bill to the Appropriations Committee, is he?

Mr. HALE. I want to make it plain, Mr. President, that if the Senate is going to take the action contemplated in the resolution on the floor, and is going simply to butcher these bills by voting for amendments that come along that have not been considered in committee, and on which the judgment of the committee has not been exercised at all, I think we would do very much better to send the bill back to the committee.

I am not suggesting this for purposes of delay. I expressed myself yesterday in favor of getting through with the appropriation bills, and I called on the Republicans of the Senate to back me up in getting action on those bills.

Mr. BYRNES. Does not the Senator think it would be best to settle the pending question first, and then take up the other matter?

Mr. HALE. No; this is one of the most important bills; and if we go ahead and butcher this bill, it seems to me we can not have any comprehensive plan that will be intelligent. All of the appropriation bills will have to be considered if what is proposed in the resolution is to be done.

Mr. KING. Mr. President, will the Senator yield to me?

Mr. HALE. I yield.

Mr. KING. As I understand the Senator's position, it is this, that there shall be an interdiction upon Members of the Senate from offering amendments to modify or reduce appropriations in the pending or any subsequent bill reported by the Committee on Appropriations.

Mr. HALE. No; not at all.

Mr. KING. And that if the Senate should adopt amendments, it would so butcher and mutilate the bill that it would be better to recommit it to the Committee on Appropriations, and have no amendments whatever made upon the floor of the Senate.

Mr. HALE. No; Mr. President, we can not prevent amendments on the floor, and I would not desire to do so; but if we go ahead with this bill now, and go ahead with the expressed, avowed purpose of the Senate to cut it down, I am afraid that every amendment offered that looks toward a reduction will receive support and will go through. I do not think we can intelligently go into the matter.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield to me?

Mr. HALE. I yield.

Mr. ROBINSON of Arkansas. The Senate can not pass upon an amendment in a general way. An amendment would have to be presented before the Senator himself would know whether he favored it or not. The Senator believes in economy, does he not?

Mr. HALE. Certainly I believe in economy, but I believe in reaching it intelligently.

Mr. ROBINSON of Arkansas. If an amendment would save a substantial sum the Senator would support it, even though the committee did not report it?

Mr. HALE. If it were reasonable; but I would want to have it shown to me that it was reasonable.

Mr. ROBINSON of Arkansas. Why does not the Senator let the issue come, since it has to come, and let us dispose of the amendments as they are presented?

Mr. HALE. Were the resolution adopted, I do not think there would be sufficient consideration of amendments that would be offered. I think there would be little committee support against any such amendments which reduced the appropriations without any consideration.

Mr. ROBINSON of Arkansas. Of what amendment is the Senator afraid there will be no consideration?

Mr. HALE. I can not tell what amendments will be offered. I imagine there will be a good many.

Mr. ROBINSON of Arkansas. That was just my suggestion——

Mr. HALE. If the Senate went on record as favoring this extreme economy, I am afraid Senators would vote in favor of almost every amendment that was offered.

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. HALE. I yield for a question.

Mr. McKELLAR. The Senator knows that there are several amendments that were offered by me in the committee, and which will be offered on the floor of the Senate, all of them having the effect of reducing the appropriations carried in the bill.

Mr. HALE. I know that. I was not referring to the Senator's amendments; but any Senator could propose amendments, and, without any committee support back of the bill as reported by the committee, I am afraid that we would simply go wild.

Mr. KING. Mr. President, will the Senator yield to me?

Mr. HALE. I yield.

Mr. KING. Does not the Senator feel that he is placing himself, as well as the Committee on Appropriations, in a position which neither he nor they would like to assume, namely, that they are so infallible that it would be better to have bills referred back and let the committee consider proposed amendments than permit Senators to offer amendments upon the floor of the Senate and have them discussed and debated here?

Mr. HALE. Mr. President, I do not think we are infallible at all; but I think our duties as a committee are to consider the bills that are referred to us and consider all questions that have to do with the bills, including general instructions to cut down, and I think we have done our duty in the committee. Of course, we are not infallible, but at least I think we ought to have opportunity to pronounce judgment on the carrying out of such instructions.

Mr. ROBINSON of Indiana obtained the floor.

Mr. McNARY. Mr. President, will the Senator yield to me to make a short statement?

Mr. ROBINSON of Indiana. I am glad to yield to the Senator.

Mr. McNARY. Mr. President, I appreciate the courtesy of my very sincere and able friend from Indiana.

I have no partisan feeling in the matter now before the Senate. Anyone who listened to the reading of the resolution offered yesterday by the Senator from Maryland might well have known that this situation later would arise. The surprising thing to me is that even Members of the Senate would amass themselves in sufficient number to authorize a roll call upon a proposition so impracticable.

It is perfectly absurd to offer on the floor of the Senate a motion which is unapproachable in fact. The amount of money proposed that might be appropriated would fly directly in the face of statutory obligations, and apparently could not be met. It was quite proper that the Democratic caucus this morning saw the situation and came in with a substitute. I think they have acted wisely.

I am in accord with the position taken by the eminent chairman of the Committee on Appropriations, namely, if the Senate is to operate on the pending bill by reducing the appropriations to figures which it would be impossible to justify, that would better be done in the committee rather than on the floor of the Senate.

The Committee on Appropriations has worked assiduously on the bill. It has taken a bill that was authorized by the Director of the Budget, approved by the President of the United States, approved by the House Committee on Appropriations, also confirmed and approved and voted as an appropriation bill by the House of Representatives, and later on authorized and reported to the Senate by the capable Committee on Appropriations.

Mr. President, for my part I am going to stand upon the judgment of the Committee on Appropriations. I am willing to vote to withdraw the proposal made by the Senator from Maryland, provided there is no intention of operating upon the bill here in the Senate and fashioning it in an impracticable way. Unless I have that assurance, I shall not vote to permit the resolution to be withdrawn.

If the amounts carried in the bill are to be reduced substantially, and if it is the purpose of the Democrats to move to reduce them beyond the possibility of attainment, I think the bill should go back to the committee and let the committee work upon the proposal.

I am curious to know—and I direct this inquiry to the able Senator from Arkansas, the leader on the Democratic side—whether, if his motion to withdraw the proposal made by the Senator from Maryland is carried, it is his intention then to submit the substitute?

Mr. ROBINSON of Arkansas. Mr. President, the Senator well understands, as I explained to him, that the substitute can not be submitted except by unanimous consent. The motion now pending is a motion to permit the Senator from Maryland to withdraw his resolution, but I am advised that no motion to recommit is to be made at this juncture.

The Senator may understand, as I have tried to explain to him privately, that the Senator from Maryland at the earliest opportunity is expected to call up his resolution, No. 327, and seek to amend it in conformity with the resolution that has been read into the RECORD this morning.

My thought is that we should go ahead with the appropriation bill and discuss amendments as they are presented and vote on them. It would not be possible to agree not to amend the bill. Senators have indicated their purpose to offer amendments, and it is well understood by members of the Committee on Appropriations that such amendments will be offered. Each amendment is expected to stand on its merits and be decided by the Senate.

If the Senate wishes to recommit the bill in spite of the fact that the Senator from Maryland has asked to withdraw his resolution and I have moved to permit him to take that course, it is entirely at liberty to do so. But we will not pledge ourselves to vote for appropriations in this bill, some of which involve scandals, as we believe there exists evidence to sustain. We will vote on the merits of these amendments, and Senators who are unwilling to take that course must pursue their own course.

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. McNARY. I yield.

Mr. McKELLAR. Some of the amendments I have proposed to this bill were actually voted on in the committee, and I gave notice at the time, when they were voted down and out, that I would offer them on the floor of the Senate, and I can not make an agreement not to do so, under any such circumstances as that.

Mr. McNARY. Mr. President, so far as I know, no one has asked the Senator from Tennessee to make any formal agreement, or has asked the Senator from Arkansas not to offer any amendments. That does not bother me at all. I simply want to know—and I have the assurance of the leader on the Democratic side—that if this resolution is withdrawn it will not be followed up by the one which has been proposed to-day.

Mr. ROBINSON of Arkansas. Mr. President——

Mr. McNARY. I said that I was happy to have that assurance.

Mr. ROBINSON of Arkansas. Mr. President, the Senator must not misunderstand me.

Mr. McNARY. I do not misunderstand the Senator.

Mr. ROBINSON of Arkansas. The pending motion is the motion to recommit with instructions. The resolution which the Senator from Maryland has offered as a substitute for Resolution 327 is an independent proposition. It can not be considered except by unanimous consent or upon motion. If the Senator from Maryland found it necessary to move to proceed to the consideration of his resolution, he would be at liberty to do so at any time, and I will not preclude him from it. The resolution is not offered as an amendment to the pending bill. It is offered as a declaration of policy to govern the Committee on Appropriations with respect to all of its deliberations. The pending motion is the motion to recommit, and it is that motion the Senator asks permission to withdraw, and his request was objected to. My motion if carried would leave him at liberty to withdraw his resolution.

Mr. McNARY. Mr. President, the Senator has made himself clear on that point. I have no illusions about the situation. I am willing to go forward and take up the pending bill and pass it on its merits, and meet every amendment as it is offered, but if we are to have an understanding of some kind that this bill shall be cut down beyond the limits to which it is possible and practicable to go, then I say that it ought to be referred to the committee, which has been the purpose of my remarks.

Mr. ROBINSON of Arkansas. Mr. President, in order that there may be no misunderstanding about it, I do not agree to any limitation whatever upon the right to amend the bill. The Senate will amend this bill just as it would any other appropriation bill.

Mr. McNARY. Mr. President, I am not asking any pledge from the Senator from Arkansas. I am saying that if we are to take up this bill and in the usual manner propose amendments and bring it to a conclusion by a vote, I am for that policy. If we are going to carve it up here on the floor, that being the understanding amongst some, we had better have the work done in the committee.

The resolution, as it reads, if it means anything, means that we are to do the amending on the floor of the Senate, and I am suggesting that I am willing to operate along this line, to vote to withdraw the resolution offered by the Senator from Maryland [Mr. TYDINGS], then take up the bill and go forward with it and meet every amendment as it is offered. If that be the policy, I think we may have assurance that we will get along and work out a very good measure.

FOREIGN DEBTS

Mr. ROBINSON of Indiana. Mr. President, the American people have given an exhibition of patience during the past three years that I think is unrivaled among the nations of the world in all the history of the earth. They have been sorely tried. They have been heavily burdened. They naturally have been very unhappy and very much discontented. There has been slow starvation, malnutrition. They have gotten to the point now where their lot is almost unbearable. Throughout the world other countries have revolted against organized government during these three years. If my memory serves me correctly, 17 nations of the earth—no fewer than that—have changed their form of government, more or less violently. This has occurred during the past three years of world depression. But the American people have gone on patiently standing for law and order, and I think nothing quite so fine and patriotic as that has ever been seen in all the recorded history of time.

But I am wondering how much further we ought to tax the patience of the people. I am wondering if we dare forfeit completely the confidence of the American people in those chosen to operate their Government. I am wondering how far we dare go in flaunting the American people. Promises are made by public men and public women, too, and then apparently pledges are entirely forgotten. They go unfulfilled. Aye, to the other extreme too often we go, and do the opposite from that which was pledged would be done.

I am thinking now of the foreign debts. I am thinking also of economy. I know the people of the country want economy practiced in the Government. That is true. I also know that it is not economy to transfer $11,000,000,000 of debts due the people of this country back onto their already-overburdened shoulders.

Mr. President, I know further that practically everybody in public life has gone up and down the country pledging the American people there would be no revision, to say nothing of cancellation, of the foreign debts. Because Members of this body and Members of the House at the other end of the Capitol knew the temper of the people, knew positively how the people felt about it, a joint resolution was passed unanimously, as I remember, to the effect that not only would there be no cancellation of the debts, but there would be no revision. That resolution stands to-day as the considered judgment of the Congress of the United States. So far as I know, no one has attempted to change that considered judgment. No representations have been made to the Congress that I know of with reference to any change. Therefore, the President elect of this Republic must know that is the considered judgment of the Congress of the United States, and therefore of the American people. Accordingly, what right has he forsooth to enter into negotiations with other governments looking to the doing of the very thing this resolution forbids?

Does anyone in this body know anything about rumored negotiations except what he reads in the newspapers? Has any message come to the Senate or the House from anyone in executive authority asking whether the Congress has changed its mind on this question? Does anyone in this body know or does anyone in the House of Representatives know whether or not these debtor nations have made representations to this Government as to any further conference with reference to revision or cancellation? I venture to say,

Mr. President, that not a Member of this body knows anything about it except what he has read in the newspapers. I say the situation is unusual to say the least.

Mr. President, I began by saying that I wonder how much longer the American people's patience will last with this Congress or anybody in authority, executive, legislative, or judicial, when their wishes are flaunted right and left.

I think this is a fair statement. There is not a Member of this body, with possibly one exception—there may be others, and I think the one exception probably altered his position but recently, if there be an exception at all—not a Member but has assured his constituents time and again ever since the resolution was adopted that there would be no change in policy; that the United States would not cancel the indebtedness; that it would not agree to any review of the indebtedness; that it would agree to no reduction of the indebtedness.

I have heard of some strange doctrines to the effect that we might trade the indebtedness—God save the mark!—to our debtors for some kind of an agreement they might make with us. That is a will-o'-the-wisp proposition which no man in this body can put in concrete form so it can be understood by the American people, so they may know what kind of a quid pro quo he expects to get. One proposal to bring Great Britain back on the gold standard is exploded by the Baltimore Sun, which says frankly it is deceptive. "Deceptive" is the word used. I think it is high time we should discontinue deceiving the American people. Some one is going to be held to account for it, possibly all those connected with the Government, unless there is more good faith exhibited to the people of the Republic.

The people have been patient, I repeat, these three years while other nations have tottered and fallen and gone the way of all flesh. We have seen them die, never to return to their pristine glory; but this Republic, due to the patience of its great people and their marvelous patriotism, has endured, though suffering hardships as no nation ever felt before. And now, a campaign scarcely over, ended last November, and here is this additional attempt to flaunt them again, to deceive them absolutely after we have all promised them there would be no deception, that the views of the Government would not change, that we should continue to stand for the policy adopted a scant year ago.

I wonder how the American people feel about these things? This morning I picked up the Washington Herald. Let me read from it. I am thinking of policy in its broadest sense. I am thinking of a patient people. I am thinking it is high time to keep faith with the people. Listen! Here is the headline, and then I quote briefly from the story:

BRITISH ENVOY CAUSES STIR BY VISIT TO FLOOR OF SENATE—LINDSAY GUEST OF SENATOR ROBINSON OF ARKANSAS—CALL IS "SOCIAL"—MEMBER OF PARTY ADMITS TALK OF SLASH

Europe's drive to cancel war debts and saddle the load onto the backs of the American people yesterday apparently was carried into the Halls of Congress.

Escorted by Senator ROBINSON of Arkansas, Democratic leader, Sir Ronald Lindsay, British ambassador, appeared on the Senate floor, in violation of Senate rules, and held discussions with numerous Senators. The rules, ordinarily strictly observed, do not extend the floor privilege to foreign ambassadors.

ROBINSON'S GUEST

The Marquis of Lothian, member of the British House of Lords, accompanied Lindsay. They had been ROBINSON'S luncheon guests at the Capitol. As a member of a foreign parliament, the marquis was entitled to the floor privileges.

The British ambassador sat for a time in the chair of Senator TYDINGS (D.), of Maryland, while the latter was addressing the Senate.

Mr. ROBINSON of Arkansas. Mr. President——

The PRESIDING OFFICER (Mr. WALSH of Massachusetts in the chair). Does the Senator from Indiana yield to the Senator from Arkansas?

Mr. ROBINSON of Indiana. Then is given a list of the guests at the luncheon. I have no objection to any social function or any luncheon that might be given by any Member of this body. But I submit that a foreign ambassador, and especially one interested in what is being discussed, has no right on the floor of the Senate. Everybody knows his chief interest is to find some way or other to have this Government cancel or reduce the indebtedness of his country to the American people.

I submit in the same breath that there are thousands of Americans who also are indebted, who can not pay their debts, who desire debt cancellation or revision or reduction applied to their own obligations; but let one of them attempt to get on the floor of the Senate and state his grievances and see how far he is permitted to go.

Mr. ROBINSON of Arkansas. Mr. President——

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from Arkansas?

Mr. ROBINSON of Indiana. If the situation were reversed and this were England and we were in England's position and our American ambassador entered upon the floor of the House of Commons, how long does anyone suppose they would permit him to remain there before he was ejected?

Mr. President, let any Senator or any Member of the body at the other end of the Capitol attempt to go on the floor of the House of Commons and see how far he gets. It is not permitted there. Aye, the Englishman dearly loves a lord, but Americans worship a lord apparently—worship him!—and so we let them come on the floor of the Senate, rule or no rule.

I yield now to the Senator from Arkansas, although he refused to yield to me a day or two ago.

Mr. ROBINSON of Arkansas. I thank the Senator from Indiana. The British ambassador, Sir Ronald Lindsay, was invited onto the floor by myself. That was my mistake. I did not refresh my memory as to the rules. I was under the impression that foreign ambassadors were entitled to the privileges of the floor, as, of course, are members of foreign national legislatures. I do not think that the British ambassador should be censured. I accept without complaint whatever censure the Senator from Indiana sees fit to impose upon me for an unintentional disregard of the rules. The subject of international debts was not even mentioned, much less discussed, on the occasion of the visit of the two distinguished Englishmen who have been referred to. I thank the Senator for yielding.

Mr. ROBINSON of Indiana. Mr. President, the headline from the Washington Herald reads:

Member of party admits talk of slash.

I do not know whether there was any talk of a slash or not. I am simply giving that from the newspaper. But, Mr. President, what difference is there between lobbying, though it be in high circles, in the interest of having this country cancel the British debt and the work that is being done by any other lobbyist outside the Chamber? What difference is there so far as the ultimate result attempted to be accomplished is concerned?

I am glad to hear the Senator from Arkansas give his explanation to the Senate and the country as to why the British ambassador was on the floor. I have nothing against him, nor against Great Britain; indeed, I admire that great nation, which has stood foursquare against all the winds that blew for the last 700 years; but, Mr. President, my loyalty and the loyalty of every Member of this body belong first to the United States of America, to our people—our people, sorely burdened at this moment; our people, to whom within the last year we have all pledged there should be no debt reduction, to say nothing of debt cancellation. There our first loyalty lies, and there, first, my loyalty shall be discharged.

There is much I could say, Mr. President, on this subject. It does seem to me in these latter days that some of our public officials have lost their sense of proportion. Do they not know how the people feel? Would they continue to prod and goad the American people until things that now seem unthinkable to us might materialize? Have we no sense of tact, of propriety?

Mr. President, I think foreign debtors ought to have no misapprehension as to the American position on this question. I think they ought not to be misled by what the President elect suggests to-day, or by any emissary he may

have abroad in foreign capitals assuming or undertaking to represent him. Therefore I have prepared a resolution in the interest of the American people to put our foreign debtors on guard, that they may know that Congress meant what it said when it adopted the resolution a scant year ago. I will read the resolution, and I am wondering if anybody can take exception to it:

Resolved, etc.—
Whereas it is currently reported and not denied—

All we have is current reports; we have nothing official; all we can do is get our information from the newspapers or from somebody who may be informed and who is kind enough to advise us. The resolution continues:

Whereas it is currently reported and not denied that foreign countries indebted to the United States have sought and are seeking conferences with officials of the Government of the United States for the purpose of reconsidering their indebtedness to the United States; and

Whereas the Congress of the United States has declared a definite policy concerning such indebtedness, and desires that said foreign countries should not be under any misapprehension as to the definite position of the United States on this question: Therefore be it

Resolved by the Senate and House of Representatives of the United States in Congress assembled, That the said definite policy is hereby reaffirmed in the language of section 5, known as House Joint Resolution 147 (Pub. Res. No. 5, 72d Cong.), approved, December 23, 1931, to wit:

It is hereby expressly declared to be against the policy of Congress that any of the indebtedness of foreign countries to the United States should be in any manner canceled or reduced; and nothing in this joint resolution shall be construed as indicating a contrary policy, or as implying that favorable consideration will be given at any time to a change in the policy hereby declared.

Mr. President, I send the resolution to the desk and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. The question is, Shall the Senator from Indiana now be given permission to present the resolution?

Mr. ROBINSON of Arkansas. Mr. President, reserving the right to object, I do not think it is possible now for this Congress to dispose of the subject matter of the resolution presented by the Senator from Indiana. The declaration in existing law to which the Senator refers stands uncontradicted in so far as the Congress is concerned, and it will continue to be the expression of policy on the part of the Congress until a contrary or a conflicting declaration shall be adopted.

The Senator from Indiana a few days ago, in justification for his very remarkable address, for his criticism not only of the President but of the President elect, declared that a gentleman by the name of Bullitt had appeared at certain places in Europe and had secretly proclaimed himself the emissary of the President elect, who had given instructions to keep the mission secret. It was on the basis of that unauthenticated newspaper report that the Senator from Indiana undertook to criticize and condemn both the President of the United States and the President elect for their alleged policy respecting the national debt.

The Senator from Indiana was so prejudiced, if I may use that term without offense, that he would have had the Executive decline to hear representations made by the foreign governments which are interested in the subject. He would insist that a declaration by the Congress estopped the Executive from the exercise of his power and right to conduct international affairs.

Last night there was flashed the news that the President elect, Mr. Roosevelt, from Warm Springs, Ga., had declared that there was no foundation whatever, in fact, for the declarations put into the RECORD by the Senator from Indiana [Mr. ROBINSON]; that Mr. Bullitt had no authority from him whatever, direct or indirect, to carry on negotiations with anyone, and that any statement to that effect was unwarranted and unauthorized. Recognizing fully the right of the Senator from Indiana to raise any issue that he chooses to raise on this subject, I respectfully say to him that it is not a matter that can fairly be prejudged; that we can not now by a declaration or the repetition of a previous declaration made by this Congress estop a future Congress from giving such consideration to this subject as it believes the subject deserves; nor can we estop the President and the President elect, for that matter, from performing their functions in the manner which the Constitution authorizes.

I have no objection to the Senator from Indiana introducing, out of order, the resolution which he has presented; but I shall object to its present consideration, and will, on a proper occasion, move its reference to the Committee on Foreign Relations.

The VICE PRESIDENT. Is there objection to the presentation of the joint resolution? The Chair hears none.

The joint resolution (S. J. Res. 244) reaffirming the policy of the Congress concerning the indebtedness of foreign countries to the United States was read twice by its title and ordered to lie on the table.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Haltigan, one of its clerks, announced that the House had passed a bill (H. R. 14436) making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H. R. 14436) making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

TREASURY AND POST-OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The VICE PRESIDENT. The question is on the motion of the Senator from Arkansas that the Senator from Maryland be permitted to withdraw his motion to recommit.

Mr. FESS. Mr. President, there are several Senators absent who want to be present, and I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dale	Keyes	Sheppard
Austin	Davis	King	Shipstead
Bailey	Dickinson	La Follette	Shortridge
Bankhead	Dill	Lewis	Smith
Barbour	Fess	Logan	Smoot
Barkley	Fletcher	McGill	Steiwer
Bingham	Frazier	McKellar	Stephens
Black	George	McNary	Swanson
Blaine	Glass	Metcalf	Thomas, Idaho
Borah	Glenn	Moses	Thomas, Okla.
Bratton	Goldsborough	Neely	Townsend
Brookhart	Gore	Norbeck	Trammell
Bulkley	Grammer	Norris	Tydings
Bulow	Hale	Nye	Vandenberg
Byrnes	Harrison	Oddie	Wagner
Capper	Hastings	Patterson	Walcott
Caraway	Hatfield	Pittman	Walsh, Mass.
Carey	Hawes	Reed	Walsh, Mont.
Connally	Hayden	Reynolds	Watson
Coolidge	Howell	Robinson, Ark.	Wheeler
Copeland	Hull	Robinson, Ind.	White
Costigan	Johnson	Russell	
Couzens	Kean	Schall	
Cutting	Kendrick	Schuyler	

The VICE PRESIDENT. Ninety-three Senators have answered to their names. A quorum is present. The question is on the motion of the Senator from Arkansas [Mr. ROBINSON] that the Senator from Maryland [Mr. TYDINGS] be permitted to withdraw his motion to recommit with instructions.

LOANS TO RAILROADS BY RECONSTRUCTION FINANCE CORPORATION

Mr. COUZENS. Mr. President, I send to the desk a joint resolution, which I desire to have read, and then I wish to make a few comments upon it.

The VICE PRESIDENT. Is there objection to the reading of the joint resolution? The Chair hears none.

The joint resolution (S. J. Res. 245) to suspend the making of loans to railroads by the Reconstruction Finance Corporation, was read the first time by its title, and the second time at length, as follows:

Resolved, etc., That no loan to any railroad or railway, or to a receiver of a railroad or railway, shall be made or approved by the Reconstruction Finance Corporation until Congress shall otherwise provide.

Mr. COUZENS. Mr. President, it is apparent that large numbers of the railroads are in distress. It is equally apparent that we can not, with the taxpayers' credit, maintain the capital structure of many of the railroads that are in difficulties.

There is pending before the Reconstruction Finance Corporation now an application for a loan of $3,800,000 for the Missouri Pacific which they want by February 1, 1933. There is another application for another $3,000,000 loan on March 1, 1933. They have maturities coming due on May 1, 1933, of $34,000,000. It is perfectly apparent to me, at least, that the Federal Government can not maintain that debt structure; and unless some form of legislation is set up for reorganization of the capital structure of many of these railroads, or unless they set up some voluntary system of reorganization and recapitalization, they will have to go through receivership.

It is perfectly plain that the credit of the taxpayers can not be used indefinitely; and yet we have the house of Morgan and the house of Kuhn, Loeb & Co. coming to the Reconstruction Finance Corporation and begging for these loans. They attempt to assure the Reconstruction Finance Corporation that the security is quite adequate, and yet they will not themselves make the loan.

The president of the American Bankers' Association recently said, "What we need is a loosening up of credit." I admit that; and yet, when it comes to these bankers loosening up credit, they refuse to act. Not only do they urge upon a governmental agency that it make these loans but they assure the governmental agency that the security is adequate. If such is the case and the bankers agree that what we need is a loosening up of credit, I submit that it is time for the Federal Government to stop making the loans and leave it up to the bankers to take care of what they themselves claim is necessary to be done.

Mr. FLETCHER. Mr. President, may I interrupt the Senator?

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Florida?

Mr. COUZENS. I yield.

Mr. FLETCHER. Is it not true that the Missouri Pacific has already obtained loans?

Mr. COUZENS. I understand they have obtained loans somewhere to the extent of $14,000,000, much of which went to the relief of Kuhn, Loeb & Co. and the Morgan interests.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Idaho?

Mr. COUZENS. I do.

Mr. BORAH. I desire to ask the Senator if he can advise us the nature of those obligations falling due to the extent, I believe the Senator said, of $34,000,000.

Mr. COUZENS. Thirty-four million dollars on May 1; $3,000,000 on March 1; $3,800,000 on February 1.

Mr. BORAH. What is the nature of the obligations? Are they securities which these bankers hold?

Mr. COUZENS. No one knows who holds the securities. The loans are for the purpose of paying the interest and maturities of the securities.

Mr. BORAH. But no one knows who holds them?

Mr. COUZENS. No one knows who holds them.

Mr. BARKLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Kentucky?

Mr. COUZENS. I yield.

Mr. BARKLEY. Did the Senator say that the Reconstruction Finance Corporation has loaned about $14,000,000 to the railroads to date?

Mr. COUZENS. If my memory serves me correctly, that is the amount.

Mr. FLETCHER. To that one road?

Mr. COPELAND. That is merely to one road.

Mr. BARKLEY. That seems to me to be rather a small amount, considering the whole amount of credit available to the Reconstruction Finance Corporation. I had the impression that they had loaned more money than that.

Mr. COUZENS. I am afraid I did not understand the question of the Senator.

Mr. BARKLEY. I asked the Senator whether he stated a while ago that the Reconstruction Finance Corporation had made total loans of $14,000,000.

Mr. COUZENS. Oh, no; I was referring only to the Missouri Pacific. I was asked by one of the Senators how much the Missouri Pacific had borrowed, and I replied, some $14,000,000. The Reconstruction Finance Corporation has loaned in the aggregate somewhere between two hundred and fifty and three hundred million dollars to the railroads.

Mr. BARKLEY. About $280,000,000, I understand. Is this joint resolution directed at any particular loan?

Mr. COUZENS. Oh, no. There are other railroads that are going to apply from time to time; and, of course, there probably will be a greater inrush of applications for loans between now and July 1 than there ever has been, because that time is the time when these bonds usually mature.

Mr. BARKLEY. Will the Senator advise us the amount of applications by railroads now pending before the Reconstruction Finance Corporation?

Mr. COUZENS. I can not do that, because they first go to the Interstate Commerce Commission for approval and then are sent to the Reconstruction Finance Corporation. I have no information as to the amount of loans pending.

Mr. COPELAND. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from New York?

Mr. COUZENS. I yield.

Mr. COPELAND. When the previous loan of $14,000,000 was presented to the Interstate Commerce Commission, was there not a good deal of criticism regarding pressure which was brought to bear upon the Interstate Commerce Commission to approve that loan?

Mr. COUZENS. That is what the record shows, and that is what the dissenting opinion of Commissioner Eastman shows.

Mr. COPELAND. When they were before the Appropriations Committee last spring I asked the question whether or not the Interstate Commerce Commission had been coerced into approving the loan. Commissioner Eastman was on the stand. He said, "Frankly, I voted against the proposal, but I do not like the word 'coerced'"; so I followed it up by this question: "Would the commission have approved the loan except for the appeal which was made and the urging of the Reconstruction Finance Corporation?" and he said, "No."

Therefore, I reached the conclusion that the Interstate Commerce Commission was forced into a recommendation. Has it been forced into a similar recommendation as regards these further loans?

Mr. COUZENS. I am unable to say, because the Senator will recognize the difficulty of ascertaining what motives or what influences direct these conclusions. I perhaps would not like the word "coercion"; but certainly influence was used to secure these loans. Whether it was coercive influence or otherwise, I can not tell.

Mr. COPELAND. As I understand the matter, the Interstate Commerce Commission has not yet acted on this particular application.

Mr. COUZENS. I am not informed as to whether they have acted on any of these later applications from the Missouri Pacific. I know that they are pending, and some of them are pending before the Reconstruction Finance Corporation; and I assume that at least one or two of the applications have already been acted upon by the Interstate Commerce Commission.

Mr. COPELAND. What does the Senator recommend that we should do in the matter?

Mr. COUZENS. My recommendation is that we should suspend these loans until we have considered and taken action on a bill that is already pending in the House, H. R. 14359, known as the bill to amend the bankruptcy act. Perhaps if that bill is enacted it will act as a buffer until this situation can be straightened out. In the meantime I am unwilling, unless the Congress authorizes it, to have the Reconstruction Finance Corporation continue making these loans on the credit, at least, if not the ultimate payment, of the taxpayers of the United States.

Mr. KING. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Utah?

Mr. COUZENS. I yield.

Mr. KING. From the information which the Senator has, is he of the opinion that if the bankruptcy bill to which he refers shall be passed some of these railroads will avail themselves of the provisions of that measure and go into the courts and have a receiver appointed, or have the machinery that that bill provides put into operation, in order that they may suspend payments and continue operations until the skies shall be cleared a little of these clouds?

Mr. COUZENS. That is the information I have, Mr. President, that if this bill is passed some of the railroads will avail themselves of the privileges granted under it.

Mr. KING. May I ask another question—and I apologize to the Senator for asking this question. Does the Senator believe that the passage of that bill will be of advantage to the railroad companies and will obviate the necessity, if there shall be a necessity, of further applications to the Reconstruction Finance Corporation for loans?

Mr. COUZENS. My judgment is that there will be no necessity for further applications for loans from the Reconstruction Finance Corporation. I want to qualify that, however, by saying that while I have consulted with some of those who have been drafting this bill as it applies to the railroads I have not seen the final draft, nor do I know what they have finally concluded; but it seems to me that they are working in the right direction. Whether or not the bill when it comes to the Senate will meet my views I am unable to say, but I want to state that I am giving consideration to it as the bill has been drafted.

Mr. KING. Then, Mr. President, as I understand the Senator, he believes that a measure along the lines he has indicated—that is, a bankruptcy measure or a measure containing provisions similar to that which is now pending—would be of advantage in the railroad situation.

Mr. COUZENS. It seems to me it would be; yes.

Mr. KING. The Senator believes that the passage of the pending resolution would hold the matter in abeyance until such legislation was secured?

Mr. COUZENS. That is one of the purposes for introducing the resolution, because I can not say whether the measure proposing to amend the bankruptcy act will be approved at this session or not. But certainly I do not, as chairman of the Committee on Interstate Commerce, want to stand by and see what is going on without at least trying to enlighten the Senate as to the conditions as I see them and stop a rush for loans which might take place before the enactment of the measure.

Mr. KING. If the Senator will pardon me, may I say in conclusion that I think it would be wise to support any resolution or measure that would throw obstacles in the way of a policy which must eventuate in the Government of the United States owning a lot of bankrupt railroads? As far as I am concerned, I should be very sorry to see more money loaned to the railroads, fearing that we may have a lot of broken-down railroads on the hands of the Federal Government. If the bill which the Senator has in mind shall afford relief, and I believe that it will, I should be very glad to see that bill given some sort of precedence here in the Senate in order that it may be enacted into law as soon as possible.

Mr. DILL. Mr. President, will the Senator yield to me?

Mr. COUZENS. I yield.

Mr. DILL. I wanted to ask the Senator whether I correctly understood his statement about the Missouri Pacific. Is the loan now being asked to pay the interest on the bonds that will fall due in May?

Mr. COUZENS. No; the application now immediately pending for action is for the loan of $3,800,000.

Mr. DILL. To pay the interest on other bonds?

Mr. COUZENS. Yes.

Mr. DILL. But those bonds do not fall due in May?

Mr. COUZENS. No.

Mr. DILL. It is another set of bonds that fall due in May?

Mr. COUZENS. Another set; $34,000,000 of bonds fall due May 1.

Mr. DILL. Does the Senator know the selling price of the bonds on which this loan is to pay interest?

Mr. COUZENS. I have talked with a member of the Reconstruction Finance Corporation this morning, and, as I recall it, he said that they were selling for $25 and that they had been selling for as high as $95.

Mr. DILL. But they are now selling for $25?

Mr. COUZENS. Yes.

Mr. DILL. Which means that this interest would be 20 or 25 per cent upon the price for which they now can be purchased?

Mr. COUZENS. That is true.

Mr. DILL. I want to ask another question: Under the bankruptcy act that is proposed, will the Government come in on the same basis with other creditors in having its claims scaled down? Will the Reconstruction Finance Corporation come in on the same basis with private creditors?

Mr. COUZENS. I do not know whether there is any specific provision in the act covering that or not, but I want to point out the situation. If the Reconstruction Finance Corporation, for example, have a lot of junior securities—and I say that because I think perhaps the senior securities are good—if the Reconstruction Finance Corporation has a lot of junior securities, which they have for a number of loans, and these junior securities are scaled down under this process proposed in the legislation, of course, that security will be scaled down; but, inasmuch as in most cases they have an excess amount of the loan, it is possible that they will not be scaled down sufficiently to affect the Reconstruction Finance Corporation loan.

Mr. McKELLAR. Mr. President, will the Senator from Michigan yield to me?

Mr. COUZENS. I yield.

Mr. McKELLAR. Would the resolution of the Senator prohibit loans to all railroads hereafter?

Mr. COUZENS. Until further action of Congress.

Mr. McKELLAR. I was wondering whether it would not be better to confine the operations of the measure to those roads which are in the condition of the one of which the Senator has just spoken, the Missouri Pacific, I believe it was.

Mr. COUZENS. Mr. President, I hardly see how we can enact legislation applying to one railroad, or could specify a particular condition, because the conditions are changing from day to day.

Mr. McKELLAR. Yes; but it would seem to be very hard on those railroads which might need the money, and had good securities to offer, to be denied any privileges under the act because some railroads did not have securities. I am just wondering about it; I am not expressing an opinion.

Mr. COUZENS. I want to say this, that if the bankers of the country believe, as they claim to believe, that instead of inflation we need a better flow of money and a better flow of credit, then we will not get it if they do not themselves practice what they preach. The real difficulty is not the fact of inadequate currency but the trouble is with the velocity of the currency we have, which has slowed down to such a point that it is not working. In other words, if the velocity of the currency is stopped, merely adding to the currency does not help the situation. What is necessary is

that the currency that we have is speeded up; in other words, the velocity increased so that a dollar will be used ten or twelve times a year instead of only once a year.

Mr. MOSES. Mr. President, will the Senator yield to me?

Mr. COUZENS. I yield.

Mr. MOSES. The Senator has spoken of future action by Congress. Does he have in mind general legislation, or does he have in mind that each application should come to Congress and be passed on by Congress?

Mr. COUZENS. Oh, no; I mean that the whole question of loaning to railroads, or railroad receivers, would be stopped until Congress took some further action.

Mr. MOSES. I am trying to ascertain whether the Senator has in mind a piece of general legislation which should determine the matter in which the Reconstruction Finance Corporation should function in connection with these loans, or whether the Senator has in mind that every application shall be sent up to be passed upon by Congress.

Mr. COUZENS. Certainly not the latter. I only used the Missouri Pacific as an instance that was imminent at this time. I do not now ask the Senate to pass upon the Missouri Pacific loan, or any other loan. What I am trying to do is to suspend the making of such loans until Congress can determine how much farther, if at all, we shall go in making railroad loans.

Mr. KING. Mr. President, will the Senator yield to me?

Mr. COUZENS. I yield.

Mr. KING. I will ask the Senator if it is not a fact that at least $8,000,000 of the loan which was made by the Missouri Pacific a short time ago was immediately paid to J. P. Morgan & Co.?

Mr. COUZENS. If my memory serves me correctly, it was somewhere between five and six million dollars. In other words, as I understood it at the time—and it was some months ago, during the last session of Congress, in fact—the Reconstruction Finance Corporation made a loan to the Missouri Pacific, which paid off half of the loan to Morgan and Kuhn, Loeb & Co., and Kuhn, Loeb & Co. and the Morgans carried the other half.

Mr. KING. The amount required now to meet accruing interest would, in part at least, be paid to the same banking companies?

Mr. COUZENS. I do not want to make any statements not justified by the facts. I do not know who owns these securities. It may be that those companies own a lot of them, and it may be that they own none. But we do not know, as a rule, as a matter of fact, who owns the bonds, because they are most always bearer bonds.

Mr. WHEELER. Mr. President, will the Senator yield to me?

Mr. COUZENS. I yield.

Mr. WHEELER. Has the Senator introduced a resolution to stop all further loans by the Reconstruction Finance Corporation to the railroads?

Mr. COUZENS. I have.

Mr. WHEELER. I was wondering why the Senator did not have the resolution referred to the Committee on Interstate Commerce, of which he is chairman, and perhaps hold a hearing on it and get the actual facts as to just exactly what is likely to happen with reference to the matter. Then we would be in much better position, it seems to me, to determine what action we should take.

Mr. COUZENS. The resolution, if it is to go to a committee, properly belongs to the Committee on Banking and Currency, which passed upon the Reconstruction Finance Corporation act in the first instance.

Mr. WHEELER. I would not think so.

Mr. COUZENS. It is a banking matter; and if the Senate believes it should go to the Committee on Banking and Currency, I personally shall not resist such reference.

Mr. SMITH. Mr. President, will the Senator yield to me?

Mr. COUZENS. I yield.

Mr. SMITH. May I suggest to the Senator that this matter involves a proper knowledge as to who owns the securities, and what in all probability is the financial ability of the holders to still further carry them, because they are securities of the railroads; and, if rumor is true, or the fact should be, that heretofore when a loan was made by the Reconstruction Finance Corporation, which took these securities in lieu of the loan, the cash went to the banks that were holding the loans, it might be very instructive to some of us to know who owns these securities and in what financial condition they are, and whether we are justified in using the credit of the Government in holding certain securities when we are simply taking the risk that would be involved in connection with the securities and giving those who hold them the actual cash.

It seems to me that the Committee on Interstate Commerce, dealing with railroads and railroad securities and the financial conditions that arose, would be the proper committee for it to go to in order for us to ascertain the facts.

Mr. COUZENS. Mr. President, with all due respect to the Senator from South Carolina, I want to point out the difficulty of trying to find out the ownership of these bonds. As I pointed out previously, they are bearer bonds, and they are transferable at any time without any record in the hands of the trustee under the mortgage, or any other place. Let us take the Missouri Pacific loan. Perhaps there are a million separate institutions or individuals holding their bonds, and it would be impracticable to find out the financial condition of the individual owners of the bonds. It is quite probable that many of them are in the hands of insurance companies, and we would have to call in all the insurance companies to find out whether they held any, and so on down the line. While I know of the Senator's interest, I believe the suggestion that we should find out who owns these bonds is wholly impractical.

Mr. SMITH. While we might not find out the immediate owners of the bonds, we could at least find out the condition of the road, so as to know whether or not the loans which are asked for ought to be allowed.

Mr. President, it seems to me a rather curious thing that we reached the point just a few months ago where we passed an act affording a credit of $2,000,000,000, primarily to aid the railroads over the present crisis, and, of course, we included specifically railroads, insurance companies, banks, and trust companies; the last three being included undoubtedly because in the minds of those who drafted the legislation insurance companies and banks and trust companies were large holders of the securities of the railroads. Therefore, for all practical purposes, we allowed a credit, through the Reconstruction Finance Corporation, of approximately $2,000,000,000, to take care of the securities of railroads which might be in distress. Now, should we stop that, we might not be able to reach the purpose the Senator has in mind.

Mr. COUZENS. Mr. President, of course, nearly all of the authorization under the Reconstruction Finance Corporation has been absorbed. I am not assuming to take this action because of loans to banks or trust companies or insurance companies. I do not know whether a continuation of the loans to those institutions is justified or not. But as chairman of the Committee on Interstate Commerce I have felt some obligation in the matter, particularly because members of the Reconstruction Finance Corporation, during nearly all the time since we passed the act, have been conferring with me from time to time about loans to railroads. So in effect I have been much closer in touch with the railroad situation and with railroad loans than with any other loans. I am not trying to assume any responsibility for loans to other institutions than railroads, and if there is any other Member of Congress who believes, and has sufficient knowledge on which to base his belief, that the Reconstruction Finance Corporation should stop loans to other agencies, I would be very glad to listen. I am only asking the Senate to listen to me because of my familiarity with the railroad situation. I want to say to the Senator from South Carolina that I am not one of those who do not change their minds. I am perfectly willing to change my mind if after a year's experience—and on February 2 it will be one year since we passed the Reconstruction

Finance Corporation act—if during that time I am convinced that we made an error in the first place.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from New York?

Mr. COUZENS. I yield.

Mr. COPELAND. There is no question, I take it, that what the Senator proposes is a reversal of our attitude as regards the functions of the Reconstruction Finance Corporation?

Mr. COUZENS. I would not say that. I would say it is a suspension of the activities which we authorized a year ago. I do not propose that we should not continue making the loans at some other time. It may be upon investigation and further study that we would reinstate the authority. My resolution only asks for its suspension and not for its revocation.

Mr. COPELAND. Perhaps it is wise—and I ask this opinion of the Senator to see if he agrees with me—having had a year's experience with the Reconstruction Finance Corporation, to have the appropriate committee of the Senate meet the officials of that body to exchange views as to whether the work has been successful, whether it has accomplished the purpose Congress had in mind, and whether it is wise to continue the operations and policies which have prevailed. Would the Senator think that a wise thing to do?

Mr. COUZENS. I should think that would be a very wise procedure, and I for one, as a member of the Banking and Currency Committee, would be glad to participate in any such inquiry.

Mr. FLETCHER. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Florida?

Mr. COUZENS. I yield.

Mr. FLETCHER. I have nothing against the Missouri Pacific Railroad.

Mr. COUZENS. Neither have I.

Mr. FLETCHER. I simply want to call attention to an article recently published entitled, "Leaders Show Keen Interest in Securities." In that article the common stock of the Missouri Pacific Railroad is quoted at $3 per share, while the peak in 1928 and 1929 was $101. Missouri Pacific preferred is quoted at $5 a share, whereas the peak in 1928 and 1929 was $149. That is the latest information I have on the subject as to their shares of stock.

Mr. COUZENS. Mr. President, in view of the discussion, perhaps it is proper to have the resolution referred to the Committee on Banking and Currency, because certainly I am not desirous of taking any precipitous action. I do believe, however, it should be prompt action. Therefore I ask that the resolution be referred to the Committee on Banking and Currency .

The VICE PRESIDENT. Without objection, that order will be made.

Mr. LEWIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Illinois?

Mr. COUZENS. I yield.

Mr. LEWIS. I would like the opinion of the able chairman of the Interstate Commerce Committee respecting loans to railroads. Are not they getting in a position where those large banking houses and concerns who sell such securities are holding out to the public the invitation to buy those securities on the theory that if the roads are not able to pay the interest the Government will do so?

Mr. COUZENS. I have no direct information, but I have no reason to doubt, in view of my knowledge of the methods of salesmanship indulged in by those houses, but that is true.

Mr. LEWIS. It seems to me there lies dormant a very serious evil and danger.

Mr. COUZENS. I think it is quite apparent, since we have had a year's experience since we enacted the law, that if we do not profit by that experience certainly Congress is not doing its duty. My understanding is that we do profit and should profit by experience. If the experience has not been sufficient to indicate the necessity of passing the resolution or taking some similar action, then we should not do so. But my observation is that the Government has gone about as far as it can to maintain the debt structure of these financial institutions which we took care of in February, 1932.

Mr. WHEELER. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Montana?

Mr. COUZENS. I yield.

Mr. WHEELER. I hope when the resolution goes to the Committee on Banking and Currency they will ascertain just what securities the Reconstruction Finance Corporation have for the loans they have made. I think it would be very valuable to the Congress to determine that fact, because my information is—I am not sure how reliable it is, but it was given to me—to the effect that the securities which the Reconstruction Finance Corporation has taken for the loans have so dwindled in value that as a matter of fact the Government would at the present time lose a tremendous amount of money if it became necessary to realize on the securities.

Just how far, as a matter of fact, this legislation was helpful to the average debtor in the country must be apparent at the present time. The small debtor is getting no relief whatsoever, but concerns like Kuhn-Loeb and the house of Morgan and similar concerns now unload their securities on the Reconstruction Finance Corporation. It seems to me that the whole subject ought to be gone into very thoroughly, so that the Congress of the United States will be able to know whether it should continue this policy which we put into effect something like a year ago. I hope the Senator, as a member of the Banking and Currency Committee, will see to it that that is inquired into very thoroughly.

Mr. COUZENS. I shall be very glad to do so.

Mr. THOMAS of Oklahoma. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Oklahoma?

Mr. COUZENS. I yield.

Mr. THOMAS of Oklahoma. Is it not a fact that the Reconstruction Finance Corporation has made about 5,000 loans to banks?

Mr. COUZENS. That is true.

Mr. THOMAS of Oklahoma. Is it not a further fact that of these 5,000 banks some 500 have since failed, after the loans were granted?

Mr. COUZENS. I have no information as to that.

Mr. THOMAS of Oklahoma. I will state that that is true. Let me ask the Senator another question. Is it not a further fact that frequently the Reconstruction Finance Corporation makes a loan to a bank and that frequently on the same day the loan is granted and more frequently within a few days thereafter the bank receiving the loan fails? Does the Senator have any knowledge about that situation?

Mr. COUZENS. I have heard of cases of that sort. I understand there has been perhaps a very reprehensible case of a loan to a concern in New Orleans, which was brought about by certain influences, and as soon as they got the money or immediately thereafter they failed.

Mr. THOMAS of Oklahoma. If that policy prevails, is it not the opinion of the Senator that that defeats and damages irreparably the depositors and stockholders of the failed bank in that the Reconstruction Finance Corporation requires that their loans shall be amply secured? Their policy appears to be to require the borrowing bank to deposit its best collateral to get the loan, and the moment they make the loan the Reconstruction Finance Corporation has all of the good assets of the bank, the loan is made, and the money is paid to some larger bank oftentimes, so that when the borrowing bank closes the Reconstruction Finance Corporation has all of the good assets of the bank, some big bank has all the money covered by the loan, leaving the depositors and stockholders with nothing. Is not that true?

Mr. COUZENS. So far as I know the Senator is in part correct. The Senator, of course, will recognize that if a

little bank owes a big bank, the big bank is entitled to its money before the depositor is, because it usually has the collateral of the bank. It is quite true that when the Reconstruction Finance Corporation makes a loan to a bank it takes all of its best securities. Then if there is a failure of course the Reconstruction Finance Corporation is a preferred creditor and, because it holds the preferred securities, the depositors and other creditors are subordinate to the Reconstruction Finance Corporation.

Mr. THOMAS of Oklahoma. Does not the Senator think that instead of that policy operating to the benefit of the depositors of the locality and the stockholders, it works to their detriment?

Mr. COUZENS. When the bank fails; yes. The Senator is undoubtedly correct.

Mr. WHEELER. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield further to the Senator from Montana?

Mr. COUZENS. I yield.

Mr. WHEELER. The Senator called attention to one instance in Louisiana. I would like to call attention to one in Nevada where, I understand, they loaned a group of chain banks something over $1,000,000, and within a very short time thereafter the banks closed. It seems to me that when the Reconstruction Finance Corporation loans money and then inside of a week or two weeks the borrowing institution closes its doors, there must be negligence some place on the part of the Reconstruction Finance Corporation.

I would also like to call attention to reports I am getting from my home State and from the entire Northwest with reference to money being loaned by the Reconstruction Finance Corporation to finance corporations. Representatives of the finance corporation go around with applications in their hands and see the farmers. If a farmer owes the chain bank some money, they get that farmer to take his loan from the Reconstruction Finance Corporation and thereby relieve the chain bank. That is a notorious situation out there, as I think the Senators from North Dakota and other Northwestern States will agree.

Mr. COUZENS. The information I have from the Senators from North Dakota is to the effect that the bankers, not particularly the finance companies but the bankers, go around and say to the farmer, "If you pay us we will let you borrow from the Reconstruction Finance Corporation." That is done through the fact that the bankers are the agents in those territories for the Reconstruction Finance Corporation.

Mr. President, before I take my seat I want to comment on another matter. When your special committee investigating the Reconstruction Finance Corporation made its report, we did not recommend that the loans made from February 2 to July 21, 1932, be made public, because under the act at that time they were not authorized to be made public. Since then, as a result of a resolution passed in the House of Representatives, the Reconstruction Finance Corporation has filed a report with the House and the House has made it public. That in my opinion justifies me in saying what I am going to say with respect to the information your committee received.

When the reports were filed with the committee, they were filed as of July 15, because that was about the time we adjourned and that was all we could ask for. The reports filed by the Reconstruction Finance Corporation at that time showed loans to the Central Bank & Trust Co., of Chicago, otherwise known as the Dawes bank. They had received an authorization for a loan of $90,000,000. The authorization was made as of June 25 and June 27. The report shows that at that time there was not disbursed $50,000,000, but that $40,000,000 had been disbursed; that of the $40,000,000 which had been disbursed $3,195,719 had been paid, leaving a net indebtedness to the Reconstruction Finance Corporation of $36,804,280.

In that connection I may say that the Reconstruction Finance Corporation officials assured me personally—I do not know whether they did any of the other members of the committee—that they had $120,000,000 of securities.

Now the report comes to the House of Representatives. I sent my secretary over to get the record. It has not been printed. It shows a divergence in the reports. I do this because press reports last night were not in line with the report your committee received. The report received as the result of a resolution introduced by Representative HOWARD shows that the amount disbursed was $90,000,000, that there has been a repayment of $23,576,238, and that there is outstanding at this time $66,423,761; while the report of the committee shows the amount outstanding at the time your committee made its report was only $36,804,000. I wanted to make that statement to the Senate because of the divergence in the reports made to the respective houses.

Mr. BLAINE. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Wisconsin?

Mr. COUZENS. I yield.

Mr. BLAINE. Does the report disclose whether the securities held by the Reconstruction Finance Corporation embrace a very large amount of Insull securities?

Mr. COUZENS. In the report which your committee made it pointed out that because of no appropriation we had been unable to go into the securities placed to cover the loans. The securities themselves were in the different Federal reserve banks. If they had been in Washington the chairman of the committee would have been glad to have examined them, but he did not feel that he was justified in going around to the various Federal reserve banks to ascertain the kind of securities which were held in those banks for these loans. So he did not do it, and he had no funds with which to employ anybody else to do it.

Mr. BLAINE. May I ask the Senator another question?

The VICE PRESIDENT. Does the Senator from Michigan yield further to the Senator from Wisconsin?

Mr. COUZENS. Yes.

Mr. BLAINE. Why not broaden the provisions of the resolution so as to withdraw the loaning privilege from banks and insurance companies and other financial institutions, because it must become perfectly apparent and obvious that whatever loans they have made, generally speaking, have in fact not retired any part of their aggregate indebtedness but simply changed the main creditors. The result has been to pile up excess reserves in the banks and probably to furnish additional liquidity, all of which has had a tendency to contract the flow of credit with attendant falling prices. So it seems to me, as an economic movement, it is driving us into this depression much deeper and wider than we are now in it.

Mr. COUZENS. I agree with much of what the Senator from Wisconsin says, but, as I pointed out previously in my remarks, I do not pretend to be competent to pass upon the loans made by the Reconstruction Finance Corporation to banks and trust companies and insurance companies; I have not analyzed those; but, as chairman of the Interstate Commerce Committee, I felt a responsibility to do so with respect to the railroads. Therefore I have confined my resolution to the railroads. If some other Senator who has more information and feels justified in introducing a resolution to stop loans to other institutions, I shall not object.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Nebraska?

Mr. COUZENS. I yield.

Mr. NORRIS. I wish to ask the Senator about an apparent discrepancy between the report submitted by his committee and the disclosures made in the report submitted to the House of Representatives in regard to the so-called Dawes loan. It appears from the Senator's statement that the report made by his committee shows only a comparatively small part, less than half of the authorized loan, to have been actually loaned, while the report to the House shows that the entire authorization of $90,000,000 was loaned. I wish to ask the Senator if that is, in reality, a discrepancy or whether that might not be explained by the fact that the additional amount shown to have been loaned, according to the report to the House, was loaned after the

report was submitted to the Senator's committee, so that, as a matter of fact, there may be no discrepancy?

Mr. COUZENS. No. I want to say that at the reconvening of Congress in December I had a resolution adopted by the special committee asking the Reconstruction Finance Corporation to bring the report of its loans up to date from July 15 to July 21, which was the day when the secrecy provision ended.

Mr. NORRIS. Then there is a discrepancy, in reality?

Mr. COUZENS. I examined the report for the week of July 15 to July 21 and found that there is no record in that report of any loans to the Chicago bank referred to, and therefore there is a discrepancy.

Mr. NORRIS. There is a discrepancy. Let me ask the Senator another question as to a matter which I think he did not explain. He told us the amount of securities that the Reconstruction Finance Corporation held from the Dawes bank as shown by the report made to his committee. Is there anything additional by way of security which has come to the Reconstruction Finance Corporation according to the report submitted to the House of Representatives?

Mr. COUZENS. The Senator, perhaps, misunderstood me. I did not say that the report showed the amount of securities placed for the Dawes loan. What I said was that I had been informed by the director that the appraisers had estimated the value of the securities at $120,000,000. The report in hand does not show any specific amount of securities, and that is true of many other loans, because indorsements are relied upon in many cases as security. Where the actual securities deposited may seem inadequate or the Reconstruction Finance Corporation desire to have their loans further secured they obtain the indorsement of the person benefiting by the loan.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from New York?

Mr. COUZENS. I yield.

Mr. COPELAND. Did the Senator have occasion to compare any other loans than the Dawes loan to see if there was a similar discrepancy somewhere else?

Mr. COUZENS. No; I did not. I only took the press report of the loans this morning, and inasmuch as there was so much publicity given to the Dawes loan, I traced that particular one down. I do not know whether there are other discrepancies or not.

Mr. COPELAND. Is not this a further reason why the Committee on Banking and Currency might well call the directors of the corporation here and talk over the matter? I think it would be a wise thing to do.

Mr. COUZENS. I am very anxious to do it, and I will be glad to speak to the Senator from South Dakota [Mr. NORBECK], the chairman of the committee, and ask him to expedite the matter.

Mr. BROOKHART. Mr. President, in reference to the Dawes loan, which the Senator has just mentioned, let me say that I personally made an investigation of that. I went to the Reconstruction Finance Corporation Board itself and I was told the loan was $90,000,000 and I was told further that there was no security except the assets of the principal, the bank. I was also told that in the final settlement there would be a loss of from $25,000,000 to $30,000,000. That was the explanation which was made to me about it.

Mr. COUZENS. Mr. President——

Mr. BROOKHART. Their accounting would tally with the House report from which the Senator has just quoted.

Mr. COUZENS. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Michigan?

Mr. BROOKHART. I yield.

Mr. COUZENS. I think the Senator, in all fairness not only to the Senate committee but to the Reconstruction Finance Corporation, should state what official made that statement.

Mr. BROOKHART. If the Senator wants to know, it was Gardner Cowles who told me.

Mr. COUZENS. Of course he came on the board——

Mr. BROOKHART. Shortly after this transaction.

Mr. COUZENS. Shortly after the loan was made. He was a member of the board when I was down there; but the appraiser or the two appraisers who appraised the securities and the other officials stated that the security was worth $120,000,000.

Mr. BROOKHART. He told me the appraisers made some such report as that, but that eventually there would be a loss of from $25,000,000 to $30,000,000.

Mr. COUZENS. Of course he does not know any more about it than do the appraisers, and perhaps not so much.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The VICE PRESIDENT. The question is on the motion of the Senator from Arkansas [Mr. ROBINSON] that the Senator from Maryland [Mr. TYDINGS] be permitted to withdraw his motion to recommit, with instructions, the pending bill. [Putting the question.] The "ayes" have it, and permission is granted to the Senator from Maryland to withdraw his motion.

Mr. TYDINGS. Mr. President, I withdraw the motion, and offer a substitute for Senate Resolution 327, which I will call up at an appropriate time. I ask that the proposed substitute may be printed in the RECORD and lie on the table.

The VICE PRESIDENT. The Senator from Maryland withdraws his motion. The proposed substitute he now offers will be printed and lie on the table, and will also be printed in the RECORD.

The amendment intended to be proposed by Mr. TYDINGS to the resolution (S. Res. 327) instructing the Committee on Appropriations to reduce the aggregate amount of appropriations for 1934 to a sum not exceeding $2,949,100,000 is as follows:

Strike out all after the word "*Resolved*" and insert in lieu thereof the following:

"That it is the declared policy of the Senate that the appropriations in the aggregate shall be reduced at the earliest practicable time to a sum equal to that of the estimated revenue, and that the Committee on Appropriations is instructed to make a survey of all appropriation bills and to make reductions therein wherever possible without impairing the efficiency of the essential services and conforming to a policy of the strictest economy."

The VICE PRESIDENT. Let the pending amendment be reported.

Mr. MCKELLAR. Mr. President——

The VICE PRESIDENT. The Senator from Tennessee will be recognized just as soon as the pending amendment shall be stated.

The LEGISLATIVE CLERK. On page 10, line 5, after the words "in excess of," it is proposed to strike out "32½ cents" and insert "35 cents: *Provided further*, That in order to foster competition in the manufacture of distinctive paper for United States securities, the Secretary of the Treasury is authorized, in his discretion, to split the award for such paper for the fiscal year 1934 between the two bidders whose prices per pound are the lowest received after advertisement, but not in excess of the price fixed herein."

Mr. MCKELLAR. Mr. President, in accordance with the rules I present in writing the notice to suspend the rules, which I send to the desk.

Mr. NORRIS. Mr. President, I should like to make a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. NORRIS. Is the amendment now pending a committee amendment?

The VICE PRESIDENT. It is a committee amendment.

Mr. NORRIS. Has there been a unanimous-consent agreement by which committee amendments shall be first considered?

The VICE PRESIDENT. Such an order was made yesterday. Without objection, the reading of the notice to

suspend the rules submitted by the Senator from Tennessee will be dispensed with and the notice will be printed in the RECORD.

Mr. NORRIS. I ask that the notice may be read.

The VICE PRESIDENT. Let it be read.

The legislative clerk read as follows:

NOTICE OF MOTION TO SUSPEND RULES

Pursuant to the provisions of Rule XL of the Standing Rules of the Senate, I hereby give notice in writing that I shall hereafter move to suspend paragraph 4 of Rule XVI for the purpose of proposing to the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes, the following amendment, viz: On page 16, line 16, after the word "each," to insert the following:

": *Provided further*, That no refund or credit of any income or profits, estate, or gift tax in excess of $20,000 shall be made after the enactment of this act until a report thereof giving the name of the individual, trust, estate, partnership, company, or corporation to whom the refund or credit is to be made, the amount of such refund or credit, and the facts in connection therewith, and all supporting papers are submitted by the Commissioner of Internal Revenue to the Comptroller General of the United States and approved by him, the papers to be returned to the Commissioner of Internal Revenue after final action on the proposed refund is taken by the said Comptroller General. This proviso shall not apply to refunds or credits made pursuant to a judgment of a court having jurisdiction of the subject matter, or a decision of the United States Board of Tax Appeals, which has become final."

The VICE PRESIDENT. The question is on agreeing to the committee amendment, which has just been read.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Customs," page 11, line 17, before the word "not," to insert the word "but," so as to read:

Collecting the revenue from customs: For collecting the revenue from customs, for the detection and prevention of frauds upon the customs revenue, and not to exceed $10,000 for the securing of evidence of violations of the customs laws, for expenses of transportation and transfer of customs receipts from points where there are no Government depositories, not to exceed $35,000 for allowances for living quarters, including heat, fuel, and light, as authorized by the act approved June 26, 1930 (U. S. C., Supp. V, title 5, sec. 118a), but not to exceed $720 for any one person, not to exceed $5,000 for the hire of motor-propelled passenger-carrying vehicles, not to exceed $500 for subscriptions to newspapers.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Engraving and Printing," on page 24, line 19, after the words "passenger-carrying," to strike out "vehicles," and insert "vehicles; ", so as to read:

For the director, two assistant directors, and other personal services in the District of Columbia, including wages of rotary press plate printers at per diem rates and all other plate printers at piece rates to be fixed by the Secretary of the Treasury, not to exceed the rates usually paid for such work; for engravers' and printers' materials and other materials, including distinctive and nondistinctive paper, except distinctive paper for United States currency, national-bank currency, and Federal reserve bank currency; equipment of, repairs to, and maintenance of buildings and grounds and for minor alterations to buildings; directories, technical books and periodicals, and books of reference, not exceeding $300; rent of warehouse in the District of Columbia; traveling expenses not to exceed $2,000; equipment, maintenance, and supplies for the emergency room for the use of all employees in the Bureau of Engraving and Printing who may be taken suddenly ill or receive injury while on duty; miscellaneous expenses, including not to exceed $1,500 for articles approved by the Secretary of the Treasury as being necessary for the protection of the person of employees; for transfer to the Bureau of Standards for scientific investigations in connection with the work of the Bureau of Engraving and Printing, not to exceed $15,000; and for the maintenance and driving of two motor-propelled passenger-carrying vehicles; $5,060,680, to be expended under the direction of the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, on page 27, line 9, before the word "not," to strike out the word "and" and insert the word "but," so as to read:

For freight, transportation, and traveling expenses, including allowances for living quarters, including heat, fuel, and light, as authorized by the act approved June 26, 1930 (U. S. C., Supp. V, Title V, sec. 118a), not to exceed $7,635 but not to exceed $720 for any one person.

The amendment was agreed to.

The next amendment was, under the subhead "Mints and assay offices," on page 34, line 4, after the name "Colo.," to insert "Carson City, Nev.," and in line 6, after the name "N. Y.," to insert "Boise, Idaho, Helena, Mont., Salt Lake City, Utah," so as to read:

For compensation of officers and employees of the mints at Philadelphia, Pa., San Francisco, Calif., Denver, Colo., Carson City, Nev., and New Orleans, La., and assay offices at New York, N. Y., Boise, Idaho, Helena, Mont., Salt Lake City, Utah, and Seattle, Wash.

The amendment was agreed to.

The next amendment was, on page 34, in line 15, after the name "Philadelphia," to strike out "$1,250,000" and insert "$1,275,000," so as to make the paragraph read:

For compensation of officers and employees of the mints at Philadelphia, Pa., San Francisco, Calif., Denver, Colo., Carson City, Nev., and New Orleans, La., and assay offices at New York, N. Y., Boise, Idaho, Helena, Mont., Salt Lake City, Utah., and Seattle, Wash., and for incidental and contingent expenses, including traveling expenses, new machinery, and repairs, cases and enameling for medals maufactured, net wastage in melting and refining and in coining departments, loss on sale of sweeps arising from the treatment of bullion and the manufacture of coins, not to exceed $500 for the expenses of the annual assay commission, and not exceeding $1,000 in value of specimen coins and ores for the cabinet of the mint at Philadelphia, $1,275,000.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. ODDIE. I send to the desk an amendment and ask that it may be read.

The VICE PRESIDENT. Is it an amendment to the amendment?

Mr. ODDIE. It is another amendment.

Mr. McKELLAR. Mr. President, can we not get through with the committee amendments before other amendments are offered?

The VICE PRESIDENT. The Chair understood that the amendment submitted by the Senator from Nevada was an amendment to the committee amendment. Is that right?

Mr. ODDIE. No; it is not an amendment to the committee amendment.

The VICE PRESIDENT. Under the unanimous-consent agreement committee amendments must first be considered.

Mr. ODDIE. The amendment I submitted may lie on the table temporarily.

The VICE PRESIDENT. The amendment will lie on the table. The question is on agreeing to the amendment on page 34, line 15, striking out "$1,250,000" and inserting "$1,275,000."

Mr. KING. I inquire if the amendments in lines 4, 5, 6, and 7 justify the increase from $250,000 to $275,000?

Mr. ODDIE. Yes, Mr. President; the increase from $1,250,000 to $1,275,000 covers those four items.

Mr. KING. It seems to be rather a large sum for that purpose.

Mr. NORRIS. Mr. President, I should like to make an inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. NORRIS. Why are these additional places put in the bill? In other words, why were they omitted by the House?

Mr. ODDIE. For a number of years past the House has omitted these four items, and the Senate has replaced them in the bill each year. It is doing now what it has done for a number of years past, and there is a real reason for it, which I will be glad to explain if the Senator cares to have an explanation.

Mr. NORRIS. Mr. President, especially in view of the fact that we have an economical streak on, I should like to have that committee amendment reconsidered for the purpose of hearing the Senator's explanation.

The VICE PRESIDENT. The Chair had not announced that the last committee amendment had been agreed to. That is still pending.

Mr. NORRIS. But the reason for that increase came about on account of the amendments in line 4, line 6, and line 7, where the committee has put in several other places, for instance, Carson City, Nev.; Boise, Idaho; Helena, Mont.; and Salt Lake City, Utah. Those are the amendments which I ask unanimous consent to have reconsidered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered. The clerk will state the first one of the amendments.

The LEGISLATIVE CLERK. On page 34, line 4, after the word "Colorado," it is proposed to insert "Carson City, Nev."

The VICE PRESIDENT. The Senator from Nebraska desires an explanation of that amendment.

Mr. ODDIE. Mr. President, this item is for the assay office in Carson City, Nev. This assay office has a very important bearing on the welfare of the mining industry, which everybody knows has been in great distress for a number of years past.

Prospecting for gold is one of the most encouraging things that the mining industry has to look forward to for some time. There is at present a great deal of prospecting being done for gold. That business is increasing among the men of very small means. They have an opportunity, by having this office continued, of bringing small amounts of gold that they may find, or gold dust, into the mint and getting their money. They can have assays made there. The mining industry is of great importance; it is the next largest industry to the agricultural industry; it is of such great importance that these small offices should be maintained. A comparatively small amount of money is involved in this appropriation; but the prospectors are paving the way to better conditions in our western country, and we need those better conditions badly.

I send to the desk a telegram from the director of our mint and assay office in Carson City, E. T. Clyde, which shows the large increase in business at this office during the past year. I ask that this telegram be placed in the RECORD.

The VICE PRESIDENT. Without objection, that order will be made.

Mr. NORRIS. Let us hear it, Mr. President. I should like to know what it says.

Mr. ODDIE. I ask that the telegram be read.

Mr. NORRIS. Let it be read.

The VICE PRESIDENT. Without objection, the telegram will be read.

The legislative clerk read the telegram, as follows:

CARSON CITY, NEV., *January 4, 1933.*

United States Senator TASKER L. ODDIE,
Washington, D. C.:

Settled for 13 deposits first two working days this month. Average entire January business, 1920 to 1931, 12 deposits. December's record of 109 deposits probably largest month here in 20 or more years, much of that time with larger working force. Deposits July 1 to date, 582; same period last year, 285. These figures reflect increase in small operations in this territory and demand for public convenience of service rendered. Statements used last year apply even more, as number of men turning to small-scale mining to sustain selves and families on increase. Comparative statement of work of assay offices on page 18, mint directors' report, fiscal year 1932. Your efforts appreciated. Hopes for success.

E. T. CLYDE.

Mr. NORRIS. Mr. President, we must remember, now, that we are entering upon a program of economy. I wonder if the Senator from Nevada will tell me how much patronage is involved in the Carson City office? How many employees will this bring there, and who names them?

Mr. ODDIE. There are two, Mr. President—one director and an assistant. I named them before; and as I am leaving office on March 4, their successors will be named by a Democrat; but, Mr. President, I think too much of my State to allow any question of politics to prevent my earnest efforts to have this office continued.

Mr. NORRIS. Oh, I have not any doubt of that Mr. President. The Senator has answered my question very properly, and it is a proper question; but that makes it even, you see. The Senator named the fellow who is there now, and the Democrats will name the next fellow, so it evens up all right, and the taxpayers pay the bill.

We are yelling "Economy!" until we are hoarse; but when it comes to a few little offices like this we continue to support them and to uphold them, while the people all around are yelling "Economy!" and we are all saying "Amen" to it.

Why do we not practice what we preach? If the argument can be made and sustained that this office is necessary, and that the country and the State that has this patronage will sink into oblivion if we do not allow it to continue, I am willing to permit it to go; but the evidence to sustain it comes from a telegram from Carson City, signed by Mr. E. T. Clyde. I do not know the gentleman. Does the Senator from Nevada know him?

Mr. ODDIE. I know him well.

Mr. NORRIS. Is he not one of the men that the Senator appointed to the office down there?

Mr. ODDIE. Yes; and he is about to leave the office.

Mr. NORRIS. Exactly. He will leave it when the Democrats get in.

Mr. ODDIE. Yes.

Mr. NORRIS. But he has a little while to hold on, so that he pleads that this office be sustained. Why, that is natural. Economy is all right if it does not apply to you. As it applies to the other fellow, we are all economists.

Mr. President, if we are going to accomplish anything, we must all be willing to sacrifice something; and we never will accomplish anything unless we do. We shall have to give up some of this patronage. When the Senator from Nevada appointed Mr. Clyde to office, I do not suppose that he knew or even believed that the 4th of March was going to be the end of his term. He did not know then that he was going out and somebody else was coming in; so I presume he has no understanding that having held his office so long, and drawn the pay of it, the members of the other party now should get their opportunity to get some of this milk from the cow that everybody is milking.

This telegram says:

Settled for 13 deposits first two working days this month. Average entire January business, 1920 to 1931, 12 deposits. December's record of 109 deposits probably largest month here in 20 or more years.

I do not understand what all that means.

Mr. ODDIE. I do, Mr. President. I can explain it.

Mr. NORRIS. Let the Senator explain this, then:

Settled for 13 deposits—

What does that mean?

Mr. ODDIE. That he made settlement for 13 deposits of ore or gold that was brought in to him from prospectors.

Mr. NORRIS. There were 13 deposits in two working days this month. Do they not work more than two days a month out there?

Mr. ODDIE. He is speaking of these two days, to show that the business is increasing. He just mentioned the two days of the month which had already expired.

Mr. NORRIS. Oh! There were 13 deposits in two days. Does the Senator know how many deposits were made in the other 28 days?

Mr. ODDIE. The answer to that would be just about as wise as to ask how many times it will rain next January. [Laughter.]

Mr. NORRIS. Exactly; and if it does not rain next January, we get no consolation out of the fact that it did rain January 1 of last year. [Laughter.]

Now, here we are. We have a record of 13 deposits in 2 days, and 28 days without any deposits, probably; and we are going to keep these men there, drawing salaries from the Treasury of the United States, when everybody is yelling himself hoarse to economize and cut down expenses.

Mr. ODDIE. Mr. President, to abolish these offices would be the rankest kind of extravagance.

Mr. NORRIS. Exactly.

Mr. ODDIE. It would have a tendency to destroy one of the fundamental industries of our western country.

Mr. NORRIS. How about the next county, where some other town is the county seat? Why not have one there?

Mr. ODDIE. Because this office has been in existence for a great many years. It is the only one in the State. It has been so recognized by Congress for many years past,

and there is no sense in having more than one in Nevada. It would be extravagant.

Mr. NORRIS. But Nevada is a big State. Suppose some ore were found away up in the northwest corner of the State, nearer to Seattle, Wash. The man who found it would have to go clear down to Carson City.

Mr. ODDIE. But our people have intelligence enough to go to the nearest office.

Mr. NORRIS. Now, let me ask the Senator what the next clause means:

December's record of 109 deposits.

Does that mean that there were 109 deposits made in that one month?

Mr. ODDIE. It means in the period mentioned in that telegram.

Mr. NORRIS. I judge that is one month, because it says in the next sentence that it is the "largest month here in 20 or more years."

Mr. ODDIE. Yes.

Mr. NORRIS. What do those deposits amount to? Does the Senator know that?

Mr. ODDIE. I know that any one of those deposits is likely to amount to the creation of a great mining district which will employ possibly thousands of men and put money in circulation.

Mr. NORRIS. Yes; but, Mr. President, the mining district would go on just the same if that office were not there; and, indeed, the mining district might be nearer geographically to some other of these towns, where there is another assay office.

Mr. ODDIE. Mr. President, there is no other assay office in the State; and it is a plain statement of fact that a mining district does not exist until it is discovered and made.

Mr. NORRIS. Mr. President, I have not said that there were more offices in the State of Nevada; but I have said that probably on account of the size of Nevada, there are some deposits at places that would be nearer to some other assay office; and how do they take them? Do they send them by express, or do they carry them there in person?

Mr. ODDIE. It depends on the case itself. If the sample is to be sent a long distance it might be sent by express. Frequently the prospectors who are doing this work have no money to send these samples by express. They have to carry them themselves; and I have known of cases where they have traveled long distances over the desert and through the mountains in order to carry these little samples to the assay office.

Mr. NORRIS. "Little samples"?

Mr. ODDIE. Yes; to be assayed.

Mr. NORRIS. Mr. President, I supposed the man had a whole wheelbarrow full of gold; and if he was carrying it there, and having that much gold, it certainly would not be much of a drain on that kind of a man to pay the express on it. If it is just a little sample, he could send it by parcel post, could he not?

Mr. ODDIE. Mr. President, the Senator knows nothing whatever about the question he is discussing. I should be glad to enlighten him if he would give me an opportunity. I know it would be interesting to the Members of the Senate also.

Mr. NORRIS. I concede that I do not know much. I am inquiring of the Senator from Nevada to get information and I am having very poor success. I admit we are not getting it. Let me ask the Senator about another sentence here:

Deposits July 1 to date, 582; same period last year, 285.

I suppose the object of stating that is to show that the business is increasing.

Mr. ODDIE. Yes.

Mr. NORRIS. We agree on that.

These figures reflect increase in all operations in this territory and demand for public convenience of service rendered. Statements used last year apply even more as number of men turning to small-scale mining to sustain selves and families on increase. Comparative statement or work of assay offices on page 18, Mint Director's Report Fiscal Year 1932. Your efforts appreciated. Hopes for success.

Mr. President, these assay offices are a good deal like land offices, which may not be provided for in this bill, but they will be in another one, and there is one for my State. I have refused to put forth any efforts to save it if, under law, it ought to be discontinued, or if, under the showing, it is an expense to the Government to keep it open. It seems to me that Congress ought not to be here contending for the keeping open of offices for the purpose of giving people jobs, and that is the main purpose. If it is not, I want to see the evidence. I do not think there is any reason why we should maintain an assay office in Carson City, Nev., if we can get the work done more cheaply somewhere else. I do not believe there is any reason why we should keep an office in Boise, Idaho, or Helena, Mont., or Salt Lake City, Utah, unless it is absolutely necessary that it should be done. Now, when we are talking economy, and when we have pledged economy, let us commence at home.

It is proposed that we put these places in at this time, as we did last year, as we did the year before, as the Senator from Nevada says. They were taken out in the House last year, they were taken out by the House the year before, and were reinserted in the Senate, and it is proposed that we do it again. As far as I am concerned, I do not know that there is any use wasting time here trying to prevent their being put into the bill again, but unless there is some reason given for reinstating them, then the officials who have recommended that they be taken out, and the House of Representatives, which has stricken them out, are entitled to some credit for that action.

I want to ask the Senator now whether it is not true that the department concerned has recommended the omission of these towns?

Mr. ODDIE. No.

Mr. NORRIS. Have they recommended that they be put in?

Mr. ODDIE. They have recommended that they be put in the bill. The Bureau of the Mint of the Treasury Department has recommended it, and the Budget has recommended that these items be placed in the bill.

Mr. NORRIS. They are all recommended, then?

Mr. ODDIE. Yes.

Mr. NORRIS. Why did the House take them out?

Mr. ODDIE. Because it is a whim of one particular man in the House, who knows nothing whatever about the mining industry and cares less.

Mr. NORRIS. The House is composed of several Members. There are a great many more than one there. This matter had to go through the House committee.

Mr. ODDIE. It went through the House committee.

Mr. NORRIS. And it had to go through the House itself.

Mr. ODDIE. But the man to whom I have referred was able to convince certain members of the committee that these items should come out.

Mr. NORRIS. I suppose so; and in their judgment they took them out.

Mr. ODDIE. And the Senate in its judgment every year has put them back.

Mr. NORRIS. They have put them back, but not in their judgment.

Mr. ODDIE. Yes; in their judgment.

Mr. NORRIS. They just put them back by main force. They put them back perhaps without any reason.

Mr. ODDIE. They have been put back by the Senate because it has been explained to the Senate that it is extravagance to cut them out, and that there is a necessity for these offices. They help the small prospectors, and that western country needs more mining development, and the world needs more gold.

Mr. NORRIS. If putting in the bill provision for a large number of assay offices will bring in more gold, then we have an easy way to solve the present difficulty. All we will have to do will be to add four or five hundred more assay

offices, and the gold will come in until we stop it by main force.

Mr. ODDIE. Mr. President, I know from experience that the road of the prospector is a hard one. I have done that work myself, and I know that all is not gold that glitters. I have learned that through many bitter experiences, and I have learned that the investment of a very small amount of money in this industry will sometimes yield huge returns.

Mr. NORRIS. Does the value of the ore increase because it is assayed in an office that is near by where it is dug out of the ground?

Mr. ODDIE. That makes no difference, Mr. President.

Mr. NORRIS. Would not the same amount be assayed if Carson City did not assay it? Will not these other assay offices be able to do the work, without hiring additional men to do it?

Mr. ODDIE. The other assay offices are in far-off States, a long distance away. I could cite illustrations, if the Senator cared to hear them, which would convince him that the human equation comes into this problem very largely. Here are these men, anxious to work and make a living. They go through privations which very few other men in the world have to go through in searching these desert mountains for ore deposits, and they generally are without money in their pockets. A little necessary help and encouragement to them at critical times might mean the difference between success and failure.

Mr. NORRIS. Mr. President, I agree to all that; I have great sympathy for these men who are doing such work. I would not injure them for anything. But that is not the personal equation. The personal equation is shown in the telegram. The personal equation in this particular case is E. T. Clyde, the employee, and the other fellows who are going to have his job after he passes on.

Mr. WHEELER. Mr. President——

The PRESIDING OFFICER (Mr. DICKINSON in the chair). Does the Senator from Nebraska yield to the Senator from Montana?

Mr. NORRIS. I yield.

Mr. WHEELER. Let me say to the Senator that he is entirely wrong with reference to this matter. Take the case of Helena, Mont., for instance. I do not even know who the man in the mint is, and I am not the slightest bit interested in who is going to be or who has been director of the mint; but, in my judgment, it is perfectly silly and absurd for the Senator to stand on this floor and say that it is a question of patronage, because that does not enter into it in the slightest degree.

Mr. NORRIS. Mr. President, I will not permit any interruption further until I answer that statement.

When the Senator says that it is perfectly silly, I undertake to say to him that it is perfectly true, silly or not. It may not apply to this office, it may not apply to some other office; but I know, and we all know, that these little offices which are maintained, not only assay offices but land offices and others, are often maintained, often kept in existence, simply and solely and entirely as a matter of patronage. I know just as much about that as anybody else does. I have been through the mill myself. I have seen land offices disappear in my section of the country one at a time, and I have never seen one disappear without the man who held the office objecting to its disappearance.

Mr. WHEELER. The Senator is talking about an entirely different thing. A land office is one thing; an assay office is another. If the Senator will pardon me and let me explain it to him for a moment—at the present time, all through the West, by reason of the depression, literally thousands of people who can not find work are going into the hills and into the old mining districts to prospect. If those men have to ship every little bit of a sample clear back to New York City, or to some other distant point, it will take weeks and months before they can find out whether or not their prospect is worth anything or is not.

If the Senator knew the situation that existed out there in that section at the present time, I say that he would not be contending that it was just a matter of patronage. I have fought to keep these items in the bill when the patronage did not exist in connection with the matter in the slightest degree, because I had nothing to say about the patronage. I have stood here and fought for such things for 10 years, and it was not for the rich mining companies, because it does not make any difference to them, but it does make a tremendous lot of difference to the little prospector, to the fellow going out in the hills day after day and night after night trying to eke out a miserable existence, to get enough money to enable him to live.

It amounts to only a few thousand dollars to the Government of the United States, and it may mean the development of a great mining district; it has in times past. It is so infinitesimal it seems to me hardly worth while standing on the floor and fighting over it, and it would not be if it were not for the fact that it means so much to the individual prospector, who has to depend at the present time on getting a few dollars here and a few dollars there to keep his body and soul together.

Mr. NORRIS. Mr. President, it seems to me the Senator begs the question, and he is trying to put me evidently in the attitude of trying to increase the hardship of the poor fellow who goes out into the hills and prospects for gold, silver, or some other metal. I will not be put in that attitude. I am not taking that kind of a position. I do not believe the facts warrant any such imputation. I have sympathy for such a man, but I do not want the Government to establish an assay office for every man who goes out and hunts gold. I have to consider the necessities and the financial condition of the country, and that is what I am considering or trying to. I do not think it adds materially to the difficulties of any one of these poor men who are going out in the hills and suffering and hunting for gold to send his sample to some other place than Carson City or Helena, Mont. There are a good many other places left.

It is a question of the expense to the Government whether we should maintain an office in Carson City, Nev., in Salt Lake City, Utah, in Helena, Mont., or Boise, Idaho. I am not sure but that some of them ought to be kept in, but there is some reason in the fact that this bill comes over here every year from the House of Representatives with those items stricken out, and they go back in, because evidently there is a sufficient combination here between all these statesmen's interests which will put them back in the bill.

Mr. ODDIE. Mr. President, I know that there is no geographical distinction in this matter. The Senators from the Western States view these problems in a broad way. I know they have all helped as much as they could in passing legislation which would be of benefit to the State of Nebraska, for instance, and to other States. I know that, and the more the State of Nebraska prospers the gladder I shall be. I hope the Senator's people will all become wealthy; I should like to see that. But here is a great section of the West, an enormous area, with a very small population which needs some help. This is not a question of charity, it is a question of allowing an industry that has been in existence since the beginning of our country to continue.

The amount involved is small, and I know from experience that the appropriation will do great good and result in preventing much suffering and harm. I hope the amendment will be agreed to.

Mr. WALSH of Montana. Mr. President, there is no one who doubts in the slightest degree that the Senator from Nebraska is actuated by the very highest motives, and with a desire to promote the public good in his insistence upon a rejection of these amendments proposed by the Senate committee. But really he ought, it seems to me, give those of us who do not agree with him credit for being equally desirous of promoting the public good.

Mr. NORRIS. I want to do that. I have not said anything to the contrary, I hope.

Mr. WALSH of Montana. It seems to me the inference was the other way; that those who are urging the retention of the assay offices are simply actuated by a desire to hold some offices for somebody, which, of course, is scarcely consistent with a high desire to promote the public interest.

Likewise, when the House of Representatives takes one view about this matter and insists upon striking out the offices and the Senate takes another view and insists upon their remaining in the bill, as it has for the last 10 years every time the appropriation bill has been considered, it scarcely follows as a necessity at least that the House of Representatives is actuated by patriotic motives and that pure selfishness in the matter governs the action of this particular body.

Let me say likewise, as was said by others speaking in favor of these matters, that the matter of who shall be in charge of the assay office at Helena, Mont., is a matter of indifference with me. I wish I did not have anything at all to do with the selection of who shall be the assayer at Helena. I have stood here again and again for the past 10 years urging the retention of these assay offices, knowing at the time that I should have absolutely nothing whatever to say about who should be the assayer in charge getting a little salary, my recollection is, of something like $2,500 a year, an assistant getting $2,300, and a janitor $1,400. They comprise the total force of the office.

Let me say in this connection, as has been said heretofore, that it has been a matter of great gratification to all of us that the business of the prospector, having practically passed out of existence by reason of the depression from which we are all suffering, is being revived; that the unemployed are going into the hills and earning some of them possibly as little as a dollar a day washing gravel and getting some gold. Senators may have observed in the newspapers that an effort is being made to induce the unemployed in the congested cities of the country to go into the mountains and hills of the West and prospect, holding out to them the inducement that they will be able at least to make decent wages placer mining in a good many regions of the West.

That there is abundant room for that hope is clearly disclosed by returns from the Helena assay office for the last three years which I am able to give the Senate. In 1930 there were at that office 130 deposits, the aggregate value of which was $60,608. In 1931, although the number increased to 244, the aggregate value was only $58,657. But last year, 1932, there was a 100 per cent increase both in deposits and in value, the number of deposits being 556 and the value $137,434. That signifies a great deal to us people out West, although I dare say it does not mean anything at all to the Senator from Nebraska. It signifies a movement in that direction. It signifies a revival of the industry which has given to us the great gold mines of the West. At this time, when everybody is praying for an increase in our production of gold, why should we do anything to depress this movement?

Perhaps it would not signify very much, if anything, to the Senator from Nebraska if I should read a letter from the assayer in charge of the Helena office, but I dare say it might mean something to other Members of the Senate. I read briefly as follows:

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
UNITED STATES ASSAY OFFICE,
Helena, Mont., December 30, 1932.

Hon. T. J. WALSH,
United States Senate, Washington, D. C.

DEAR SIR: Your letter of December 24, 1932, at hand. In regard to the continuance of the assay office here, I believe its presence to be more necessary now than at any time since its existence.

Let me say the assay office was constructed away back in the year 1870, over 60 years ago, and has been in continuous service all that time. For some reason or other the House of Representatives has been endeavoring for a long time to abolish these offices and leave in existence the great assay offices and branches of the mint in New York, Philadelphia, New Orleans, and San Francisco. Just exactly what the interest is back of that I do not know, if there is any particular interest, but the effort has been persistent.

The letter continues:

Since the first of May, 1932, and up to December 31, 1932 (last seven months of 1932), we have had 614 deposits amounting to $145,167.91 in value. We are now, and have been for the past seven months, serving from 75 to 80 miners and prospectors a month and probably over 50 per cent of these prospectors would have had to receive outside aid otherwise.

It is just to that extent a relief to the relief organizations in the various cities of my State.

Mr. REED. Mr. President, will the Senator permit a question?

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Montana yield to the Senator from Pennsylvania?

Mr. WALSH of Montana. I yield.

Mr. REED. Do these assay offices make a charge to prospectors for their services?

Mr. WALSH of Montana. No; they do not. It was conceived to be in the interest of the Government to promote the bringing of gold and silver into assay offices for monetary use.

The letter continues:

During the calendar year of 1931 we had 383 deposits with a value of $85,924.74, and during the present calendar year we have had 756 deposits with a value of $191,001.46. This shows a gain of over 100 per cent in 1932 over 1931 in value and practically the same in number of deposits.

Regarding the number of deposits which this office failed to obtain because of lack of help (I was left alone during the month of August, owing to the retirement on account of age of W. L. Hill, former assayer in charge), I can only estimate, because as soon as it became known that considerable delay would ensue in getting their returns, they sent the deposits to Denver and elsewhere. My guess would be that if we could have gotten out all the deposits on time, we would have had from 100 to 200 more than we now have.

The psychological effect of closing this office would be all out of proportion to the small saving effected. Prospective mining operators and investors would give this country a "wide berth," arguing that if the Government did not think there was enough gold here to pay to maintain the office, it was probably a pretty good country to leave alone for mining ventures.

Very respectfully,

W. H. WRIGHT, *Assayer in Charge.*

Mr. President, I do not know that there is anything else to be said about the matter. As has been suggested, it is a small matter so far as expense to the Government is concerned. If we are going in for economy, opportunities in abundance will be presented, instead of taking away these little assay offices which exist merely for the purpose of giving employment to most deserving men, who, in addition to making their own living out of the thing, bring to the attention of investors properties that may be of inestimable value to the whole country, and particularly at this time, when the desire to increase the amount of gold ought to be in the minds of every citizen.

Mr. COSTIGAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Colorado?

Mr. WALSH of Montana. I yield.

Mr. COSTIGAN. Without having the latest figures of gold production in the West before me, I rise merely to say that the statement of the Senator from Montana accurately reflects recent prospecting and mining conditions in the State of Colorado. There has been a marked increase in deposits of gold in the last year, and Government assay facilities have been of substantial use to western prospectors.

Mr. VANDENBERG. Mr. President, I want to supplement the colloquy which I had earlier in the afternoon with the able Senator from Maryland [Mr. TYDINGS]. I am sure he is in pursuit of a more effective formula than the one which the present substitute brings to the Senate, the pending proposal which now bears his name. I am sure if he could find a formula that is practicable and more in keeping with the objective to which he addressed himself yesterday, he would be happy to embrace it. It is in no spirit of controversy but in one of suggestion that I want to ask him to consider this proposal.

It occurs to me that it would be highly logical in a situation such as that in which we find ourselves if the executive in charge of a department were to be left with the final responsibility for finding the ultimate place in which that particular department can make its contribution to the

arbitrary and further reduction in the Budget for that department.

I am thinking of the fact, for example, that we are proposing to give to the President of the United States substantial authority to reorganize, consolidate, and so forth, in respect to the departments. We can not anticipate what those precise actions will produce by way of economy. Why would it not be possible to treat each department's total appropriation precisely as the Indian school appropriations are treated in the Interior Department appropriation bill? There is an exact precedent for the thing I am suggesting to the Senator from Maryland. As I understand it, though the suggestion comes originally from the able Senator from New Mexico [Mr. BRATTON], this is the only place in any of the appropriation bills where this method of procedure is followed.

Mr. TYDINGS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Maryland?

Mr. VANDENBERG. Gladly.

Mr. TYDINGS. I concede that that would be the means of bringing about some economies, but it would not reach that large field of possible economies which might be effected if we could change some of the legislation upon which appropriations must be based. I will concede that that will do a part of the work, but it will not do the whole job.

Mr. VANDENBERG. I agree to that, Mr. President, but I am also suggesting that it will do a great deal more of a job than the substitute resolution which is now being submitted to the Senate on behalf of the Senator from Maryland.

Mr. BRATTON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from New Mexico?

Mr. VANDENBERG. I am glad to yield.

Mr. BRATTON. The Senator from Nebraska [Mr. NORRIS] made an observation yesterday which in my opinion had much force, and that was that when we begin to tear these bills down as they come to us separately, we act on one perhaps a month before we act upon a subsequent one. Perhaps we do not tear them all alike. One is cut deeper than another. What would the Senator from Michigan think about the system of making annual appropriations for the several departments in one bill, letting Title I contain appropriations for the Department of Justice, Title II for the Department of the Interior, Title III for the Department of Commerce, and so forth?

Of course, it would require separate subcommittees to consider each title; but when we put the several titles together, we would have the whole picture. If we knew that our contemplated revenue was so much, then by looking at the one bill we could ascertain that the total appropriations exceeded by so much the contemplated revenue, and therefore there had to be so much in the way of reductions accomplished, that those reductions should be prorated, and they could be prorated in one bill before the committee.

Mr. VANDENBERG. Mr. President, the Senator will recall that I raised precisely the same question yesterday in the debate in a question addressed to him. I entirely concur that that is the logical way to proceed to do a completed job, if we want a completed job.

Mr. BRATTON. If the Senator made the suggestion yesterday, I overlooked it. His views and mine are in accord. I think we can obviate discrimination among the several departments in that way; we could treat them all alike.

Mr. VANDENBERG. Of course, we can not do that, apparently, at the present moment, except as all bills be recommitted and all brought back together. But now let me pursue and identify, at least for further survey, the idea I was submitting. I am referring now to page 41 of the pending Interior Department appropriation bill, being House bill 13710, where the total appropriations listed and actually made by the particular section of the bill are $3,857,135. But, then, after all those have been listed the bill finally says:

> In all, for the above-named nonreservation boarding schools, not to exceed $3,755,000.

I call the Senator's attention to what has happened. After listing the total appropriations, which ultimately merely serve as limitations, as the Senator will see, then the bill says that the final sum actually available shall be $102,000 less than the items themselves actually total. In other words, in respect to that particular section of the appropriation structure those administrators who are ultimately responsible for the administration of the bill are left not only with responsibility to find the place where the $102,000 shall be saved, but they are put under the actual compulsion to save it.

Suppose we were to translate that same theory to the pending Treasury bill. The pending Treasury bill appropriates $244,000,000. Suppose we were to say at the end of the bill that the actual total appropriation, for the sake of the argument, is $200,000,000 or $225,000,000, with the other provision attached which limits the method of transfer, then we would put upon the administrators of the Treasury Department, under the new set-up which contemplates certain departmental and bureau changes, the responsibility for finding the place where that ultimate and final saving of 10 per cent, let us say, might be obtained. That is the method that would be followed by a board of directors in a private business certainly, and I submit to the Senator that he consider whether or not that sort of a formula, worked out in some practical fashion and added to the end of each of the appropriation bills, would not more definitely accomplish the objective which he had in mind yesterday.

Mr. TYDINGS. If the Senator from Michigan will reduce that suggestion to writing, I shall be very glad to consider it; but I do not want to be caught in the same position twice in which I was caught this morning; and I would rather have a little time to review that suggestion, lest I might be forced to ask the Senate for permission to withdraw the amendment a second time.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment reported by the committee will be stated.

The LEGISLATIVE CLERK. On page 34, line 6, after the name "New York," it is proposed to insert "Boise, Idaho; Helena, Mont.; Salt Lake City, Utah."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The next amendment of the Committee on Appropriations was, on page 34, line 15, after the name "Philadelphia," to strike out "$1,250,000" and insert "$1,275,000."

The amendment was agreed to.

The next amendment was, under the heading "Title II—Post Office Department, office of the Second Assistant Postmaster General," on page 57, line 4, after the word "*Provided,*" to strike out "That no part of the money herein appropriated shall be paid on contract No. 56 to the Seatrain Co.: *Provided further,*" so as to read:

> For transportation of foreign mails by steamship, aircraft, or otherwise, including the cost of advertising in connection with the award of contracts authorized by the merchant marine act of 1928 (U. S. C., title 46, secs. 861–889; Supp. V, title 46, secs. 886–891), $35,500,000: *Provided,* That not to exceed $7,000,000 of this sum may be expended for carrying foreign mail by aircraft under contracts which will not create obligations for the fiscal year 1935 in excess of $7,000,000.

Mr. MCKELLAR. Mr. President, the Senator from Florida [Mr. FLETCHER] wanted to be heard on that matter. So, in order that he may be present, I make the point of order that there is no quorum present.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Blaine	Caraway	Dale
Austin	Borah	Carey	Davis
Bailey	Bratton	Connally	Dickinson
Bankhead	Brookhart	Coolidge	Dill
Barbour	Bulkley	Copeland	Fess
Barkley	Bulow	Costigan	Fletcher
Bingham	Byrnes	Couzens	Frazier
Black	Capper	Cutting	George

Glass	Keyes	Pittman	Thomas, Idaho
Glenn	King	Reed	Thomas, Okla.
Goldsborough	La Follette	Reynolds	Townsend
Gore	Lewis	Robinson, Ark.	Trammell
Grammer	Logan	Robinson, Ind.	Tydings
Hale	McGill	Russell	Vandenberg
Harrison	McKellar	Schall	Wagner
Hastings	McNary	Schuyler	Walcott
Hatfield	Metcalf	Sheppard	Walsh, Mass.
Hawes	Moses	Shipstead	Walsh, Mont.
Hayden	Neely	Shortridge	Watson
Howell	Norbeck	Smith	Wheeler
Hull	Norris	Smoot	White
Johnson	Nye	Steiwer	
Kean	Oddie	Stephens	
Kendrick	Patterson	Swanson	

The VICE PRESIDENT. Ninety-three Senators have answered to their names. A quorum is present.

Mr. FLETCHER. Mr. President, the matter now before the Senate is a committee amendment on page 57, line 4, the committee seeking to amend the House text by striking out the language:

Provided, That no part of the money herein appropriated shall be paid on contract numbered 56 to the Seatrain Co: *Provided further*,

I feel that the House language should remain in the bill. If it were retained, it would mean a saving of $120,400. That would be the amount called for by the contract referred to if the House language should be stricken out. I think the committee made a mistake in attempting to strike out the House language.

I call attention to the report of the House committee, at page 18, in which the committee says:

In making the deduction in the Budget estimates the committee has also eliminated the amount of $124,400 for contract service with the Seatrain Co. about which there was considerable discussion at the last session. No compensation has been paid under this contract to date, the company foregoing pay voluntarily under the contract for mail service between New Orleans and Habana after entering the coastal business by operating car ferries between New York and Habana. So long as no payments are being made and the situation has been complicated by the coastal operations, the committee felt that deductions from the appropriation should be made.

I can not see how that statement can be answered. It sets forth the precise situation. The House committee said we ought not to make this appropriation because the Seatrain Co. have changed their original plan and purpose. Their application for this contract and the application for loans from the Shipping Board to build the two car ferries called seatrains were based upon the proposition that they were undertaking to do business between New Orleans and Habana. That would be foreign trade, of course. I insisted at the time, a year ago, when this proposition was up, that this concern could not live on the business between Habana and New Orleans.

That business has decreased. The traffic has decreased. There was not enough traffic there to justify the building of a single one of these ferries. There were at the time available ferries that had been operating between Key West and Habana that were out of business and asking to be allowed to operate between New Orleans and Habana, because the business between Key West and Habana had dropped off so that they could not live. They were attempting to operate those ferries from Habana to New Orleans, and they were ample to carry on that business. There was a mail contract already in existence between the Postmaster General and the United Fruit Co. to carry the mails from New Orleans to Habana. That was actually in operation at the time they made this application.

Mr. McKELLAR. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Tennessee?

Mr. FLETCHER. I do.

Mr. McKELLAR. There were two contracts. The Government had subsidized two contractors to carry the mails from New Orleans to Habana. Together, they carried about 1,500 pounds of mail a year. Now, this proposed subsidy to the Seatrain Co. will subsidize a third shipping company to carry the mails from New Orleans to Habana.

Mr. FLETCHER. At any rate, ample provision had been made for carrying the mail from New Orleans to Habana, and a contract was outstanding at the time. There was no occasion or need for making any new contract with any new concern for carrying that mail. There was no traffic justifying additional means of transportation between those two ports, because every needed facility for that business was already in existence.

Mr. BLACK. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Alabama?

Mr. FLETCHER. I do.

Mr. BLACK. I am not sure that I understood the Senator. Is it true that there is no Seatrain Co.?

Mr. FLETCHER. Oh, no; there is a Seatrain Co. There is a corporation by that name.

Mr. BLACK. In what business is it engaged now?

Mr. FLETCHER. That is what I am going to get to in just a minute.

I insisted that there was no occasion for making the original contract with these people, or responding to their application, because there was no need for additional service there to begin with. The service was already taken care of.

What did they do? They proceeded to organize the Seatrain Corporation. They obtained a loan from the Shipping Board to build two of these "seatrains." They are ferries carrying about 90 freight cars each. The company call them "seatrains." They load the loaded cars in these ferries—a very good arrangement for that purpose, I suppose—about 90 of them. They take a whole trainload of about 90 freight cars, put them into the holds of these vessels by machinery, and they are moved wherever they want to carry them. They call them "seatrains." They are really car ferries.

The company obtained loans from the Shipping Board to build two of these ferries. Of course, they had to build them here in the United States. About 75 per cent of their cost was furnished by the Government at a very low rate of interest. There was no justification, commercially or otherwise, for any such venture. I pointed that out last year.

Now, what has happened? The company borrowed the money from the Shipping Board and built the ferries, and now they are operating between New Orleans and New York, simply stopping at Habana on the way. They are not operating the service from New Orleans to Habana, a foreign port, alone; but they are operating those ferries, carrying freight from New Orleans to New York and New York to New Orleans, putting in at Habana, in order to get this $240,000 a year pay for carrying the mail from New Orleans to Habana. The contract had already been made for that; but in order to get that pay they operate this line of seatrains from New Orleans to Habana and on to New York and the same way back.

That, of course, is coastal business. It is coastwise traffic. It is not foreign traffic at all. The law never contemplated making loans to any concern that was engaged in coastwise business. There is plenty of competition along our coasts; there is no occasion to subsidize a concern operating ships on our coasts; and it never has been done.

Mr. REED. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Pennsylvania?

Mr. FLETCHER. I yield.

Mr. REED. The Senator says that it was not contemplated that these vessels engage in coastwise service. I note that section 19 of the law provides that during any period in which the vessel is operated exclusively in coastwise trade, or is inactive, the rate of interest shall be so-and-so, and that during any period in which the vessel is operated in foreign trade the rate shall be lower.

Mr. FLETCHER. That is with reference to the ship, and not with reference to the mail contracts.

Mr. REED. Obviously, as far as these construction loans went, it was contemplated that these vessels constructed in this way should be used in coastwise service.

Mr. FLETCHER. I am not complaining about the authority of the Shipping Board to make the loan; but the purpose of this whole thing to begin with, of course, was getting the mail contract; and that contract is only let to carriers in foreign business. It is not let to coastwise vessels at all. The Shipping Board may loan them money, but the purpose of these people all along has been to get the benefit of the ocean mail pay. They would not build seatrains to engage in the coastwise trade.

Mr. McKELLAR. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Tennessee?

Mr. FLETCHER. I do.

Mr. McKELLAR. I am afraid the Senator from Florida has left the wrong impression upon the mind of the Senator from Pennsylvania. Under the law, coastwise shipping can not obtain these subsidies. It must be foreign shipping with foreign countries.

Mr. FLETCHER. Yes.

Mr. McKELLAR. Now, if the route covered by this contract is extended—and the purpose of the department is to extend it, if they can, from New Orleans to Habana and then on to New York—if that is done, manifestly that will be an evasion of the law, and ought not to be allowed.

Mr. REED. No, no; the Senator has not understood me.

Mr. McKELLAR. Perhaps I did not.

Mr. REED. I do not think anybody has suggested that this company should have a mail contract for carrying mail from New York to New Orleans. Nobody suggested that. The present contracts do not provide for it.

Mr. McKELLAR. But the Postmaster General or his assistant does say that that is the intention.

Mr. SMOOT. Mr. President, this is what Postmaster General Brown said on page 116 of the hearings:

> We could pay them only for the voyage from New Orleans to Habana. That is as much as we could pay them for.
>
> Senator BROUSSARD. And that is what they are trying to fix right now?
>
> Postmaster General BROWN. Yes. They admit that if the ship is partly loaded with freight for New York, their operation then is not 100 per cent a foreign operation, but it is partly a domestic or coastwise operation; and they are willing to waive the proportion of their mail pay that their coastwise cargo bears to the total earnings of the voyage.

Mr. FLETCHER. Yes; I understand that. The Postmaster General rather reversed himself to some extent and took a different ground from that which he took before the House committee. I have the House hearings here. The chairman asked him (p. 22):

> What became of the Seatrain controversy?
>
> Mr. BROWN. It is still pending before the department.

And I may say at this point that if anything is done, such as is suggested in the statement just read by the Senator, it would mean a new contract. The old contract is off. They are seeking pay under the old contract.

> Mr. BROWN. It is still pending before the department. I think they have been asking us to modify their contract and permit them to call at Cuba and go on up to New York, and we have not been able to see the propriety of that.

This is his statement before the House committee.

> The two new ships are now in commission; they have started the service, but we have not yet begun to pay on their contract. The bottom has fallen out of the Cuban trade. They were to run between New Orleans and Cuba, and apparently the Cuban business has disappeared, temporarily at least, and they now want to run the vessels from New Orleans to New York, calling at Cuba.

I prophesied a year ago that that was going to be the termination of their whole undertaking, and they have come to it now. Instead of doing business between New Orleans and Habana, they want to do business between New York and New Orleans; and they make the stop at Cuba merely for the purpose of getting $240,000 a year out of the Government under pretense of carrying the mail from New Orleans to Cuba. The law does not permit giving these contracts to vessels for coastwise operations. It only permits giving the contracts to those carrying foreign mails, so they try to meet that by stopping at Habana and calling this a foreign business.

You see what the chairman says. The chairman then asks the Postmaster General:

> What advantage could be gained by that, Mr. Brown; I mean from the standpoint of public service?
>
> Mr. BROWN. It would enable New Orleans to have another coastwise service in carload lots; it would enable New York and New Orleans to exchange freight trains; and they would want us to pay them their subsidy for the part of the route between New Orleans and Habana.

That is the statement.

The chairman says:

> Of course, that would have a corresponding depressing effect on the railroads?
>
> Mr. BROWN. Yes. While the matter has not been definitely disposed of in the department, because they have asked for some further hearings and opportunity to present further briefs, as yet they have failed to convince us that the contract should be modified as they propose.

He goes on farther in these words. The chairman asks:

> While the railroads are in the trouble that they are now, I wondered how it would affect them.
>
> Mr. BROWN. The merchant marine act of 1928 contemplates commerce between the United States and foreign countries, and there is no authority for giving any subsidy to a coastwise line.

He further says:

> Well, we could not pay them a subsidy for moving their ships between New York and New Orleans, but their plan is to move between New Orleans and Habana, calling at Habana and going on to New York, then returning to New Orleans via Habana. They would use their mail pay between Habana and New Orleans to enable them to compete with other coastwise vessels that have no mail pay.

In other words, here is a concern proposing to do a coastwise business that proposes to compete with all our coastwise vessels and the railroads in moving freight between New Orleans and New York in carload lots, and at the same time be supported by Government aid to the extent of $240,000 a year—an unheard-of thing.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from New York?

Mr. FLETCHER. I yield.

Mr. COPELAND. May I ask the Senator whether there is a contract existing between the Seatrain Co. and the Government?

Mr. FLETCHER. Oh, yes. They have made the contract; but when they attempted to operate these vessels coastwise, they had to go to the Shipping Board and get permission. The Shipping Board, after hearings, granted permission but said, "We do it only on condition that you waive your subvention pay, your mail-contract pay."

Mr. COPELAND. Is that a matter of record?

Mr. FLETCHER. Yes. I will get to that. That is a matter of record. The Shipping Board afterward admitted that they really did not have anything to say about the mail pay; but that was their first resolution, that this permission was granted on condition that the Seatrain Co. waive their mail pay. Afterward the Shipping Board said, "That is a matter for the Postmaster General; but we will give you this permission for six months and see how you come out on it"; and the company themselves said, "We will waive the mail pay for six months." So that, although they began operation about October 1, no mail pay has been made, and none will be made until May 1. They have agreed themselves to waive all mail pay until May 1, 1933. So that part has been settled, and the question of whether they will be entitled to any mail pay or not is the question pending.

Mr. REED. Mr. President, will the Senator permit a question at that point?

Mr. FLETCHER. I yield.

Mr. REED. Was not the reason why they did away with the mail contract the fact that they were not going to be permitted to start their vessel out of New York Harbor until they promised the Shipping Board that they would yield? In other words, they were blackjacked into giving up their mail contract.

Mr. FLETCHER. I have here the statement about that. That is not quite the case. They did not have any authority to operate these seatrains coastwise until they got that permission from the Shipping Board, and the board had to consider that, and finally agreed to give them that permission, provided they did not claim the mail pay.

Now, I turn to page 141 of the House hearings, where Mr. Glover's statement appears in connection with what the Senator has just mentioned.

Mr. SMOOT. Mr. President, while the Senator is looking that up I would like to say to the Senator from New York that not only have they a contract but the Government of the United States advanced three-fourths of all the money to build the seatrain.

Mr. FLETCHER. That is true.

Mr. COPELAND. Mr. President, if the Senator will permit me, I am very jealous of these contracts because of my interest in the American merchant marine. I have no particular interest in the Seatrain Co., but I want to know whether or not there was a contract, or is in existence a contract, between the Seatrain Co. and the Postmaster General, a legal contract binding on the United States Government, and if there is such a contract, the burden of proof certainly is upon those who seek to abrogate it to show cause why that should be done.

Mr. FLETCHER. I see the Senator's point. The contract was made with them to carry the mail between New Orleans and Habana. Now they are operating between New Orleans and New York, and they are proposing now to change the contract. That is the subject now before the Postmaster General. They are endeavoring to change that contract, to modify the contract, as I have just read from the testimony, which means a completely new contract.

Mr. KING. Mr. President, will the Senator yield?

Mr. FLETCHER. I yield.

Mr. KING. I just want to ask, if I may, did not the element of fraud enter into the contract between the Postmaster General and this company; that is to say, did not the company make representation for the purpose of inducing the Postmaster General to enter into this contract, the representation being to the effect that they were going to operate only between New Orleans and Habana, that it was to be a mail train, but back of it was the purpose to operate to New York, and then evade the law by stopping en route, so that there was the element of fraud?

Mr. McKELLAR. Mr. President, will the Senator yield to me for just a statement upon that point?

Mr. FLETCHER. I yield.

Mr. McKELLAR. In the very first place, when the advertisement was made, in August, 1931, for this contract, although the law required competitive bidding, the Postmaster General provided there should not be any competitive bidding by putting this provision in the invitation—a provision that the contractors should have constructed in American shipyards two new cargo vessels capable of carrying not less than 90 railroad cars. No other concern could comply with such a stipulation except this concern.

Mr. FLETCHER. I will take just a moment more. I want to make one more point. I read from the testimony of Mr. Glover, Assistant Postmaster General, as it appears on page 141 of the House hearings:

The CHAIRMAN. We had last year a controversy in reference to the Seatrain. That comes under this item?

Mr. GLOVER. Yes; that is the last one, I think.

The CHAIRMAN. What about that?

Mr. GLOVER. That is rather an involved question, Mr. Chairman and gentlemen, and I am sure the Postmaster General defends his right to make that contract. That was a good contract. There is nothing the matter with the Seatrain contract, the way the Postmaster General made it.

If the Senator from New York will do me the honor to listen, I am trying to reach the point he asked about. This is the testimony of the Assistant Postmaster General before the House committee. He tells about the contract and then says:

But bear in mind that the operation of that line has changed very materially since the Postmaster General made that contract. They went into the intercoastal business, and the Postmaster General has never recognized that. If they had performed the service under the contract from New Orleans to Habana, they would have been entitled to their mail pay; and I am not certain that they are not entitled to their mail pay now, because they have, under the contract filled every requirement.

But when they went into the question of taking loaded cars from New Orleans to Habana and then taking them to New York, they entered the intercoastal trade.

I am not questioning the fact that that is not good service from your State, Tennessee, for instance, taking loaded cars to New Orleans, then taking them by water at greatly reduced rates and delivering them to New York, and then delivering the cars via the New York Central Railroad to Albany, and saving considerable freight charges. But that is not the question.

The Shipping Board has advanced money for two seatrain boats, built in American yards. There is no question about the one built on the other side. The Comptroller General has already passed on the validity of that.

The Shipping Board loaned them the money for these two boats, but when they started in on the coastal trade they had great objection from the local steamship companies which operate from New York to Habana and from New York to New Orleans and from New Orleans to Habana, and also from the eastern railroads, who were getting the haul from the interior points.

So, to permit the Seatrain Co. to start their service—and they did not want to delay the operation of the two boats—they willingly agreed with the Shipping Board that as long as they were engaged in the intercoastal trade there was to be no mail pay.

Referring to the question raised by the Senator from Pennsylvania, I call his attention to the statement in the hearings on page 146:

The CHAIRMAN. All three ships are in service?

Mr. GLOVER. Yes. They had a vessel which was to sail on Thursday night at 3 o'clock, and the Shipping Board said, "Nothing doing. We will not pay you this additional amount of money you owe to the Sun Shipbuilding Co. in Wilmington."

Then they drew up this letter and this agreement and they took it out of the hands of the Post Office Department. I question whether they had that right—that is, the Shipping Board. The Postmaster General was not consulted.

They made this agreement and then they gave them a lift order, and the vessel sailed that night about 8 o'clock on the first trip, some time in September.

To the best of my knowledge and belief that service is now in operation between New Orleans and Habana and from Habana to New York.

The CHAIRMAN. So they are really operating between New Orleans and New York via Habana?

Mr. GLOVER. Yes, sir.

Their contract with the Post Office Department is to carry mail between New Orleans and Habana, and they are doing that without pay now.

Mr. REED. Mr. President, will the Senator permit an interruption there?

Mr. FLETCHER. Yes.

Mr. REED. Is it not a fact that the mail contract they had provided that the contract should be forfeited if they did not sail by May 31, 1932, and that the Shipping Board held them up to that very day before it would give them permission to sail? And, of course, the owners were desperate by that time; they saw themselves being forced to forfeit their contract with the Government because of what another arm of the Government was compelling them to do. Finally, in their desperation, they agreed to forego any compensation from their mail contract if the Shipping Board would let them get that ship out of the port before the deadline was reached. That is the reason why they did that. You might as well take a man by the throat and choke his confession out of him and then claim that you had not done it by duress.

Mr. FLETCHER. There has been a good deal of detail in this and we will not have time to go into that now, and the controversy relates to the contract and with reference to their plans and that sort of thing. The Shipping Board were within their rights. This mail-pay business is pledged, and the Shipping Board has a part of their security. Of course, if they were about to do something that would violate their contract, or under which they could not get their pay, the Shipping Board would be interested in that, and they would not allow them to move their ships and start the service until they were sufficiently protected, and they were protected by the agreement that they would not have their pay for six months.

Now, let me read just one more line:

Their contract with the Post Office Department is to carry mail between New Orleans and Habana, and they are doing that without pay now. They waived their right to that pay—

This is Mr. Glover speaking.

They waived their rights to that pay so they could perform this intercoastal service, and the Shipping Board is having hearings now with the idea of threshing out the question whether they are going to permit a Shipping Board loan, loaned exclusively for the building of vessels to be engaged in plying between an American port and a foreign port—whether they are going to give them the right to use it for a vessel plying between intercoastal ports.

Then the chairman asked the question, and Mr. Glover said:

We have threshed it out, the Postmaster General and myself, and I think they could beat us in a court of law. But I do not think the present Postmaster General will modify that contract so that they will be entitled to any mail pay if they insist on operating in the intercoastal service.

Mr. COPELAND. What was the statement about the court of law? I did not catch that. The Senator said something about the Postmaster General thinking that the Seatrain Co. could beat the Government in a court of law.

Mr. FLETCHER. He indicated that. Mr. Glover said:

I do not think the present Postmaster General will modify that contract so that they will be entitled to any mail pay if they insist on operating in the intercoastal service.

Mr. COPELAND. What does he say further about a court of law?

Mr. FLETCHER. He thinks they could sue on their contract, I assume; but they have applied for a modification of the contract. If they were suing on the contract and standing on the contract and operating between New Orleans and Habana, they could sue.

Mr. COPELAND. What was the date of that colloquy?

Mr. FLETCHER. It appears on page 146 of the House hearings.

Mr. COPELAND. Of this year?

Mr. FLETCHER. Yes; on this very bill. I am reading testimony with reference to the pending bill.

Mr. COPELAND. Is there a question in the mind of the Senator as to the pay they could get for carrying mail between New Orleans and Habana?

Mr. FLETCHER. I think they would have to make an entirely new contract.

Mr. COPELAND. The Senator thinks the whole contract has been vitiated by reason of the intercoastal service?

Mr. FLETCHER. Yes; because the contract provides for the carrying of mail between New Orleans and Habana, not for service between New Orleans and New York.

Mr. REED. They are not proposing to carry mail to New York, are they?

Mr. FLETCHER. I do not know whether they propose to carry it or not. They carry hardly any mail at all.

Mr. REED. They are performing their contract in every respect between New Orleans and Habana?

Mr. FLETCHER. We had a contract with the United Fruit Co. to carry the mail more quickly and better than this. This is a freight line; they ought not to carry any mail at all. I am not commenting about their contract between New Orleans and Habana. The same boat takes the mail to Habana and goes on to New York loaded with freight, and then comes back from New York to New Orleans. The voyage is from New Orleans to New York and not merely from New Orleans to Habana. They stop at Habana incidentally on the way to New York in order to get this $240,000 a year for carrying the mail.

Mr. ODDIE. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Nevada?

Mr. FLETCHER. I yield.

Mr. ODDIE. I would like to have the clerk read a letter from the Postmaster General to the Seatrain Co., dated January 11, which I think will throw some light on this question, and I will also ask that there be printed in the RECORD immediately following it a letter from the Seatrain Co. to the Postmaster General.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the clerk will read as requested.

The legislative clerk read as follows:

JANUARY 11, 1933.

SEATRAIN LINES (INC.),
39 Broadway, New York, N. Y.

GENTLEMEN: Receipt is acknowledged of your letter of January 9, 1933, in which you state that, in consideration of the permission granted you by the Shipping Board in its resolutions of October 6 and December 21, 1932, to engage temporarily in coastwise trade between New Orleans and New York by way of Habana, you desire to request a modification of your contract on ocean mail route No. 56, between New Orleans and Habana, so that you shall be paid thereunder, during the period of said coastwise operation between the above-named points, only such proportion of the pay named in the contract as the revenue earned on outward voyages over the mail route from foreign traffic bears to the total revenue earned on such voyages, the revenue from other trade from New Orleans to Habana being taken as such proportion of the revenue on coastwise trade from New Orleans to New York as the distance from New Orleans to Habana bears to the total distance from New Orleans via Habana to New York.

In view of the premises and considerations stated in your letter, it would, in my opinion, be in the interest of the Government to accept your proposal, and I hereby agree to the modification of the contract on ocean mail route No. 56 accordingly.

Very truly yours,

WALTER F. BROWN.

The PRESIDENT pro tempore. The Senator from Nevada asks that a second letter be printed in the RECORD. Without objection, it is so ordered.

The letter is as follows:

JANUARY 9, 1933.

The POSTMASTER GENERAL,
Washington, D. C.

SIR: The contract for ocean mail service on route No. 56 made the 31st day of October, 1931, by the United States of America, represented by the Postmaster General, and the Seatrain Lines (Inc.), provides, inter alia, that the latter undertakes, covenants, and agrees with the United States of America, pursuant to the provisions of the merchant marine act, 1928, and the advertisement of the Postmaster General, as follows:

"1. (a) To carry all mails of the United States offered, whatever may be the size or weight thereof, or the increase therein during the term of this contract, in a safe and secure manner, free from wet or other injury, from New Orleans, La., to Habana, Cuba, on a schedule approved by the Postmaster General, that shall include not less than 50 trips per annum during the first two years and not more than 100 trips per annum during the remainder of the contract term (subject to other provisions of this contract for increase or decrease in frequency).

* * * * * * *

"(g) To provide and operate in the performance of this contract, cargo vessels of class 5, capable of carrying not less than 90 railroad cars and of maintaining a speed of 13 knots at sea in ordinary weather, and of a gross registered tonnage of not less than 6,500 tons.

"(h) To have constructed in American shipyards two new cargo vessels of class 5, capable of carrying not less than 90 railroad cars and of maintaining a speed of 14 knots at sea in ordinary weather and of a gross registered tonnage of not less than 6,500 tons, and place them in service in lieu of or in addition to vessels specified in paragraph (g) hereof, as soon as practicable, but not later than the end of the second year of the term of this contract.

* * * * * * *

"6. (a) That the term of this contract shall be 10 years, beginning at a date optional with the contractor but not earlier than January 1, 1932, or later than October 31, 1932."

Seatrain Lines (Inc.) has constructed in an American shipyard, in compliance with the terms of said contract, two new cargo vessels which have met the requirements referred to in paragraph 1 (h) above. One of said vessels was placed in service from New Orleans to Habana on the 13th day of October, 1932, and the second vessel on the 20th day of October, 1932. Since said dates said vessels have made regular sailings weekly from New Orleans to Habana and have been and now are ready, able, and willing to perform all of the services required of Seatrain Lines (Inc.) by said mail contract.

Said vessels were constructed with the aid of construction loans under and pursuant to agreements made the 3d day of December, 1931, between Seatrain Lines (Inc.) and the United States of America, represented by the United States Shipping Board. Said agreement contained, inter alia, the following provision:

"SEC. 38. The vessel will be operated in maintaining service on lines between New Orleans, La., and Habana, Cuba, and in other exclusive foreign service between Atlantic and/or Gulf ports and Cuba, or in such other service or services as the board may by resolution hereafter authorize, and not otherwise."

The United States Shipping Board, by a resolution adopted October 6, 1932, and subsequently amended by a resolution adopted December 21, 1932, has authorized Seatrain Lines (Inc.) to carry coastwise trade between the ports of New York and New Orleans

via Habana in the new Seatrain vessels for a period of six months from October 6.

Said vessels, ever since the adoption of said resolution on October 6, have been and now are engaged in foreign trade between New Orleans and Habana and New York, and vice versa, and at the same time in coastwise trade between New Orleans and New York via Habana, and vice versa. While thus simultaneously carrying foreign trade from New Orleans to Habana and coastwise trade from New Orleans via Habana to New York, said vessels have performed the full mail contract service between New Orleans and Habana and have transported all cargo offered in foreign trade between said ports, all in compliance with said mail contract and construction-loan agreements.

Inasmuch as the total mail compensation payable under said mail contract will, through the performance by said vessels of not less than 50 voyages per annum during the first two years and 100 voyages per annum during the remaining eight years of the term of said contract, being the schedule approved by the Postmaster General pursuant to section 1 (a) of said mail contract, amount to a sum which will be somewhat less than the excess costs of building said vessels in the United States and operating them under the American flag over what would have been the costs of their construction in foreign shipyards and of their operation under foreign flags; and as the mail compensation payable under and pursuant to the provisions of the merchant marine act, 1928, is designed to meet the amount of such differentials in costs so as to place the owner of an American vessel engaged in a foreign trade substantially on a parity with the owner of a similar foreign vessel in such trade as respects capital costs and costs of operation; and as Seatrain Lines (Inc.) is and will be benefited by reason of the authorization of the United States Shipping Board to carry coastwise trade between New Orleans and New York via Habana while fully performing said mail contract and maintaining its full foreign service under and pursuant to said construction-loan agreements, Seatrain Lines (Inc.) does not conceive it to be fair to the United States in the circumstances stated that it, Seatrain Lines (Inc.), should accept and retain the full mail compensation payable under said contract while it is simultaneously carrying foreign and coastwise trade in said vessels on said mail route between New Orleans and Habana.

Now, therefore, in consideration of the premises, Seatrain Lines (Inc.) hereby offers and undertakes, so long as it shall by reason of an authorization of the United States Shipping Board carry coastwise trade between New Orleans and New York via Habana while performing said mail contract on route No. 56, to relinquish to the United States, and to waive all claims to, such proportion of the full mail compensation which would be payable under and in accordance with the terms and conditions of said mail contract as the revenue earned on the outward voyages on said route No. 56 by Seatrain Lines (Inc.) with the vessels performing said mail contract from coastwise trade from New Orleans to Habana bears to the total revenue earned as aforesaid on both foreign and coastwise trade from New Orleans to Habana, the revenue from coastwise trade from New Orleans to Habana being taken as such part of the revenue on coastwise trade from New Orleans to New York as the distance from New Orleans to Habana bears to the total distance from New Orleans via Habana to New York.

SEATRAIN LINES (INC.),
By GRAHAM M. BRUSH,
President.

Witness:
G. S. AMORY.

Attest:
DONALD D. GRAVES,
Assistant Secretary.

Mr. FLETCHER. Mr. President, I want to call the attention of the Senate to Mr. Glover's testimony at page 142 of the hearings, where he said:

But if they had gone ahead with the service from New Orleans to Habana, that would have been all right. I do not question that. I have my own mind about the usefulness of that service.

The CHAIRMAN. Would not the Government get into hot water if it undertook to give them the service from Habana to New York in competition with other coastal lines?

Mr. GLOVER. I agree with you, sir. It would be paralleling some of the lines already under contract. Those contracts are covered somewhere in the list of foreign contracts.

The CHAIRMAN. You have not spent anything on the Seatrain this year?

Mr. GLOVER. No, sir.

The CHAIRMAN. You do not think you will spend any?

Mr. GLOVER. I think it is a safe bet.

In other words, they do not expect to spend this money that is asked for in the appropriation bill. They do not need it and they do not expect to spend it.

Mr. REED. They will spend it in the next fiscal year for which we are appropriating.

Mr. FLETCHER. He said he did not think they would spend anything.

Mr. COPELAND. Mr. President, if the Senator will permit me, I want to call the attention of the Senate to the hearings where the chairman inquired:

Suppose the Shipping Board were to decide they would permit that, which it seems to me ought not to be done, but suppose they should decide they would permit that—

Meaning to do this intercoastal work in addition to carrying the mail to Cuba—

would the Post Office Department contract apply under those circumstances?

This is the reply, and this is the thing I think we ought to ponder somewhat:

Mr. GLOVER. We think the Seatrain Co. could collect without any doubt. We have threshed it out, the Postmaster General and myself, and I think they could beat us in a court of law.

Mr. McKELLAR. Is Mr. Glover a lawyer?

Mr. COPELAND. I do not know.

Mr. FLETCHER. That is based on the idea that they have a legal right to engage in coastwise business; that they are not absolutely confined to the transfer of mails from New Orleans to Habana at all. Suppose they are given that right, then he says they can collect. Maybe he is right, but that is based on a change of conditions and a change of contract entirely.

Mr. McKELLAR. I want to ask a question about the situation in the House. The House voted on this bill, did it not?

Mr. FLETCHER. Yes.

Mr. McKELLAR. They had a yea-and-nay vote. We are talking about something that we have no more chance to put in the bill than to fly to heaven, in my judgment. The House will not change its view. Whatever we may do with it in the Senate, we would have to let the provision go to conference, and we know it will not be allowed to remain in the bill in conference.

URGENT DEFICIENCY APPROPRIATIONS

Mr. HALE. Mr. President, from the Committee on Appropriations I report back favorably, without amendment, the bill (H. R. 14436) making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes. I ask unanimous consent that the unfinished business be temporarily laid aside and that the Senate proceed to the consideration of the bill.

Mr. McKELLAR. Mr. President, I have no objection if it will not lead to debate.

Mr. HALE. I do not believe it will lead to any debate.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Maine that the unfinished business be temporarily laid aside and that the Senate proceed to tne consideration of the deficiency appropriation bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. HALE. Mr. President, this is the deficiency bill which was recently vetoed by the President on account of a provision in the bill relating to income-tax refunds. The House has passed the bill exactly as it was formerly passed by the two bodies, but leaving out altogether an item of $28,000,000 for tax refunds. The Senate Appropriations Committee has approved the bill as passed by the House of Representatives and has so reported it without amendment. I ask that the formal reading of the bill be dispensed with.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered. The bill is open to amendment.

Mr. BINGHAM. Mr. President, as the chairman of the Appropriations Committee has stated, the House in sending the bill to the Senate left out a $28,000,000 item relating to that amount of money which we collected from the taxpayers due to their desire to get their income taxes paid and their hope that some day they might get an abatement in case the points in dispute should be settled in their favor. The Treasury Department has decided that we collected some $28,000,000 too much from these taxpayers and recommended the refund to them of the money.

It seems to me that in honesty and fairness to our creditors we ought to make provision to pay them the money. There-

fore I move that there be inserted in the proper place the item of $28,000,000 for refunds.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Connecticut.

Mr. McKELLAR. Mr. President, I want to state that I understood that we had an agreement that the bill should be passed without this item in it. I was advised that this would be so, and so I advised the chairman of the House Committee on Appropriations. The House took that view of it and the Appropriations Committee of the Senate has taken that view of it. I hope the amendment of the Senator from Connecticut will be voted down. The Senate Appropriations Committee overwhelmingly voted it down a while ago and I hope it will be voted down now by the Senate.

Mr. BINGHAM. Mr. President, the Senator from Tennessee implies that I have broken an agreement.

Mr. McKELLAR. Oh, no; not at all.

Mr. BINGHAM. I knew of no agreement that this money should not be paid. No such agreement was mentioned at the committee meeting which the Senator from Tennessee and I attended. The matter was brought before the committee and after a very brief discussion it is quite true that the motion which I made was voted down. That does not break on my part any agreement. I announced at the committee meeting that I would move to take it up on the floor of the Senate.

Mr. McKELLAR. I am making no charge of that kind against the Senator from Connecticut.

Mr. BINGHAM. Mr. President, where the United States owes money which it agrees it owes, and which has been carefully gone into by the Budget and by the House previously and approved by them, I feel very strongly that the payment of the money should be approved by the Senate, and we ought not to keep our creditors waiting any longer than is necessary.

I do not desire to prolong the debate at all and I shall not take advantage of any privilege of having the bill go over for a day. I do want to go on record as stating my belief that when the United States Government owes its creditors money and admits it the money ought to be paid, and paid promptly.

Mr. HALE. Mr. President, there is no question in any way of the Senator from Connecticut breaking faith or of anyone else breaking faith. It was thought that if we could get rid of the refund item for the time being, we could get the bill passed with the District of Columbia item in it. It is vitally essential that that item should go through to-day. The District Commissioners have a pay roll of some $23,000 which they must meet to-morrow. There are some 3,500 families dependent on getting the bill passed. The District is in debt some $45,000 and we must get this bill passed in order to enable the District Commissioners to carry on their work. I hope very much that we may have a vote on the Senator's amendment, and I hope the amendment will be defeated and the bill passed.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Connecticut.

Mr. COSTIGAN. Mr. President, if a vote is to be taken on this matter, I shall feel under obligation to suggest the absence of a quorum.

Mr. McKELLAR. Mr. President, I hope the Senator will not do that. Let us see if we can not vote the amendment down.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Connecticut. [Putting the question.] The Chair is in doubt. Those in favor of the amendment will rise and stand until counted.

Mr. McKELLAR. Mr. President, if it is proposed to vote in that way, I shall suggest the absence of a quorum.

Mr. McNARY. Mr. President, will the Senator withhold that a moment?

Mr. McKELLAR. I will withhold it a moment, but I am not going to let this amendment be adopted in any such way as that.

Mr. McNARY. Mr. President, a number of Senators have left the Chamber with the impression that there would be no vote to-night. I think it would be exceedingly unfair to bring them back to-night, as would be the case if there is to be a roll call.

Mr. McKELLAR. Unless this amendment is withdrawn, there will certainly be a roll call, and we might as well understand it.

Mr. McNARY. I suggest, in view of the situation, that we now recess until 12 o'clock noon to-morrow, and I make that motion.

Mr. COSTIGAN. Mr. President, will the Senator withhold his motion for a moment?

Mr. McNARY. Very well; I withhold the motion.

INFORMATION FROM TARIFF COMMISSION

Mr. COSTIGAN. Mr. President, I trust the able Senator from Oregon [Mr. McNARY] and the Senators in charge of the pending bill will permit me to call up for immediate consideration two resolutions reported from the Committee on Finance with the recommendation that they pass. One of them is urgent.

Mr. McKELLAR. Mr. President, will the Senator state what they are?

Mr. COSTIGAN. The resolution to which I refer as urgent calls for a report by the 1st of February from the Tariff Commission. The resolutions are designed to supply the Senate with information which may be helpful to the incoming administration in inaugurating a tariff bargaining policy.

Mr. McNARY. Asking the Tariff Commission for information?

Mr. COSTIGAN. Precisely.

Mr. McNARY. In the usual form of such resolutions offered here?

Mr. COSTIGAN. It is, in my judgment, in the usual form, and it is understood that it will necessitate no discussion. I have spoken this afternoon to the chairman of the Committee on Finance about it. He stated that he would offer no objection.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

Mr. REED. Mr. President, just a word of explanation before action shall be taken. The Senator from Oregon asked if the resolution was in the usual form. I think the resolution is in a most unusual form.

Mr. McNARY. I was going to ask to have it stated from the desk.

Mr. REED. It calls upon the Tariff Commission for its advice regarding the possibilities of fixing tariffs by collective bargaining with other countries. A majority of the Senate Finance Committee has voted for a favorable report, but a considerable number of us voted against it. I do not believe that we would have enough votes to defeat the resolution in the Senate, but I should be unwilling to have it go by without any comment and with the implication that everybody has agreed to it.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

Mr. BINGHAM. I object, Mr. President.

The PRESIDENT pro tempore. Objection is made.

RECESS

Mr. McNARY. I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to; and (at 5 o'clock and 15 minutes p. m.) the Senate took a recess until to-morrow, Saturday, January 28, 1933, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

FRIDAY, JANUARY 27, 1933

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Thou, our everlasting portion, who hast inclosed us in an everlasting past of goodness and a future of endless glory, we praise in our hearts Thy holy name. Thy mercy is as constant as the stars that never set, as the mountains that never move, and as the tide that never forgets to flow. O Lord of all being, to each loving heart how very near Thou art. Day by day be present with this Congress. May we here realize the richness of life, its glorious opportunities with their vast outlook and their inexpressible joys. O God, journey with us as we pass through the gateway of this noonday hour. Amen.

The Journal of the proceedings of yesterday was read and approved.

INDEPENDENT OFFICES APPROPRIATION BILL

Mr. WOODRUM, from the Committee on Appropriations, by direction of that committee, reported the bill (H. R. 14458, Rept. No. 1922) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1934, and for other purposes, which was referred to the Union Calendar and ordered printed.

Mr. TABER reserved all points of order.

RECONSTRUCTION FINANCE CORPORATION

The SPEAKER laid before the House the following communication, which was placed in the archives of the House.

RECONSTRUCTION FINANCE CORPORATION,
Washington, January 26, 1933.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: In the report submitted by the Reconstruction Finance Corporation under date of January 25, 1933, pursuant to House Resolution 335, the loan made by the corporation to the Bronx County Trust Co., New York, N. Y., was reported as having an unpaid balance of $441,400 at the close of business January 6, 1933, whereas the loan was paid in full prior to that date. The column headed "Repayments on principal" should show repayments of $555,125 with respect to this loan, and the column headed "Balance outstanding" should show nothing outstanding.

Respectfully,

ATLEE POMERENE, *Chairman.*

Mr. HOWARD. Mr. Speaker, as the author of the resolution requesting a report of the doings of the Reconstruction Finance Corporation during the months of February, March, April, May, and June, 1932, and well aware of the great burden imposed upon the corporation in preparation of its doings during the designated months, and in such limited time, I trust the House may be pleased to look lightly and generously upon any slight errors which may have crept into the report. Indeed it would be akin to a miracle if the voluminous report, prepared in such haste as requested by the House, should be wholly free from error. I am confident that the corporation will be entitled to commendation because of the almost perfect compilation of such vast figures, rather than to condemnation because of one slight error, as noted in the communication of the corporation just now read to the House.

THE DEFICIENCY BILL

Mr. BYRNS, chairman of the Committee on Appropriations, by direction of that committee, reported the bill (H. R. 14436, Rept. No. 1923) making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes, which was referred to the Union Calendar and ordered printed.

Mr. TABER reserved all points of order.

Mr. BYRNS. Mr. Speaker, I ask unanimous consent that the bill be taken up now for consideration and be considered in the House as in Committee of the Whole.

May I say that this bill is exactly the same bill which passed the House and the Senate and went to the President the other day, with the refund item of $28,000,000 eliminated.

Mr. SNELL. I think the gentleman's statement is proper, and the bill ought to be passed as soon as possible; but I am wondering why the refund item of $28,000,000 was left out. I understand that these have been determined and are judgments against the United States and that we will have to pay 6 per cent interest on them——

Mr. BYRNS. Four per cent.

Mr. STAFFORD. Will the gentleman yield?

Mr. BYRNS. Yes.

Mr. STAFFORD. It is 6 per cent on all claims that arose prior to the time of the adjudication, but those since July 1 carry 4 per cent.

Mr. BYRNS. Under the economy act I think it is 4 per cent. I will say this: I had this looked up and investigated and computed, and if no appropriation is made for this refund before the last of April, it will amount to less than $100,000. They have some on hand now. This item can be carried in the next deficiency bill, which will come along in a week or two.

Mr. SNELL. It makes an additional expenditure for the Government.

Mr. BYRNS. To that extent, but as I understand, we are confronted with a serious situation in the city involving the health and happiness and possibly the lives of a great many people.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. BYRNS. Yes.

Mr. CHINDBLOM. With reference to the interest on the refunds I have given some attention to the matter, and figuring the difference in the interest to the taxpayers who are to receive the refund and credit and the interest to be paid by the Government on this $28,000,000 refund and credit will cost the Government and the taxpayers at the rate of $800,000 per annum.

Mr. LAGUARDIA. Reserving the right to object, Mr. Speaker, of course, there are two schools of thought on this question of refunding, particularly as to the rights of the legislative branch of the Government to control, without limitation or qualification, the expenditure of public funds. I rise to ask the gentleman whether we will have an opportunity when the matter comes up to put a proviso and limitation upon the appropriation if the committee does not do it.

Mr. BYRNS. I do not think that that could be denied the gentleman if we desired to do so. There will be no inclination upon my part, and I am sure upon the part of the committee, to deny the gentleman that opportunity.

Mr. BLANTON. Mr. Speaker, reserving the right to object, if this bill had been signed when it reached the White House last week, and it had not been vetoed, this money would have been paid by now and there would not have been any interest to be considered at all.

Mr. SNELL. That may be true, but there was a definite constitutional question involved, and the President gave attention to the highest authority we have on these matters, the Attorney General of the United States. He was right in doing what he did.

Mr. BLANTON. On a frivolous matter.

Mr. SNELL. No; it was not a frivolous matter, and the gentleman knows it.

Mr. BLANTON. I did not yield. On the contrary, I say it was frivolous for that big deficiency bill to be vetoed simply because it reserved to Congress its right to pass upon all refunds over $20,000.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk proceeded to read the bill.

Mr. BYRNS (interrupting the reading). Mr. Speaker, I made the statement to the House that this bill is an exact copy of the bill as it passed both bodies, with the elimina-

tion of the tax fund. I ask unanimous consent that the further reading of the bill be dispensed with.

The SPEAKER. Is there objection to dispensing with further reading of the bill?

There was no objection.

The bill referred to is as follows:

H. R. 14436

A bill making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes

Be it enacted, etc., That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes, namely:

TITLE I

LEGISLATIVE BRANCH

Senate

To pay to Anna R. Waterman, widow of Hon. Charles W. Waterman, late a Senator from the State of Colorado, $9,000.

To pay to Minda N. Jones, widow of Hon. Wesley L. Jones, late a Senator from the State of Washington, $9,000.

Office of Sergeant at Arms and Doorkeeper: For two telephone operators, at $1,560 each per annum, from March 1 to June 30, 1933, $1,040.

For miscellaneous items, exclusive of labor, fiscal year 1933, $20,000.

For expenses of inquiries and investigations ordered by the Senate, including compensation to stenographers of committees, at such rate as may be fixed by the Committee to Audit and Control the Contingent Expenses of the Senate, but not exceeding 25 cents per hundred words, fiscal year 1933, $40,000.

For repairs, improvements, equipment, and supplies for Senate kitchens and restaurants, Capitol Building and Senate Office Building, including personal and other services, to be expended from the contingent fund of the Senate under the supervision of the Committee on Rules, United States Senate, fiscal year 1933, $15,000.

House of Representatives

To pay the widow of Daniel E. Garrett, late a Representative from the State of Texas, $9,000.

To pay the widow of Charles A. Karch, late a Representative from the State of Illinois, $9,000.

To pay the widow of J. Charles Linthicum, late a Representative from the State of Maryland, $9,000.

To pay the widow of Henry St. George Tucker, late a Representative from the State of Virginia, $9,000.

The four foregoing appropriations to be disbursed by the Sergeant at Arms of the House.

Committee on Revision of the Laws: For the employment of competent persons to assist in continuing the work of compiling, codifying, and revising the laws and treaties of the United States, fiscal years 1933 and 1934, $3,000.

Joint Committee on Inaugural Ceremonies of 1933

To enable the Secretary of the Senate and the Clerk of the House of Representatives to pay the necessary expenses of the inaugural ceremonies of the President of the United States, March 4, 1933, in accordance with such program as may be adopted by the joint committee of the Senate and House of Representatives, appointed under a concurrent resolution of the two Houses, including the pay for extra police, fiscal year 1933, $35,000.

EXECUTIVE OFFICE AND INDEPENDENT ESTABLISHMENTS

Executive office

Protection of interests of the United States in matters affecting oil lands in former naval reserves: For an additional amount for expenses of special counsel and for all other expenses, including employment of experts and other assistants at such rates as may be authorized or approved by the President, in connection with carrying into effect the joint resolution directing the Secretary of the Interior to institute proceedings touching sections 16 and 36, township 30 south, range 23 east, Mount Diablo meridian, approved February 21, 1924, $5,000, to be expended by the President.

OFFICE OF PUBLIC BUILDINGS AND PUBLIC PARKS OF THE NATIONAL CAPITAL

Salaries: For an additional amount for personal services in the District of Columbia and elsewhere, including the same objects specified under this head in the independent offices appropriation act for the fiscal year 1933, $21,900.

General expenses: For an additional amount for general expenses in connection with the maintenance and care of public buildings, including the same objects specified under this head in the independent offices appropriation act for the fiscal year 1933, $9,415.

United States Geographic Board

Printing and binding: For an additional amount for printing and binding for the United States Geographic Board, fiscal year 1933, $1,700.

DISTRICT OF COLUMBIA

Public welfare

Emergecy relief of residents, District of Columbia: For the purpose of affording relief to residents of the District of Columbia who are unemployed or otherwise in distress because of the existing emergency, to be expended by the Board of Public Welfare of the District of Columbia, by loan, employment, and/or direct relief, under rules and regulations to be prescribed by the Board of Commissioners, and without regard to the provisions of any other law, payable from the revenues of the District of Columbia, fiscal year 1933, $625,000: *Provided*, That not to exceed $50,000 of this appropriation shall be available for administrative expenses including necessary personal services.

DEPARTMENT OF AGRICULTURE

Forest service

Salaries and expenses (fighting and preventing forest fires): For an additional amount for fighting and preventing forest fires, fiscal year 1933, including the same objects specified under this head in the agricultural appropriation act for the year 1933, $1,000,000.

For payment to Charles Lamkin, of Banning, Calif., as authorized by Private Act No. 159, Seventy-second Congress, entitled "An act for the relief of Charles Lamkin," approved July 13, 1932 (47 Stat., Pt. 2, 82), $66.

DEPARTMENT OF JUSTICE

Contingent expenses

For an additional amount for contingent expenses, Department of Justice, including the same objects specified under this head in the act making appropriations for the Department of Justice for the fiscal year 1930, $331.52.

Miscellaneous objects

Detection and prosecution of crimes: The amount which may be expended for personal services in the District of Columbia from the appropriation "Detection and prosecution of crimes, 1933," is hereby increased from $477,356 to $523,851.

Marshals, district attorneys, clerks, and other expenses of United States courts

Fees of commissioners: For additional amounts for fees of United States commissioners and justices of the peace acting under section 1014, Revised Statutes of the United States (U. S. C., title 18, sec. 591), for the fiscal years that follow:

For 1925, $138.50;

For 1930, $1,007.15;

For 1931, $3,275.80;

For 1932, $43,812.67.

Fees of jurors and witnesses: For an additional amount for fees of jurors and witnesses, United States courts, including the same objects specified under this head in the act making appropriations for the Department of Justice for the fiscal year 1931, $11,356.85.

Pay of bailiffs, etc.: For an additional amount of pay of bailiffs, etc., United States courts, including the same objects specified under this head in the act making appropriations for the Department of Justice for the fiscal year 1931, $1,261.07.

Miscellaneous expenses: For an additional amount for such miscellaneous expenses as may be authorized or approved by the Attorney General for the United States courts and their officers, including the same objects specified under this head in the act making appropriations for the Department of Justice for the fiscal year 1930, $244.55.

Penal and correctional institutions

United States Hospital for Defective Delinquents, construction: For an additional amount for United States Hospital for Defective Delinquents, construction, including the same objects specified under this head in the act making appropriations for the Department of Justice for the fiscal year 1933, $177,983, to remain available until expended.

Support of United States prisoners: The sum of $185,000 is hereby transferred from the appropriation "Federal jails, 1932," to the appropriation "Support of United States prisoners, 1932."

DEPARTMENT OF LABOR

Bureau of Immigration

Salaries and expenses: The amount authorized to be expended for personal services in the District of Columbia during the fiscal year 1933 from the appropriation for salaries and expenses, Bureau of Immigration, is hereby increased from $300,000 to $320,000.

Employment Service

For an additional amount for the Employment Service, including the same objects and under the same limitations specified under this head in the act making appropriations for the Department of Labor for the fiscal year 1933, $200,000.

NAVY DEPARTMENT

Secretary's office

Claim for damages by collision with naval vessels: To pay claims for damages adjusted and determined by the Secretary of the Navy under the provisions of the act entitled "An act to amend the act authorizing the Secretary of the Navy to settle claims for damages to private property arising from collisions with naval vessels," approved December 28, 1922 (U. S. C., title 34, sec. 599), as fully set forth in Senate Document No. 166 and House Document No. 503, Seventy-second Congress, $1,858.58.

Public works, Bureau of Yards and Docks

The limit of cost of the buildings, equipment, accessories, utilities, and appurtenances for the naval hospital at Philadelphia, Pa., authorized by the act approved February 12, 1931 (46 Stat. 1091), shall be as prescribed in such act, any provision in the act approved June 30, 1932 (47 Stat. 436), to the contrary notwithstanding: *Provided*, That section 320 of the act approved June 30, 1932 (47 Stat. 412), shall not be applicable to such project.

POST OFFICE DEPARTMENT

Out of the postal revenues—Office of the chief inspector

Payment of rewards: For an additional amount for payment of rewards, including the same objects specified under this head in the act making appropriations for the Post Office Department for the fiscal year 1932, $26,500.

Office of the Fourth Assistant Postmaster General

Not to exceed $3,000 of the appropriation "Rent, light, and fuel, 1933," may be expended for payment as a compromise settlement in connection with the cancellation of the lease at Highland, Ill., which expires September 30, 1937, and which cancellation is necessary because of the occupancy of a Federal building.

DEPARTMENT OF STATE

General disarmament conference, Geneva, Switzerland: For an additional amount for the expenses of participation by the United States in a general disarmament conference at Geneva, Switzerland, as authorized by Public Resolution No. 6, approved January 20, 1932, and for each and every purpose connected therewith, including per diem allowances in accordance with the subsistence expense act of 1926, as amended (U. S. C., Supp. VI, title 5, chap. 16), and other traveling expenses; personal services in the District of Columbia and elsewhere, without reference to the classification act of 1923, as amended; stenographic and other services by contract if deemed necessary without regard to the provisions of section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5); rent of offices and rooms; purchase of necessary books, and documents; printing and binding; official cards; entertainment; hire, maintenance, and operation of motor-propelled passenger-carrying vehicles; and such other expenses as may be authorized by the Secretary of State, fiscal year 1933, to remain available until June 30, 1934, $150,000.

Mixed Claims Commission, United States and Germany: For an additional amount for expenses of determining the amounts of claims against Germany by the Mixed Claims Commission established under the agreement concluded between the United States and Germany on August 10, 1922, and subsequent agreement between those Governments, for the determination of the amount to be paid by Germany in satisfaction of the financial obligations of Germany under the treaty concluded between the Governments of the United States and Germany on August 25, 1921, including the expenses which under the terms of such agreement of August 10, 1922, are chargeable in part to the United States, and the preparation of a final report by the American commissioner and the orderly arrangement for preservation and disposition of the records of the commission; and the expenses of an agency of the United States to perform all necessary services in connection with the preparation of claims and the presentation thereof before said Mixed Claims Commission, and the preparation of a final report of the agent and the orderly arrangement for preservation of the records of the agency and the disposition of property jointly owned by the two Governments, including salaries of an agent and necessary counsel and other assistants and employees, rent in the District of Columbia, employment of special counsel, translators, and other technical experts, by contract, without regard to the provisions of any statute relative to employment, and for contract stenographic reporting services without regard to section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5), law books and books of reference, printing and binding, contingent expenses, traveling expenses, press-clipping service, and such other expenses in the United States and elsewhere as the President may deem proper, fiscal year 1933, $40,000: *Provided*, That the appropriation made for this commission for the fiscal years 1932 and 1933 by the first deficiency act, fiscal year 1932, shall be available for payments heretofore or hereafter made for press-clipping service.

WAR DEPARTMENT

Military activities—Quartermaster Corps

Acquistion of land, Fort Knox, Ky.: For the completion of the acquisition of approximately 75 acres of land at Saunders Spring, Ky., for the construction of a water-supply system for Fort Knox, Ky., authorized by the act approved July 3, 1926 (44 Stat., p. 877), fiscal year 1933, $250.

TITLE II

JUDGMENTS AND AUTHORIZED CLAIMS

Damage claims

SECTION 1. For the payment of claims for damages to or losses of privately owned property adjusted and determined by the following respective departments and independent establishments under the provisions of the act entitled "An act to provide for a method for the settlement of claims arising against the Government of the United States in sums not exceeding $1,000 in any one case," approved December 28, 1922 (U. S. C., title 31. secs. 215–217), as fully set forth in Senate Document No. 162 and House Document No. 509, Seventy-second Congress, as follows:

Veterans' Administration, $37.50;
Department of Agriculture, $106.80;
Department of Commerce, $1,086.20;
Department of the Interior, $1,246.08;
Department of Justice, $298.37;
Navy Department, $1,944.56;
Post Office Department (out of the postal revenues), $13,532.37;
Treasury Department, $1,456.56;
War Department, $3,948.23;
In all, $23,656.67.

Judgments, United States courts

SEC. 2. For payment of the final judgments and decrees, including costs of suits, which have been rendered under the provisions of the act of March 3, 1887, entitled "An act to provide for the bringing of suits against the Government of the United States," as amended by the Judicial Code, approved March 3, 1911 (U. S. C., title 28, sec. 41, par. 20; sec. 258; secs. 761–765), certified to the Seventy-second Congress in House Document No. 508, under the following departments and establishments, namely:

Department of Agriculture, $1,885.81;
Department of Commerce, $400;
Department of Labor, $1,000;
War Department, $3,991.46;
In all, $7,277.27, together with such additional sum as may be necessary to pay interest on the respective judgments at the rate of 4 per cent per annum from the date thereof until the time this appropriation is made.

For the payment of judgments, including costs of suits, rendered against the Government of the United States by United States district courts under the provisions of an act entitled "An act authorizing suits against the United States in admiralty for damages caused by and salvage services rendered to public vessels belonging to the United States, and for other purposes," approved March 3, 1925 (U. S. C., title 46, secs. 781–789), certified to the Seventy-second Congress in House Document No. 508, under the following departments, namely:

Navy Department, $2,793;
War Department, $190;
In all, $2,983, together with such additional sum as may be necessary to pay interest on any such judgment where specified therein and at the rate provided by law.

For the payment of the judgments, including costs of suits, rendered against the Government by United States district courts in special cases under the provisions of certain special acts and certified to the Seventy-second Congress in Senate Document No. 163 and House Document No. 508, under the following departments:

Navy Department, $150;
War Department, $74,812.79;
In all, $74,962.79, together with such additional sum as may be necessary to pay interest as and where specified in such judgments.

None of the judgments contained under this caption shall be paid until the right of appeal shall have expired except such as have become final and conclusive against the United States by failure of the parties to appeal or otherwise.

Payment of interest wherever provided for judgments contained in this act shall not in any case continue for more than 30 days after the date of approval of the act.

Section 319 of the act of June 30, 1932 (economy act) (47 Stat. 412), shall not apply to any judgment rendered against the United States prior to July 1, 1932. Appropriations for the payment of any such judgment and interest thereon shall be available for the payment of principal and interest in accordance with the terms of such judgment and the appropriation therefor, notwithstanding the provisions of sections 319 and 803 of such act.

Judgments, Court of Claims

SEC. 3. For payment of the judgments rendered by the Court of Claims and reported to the Seventy-second Congress in Senate Document No. 164 and House Document No. 504, under the following departments and establishments, namely:

United States Veterans' Administration, $6,335.21;
Navy Department, $675,565.68;
Treasury Department, $6,238.43;
War Department, $49,950; in all, $738,089.32, together with such additional sum as may be necessary to pay interest on certain of the judgments as and where specified in such judgments.

None of the judgments contained under this caption which have not been affirmed by the Supreme Court or otherwise become final and conclusive against the United States shall be paid until the expiration of the time within which application may be made for a writ of certiorari under subdivision (b), section 3, of the act entitled "An act to amend the Judicial Code, and to further define the jurisdiction of the circuit courts of appeals and of the Supreme Court, and for other purposes," approved February 13, 1925 (U. S. C., title 28, sec. 288).

Audited claims

SEC. 4. For the payment of the following claims, certified to be due by the General Accounting Office under appropriations the balances of which have been carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874 (U. S. C., title 31, sec. 713), and under appropriations heretofore treated as permanent, being for the service of the fiscal year 1930 and prior years, unless otherwise stated, and which have been certified to Congress under section 2 of the act of July 7, 1884 (U. S. C., title 5, sec. 266), as fully set forth in House Document No. 510, Seventy-second Congress, there is appropriated as follows:

Legislative

For Capitol, building and repairs, $21.

Independent offices

For Federal Trade Commission, $24.60.
For salaries and expenses, United States Shipping Board, $5.62.
For medical and hospital services, Veterans' Bureau, $36,011.30.

For maintenance, Bureau of Supplies and Accounts, $389.01.
For maintenance, Bureau of Yards and Docks, $101.20.
For aviation, Navy, $37,536.37.
For pay, Marine Corps, $1,629.33.
For general expenses, Marine Corps, $137.50.
For maintenance, Quartermaster's Department, Marine Corps, $42.91.

Post Office Department—Postal Service

(Out of the postal revenues)

For balances due foreign countries, $138,631.13.
For car fare and bicycle allowance, $11.34.
For city delivery carriers, $1,466.40.
For clerks, first and second class post offices, $5,470.80.
For clerks, third-class post offices, $221.25.
For compensation to postmasters, $2,056.68.
For foreign-mail transportation, $10,493.36.
For freight, express, or motor transportation of equipment, etc., $26.78.
For indemnities, domestic mail, $1,271.56.
For indemnities, international mail, $673.69.
For miscellaneous items, first and second class post offices, $12.42.
For post office equipment and supplies, $25.40.
For railroad transportation and mail messenger service, $1,099.25.
For rent, light, and fuel, $2,593.96.
For separating mails, $7.50.
For special-delivery fees, $13.09.
For star-route service, $20.47.
For vehicle service, $28.80.
For village delivery service, $184.80.

Department of State

For contingent expenses, Department of State, $1,897.86.
For contingent expenses, foreign missions, $35.91.
For contingent expenses, United States consulates, $16.04.
For immigration of aliens, Department of State, $43.
For relief and protection of American seamen, $123.78.
For salaries, ambassadors and ministers, $1.94.
For salaries, consular service, $574.76.
For salaries, Foreign Service officers, $7.90.
For salaries, Foreign Service officers while receiving instructions and in transit, $861.11.
For transportation of Foreign Service officers, $4,666.69.

Treasury Department

For stationery, Treasury Department, $11.46.
For contingent expenses, public moneys, $2.87.
For collecting the revenue from customs, $221.17.
For collecting the internal revenue, $95.52.
For salaries and expenses of collectors, etc., of internal revenue, $39.83.
For enforcement of narcotic and national prohibition acts, internal revenue, $1,290.97.
For Coast Guard, $360.21.
For contingent expenses, Coast Guard, $36.17.
For pay and allowances, Coast Guard, $406.71.
For compensation of employees, Bureau of Engraving and Printing, $18.59.
For pay of other employees, Public Health Service, 85 cents.
For pay of personnel and maintenance of hospitals, Public Health Service, $141.
For interstate quarantine service, $3.75.
For quarantine service, $120.
For mileage, etc., Coast Guard, $4.
For furniture and repairs of same for public buildings, $178.65.
For general expenses of public buildings, $11.56.
For mechanical equipment for public buildings, $80.94.
For operating force for public buildings, $9.53.
For operating supplies for public buildings, $89.09.
For remodeling and enlarging public buildings, $1,591.75.
For repairs and preservation of public buildings, $10.11.

War Department

For contingencies, Military Intelligence Division, General Staff Corps, $1,233.16.
For civilian military training camps, $16.03.
For Organized Reserves, $118.13.
For Reserve Officers' Training Corps, $153.90.
For increase of compensation, Military Establishment, $7,625.91.
For increase of compensation, War Department, $480.
For pay, etc., of the Army, $64,727.02.
For pay of the Army, $7,369.98.
For mileage of the Army, $44.25.
For mileage to officers and contract surgeons, $121.34.
For arrears of pay, bounty, etc., $39.10.
For pay, etc., of the Army, war with Spain, $279.43.
For Army transportation, $2,877.88.
For barracks and quarters, $5.50.
For barracks and quarters, other buildings, and utilities, $3.40.
For clothing and equipage, $180.92.
For construction of buildings, utilities, and appurtenances at military posts, $1,491.32.
For incidental expenses of the Army, $50.
For subsistence of the Army, $37.57.
For general appropriations, Quartermaster Corps, $7,811.08.
For supplies, services, and transportation, Quartermaster Corps, $282.04.
For ordnance service and supplies, Army, $192.44.
For armament of fortifications, $17.38.
For manufacture of arms, $829.20.
For ordnance stores, ammunition, $92.76.
For proving grounds, Army, $638.32.
For replacing ordnance and ordnance stores, $593.94.
For seacoast defenses, Panama Canal, ordnance, $85.50

For medical and hospital department, $163.25.
For Signal Service of the Army, $230.
For Air Corps, Army, $80.
For arming, equipping, and training the National Guard, $1,370.56.
For pay of National Guard for armory drills, $557.38.
For arms, uniforms, equipment, etc., for field service, National Guard, 75 cents.
For headstones for graves of soldiers, $1.98.
For Shiloh National Military Park, $175.81.
For operating snag and dredge boats on upper Mississippi, Illinois, and Minnesota Rivers, $3.55.
Total, audited claims, section 4, $404,514.06, together with such additional sum due to increases in rates of exchange as may be necessary to pay claims in the foreign currency as specified in certain of the settlements of the General Accounting Office.

Audited claims

SEC. 5. That for the payment of the following claims, certified to be due by the General Accounting Office under appropriations the balances of which have been carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874 (U. S. C., title 31, sec. 713), and under appropriations heretofore treated as permanent, being for the service of the fiscal year 1930 and prior years, unless otherwise stated, and which have been certified to Congress under section 2 of the act of July 7, 1884 (U. S. C., title 5, sec. 266), as fully set forth in Senate Document No. 165, Seventy-second Congress, there is appropriated as follows:

Independent offices

For Interstate Commerce Commission, $180.
For medical and hospital services, Veterans' Bureau, $1,501.96.
For military and naval compensation, Veterans' Administration, $144.25.
For salaries and expenses, Veterans' Bureau, $5.30.
For vocational rehabilitation, Veterans' Bureau, $51.
For Army pensions, $7.14.

Department of Agriculture

For salaries and expenses, Bureau of Animal Industry, $33.33.
For dairying and soil improvement, experiment station, South Carolina, $6.25.
For loans to farmers in storm and flood stricken areas, Southwestern States, $2.

Department of Commerce

For party expenses, Coast and Geodetic Survey, $15.26.
For protecting seal and salmon fisheries of Alaska, $4.62.
For air navigation facilities, $1.25.

Department of the Interior

For relieving distress and prevention, etc., of diseases among Indians, $250.
For conservation of health among Indians, $83.

Department of Justice

For miscellaneous expenses, United States courts, 94 cents.

Navy Department

For pay, subsistence, and transportation, Navy, $381.49.
For pay of the Navy, $69.33.
For transportation, Bureau of Navigation, $4.60.
For maintenance, Bureau of Supplies and Accounts, $2.68.
For pay, Marine Corps, $154.30.

Post Office Department—Postal Service

(Out of the postal revenues)

For balances due foreign countries, $781.28.
For city delivery carriers, $82.56.
For indemnities, domestic mail, $123.75.
For indemnities, international mail, $22.89.
For miscellaneous items, first and second class post offices, $320.
For Railway Mail Service, salaries, $53.04.
For rent, light, and fuel, $32.
For Rural Delivery Service, $3.37.
For separating mails, $48.

Department of State

For contingent expenses, United States consulates, $3.12.
For transportation of Foreign Service officers, $40.76.

Treasury Department

For enforcement of narcotic and national prohibition acts, internal revenue, $385.05.
For Coast Guard, $60.
For pay and allowances, Coast Guard, $167.81.
For operating supplies for public buildings, $67.50.

War Department

For pay, etc., of the Army, $6,777.49.
For pay of the Army, $1,067.17.
For Reserve Officers' Training Corps, $79.50.
For increase of compensation, Military Establishment, $8.53.
For pay, etc., of the Army, war with Spain, $2.40.
For Army transportation, $142.24.
For general appropriations, Quartermaster Corps, $378.56.
For ordnance service and supplies, Army, 76 cents.
For arming, equipping, and training the National Guard, 32 cents.
For pay of National Guard for armory drills, $17.65.
Total, audited claims, section 5, $13,564.45, together with such additional sum due to increases in rates of exchange as may be necessary to pay claims in the foreign currency as specified in certain of the settlements of the General Accounting Office.

SEC. 6. For payment of interest on amounts withheld from claimants by the Comptroller General of the United States under the act of March 3, 1875 (U. S. C., title 31, sec. 227), as allowed by the General Accounting Office and certified to the Seventy-second Congress, in House Document No. 507, under the Treasury Department, $484.98.

For the payment of claims allowed by the General Accounting Office covering judgments rendered by United States district courts against collectors of customs, where certificates of probable cause have been issued as provided for under section 989, Revised Statutes (U. S. C., title 28, sec. 842), and certified to the Seventy-second Congress in House Document No. 507, under the Treasury Department, $1,669.93, together with such additional sum as may be necessary to pay interest as specified in the judgments.

For the payment of a claim allowed by the General Accounting Office covering a judgment rendered by a United States district court against a collector of internal revenue, where a certificate of probable cause has been issued as provided for under section 989, Revised Statutes (U. S. C., title 28, sec. 842), and certified to the Seventy-second Congress in House Document No. 507, under the Treasury Department, $139.85.

For the payment of the claim allowed by the General Accounting Office under the provisions of Private Act No. 524, approved March 2, 1929 (45 Stat., pt. 2, p. 2364), and certified to the Seventy-second Congress in House Document No. 507, under the War Department, $52.71.

Total audited claims, section 6, $2,347.47.

SHORT TITLE

This act may be cited as the "first deficiency act, fiscal year 1933."

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

DEPARTMENTS OF STATE, JUSTICE, COMMERCE, AND LABOR APPROPRIATION BILL, FISCAL YEAR 1934

Mr. OLIVER of Alabama. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14363) making appropriations for the Departments of State and Justice, and for the judiciary, and for the Departments of Commerce and Labor for the fiscal year ending June 30, 1934, and for other purposes. Pending that, there is one item in the bill which will provoke some controversy, and I think it should be discussed, since it involves a policy that Congress itself laid down, and which, if it is now being violated, Congress should know. In view of the fact that I feel amendments are to be offered in good faith, and that the Members offering such are possibly prompted by misinformation, I desire that there be time for discussion, so that Members of the House may know the facts. The matter I refer to relates to prison industries. Yesterday that item was passed with the understanding that we would agree on some reasonable time for discussion of it and all amendments thereto that might be offered. I ask unanimous consent, therefore, that after the expiration of the time fixed by the House for the discussion of the prohibition item, the committee be authorized to fix one hour for the discussion of the item in reference to prison industries and all amendments thereto, the time to be equally divided between the gentleman from Pennsylvania [Mr. SHREVE] and myself, and one-half of the time to be allotted to those in favor of such amendments as may be offered to that item.

Mr. SHREVE. Mr. Speaker, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. SHREVE. Does the gentleman desire to go into a discussion of all of the various articles that are manufactured in the penitentiaries?

Mr. OLIVER of Alabama. I understand there may be amendments that may relate to different activities.

Mr. SHREVE. Affecting Atlanta?

Mr. OLIVER of Alabama. Affecting all of the prisons; and that is why I suggest that we fix the time. It will enable us to proceed in an orderly way, immediately after disposing of the prohibition item, and hasten the reading of the bill.

Mr. SHREVE. That is entirely satisfactory to this side of the House.

Mr. SABATH. I understand an agreement has been entered into about the time to be allotted to the prohibition item.

Mr. OLIVER of Alabama. Two hours.

The SPEAKER. The gentleman from Alabama asks unanimous consent that when the item on page 33 relating to prison-industries working-capital fund is reached there be one hour of debate on the paragraph and all amendments thereto, one-half of the time to be controlled by the gentleman from Alabama [Mr. OLIVER] and one-half by the gentleman from Pennsylvania [Mr. SHREVE], those two halves to be controlled one-half of the time by those in favor of the amendment and one-half by those opposed. Is there objection?

There was no objection.

The SPEAKER. The question is on the motion of the gentleman from Alabama that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14363.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14363, with Mr. OLIVER of New York in the chair.

The Clerk read the title of the bill.

The Clerk read as follows:

BUREAU OF PROHIBITION

Salaries and expenses: For expenses to enforce and administer the applicable provisions of the national prohibition act, as amended and supplemented (U. S. C., title 27), and internal revenue laws, pursuant to the act of March 3, 1927 (U. S. C., Supp. V, title 5, secs. 281–281e), and the act of May 27, 1930 (U. S. C., Supp. V, title 27, secs. 144–192), including the employment of executive officers, attorneys, agents, inspectors, investigators, supervisors, clerks, messengers, and other personnel, in the District of Columbia and elsewhere, to be appointed as authorized by law; the securing of evidence of violations of the acts; the cost of chemical analysis made by other than employees of the United States and expenses incident to the giving of testimony in relation thereto; the purchase of stationery, supplies, equipment, mechanical devices, newspapers, and periodicals not to exceed $350, books, including law books and books of reference, and such other expenditures as may be necessary in the District of Columbia and the several field offices; costs incurred in the seizure, storage, and disposition of liquor and property seized under the national prohibition act, including seizures made under the internal revenue laws if a violation of the national prohibition act is involved and disposition is made under section 3460, Revised Statutes (U. S. C., title 26, sec. 1193); costs incurred in the seizure, storage, and disposition of any vehicle and team or automobile, boat, air or water craft, or any other conveyance, seized pursuant to section 26, Title II, of the national prohibition act, when the proceeds of sale are insufficient therefor or where there is no sale; purchase of passenger-carrying motor vehicles at a total cost of not to exceed $50,000, including the value of any vehicles exchanged, and the hire, maintenance, repair, and operation of motor-propelled or horse-drawn passenger-carrying vehicles for official use in field work; and for rental of quarters; in all, $9,120,000, of which amount not to exceed $336,453 may be expended for personal services in the District of Columbia.

Mr. BLANTON. Mr. Chairman, under the unanimous-consent agreement had yesterday in the House the disposition of the prohibition item and amendments thereto was to be made under two hours of debate, immediately after we went into the Committee of the Whole to-day.

Mr. OLIVER of Alabama. That is correct.

Mr. BLANTON. We are now in the Committee of the Whole.

The CHAIRMAN. The paragraph alluded to has just been read by the Clerk, and we are about to proceed to its consideration under the unanimous-consent agreement entered into yesterday. That agreement divides the time of two hours, one hour to the gentleman from Alabama [Mr. OLIVER], and one hour to the gentleman from Pennsylvania [Mr. SHREVE], and the gentleman from Alabama is to allot one-half of that time to the control of the gentleman from New York [Mr. GRIFFIN], and Mr. SHREVE to allot one-half of his time to the control of the gentleman from Massachusetts [Mr. TINKHAM].

Mr. GRIFFIN rose.

The CHAIRMAN. The gentleman from New York [Mr. GRIFFIN] is recognized for one-half hour.

Mr. GRIFFIN. Mr. Chairman, I offer an amendment.

Mr. TARVER. Mr. Chairman, if the gentleman will permit, if amendments to this paragraph are not offered now, we will have two hours' debate without having any idea of what amendments are to be considered by the committee, and then will be required to vote on the amendments without opportunity having been offered for an explanation of the amendments by their authors. I should like to know whether or not it would be permissible to have all amendments to the provision offered at this time, in order that they may be pending before the committee and discussion be had at the time argument is had.

Mr. OLIVER of Alabama. Mr. Chairman, I hope the gentlemen who expect to offer amendments will follow that course. The gentleman from Massachusetts [Mr. TINKHAM] told me on yesterday he had three amendments to offer, and I think they should be read. I therefore ask unanimous consent that all amendments may be read, Mr. Chairman, and considered as pending.

Mr. SABATH. Reserving the right to object, if I am not mistaken, the gentleman from New York [Mr. GRIFFIN] has been recognized and has offered his amendment.

Mr. GRIFFIN. I was about to make a statement.

The CHAIRMAN. The only amendment at the desk is the amendment offered by the gentleman from New York [Mr. GRIFFIN].

The gentleman from Alabama [Mr. OLIVER] asks unanimous consent that all amendments to be voted upon after two hours' debate be read by the Clerk for the information of the House now and be considered as pending. Is there objection?

Mr. STAFFORD. Reserving the right to object, that would not foreclose Members offering amendments during the two hours' general debate?

Mr. OLIVER of Alabama. The gentleman may propose that as an amendment to the unanimous-consent request, but let me say the amendments will not be voted on until the expiration of the two hours.

Mr. KUNZ. Reserving the right to object, that does not limit the 5-minute rule, does it, Mr. Chairman, after an amendment is offered?

The CHAIRMAN. There is no 5-minute rule now under the unanimous-consent agreement. The time is in control of the various parties in accordance with the agreement made on yesterday.

Mr. STAFFORD. Mr. Chairman, has the unanimous-consent request been submitted as modified?

The CHAIRMAN. The gentleman from Alabama [Mr. OLIVER] asks unanimous consent that the Clerk now report for the information of the committee all amendments sent to the desk which will be discussed during the two hours' debate, and that those amendments will be considered pending and will not be voted upon until the expiration of the two hours' debate, and that thereafter any amendment sent to the desk between this time and the close of the debate will be voted upon by the House. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read as follows:

Amendment proposed by Mr. TINKHAM: On page 24, line 26, after the period, insert the following proviso: "*Provided*, That no part of this appropriation shall be used for or in connection with wire tapping to procure evidence in violation of the national prohibition act, as amended and supplemented."

Amendment proposed by Mr. TINKHAM: On page 24, line 26, after the word "supplemented," insert the following proviso: "*Provided further*, That no part of this appropriation shall be used for the purchase, for use as evidence of violations of the national prohibition act, as amended and supplemented, of any intoxicating liquors the sale of which is prohibited by law."

Amendment proposed by Mr. TINKHAM: On page 24, line 26, after the period after the word "supplemented," insert the following proviso: "*Provided further*, That no part of this appropriation shall be expended for the hire of special employees under contract."

Amendment offered by Mr. GRIFFIN: On page 24, line 24, after the word "all," strike out "$9,120,000" and insert in lieu thereof "$7,199,986."

Amendment offered by Mr. O'CONNOR: On page 23, line 14, strike out all down to and including line 26 on page 24.

Amendment proposed by Mr. TARVER as a substitute for the Tinkham amendment: On page 24, line 26, strike out the period, insert a colon, and add the following proviso: "*Provided*, That no funds hereby appropriated shall be used for the purchase of intoxicating liquors nor to pay informers nor for the purchase of evidence."

Mr. DYER. Mr. Chairman, I ask unanimous consent that the amendment offered by the gentleman from New York [Mr. GRIFFIN] may again be reported.

There was no objection.

The Clerk again reported the amendment offered by Mr. GRIFFIN.

The CHAIRMAN. The gentleman from New York [Mr. GRIFFIN] is recognized for one-half hour.

Mr. GRIFFIN. Mr. Chairman, I ask to be notified when I have consumed five minutes.

Mr. Chairman, the amendment which I have proposed to this appropriation is intended to harmonize our appropriations with the economy bill. I hope my friends will not consider there is anything personal about this proposal or anything indicating my attitude on the prohibition question itself. The people spoke on the subject of prohibition in the election. Both parties stand for the repeal of the eighteenth amendment, and I feel that the Members of this House are, in large measure, committed to the proposition of conforming our appropriation bills to what is to be reasonably anticipated in the coming year.

Of course, I realize that the eighteenth amendment is not going to be repealed offhand, and probably not within the next year, but I want to call attention to this fact, that in all of our bills we have made reductions in the appropriations. My amendment proposes to take from the Budget figures 25 per cent, and from the figures as reported by our committee, 20 per cent.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. GRIFFIN. I yield.

Mr. BRITTEN. Did I understand the gentleman to say that his committee had been informed that reductions had been made in various departmental appropriations of 20 per cent, but a lesser reduction was made for the Prohibition Unit?

Mr. GRIFFIN. Yes.

Mr. BRITTEN. Will the gentleman be good enough to state just what that was?

Mr. GRIFFIN. I am coming to that. The bill as reported by the committee takes 5 per cent from the Budget figures for the Prohibition Unit. My amendment proposes to take off 20 per cent additional, making a total reduction of 25 per cent, so as to conform to the economy program.

I feel I am justified in making this proposal, because the Bureau of Industrial Alcohol and the Bureau of Narcotics are no longer a part of the Prohibition Enforcement Bureau.

Now, I ask your attention to these figures: The Bureau of Industrial Alcohol receives an appropriation in the Treasury bill of $4,000,000.

The Bureau of Narcotics, likewise in the Treasury bill, receives an appropriation of $1,400,000. This makes a total of $5,400,000 for the carrying on of these two bureaus, which were formerly part of the Prohibition Enforcement Bureau.

For the fiscal year 1931 we gave to the Prohibition Enforcement Bureau, for the combined activities of industrial alcohol, narcotics and prohibition enforcement, $15,543,370.

In the fiscal year 1932 the Prohibition Enforcement Bureau was taken out of the Treasury Department. Contrary to expectations this change made practically no reduction whatever. Instead, it has actually increased the total cost of administration. In other words, we are increasing the expense of prohibition enforcement year by year at a time when the whole system is about to disintegrate.

Mr. BRITTEN. So that as a fact, where every other department of the Government is being reduced in its appropriations and in its expenditures, this one particular bureau is singled out for favoritism of practically $5,400,000. That is what the gentleman's figures resolve themselves to.

Mr. GRIFFIN. To be accurate, the increase is the difference between $14,500,000 and $9,120,000.

Mr. BRITTEN. Almost $5,400,000.

Mr. GRIFFIN. Yes.

Mr. BRITTEN. Five million four hundred thousand dollars. So that the present bill now before the House practically carries an increase in the appropriation for the prohibition unit of $5,400,000 rather than any decrease.

Mr. GRIFFIN. I would not say for the Prohibition Enforcement Unit, because $1,400,000 of that goes to the Bureau of Narcotics and $4,000,000 to the Bureau of Industrial Alcohol; but there is a relative increase in the appropriation for the carrying on of the work of this bureau, instead of a marked decrease, as might reasonably be expected.

Mr. SHREVE. Mr. Chairman, will the gentleman yield?

Mr. GRIFFIN. I yield.

Mr. SHREVE. Will the gentleman inform the House just how this $4,000,000 he mentions is made up? He has already mentioned narcotics. How does the rest come in? We appropriated nine millions and a few hundred thousands of dollars. That is our appropriation. The gentleman here puts it up to something over $14,000,000. Will the gentleman inform the committee how the difference between $9,000,000 and $14,000,000 is made up?

Mr. GRIFFIN. I have just stated that. We appropriated $9,120,000 for the Prohibition Enforcement Bureau. That does not include the Bureau of Industrial Alcohol, which has a separate appropriation of $4,000,000, while the Narcotic Bureau gets a separate appropriation of $1,400,000.

Mr. SHREVE. Then, the law enforcement item carries only the $9,000,000, the item for the enforcement of law by Mr. Woodcock's division receives about $9,000,000 or a little over. Is not that true?

Mr. GRIFFIN. No; I do not think it is.

Mr. SHREVE. Then we will look in the book and see.

Mr. BRITTEN. The gentleman [Mr. SHREVE] is correct.

Mr. GRIFFIN. I think we are talking about different things. I am simply trying to show that all three bureaus were included in the appropriation before the Enforcement Bureau was taken out of the Treasury Department.

Mr. SHREVE. We should differentiate between the amount of money we are paying for law enforcement and the amount of money that is paid by the Narcotic Division. That is not the same thing that we are discussing here to-day. We are discussing just one thing, and that is the appropriation for law enforcement; and the gentleman can not bring in the Narcotic Division classified as a division for enforcing the liquor law.

Mr. GRIFFIN. It is all part of the system.

Mr. SHREVE. I do not think so.

Mr. GRIFFIN. When we were appropriating for prohibition enforcement, we appropriated also for the Bureau of Industrial Alcohol, which used to be under the control of prohibition-enforcement officers. Permits had to be granted before any alcohol was made or sold.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. GRIFFIN. I yield.

Mr. BRITTEN. Prior to last year the Industrial Alcohol Division was under the Bureau of Prohibition; now it is not. The gentleman has made it very clear that this work was taken out of the Prohibition Unit, thereby promoting a great reduction in expenditures of the Prohibition Unit.

Mr. GRIFFIN. It was.

Mr. BRITTEN. Therefore the amount carried in the bill should be reduced.

Mr. KUNZ. Mr. Chairman, will the gentleman yield?

Mr. GRIFFIN. I yield.

Mr. KUNZ. The increase of $4,000,000 added to the $9,000,000 would make $13,000,000. Is that on the recommendation of the Budget Bureau, or was the increase made by the committee?

Mr. GRIFFIN. It was made on the recommendation of the Budget Bureau.

Mr. KUNZ. And their recommendation was taken by the committee; is that true?

Mr. GRIFFIN. No; the Budget figures were reduced by about 5 per cent. In that connection I may say that there is a suggestion that the committee has been very liberal in deducting only 5 per cent from the Prohibition Enforcement Bureau; but when you compare the reduction of the Prohibition Enforcement Bureau with that of the other bureaus, 5 per cent will not be found to be a very liberal cut.

For instance, the Foreign Service of the Department of State received a reduction of 10 per cent. The entire State Department received a reduction of 10 per cent. The Department of Commerce and some of the other departments and bureaus of our Government have received reductions of as much as 18 per cent.

Mr. BRITTEN. Eighteen per cent from what, if you please?

Mr. GRIFFIN. From the Budget figures. So I think it would be perfectly fair and just to the prohibition unit to compel it to accept the economies which other bureaus are forced to take.

Mr. CLANCY. Will the gentleman state what the Department of Labor received?

Mr. GRIFFIN. I did not go into the Labor Department. I have not made that calculation.

Mr. WILLIAM E. HULL. What would be the total reduction you would make in this bill?

Mr. GRIFFIN. I propose to reduce the prohibition-enforcement item 25 per cent instead of 5 per cent now in the bill.

Mr. BRITTEN. So the amendment pending would reduce the amount covered in the bill 20 per cent?

Mr. GRIFFIN. Yes.

Mr. WILLIAM E. HULL. What would be the total?

Mr. GRIFFIN. Seven million one hundred and ninety-nine thousand nine hundred and eighty-six dollars.

Mr. SHREVE. Mr. Chairman, I yield five minutes to the gentleman from Maine [Mr. BEEDY].

Mr. BEEDY. Mr. Chairman, I do not propose to discuss in detail any of the pending amendments. I should like to make this statement as a general proposition. There is no issue, or should be no issue raised here, between those who believe in the retention of the eighteenth amendment and those who are opposed to its retention. The question before the committee has nothing whatever to do with the merits of prohibition. We have before us the simple question, Shall we now do anything to obstruct the officials in the Department of Justice who are sworn to enforce existing law? I hope none of us takes the view that we ought to do anything here to obstruct the enforcement of law.

Presently the people of the Nation will vote on the merits of prohibition. They are certain to have this opportunity if the Congress in a repeal resolution shall live up to that plank which both parties agreed upon and incorporated in their platforms; namely, the proposal to submit the question of repeal to the people to be passed upon by them in constitutional conventions. This is the only way they ought to pass upon this question, because in this way and in this way alone shall we be able to isolate the liquor question from every other question.

The people have passed upon the liquor question in recent elections, some will tell you. But after the selections are over and the votes are counted, some have always insisted that it was not the liquor question which determined the result, and they will rightly insist that other questions were involved.

If ratification is attempted through legislatures, the prohibition question can not be separated from other issues. Members of State legislatures are elected not because of their views on prohibition alone. Many other considerations are involved. Members are and will be sent to the State legislatures on issues of local taxation. Regardless of his views on the eighteenth amendment many a man will be elected to a State legislature because of his general legislative experience or his general reputation for getting results for his constituents.

In the process of ratifying or rejecting a proposal for the repeal of the eighteenth amendment one issue and one alone should come to the people. There is only one way to bring this issue in clear-cut fashion to the people. The States should be given a chance to set up their constitutional conventions so that the people may vote for their candidates to such conventions with one question in mind, viz: Do they stand for or against the repeal of the eighteenth amendment?

When the people shall have passed upon this issue, then the Congress should conform to the will of the people in passing upon its appropriations; but I submit that as long as this law is on the statute books that discriminatory cuts in appropriations for law enforcement would amount to an unjustifiable attempt to forestall the popular will and encourage nullification. Whatever may be our views on this question, I assume that each of us believes in law and order. Therefore let us take no action here to-day which will hamper the officials in the Department of Justice charged with the enforcement of this law.

Mr. BRITTEN. Will the gentleman yield?

Mr. BEEDY. I am pleased to yield.

Mr. BRITTEN. I agree with practically every word the gentleman has uttered, but I disagree with his use of certain words. The gentleman suggests that we are aiming to obstruct law enforcement. I do not agree with the gentleman. It is merely a reduction of law enforcement such as will apply to every department of the Government in accordance with the Federal economy program. We have got to reduce the cost of law enforcement, generally, in every department of the Government, but not necessarily obstruct it. Aside from this, the gentleman and I are in complete accord in every statement the gentleman has made. The pending amendment is in the interest of true economy.

[Here the gavel fell.]

Mr. OLIVER of Alabama. Mr. Chairman, I yield the gentleman two additional minutes.

Mr. WILLIAM E. HULL. Will the gentleman yield for a question?

Mr. BEEDY. I shall be pleased to yield if I have the time, but first let me answer the question just put to me.

We all wish to economize; and if we are going to make a flat reduction of 20 per cent all along the line, well and good. Let us not single out this particular item in the appropriation bill and cut it 20 per cent and pass over other items. Has the gentleman advocated the cutting of all the items which precede this item in the bill by 20 per cent, or does the gentleman propose to take the floor and advocate a flat cut of 20 per cent in all the appropriation items in this bill?

Mr. BRITTEN. Yes; I am for that and other general reductions. The Department of Commerce has been cut 18 per cent in this bill by its framers, and that cut is reflected in the bill.

Mr. OLIVER of Alabama. Will the gentleman yield?

Mr. BEEDY. I yield to the gentleman from Alabama.

Mr. OLIVER of Alabama. Many of the activities of the Department of Commerce have not been cut at all.

Mr. BLANTON. Will the gentleman yield?

Mr. BEEDY. Yes.

Mr. BLANTON. Is my friend the gentleman from Illinois [Mr. BRITTEN] in favor of cutting the Navy Department appropriation 20 per cent?

Mr. BRITTEN. Yes; when that kind of an amendment comes properly before the House.

Mr. BLANTON. Will the gentleman vote for it?

Mr. BRITTEN. Yes.

Mr. BLANTON. Well, we will see about that when the chance for him to so cut comes.

Mr. BEEDY. Then let us have it understood that we will not play any favorites; that our prejudices will not move us, and that we will not work any injustice upon any separate division of any branch of the Government in considering these appropriation bills. If we can wisely cut all the items in the pending bill 20 per cent, very well; but

I repeat that we ought not to lay for particular items and vent our prejudices by undue reductions of them.

[Here the gavel fell.]

Mr. GRIFFIN. Mr. Chairman, I yield four minutes to the gentleman from Georgia [Mr. TARVER].

Mr. TARVER. Mr. Chairman, I have offered an amendment as a substitute for the amendment offered by the gentleman from Massachusetts [Mr. TINKHAM], relating to the same subject matter, which proposes to add to this section a proviso limiting the expenditure of the funds appropriated under it, so that no portion of the funds may be used for the purpose of buying intoxicating liquors, paying informers, or purchasing evidence.

I offer this amendment as a friend of prohibition. I deny that in order for a Member of this House to be a friend of prohibition, it is necessary for him to indorse carte blanche all the methods which have been used by the Prohibition Bureau in its efforts to bring about enforcement of the law.

I submit that no law will be respected by the people unless it is enforced in a way and manner entitling it to respect; in other words, enforced in a respectable way. [Applause.] The sending of the agents of the Government into speakeasies to become tanked on intoxicating liquors and then turn around and arrest the men whom they incited to a violation of the law is contemptible, and the effect of such conduct is to bring the prohibition law into contempt. The same thing may be said of the practice of buying evidence from alley rats in the city of Washington and elsewhere. No self-respecting juror anywhere in this country would convict any man upon evidence of that character, and the expenditure of money for such purposes is a waste of public funds.

It is not necessary, Mr. Chairman, in order to enforce prohibition, to resort to despicable methods of this kind.

Last year near the city of Washington, at Chesapeake Beach, you had what was known as a Texas barbecue. Thousands of people went down there. I was one of them. It was fostered by the newspaper fraternity of the city. Down there truckloads of what were said to be kegs of beer were brought in and the beer rolled across an open platform into a large room where hundreds of men, including Members of this House, stood and drank it. Whether it was intoxicating or not I do not know of my own personal knowledge, except I observed the effect of that liquor upon those who drank it, and I know from my observation that it must have been intoxicating.

Why spend $5 to hire an alley rat in the city of Washington to buy some liquor and turn up some alleged violator of the law, when the law was being violated in the presence of thousands of people, including hundreds of the Members of this House, within 40 miles of the Capital of the Nation and nothing said about it.

I tell you the mistake made by the prohibition advocates in this country is that after having procured the law they were satisfied, and they failed to follow the law into the courts and into the administrative bureau where its enforcement must be brought about, in order to see that it was properly and decently enforced.

Men who stage a champagne party, as is said to have been done at a local hotel by prohibition agents not long ago, pay for intoxicating liquors from Government funds, have an evening of revelry, and then turn around and arrest those from whom they bought their liquor, are not enforcing the law; they are merely criminals themselves, prohibition agents or not.

Gentlemen have said that unless prohibition agents are permitted to spend money for purposes like these, the law can not be enforced. I challenge the correctness of that statement. For more than 10 years I served as judge of the superior courts in six counties in Georgia, trying thousands of liquor cases, in not one of which had any money been spent by officers to buy liquor, pay informers, or purchase evidence; and those who live in that judicial circuit know that the prohibition laws were enforced far better than is done by Federal authority. The same thing is true of other judicial circuits in my district and State. The State of Georgia does not appropriate any money to enable officers to buy liquor, pay informers, or purchase evidence; and yet, if it were not for these State officers and State courts, prohibition would indeed be practically a dead letter in my State.

I regret to say that in my judgment there has been no earnest, bona fide effort on the part of Federal authorities to enforce prohibition. I have many reasons for entertaining that belief which lack of time prevents my giving in detail. Those who believe in prohibition will not help their cause by undertaking to back up rotten and inefficient enforcement. If prohibition is to be maintained, and I pray God that it may be maintained, the Augean stables of rottenness that have existed in the Bureau of Prohibition must be cleansed, inefficient and corrupt agents must be gotten rid of, and methods of enforcement adopted such as we use in enforcing our State laws and which will be decent and entitled to the backing of decent people. It is in the interest of that character of enforcement and in the interest of the continuance of our prohibition laws that I offer this amendment.

[Here the gavel fell.]

Mr. TINKHAM. Mr. Chairman, I yield five minutes to the gentleman from Missouri [Mr. DYER].

Mr. DYER. Mr. Chairman, I am in favor of the amendment offered by the gentleman from New York [Mr. O'CONNOR] to strike from this bill all that pertains herein to prohibition.

One reason, Mr. Chairman, why I am in favor of this is that this money sought to be appropriated is not needed and is not to be used prior to July 1 of this year. That is some five months and more before the money will be needed. There is to be a session of the next Congress called in April, and if it is found that the Democratic Party is not going to carry out its mandate from the people to repeal the eighteenth amendment, then they with their great majority in this House can go ahead and appropriate money for the next fiscal year for prohibition enforcement—if this party is not to keep its word to the American people.

If this amendment is not agreed to by the committee, then I shall support the amendment of my colleague, Mr. TARVER, of Georgia, and some of the other amendments that have been offered, including the one offered by the gentleman from Massachusetts to prevent the tapping of private telephone wires that go into your home by these prohibition agents, for the purpose no doubt of obtaining testimony of violations of the prohibition law, but which results in obtaining the private conversation by you and your family, affecting your business and your own private affairs.

This appropriation of $9,120,000 for prohibition enforcement is not the whole story. It is not only the money that is appropriated directly for prohibition that affects the taxpayers of the country, but there are many items throughout the appropriation bills that could be saved to the people if they did not have this national prohibition.

Prohibition is what the people have condemned, the issue upon which the Democratic Party carried the November election, and which this party said to the people, "Elect us and we will put an end to it," yet this bill carries more than $9,000,000 to enforce it for the year July 1, 1933, to June 30, 1934. Do the Democrats intend to keep their word? Forty-four Democrats refused to carry out their platform pledge upon which they secured the national election when the resolution to repeal the eighteenth amendment was voted on recently.

There are other items, Mr. Chairman, costing the taxpayers money to try to enforce prohibition, and one of these that causes the expenditure of a lot of money has been the necessity of increasing the number of judges to try and dispose of prohibition cases. Since prohibition became a part of the Constitution the number of United States district judges has been increased from 97 to 145, and the number of circuit judges has been increased from 33 to 40. For what reason? They are giving most of their time to prohibition cases. Not only the salaries of the judges, but that

of clerks and marshals, court expenses, and so forth, have amounted to millions of dollars. Mr. Chairman, this is an opportunity for the House to get rid of something that is costing a lot of money, and also is harmful to the people and to the taxpayers of the country. [Applause.]

[Here the gavel fell.]

Mr. GRIFFIN. Mr. Chairman, I yield three minutes to the gentleman from New York [Mr. MEAD].

Mr. MEAD. Mr. Chairman and members of the committee, I am of the opinion that we are now afforded a real opportunity to do a constructive job in connection with the reduction of governmental expenses. We can reduce this appropriation and be reasonable in our action. We can apply the same reduction in this case that has been applied in many of the major departments of the Government.

A number of appropriations have been reduced all the way from 5 to 20 per cent. We have already eliminated appropriations that were very important, surely more important than this appropriation for the enforcement of a repudiated law. We can at least reduce it by 25 per cent, as suggested by the amendment offered by my distinguished colleague from New York.

We must take into consideration in connection with this item the essential points we took into consideration in the case of other items. One of these points was, according to members of the Appropriations Committee, the reductions made possible by a reduction in prices. For illustration, the appropriation for food for the enlisted men of the Army could be reduced because of the reduction in the cost of such commodities. In that connection we anticipated a possible reduction, and we took advantage of these lower costs to reduce the appropriation.

Now, with regard to prohibition, we can with safety anticipate the changes that will be made in the Volstead Act—changes that will permit of a lower enforcement cost. Already a number of States have taken affirmative action in this matter. In the Senate an effort has been made to reduce Federal expenses by 25 per cent. Here is our opportunity to make a real reduction in the cost of enforcement of a law soon to be repealed. The President elect, Mr. Roosevelt, has stated that prohibition is doomed, and that he was in favor of a 25 per cent reduction in the expenses of the Government. Therefore, anticipating the demands of public opinion, taking into consideration the action the States have already taken, and the great need for a reduction in Federal expenditures, we can with safety adopt this amendment.

We reduced the appropriations for the Army. We cut to the danger point the appropriation for the Post Office Department. No doubt we will reduce the amount required by the Navy Department. So why continue to dole out millions in a futile effort to enforce a law we never could or never will enforce?

By the end of the next fiscal year the Volstead Act will have passed into oblivion and the eighteenth amendment will be well on its way to the graveyard. [Applause.]

Mr. SHREVE. Mr. Chairman, I yield five minutes to the gentleman from Kentucky [Mr. FINLEY].

Mr. FINLEY. Mr. Chairman, I have not been and I refuse to be hypnotized upon the subject of economy, important though it may be. There are some phases of our national life the expenses of which ought not to be reduced at all. They ought to be increased. I was glad the other day when this House by an overwhelming majority overrode the Committee on Appropriations on the Army appropriation bill and wrote into that measure $500,000 to continue the Reserve Officers' Training Corps at its present strength. I was also pleased when the same House, by the same action, overrode the committee and gave new life to the citizens' military training camps; and why? Because the first duty, the most imperative duty, the paramount duty of this Congress, is national defense; and when that question was raised on this floor the Members of the House rallied to the cause. National defense was uppermost, and no reduction was made on those features of our national need. Why did they do that? National defense against what? Against whom? Why, against a foreign enemy, of course; certainly not against our own people. That was not considered at all.

But, Mr. Chairman, are foreign enemies the only enemies this country has? Nay, nay, verily. There are in our own country, on our own soil, enemies ten times as dangerous to the future of this country and the perpetuity of this Government as any foreign enemy could possibly be, and yet in the face of such action only a few days ago Members of this House now propose a reduction, and one proposes the abolition, of an appropriation to strike down and paralyze the warfare we are trying to make against what I regard as one of the greatest enemies within our country, and that is lawlessness, which is threatening the very foundation of our Government.

Mr. Chairman, I sleep when I am at home in a house remote from any other dwelling, no one in the house but myself. I do not know when some strolling hobo, some convict, some criminal, will take it into his head to enter that house, rob it, and, if necessary, butcher me, and destroy the evidence of his crime by burning the house. I keep at the head of my bed a 10-gage shotgun. I have not had it outside the house in 10 years, but it is there, and I can put my hands upon it in a moment. I have five silver cups that I have won at trap shooting, and I am glad that I know how to use that gun. If the logic of these gentlemen is to prevail, these men who offer these amendments for the reduction of our law-enforcement forces, then according to them I ought to reduce the caliber of my shotgun or, at any rate, I should reduce the size of the shot and the amount of powder in its loads; but I am not going to do that. It seems to me, at a time like this, if we enter upon a policy proposing to reduce the appropriations for the enforcement of laws against lawlessness, we would take the same sort of action as it would be for me to pitch that shotgun out of the window, to reduce its caliber, to take the loads out of it, or to reduce the size of the shot and the amount of powder that is in them. [Applause.]

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. OLIVER of Alabama. Mr. Chairman, I yield six minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, although I received an invitation, I did not attend the wet party mentioned by my friend from Georgia [Mr. TARVER]. It was not a press picnic and not a congressional party, although distinguished Texans had it given in their honor, and numerous Representatives and Senators were there. But there is nothing strange about arrests not being made there, even if the gentleman from Georgia did see some under the influence of liquor, for if there were 150 Congressmen there, as he says, they were all immune from arrest. I have been one of those who have been continually fighting to remove from all of us Members every immunity that we possess. I am not in favor of a Senator or a Representative having a single immunity by reason of his position. I think he ought to be treated just like every other citizen of the United States, but there is an immunity that is in the law, and it was in the law when I came here, and which I have never been able to help get out, for the Constitution provides that you can not arrest a Congressmen during sessions of Congress unless it is for a felony or a breach of the peace.

Mr. LAGUARDIA. Oh, the gentleman is in error.

Mr. BLANTON. No; I beg the gentleman's pardon; the Constitution provides that during sessions of Congress no Member may be arrested except for felony or a breach of the peace, and I say that there is not an officer in the city of Washington who would dare arrest a Congressman unless he was guilty of some felony or breach of the peace, when Congress is in session, or when he is coming to Congress from his home or when he is going back. He is immune from arrest. It ought not to be so, but it is so, and we ought to abolish all immunities.

Mr. TARVER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Just a moment, and I will.

Mr. TARVER. The gentleman has misconstrued my statement and that is the reason why I interrupt him.

Mr. BLANTON. I regret that my time is so limited that I can not yield. I want to mention the threat that has been made here on this floor against Members in an attempt to intimidate their votes on these various amendments. We are told that we are to be watched when we pass through the tellers on the various votes we are to register respecting these amendments, and that if we vote to uphold prohibition enforcement the wet forces are to punish us for it later. Such threats may intimidate some. Such threats do not scare me. I know that because of my votes here to-day I am incurring renewed displeasure of wet forces, and I know that they will oppose me politically and every other way in an attempt to punish me; but I had rather give up my position here than sacrifice my principle.

One of my good friends, who is an editor of a newspaper in my district, Mr. W. L. Garner, of Strawn, Tex., who is the owner and editor of the Strawn Tribune, has written me a letter dated January 18, 1933, inclosing a special newspaper release sending a special news item to all the leading newspapers in my district, specially written and designed to hurt me politically. It was sent from Austin, Tex., and headed: "Special to leading papers in the seventeenth congressional district—for immediate release." The seventeenth district is mine. Editor Garner tells me that—

The people here believe you have voted right on this issue; this district is almost solid for the eighteenth amendment.

My constituents now watch for these misleading, unjust, special news items that are sent specially to the newspapers of my district. They are no longer fooled by them. They check up such articles with the CONGRESSIONAL RECORD, and there learn the true facts.

As to whether we are carrying out our oaths or evading the Constitution which we are sworn to uphold when we vote for these amendments now pending that are designed to cripple and stop prohibition enforcement, I want to refer you to what six distinguished members of our Committee on Ways and Means said about the beer bill when it was before the House for passage. Here is what three of them said:

MINORITY VIEWS OF MESSRS. HAWLEY, TIMBERLAKE, AND CROWTHER

At the beginning of this session of Congress, in company with all my colleagues, I stood on the floor of the House and took the oath to support the Constitution of the United States, as required by Article VI of the Constitution. I quote from that oath:

"I do solemnly swear that I will support and defend the Constitution of the United States * * * bear true faith and allegiance to the same * * * without any mental reservation or purpose of evasion."

Article 18 of the amendment provides that—

"The manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all Territories subject to the jurisdiction thereof for beverage purposes is hereby prohibited."

I listened with careful attention to the evidence submitted to the committee during the hearings preceding the report of the pending bill—H. R. 13742. My observation covers a period prior to prohibition as well as under prohibition. I am convinced by the evidence submitted at the hearing and by observation and evidence extending over a period of a lifetime that beer and other liquors described in the bill are intoxicating. They were intoxicating prior to prohibition. A legislative declaration to the contrary does not overcome that fact, and if I were to support this legislation it would require a "mental reservation" on my part and a "purpose of evasion" of the eighteenth article of amendment to the Constitution.

On the part of the Federal Government this bill proposes that the country enter upon a new era in the manufacture, distribution, sale, and consumption of intoxicants. It provides for the reestablishment of 90 per cent in volume of the liquor traffic on the basis of the amount prior to prohibition.

The brewing interests, realizing the influence that the great fundamental law of the land and the strength of the purpose of the people for its observance, attempted to avert opposition to this bill by constant reiteration of the allegation that malt beverages of the strength proposed were not intoxicating in fact as the basis and justification of their sale.

The bill originally proposed that the alcoholic content should be 2.75 per cent by weight, or 3.4375 per cent by volume. The majority of the committee increased the alcoholic content to 3.2 per cent by weight, or 4 per cent by volume, on the ground that this would increase the attractiveness of the beverage and increase its sale.

The question of the influence of alcohol on the human system has an added importance, owing to the development by national, State, and local funds of great highways and other improved roads, over which are operated some 26,000,000 motor vehicles. An individual may not be visibly intoxicated to the extent that he may be identified as a "drunk," but his muscular reactions and mental activities may be so depressed that he is not able to respond as quickly as when normal. Detailed evidence of this fact was submitted to the committee. The lives and property of people who use the highways are subjected to constant risk, and the traffic problem is one of the most important in the United States, and anything that will increase its dangers is against the public interests. During the hearings the brewing interests indicated their desire to secure a widespread distribution and opportunity of sale for beer and other beverages provided in the bill. On the allegation that they were not intoxicating, it was suggested that beer be sold at soda fountains, drug stores, cafeterias, hotels, restaurants, clubs, and also at wayside eating places, filling stations, and other places along the highways, or, to put it in other words, it should be sold as freely as soda water, ginger ale, and other soft drinks. The wayside sales would become a direct and continuing menace to vehicular traffic. The sale in drug stores, soda fountains, and other places where soft drinks are dispensed to the multitude would bring beer within the reach of everyone, including the very young, and be a constant temptation to them to drink this toxic and habit-forming beverage. That which might not intoxicate people of mature years will certainly intoxicate the young. The motion to restrict the sale to clubs, restaurants, hotels, etc., was voted down in the committee.

If it should be argued that the matter of distribution can be controlled by the States, let me call your attention to the fact that this bill expresses the attitude of the Federal Government toward the matter and that the refusal of many of the States to participate in enforcement indicates that from them at least no help can be expected.

During the hearings the brewing interests stated they had no desire for the return of the saloon and referred to the planks in the party platforms; but a motion to prevent the return of the saloon, by refusing to permit beer to be sold in such places, was voted down in the committee.

According to an estimate called to the attention of the committee, the consumption of alcohol liquors in the United States is approximately but one-third of what it was prior to prohibition.

The public health under prohibition has materially improved and, according to the information furnished, reached a remarkable degree in the last fiscal year.

Some urged upon the committee that bootlegging, racketeering, speakeasies, blind tigers, illicit distilling and brewing were the result of prohibition. This can not be true because such operations were carried on for a long period of years before prohibition. Terms have been altered to some extent, but the operations are similar.

The estimates of reemployment submitted to the committee by proponents of the bill varied, but altogether were a comparatively small number, without taking into consideration the loss of labor to persons now working in other industries whose sales would diminish because the money theretofore expended in purchases of their products would go to the purchase of malt liquors.

The income of the people generally of the United States will not be increased by the sale of malt liquors. Purchases of such beverages must be paid for from the family income. Other purchases must be reduced in amount, since incomes can not be expended twice.

It is alleged that the revenue to be derived from this measure will tend to balance the Budget. The brewing interests indicated that at the end of two years they will be manufacturing 40,000,000 barrels of beer of 31 gallons each, if the taste for this beverage is re-created, which at $5 a barrel will bring $200,000,000 of revenue to the Government, to which they added an estimate of income from the so-called allied industries; but they failed to deduct therefrom the losses that will be incident to other businesses from which revenue is now being derived. This would materially reduce the supposed income. I do not believe the Government should obtain revenues through the violation of the Constitution and by legalization of beverages which produce intoxication. Beer was intoxicating before prohibition. Its constituent elements remain the same and will undoubtedly produce intoxication again. I believe the Budget should be balanced, but that legitimate sources of revenue legal under the Constitution should furnish the necessary amount.

From the above, as well as from many other factors I shall not take occasion to name, it appears that we are facing a wide-open situation in the matter of the dispensation of malt liquors. Some things were said during the hearings by the brewing interests concerning the protection of the dry States from the entrance of intoxicants within their borders from wet States. With our motor system of transportation, with tens of thousands of automobiles moving continually back and forth, with trucks on the highways carrying freight brought from many sources and distributed to many destinations, with increased traffic in the air, I came to the conclusion that a dry State surrounded by wet States or adjacent to one or more wet States would find itself subject to an impossible task in maintaining its dry status.

My feeling, after listening to many discussions and the recent hearings, is that the liquor interests are planning, by this measure to secure again the existence of 90 per cent by volume

of the liquor traffic, the repeal of the eighteenth amendment, and the return again of the sale of all intoxicating liquors with attendant and acknowledged evils. It seems to me that if we adopt the policy contained in this bill the return of the saloon is inevitable.

W. C. HAWLEY.

We concur in the above statement.

CHAS. B. TIMBERLAKE.
FRANK CROWTHER.

Here is what the other three said:

MINORITY VIEWS OF MESSRS. RAGON, SANDERS, AND COOPER

We have heard and read all of the testimony before the Ways and Means Committee relating to the proposed legislation on beer. Taking all of this testimony as a whole and duly considering same, we are of the opinion that the proposed bill is violative of the Constitution of the United States, which in this regard reads as follows:

"After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited."

As Members of Congress we took the following oath:

"I do solemnly swear that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I will take this obligation freely, without any mental reservation or purpose of evasion, and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God."

Therefore we can not under our oath support this legislation.

We further submit that the proposed bill is not only in violation of the Constitution of the United States but of the Democratic platform, which calls for the "sale of beer and other beverages of such alcoholic content as is permissible under the Constitution." The above quotation from the platform shows that it was not the intent of those framing the platform to declare for leglislation which would be violative of the Constitution.

The very clear and definite proof before the Ways and Means Committee during the extended hearings on this bill shows conclusively that beer of alcoholic content of 3.2, which means beer of 4 per cent alcohol by volume, is intoxicating in fact and is the same type of beer which was generally produced and sold prior to the Volstead Act. The sale of such beer, because of its alcoholic content, is not permissible under the Constitution.

HEARTSILL RAGON.
MORGAN G. SANDERS.
JERE COOPER.

As to the amendments of the gentleman from Massachusetts [Mr. TINKHAM] and of the gentleman from Georgia [Mr. TARVER], which would prohibit Government enforcement officers from buying liquor, I wonder how many arrests could be made by the prohibition unit without their agents buying liquor, when in the jurisdiction of many courts, they require that the Government must prove a sale.

They have to go into court with evidence that there was a sale made. Let a prohibition officer go into a place and not buy something, but merely hang around there watching, and he would not live long in most of those joints.

Mr. TARVER. Will the gentleman yield?

Mr. BLANTON. In just a moment. I have but a few minutes. I am sorry, but my time is too limited on this important matter.

My friend the gentleman from Massachusetts [Mr. TINKHAM] whom we see here very active once in a while on a few subjects, is going to speak on trying to stop them from tapping wires. Just who is it that the gentleman has in mind who ought to be protected from wire tapping? I proved by the Attorney General there was not any danger of tapping his wires unless he violated the law. I proved by the Attorney General that he would not permit any Congressman's wire to be tapped, unless the Congressman was at the head of a big liquor machine that was violating the law over the United States. Then probably it would be necessary to tap his wire.

I want you to take these hearings. The gentleman from Massachusetts [Mr. TINKHAM] is a member of the subcommittee which brings in this bill for four departments. Four of them. The hearings on the State Department are printed in a separate document. The State Department hearings comprise 342 printed pages. I ask you to show me one question which the gentleman from Massachusetts asked concerning the State Department in all those 342 pages of printed hearings. The gentleman was not interested in the State Department. Not a question did he ask any of those splendid gentlemen who came before our committee, as far as the hearings disclose.

The printed hearings on the Department of Labor do not show any questions which the gentleman from Massachusetts [Mr. TINKHAM] saw fit to ask there. He did not seem to be interested about the Labor Department. The Department of Commerce, with its great document of printed hearings, 446 printed pages, does not show where the gentleman from Massachusetts [Mr. TINKHAM] asked any questions concerning the various bureaus and business of that department. No interest. The gentleman was not interested; but when it comes to the Department of Justice, oh, his pointed questions are all through the 446 printed pages. I wish you Members would take the hearings and read all of the questions which the gentleman from Massachusetts asked Colonel Woodcock and Attorney General Mitchell on prohibition, reading from his voluminous brief he had during all those days; and that shows where his interest was—to break down the national prohibition law. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. TINKHAM. Mr. Chairman, I yield five minutes of my time to the gentleman from Illinois [Mr. BRITTEN].

Mr. BRITTEN. Mr. Chairman, I realize, as has been said, that this is not a prohibition question. It is one of ordinary, everyday common sense and should be so treated. The Prohibition Enforcement Unit is made up generally of clerks, snoopers, mattress friskers, men who obtain evidence by tapping telephone wires and buying liquor, and things like that, for evidence purposes. Nine million one hundred and twenty thousand dollars is carried in this bill. I maintain, after having talked with members of the Committee on Appropriations, that $9,120,000 appropriated for a department which, within a year from now, will be more or less defunct and out of business, is too much money, and the amendment now pending before the House aims to bring a reduction in that particular department in line with the policy of the Federal Government for a reduction of 25 per cent generally in all departments of the Government.

I have been told, and so have you, that up to the present moment the reduction made for the Prohibition Unit below the recommendation of the Director of the Budget has been 5 per cent. We have also been told that the reduction for the Department of Commerce is 18 per cent. Be that as it may, we are aiming, Mr. Chairman, to reduce appropriations in every department of the Government. In this particular department, controlling nothing but clerks—90 per cent of the money goes for that—I maintain that the $7,199,986, which will remain in this bill if the amendment offered by the gentleman from New York [Mr. GRIFFIN] is agreed to, is ample under any reasonable form of government, to carry this department through to its successful or unsuccessful conclusion. The amount carried in the bill is not available until July 1 of this year. By that time undoubtedly, we will agree, the manufacture and sale of beer will have been legalized.

Mr. BLANTON. No.

Mr. BRITTEN. The gentleman from Texas says "no," because the gentleman does not know what is going on, but everybody else does.

Beer will have been legalized, and the work now connected therewith will no longer be performed by the Prohibition Enforcement Unit. That work undoubtedly to-day is costing the bureau many millions of dollars. In the interest of the taxpayers, from whom the $9,120,000 that is carried in the bill comes, we are reducing salaries. Last year we reduced the salaries of the poor, underpaid postal employee who has a family of four or five to care for. We have piled income taxes and excise taxes upon the shoulders of the taxpayers until to-day they are a tremendous burden. This must come to an end. We are destroying business as well as initiative, and at the same time squandering the money we collect through taxation.

Let me call your attention to a few of the many nuisance taxes this Congress has imposed upon a weary public:

Increased postage from 2 cents to 3 cents. That is made necessary by amounts like the amount carried in this bill—$9,000,000—for an unpopular cause, to say the least.

Bank-check stamps, legal conveyances, electric energy that goes into almost every home in the United States are taxed in order to bring money for the Prohibition Department and other departments of the Government. Are we going to squander a great portion of that $9,000,000 or are we going to attempt to save some of it? That is the question before the House this afternoon.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. SHREVE. I yield the gentleman from Illinois one additional minute, Mr. Chairman.

Mr. BRITTEN. Small safe-deposit boxes and many other directions which have never in the history of this Government been taxed, are now being taxed in order to get money to pay for such activities as are carried in this bill. We tax telephone and telegraph messages, soft drinks in every drug store, candy, chewing gum, radios, cameras, tobacco, matches, movies and amusements of every sort, even baseball games. We have piled taxes upon the automobile and its accessories until now it is the most highly taxed piece of mechanical equipment in all the world. The voters of the country last November emphatically registered their disapproval of the eighteenth amendment as well as the now discredited Volstead Law, and this House has an opportunity to record its vote in favor of an economy which will meet with the popular accord of millions of people in every State of the Union. Prohibition as a national policy, is dead. The various States will soon regulate their own alcoholic-beverage traffic. Fanaticism, bigotry, and intolerance have played their complete part in the destruction of an ignoble experiment.

While millions of dissatisfied taxpayers are being taxed to put this $9,120,000 and other millions into the Federal Treasury, we should at least promote economies where they can so easily be made effective.

The amendment of the gentleman from New York [Mr. GRIFFIN] should be adopted. It is in the interest of good business. Surely they can reduce their clerical force; they can easily bring about such reorganization of the Prohibition Bureau as will be made necessary by this amendment.

[Here the gavel fell.]

Mr. SHREVE. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. MOORE].

Mr. MOORE of Ohio. Mr. Chairman, the gentleman from Illinois, who has just spoken, is still consistent. He was opposed to the eighteenth amendment in the beginning and he is still opposed to it. It may not be removed from the Constitution as soon as he thinks it will be. I venture to say it will be in the Constitution a year from now in spite of the prediction of the gentleman from Illinois.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Ohio. I yield.

Mr. BRITTEN. I said "legalized beer" and nothing about the eighteenth amendment.

Mr. MOORE of Ohio. Well, I do not know, of course, but since we did not get beer by Christmas, as promised by its advocates, we may not even have beer a year from now. As the dates are being advanced, I do not know when we shall have beer. At any rate, the eighteenth amendment is in the Constitution now and those who believe in law enforcement ought to be willing to support sufficient appropriations to enforce the law.

The gentleman from Illinois makes a very specious argument, as though all of the taxes for increased postage went into this particular item for prohibition enforcement. Those special taxes go into the Treasury of the United States for general taxation purposes. If the gentleman were consistent, he would advocate a 25 per cent reduction, or whatever it is, for the entire bill; but, of course, the animus of the gentleman is against prohibition and its enforcement. He continually speaks about that subject, but while it is in the Constitution he should insist upon an adequate amount of money to enforce it. Of course, the gentleman thinks that this is sufficient to carry on the work of the department. I imagine that Mr. Woodcock knows more about what it ought to take to enforce the prohibition laws than does the gentleman from Illinois. In fact, the Prohibition Department asked for more than the amount that is allowed here. It seems to me if we want to reduce expenditures and appropriations, and we all do, we ought to be fair enough not to aim at one particular branch of the Government. There is a group that claim to want to economize, but all their efforts are directed toward economy in the Department of Prohibition. All these years they have been giving comfort to those who have been violating the prohibition laws.

The one who has the responsibility of enforcing these laws frequently has said that the agitation and the attitude of men like the gentleman from Illinois have given encouragement to the lawbreakers, not only by what they say, but by their act in wanting to cut the appropriations. The gentleman evidently does not want to enforce the law even while it is in the Constitution.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Ohio. I yield.

Mr. BRITTEN. The gentleman has suggested that attitudes like mine have lent peace, comfort, and assistance to those who have violated the law. I rarely see the gentleman at a dinner around Washington, so he, consequently, does not know that there is drinking in practically every home in Washington almost every night by officials, almost from the highest official in the United States Government down to the gentleman himself, a Member of Congress—every day and every night of every year since prohibition went into effect. The gentleman, of course, does not know that, he is such a hidebound prohibitionist.

Mr. MOORE of Ohio. Evidently the gentleman from Illinois would like to leave the impression that simply because there is drinking in the homes where he goes there is drinking in every home in Washington. [Applause.]

Mr. BRITTEN. I applaud that statement. I agree with the gentleman; there is in nearly every home.

Mr. MOORE of Ohio. It is absolutely unfounded, and it shows the poor taste and the lack of information on the part of the gentleman from Illinois, because I have gone around a little myself in the last 14 years. There is no drinking in the homes where I go. [Applause.]

[Here the gavel fell.]

Mr. GRIFFIN. Mr. Chairman, I yield three minutes to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN of Missouri. Mr. Chairman, the gentleman from Ohio [Mr. MOORE] would have you believe that no Government agency is being cut except the Prohibition Bureau. Why, we have cut the Bureau of Foreign and Domestic Commerce, also in this bill, almost 35 per cent in two years, but when we take a couple of million dollars away from prohibition enforcement the cry goes up that those who favor reduction are only the Members who oppose prohibition. Such is not the case.

What has prohibition done? In 1932 there were 13,698 Government prisoners in penitentiaries and 12,000 in jails. Why do we not have over 50,000 in these institutions? Simply because Congress passed the probation law and the Federal judges of this country have placed upon probation since that law was enacted a few years ago over 25,000 citizens who violated the Volstead law. Had it not been for that law they too would be in jail.

When you put a man in the penitentiary, when you put a man in jail, you are only saddling additional expense upon the taxpayers of this country; the prisoners must be maintained; and fully 85 per cent of the taxpayers of this country told you on November 8 last that they no longer wanted this law in effect; they no longer wanted their money spent in this way.

I say that the Prohibition Department is receiving more than it actually deserves, because it can not enforce the law; any fair-minded person knows that you could appro-

priate $100,000,000 and still could not enforce prohibition in this country. You never will enforce it.

The gentleman from Ohio says he has been around. Well, if he goes around a little more he will see what exists in this country. I can take him around and show him in any city of the United States—and I have been around a little too—I will bet him $500 that within an hour's time in any big city he can get liquor if he has the money to buy it, and I do not exempt any one city—North, South, East, or West; I will take him into his own State of Ohio, because I have been in the city of Columbus, which is the seat of the Anti-Saloon League headquarters, where you can buy liquor just as fast as you like if you have the money to pay for it.

Colonel Woodcock is an excellent official. He has tried hard. There has been less scandal under his régime than prior to the time he took office. He tries to keep his men from violating one law to enforce another law, but with all his skill, with all his experience, the best we can say for him is that he has been a faithful public servant; he has performed his duty but the overwhelming sentiment throughout the Nation in opposition to the law he would enforce has prevented him from even making a little dent in the liquor traffic.

Colonel Youngquist likewise is an honest gentleman who will not tolerate the personnel of the enforcement agency's violating the regulations laid down by the Attorney General. He, too, fails because of the situation that confronts him. All the colonels in this land—and I might add generals and admirals—can not enforce this law, no matter what funds are placed at their disposal.

The amendments upon which we are soon to vote simply save the taxpayers money. Can you name any law other than the Harrison Narcotic Act and the revenue acts where we set up an individual enforcement agency? Look at the appropriation for enforcing the narcotic act! Why, Mr. Chairman, I would rather place 1 man back of the bars for selling dope than put 5,000 men in the penitentiary for selling liquor. Still the Congress gives the Narcotic Bureau a little over $1,000,000. The country is honeycombed with drug addicts; dangerous men and women. The great majority commit crime to buy the drug they must have. They are most unfortunate people—diseased people; but instead of going after those who dispense dope in a real way we give them a small sum. Why? Because there is no Anti-Saloon League with a big lobby threatening Members of Congress in support of the enforcement of that law.

The sentiment existing in this country in opposition to the eighteenth amendment and Volstead law prevents enforcement. Increase the agents to any number and the violations would still prevail.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. I yield.

Mr. BLANTON. The gentleman is proving our case for the need of more money for enforcement. [Applause.]

Mr. COCHRAN of Missouri. We could appropriate $100,000,000 for enforcement, but this law would not be enforced. I will take the gentleman from Texas [Mr. BLANTON] to Texas, where I was in 1928, where you could get all you wanted, the Texas Rangers notwithstanding. [Applause.] No matter where you go—I do not care where it is in this country, the city of Washington or any other place—you can get all the liquor you want to buy; and everybody who has been around who is awake to conditions must admit it.

Frankly this bootlegging business is causing the people of this country a great deal of concern. The bootleggers who now support the drys—they do not want their source of living taken from them—have methods that enable them to deceive their customers. They not only print the labels but have identical bottles manufactured, printed wrappers, and even the corks have the name of some Canadian or other foreign brand of liquor blown in. They sell this to the public at high prices, making them believe that they are getting foreign-made goods. When it is opened it is found to be North Carolina, Virginia, Maryland, South Carolina, or some other kind of rye, a few weeks old, which you can buy in those States for as low as $3 or $4 a gallon, but which brings big prices when placed in bottles with labels and wrapped exactly like the product manufactured abroad and in Canada. It might be well to spend some of this money to protect the innocent investor.

I have been fair to the Prohibition Unit. I voted for the past appropriations, but in my last campaign I told my constituents I was through, that I would vote to hold the appropriations down to the minimum, and I propose to do so to-day.

Let the bureau use what it gets to try and stop some of the illicit manufacture of liquor. It can not do it, for as soon as they destroy one still another is put up.

The recent decision of the Supreme Court on entrapment spells the death of prohibition enforcement. How can a Federal agent make a case if he does not induce the bootlegger or proprietor of a speakeasy to violate the law. When he does that it is practically entrapment. It seems to me that the only field for enforcement now is the source of manufacture. Leave the fellow who sells a pint or a drink alone for a while and concentrate all efforts and use what money is appropriated to try and destroy the source.

Concluding, Mr. Chairman, let me say prohibition has failed; the people, knowing this noble experiment had had a fair trial, spoke last November. Why, then, should we spend the taxpayers' money in times such as we are now experiencing to try and enforce a law which all honest men and women who know conditions must admit is impossible.

[Here the gavel fell.]

Mr. TINKHAM. Mr. Chairman, I yield five minutes of my time to the gentleman from Wisconsin [Mr. SCHAFER].

Mr. SCHAFER. Mr. Chairman and members of the committee, I was, indeed, gratified to hear the American speech of our heretofore dry Democratic colleague from Georgia [Mr. TARVER]. I do not agree, however, with his statement that there was drunkenness and high-power beer sold at the Texas barbecue. He perhaps observed a few of the disciples of Bishop Cannon down there drinking near beer. The bishop testified before the Committee on Ways and Means that several of his disciples claimed to have become intoxicated as a result of drinking a couple of bottles of one-half of 1 per cent near beer.

I almost agree with the statement of the gentleman from Ohio [Mr. MOORE] when he said a year will roll by and we will still have the eighteenth amendment. A year will roll by, and two years will roll by, and we will still have the eighteenth amendment, unless our Democratic colleagues who have control of the House take the bull by the horns and vote to submit a repeal resolution at this session.

If you wait until the next session of Congress, many of the State legislatures will have adjourned; and if action is to be taken by States through legislative action, you will not have this action. If action looking toward repeal is to be taken by State conventions, many of the State legislatures which must provide for the conventions will not be in session. I prophesy right now that unless you can convert six of the dry-voting Democrats and submit an eighteenth amendment repeal resolution at this session, you will find two years from now that the eighteenth amendment is still in the Constitution.

It is reasonable in these days of high cost of government to reduce the appropriations for prohibition enforcement 25 per cent in order to relieve the taxpayers. The Democratic Party promised to reduce all appropriations for the Government 25 per cent. We have to cut the cost of government. The excessive burdens of taxation are helping to crucify the American people and keep people who have money from putting it into industry and furnishing employment. We can also help these overburdened taxpayers by adopting the Tinkham amendment and stopping the expenditure of many thousands of dollars of the taxpayers' money to purchase booze to be consumed by prohibition agents and stool pigeons.

Look at the newspapers each day, and you will find that some of these agents admit before court commissioners and admit when testifying in court that they make 10 or 12

purchases of whisky and drink it before they make an arrest.

For goodness sake, let us give some relief to the overburdened American taxpayers, and let us commence to give that relief in this prohibition appropriation bill, particularly in view of the promise of the Democratic Party to reduce the expenditures of government 25 per cent and to also abolish prohibition.

I hope that you will also vote for the amendment to prevent wire tapping. We know that the sanctity of the home has been destroyed and the home life of the American people has been subjected to a despicable system of espionage under the wire-tapping practice. It is only fitting that the distinguished gentleman from the Commonwealth of Massachusetts [Mr. TINKHAM] should offer this amendment, because many years ago the citizens of that Commonwealth rose up and protested against the invasion of the home and the home life of the American people by the use of similar despicable means. If there is any doubt among any of you Democrats as to whether or not the anti-wire-tapping amendment should be adopted, I submit for your consideration the opinion of that sterling American, that noble Democrat, Justice Brandeis, in the wire-tapping case of Olmstead against United States, in which opinion he bitterly denounced this nefarious practice. I ask you Democrats to follow Justice Brandeis and not "Justice" BLANTON on this proposition. [Laughter and applause.]

Mr. TINKHAM. Mr. Chairman, I yield five minutes to the gentleman from Michigan [Mr. CLANCY].

Mr. CLANCY. Mr. Chairman, I rise to advocate, as I have done for many years in the House, prohibition reform. I rise now to support the amendments or curtail terrifically heavy prohibition-enforcement appropriations and the fanatical, terroristic practices of telephone wire tapping, appropriating money for the purchase and consumption of intoxicating liquor by prohibition agents, and for the payment of civilian snoopers outside the service.

For years I have fought these abuses and for some years I have had pending in Congress a bill to abolish wire tapping by prohibition agents.

The country is in a rage that the present session has not seen the passage of a beer bill or a bill for the repeal of the eighteenth amendment. It is also furious that appropriations have not been drastically cut down or abolished for the special enforcement of prohibition.

We have not even considered the repeal of the odious Jones 5-and-10 law nor the repeal of the law allowing the seizure and sale of automobiles owned by innocent persons. Auto sales dealers and the big manufacturing companies lose over a million dollars a year by the operation of this law.

We have had responsible leaders testifying before our committees that large groups of our people are meditating revolt or revolution unless they get relief from Congress.

I do not believe that all Members of Congress appreciate the terrific undercurrent of dissatisfaction prevalent among our people to-day. I talk to dozens of people every day, in every walk of life, and invariably the question is brought up about the way Congress is fiddling away its time in Washington.

We have been in session now about eight weeks, but little has been accomplished. You would be surprised to know of the radical ideas that some of the biggest and best business men are advocating. If ever there was a repetition of history, of Nero fiddling while Rome was burning, we have an instance now of Congress monkeying while the country is going to the dogs.

In past debates on prohibition-enforcement appropriations I called attention in the House to the fact that the Appropriations Committee of the House is packed with drys, consciously or unconsciously. This subcommittee on the Justice Department is packed 4 to 2. At least they were drys before the last election. Another subcommittee appropriates more money for prohibition enforcement than is appropriated in this bill. There are six drys and no wets on that subcommittee. Another subcommittee, which has occasionally handled prohibition-enforcement appropriations, has 10 drys and no wets.

In the next Congress, if justice is done to the country, the leaders of the House should appoint a larger proportion of wets on that committee. The committee should be controlled by the wets.

It can not be considered otherwise to-day than that prohibition is the sacred cow of the Appropriations Committee and is going to get the least cut of any items appropriated.

It can not be otherwise also than that the gentleman from Massachusetts [Mr. TINKHAM], who has been a fighting wet on that committee for years, is to-day the black sheep of that committee, and that is why he is denounced to-day. He is one of the most valuable Members of the House. The wets gain hundreds of millions of dollars in revenue and also will save millions in appropriations and taxes, all for the people.

It has been made clear by the gentleman from New York [Mr. GRIFFIN], a member of the subcommittee, that a department like the Department of Commerce has been cut 18 per cent and which has control of the life-saving maritime activities of the Government and has in charge the safety of the lives of millions of passengers on the water.

In the Commerce Department, the Bureau of Standards, which is for research and the advancement of industry, has been cut. The Bureau of Foreign and Domestic Commerce has taken a terrific cut. It is claimed on every hand that the country will never come back unless its trade is revived, and we are particularly anxious to see our foreign trade revived, and it is the business particularly of the Bureau of Foreign and Domestic Commerce to promote this trade. Yet it is heavily cut.

The gentleman from Maine [Mr. BEEDY], in effect, said, "Wait and let the people act on prohibition through their legislatures or through their conventions and see what the ultimatum is, or wait for action of the next House and Senate."

We got a flat wet ultimatum in the elections last fall. We got an ultimatum also last June, when both political parties went wet in their platforms. Why wait any further while the country suffers?

An official of the Department of Justice tells me that it costs $183 to bring a person charged with violating the prohibition laws to jail. Upon this tremendous cost is superimposed the cost of two juries, the grand jury, and the petit jury, the cost of the district attorney's office, and the cost of the judge's office and the marshal's office, as well as the maintenance in jail of the prisoner for whatever sentence he receives, and then also the cost of maintaining his wife and children or other dependents, which is usually done by the public welfare.

The wet amendments are not intended to destroy the administration of justice. In my city we have 3,300 policemen, deputies, and so forth, to enforce Federal and other laws, and Congress has been drastic enough also to send to Detroit about 600 border patrolmen, a large portion of whom are customs border officers, for the sole purpose of enforcing the prohibition law. The rest of them are immigration border patrolmen. Then you superimpose upon these officers prohibition agents, and the system of tiers of police upon one another is worse than in Russia, even in the days of the Czar.

If you had a Federal law against the use of tobacco or chewing gum, you would probably regard it as absurd to appropriate $9,000,000 in addition to the appropriations for all other law enforcement, for the enforcement of that particular law. It is just as silly to do so for beer or liquor.

One gentleman has said, "Do not worry about wire tapping; it is only being used to catch criminals."

In my State the telephone wire of the highest Federal official in the State was tapped, that of the collector of customs. He was an innocent man and was proved so. The Justice Department did it, and the Treasury Department did not know it. They tapped the wire of the collector of customs, not in his office, but in his home, and

listened to the conversations between his wife and himself of an intimate nature and other intimate conversations. He was thus made an easy prey to embarrassment or even blackmail. If the highest official of the Federal Government in Michigan was not immune from Federal wire tappers, how could a Congressman or Senator or even the President be regarded as immune?

Mr. SHREVE. Mr. Chairman, it seems to me that in all the discussion to-day we have lost sight of one thing. We have lost sight of one of the very fundamentals of this proposed legislation, in that we have lost sight of the revenue end of it.

Now, I have been told that the beer bill would bring in about $125,000,000. That bill is coming along soon, and I want to ask what useful purpose will the bill serve unless these men who pay $1,000 for a permit to manufacture beer and the others $1,000 for a permit to sell it unless they are protected from foreign invasion?

I want to read a portion of an article, and then I am through. It is from Ottawa, Canada, January 17:

> Domestic rum runners are preparing for an onslaught on the American market, it was revealed here to-day under a peculiar construction on Canada's criminal code, whereby the Dominion Government's ban on liquor exports to prohibition countries could be voided as regards the United States if the American Congress legalizes 3.2 beer.
>
> Liquor shipments are increasing to the French islands in the Gulf of St. Lawrence, outlet for wet cargoes to the United States, and a veritable flood of whisky, gin, beer, and wine is expected to be unleashed for destination across the border once the beer bill before Congress is passed.

What are you going to do about it? How will you raise $125,000,000 if you are going to allow a flood of liquor to come into the United States? How are you going to collect the revenue if you cut down the appropriation and tear down the law enforcement?

Mr. HORR. Will the gentleman yield?

Mr. SHREVE. Certainly.

Mr. HORR. I want to say that in my own State of Washington, at the last election, we repealed all the prohibition laws as far as the State is concerned. We have between seven and eight officials trying to keep out the flood that the gentleman is talking about which to-day is flooding the State of Washington and will continue.

Mr. CLANCY. Will the gentleman yield?

Mr. SHREVE. Yes.

Mr. CLANCY. I want to ask the gentleman if it is not true that we passed the Treasury Department appropriation bill with appropriations for customs patrol and border patrol to prevent the flood of these liquors from Canada?

Mr. SHREVE. That is true, but we know the situation there. I live on the shores of Lake Erie the same as does the gentleman, and we know that they are not going to stop the rush of liquor unless there are law-enforcement officers in his city and mine. I am talking about protecting the brewery men, the manufacturers of beer, and those who will sell it. Where are you going to get the $125,000,000 that you say the bill will bring in?

[Here the gavel fell.]

Mr. GRIFFIN. Mr. Chairman, I yield four minutes to the gentleman from Illinois [Mr. SABATH.]

Mr. SABATH. Mr. Chairman and gentlemen of the committee, whether we favor or oppose prohibition, I feel that we should support and adopt the amendment offered by the gentleman from New York [Mr. GRIFFIN]. If there were any chance of reducing it by 50 per cent, I, myself, would favor it and vote for it; in fact, I would even eliminate it altogether; but I realize there is no possible chance of that.

The country demands economy. We have been trying to economize, and have done so in some departments.

In view of conditions, I feel that a 20 per cent reduction in the Prohibition Bureau is a reasonable one. Hardly a day passes that we do not hear from all sections of the country and read in practically every newspaper of the clamor for balancing the Budget and rigid economies. I realize, and I know that you gentlemen realize, that it is propaganda carried on by the shrewdest of publicity men and lobbyists who have been engaged by the very men who brought about this prohibition, by such moralists as Stillman and Kresge, and by the gentlemen who, the evidence only yesterday disclosed, control about 1,147 directorships in the various banks, insurance companies, railroads, and large industrial companies. These are the men who are behind the movement and behind this lobby to balance the Budget. They know that the balancing of the Budget will not start the wheels of commerce going again. They know that; but they are trying to take advantage of the unfortunate situation which the country is in now in order to bring about the reduction of the salary of every employee, regardless of the small amount that he may earn, because they can point out in their own establishments that even the Government has reduced salaries by 15 or 20 per cent and that they, consequently, must do likewise.

It is high time that we demonstrate to the country that we are honest and sincere in our efforts to bring about economy, not because of any reaction to the propaganda, but because we recognize that conditions make it imperative that we economize. I am opposed to the cutting of wages and salaries of the low-paid men; but this apparently is the aim of those who advocate the balancing of the Budget, and who are shouting day in and day out for economy. If these railroad presidents who are drawing salaries of $100,000 to $120,000 a year—money which comes out of the proceeds of the revenues and from the stockholders—would reduce their salaries by one-half or by 75 per cent, they would be justified in criticising the House and in saying that we are not trying to bring about economy. It is these very men who are drawing $100,000 and $150,000 a year as officers of these corporations who are demanding the balancing of the Budget and who are disregarding the people of the United States every day in the year.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. SHREVE. Mr. Chairman, I yield nine minutes to the gentleman from Alabama [Mr. OLIVER] or his representative, Mr. GRIFFIN.

Mr. GRIFFIN. Mr. Chairman, I yield four minutes to the gentleman from Texas [Mr. BLANTON].

Mr. SABATH. Mr. Chairman, a parliamentary inquiry. The gentleman has spoken on this question before.

Mr. BLANTON. Mr. Chairman, I refuse to yield for a parliamentary inquiry.

The CHAIRMAN. The gentleman from Texas refuses to yield for that purpose.

Mr. BLANTON. Mr. Chairman, usually those who propose amendments speak for them so as to allow those who do not agree with them to answer in debate. I was in hopes of being able to use part of my time to answer the gentleman from Massachusetts [Mr. TINKHAM], who proposes some very drastic amendments. But he saves his speech until last, so I can not follow him.

It is impossible to ferret out and locate and identify the heads of big national and international liquor rings that violate our prohibition laws in the United States without some wire tapping under safeguards. Both the Attorney General and Colonel Woodcock state that emphatically. It is absolutely necessary, once in a while, to use wire tapping in locating the heads of these big rings. They manipulate in the dark, they manipulate under cover. Even their employees do not know who they are, sometimes. Why should we protect them? Who are they that they should receive congressional protection?

Mr. BEEDY. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. I regret that I have not the time. My friend from Massachusetts [Mr. TINKHAM] would take that arm of enforcement away from our Department of Justice. He would destroy all enforcement if he could. I want you to get the printed hearings on the Department of Justice bill and turn to page 310, and there you will see that for several hours, going from one day to the next, and in 43 pages of printed hearings, the gentleman from Massachusetts, who is a shrewd lawyer, with a big brief, asked question after question of Mr. Woodcock, and every

question he asked Colonel Woodcock knocked his eye out with a definite, decisive, conclusive answer. Read it. He was not able to shake him in a single position. Finally, he gave up in disgust this year just as he did last year, as you will see if you will look also at the hearings on the bill last year.

What are we going to do? Are we going to cripple prohibition enforcement? If so, why? What is our purpose? My friend from Illinois [Mr. BRITTEN] says that in spite of the eighteenth amendment, even though it is not repealed, that there will be a beer bill passed into law. If there is, it will be because somebody violates his oath. My friend in the next Congress will have to take the oath and swear that he will support and defend the Constitution, without any evasion. That means that he will support every part of the Constitution, including the eighteenth amendment.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. And if the next Congress comes in here and votes for intoxicating beer to be sold right in the face of the Constitution, then I ask my friend from Illinois, whether they will not be violating their oath of office.

Mr. BRITTEN. The gentleman knows that his Commander in Chief, the President elect, has also to take that oath of office, and he is for the repeal of the eighteenth amendment.

Mr. BLANTON. If he signs that beer bill, with the eighteenth amendment not repealed, he will violate his oath also.

Mr. BRITTEN. He will sign it, if President Hoover does not.

Mr. BLANTON. I don't believe either will violate their oath.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. TINKHAM. Mr. Chairman, the honorable Representative from Texas, as is his wont, is continuing his attacks upon me. I have been used to attacks for about 30 years. I am absolutely indifferent to them, so the honorable Representative is wasting his time. In fact, I welcome attacks from certain sources.

The House knows as well as I do that there is something wrong with the honorable Representative from Texas [Mr. BLANTON], and as I understand it, the consensus of his colleagues is that his habits are not so convivial after the Congress adjourns as they might well be, which perhaps accounts for his animosity against both things and individuals, and I might say against the world. [Laughter.]

Now, in relation to the three amendments I have offered, one is against the purchase of liquor with Government money, in violation of the prohibition law, often involving entrapment, which is implicit in this practice, a practice which has been denounced repeatedly during the last 12 years not only by the lower courts but by the upper courts as well, and recently by the Supreme Court of the United States.

The second amendment is in relation to the employment of stool pigeons. Think of a government employing the lowest class of people in the world, men who are criminals, and spending money to the extent of $50,000 a year in that practice. There is $50,000 in this bill for that purpose and $125,000 for the purpose of purchasing liquor illegally. These are unclean expenditures and discreditable to any government.

The third amendment is to prevent wire tapping.

Now, in relation to wire tapping, let me read one or two paragraphs from a decision by Mr. Justice Brandeis of the Supreme Court of the United States. In the case of Olmstead et al. *v.* United States (277 U. S. 438) he says:

> The evil incident to invasion of the privacy of the telephone is far greater than that involved in tampering with the mails. Whenever a telephone line is tapped, the privacy of the persons at both ends of the line is invaded and all conversations between them upon any subject, and although proper, confidential, and privileged, may be overheard. Moreover, the tapping of one man's telephone line involves the tapping of the telephone of every other person whom he may call or who may call him. As a means of espionage, writs of assistance and general warrants are but puny instruments of tyranny and oppression when compared with wire tapping.

Can this House, after an expression of that character by Mr. Justice Brandeis, an honored member of the Supreme Court of the United States, approve the practice of wire tapping? His language is flaming language. It is the language of the spirit of America against espionage, against violation of the privacy of the individual, and for the preservation of the integrity of the home.

Further, let me reply to the defense that is made for wire tapping that it is for the enforcement of law, that criminals must be apprehended, as Mr. Justice Brandeis states in the same case:

> And it is also immaterial that the intrusion was in aid of law enforcement. Experience should teach us to be most on our guard to protect liberty when the Government's purposes are beneficent. Men born to freedom are naturally alert to repel invasion of their liberty by evil-minded rulers. The greatest dangers to liberty lurk in insidious encroachment by men of zeal, well meaning but without understanding.

I might add that Justice Holmes denounced this practice in the same case, in the following language:

> It is desirable that criminals should be detected, and to that end that all available evidence should be used. It also is desirable that the Government should not itself foster and pay for other crimes, when they are the means by which the evidence is to be obtained. * * * We have to choose, and for my part I think it a less evil that some criminals should escape than that the Government should play an ignoble part.
>
> For those who agree with me, no distinction can be taken between the Government as prosecutor and the Government as judge. If the existing code does not permit district attorneys to have a hand in such dirty business it does not permit the judge to allow such iniquities to succeed. * * * It is true that a State can not make rules of evidence for courts of the United States, but the State has authority over the conduct in question, and I hardly think that the United States would appear to greater advantage when paying for an odious crime against State law than when inciting to the disregard of its own.

In relation to the purchase of liquor, here is an Associated Press dispatch from Chicago, May 24, 1932, less than a year ago:

> Federal Judge George A. Carpenter has ruled that a prohibition agent who admits taking nine drinks of liquor, which he himself describes as intoxicating, is in no position to testify at a later date regarding his purchases.

In other words, a prohibition agent takes nine drinks and then appears in court as an accusatory witness. That is not an isolated case, but it is typical of hundreds or thousands of cases during the 12 years of the tyranny of prohibition. Such a practice of policy of Government would descredit any law as it has prohibition.

Mr. KNUTSON. Will the gentleman yield?

Mr. TINKHAM. For a moment; yes.

Mr. KNUTSON. Has it not been the gentleman's observation that the Prohibition Department has confined itself to the small violator and has almost altogether ignored the big dealer in alcohol?

Mr. TINKHAM. Well, as far as purchasing drinks is concerned, I think that is true.

Mr. KNUTSON. No; I mean as far as enforcing the law is concerned.

Mr. TINKHAM. Well, I do not know whether that is true or not. The department alleges otherwise.

I have here another dispatch showing the effect of this policy and practice. It is from the Baltimore Sun, and it is headed "Arrested for Driving Drunk":

> Ival H. Hatton, a Baltimore prohibition agent, spending a 2-day annual leave near here, was arrested here early to-day on a charge of driving an automobile under the influence of liquor.
>
> After spending most of the day in the city jail, he was released upon posting $101.75 collateral, which he forfeited by failing to appear for trial several hours later. * * *
>
> The police said Hatton admitted having had several highballs. A woman riding in his car at the time of the arrest was not held.
>
> Hatton described himself as a Federal employee but did not state his duties.

These two cases illustrate what is occurring in every State in this Union by a practice which one of my amendments seeks to discontinue.

The scandals of attempted prohibition enforcement have not only discredited prohibition but have also been a large

contributor to the social chaos in which the American Republic is now plunged.

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. TINKHAM. I yield.

Mr. WILLIAM E. HULL. Is it not also true that they are and have been employing women to do this work?

Mr. TINKHAM. They were recently forbidden to do that. Here is another case:

DRY RAIDERS WHO USED EAGLES' CARDS SCORED

PHILADELPHIA, March 1.—Methods of prohibition agents whose raids led to padlocking of seven Eagle lodges in western Pennsylvania were denounced by judges of the United States Circuit Court of Appeals to-day in reversing a padlock order imposed by the Federal court at Pittsburgh last June.

Two prohibition agents used lodge membership cards bearing fictitious names to gain entry to the lodge rooms, where they allegedly bought beer and liquor, and later obtained search warrants on which raids were conducted.

As recently as December 19, 1932, the Supreme Court decided against the contentions of the Government (C. V. Sorrells *v.* The United States of America). I quote from the decision:

The substance of the testimony at the trial as to entrapment was as follows: For the Government, one Martin, a prohibition agent, testified that having resided for a time in Haywood County, N. C., where he posed as a tourist, he visited defendant's home, near Canton, on Sunday, July 13, 1930, accompanied by three residents of the county who knew the defendant well. He was introduced as a resident of Charlotte who was stopping for a time at Clyde. The witness ascertained that defendant was a veteran of the World War and a former member of the Thirtieth Division, American Expeditionary Force. Witness informed defendant that he was also an ex-service man and a former member of the same division, which was true. Witness asked defendant if he could get the witness some liquor, and defendant stated that he did not have any. Later there was a second request, without result. One of those present, one Jones, was also an ex-service man and a former member of the Thirtieth Division, and the conversation turned to the war experiences of the three. After this, witness asked defendant for a third time to get him some liquor, whereupon defendant left his home and after a few minutes came back with a half gallon of liquor, for which the witness paid defendant $5. Martin also testified that he was "the first and only person among those present at the time who said anything about securing some liquor," and that his purpose was to prosecute the defendant for procuring and selling it. The Government rested its case on Martin's testimony.

Further in this decision it is stated:

It is clear that the evidence was sufficient to warrant a finding that the act for which defendant was prosecuted was instigated by the prohibition agent; that it was the creature of his purpose; that defendant had no previous disposition to commit it, but was an industrious, law-abiding citizen; and that the agent lured defendant, otherwise innocent, to its commission by repeated and persistent solicitation, in which he succeeded by taking advantage of the sentiment aroused by reminiscences of their experiences as companions in arms in the World War. Such a gross abuse of authority given for the purpose of detecting and punishing crime and not for the making of criminals deserves the severest condemnation, but the question whether it precludes prosecution or affords a ground of defense, and, if so, upon what theory, has given rise to conflicting opinions.

I hope the committee will accept the amendment forbidding the use of Federal funds for the tapping of wires, a contemptible and nefarious practice.

I hope the committee will also accept the amendment to prevent the purchase of liquor with Federal funds. Its abuses, its iniquities, and its example are ruinous to ethical as well as to legal standards.

I hope further that the committee will accept the amendment to prevent the employment of stool pigeons, a despicable and vile policy.

[Here the gavel fell.]

Mr. GRIFFIN. Mr. Chairman, I yield four minutes to the gentleman from New York [Mr. O'CONNOR].

Mr. O'CONNOR. Mr. Chairman, my amendment strikes out the entire appropriation for enforcement. I offer it in good faith. I have always taken this position. I am shocked to-day to see some Members whom we used to include in our wet cause doing what I call pussyfooting on it and going only part of the way.

If the Democratic Party—and I will speak only for my own party—did have a mandate from the people it was to repeal the eighteenth amendment and to restore beer. The Democratic Party on November 8, last, was informed that the people of America were against enforcement. I have said before, and I will say it now, that the statement that "while it is a law we must enforce it as a law," is nothing less than demagogic claptrap, whoever utters it, because there is not a man or woman here who would go to the logical conclusion and enforce it. There may be one or two men here who have never seen the law violated.

If they saw the law against burglary or the law against rape violated, they would not condone it; they would see that it was enforced; but what man here seeing this law violated would go to the extreme limit and see that it was enforced? Why, if that were true, we would be a nation of informers.

When the votes are counted and the Members pass through that aisle a check will be made on everybody on the Democratic side who passes through there for or against these amendments, so we may know when we meet here in April who are the people who are abiding by the Democratic platform and who are those who pretend at one time to be wet and the next moment reverse to dry.

Now, if you are against wasting $9,000,000, why waste $7,000,000? There is not a human being I know of, and that includes everybody in the House, who wants this law enforced to the ultimate limit. Why waste even $7,000,000 when the Wickersham Committee has said it is not being enforced, when President Hoover says it is not being enforced, when everybody in America knows it is not being enforced?

The money is here in the Treasury until July 1. Wiping out this provision does not interfere with the Coast Guard or with the border patrol. There is plenty of money to carry out these activities. Why, by July 1 the beer bill will have been passed and a repeal amendment will have been submitted to the States. Do you say to me that you will go the limit and take the anomalous position that after the repeal amendment is submitted to the States with every expectancy that it will be adopted, you will still continue to appropriate for enforcement maybe for years until the machinery of the States get going? Is that what you think of the money of the taxpayers of America?

Now, let us see who walk through the aisle in support of these amendments.

Mr. BLANTON. Mr. Chairman, I make the point of order that this is not proper argument, undertaking to intimidate certain weak-kneed Members. [Laughter.]

[Here the gavel fell.]

Mr. KUNZ. Mr. Chairman, I move to strike out the enacting clause.

The CHAIRMAN. The time for the special order has expired.

Mr. STAFFORD. I make the point of order that the gentleman's motion is not in order. We are proceeding under a special order of the House, which directed the committee to have two hours of general debate upon the various amendments to the paragraph, and at the termination thereof to vote upon the respective amendments. Until that order is fulfilled, the gentleman can not get recognition by a motion to strike out the enacting clause.

The CHAIRMAN. The point of order is overruled. The special order does not interfere with the general rules of the House, which permit the Member to move to strike out the enacting clause.

Mr. KUNZ. Mr. Chairman, it is rather unfair to ask a Member in five minutes to answer the eminent gentleman from Alabama [Mr. OLIVER], who just took his seat, upon the question of the appropriation and the eighteenth amendment. Vox populi vox dei. The voice of the people is the voice of God. Since the inception of the eighteenth amendment there has been hypocrisy until the present day. The American people have been fooled from time to time, and I think it is about time now that a halt be called, and since they issued their mandate of last November, not a party issue, but upon the promise of the man that you elected President of the United States, that prohibition was doomed, then I say let it stand doomed; and you gentlemen are here as Representatives in Congress, not representing

yourselves as individuals but you are here representing the constituency that sent you here to vote as they directed you to do.

I hear men on the floor of the House talk about beer. In the name of Heaven, settle the question once and for all and take away from them that bawling cry of beer so that they can not go back to their constituents and say, "I cried beer and I wanted beer, but I could not get it." If it were not for beer they would not be here, but they have their beer cry and they dote upon it, and that is all they know. The old saying is, "Where ignorance is bliss 'tis folly to be wise."

Ever since the enactment of the eighteenth amendment we have been spending millions of dollars, not to prohibit the sale of liquor but to enrich those who are violating the Constitution, as in the case of Capone, whose source of income was from liquor. It is a well-known fact that he made his money and derived his power from illicit traffic in alcohol, but I ask any of you gentlemen, Was Capone ever arrested and convicted for the sale of alcohol? No; it was necessary for the Department of Justice to get him for evasion of his income tax, and the money appropriated for the Treasury Department investigation forces of prohibition was either wasted in the effort, if any effort was ever made to bring such a criminal to the bar of justice.

Now, the law allows such criminals and their cohorts to come in and pay their income tax on money made from illicit industry. Again, the law protects such criminals in that outside of a committee in Congress no Member of this House can look into the internal-revenue cases, where it is notoriously known that the profits derived by certain individuals are acquired in violation of the law.

The statement has been made by the gentleman from Alabama relative to obeying the law and the Constitution of the country. May I be permitted to call the attention of the gentleman that those States who have passed such stringent prohibition laws are in the minority, and I quote to him figures of the Census Bureau, where, in April, 1930, the minority States had but 39,132,546 population, and 8,854,826 were negroes. On April 1 the same year the total population of the majority States, the North, East, and West was 83,642,500, and of that, 2,613,259 were negroes and those negroes were permitted to cast their votes in accordance with Article 15 of the Constitution of the United States. Articles 14 and 15 apply to the minority States as to the rest of the Nation; so, then, why the purity of the eighteenth amendment, when two-thirds of the people of the United States are demanding, not asking, for its repeal.

It is amusing for a person of intelligence to listen to remarks on this floor made by the gentleman from Wisconsin in berating the Democratic Party and its pledges on the question of beer and prohibition. I am reminded of the story of the dog that continually barks but never bites; he bawls beer but he barks rather queer to an intelligent ear. He promised beer for votes, but evidently his ideas did not coincide with his constituents.

The Democratic Party is pledged to repeal, and Mr. Roosevelt was elected almost unanimously after his declaration that if elected prohibition would be doomed. Are we the dictators or servants of those who elected us to represent them in Congress? Are we going to tell the country that Congress will do as we please? In Illinois two years ago the people elected members to the senate and legislature with a mandate to repeal the search and seizure act and the legislature passed the bill, but Governor Emerson vetoed it.

Now, upon the question of economy. Before the election of a Democratic Speaker the Budget was unbalanced. The Secretary of the Treasury, Mr. Mellon, in a communication to Congress, voiced the warning that it would only be a question of time when the expenditures of the Government would exceed the income derived from this great Nation. It was then the hue and cry that economy should be practiced. To-day we find Congress economizing upon whom? The poorly paid Government worker who, like the small taxpayer of the Nation, is paying their income tax into the Treasury Department of the United States to pay the interest on tax-exempt securities held by the wealthy, and who are protected by the law of the land and who do not have to pay any income tax to the Government if they do not want to by going into tax-exempt securities. If you want to economize, kill this appropriation of $13,000,000 to enforce a law which the mandate of the people in the last election demands it be repealed. Get down to the principle of Abraham Lincoln that this Government is of the people, for the people, and by the people. Jefferson and Jackson fought the good fight for the rights of the people, and they listened to the voice of the people. We were strong then, but to-day it is a different question.

The great Roman Empire functioned at its best when the will of the people was carried out, but it fell when the few in their gluttony for money and licentiousness predominated. The same was the course of Poland after Napoleon entered and vassalized her people. No nation, as Lincoln so ably stated, can exist half free and half slave. Is the will of the people to be obeyed? That is the question to settle.

Now, you come in here and quote the Constitution and the eighteenth amendment. When the veto of the late lamented President Wilson was brought in on the Volstead Act, those men who now cry beer were not here to defend beer. Now it is a live issue. A great many men have changed their coats. They wore red, and now they dress in white, and they are trying to administer to the people of this country a recipe of how to make beer and how they ought to drink beer. Turn back to your Sixty-sixth Congress, first session, and you will find that 198 Members of Congress did not vote. Barely a majority of Congress were present at that time to override the veto of the President of the United States. Fifty-five voted "nay" and 175 voted to pass it over his veto. One hundred and ninety-eight were sitting on the rights of their constituents, and yet they tell you that we ought to have beer, and that we ought to repeal the eighteenth amendment, and the voice of the people was for repeal. Former President Wilson's words are prophetic in his message to the Sixty-sixth Congress vetoing the Volstead Act when he wrote:

> In all matters having to do with the personal habits and customs of large numbers of our people we must be certain that the established processes of legal change are followed. In no other way can the salutary object sought to be accomplished by great reforms of this character be made satisfactory and permanent.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. OLIVER of Alabama. Mr. Chairman, I ask for recognition, not to reply to the speech just made, because that might not be fair, but simply to give some information to the House that I feel it should know, because I think this body should consider correct facts in reaching its conclusion. Some allusion has been made to the fact that the appropriations for many departments carry a 20 per cent reduction for certain bureaus under Budget estimates. For that reason they insist this amendment carrying a like reduction in this appropriation is but following a consistent policy.

Mr. BRITTEN. Mr. Chairman, I make the point of order that the gentleman is not talking to the question before the House. He is making another speech in addition to the one he made a few minutes ago against the pending amendments.

The CHAIRMAN. The motion is to strike out the enacting clause, which covers the whole bill, and the gentleman is talking within his right.

Mr. OLIVER of Alabama. The only reduction made in any appropriation in the Department of Justice for any bureau charged with the duty of enforcing criminal statutes is in the Bureau of Investigation. That was made at the instance and with the approval of the Attorney General and the director, who said they felt that they could take the cut. They handle all kinds of violations other than violations of the prohibition law and have duties to perform in relation to the prohibition law. They took a reduction of $10,000, but in no bureau charged with the enforcement of a criminal statute will you find a single reduction, except what the

committee has recommended for the item now under consideration.

We felt that no complaint could be reasonably registered against such reduction, because even though under the reduction made last year there had been about 100 agents discharged, we found the bureau was very effectually enforcing with such limited force the national prohibition law, and that we would be justified in taking a 5 per cent reduction in this appropriation. We must recognize that if we desire to uphold the majesty of the law we can not weaken the enforcement agencies. You must first take from the Constitution the eighteenth amendment before you undertake to weaken or tie the hands of officers charged with the duty of enforcing it in a positive, decent, lawful way, and I trust the House will follow the course it has previously taken in reference to like amendments, all of the pending amendments being substantial copies of amendments previously introduced and disapproved by Congress not once but several times. I respectfully submit no reasons have or can be suggested to show why a different course should be taken at this time on the pending amendments.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. LAGUARDIA. Mr. Chairman, I rise in opposition to the motion of the gentleman from Illinois to strike out the enacting clause.

Mr. BLANTON. Mr. Chairman, I make the point of order that the gentleman from Alabama [Mr. OLIVER] has consumed that time in opposition, and that all time has been consumed upon that motion. Five minutes were consumed by the gentleman from Illinois [Mr. KUNZ] in favor of striking out the enacting clause of this 4-departments appropriation bill, and the gentleman from Alabama consumed the other five minutes.

Mr. LAGUARDIA. Mr. Chairman, I have the floor.

The CHAIRMAN. The point of order is well taken. The Chair sustains the point of order.

Mr. LAGUARDIA. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. BLANTON. Mr. Chairman, under the special order I shall not object to the gentleman from New York who has not spoken, but I shall object to further speeches.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LAGUARDIA. Mr. Chairman, I simply wanted to call the attention of the House to the statement made by the gentleman from Alabama [Mr. OLIVER], who is always so fair and who knows the facts, but I believe in this instance the gentleman inadvertently misstated the situation as to enforcement, provided the pending amendments are adopted. The gentleman must admit that there is a changed attitude on the question of prohibition and that the country will in a very short time pass upon that question. In the meantime, I submit that the limitation of appropriation, as carried by the amendment offered by the gentleman from New York [Mr. GRIFFIN], would not impair the enforcement of the law as to commercial wholesale violations as described by the gentleman from Alabama. The limitation on funds not to be used for the purchase of liquor affects only the retail trade of liquor. It is not necessary, Mr. Chairman, for an agent to have consumed liquor in order to establish a case. The mere possession of liquor is sufficient for a conviction, and the $7,000,000 which would remain under the amendment offered by the gentleman from New York would permit of the enforcement as to sources of supply, illicit stills, and the manufacture of illicit liquor. Surely it is sufficient to pursue, apprehend, and convict the real criminals if the officials would only go after the real crooks. It would not impair enforcement to that extent, and retail violations could well be left in the hands of local authorities.

The gentleman from Alabama [Mr. OLIVER], I am sure, did not intend to convey the idea that the amendment offered by the gentleman from New York [Mr. GRIFFIN] or the limitations as to the use of those funds for wire tapping and the purchase of liquor, would make impossible the proper enforcement of the law. Again I say if the enforcement officials really will go after the real big fellows—that is not a matter of appropriations—that is not a matter of buying a single drink. It has been contended by the leading drys of this country that the function of the Federal Government in the enforcement of this law is to locate and stop the sources of supply and take care of the wholesale violations of the law, commercial violations of the law.

Mr. BLANTON. Will the gentleman yield for a question?

Mr. LAGUARDIA. Yes; I yield.

Mr. BLANTON. The gentleman could have a thousand barrels of whisky in a warehouse to-day and until a Federal agent could show that it was intoxicating, he could not even get a warrant to search the house. He has to make purchases in order to prove that the liquor is intoxicating liquor before he can even get a warrant.

Mr. LAGUARDIA. Not at all. The gentleman is in error. If one has a thousand barrels of liquor it is no longer a home and not entitled to the protection of a home in respect to search. The mere presence of a thousand barrels of whisky would destroy the identity of a home. A search warrant is required only for homes. If a man has a thousand barrels of liquor in a warehouse or any other building, knowledge of that fact is sufficient to obtain a search warrant or even a seizure. The possession of such liquor is sufficient to constitute the crime.

Mr. BLANTON. The courts, however, will turn that liquor back as soon as they get it unless the agent shows that he had proof of its being intoxicating. They do it every day unless there is proof of its being intoxicating.

Mr. LAGUARDIA. No; not at all. A chemical analysis would indicate the alcoholic content. The point I want to stress is that under the pending amendment $7,199,000 is left for enforcement of the prohibition law. The limitation on the expenditure of funds to buy liquor and tap wires will in no way impair the proper, decent, and lawful enforcement of that law. I urge the approval of the pending amendments.

The CHAIRMAN. The time of the gentleman from New York [Mr. LAGUARDIA] has expired.

Mr. KUNZ. Mr. Chairman, I ask unanimous consent to withdraw the motion I made.

Mr. BLANTON. Mr. Chairman, I object.

The CHAIRMAN. The question is on the motion made by the gentleman from Illinois [Mr. KUNZ] to strike the enacting clause.

The question was taken; and on a division (demanded by Mr. BLANTON) there were ayes 1 and noes 86.

So the motion was rejected.

Mr. DE PRIEST. Mr. Chairman, I ask unanimous consent that the amendment may again be reported.

The CHAIRMAN. Without objection, the Clerk will report the amendment offered by the gentleman from New York [Mr. GRIFFIN].

There was no objection.

Mr. GRIFFIN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GRIFFIN. In view of the fact that my amendment involves a reduction in the appropriation, and the opinions of the Members of the House may be influenced by the Tinkham amendments and the amendment offered by Mr. TARVER, I ask unanimous consent that the amendment covering the purchase of liquor and the purchase of evidence and wire tapping be considered first, because they would take out of the total appropriation several thousand dollars, if agreed to.

Mr. OLIVER of Alabama. Mr. Chairman, the regular order. I think they should be taken up in the order in which they were offered.

The CHAIRMAN. The gentleman from New York [Mr. GRIFFIN] asks unanimous consent that the Tinkham and Tarver amendments be voted upon first, and the amendment

offered by the gentleman from New York [Mr. GRIFFIN] be voted upon afterwards. Is there objection?

Mr. OLIVER of Alabama. I object to that.

The Clerk read as follows:

Amendment offered by Mr. GRIFFIN: On page 24, line 24, after the word "all," strike out "$9,120,000" and insert in lieu thereof "$7,199,986."

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from New York [Mr. GRIFFIN].

The question was taken; and on a division (demanded by Mr. GRIFFIN) there were ayes 104 and noes 120.

Mr. GRIFFIN. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed Mr. GRIFFIN and Mr. OLIVER of Alabama as tellers.

The committee again divided; and the tellers reported there were ayes 113 and noes 128.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read the next Griffin amendment.

The Clerk read as follows:

Amendment offered by Mr. GRIFFIN: Page 24, line 24, after the word "all," strike out "$9,120,000" and insert "$8,440,000."

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. GRIFFIN].

The question was taken; and the Chair being in doubt, the committee divided, and there were ayes 114 and noes 108.

Mr. OLIVER of Alabama. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. OLIVER of Alabama and Mr. GRIFFIN.

The committee again divided; and the tellers reported that there were—ayes 129, noes 118.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will report the first Tinkham amendment.

The Clerk read as follows:

Amendment offered by Mr. TINKHAM: On page 24, line 26, after the period, insert the following proviso: "*Provided*, That no part of this appropriation shall be used for or in connection with wire tapping to procure evidence of violations of the national prohibition act, as amended and supplemented."

The CHAIRMAN. The question is on the adoption of the amendment.

The question was taken; and, the Chair being in doubt, the committee divided; and there were—ayes 111, noes 103.

Mr. OLIVER of Alabama. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. OLIVER of Alabama and Mr. TINKHAM.

The committee again divided; and the tellers reported that there were—ayes 122, noes 107.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will report the next Tinkham amendment.

The Clerk read as follows:

Amendment offered by Mr. TINKHAM: On page 24, line 26, after the word "supplemented," insert the following proviso: "*Provided further*, That no part of this appropriation shall be used for the purchase, for use as evidence of violations of the national prohibition act as amended and supplemented, of any intoxicating liquors, the sale of which is prohibited by law."

Mr. DYER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DYER. Is there not a substitute for this amendment?

The CHAIRMAN. The Clerk was about to report the substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. TARVER as a substitute for the TINKHAM amendment: On page 24, line 26, strike out the period, insert a colon, and add the following proviso: "*Provided further*, That no funds hereby appropriated shall be used for the purchase of intoxicating liquors, nor to pay informers, nor for the purchase of evidence."

The CHAIRMAN. The question is on the substitute amendment of the gentleman from Georgia to the amendment of the gentleman from Massachusetts.

The question was taken; and on a division (demanded by Mr. OLIVER of Alabama) there were—ayes 132, noes 78.

So the substitute amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts as amended by the substitute.

The amendment as amended by the substitute was agreed to.

The CHAIRMAN. The Clerk will report the next TINKHAM amendment.

Mr. OLIVER of Alabama. Mr. Chairman, I think the amendment just adopted covers this amendment.

Mr. TINKHAM. Mr. Chairman, I ask unanimous consent to withdraw the amendment as the amendment just adopted covers it.

The CHAIRMAN. Is there objection?

Mr. LAGUARDIA. Mr. Chairman, a point of order. The amendment was originally read for the information of the House. Then, it should have been offered at this time. The gentleman from Massachusetts says he did not offer it.

Mr. BLANTON. No; it was considered as pending.

The CHAIRMAN. The amendment was to be considered as pending. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment offered by Mr. O'CONNOR: On page 23, line 24, strike out all down to and including line 26 on page 24.

Mr. O'CONNOR. Mr. Chairman, in view of the votes already taken, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. PARKER of Georgia. Mr. Chairman, I object.

The CHAIRMAN. The question is on the amendment of the gentleman from New York [Mr. O'CONNOR].

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 74, noes 132.

So the amendment was rejected.

Mr. OLIVER of Alabama. Mr. Chairman, I think under the order of the House, following this comes the item with reference to prison industries working capital fund.

The CHAIRMAN. The Clerk will report the paragraph.

The Clerk read as follows:

Prison industries working capital fund: Prison industries working capital fund, 1933 and prior years, is reappropriated and made available for the fiscal year 1934, including payment of obligations incurred in prior years; and the said working capital fund and all receipts credited thereto may be used as a revolving fund for the fiscal year 1934, for the purposes authorized by the act entitled "An act to provide for the diversification of employment of Federal prisoners for their training and schooling in trades and occupations, and for other purposes," approved May 27, 1930 (U. S. C., Supp. V, title 18, secs. 744d, 744e, 744f).

The CHAIRMAN. For the information of the committee, the Chair will state there is to be debate for one hour on this paragraph, to be equally divided and controlled by the gentleman from Alabama [Mr. OLIVER] and the gentleman from Pennsylvania [Mr. SHREVE].

Mr. COOPER of Ohio. Mr. Chairman, I offer an amendment.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent that all amendments may be submitted now, because some of them may be subject to a point of order and we would like to make the point of order as they are offered.

The CHAIRMAN. The Clerk will report the amendments for such action as the committee may take.

The Clerk read as follows:

Amendment offered by Mr. COOPER of Ohio: Page 34, line 10, after "744f)" strike out the period, insert a comma and the following: "*Provided*, That no part of this appropriation shall be used for the procurement and/or installation in any Federal correctional or penal institution of machinery for the manufacture of metal furniture and/or metal office equipment."

Mr. BLANTON. Mr. Chairman, I make the point of order that such a limitation upon the prison industries working

capital fund is legislation unauthorized on an appropriation bill.

Mr. MAPES. Mr. Chairman, I make the point of order that if the amendment is read merely for the information of the committee——

The CHAIRMAN. No; the Chair directed the Clerk to report the amendments for such action as the committee may see fit to take.

Mr. BLANTON. If it is subject to a point of order, there is no use of discussing the amendment. The point of order should be disposed of now, and in the event it is ruled the amendment is not in order, there is no need to have debate on it; otherwise we might be debating something that would not be up for a vote at all.

Mr. MAPES. Then the amendment must be offered for some other purpose than for the information of the committee.

The CHAIRMAN. The Chair has so stated.

Mr. BLANTON. Mr. Chairman, my point of order is that such a limitation upon the prison industries working capital fund appropriation, providing that no portion of that appropriation may be used to operate the specific industry named in the amendment, is subject to a point of order because it is legislation itself upon an appropriation bill that would nullify, in effect, the provision of the act of Congress approved May 27, 1930, because it would take this legislation to stop this particular industry under the present prison industry laws.

The act approved May 27, 1930, authorized and directed the Attorney General to provide employment for all physically fit inmates in the Federal institutions, and made available a revolving fund for this purpose. Any attempt to prevent the Attorney General from diversifying the labor of convicts, as this amendment would do by excepting some specific industry, is legislation, and on an appropriation bill is unauthorized by law.

Moreover, a limitation of this kind would not be germane because there is nothing in the appropriation to indicate that it is made for the operation of any specific industry. There is nothing in the limitation to indicate that it would result in a saving, because no amount is specifically appropriated by the language carried in the annual appropriation bill.

Further, it can not be ascertained by reference to the Budget and other documents that the operation of the prison industries results actually in producing revenue through the earnings accruing from the operation of the various prison industries, which earnings are annually returned to the Treasury and placed to the credit of the working capital fund. It is also apparent, Mr. Chairman, that the limitation would not necessarily result in a saving, because such a restriction would only drive the department head to invest funds available for this purpose in another line of activity. For example, if the limitation stated specifically that none of the funds were to be used for the establishment of any industry, and if the Chair pleases, this amendment mentions the metal furniture industry, then the department head would have the right to turn to other industries, and this amendment would not restrict the department from investing as much or more in the establishment of a factory to manufacture wood furniture as distinguished from metal furniture or to manufacture clothing or engage in some other industry.

Although in the guise of a limitation, I submit this is legislation and seeks to change existing law and is therefore unauthorized on an appropriation bill.

Mr. COOPER of Ohio. Mr. Chairman, the prison industries working capital fund is reappropriated in this bill.

In the act to which the gentleman from Texas just referred, section 6, we find these words:

> The prison industries working capital fund shall be administered and disbursed by and under the direction of the Attorney General and shall be available for the purchase, repair, or replacement of industrial machinery or equipment.

The amendment as offered is a limitation to prevent the Director of Federal Prisons from installing in the new Federal penitentiary at Lewisburg, Pa., high-speed machinery for the purpose of manufacturing metal office furniture and equipment. It seems to me it is purely a limitation on the expenditure.

Mr. Chairman, I have no desire to further discuss the point of order. I would like to yield to my friend, the gentleman from New York [Mr. LAGUARDIA.]

The CHAIRMAN (Mr. OLIVER of New York). The Chair is ready to rule.

The Chair holds this is a negative limitation on money reappropriated in the paragraph and therefore overrules the point of order of the gentleman from Texas [Mr. BLANTON].

Mr. OLIVER of Alabama. Mr. Chairman, under the agreement made in the House, it was understood that the gentleman from Pennsylvania [Mr. SHREVE] would yield one-half of his time and I would yield one-half of my time to those in favor of amendments offered to limit the activities of prison industries as now carried on. Since it appears that all are willing that the gentleman from Ohio [Mr. COOPER] shall have control of the time to be allotted to those who favor any or all amendments that may be offered limiting such activities, unless there is objection I yield the 15 minutes that I have promised to yield to the gentleman from Ohio to control.

Mr. SHREVE. Mr. Chairman, I will yield to the gentleman from Alabama 15 minutes of my time.

Mr. MAPES. I would like to suggest to the gentleman from Alabama that if he would accept the amendment we might save an hour's debate and hurry along the legislation.

Mr. OLIVER of Alabama. I will say to the gentleman that I know his suggestion is made as a pleasantry, because I think this is a very far-reaching amendment and should not be approved by the House.

Mr. MAPES. My thought was that the House was going to accept it.

Mr. COOPER of Ohio. Mr. Chairman, the amendment that I have offered provides that no part of this appropriation shall be used for the procurement or installation in any Federal penal institution of machinery for the manufacture of furniture or office equipment.

When the new Government penitentiary at Lewisburg, Pa., was constructed, there was erected a 3-story factory building, intended for the production of steel office furniture and equipment.

Mr. Sanford Bates, Director of Federal Prisons, recently made the statement:

> Unless steel furniture is made at Lewisburg they will have no industry at that prison.

To this statement I, for one, want to protest against the expenditure of public money for the construction and equipment of a prison work shop, suited to no other purpose than the manufacture of steel office furniture.

I believe it is highly important that work be found for the prisoners confined in our penal institutions. However, I doubt if there is any industry that is more highly specialized and consumes less man-hours per unit than that of metal office equipment. More than 80 per cent of the processing of metal office equipment is done by machine, leaving less than 20 per cent for actual man labor, and it seems to me that the selection of steel office equipment as a product of this Federal prison for the avowed purpose of creating the maximum of occupation for the prisoners confined in the Lewisburg prison is economically unsound.

As I have stated, I believe it is important that we find work for those confined in our penal institutions; but in doing so we should at all times select some work that requires the maximum number of man-hours, some which can be produced by hand labor. Steel office equipment is as far removed from this category as any commodity I can think of.

Installation of this machinery would permit the prison to produce the major share of certain office equipment for the Government, namely, the 4-door, legal-size filing cabinet and steel transfer cases, all sizes.

Again, let me say that I strenuously object to this proposal of Mr. Bates to install machinery in our Federal

prisons in order to give the criminal a job, when, by so doing, it will throw law-abiding citizens out of employment.

It is true that our laws prevent the sale of prison-made products except to the Government. At present, however, the Government is the chief customer for metal office equipment.

Mr. Bates, appearing before the Subcommittee on Appropriations, who have charge of the bill we are now considering, stated that unless he could install the machinery for the manufacture of metal office equipment at the Lewisburg Prison the 1,400 inmates would be unemployed. A little later he stated that the industry, if installed, would employ approximately 150 or 200 men. He did not say how the other 1,200 inmates would be employed.

Recently Mr. Bates, in a memorandum which he sent to the Members of Congress relative to the metal-furniture industry to be installed at the Federal penitentiary at Lewisburg, makes a statement which is misleading in many respects. He stated that the value of metal furniture for the past year, as reported by the Department of Commerce, is $64,722,417. This figure has no relation to steel office furniture, which is the commodity under discussion, and the production of which is an industry entirely separate from that of household and miscellaneous metal furniture, such as beds, kitchen cabinets, and so forth. The Bureau of the Census reports show that total shipments of steel furniture business group in 1931 were $15,287,486, and for the 11 months of 1932 for which figures are available were $7,490,393.

Mr. Bates further states that his efforts will be "to eliminate private profits and unfair competition." To eliminate private profit is to eliminate private ability to pay wages or to pay taxes. Is this desirable? When has prison competition with private industry, with its freedom from taxes, capital charges, and overhead, ever been anything except unfair competition?

During this time of economic depression we should not permit our Federal penal institutions to go into competition with legitimate industry and free labor. Thousands of law-abiding citizens are almost starving to-day, yet we to-day are taking the position that we provide work for our criminals in prison, which will take business and labor from private industry. [Applause.]

Mr. OLIVER of Alabama. Mr. Chairman, I yield four minutes to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN of Missouri. Mr. Chairman, no one is more in favor than I am of keeping the Government out of business, but I do not propose to assume the responsibility of taking away all the work from our prisoners in our penal institutions, especially at this time. We have had some experiences in the last few years with riots at penal institutions. We want no more of that. Prisoners to some extent must be kept at work. A great study has been made in an endeavor to find a way to keep prisoners busy, in diversified industries, so as not to particularly harm any industry. Congress has passed laws along this line. I also have received letters from manufacturers with reference to the duck that is made at the Atlanta Penitentiary. I say to you that the superintendent of prisons has been most fair in the last few years, or since this depression has been with us, about interfering with private business. I know, myself, where he has released to the trade several hundred thousand pairs of shoes that he could have manufactured in the Leavenworth Penitentiary. He realized the situation. Corporations in my city secured some of those contracts, and some of my constituents were employed in factories making shoes that could have been made in Leavenworth, if the superintendent of prisons had not voluntarily permitted the various departments of the Army and Navy to ask for bids.

He will be fair with you if you appeal to him. Remember that it was the Congress that ordered the superintendent of prisons to erect the factories, and it should be the Congress that should enact some laws that will change the present system if it is to be changed. True, people are out of employment, honest people who should be given work if possible and prior to furnishing work to men who have violated our laws, but recall, if you will, that we now have over 15,000 men in our penitentiaries. It is a man's job to keep order in those institutions. We want no more riots, and if we can only find some way to keep the men busy they will not go crazy. It is a real problem. We must look after our constituents who sent us here; we do not want to interfere with the little work they have, but we all must admit that when you house 5,000 men in a penitentiary constructed to take care of a maximum population of 2,500 you are placing a burden upon the officials in charge of the institutions. I only hope we can find some way to keep these men busy and at the same time not interfere with free labor. Confident that those in charge of the institutions, knowing that Congress wants them to hold down competition with private business just as much as possible, will make every effort to do so until we have found some better way to keep the prisoners busy and out of trouble, I can not join in the movement advanced by the gentleman from Ohio [Mr. COOPER].

Mr. COOPER of Ohio. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. I have said all I desire to say.

Mr. COOPER of Ohio. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. REED].

Mr. REED of New York. Mr. Chairman, the last speaker, the distinguished gentleman from Missouri [Mr. COCHRAN], states that he is not willing to assume responsibility for supporting this amendment and depriving prisoners in penitentiaries from having employment. So far as I am personally concerned on the floor of this House I am perfectly willing to assume full responsibility of standing for free labor in my district and in your district as against the man who has proven himself an enemy to society and who now wants to be pampered by the superintendent of prisons. There is a city in my district that has developed the metal-furniture industry. I refer to Jamestown, N. Y.

The manufacture of metal furniture is more or less of an infant industry. The Government, through its legislation, has always been very jealous of the rights of an infant industry. Many laws have been enacted to this end. The working men employed in the manufacture of metal furniture have built up fine homes, reared their families, paid their taxes, and looked forward to a happy and prosperous old age. Conditions in Jamestown, N. Y., at this time are perhaps no different from conditions in your cities. Many of these men were deprived of work almost in the twinkling of an eye when the crash came in 1928 and 1929.

They have struggled along to pay their taxes. As the days have gone along some foreclosures have come and depressed them, and many of these men are walking the streets looking for work. They are law-abiding men. There have been no riots, and there has been no disturbance. They have done their full part. They have tried to find work elsewhere, and they want to live. The men in the penitentiaries are housed, clothed, and fed at the present time at the expense of the Government. Now, I know that the average superintendent of prisons is a well-meaning man. I have the highest regard for Mr. Bates, but it is a strange psychology, and perhaps after all it is a natural psychology, that the man who is superintendent of prisons in time comes to have more regard for the prisoners than he has for the rights of the people on the outside. Little by little he forgets who pays the taxes which support the prisoners. They become faddists and want to carry their ideas too far. In ordinary times I would not be standing here objecting quite so strongly, but when I find, from the investigation made by a committee of this House, that the Federal Government is now engaged in manufacturing to the extent of more than 200 different lines of industry, competing with free taxpayers on the outside, I think it is time to call a halt.

What is it proposed to do in this bill? It is proposed not only to give labor to prisoners but it is proposed to give them special machinery by which you add to the numerical manpower of the prisoners and make it possible under the prison

system and under that law to not employ 1,000 men but by special machinery to put under that roof the equivalent of several thousand men to compete with free industry on the outside.

Mr. SWICK. Will the gentleman yield?

Mr. REED of New York. I yield.

Mr. SWICK. Will this not defeat the very purpose of placing the men at work, especially those men who are confined? Would it not be better to give them work where they would be out in the air, cultivating the soil, or something like that?

Mr. REED of New York. I am heartily in favor of the men having work to do with their hands, but I am opposed to giving them high-speed machinery with which to multiply the numerical manpower of the prisoners and put the products so produced in competition with free labor.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. OLIVER of Alabama. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, what does the gentleman from Ohio [Mr. COOPER] propose to have the convicts in penal institutions do to occupy their time? The gentleman must change the law of this country fundamentally if he passes such an amendment, because every time a Federal judge passes sentence on a prisoner, he sentences him to hard labor in a penal institution. How are you going to force convicts to perform hard labor if you do not provide some hard labor for them to do?

Mr. COOPER of Ohio. Will the gentleman yield for me to answer him?

Mr. BLANTON. Just a moment. I only have five minutes.

Mr. COOPER of Ohio. Eighty per cent of this is machinery and not hard labor.

Mr. BLANTON. No labor can be performed without some machinery. What would the gentleman have convicts do? In every penal institution we have a bunch of them farming, raising all kinds of truck stuffs.

Mr. REED of New York. Will the gentleman yield?

Mr. BLANTON. No; I regret that I have not the time.

You did not find the farmers complaining. They are willing for convicts to raise what they need to eat. They are not so selfish that they do not want these men to have something to do, but there must be something else besides farming to keep them busy.

Now we are going to put 1,200 convicts in the new Lewisburg Penitentiary. What are they going to do if they do not have this proposed work that is to be provided? The gentleman from Missouri [Mr. COCHRAN] was slightly mistaken in his figures when the gentleman called the attention of the gentleman from Ohio to what happened in his own State. It was not just 100 men who lost their lives. When that great riot took place in the Ohio Penitentiary at Columbus there were over 300 men killed.

Mr. COOPER of Ohio. Will the gentleman yield?

Mr. BLANTON. There were more than 300 men killed in the penitentiary at Columbus, Ohio. And in Joliet, Ill., when there was a riot there in the mess hall they did a million dollars' worth of damage to the Illinois penitentiary. There must be something for them to do. You must keep them busy. You must make them work, as the law says they must, when Federal judges sentence them to terms of penal servitude in our penitentiaries.

Mr. COOPER of Ohio. Will the gentleman yield?

Mr. BLANTON. Certainly.

Mr. COOPER of Ohio. The gentleman is all wrong on his figures about 300 being killed, and that had nothing to do with labor.

Mr. BLANTON. Well, I got that from the penitentiary authorities myself. If I am wrong, they are wrong. They gave me those figures as the correct, authentic figures, and I would rather take their figures than the figures of the gentleman from Ohio on the number killed, because I am sure the gentleman does not himself know about it.

Mr. COOPER of Ohio. What is Mr. Bates going to do with the other 1,200 up at Lewisburg? He says he is only going to employ 250 on this metal machinery. The gentleman asked me a question. What is he going to do with the other 1,200?

Mr. BLANTON. It is a hard matter to find work for convicts, simply because of just such fights as we now have on this floor. I want to see him find something for them to do and put them to work. I want to see the convicts who violate the law when they go to the Federal penitentiary not pampered and treated like they ought to have the distinguished-service cross and have the leading machine papers of the country play them up on the front page every day in big headlines as though they had done something remarkable by going to the penitentiary.

I want to see them punished, and the only way to punish them is to make them work. The only time that Al Capone ever did a hard day's work in his life was since he has been in the Atlanta Penitentiary.

Mr. DE PRIEST. Will the gentleman yield?

Mr. BLANTON. No. I can not yield. I regret I have not the time.

When the Hearst string of newspapers the other day had a front-page article asserting that Al Capone was being treated like a king at Atlanta, and that he was spending his time on the tennis courts, my friend, the gentleman from Alabama [Mr. OLIVER], put a statement in the RECORD here from the penitentiary warden day before yesterday, showing that there was not a word of truth in it; that Al Capone did not wear special shoes; that he did not wear special clothing; that he did not enjoy special privileges; that he worked just like other convicts, and not a Hearst paper that I have seen has given very much mention of that correction.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. COOPER of Ohio. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. LAGUARDIA].

Mr. LAGUARDIA. Mr. Chairman, the wording of the amendment offered by the gentleman from Ohio will be to do the very thing the gentleman from Texas says he wants done in the penitentiaries. There is no criticism of Mr. Bates in this discussion. We all agree he is an excellent official. He has his job, and that is, for one thing, looking after the penitentiaries and the inmates. We have our duties. We must look at this proposition from every angle. It is not a question of criticizing Mr. Bates. I have always defended him, and now express the hope that his services will be retained by the next administration. Naturally, he wants to get the best conditions he possibly can; but the gentleman from Texas points out, and properly so, that these men are sentenced to hard labor. I agree with him. There is no hard labor when you take a small piece of metal, put it under a steam or hydraulic press, turn a valve, and the machine does the work.

Of course, we want to keep these men employed; but if there is any place in the world where there should not be any labor-saving machines, it is in a penitentiary. If there is one thing they have plenty of there, it is time and labor. Why the machines?

The gentleman from Texas asked what they would do for work.

Mr. BLANTON. Where, where?

Mr. LAGUARDIA. Give me a chance and I will state. If Mr. Bates wants the prisoners to make metal furniture, let him go out and buy the metal sheets, give the convicts a hand drill; let them make their holes by hand; let them rivet the pieces by hand; take away the pneumatic riveting machines; let them rivet them with muscle power; then let them piece the furniture by hand. That will keep them busy. That, indeed, would be better training and real hard labor.

Mr. Chairman, Mr. Bates is perfectly frank about this. He not only wants to keep his men busy but he admits he wants, by the use of this labor-saving machinery for the production of metal furniture, to make high-grade furniture in order to compete with free labor and sell this furniture to the Government buildings. I submit, Mr. Chairman, that even in times of prosperity, even if we did not have a single

unemployed worker in the country, I still would protest against the competition of convict labor with free labor, even though the products of convict labor were sold to the Government. Why, gentlemen, free labor is looking for work in order to get food for themselves and families—convicts are sure of three square meals a day.

Why, Mr. Chairman, this has nothing to do with Government operation. Let us not confuse the issue. This has nothing to do with the Government in business. This has to do with the competition of convict labor with free labor.

While we admit the necessity, under the modern system of treating criminals, to keep them occupied, they can not be kept occupied by the installation of high-pressure, labor-saving machinery. You must keep them occupied with hand work, even though it is tedious; you have got to keep them at work all of the time. The object is to keep the prisoners occupied—not the quality, and certainly not the quantity, of the product.

I want to point out to some of my friends that nobody is shocked because it is now attempted to appropriate for machinery for the occupation of convicts, yet when we come to appropriation for the Board of Vocational Training funds to assist free law-abiding men and women who have been handicapped by reason of misfortune, then we hear the cry of paternalism; then we hear the cry of economy; then we witness the attacks to reduce appropriations.

I am not criticizing any official or any system, but I say that in this day and age to come in here and put high-pressure machinery into a Federal penitentiary, thereby reducing the opportunity of giving all of the inmates work and putting this very project in competition with free labor—I say, Mr. Chairman, we should not need even an hour's discussion on that. This limitation ought to be adopted without any opposition.

The gentleman from Ohio and others of this House made a thorough study of penal institutions under the Federal Government. This is nothing new. This has been going on for a long time. The best thing we can do, as the gentleman from Texas says, is to keep the convicts busy at work, but to do that we do not need labor-saving, high-speed producing machines. Whatever we do, we must not permit the products of free labor to be reduced by reason of prison-made goods. [Applause.]

[Here the gavel fell.]

Mr. OLIVER of Alabama. Mr. Chairman, I yield three minutes to the gentleman from Georgia [Mr. RAMSPECK].

Mr. RAMSPECK. Mr. Chairman, I have very great admiration for the gentleman from New York, especially for his ability and his sincerity, but this is not the first time I have heard him raise his voice along this line.

In Georgia we use the State convicts on highways and he objects to that. I apprehend that no matter what Mr. Bates might propose to employ these prisoners on, the gentleman from New York [Mr. LAGUARDIA] would object to it, because anything you set a convict doing necessarily puts him to some extent in conflict with free labor.

I find myself in the position where I would like to sympathize with these gentlemen who are proposing these restrictions, but I see that this is only the opening wedge for what will come hereafter. Unfortunately, in some respects, my district contains one of these Federal institutions. Down there to-day is the most publicized prisoner of the Federal Government. What the gentleman from Texas said about his treatment is absolutely true. He does not get any special favors. As a matter of fact it is harder to see him than to see the President of the United States to-day. We have in the Atlanta Penitentiary, Mr. Chairman, a duck mill, and I am well satisfied in my own mind that this amendment is simply the forerunner of an effort from the duck manufacturers of the country to limit the production of the Atlanta mill. We have in that prison to-day over 3,000 prisoners, more than half of whom are unemployed. We have had as many as 3,900.

Mr. COOPER of Ohio. Mr. Chairman, will the gentleman yield?

Mr. RAMSPECK. I yield.

Mr. COOPER of Ohio. This is a new undertaking; this is the installation of new machinery. They have not got it up there in the penitentiary yet.

Mr. RAMSPECK. I understand that, but the duck manufacturers are already in communication with Members of Congress advocating a limitation of the amount of duck that may be produced in the Atlanta Penitentiary.

I wish to ask you one question before you vote on this matter: Is it not better to let the Attorney General and the superintendent of prisons work this problem out than for Congress to try to legislate to protect a particular industry that may happen to be in some Member's district? This is what is going to be the outcome of this effort.

It seems to me, Mr. Chairman, that we should look at this matter from a broad viewpoint. I would like to help relieve the duck manufacturers, but what are we to do with our prisoners? Shall we maintain them in idleness at the expense of the taxpayers of America?

My opinion is that as long as the products of these industries produced in our prisons are used only by the Federal Government, and are not sold to the public in competition with free labor, it is the best policy to utilize their labor to keep them employed. To do otherwise will entail a greater burden upon the taxpayer who is now loaded beyond capacity to pay.

I have talked with the leaders of labor in my district about this problem and they agree with the view I have expressed above.

If we place the proposed restriction upon this appropriation, should we not in all fairness place a similar restriction in favor of all other industries affected by the products of our prisons?

The logical conclusion is that eventually we would have several thousand prisoners kept in idleness, well fed, clothed, given the best possible medical attention, at a cost of several millions of dollars to the taxpayers. They would produce nothing. I can not concur in such a policy.

At the Atlanta Prison there is a farm which in recent years has been improved with fine buildings, with steam tables in the kitchen, with all modern conveniences. The men are so plentiful that each does very little labor. The farmers living adjacent to this farm are complaining that these prisoners live in better circumstances and work less than do such farmers.

There is one other point I wish to bring out. The prisoners who work in our prison industries are paid a small compensation. This money can be sent home to their dependents or it may be held until they are released and then paid to them. This helps rehabilitate the prisoner or it helps prevent their dependents having to rely upon charity.

Here in the House we can not escape the interests of the districts we represent. It therefore seems to me that we should leave this matter to the Attorney General and the superintendent of prisons to work out so as to compete as little as possible with our manufacturing plants on the outside. We must have a general policy and I can not escape the conclusion that it is not fair to the people to maintain these prisoners in idleness. Their labor should be utilized to reduce the cost of government.

[Here the gavel fell.]

Mr. STAFFORD. Mr. Chairman, the adoption of this amendment will express the opinion of the House whether the membership wishes convict labor to be employed in highly mechanized industry or whether they should be occupied as the State penitentiaries in every instance employs their prison labor where work is the major factor in the production of such industry. I challenge the committee or anyone here to cite an instance among all the State penal institutions where they are employing their labor in mechanized industry. In Michigan they are employing them in the manufacture of cement. In my State they are employing them in the manufacture of sisal, and in the local penal institutions they are employed in the manufacture of chairs and the like. This has been the endeavor ever since this question has been a problem before the Congress. The distinguished adviser of the President elect, Mr. Swagar Sher-

ley—and there was never a more brilliant man who occupied a seat in this House—recommended as a primal policy for this Congress to follow that prison labor should be occupied in industry where labor was the principal factor. Now we are expressing the opinion of Congress in this instance that it is ill-advised to have convict labor engage in an industry where machinery represents 50 per cent of the production. This line goes nowhere in training for a vocation.

No claim is made here that there is any monopoly whatsoever in private manufacture. If I had known that this act that was passed by the last Congress surrendered the absolute determination of this matter to a bureau officer with respect to the way in which he should employ the revolving fund, I would have strenuously opposed it. It is altogether too absolute a power to give to any bureaucrat, no matter how well-intentioned he may be, to have him determine a policy against the declared purpose of Congress heretofore expressed that convict labor should be utilized in those industries where labor is the principal factor.

Why, presently they will be engaged in the manufacture of automobile chassis. A great manufacturing institution in Milwaukee, the A. O. Smith Co., manufactures more chassis than any other concern in the country. They manufacture most of those required by the General Motors Corporation. They just put a piece of steel at one end of the machine and it comes out a completed chassis. I suppose Mr. Bates may wish to have this kind of manufacture for our convict labor.

There are many other ways in which this labor can be occupied. By this amendment we are checking the investment of Government funds before they have purchased any machinery for this purpose. I want this to be a test here and now of the policy of Congress as to whether we approve Mr. Bates's policy of going into mechanized industry for the employment of our convict labor.

Mr. Chairman, I yield back the balance of my time.

Mr. COOPER of Ohio. Mr. Chairman, I yield five minutes to the gentleman from Missouri [Mr. SHANNON].

Mr. SHANNON. Mr. Chairman, the deduction to be made from the speeches of the gentlemen from Texas and Missouri is that if the millions of unemployed who are not in penal institutions wish to receive consideration, they should begin rioting. We are told that the only way to prevent rioting in prisons is to give the prisoners work. I disagree with those who say there is no criticism of the conduct of the business activities at these institutions. The Director of the Bureau of Prisons is a penologist who has gone mad on the subject of furnishing employment to those in prison at the expense of those on the outside who have committed no offense, and who must feed, clothe, and care for themselves.

I know of no better way of presenting the situation than to quote from the testimony of a representative of a large shoe-manufacturing concern of Boston, who testified before our special committee. He said:

> There is no doubt but that public sentiment favors the furnishing of some form of employment for inmates of penitentiaries. However, at this time, after some three years of acute depression, which may be in the future more or less protracted, most thinking Americans are more interested in providing employment to those outside of prisons who are striving to earn a livelihood than they are in providing employment to convicts. In fact, the policy of providing employment to Federal convicts while outside labor was allowed to remain idle has been the subject of severe and widespread criticism in the various shoe-manufacturing centers of our country.

He testified further:

> If the idea is to provide labor to the maximum number of prisoners, then the installation of labor-saving machinery, wherever possible, is productive of the opposite result. For instance, the installation of machinery to cut upper leather has reduced greatly the number of prisoners required to perform this work.

At the instance of railroad men who were either unemployed or employed only part time, I inquired of the Director of the Bureau of Prisons as to his authority for operating a Government bus line for the conveyance of prisoners in competition with private transportation companies. His reply was that Congress granted him that authority. And that is exactly what he will say again—that Congress gave him the right to proceed in this instance.

The Director of the Bureau of Prisons assured a member of our special committee, the gentleman from Pennsylvania [Mr. RICH], that he would not install this high-speed, labor-saving machinery in the new penal institution at Lewisburg to compete with private enterprise; but we are now informed that the director is preparing to do that very thing, and once the machinery is installed you will have a devil of a time getting it out.

The textile manufacturers have received a terrific blow through prison-labor competition. One textile man, from the State of Maryland, who testified before our special committee, said that his family had been engaged in the textile industry for 130 years, but that the practice of Mr. Sanford Bates in installing and operating cotton-weaving plants in Federal prisons would soon put his company out of existence.

This question is a most serious one. Shall this House, by its vote, say to this prison-labor enthusiast that it approves of and indorses his practices, which are so destructive of private business, and which deprives free labor of its legitimate employment?

Mr. BLANTON. Will the gentleman yield for a question?

Mr. SHANNON. Yes.

Mr. BLANTON. Every Member that I know of here who has known Mr. Bates for any length of time, or who is well acquainted with his work, has nothing but encomium to offer.

Mr. SHANNON. I differ with the gentleman. I have met him officially and I have discussed with him the question you are passing on to-day.

Mr. DYER. Will the gentleman yield?

Mr. SHANNON. Yes.

Mr. DYER. I think my colleague must admit that Mr. Bates has authority from Congress to do these things. We have put the discretion in the Attorney General, and Mr. Bates is acting accordingly in this matter. If Congress sees fit to limit this authority or to specify what can not be done, then there are orders that Mr. Bates will take; but I do not think there is any just cause for criticizing Mr. Bates about what he has done.

Mr. SHANNON. The gentleman blames Congress, then?

Mr. REED of New York. Will the gentleman yield?

Mr. SHANNON. I yield.

Mr. REED of New York. Is it not a fact that many of the civilized countries to-day are deeply concerned about the importation of Russian conscript-labor goods and that they are raising their eyes in holy horror at such injustice, and yet we are proposing to follow the Russian system in this respect?

Mr. SHANNON. Yes.

[Here the gavel fell.]

Mr. COOPER of Ohio. Mr. Chairman, I yield two minutes to the gentleman from Michigan [Mr. MAPES].

Mr. MAPES. Mr. Chairman, as has been pointed out during the debate, the adoption of the amendment offered by the gentleman from Ohio [Mr. COOPER] does not mean that the inmates of prisons are not going to be provided with work. There are a good many other things to do besides making metal furniture. The truth is that the same amount of money spent in almost any other way would furnish inmates of our prisons with more real work than this appropriation, a large part of which the Superintendent of Prisons will use to buy machinery to engage in a highly mechanized industry requiring little actual handwork.

I want to call attention to this fact: Those of us who come from the furniture centers know that the depression has hit those centers as hard, if not harder, than any other. The furniture factories the country over are closed, and people who ordinarily find employment in them are out of employment. It is proposed by this legislation to add to this unemployment of free labor in the furniture centers under the guise of providing something to do for convict labor, when as a matter of fact the convicts could be pro-

vided with something else to do to the advantage of everyone. The metal industry has not yet been established in this prison and we had better stop it before it gets a start. [Applause.]

The CHAIRMAN. The time of the gentleman from Michigan has expired. All time has expired.

The question is on the amendment offered by the gentleman from Ohio [Mr. COOPER], which the Clerk will again report.

The Clerk again reported the amendment offered by Mr. COOPER of Ohio.

The question was taken; and on a division (demanded by Mr. BLANTON) there were ayes 84 and noes 43.

Mr. OLIVER of Alabama. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed Mr. COOPER of Ohio and Mr. OLIVER of Alabama to act as tellers.

The committee again divided; and the tellers reported there were ayes 99 and noes 36.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will read the paragraph on page 29 which was passed over yesterday at the request of the gentleman from Alabama.

The Clerk read as follows:

Page 29, line 12: Salaries and expenses, clerks of courts: For salaries of clerks of United States circuit courts of appeals and United States district courts, their deputies, and other assistants, travel expenses pursuant to the subsistence expense act of 1926, as amended (U. S. C., Supp. VI, title 5, secs. 821–833), and other expenses of conducting their respective offices, $1,856,580.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent that this paragraph be passed over without prejudice so that we may return to it later for the purpose of offering an amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The CHAIRMAN. The Clerk will read the next paragraph passed over.

The Clerk read as follows:

Page 35, line 8: United States penitentiary, Atlanta, Ga.: For the United States penitentiary at Atlanta, Ga., including not to exceed $356,350 for salaries and wages of all officers and employees, $920,000.

Mr. RAMSPECK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RAMSPECK: On page 35, line 10, strike out "$356,350" and insert in lieu thereof "$376,350."

Mr. RAMSPECK. Mr. Chairman, this amendment does not increase the total appropriation.

Mr. OLIVER of Alabama. Mr. Chairman, to save time, the committee is entirely agreeable to the amendment and accepts it.

The CHAIRMAN. The question is on the amendment of the gentleman from Georgia.

The amendment was agreed to.

Mr. RAMSPECK. Mr. Chairman, I am grateful to the gentleman from Alabama [Mr. OLIVER] for accepting the amendment. It adds nothing to the total appropriation for the Atlanta Penitentiary, but it does permit the using of an additional $20,000 for salaries.

The guards at this institution are now working seven days each week. This must be stopped. With 12,000,000 persons out of employment, it is almost unbelievable that any Government employee should be required to work every day, having no rest at all. It is particularly hard in such an occupation, for a penitentiary guard works under tension at all times.

Last year the Atlanta prison failed to use all of its appropriation; but under the language of the bill none of this money could be used for additional guards. If some savings can be effected this year in other items, this amendment will permit the Bureau of Prisons to employ additional guards so as to give these men one day of rest in seven. That is the object and purpose I have in presenting the matter, and I trust that the result sought will be achieved.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent, in order that the prison at Leavenworth be given like treatment, that later this evening or to-morrow morning I be permitted to return to the paragraph for the purpose of offering the same amendment. The amendment would not increase the appropriation, but increases the allowance by $30,000, which would make it the same as Atlanta, which was increased $20,000.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read as follows:

General expenses: For supplies, including replacement of and necessary additions to existing equipment, repairs, maintenance, and incidental expenses of lighthouses and other lights, beacons, buoyage, fog signals, lighting of rivers heretofore authorized to be lighted, light vessels, other aids to navigation, and lighthouse tenders, including the establishment, repair, and improvement of beacons and day marks, and purchase of land for same; establishment of post lighs, buoys, submarine signals, and fog signals; establishment of oil or carbide houses, not to exceed $10,000: *Provided*, That any oil or carbide house erected hereunder shall not exceed $1,000 in cost; construction of necessary outbuildings at a cost not exceeding $1,000 at any one light station in any fiscal year; improvement of grounds and buildings connected with light stations and depots; restoring light stations and depots and buildings connected therewith: *Provided further*, That such restoration shall be limited to the original purpose of the structures; wages of persons attending post lights; temporary employees and field force while engaged on works of general repair and maintenance, and laborers and mechanics at lighthouse depots; rations and provisions or commutation thereof for working parties in the field, officers and crews of light vessels and tenders, and officials and other authorized persons of the Lighthouse Service on duty on board of such tenders or vessels, and money accruing from commutation for rations and provisions for the above-named persons on board of tenders and light vessels or in working parties in the field may be paid on proper vouchers to the person having charge of the mess of such vessel or party; not exceeding $2,000 for packing, crating, and transporting personal household effects of employees when transferred from one official station to another for permanent duty; purchase of rubber boots, oilskins, rubber gloves, and coats, caps, and aprons for stewards' departments on vessels; reimbursement under rules prescribed by the Secretary of Commerce of keepers of light stations and masters of light vessels and of lighthouse tenders for rations and provisions and clothing furnished shipwrecked persons who may be temporarily provided for by them, not exceeding in all $5,000 in any fiscal year; fuel, light, and rent of quarters where necessary for keepers of lighthouses; purchase of land sites for fog signals; rent of necessary ground for all such lights and beacons as are for temporary use or to mark changeable channels and which in consequence can not be made permanent; rent of offices, depots, and wharves; traveling expenses, including travel for the examinations authorized by the act entitled "An act to provide for retirement for disability in the Lighthouse Service," approved March 4, 1925 (U. S. C., title 33, sec. 765); mileage; library books for light stations and vessels, and technical books and periodicals not exceeding $1,000; traveling expenses of teachers while actually employed by States or private persons to instruct the children of keepers of lighthouses; all other contingent expenses of district offices and depots, including the purchase of provisions for sale to lighthouse keepers at isolated stations, and the appropriation reimbursed, purchase not to exceed $3,600, exchange, maintenance, operation, and repair of motor-propelled passenger-carrying vehicles for official use in field work; payment of rewards for the apprehension and conviction, or for information helpful to the apprehension and conviction of persons found interfering with aids to navigation maintained by the Lighthouse Service, in violation of section 6 of the act of May 14, 1908 (U. S. C., title 33, sec. 761), and not exceeding $8,500 for contingent expenses of the office of the Bureau of Lighthouses, in the District of Columbia; $4,009,000.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word.

I wish to ask the chairman of the committee if the amount carried in this bill for the Lighthouse Service is adequate to maintain the lights and aids to navigation essential for commerce.

Mr. OLIVER of Alabama. That is a difficult question for me to answer other than in this way: Our committee went into this very fully and felt we were quite liberal in granting appropriations for this important service. We took only a small amount off of the Budget estimates. In addition to that, the gentleman will recall that this is one of the bureaus of the Department of Commerce which had $3,800,000 given them by the emergency bill. That is a continuing fund and they have only a little more than half of this

amount allocated. That is for carrying on the very purpose the gentleman has in mind.

Mr. BRIGGS. What is the occasion for the difference between the estimates and the amount allowed by the committee in the bill?

Mr. OLIVER of Alabama. I think the gentleman will find that the amount they had as a continuing fund, plus the amount that had been recommended, was more than we felt was required. We have provided for the pay roll and for maintenance.

One item reduced was an amount which the head of this bureau felt might not be required, namely, $20,000 for installing lights on the Missouri.

Mr. BRIGGS. These reductions made from the estimates are not such as will preclude the maintenance of the lights and the aids to navigation which exist now under the Department of Commerce through the Lighthouse Service?

Mr. OLIVER of Alabama. In the judgment of the committee, they will not. This is probably the most liberal appropriation granted any bureau in the Department of Commerce.

Mr. BRIGGS. And the appropriation provided, in the opinion of the committee, is sufficient to maintain this service?

Mr. OLIVER of Alabama. We would not have so recommended had we not thought so.

Mr. BRIGGS. I did not want it to be such an undue economy as to endanger the lives of seamen and passengers.

[Here the gavel fell.]

Mr. STAFFORD. Mr. Chairman, I rise in opposition to the pro forma amendment.

The report shows a rather drastic cut of four and a half millions of dollars under the appropriation of last year. As the gentleman has explained, a million or two of that amount is accountable——

Mr. OLIVER of Alabama. Not a million or two, but $3,800,000 of it.

Mr. STAFFORD. Three million eight hundred thousand dollars is accountable for appropriations carried in the emergency act.

Mr. OLIVER of Alabama. And, further, the gentleman will find that the appropriation carried last year was reduced and impounded to the amount of 8⅓ per cent. This year when the Budget prepared its estimates it took from all estimates the 8⅓ per cent. So that nothing will be taken in 1934 from this appropriation and impounded. There was taken from the 1933 appropriation, however, 8⅓ per cent and paid into the Treasury.

Mr. STAFFORD. I notice there has been a rather drastic reduction in the salaries of the keepers of lighthouses recommended by the budgetary officer, $321,000, to which the committee added $20,000 further reduction. So also with the salaries connected with the keepers of lighthouse vessels, $148,000.

Are these figures all within the 8⅓ per cent reduction that the Congress prescribed?

Mr. OLIVER of Alabama. The 8⅓ per cent was taken out of last year's appropriation, as explained; and when you take out the $3,800,000 carried in the emergency act, you will find the bureau has available for expenditure about the same amount they had last year, less the cut indicated by the gentleman from Texas [Mr. BRIGGS] who asked me a question a few minutes ago.

I may also say to the gentleman that they have been improving navigation aids by installing automatic aids and dispensing with some maintenance expense, involving some reduction of the bureau personnel.

Mr. STAFFORD. Including the installation of acetylene buoys, I presume?

Mr. OLIVER of Alabama. Yes.

The Clerk read as follows:

Pay, commissioned officers: For pay and allowances prescribed by law for commissioned officers on sea duty and other duty, holding relative rank with officers of the Navy, including 1 director with relative rank of captain, 6 hydrographic and geodetic engineers with relative rank of captain, 10 hydrographic and geodetic engineers with relative rank of commander, 17 hydrographic and geodetic engineers with relative rank of lieutenant commander, 47 hydrographic and geodetic engineers with relative rank of lieutenant, 61 junior hydrographic and geodetic engineers with relative rank of lieutenant (junior grade), 29 aides with relative rank of ensign, and including officers retired in accordance with existing law, $633,955: *Provided*, That the Secretary of Commerce may designate one of the hydrographic and geodetic engineers to act as assistant director.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

I have never looked with very much favor, since I entered Congress, upon this Hydrographic Service. I notice that the committee did not reduce the Budget estimate for the salaries in this service. This is one of the services that was recommended for merger under the President's plan. I would like to know why the committee did not see fit to make a reduction under the Budget estimate in this identic item.

Mr. OLIVER of Alabama. I may say that this happens to be one of the bureaus for which the emergency bill carried $1,250,000, which has kept the regular force very busy here in Washington handling the field reports. This emergency money, as the gentleman knows, is largely expended in the field. The data are sent here, which puts on the regular force the burden to examine, compile, and analyze the information thus obtained. This will continue; and while the committee did make some reductions, yet this is one reason why we felt we could not safely make further reductions. Congress had directed that certain additional work be done, and the regular officers and employees were required to direct, supervise, examine, and analyze the work and information thus made available.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Appropriations herein made for the field expenses of the Coast and Geodetic Survey shall be available for expenditures in the application of the airplane to the field work of the Coast and Geodetic Survey, and not to exceed a total of $25,000 of said appropriations shall be available for the purchase or construction of cameras and other photographic apparatus, for equipment, except airplanes, and for employment of personnel in the field and office in connection with such work.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

I notice in the report, and have it marked on the bill, that the committee places a limitation on the appropriation with respect to the amount that may be expended for certain equipment, including cameras and photographic supplies, other than airplanes. What is the purpose of this limitation?

Mr. OLIVER of Alabama. They are using airplanes in this survey, and the committee felt, with the approval of the director, that this would be a proper limitation to place on the amount to be expended for such purpose.

The pro forma amendment was withdrawn.

The Clerk read to and including line 4 on page 81 of the bill.

Mr. OLIVER of Alabama. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. OLIVER of New York, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 14363 and had come to no resolution thereon.

DESIGNATION OF SPEAKER PRO TEMPORE FOR THE EVENING SESSION

The SPEAKER. The Chair appoints the gentleman from Illinois [Mr. RAINEY] to preside at the evening session.

ORDER OF BUSINESS

Mr. WOODRUM. Mr. Speaker, it is obvious that the best part of the day to-morrow will be taken up in the completion of the bill under consideration. I have had many inquiries as to when we would consider the independent offices appropriation bill. I am wondering if it can not be understood that it will be taken up on next Tuesday morning?

Mr. RAINEY. I think that will be the understanding. We have 15 more pages of the pending bill to consider, and there will be several roll calls, and Monday will be occupied by unanimous consents and suspensions of the rules.

Mr. SNELL. Then it is understood there will be no business to-morrow except in connection with this bill?

Mr. RAINEY. Yes.

Mr. LAGUARDIA. Mr. Speaker, I would like to ask a question. I am wondering if there can not be some understanding that if separate votes are asked for on amendments to the pending bill adopted to-day they can not go over and be considered on Tuesday morning?

Mr. OLIVER of Alabama. In view of the fact that we are approaching so rapidly the end of the session, and that there are several important appropriation bills remaining undisposed of, and that there will be some important legislation in addition to that considered next week, I think it would be a mistake to let the votes go over.

Mr. RAINEY. I think they ought to be considered to-morrow and get through with the bill.

Mr. LAGUARDIA. Very well.

SENATE ENROLLED JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to enrolled joint resolutions of the Senate of the following titles:

S. J. Res. 239. Joint resolution authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and for other purposes; and

S. J. Res. 240. Joint resolution to provide for the quartering, in certain public buildings in the District of Columbia, of troops participating in the inaugural ceremonies.

RECESS

Mr. RAINEY. Mr. Speaker, I move that the House take a recess until 8 o'clock this evening.

The motion was agreed to; accordingly (at 5 o'clock and 19 minutes p. m.) the House stood in recess until 8 o'clock p. m.

EVENING SESSION

The recess having expired, the House was called to order at 8 o'clock p. m. by the Speaker pro tempore, Mr. RAINEY.

The SPEAKER pro tempore. The House is in session until 10.30 o'clock p. m. for the purpose of considering bills on the Private Calendar unobjected to in the House as in the Committee of the Whole House on the state of the Union. The Clerk will report the first bill, beginning at No. 536 on the calendar.

WILLIAM JOSEPH VIGNEAULT

The first business on the Private Calendar was the bill (H. R. 792) for the relief of William Joseph Vigneault.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, or benefits upon honorably discharged sailors William Joseph Vigneault, late of the United States Navy, shall be held and considered to have been honorably discharged from the naval service of the United States as seaman, first class, on December 11, 1918.

With the following committee amendments:

Line 6, strike out the word "honorably," and in line 7, after the word "discharged," insert the words "under honorable conditions," and in line 9, after the figures "1918," insert a colon and the words "*Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act."

The committee amendments were agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

PETER E. ANDERSON

The next business on the Private Calendar was the bill (H. R. 1177) for the relief of Peter E. Anderson.

The SPEAKER pro tempore. Is there objection?

Mr. EATON of Colorado. Mr. Speaker, I reserve the right to object. This bill ought to have an amendment to it to make it conform to the regular form. If the sponsor of the bill will agree to the amendment showing the date from which the pension shall run, I have no objection.

Mr. PALMISANO. Mr. Speaker, the proponent of this bill was our late colleague, Mr. Linthicum. I know nothing about the bill except that I saw this afternoon that it is on the calendar.

Mr. EATON of Colorado. The gentleman should have no objection to the amendment.

Mr. PALMISANO. I have no objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged sailors Peter E. Anderson, who was a member of U. S. S. *Vermont*, shall hereafter be held and considered to have been honorably discharged from the naval service of the United States: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

With the following committee amendments:

Line 7, strike out the word "honorably," and after the word "discharged" insert the words "under honorable conditions."

Mr. EATON of Colorado. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Line 8, after the word "States," insert "as a member of that organization on August 25, 1898."

The amendments were agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

SYDNEY THAYER, JR.

The next business on the Private Calendar was the bill (H. R. 1936) for the relief of Sydney Thayer, jr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Sydney Thayer, jr., who served as an officer of the Marine Corps of the United States during the World War, shall be deemed and considered to be entitled to the benefits and privileges of the emergency officers' retirement act, Public, No. 506, Seventieth Congress, notwithstanding the time limit for applicants for the benefits thereunder has expired: *Provided*, That such disability rating is sufficient and said Sydney Thayer, jr., is otherwise eligible for retirement under the terms and conditions of said act: *Provided further*, That said Sydney Thayer, jr., shall not be entitled to any back pay or allowances by the passage of this act, except as provided by said emergency officers' retirement act.

With the following committee amendment:

Page 2, line 2, after the word "*further*," strike out "That said Sydney Thayer, jr., shall not be entitled to any back pay or allowances by the passage of this act, except as provided by said emergency officers' retirement act"; and insert "That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

WALTER SAM YOUNG

The next business on the Private Calendar was the bill (H. R. 2907) for the relief of Walter Sam Young.

The SPEAKER pro tempore. Is there objection?

Mr. EATON of Colorado. Mr. Speaker, I object.

Mr. LAMNECK. Mr. Speaker, will the gentleman withhold his objection?

Mr. EATON of Colorado. Yes.

Mr. LAMNECK. I am interested in this bill. This boy served over three years in the Navy. He had two charges filed against him. One was for shooting craps and the other was for being absent without leave. In the testimony of the Navy representative assigned to the committee he said:

I have no information here, but at that time the commanding officer had authority to discharge not more than 2 per cent per quarter, per annum, as undesirable if they had records that showed them not to be material good for the Navy.

I contend that this man did nothing that should subject him to a dishonorable discharge. He shot craps once and then was absent without leave once.

Mr. EATON of Colorado. Does the gentleman from Ohio know this man?

Mr. LAMNECK. Yes; and he is working in Columbus and is a good respectable citizen.

Mr. EATON of Colorado. Mr. Speaker, on the recommendation of the gentleman from Ohio, I withdraw the objection.

Mr. LAMNECK. I thank the gentleman.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged sailors Walter Sam Young, late of the United States Navy, shall hereafter be held and considered to have been discharged honorably from the naval service of the United States as a member of that organization on the 16th day of July, 1920: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

With the following committee amendment:

Line 7, strike out the word "honorably" and insert "under honorable conditions."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

GEORGE BRACKETT CARGILL

The Clerk called the next bill, H. R. 5548, for the relief of George Brackett Cargill, deceased.

There being no objection, the Clerk read as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, or benefits upon persons honorably discharged from the United States Navy, their widows, children, and dependent relatives, George Brackett Cargill, deceased, shall be held and considered to have been honorably discharged as a seaman, second class, United States Navy, on July 22, 1918: *Provided*, That no pay or bounty shall be held to have accrued prior to the date of this act.

SEC. 2. The Secretary of the Navy is authorized and directed to issue to Addie Cargill, mother of George Brackett Cargill, deceased, a discharge certificate showing that he is held and considered to have been honorably discharged as of such date.

With the following committee amendments:

Page 1, line 5, after the word "Navy," strike out "their widows, children, and dependent relatives"; page 1, line 7, strike out the word "honorably" and, after the word "discharged," insert the words "under honorable conditions"; in line 9, after the word "no," strike out the words "pay or bounty" and insert in lieu thereof "bounty, back pay, pension, or allowance"; page 2, strike out all of section 2.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time; was read the third time, and passed.

A motion to reconsider was laid on the table.

WILLIAM JOSEPH LACARTE

The Clerk called the next bill, H. R. 6409, for the relief of William Joseph LaCarte.

There being no objection, the Clerk read as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers William Joseph LaCarte, who was a member of the United States Naval Auxiliary Service and United States Naval Reserve Force, shall hereafter be held and considered to have been honorably discharged from the naval service of the United States as a member of that organization on the 18th day of April, 1917: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

With the following committee amendment:

Page 1, line 8, strike out the word "honorably," and after the word "discharged" insert "under honorable conditions."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

FELIX MAUPIN

The Clerk called the next bill, H. R. 7263, for the relief of Felix Maupin.

Mr. EATON of Colorado. Mr. Speaker, I object.

Mr. BARTON. Will the gentleman reserve his objection?

Mr. EATON of Colorado. I will reserve the objection for the gentleman to make an explanation.

Mr. BARTON. Mr. Speaker, I desire to make a statement about this. This is a man who served in the Navy about nine years. He enlisted in 1913 and during his first 4-year enlistment he had but one charge against him, a petty offense; that is, the charge was that he attempted to smuggle some liquor onto the boat. At the end of the 4-year period he was honorably discharged. Then he reenlisted and served through the war, without a single mark against him.

Mr. BLANTON. Will the gentleman yield?

Mr. BARTON. I yield.

Mr. BLANTON. That is not quite the report from the Navy Department. The Navy Department says that in addition to the charge about the liquor there were three charges against him for being absent without leave, and for those charges he was fined $191.

Mr. BARTON. I will come to that presently.

Mr. BLANTON. The Navy Department recommends against the passage of this bill. I just wanted those facts before the House.

Mr. BARTON. Exactly so. He served his first 4-year term with a single charge, which I have mentioned, and then he reenlisted.

Mr. MILLIGAN. Will the gentleman yield?

Mr. BARTON. I yield.

Mr. MILLIGAN. He was honorably discharged and then allowed to reenlist?

Mr. BARTON. Yes, sir.

Mr. BARTON. After the liquor charge he was permitted to reenlist. Then, on his second enlistment he served throughout the war and until some time in 1919. At that time he was entitled to an honorable discharge. As I understand it, he reenlisted, but they claim he changed his reenlistment to a 4-year period from that time. In 1920 he was absent over leave, and according to his explanation he drank something that he ought not have taken, and it had something in it that he did not think it had. At any rate, he was absent three times without leave in nearly three years. The first time was in 1920 and the last time was in 1922. For each of those offenses he was fined, and there was taken from his pay $191. Then he was put on probation and before the probationary period expired he went ashore on leave and, as he explains, there came up a storm; not exactly a storm but at any rate a high wind, and they pushed off before he expected them to go, and when he came back he could not hire one of the smaller vessels to take him out to the vessel on account of the waves, and he was absent until the next day. For that he was given a dishonorable discharge.

Mr. WOODRUFF. Will the gentleman yield?

Mr. BARTON. I yield.

Mr. WOODRUFF. Will the gentleman tell us how long he was absent without leave?

Mr. BARTON. He was absent less than 48 hours at any time.

Mr. WOODRUFF. Does the gentleman not believe he was punished adequately when he was fined $191 for being absent less than 48 hours without leave on three different occasions?

Mr. BARTON. I certainly think that is so.

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. BARTON. I yield.

Mr. COCHRAN of Missouri. The report shows that this man served in the war from start to finish. Forty-eight hours was the longest he was ever absent from his command.

Mr. KNUTSON. How many times was he absent?

Mr. COCHRAN of Missouri. Three times. The Secretary of the Navy, in his report, which shows how far they will

go in cases of this character, says that in 1922 the United States was technically in a state of war.

Mr. WOODRUFF. With whom?

Mr. COCHRAN of Missouri. The United States was technically in a state of war. Are we not going to give some consideration to him who served in the war from start to finish? Some Members are absent from this House for weeks at a time and they were never fined $191. [Laughter.]

Mr. EATON of Colorado. It appears by this record that this man's superior officer time after time forgave him for willful violations. At the end they gave him a six months' probationary period, and during that probationary period he could not conform to whatever rules and regulations were deemed to be necessary. Of all the cases that are here tonight, no man had more consideration by his superior officers than the man covered by this bill. There is another statement in connection with it, notwithstanding the mention that this occurred during the time when we were "technically" at war.

A portion of these offenses occurred during the time when we were actually at war. The offenses go back to July, 1919.

Mr. BARTON. No; I do not think so.

Mr. STAFFORD. That was after the armistice.

Mr. EATON of Colorado. He enlisted June 1, 1917.

Mr. BARTON. He reenlisted then.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. EATON of Colorado. I yield.

Mr. STAFFORD. I believe the report shows that he was in service during the entire period of the war. He enlisted on the day following June 11, 1917, when he was honorably discharged. We were right at the beginning of the war. On July 26, 1919, Maupin changed his 4-year enlistment to a duration of the war enlistment. We were then out of the war, really.

I do not see any real serious offense that occurred during the war period.

We have been very jealous of granting relief to those who were guilty of serious offenses during the actual war period, but this soldier, apparently, from just a reading of the letter of the Secretary of the Navy, was doing service during the entire period of hostilities.

Mr. EATON of Colorado. Mr. Speaker, I will withdraw my objection.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers Felix Maupin, who was a machinist's mate, first class, United States Navy, shall hereafter be held and considered to have been honorably discharged from the naval service of the United States as a machinist's mate, first class, on the 23d day of August, 1922: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

With the following committee amendment:

Line 7, strike out the word "honorably" and, after the word "discharged," insert "under honorable conditions."

The committee amendment was agreed to.

The bill, as amended, was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

RUTH M'CARN

The Clerk called the next bill, H. R. 7548, granting six months' pay to Ruth McCarn.

The SPEAKER pro tempore. Is there objection?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sum as may be necessary to pay to Ruth McCarn, dependent mother of the late John Bush Watson, seaman, United States Navy, an amount equal to six months' pay at the rate said John Bush Watson was receiving at the date of his death.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

GEORGE OCCHIONERO

The Clerk called the next bill, H. R. 9231, for the relief of George Occhionero.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. I object.

Mr. KNUTSON. Mr. Speaker, will the gentleman withhold his objection?

Mr. STAFFORD. Yes.

Mr. KNUTSON. Would the gentleman from Pennsylvania like to give us an explanation of this bill?

Mr. COYLE. Yes. I investigated this case very fully and very carefully. If the gentleman from Wisconsin will note——

Mr. STAFFORD. Mr. Speaker, I reserve the objection.

Mr. COYLE. I was under the impression the gentleman had reserved his objection.

Mr. STAFFORD. No. I objected, and then when the gentleman from Minnesota and the gentleman from Pennsylvania appeared on the scene I reserved it.

Mr. COYLE. If the gentleman will note, the department makes a supplemental report in this case.

Mr. STAFFORD. I have not the supplemental report.

Mr. BLACK. Mr. Speaker, I demand the regular order.

Mr. KNUTSON. I hope we will not be taken off our feet like that.

Mr. STAFFORD. If the regular order is demanded, I object, but I believe, knowing——

Mr. BLACK. Mr. Speaker, the reason I demanded the regular order was in order to expedite this calendar. I withdraw it. Members ought to be able to make up their minds whether they object or not.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, the gentleman from New York, I think facetiously, certainly unwittingly, demanded the regular order.

Mr. BLACK. I demanded the regular order in the interest of expediting business on the calendar. I think these conscientious objectors ought to make up their minds whether they are objecting, reserving objection, or intentionally making a speech.

Mr. BLANTON. The gentleman from New York will get more business transacted if he will adopt a policy of patience. Impatience will clog up the machinery.

Mr. COYLE. Mr. Speaker, in this particular case the supplemental report from the Navy Department withdraws its objection filed with its original report on this bill. They withdraw the objection because they state in a supplemental report to the committee that they had in the first place thought that there was a provision in the pension laws as they existed to take care of this worthy case. When they found they were mistaken in that fact and that there was no provision under the law without the enactment of this bill they recommended in favor of its passage.

Mr. PATTERSON. Does the gentleman from Pennsylvania have a copy of the supplemental report?

Mr. COYLE. I have a supplemental report in my hand. I will be very glad to read it to the gentleman, or file it.

Mr. PATTERSON. I suggest the gentleman read it.

Mr. COYLE. In the supplemental report, quoting from a letter from the Navy Department, the following statement is made:

It now appears that the unfavorable recommendation of the Navy Department on the bill (H. R. 9231) for the relief of George Occhionero was based upon an erroneous idea that he was entitled to receive a pension under the provisions of the United States Code, title 38, section 229, above referred to. In view of all the circumstances in this case, I now have the honor to inform you that the Navy Department would favorably recommend the enactment of the bill (H. R. 9231) for the relief of this man or a similar bill subsequently introduced for his relief.

This is signed "C. F. Adams, Secretary of the Navy."

Mr. PATTERSON. What is the date of that letter?

Mr. COYLE. January 20, 1933, and is printed in the supplemental report by unanimous consent.

Mr. STAFFORD. What is intended by the statement of the Secretary of the Navy that they would favor some other bill for his relief?

Mr. COYLE. The committee had in the meantime amended the bill that they reported out, putting him on the retired list as a marine gunner instead of a first lieutenant, and I have no doubt that this is what the Secretary had in mind, or else a subsequent bill in case this particular bill failed of passage.

Mr. STAFFORD. Mr. Speaker, I was much influenced in my conclusion that this bill is objectionable by the statement carried in the original report and found in the letter of the Secretary of the Navy that this claimant would be entitled to $690 a year. The Secretary of the Navy in a supplemental report states this is an error, and I therefore withdraw my objection.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized to appoint George Occhionero, former first lieutenant, United States Marine Corps, in which grade he served honorably during the World War, now a gunnery sergeant in the United States Marine Corps, and to retire him and place him on the retired list of the United States Marine Corps as a first lieutenant with retired pay of that grade, in accordance with the provisions of existing law for the retirement of officers of the Marine Corps, in case a retiring board should find him incapacitated for active service, and that his incapacity is the result of an incident of service.

With the following committee amendment:

Page 1, line 9, strike out the words "first lieutenant" and insert "marine gunner."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOHN E. DAVIDSON

The Clerk called the next bill, H. R. 9326, for the relief of John E. Davidson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the pension laws and of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers and sailors, their widows and dependent relatives, John E. Davidson, seaman, second class, United States Navy, shall hereafter be held and considered to have been discharged under honorable conditions from the naval service of the United States at St. Elizabeths Hospital, Washington, D. C., on the 16th day of July, 1918: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

DAVID SCHWARTZ

The Clerk called the next bill, H. R. 9355, for the relief of David Schwartz.

Mr. EATON of Colorado. Mr. Speaker, I object to the passage of this bill.

Mr. BLOOM. Will the gentleman reserve his objection?

Mr. EATON of Colorado. Mr. Speaker, I reserve the objection if the gentleman wishes to make a statement.

Mr. BLOOM. The report of the Acting Secretary of the Navy speaks for itself. This is the ordinary case that comes in here.

Mr. EATON of Colorado. The report of the Secretary of the Navy is a recommendation against the enactment of this bill.

Mr. BLOOM. No; not this particular bill. The Secretary says this is the usual bill, and ordinarily they have to object to such bills.

Mr. EATON of Colorado. In this case, Mr. Speaker, the veteran applied for and obtained compensation to the extent of several thousand dollars. Upon later examination of the case it was determined that his mental incapacity was not due to his service in the war or connected with the war and the compensation was withdrawn. This applicant asked to have the payment reinstated and continued from that time to the present.

The bill has been amended, however, to prevent any bounty, back pay, or allowance commencing prior to the passage of the act. Nevertheless, it seems that the recommendation of the Secretary of the Navy ought to be followed unless the gentleman has some facts to indicate that the report is erroneous.

Mr. BLOOM. The report speaks for itself, and I have nothing outside of the matter contained in the report.

Mr. EATON of Colorado. My attention has been directed to the facts that these offenses were committed during the war period and therefore I withdraw my objection.

There being no objection, the Clerk read the bill as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers David Schwartz, who served in the United States Navy, shall hereafter be held and considered to have been honorably discharged from the naval service of the United States as a member of that organization on or about the 30th day of October, 1917: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

With the following committee amendment:

Line 6, strike out the word "honorably," and after the word "discharged," in line 7, insert "under honorable conditions."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HENRY STANLEY WOOD

The Clerk called the next bill, H. R. 1264, for the relief of Henry Stanley Wood.

Mr. BLANTON. Mr. Speaker, this bill would pay $7,690.67 out of the Treasury and the Treasury Department has always opposed bills of this character. There are thousands of similar claims barred by the statute of limitations and we ought not to pay out this $7,690.67, and I therefore object.

PETE JELOVAC

The Clerk called the next bill, H. R. 1767, for the relief of Pete Jelovac.

Mr. STAFFORD. Mr. Speaker, I object.

Mr. PITTENGER. Will the gentleman withhold his objection for a moment?

Mr. STAFFORD. I may say that this Congress has virtually established the policy of not recognizing payment of claims for injuries occurring as far back as 1906. I do not question that, perhaps, this individual was injured, but there are many similar bills for the relief of persons employed by the Government for injuries occurring way back, and objection has been raised to their consideration.

Mr. PITTENGER. If the gentleman will permit, is it not a fact that Congress has gone back quite a ways in respect of claims of this character?

Mr. STAFFORD. Not at this term of Congress.

Mr. KNUTSON. Will the gentleman yield for a question?

Mr. PITTENGER. I yield.

Mr. KNUTSON. Is it true that this man is absolutely blind?

Mr. PITTENGER. Yes, Mr. Speaker; this is a very pathetic case. This is a very old man, I think around 70, who has an aged wife and he maintains himself and wife by selling shoe strings on the street.

Mr. BLANTON. And he is completely blind?

Mr. PITTENGER. There is no doubt about that. The facts are in the report here, and our late colleague the gentleman from Oregon, Mr. Butler, gave careful consideration to this case.

I do not want to start any bad precedents, but here is a case where the files will show, as I know from having gone over them, that this was a case of negligence on the part of other employees. When the matter was called to my attention I felt it was a meritorious case.

I am under the impression that the date does not bar a claim if Congress feels it is meritorious, and certainly no one would say that the Government was doing all it ought to do if through the negligence of the Government agent the man was rendered totally blind and received only $1,460.

Mr. BLANTON. This was in the Sixty-third Congress. Did that act provide that it would be in full settlement of all claims?

Mr. PITTENGER. I think probably it did.

Mr. BLANTON. Nowadays we put it in the bill that it shall be in full settlement of all claims against the United States Government. Has the gentleman looked the matter up?

Mr. PITTENGER. No; I have not.

Mr. BLANTON. Then, Mr. Speaker, until the gentleman makes an examination of that, I ask unanimous consent that the bill be passed over without prejudice, because in the Sixty-third Congress he received $1,460, and if it provided that it was in full settlement of all claims against the Government, we ought not to set a precedent by going behind it.

Mr. KVALE. Is it not true that Congress is not a continuing body, and that we consider all these things de novo?

Mr. PITTENGER. That is true.

Mr. BLANTON. While that is true theoretically, each Congress does what it wants to do. I assure my friend that he will find very few instances in the history of the Government where one Congress has gone behind and undone what another Congress has done with reference to paying claims, where the claimant was given a sum of money "in full settlement of all claims against the Government."

Mr. KVALE. I think the gentleman is correct in that.

Mr. PITTENGER. I want to say that subsequent Congresses have provided that that law was not a humane law. They have created a compensation commission that have given payments in excess of this pitiful amount. I feel that this man ought to have an adequate compensation. He was an employee of the Government.

Mr. BLANTON. I agree with the gentleman; if it were not a final and conclusive settlement, $1,460 is an inadequate payment for a man losing his eyesight, but I want time to look into the matter. I ask that this go over without prejudice.

Mr. BLACK. I think the gentleman from Texas is too broadminded to object to this. What difference does it make whether the money was received in full payment if this man received $1,460, and it was not an adequate compensation for a man blinded for life?

Mr. BLANTON. We will have another private bill day, and let this bill retain its place on the calendar and go over without prejudice.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent that the bill go over without prejudice. Is there objection?

There was no objection.

PRIMO TIBURZIO

The next business on the Private Calendar was the bill (H. R. 2917) for the relief of Primo Tiburzio.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. I suggest the advisability of having the customary attorney's clause appended to the bill.

Mr. BLANTON. Mr. Speaker, with the understanding that the action of the committee reducing this bill from $5,000 to $2,500 will be adhered to and that it will be protected from any increase in the other body, I shall not object. There will be no such attempt?

Mr. LAMNECK. No.

Mr. BLANTON. And the $2,500 will be accepted?

Mr. LAMNECK. Yes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Primo Tiburzio, of Columbus, Ohio, the sum of $5,000, in full settlement against the Government, as compensation for the death of his daughter, Mary Tiburzio, who was killed when struck by a United States mail truck on September 18, 1930.

With the following committee amendment:

Line 6, strike out "$5,000" and insert "$2,500."

Mr. STAFFORD. Mr. Speaker, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: At the end of the bill insert the following: "*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendments were agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider laid on the table.

R. S. HOWARD CO. (INC.)

The next business on the Private Calendar was the bill (H. R. 3321) for the relief of R. S. Howard Co. (Inc.).

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. Mr. Speaker, this bill would pay out of the Treasury $32,827.51. I object. I have an adverse report against the bill. It is too large a sum to pass here under unanimous consent.

Mr. KNUTSON. Mr. Speaker, will the gentleman withhold his objection?

Mr. BLANTON. I shall, but I am going to object.

Mr. KNUTSON. Mr. Speaker, this claim was submitted to the Court of Claims and the court found there was a legal liability of $20,827. I happen to have been a member of the subcommittee that considered this claim, and as I recall we held hearings several forenoons upon it. We had members of the department before us and others.

As the result of the action taken by the Government in forcing this company to vacate its quarters over at the Bush Terminal Building in Brooklyn, the company was thrown out of its stride and is to-day virtually bankrupt as a result of the Government's action in compelling them to vacate those quarters. It seems to me that a company situated such as this one is should have its day in court. The Court of Claims has found that there is a legal liability of $20,000, and because some clerk in the department writes an adverse letter is no sign that there is no merit to the claim.

Mr. BLANTON. If the Court of Claims found only $20,000 to be due, why is the gentleman asking by this bill that the Government pay $32,827.51?

Mr. KNUTSON. The Court of Claims also found that there was an equitable of $61,000 and odd.

Mr. BLANTON. Mr. Speaker, this is too important a matter to be passed by unanimous consent, and I object.

DAVID A. WRIGHT

The next business on the Private Calendar was the bill (H. R. 6424) granting jurisdiction to the Court of Claims to hear the case of David A. Wright.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. I object.

Mr. CHINDBLOM. Mr. Speaker, will the gentleman from Wisconsin permit a statement to be made?

Mr. STAFFORD. Certainly.

Mr. CHINDBLOM. Mr. Speaker, this is a case which was once heard in the Court of Claims under the so-called Dent Act. The Court of Claims, in its opinion, of which I have a complete copy, sets forth very clearly the reasons for its refusal to grant relief. We all remember that under the Dent Act an informal contract could be made the basis for a suit in the Court of Claims, provided the informal contract had been made with officers who were authorized to act on behalf of the department. In this particular case, at the time Mr. Wright, the claimant, began his negotiations and made his arrangements with the War Department, the Ordnance Department was operating under what was known as the commodity system, there being one section handling a particular commodity contracted for, produced,

inspected, and received by the department. Immediately after he had concluded his negotiations with the department, the department changed its plan of action and transferred its operations from the so-called commodity system to the functional system, under which a single division of the Ordnance Department contracted for and procured all articles, another division produced all articles, and another division inspected and received all articles. The Court of Claims in its opinion said, and it will be found on page 3 of the report:

The kaleidoscopic changes and reorganization of the Ordnance Bureau going on at the time plaintiff conducted his transactions precludes a recovery in this case.

Immediately after Mr. Wright had finished his negotiations the department returned to the commodity system. From that time on they were operating under that system. It is simply because for a very brief time the department changed its method of operation that this officer was unable to conduct his arrangements with the proper officers of the department. The Court of Claims said in its opinion:

The plaintiff, it is true, was never advised by any one of this fact, and in this connection it is proper here to observe that within a very short time after his transaction with the department the functional organization was abandoned and the former commodity plan readopted.

Mr. STAFFORD. Will the gentleman yield?

Mr. CHINDBLOM. Certainly.

Mr. STAFFORD. It appears that this claimant was negotiating with the officers of the Ordnance Department to secure a contract for the manufacture of a certain character of ordnance. The claimants not being in position to go ahead to manufacture that character of ordnance, the Ordnance Department awarded the contract to another contractor. Then later those same officers entered into a verbal arrangement with this man to give him a contract for some other character of ordnance and the war closed. Here is the War Department adversely reporting on this bill for the last several years.

I can not bring myself to the opinion that this man should have relief in the Court of Claims, based upon a statement virtually foreclosing the Court of Claims to find other than in favor of the claimant. True, he went ahead and perhaps secured machinery for getting the contract. Any number of manufacturers did that and did not get any relief.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. CHINDBLOM. This claimant, Mr. David A. Wright, was a tool manufacturer in Chicago. He attended a general conference at Atlantic City which had been called by the Secretary of War for the purpose of getting manufacturers in the United States to assist in the production of ordnance material. They were urged by Colonel Tripp, who was present there, representing the War Department, to set their establishments in order so as to produce war material. Mr. Wright came directly to Washington from Atlantic City. He conferred with Colonel Tripp, and Colonel Tripp turned him over to Maj. Charles D. Wescott and Mr. Howard Abbott.

Mr. Wright told them his plant was not large enough to make the machinery which they wanted, namely, sixteen 88-inch heavy-duty lathes at $75,000 each, which were to be used in the relining of guns in France. He told them, however, that the Allis-Chalmers Co. had a plant in Chicago which he could purchase and which he could make available and suitable for that purpose. They told him to go back and get that plant and they would stand by him and they would give him the contract. He purchased the plant for $155,000. He proceeded to arrange to produce these sixteen 88-inch heavy-duty lathes. Meantime the War Department found another manufacturer who was able immediately to produce those particular lathes, so they notified Mr. Wright that instead of the contract which they had offered him for those lathes, they would give him another contract for forty-three 42-inch lathes at $17,671.56 each. Mr. Wright went ahead and prepared for the manufacture of those lathes. He had already bought the plant for $155,000. He had procured material and he was installing the machinery when the armistice came.

I will say that Mr. Wright was a highly respected and reputed citizen and business man in my district. To-day he is living on a few acres of land in southern Missouri in the Ozarks. I have no doubt he enjoys the climate and the surroundings, but he has lost everything he had by reason of this arrangement. He is a patriotic citizen. He is not complaining, but he is asking for his day in court.

The only reason the Court of Claims did not act upon his suit when he brought it last time was that they said they could not bring it within the Dent Act, which required that he should have had his negotiations with officers who were specifically authorized to act for the department in this particular enterprise. I have shown how it was that the officers with whom he started negotiations, while the department was operating under the commodity plan, were authorized to negotiate with him, and before the thing was concluded the department changed its plan and went over to the so-called functional system, and without notice to him. In the meantime he had spent his money. He had bought the plant. He was ready to proceed with the manufacturing, and he lost practically all he had. I submit to the gentleman from Wisconsin that you can not get a clearer case for an exception from the general act.

Mr. STAFFORD. To my certain knowledge I know of some manufacturers who equipped their plants in expectation of securing war orders. When the war closed the orders were cancelled and they did not have any claim against the Government under the Dent Act or any other act.

I object, Mr. Speaker.

JAMES WALLACE

The Clerk called the next bill, H. R. 3627, for the relief of James Wallace.

There being no objection, the Clerk read as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers James Wallace, who was a member of Troop K, Sixth United States Cavalry, and who was honorably discharged therefrom on January 17, 1902, and reenlisted April 8, 1902, in said organization, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of that organization on June 22, 1902: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

With the following committee amendments:

Page 1, line 8, strike out "said organization" and insert "Troop K, Fourth United States Cavalry."

Page 2, line 1, after the figures "1902," insert "and notwithstanding any provisions to the contrary in the act relating to pensions approved April 26, 1898, as amended by the act approved May 11, 1908."

The committee amendments were agreed to.

The bill, as amended, was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FREDERICK S. ROLLO

The Clerk called the next bill, H. R. 7326, for the relief of Frederick S. Rollo.

Mr. BLANTON. Mr. Speaker, this bill as introduced was for $10,000. The committee has reduced it to $1,500. May we have an understanding with the chairman of the committee, who will be a conferee, that he will not in the closing hours of Congress permit this to be raised above the $1,500?

Mr. BLACK. I will promise the gentleman that all the pressure of the United States Senate will not permit this bill to be raised one cent.

Mr. BLANTON. Mr. Speaker, I want to raise one other question: Why is it there is no report from the department on this bill incorporated in the committee's report? The committee usually prints the department report on such bills.

Mr. BLACK. The chairman of the committee, who drew this report, probably did it hurriedly, and all that, but he was satisfied with the situation.

Mr. BLANTON. Is there an adverse report?

Mr. BLACK. I find this true, Mr. Speaker, that if I draw a 1-page report I get one objection. If I draw a 2-page report, I get two objections. I am trying to condense these reports. We can not get any place anyway, and what is the use of writing a novel on these things?

Mr. BLANTON. I have not yet objected to any bill unless there was against it some adverse report.

Mr. BLACK. I am not criticizing the gentleman.

Mr. BLANTON. Is there any adverse report against this bill?

Mr. BLACK. I have here a letter in which it is stated while the department very much regrets the injury to Mr. Rollo, you are informed no appropriation has been furnished the department for the disposition of claims of this character in cases where injuries are sustained by those working on public buildings or the site thereof. The only relief afforded is by act of Congress. This department, however, does not take the initiative in obtaining such legislation.

Mr. BLANTON. With the understanding that the amount will not be raised beyond $1,500, I shall not object.

Mr. BACHMANN. Mr. Speaker, reserving the right to object, I notice there is no affidavit filed by anybody as to the injuries this man sustained, or what expense he was put to.

Mr. BLANTON. That is in the report.

Mr. BACHMANN. You can take the committee report ordinarily and tell what expense a man was put to or what injury he sustained, but there is no statement from the doctor or anything to show. I am going to object to every one of these bills where there is no report or letter from the department and where there is no affidavit or statement by some witness or the doctor, giving us some idea of the extent of the injuries.

In this instance this bill was introduced for $10,000, and they have cut it down to $1,500. If the injuries necessitated this man being paid $10,000, and the amount has now been cut to $1,500, certainly inquiry is proper as to the extent of the injuries.

Mr. PITTENGER. Mr. Speaker, will the gentleman withhold his objection?

Mr. BACHMANN. I will withhold it to permit the gentleman to make a statement.

Mr. PITTENGER. I may say to the gentleman, as a member of the Committee on Claims, all bills before it have been fully considered. The committee always considers the question of the extent of the injuries. That is based on affidavits and doctors' statements.

If we undertook to incorporate in our reports these affidavits and statements we would have an enormous bill for printing. We cut these things down, and we cut them down where they belong. That was done in this case. Your committee does not go haphazard into these matters. Your committee sits around that table and fights over these matters. The gentleman from Wisconsin [Mr. SCHAFER], is a member of the Committee on Claims and holds the championship record for checking into the reasons and I suspect he is responsible for the amount being cut to $1,500 in this case.

I want the RECORD to show that the committee gives careful attention to all these matters.

Mr. BACHMANN. I may say in answer to the gentleman that I have been on this Private Calendar for some time, not only at this session of Congress. Very rarely does the committee make a report without incorporating a letter from one of the departments.

Mr. BLACK. If that is so—and it is so—why all the high excitement because there does not happen to be a report with this bill? The Committee on Claims is getting highly incensed at the attitude taken by these highly conscionable objectors. I do not see why there should be all this excitement because there happened to be an oversight. Notwithstanding the fact that there was $8,500 cut off this bill the gentleman from West Virginia thinks he is doing his high duty to Congress and the rest of the world by calling attention to the fact that for once the committee forgot to put the affidavit or letter in the report.

Mr. BACHMANN. The committee forgot in the next bill, too, Calendar No. 554. They have no report in that case.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. BLACK. I yield.

Mr. BLANTON. The gentleman from New York need not get so excited.

Mr. BLACK. I am not excited.

Mr. BLANTON. The people of the United States within the last three months, through a talking movie, have been given to understand that on certain nights here the House meets and the Speaker takes up a big lot of bills, some carrying $100,000,000, and without any consideration whatever by the House, the Speaker will say "This bill will be considered as read, engrossed, passed, and a motion to reconsider laid on the table."

That is not so. There are men in this Congress who watch these bills, and who object when they are unmeritorious, and the American public is given the wrong impression; lots of bills are passed that ought not to be passed, but the unmeritorious bills carrying large amounts are stopped.

The gentleman from New York is impatient whenever any Member gets up here and raises an objection; and he calls the gentleman from West Virginia [Mr. BACHMANN] and the rest of us conscientious objectors; but it is a mighty good thing that the people of the United States have a few of them here in this Congress.

Mr. BLACK. Mr. Speaker, the chairman of the Committee on Claims is highly satisfied with his work, and he is not excited at all. The chairman of this committee is doing his best to save some money for the Treasury. The chairman of the committee was really a conscientious objector then in high and exalted standing and I wish the other objectors had gone along with him.

Mr. MOUSER. Mr. Speaker, reserving the right to object, along the line of what has just been stated by the gentleman from West Virginia and the gentleman from Texas, I may say that in going over the bill pertaining to claims for damages against the Government I found five bills without any Government report. I want to serve notice on the chairman of the Claims Committee that I am going to ask unanimous consent that all of these bills go over until this House gets information upon which it can act and I shall object to consideration of the bills if such unanimous consent is not given.

Mr. BLACK. That is not going to break the heart of the chairman of the Claims Committee. The gentleman should take that up with the Members who introduced the bills.

Mr. BACHMANN. Mr. Speaker, I want to say to the chairman of the Claims Committee that nobody wants to come in here and object to these bills as they come before the House, but the men who are objecting to the bills on this calendar are selected for that purpose. There are a great many tort actions that come before the gentleman's Committee and lots of times claims reach the House that have no reason to be passed.

Mr. BLANTON. And some that have already been passed.

Mr. BACHMANN. Yes.

Mr. BLACK. They are the only ones that get by the objectors.

Mr. SCHAFER. Mr. Speaker, I think we might as well adjourn to-night and let the members of the Claims Committee resign. After a subcommittee has spent 8 or 9 hours or even as much as 24 hours considering one of these bills and after the entire Committee on Claims fights over one of these bills, if they are not to be considered by the House, they might as well resign and let the conscientious objectors form a new Claims Committee and transact the business.

Mr. BACHMANN. Mr. Speaker, I object.

DAVID A. WRIGHT

Mr. STAFFORD. Mr. Speaker, a moment ago I objected to a bill (Private Calendar No. 551). I ask unanimous consent that we return to that bill (H. R. 6424).

Mr. BLANTON. Mr. Speaker, it is too early to begin returning to bills now. We have too many bills on the calendar that we have not reached. I object.

JOHN J. MORAN

The clerk called the next bill (H. R. 8136) for the relief of John J. Moran.

Mr. BACHMANN. Mr. Speaker, reserving the right to object, since we have been discussing the work of the Claims Committee, I know there are a good many bills before that committee and I do not want to criticize them, but here is a bill that has passed the Claims Committee and is on the floor of this House providing for the payment of $296.42 because some postmaster made a mistake in promoting a clerk which he was not authorized to do. You have passed that bill out making the Government of the United States pay the claimant 4 per cent interest since 1918.

Mr. BLACK. He ought to get 6 per cent. We were too reasonable about it. Sometimes the cost of printing the reports would cost more than the amount of the claim.

Mr. BACHMANN. There should certainly be a letter from the Post Office Department explaining what this is all about and saying whether it is proper or not.

Mr. BLACK. In some cases it would cost more to print all that information than to pay the claim.

Mr. STAFFORD. Mr. Speaker, will the gentleman from West Virginia withhold his objection?

Mr. BACHMANN. I withhold it.

Mr. STAFFORD. Would the author of the bill be willing to have this bill passed without the charge of interest included?

Mr. LONERGAN. Yes.

Mr. BACHMANN. There is another amendment that ought to be adopted. This claim was not denied by the Post Office Department, although the bill states that it was. It was denied by the General Accounting Office, and the bill certainly ought to be corrected in that respect.

Mr. STAFFORD. We can correct that by an amendment.

Mr. BACHMANN. This is another one of those cases where there is no report from the Post Office Department as to whether or not this claim is correct, and, in addition to that, this matter has been pending since 1918.

Mr. Speaker, I object.

Mr. LONERGAN. Will the gentleman withhold his objection a moment?

Mr. BACHMANN. I will be glad to withhold it.

Mr. LONERGAN. Mr. Speaker, during the war, one of the young men in the Post Office Department, as I remember it, left, and the postmaster had to act promptly. He transferred a carrier to the position of clerk and took a substitute carrier and named him carrier, and, awaiting authority from the Post Office Department, the postmaster paid both of these men out of his own funds. This was in a munitions manufacturing community in part, and the postmaster exercised business judgment in filling the vacancy. I think the case is one of merit and the bill ought to be passed.

Mr. BACHMANN. The Government got the service, did it not?

Mr. LONERGAN. Yes; and the postmaster paid for the service.

Mr. BACHMANN. And it was in 1918, was it not?

Mr. LONERGAN. That is true.

Mr. BACHMANN. Has the gentleman taken it up with the Post Office Department?

Mr. LONERGAN. I have not, but the claimant has, so he reports to me.

Mr. BACHMANN. Does the gentleman have a report from the Post Office Department that is not adverse to the payment of this claim?

Mr. LONERGAN. The Post Office Department said that the way to get the money was to apply to the Congress.

Mr. BACHMANN. May I ask the chairman whether he has in his files a letter from the Post Office Department about this claim?

Mr. BLACK. We have already wasted about $250 worth of time on this matter.

Mr. BACHMANN. Does the gentleman have a letter from the Post Office Department about this?

Mr. PATTERSON. I think the gentleman from New York must have that document somewhere. I think this is a meritorious claim. We can pass over this, and when the gentleman finds his document we can go back to it.

Mr. BLACK. It seems to me that the Claims Committee ought to have some standing here. We have already spent $500 worth of time.

Mr. BACHMANN. Does the gentleman say that there was no adverse report from the Post Office Department?

Mr. BLACK. I have the document here now. It says that in view of the fact that the services were performed by Mr. Keating and Mr. Welch, and each of them was paid the sum claimed by the postmaster, favorable action on the bill is recommended.

Mr. BACHMANN. Mr. Speaker, I withdraw the reservation of objection.

Mr. MOUSER. Mr. Speaker, I want to say that if the chairman had put that report of the department in we would not have required the time that we have wasted on this bill. Of course, a report could not be made on all items, but the committee could have put this document in its report.

Mr. ALLGOOD. I want to state to the gentleman that No. 550 on the Private Calendar had a favorable report, but it was objected to.

Mr. MOUSER. That was up to the individual.

Mr. ALLGOOD. The individual said there was a report against it. That is not true.

Mr. MOUSER. Well, I did not object to it; why ask me about it?

[Cries of "Regular order!"]

The SPEAKER pro tempore. Objection is withdrawn; the Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, and paid to John J. Moran the sum of $296.42, being the amount paid by Mr. Moran as postmaster at Southington, Conn., to Raymond F. Keating and Keron R. Welch, employees at the post office, for the period August 16 to September 30, 1918, which amount was not allowed by the Post Office Department, plus interest at the rate of 4 per cent.

Mr. STAFFORD. Mr. Speaker, I move to strike out all after the figures "1918."

The Clerk read as follows:

Beginning with the comma, after the figures "1918," on line 9, strike out the remainder of the bill.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

M. J. HARBINSON

The next business on the Private Calendar was the bill (H. R. 9008) providing compensation to M. J. Harbinson for injuries sustained while in the Government service at and on the Belknap Reservation, Mont., engaged as a moundsman.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. Mr. Speaker, this bill has been reduced from $4,500 to $1,080. May I have the assurance of the gentleman from New York that another body will not raise it from that sum?

Mr. BLACK. I think the chairman of the committee ought to give bond for everything he does and be provided with counsel. [Laughter.]

Mr. BLANTON. Reserving the right to object, Mr. Speaker, the men who sit on this floor night after night and try to protect the Treasury of the United States do not get a single cent more than other Members. If the gentleman from New York is going to take that stand, if he can not assure us that when the bill is sent to another body they will not raise it, I shall object to it, but if he will assure us that he will protect it for this reduced sum, I will not object. If we do not have such a reasonable assurance

I will object to every one of these bills that are proposed to be reduced to proper allowances.

Mr. KVALE. The gentleman has that assurance.

Mr. EATON of Colorado. Mr. Speaker, I object.

Mr. KVALE. Will not the gentleman tell us upon what ground he objects? If the gentleman has read the report and is not satisfied, I think I can satisfy the gentleman. My colleague is unavoidably absent this evening, but I am convinced of the merits of this bill.

Mr. EATON of Colorado. I have read the report over carefully. There is nothing in the report to show that the man when he was injured was in the employ of the United States, there is not a word to show that he was performing any duty for or on behalf of the United States.

Mr. KVALE. There is an affidavit in the report.

Mr. BLACK. It says here in the report that he was in the employ of the United States.

Mr. EATON of Colorado. The Department of the Interior has a long report and it does not so state.

Mr. BLACK. It says so in the first paragraph.

Mr. EATON of Colorado. This class of bills is generally handled under the Compensation Commission class of bills.

Mr. KVALE. The Compensation Commission has also a report.

Mr. EATON of Colorado. In all of the bills for injuries arising prior to 1916 no relief has been granted in this Congress. Many claims just as meritorious as this have been denied. With the exception of one bill, one of the first passed, none for injuries that arose prior to September 7, 1916, have been allowed. I therefore object.

Mr. KVALE. I wish the gentleman would reconsider his decision, for the reason, carried in the report of the Department of the Interior, also in the report of the United States Compensation Commission, which is carried in the report of the committee, also in the affidavit of the claimant and in the statement of the doctor who attended him, and then again in the statement of the gentleman who was a companion of his at the time of the accident, clearly he was in the Government employ, contradicting the statement of the gentleman at the outset of his remarks. Clearly he was injured while on Government service. Let me read the statement from the gentleman concerned. The bill has been cut from $4,500 to $1,080. I can not see why we can not do justice to this injured man. He says:

Despite the fact, I think the bill as introduced was fair without any cut, as they allowed nothing for doctor or hotel or board during the two years I was laid up.

Mr. KNUTSON. How much did the committee cut the bill?

Mr. KVALE. Practically 80 per cent.

Mr. PITTENGER. That covers the disability during the period of two years.

Mr. EATON of Colorado. In the statement of facts to which my attention was directed it merely states that this man was at one time for a certain period employed by the Government, but that at the time of the accident he took a team and wagon, which was in bad shape, and went away and never returned to his employment. There is nothing to show that he was doing any work for the Government or was performing any duty on behalf of the Government at the time of the accident.

Mr. KVALE. The affidavits contained in the report show clearly the opposite.

Mr. EATON of Colorado. I am reading from the report. Under the circumstances we may pass the bill without prejudice and let it stay on the calendar, and I shall withdraw my objection.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Mr. Speaker, I object.

EMILY ADDISON

The next business on the Private Calendar was the bill (H. R. 9336) for the relief of Emily Addison.

Mr. MOUSER. Mr. Speaker, I ask unanimous consent that this bill go over without prejudice, pending a report from the department.

Mr. BLACK. I have a report here. It is a long report.

Mr. MOUSER. Is it favorable?

Mr. BLACK. It is. I read from the report:

It would appear from the record that as a matter of equity and justice the beneficiary under H. R. 9336 is entitled to some relief, and the War Department recommends it be granted in such amount as Congress may determine to be proper under the circumstances.

Mr. MOUSER. Mr. Speaker, reserving my objection further, there were three people injured and three killed in this case. Here we are asked to pass on a bill, and I call attention of the chairman respectfully to the fact that it will immediately involve the Government in five further claims. Yet we are asked to consider it without any department report. It seems to me that the chairman of this committee, with all due respect, can save the time of this House and expedite the business under this Private Calendar if his committee will attach the governmental report as being favorable or unfavorable.

Mr. PALMISANO. I wish to say that the Seventy-first Congress paid compensation to the parent of the three children who were killed in this accident.

Mr. MOUSER. And the gentleman will understand that there will be further claims. I withdraw the reservation in view of the favorable report.

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I think this amount is rather high for a person now enjoying fair health, and to pay $2,000 to one injured in a minor way is more than liberal.

If the gentleman is willing to cut that down to a modest sum I will withdraw my objection.

Mr. PALMISANO. Mr. Speaker, I will offer an amendment at the proper time. I suggest it be made $1,500, so that there will be no objection.

The SPEAKER per tempore. Is there objection?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That there is hereby appropriated, and the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the United States Treasury not otherwise appropriated, the sum of $2,000 to Emily Addison in full for all claims she may have against the Government on account of injuries received by her on the 14th day of August, 1919, by being struck by a falling airplane, then and there owned and operated by the Government of the United States.

Mr. PALMISANO. Mr. Speaker, I offer an amendment which I have sent to the desk.

The Clerk read as follows:

Amendment by Mr. PALMISANO: In line 6, strike out "$2,000" and insert in lieu thereof "$1,500."

The amendment was agreed to.

Mr. PATTERSON. Mr. Speaker, I offer the usual attorney's-fee amendment.

The Clerk read as follows:

Amendment by Mr. PATTERSON: In line 11, after the words "United States," strike out the period, insert a colon and the following: "*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

SPERRY GYROSCOPE CO. (INC.), OF NEW YORK

The Clerk called the next bill, H. R. 9457, for the relief of Sperry Gyroscope Co. (Inc.), of New York.

Mr. MOUSER. Mr. Speaker, I object to this bill.

Mr. CELLER. Will the gentleman reserve his objection?

Mr. MOUSER. I will reserve the objection, but I may save time by saying that I intend to object to this bill unless the departmental report is furnished.

Mr. CELLER. I have a copy of it right here. May I read the letter to the gentleman?

Mr. MOUSER. Secondly, I will object unless the amount is reduced in proportion to the recommendation of the department, whatever that may be. Upon private investigation, I find that the department has disallowed part of this claim and recommended the other part.

Mr. CELLER. That is not accurate. If the gentleman will allow me to read the letter from the Secretary of the Navy, I think he will have his mind cleared on the subject. Incidentally, this was a claim presented by the Sperry Gyroscope Co. (Inc.), of New York, for $2,833.70 refused them by the Comptroller General's office on a strict legal interpretation of a contract, claiming that the Sperry Gyroscope Co. delayed delivery of the goods a certain number of days and therefore there could be invoked against them a penalty clause of 10 per cent of the amount of the contract. Ninety per cent of the total amount of the contract has been paid. The Comptroller General says the 10 per cent should not be paid. The Secretary of the Navy in his letter says as follows:

DEPARTMENT OF THE NAVY,
OFFICE OF THE SECRETARY,
Washington, March 2, 1932.

The Hon. EMANUEL CELLER,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN CELLER: Receipt is acknowledged of your letter dated February 18, 1932, addressed to Rear Admiral Joseph J. Cheatham (Supply Corps), United States Navy, Chief of the Bureau of Supplies and Accounts, wherein you state you have introduced bill H. R. 9457, for the relief of the Sperry Gyroscope Co. (Inc.), in which letter you request opinion as to the merits of said bill.

The sum of $2,833.77, provided by said bill, represents $1,480.30 disallowed by the Comptroller General of the United States in settlement A-39464, dated November 20, 1931, as liquidated damages due to delay in delivery under contract No. NOs-12737 and $1,353.47 disallowed by the Comptroller General in settlement A-40399, dated January 29, 1932, as liquidated damages due to delay in delivery under contract No. NOs-11163.

The material covered by the above-mentioned contracts was navigational apparatus and was largely experimental. Considerable delay was experienced by the contractor due to development work, to change in design, and making improvements found to be necessary to meet the exacting needs of the naval service.

The improvements made were instrumental in furnishing the Navy with apparatus of greater precision and accuracy, and the delays caused no additional expense to the Government. Much of the material furnished under said contracts has little application outside the naval service as the accuracy requirements exceed those called for in the commercial field.

Failure to remit liquidated damages where delays are incurred for the reasons hereinbefore set forth, and when the Government suffered no damage by the delays, is apt to discourage manufacturers from undertaking development work or improvement of standard instruments, which would militate against the best interests of the Navy.

The Navy Department recommends that bill H. R. 9457 be enacted.

Sincerely yours,

CHARLES F. ADAMS,
Secretary of the Navy.

Mr. MOUSER. That letter is addressed to yourself?

Mr. CELLER. It is a part of the record. This is a copy. The original is in the record.

Mr. MOUSER. But it is not in the report.

Mr. BLACK. We had a hearing on this bill, and the letter was submitted to the committee.

Mr. CELLER. The gentleman does not doubt my word, does he?

Mr. MOUSER. I do not refer to the gentleman. I want to know if the chairman of the committee had gotten that report?

Mr. BLACK. This is the report. We had a hearing on this bill, and that letter was submitted to the committee.

Mr. MOUSER. Why do we not have that before us? The only information I had was that the Comptroller General had disallowed both claims. I am talking about the information I have. The Comptroller General disallowed both claims, as the gentleman has just read from the letter from the Navy Department.

Mr. STAFFORD. Will the gentleman yield?

Mr. MOUSER. I yield.

Mr. STAFFORD. I was desirous of knowing the Secretary of the Navy's report referred to in the report, under date of March 2. The gentleman has just offered it. It would have saved a great deal of time in the consideration of these bills if we had been furnished the information which to me seems satisfactory, because it is a repayment of liquidated damages, whereby the Government has not suffered any loss, and therefore I think this bill should pass.

Mr. MOUSER. The gentleman, of course, realizes that the taxpayers will have to expend that much money, even though it is liquidated damages?

Mr. STAFFORD. Oh, yes; but I have never recognized the repayment of liquidated damages where the Government has suffered any loss. However, in this case, the Government has not suffered any loss by reason of the failure to furnish these supplies on time.

Mr. MOUSER. I will say to the gentleman if he will reduce that amount to $2,000 I will have no objection. There are two conflicting reports.

Mr. CELLER. Where is the conflict?

Mr. MOUSER. The Comptroller General disallowed both claims. Now the Secretary of the Navy comes along in a recent letter, received by the zealous gentleman from New York in behalf of his clients——

Mr. PATTERSON. Will the gentleman yield to me?

Mr. MOUSER. I yield.

Mr. PATTERSON. I have made an investigation of that matter, and I find that the exact amount was disallowed without any interest. It is the same amount that the Navy now recommends. I feel that if it is the exact amount they have approved, without any interest, in all probability it would not be the proper thing to reduce it.

Mr. MOUSER. Well, I do not like this way of doing business, and unless the gentleman will reduce it to $2,000 I will object.

Mr. CELLER. I do not think the gentleman should insist upon that.

Mr. BLACK. I make the suggestion to the gentleman from New York that he might accept the proposition of the gentleman from Ohio and reduce this to $2,000.

Mr. MOUSER. There are two conflicting reports from governmental authorities. It certainly ought to be reduced if there is any doubt about the matter.

Mr. BLACK. The gentleman from New York [Mr. CELLER] is a practical gentleman. Two thousand dollars is better than nothing.

Mr. MOUSER. The gentleman from New York [Mr. CELLER] is an earnest advocate, but he can not change my mind altogether, when the Comptroller General has turned this matter down.

Mr. CELLER. The Comptroller General has to decide it this way. He must take a legalistic view of this proposition, and that is why we have come here for this remedy. Under the contract I would say that the Sperry Gyroscope Co. have inflicted against them the Shylock attitude of somebody demanding the pound of flesh, certainly without justice, and they could not get their remedy.

If you are going to existing organizations of this character for the development of these specific instruments that must be developed with the greatest accuracy, instruments which go into our national defense, which go into airplanes and go into the very lifeblood of the Nation for purposes of defense they must be treated properly or they can not be expected to continue.

Mr. MOUSER. I do not want to be unreasonable, but the gentleman has already conceded in his statement that the contracts are illegal. Therefore there is no legal obligation on the part of the Government.

Mr. CELLER. No; I did not say that.

Mr. MOUSER. It is simply a so-called moral obligation; there can not be legal liquidated damages if it is not a legal obligation. Therefore I think the gentleman should accept the suggestion.

Mr. CELLER. I will accept it.

Mr. MOUSER. Mr. Speaker, I will, at the proper time, offer an amendment in conformity with the suggestion.

Mr. CELLER. I will accept it. That makes it $2,000.

Mr. MOUSER. That is right.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc. That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $2,833.77 to the Sperry Gyroscope Co. (Inc), on remission of liquidated damages under contracts covering self-synchronous gyro compass course recorders and for alidades furnished the Brooklyn Navy Yard.

Mr. MOUSER. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MOUSER: In line 5, strike out "$2,833.77" and insert in lieu thereof "$2,000."

Mr. BLANTON. Mr. Speaker, I offer an amendment to the amendment of the gentleman from Ohio.

The Clerk read as follows:

Amendment offered by Mr. BLANTON to the amendment offered by Mr. MOUSER: After the figures "$2,000" insert the words "in full settlement of all claims against the United States."

The SPEAKER pro tempore. The question is on the amendment of the gentleman from Texas to the amendment of the gentleman from Ohio.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. MOUSER. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MOUSER: Line 9, after the word "Yard," insert: "*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time and passed; and a motion to reconsider laid on the table.

NAVAL AMMUNITION DEPOT, LAKE DENMARK, N. J.

The Clerk called the next bill, H. R. 9581, to provide an additional appropriation as the result of a reinvestigation, pursuant to the act of February 2, 1929 (45 Stat. 2047, pt. 2), for the payment of claims of persons who suffered property damage, death, or personal injury due to the explosions at the Naval Ammunition Depot, Lake Denmark, N. J., July 10, 1926.

Mr. BLANTON. Mr. Speaker, this bill carries $14,409.09, but it comes to us from the committee with a favorable report from the Navy Department and a favorable report from the Comptroller General. With this state of facts, I do not object.

Mr. SCHAFER. Mr. Speaker, reserving the right to object, as a member of the Committee on Claims, I voted against reporting this bill out. The gentleman from Texas [Mr. BLANTON] perhaps overlooked the fact that legislation had been enacted providing for the determination of the amount of damages by the Navy Department and appropriations made for those allowances. Now we come in and find that a certain few of the beneficiaries of that legislation did not desire to accept the amounts originally determined by the Navy Department. Thereupon the Navy Department reopened and reviewed these few claims and recommended an additional amount of $14,409.09. I do not believe that the Treasury should be dipped into for this amount. One of the claimants herein will receive $9,000, a claimant who, according to the committee report, has already received $29,756.99.

In view of these facts, and in view of the fact I voted against the bill in committee, and in view of the fact that the watchdog of the Treasury [Mr. BLANTON] is willing for the Treasury to be raided to this extent, I object.

Mr. BLANTON. The Comptroller General says it is a just claim and ought to be paid.

LAURA ROUSH

The Clerk called the next bill, H. R. 10377, authorizing the payment of compensation to Laura Roush for the death of her husband, William C. Roush.

The SPEAKER pro tempore. Is there objection?

Mr. EATON of Colorado. Mr. Speaker, I object.

GEORGE T. JOHNSON & SONS

The Clerk called the next bill, S. 563, for the relief of George T. Johnson & Sons.

There being no objection, the Clerk read the bill as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to George T. Johnson & Sons, of Cambridge, Md., out of any money in the Treasury not otherwise appropriated, the sum of $180 in full settlement of claim for repairs ordered by the collector of customs at Baltimore, Md., to wharf and boats of H. F. Brannock (Inc.) due to damages done by seized power boats *Hiawatha* and *Whippoorwill* in charge of United States customs officers.

The bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider laid on the table.

ANNA POKORNY

The Clerk called the next bill, S. 3147, for the relief of Anna Pokorny.

Mr. MOUSER. Mr. Speaker, reserving the right to object, I notice frequently we get bills from the Senate which provide for monthly payments over a period of years. My thought is solely that this amount should be paid by the Government in a lump sum. It figures out for a period of 167 months, which is 13 years and 11 months, to a total of $5,010. I think the universal custom in death claims is to allow $5,000.

I therefore urge that an amendment providing for payment in a lump sum be adopted and urged upon the Senate conferees. In its present form it means bookkeeping over years, possible litigation between the heirs and the Government, and a lot of red tape and technicality.

I think the claim is worthy, I will say to the chairman of the Committee on Claims; but I do respectfully urge that he accept the suggestion that the amount be paid in a lump sum.

Mr. BLACK. I have no particular objection to its being paid in a lump sum. If the gentleman wishes such an amendment, I shall be pleased to accept a lump-sum amendment and insist on it in conference.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. MOUSER. I yield.

Mr. STAFFORD. There have been some cases where there has been a very meritorious presentation of grounds for voting a monthly allowance on the theory that the claimant, if voted a lump sum, might dissipate the total amount very quickly.

I do not recall all the facts of this case. I know it is a meritorious claim. It might be provided that she be paid $30 per month during her lifetime only. Of course, then she would be assured of getting this amount every month during her lifetime—or for 167 months—whereas if she received the $5,000 she might squander it and in a few years become an object of charity.

Mr. MOUSER. I may say to the gentleman that we can not set the Government up as a guardian of these people. In that case we would have to go into the personality of the beneficiary. If she is entitled to relief, she should have it, and it should be paid in a lump sum.

Mr. STAFFORD. Then the amount should be made a flat $5,000.

Mr. MOUSER. Yes. That is in conformity with our usual policy.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Anna Pokorny, of New York City, the sum of $30 per month for a period not to exceed 167 months, in full satisfaction of her claim against the United States on

account of the death of her husband, William Pokorny, who was killed by a stray bullet fired by a member of the United States Army in target practice near Sandy Hook, N. J.

Mr. MOUSER. Mr. Speaker, I offer the following amendment:

In line 6, strike out all after the word "of" down to and including the word "months," in line 7, and insert in lieu thereof "$5,000" and the usual attorney's fee provision.

The Clerk read as follows:

Amendment offered by Mr. MOUSER: Page 1, line 6, after the word "of," strike out "$30 per month for a period not to exceed 167 months," and insert "$5,000."

The amendment was agreed to.

The Clerk read as follows:

Amendment offered by Mr. MOUSER: At the end of the bill insert the following:

"*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider laid on the table.

JOHN L. DUNN

The Clerk called the next bill, H. R. 973, for the relief of John L. Dunn.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to John L. Dunn, out of any money in the Treasury not otherwise appropriated, the sum of $2,000 in full settlement against the Government of his claim for injuries received when he was run down by an automobile driven by M. C. Northrup, special agent of the Treasury Department attached to the Customs Service.

Mr. MOUSER. Mr. Speaker, I offer the usual attorney's fee amendment.

The Clerk read as follows:

Amendment offered by Mr. MOUSER: At the end of the bill insert the following: "*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

ANTHONY HOGUE

The Clerk called the next bill, H. R. 3044, for the relief of Anthony Hogue.

There being no objection, the clerk read the bill as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $600 to Anthony Hogue, formerly finance clerk of the Fox Creek Post Office Station, Detroit, Mich. Said sum represents the amount paid by said Anthony Hogue to the United States Government to make up the deficit in the accounts of the Fox Creek Station, which deficit was caused by robbery or burglary of said post office.

Mr. STAFFORD. Mr. Speaker, I offer the following amendment: At the end of the bill insert "on or about July 30, 1927."

Mr. CLANCY. Mr. Speaker, I am pleased to accept the amendment.

The clerk read as follows:

Amendment offered by Mr. STAFFORD: At the end of the bill insert "on or about July 30, 1927."

The amendment was agreed to.

Mr. STAFFORD. Mr. Speaker, I offer the usual attorney's fee amendment.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD. At the end of the bill insert the following:

"*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed; and a motion to reconsider laid on the table.

GUSTAV WELHOELTER

The Clerk called the next bill, H. R. 3045, for the relief of Gustav Welhoelter.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $900 to Gustav Welhoelter, assistant superintendent of the Fox Creek post-office station, Detroit, Mich. Said sum represents the amount paid by said Gustav Welhoelter to the United States Government to make up the deficit in the accounts of the Fox Creek station, which deficit was caused by robbery or burglary of said post office.

Mr. STAFFORD. Mr. Speaker, I offer the following amendment: At the end of the bill insert "on or about July 30, 1927," and the customary attorney's fee amendment.

Mr. CLANCY. Mr. Speaker, I am pleased to indorse the amendment with respect to the date of the robbery.

Mr. KUNZ. Mr. Speaker, do I understand that in all of these cases attorneys' fees are allowed? I do not see why attorneys' fees should be allowed in case of a robbery.

Mr. STAFFORD. Mr. Speaker, for the information of the gentleman from Illinois, I ask that the attorney's fees amendment may be reported in full.

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Page 1, line 11, after the word "office," insert "on or about July 30, 1927," and the customary attorney's fee provision, as follows:

"*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

MESSRS. SHORT, ROSS, SHAW, AND MAYHOOD

The next business on the Private Calendar was the bill (S. 212) for the relief of Messrs. Short, Ross, Shaw, and Mayhood.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $60 to Messrs. Short, Ross, Shaw, and Mayhood, of Calgary, Alberta, Canada, for services performed in connection with the extradition

of one Emmett A. Busby, who had been indicted in the United States District Court for the Southern District of California on a charge of concealment of assets of a bankrupt estate.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

KENNETH CARPENTER

The next business on the Private Calendar was the bill (S. 213) authorizing adjustment of the claim of Kenneth Carpenter.

The Clerk read the title of the bill.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States is hereby authorized and directed to adjust and settle the claim of Kenneth Carpenter for blood furnished August 29, 1930, for transfusion to Clarence C. Watson, a patient in a Government hospital, and to allow in full and final settlement of said claim an amount not in excess of $30. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $30, or so much thereof as may be necessary, for the payment of such claim.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

OREM WHEATLEY, KENNETH BLAINE, AND JOSEPH R. BALL

The next business on the Private Calendar was the bill (S. 219) authorizing adjustment of the claims of Orem Wheatley, Kenneth Blaine, and Joseph R. Ball.

The Clerk read the title of the bill.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, That the Comptroller General of the United States is hereby authorized and directed to adjust and settle the claims of Orem Wheatley for blood furnished April 15, 1931, and Kenneth Blaine for blood furnished April 22, 1931, for transfusions to Edwin Grinnell, a patient in a Government hospital, in amounts not in excess of $30 and $20, respectively; and, also, the claim of Joseph R. Ball for blood furnished June 30, 1931, for transfusion to Harry Blair, also a patient in a Government hospital, in an amount not in excess of $42, and to allow in full and final settlement of said claims amounts not in excess of the amounts herein stated. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $92, or so much thereof as may be necessary for the payment of said claims.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

JOHNSON & HIGGINS

The next business on the Private Calendar was the bill (S. 252) authorizing adjustment of the claim of Johnson & Higgins.

The Clerk read the title of the bill.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized to settle and adjust the claim of Johnson & Higgins in a sum not exceeding $115.12 for a general average adjustment requested by the War Department to be made in August, 1922, and report of which was made in 1927. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $115.12 for payment of the claim.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WILLIAM B. THOMPSON

The next business on the Private Calendar was the bill (S. 284) for the relief of William B. Thompson.

The SPEAKER. Is there objection?

Mr. STAFFORD. Reserving the right to object, I do not like to take the time in pointing out overcharges as the basis of claims; but it seems to me from the itemization on page 3 that this claimant is working the Government to the extent of a few hundred dollars. Why should we pay for cementing the cellar and pay for 91 hours for pumping water?

Mr. PITTENGER. Let me say to the gentleman that I prepared the report, and I did it after carefully going through the report of the Secretary of War and other records submitted. They had their engineer and men on the job to investigate, and they say that the claim is reasonable. I concurred in their conclusions.

Mr. STAFFORD. Why should the Government pay for laying the cement in a person's cellar?

Mr. PITTENGER. Because of the change in the water level due to the digging of the canal, this man's cellar, which was not cemented, and which had been a good dry cellar, suitable to his purpose before, was flooded.

Mr. STAFFORD. Oh, on occasions the water would seep through.

Mr. PITTENGER. Oh, no, no.

Mr. BACHMANN. Mr. Speaker, I believe the gentleman from Minnesota states the correct situation, as I understand the report. There was no water in this man's cellar prior to the time the War Department went in there and started to dredge that canal.

Mr. STAFFORD. I agree.

Mr. BACHMANN. And after that he started to have this trouble.

Mr. STAFFORD. I agree.

Mr. BACHMANN. And he had to cement his cellar to keep the water from coming in.

Mr. STAFFORD. Oh, no. The report says that in order to prevent it he had to install an electric pump, and before that he used a hand pump.

Mr. BACHMANN. But the cost of that pump was only $30.

Mr. STAFFORD. I withdraw the objection, although I think the claimant is working the Government.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to William B. Thompson, out of any money in the Treasury of the United States not otherwise appropriated, the sum of $562.80 by reason of damages to his property caused by the dumping of spoil dredged from the Chesapeake and Delaware Canal in the lowering of the water level of the said canal at the town of Summit Bridge, New Castle County, in the State of Delaware.

Mr. PATTERSON. Mr. Speaker, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment by Mr. Patterson: Page 1, line 6, after the figures "$562.80" insert "in full settlement of all claims against the Government."

The amendment was agreed to, and the bill as amended was ordered to be read a third time, was read the third time and passed, and a motion to reconsider laid on the table.

HERBERT G. BLACK

The next business on the Private Calendar was the bill (S. 487) for the relief of Herbert G. Black, owner of the schooner *Oakwoods*, and Clark Coal Co., owner of the cargo of coal on board said schooner.

The SPEAKER pro tempore. Is there objection?

Mr. MOUSER. Mr. Speaker, I object.

Mr. NELSON of Maine. Mr. Speaker, will the gentleman withhold his objection for a brief statement?

Mr. MOUSER. I reserve it for the moment, but I say to the gentleman frankly that my ground of objection is that there is absolutely no negligence here. The schooner went beyond the buoys, and the submarine hit it. That is the report of the department.

Mr. NELSON of Maine. Mr. Speaker, I think the gentleman has not read the report fully. This man, Herbert G. Black, I am interested in, because he is a constituent of mine. He is an old-time Maine sea captain. He has had long experience and is fully acquainted with all of the requirements of navigation and has a splendid record. At the time of this accident he had practically his life savings invested in this schooner. In this bill he is asking not for any appropriation but simply for the right to go into the United States court and prove his case.

Mr. MOUSER. That is correct.

Mr. NELSON of Maine. On the evening of November 24, 1919, his schooner came into collision with a United States submarine. Immediately after that the Navy Department held an ex parte hearing, in which no member of the crew or captain of this schooner was present.

The Navy Department made a sort of finding that the lights on the schooner did not conform to the requirements of navigation or the rules of the road, and that he was in an improper place at the time. That was an ex parte hearing. If the captain had been allowed to be present, he would have testified that these lights had been recently purchased by him, that he had personally lighted and trimmed and placed those lights, and that they were giving the usual amount of visibility on that night. The evidence of these men on the submarine, who, of course, were protecting their own interests, was that they did not see this schooner until they were within 50 yards of the ship.

Up to 1928 the Navy Department had always claimed that a submarine was not subject to the same requirements of navigation and rules of the road as required of ordinary shipping, and a case in the United States court at that time held it was.

Mr. MOUSER. Was that decision of the United States court subsequent to that claim?

Mr. NELSON of Maine. Yes; in 1928.

Mr. MOUSER. If that is true, I have no objection.

Mr. NELSON of Maine. And after that the Navy changed their system of lights.

Mr. MOUSER. I have no objection to this gentleman's going into the admiralty court if there is a decision such as the gentleman refers to.

Mr. STAFFORD. Mr. Speaker, reserving the right to object, as I understand the rule of the admiralty court—and I wish the gentleman to correct me if I am in error—it is that where there is fault on both sides, and the gentleman makes the contention that there was negligence on both sides——

Mr. NELSON of Maine. Oh, I did not make that contention.

Mr. STAFFORD. Assuming then that there is negligence on the part of both the owner of the schooner, because the lights on his ship on the port side were not of sufficient visibility, and assuming that in the operation of the submarine the Government was negligent because their lookout was back maybe 5 or 10 feet, then, where the court finds negligence on the part of both, the rule is that it will assess the damages in favor of that person who sustained the greatest damage.

If that is a correct statement of the law, I am not willing, from my acquaintance with this case, to allow the owner of this schooner to go into the admiralty court and get a return of $18,000, or whatever the value of his schooner is.

Mr. NELSON of Maine. Will the gentleman yield?

Mr. STAFFORD. Certainly.

Mr. NELSON of Maine. In 1925, as illustrative of the position which the Government takes in these cases, we passed a law called the "public vessels act," allowing claimants in all such cases as this, and evidently intending to cover all outstanding cases at the time, to bring a libel against the United States Government in the United States Court, in all cases arising subsequent to April 6, 1920. If they had simply set that date back three or four months it would have covered this case. This case was in the latter part of November, 1919, and when they fixed the limitations in the law they put it April, 1920. I believe there is no evidence that there was any negligence on the part of this captain as regards the lights.

Mr. STAFFORD. Oh, I think there is more evidence of negligence on the part of the owner than on the part of the operators of the submarine.

Mr. NELSON of Maine. They had an ex parte hearing before a board of naval inquiry, and the owner of this boat was there and the captain says was ready to prove that these were new lights, trimmed and placed and going in perfect shape that night. All he wants is an opportunity to prove it.

Mr. MOUSER. I think the gentleman from Wisconsin would be interested—in view of what he says about the admiralty law, in case there was equal negligence the party being most damaged would be compensated—to have a statement of the decision which the gentleman called to my attention, which would remove the negligence of the captain.

Mr. STAFFORD. I am acquainted with that decision, as I have examined it myself.

Mr. NELSON of Maine. The gentleman will note that the Navy Department in 1924 were adverse to this claim. In their later report, made when Senator WHITE introduced this in the Senate, they do not recommend against it and say it is up to Congress to determine. The policy of Congress, as evidenced by our public vessels act, is to give claimants an opportunity to prove an honest case and not hide behind the statement that the state can do no wrong.

Mr. STAFFORD. Oh, I am not in sympathy with that idea.

Mr. NELSON of Maine. We are not asking for any appropriation. We are simply asking for a citizen who has lost his means of livelihood to come into court and prove his case. If he was negligent or if he has no case, he can not recover. I think the least we can do to an honest citizen of the United States is to give him an opportunity to prove an honest claim.

Mr. STAFFORD. Would the gentleman be agreeable to an amendment providing "under the same terms as provided by the act of March 5, 1925"?

Mr. NELSON of Maine. Yes; I would be very glad to. That is all I want.

Mr. STAFFORD. Because I am influenced by the fact that if this accident had occurred immediately after the date of this enabling act, the owner would have had his day in court.

Mr. NELSON of Maine. That is true.

Mr. STAFFORD. Mr. Speaker, I will offer that amendment and therefore withdraw my objection.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the claims of Herbert G. Black, owner of the schooner *Oakwoods*, and Clark Coal Co., owner of the cargo of coal on board said schooner, for damages arising out of a collision between such schooner and the United States submarine *R–3* off the southern end of Cape Cod Canal on November 24, 1919, may be sued for by the said owners in the United States District Court for the District of Maine, sitting as a court of admiralty and acting under the rules governing such court; and said court shall have jurisdiction to hear and determine such suit and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States in favor of the owner of the said schooner *Oakwoods* and the owner of the cargo of coal on board said schooner, or against the owner of the said schooner *Oakwoods* and the owner of the cargo of coal on board said schooner in favor of the United States upon the same principles and measures of liability as in like cases in admiralty between private parties and with the same right of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

Mr. STAFFORD. Mr. Speaker, I offer an amendment which I have sent to the desk.

The Clerk read as follows:

Amendment by Mr. STAFFORD: Page 2, line 10, after the word "admiralty," insert the words "under the terms and conditions of the public vessels act of March 3, 1925, chapter 22, United States Code."

The amendment was agreed to.

Mr. STAFFORD. I offer the following amendment, Mr. Speaker.

The Clerk read as follows:

Amendment by Mr. STAFFORD: In line 16, after the words "United States," insert "district attorney."

The amendment was agreed to.

The bill as amended was ordered to be read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

STANDARD DREDGING CO.

The Clerk called the next bill, S. 1274, for the relief of the Standard Dredging Co.

Mr. PATTERSON. Mr. Speaker, reserving the right to object, in looking over the report and the different items charged for I think this bill should be amended to reduce the amount to $2,000. I note interest charges and other charges are put in to make up the $2,500-plus, and I believe it would be well for the company, and they could well afford to accept an amendment, to make it $2,000.

Mr. PITTENGER. Will the gentleman yield?

Mr. PATTERSON. I yield.

Mr. PITTENGER. I wish to say for the information of the gentleman from Alabama [Mr. PATTERSON] that the amount was arrived at by the Secretary of War after full investigation, and I have accepted his figures.

Mr. PATTERSON. I understand that. It is less than they originally submitted.

Mr. BACHMANN. Will the gentleman yield?

Mr. PATTERSON. I yield.

Mr. BACHMANN. How much does the gentleman suggest it should be amended?

Mr. PATTERSON. I suggest it should be amended to make it $2,000 instead of $2,531.25.

Mr. BACHMANN. I wish to direct the gentleman's attention to page 2. I notice there is an interest charge of 6 per cent, based on a 300 work-day year, at $45 a day.

There is an amount of $200; then there is a profit.

Mr. PATTERSON. A profit of 20 per cent?

Mr. BACHMANN. A profit of 20 per cent based on the $200.

Mr. PATTERSON. There is a profit. At least, I disagree there with the profit of 20 per cent; and I think, in view of some other items which are not there, they could well afford to accept $2,000, especially in view of the condition of the Treasury to-day, and in view of the purchasing power of the dollar to-day as compared to what it was some time ago. I may say to my colleague the gentleman from Minnesota that I think the claimant could well afford to accept $2,000.

Mr. PITTENGER. I suggest that the gentleman offer his amendment.

Mr. BLACK. Mr. Speaker, this suit has been passed on by the Court of Claims. The Court of Claims wanted a greater judgment than the bill calls for. It has been reduced in the bill by $700. They have had to go to the Court of Claims once and now they have to come to Congress again and Congress has cut the judgment rendered by the Court of Claims.

Mr. BACHMANN. If the Court of Claims rendered a judgment, why was it not paid?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, here is a claimant, rather intelligent of their rights, who came before Congress once and got a private relief act from Congress for the repair of the dredge.

Mr. PATTERSON. Yes; and it was quite a big repair.

Mr. STAFFORD. Now they are seeking demurrage, and there was no negligence on the part of the Government in the operation of this dredge; it was merely the result of an accident suffered by reason of the dredge being caught in the current. I do not think it is a very conscientious claim.

Why did not this dredge company include this item when they were here before and secured relief for the amount of the repair? At that time they made no claim for demurrage.

Mr. PITTENGER. This is a large company.

Mr. STAFFORD. Oh, yes. The Standard Dredging Co., seeing how easy it was to get money out of the Government for the repair of the dredge, thought they would come again and try it.

Mr. BLACK. The biggest dredging company in the world could not get anything out of the Government if the gentleman from Wisconsin was around.

Mr. STAFFORD. I was not around when this came up, unfortunately for the Government.

Mr. PITTENGER. I will accept the amendment.

Mr. BLACK. We will take $500 off and go to the next bill.

Mr. BACHMANN. No. I think it is a serious claim and I think we are entitled to know the details of the claim. As I have stated heretofore, I would like to know why we should reimburse them for $7.50 a day for taxes? What kind of taxes are they? Why should the Government pay them $7.50 a day for taxes? I do not understand why we should pay that.

Mr. BLACK. We can not go into such a detailed itemization of every claim submitted as the gentleman may wish. We have got to have some respect for the Department of War, which investigated this claim. They report that it is a worthy claim.

Mr. PATTERSON. I think if we strike out the profit and make the amount $2,000 it will be fair.

Mr. BLACK. The Senate committee has investigated it.

Mr. BACHMANN. That does not change the situation. We are entitled to know what the claim is based on.

Mr. BLACK. It is all set forth in the report.

Mr. BACHMANN. Can the gentleman tell me why we should reimburse them for an item of $7.50 a day for taxes?

Mr. PITTENGER. Mr. Speaker, the operation of this dredge was stopped for a period of 5⅝ days, and the loss sustained has been worked out by the Secretary of War. It consists of these items that are included in this report.

Mr. PATTERSON. I may say to my distinguished colleague from Minnesota, who is very sincere in working on his bills, that some of these things overlap and do not seem justified.

Mr. PITTENGER. I will accept the amendment.

Mr. BACHMANN. Here is a statement showing interest at 6 per cent, based on a 300-day working year, $45; profit at 20 per cent of value, based on a 300-day working year, $150; overhead, including insurance at $15 per day, $55; and taxes in 1916, at $1 per 100, $7.50.

Mr. PATTERSON. I propose to strike all that out.

Mr. BLACK. I take it the War Department has found that these taxes were paid, the overhead was paid, and the insurance was paid. This is a reimbursement proposition. Of course, the profits were not paid.

Mr. BACHMANN. The main item in this claim is rental charge of $142.50. I think this is just and they ought to receive this amount; but without some further explanation as to why we should pay interest at 6 per cent and overhead, including interest at $15 a day and also taxes, I am disposed to oppose that part of the bill. I have no objection to the rental charge amounting to $142.50.

Mr. PITTENGER. That does not cover all the loss or all the damage.

Mr. BACHMANN. What other claim have they got here?

Mr. PITTENGER. Every item is set forth here.

Mr. BLACK. Interest at 6 per cent means interest at 6 per cent, and taxes means taxes, whether they are State, county, or Federal taxes, and the War Department says that these taxes were paid.

Mr. BACHMANN. As the gentleman from Wisconsin has said, the principal part of this claim has already been paid by legislation, and now they are back a second time, wanting interest and taxes and insurance and profits.

Mr. BLACK. In the absence of any more particular information than the War Department gives us, if the gentleman insists on his position, the sensible thing to do, I presume, is to compromise.

Mr. BACHMANN. What amendment does the gentleman from Alabama suggest?

Mr. PATTERSON. I objected particularly to the profits, and that is the matter that called it to my attention.

Mr. BACHMANN. That is based on 20 per cent of value and amounts to $150 for five days.

Mr. PATTERSON. I thought they would be entitled to some profits, however, and I proposed to reduce the entire claim to $2,000. If the gentleman is not satisfied, however——

Mr. PITTENGER. Profit is a legitimate element of damage.

Mr. PATTERSON. But 20 per cent is too high.

Mr. PITTENGER. The War Department found that this was the amount of profit they lost.

Mr. BLACK. That was their contractual profit. Whether it was too high or too low, in the gentleman's opinion, that was the actual loss.

Mr. BACHMANN. In view of the discussion, what amendment does the gentleman think ought to be made here?

Mr. PATTERSON. In view of the discussion, the bill may stand a good deal more cut than I thought, but I wanted to be generous in the matter.

Mr. BACHMANN. Would the gentleman accept an amendment of $1,500?

Mr. BLACK. I do not know anything about this except what is in the report. No one has been before the committee and I am anxious to get the work of the committee done because I do not want all these matters to go over until the next session. I shall accept any reasonable compromise, but I can not assure the gentleman I shall try to defend the position of the House in conference because the Senate conferees may have important information that would make me think otherwise.

Mr. BACHMANN. Then I shall be compelled to object.

The SPEAKER pro tempore. Is there objection?

Mr. BACHMANN. Mr. Speaker, I object.

C. A. CATES

The Clerk called the next bill, H. R. 2294, for the relief of C. A. Cates.

Mr. STAFFORD. Mr. Speaker, reserving the right to object, from my reading of the report this was an unavoidable accident.

Mr. PITTENGER. Oh, no.

Mr. FIESINGER. This is a perfect case of negligence, as I read the report.

Mr. STAFFORD. There is no real, permanent injury here.

Mr. PITTENGER. There is a sacroiliac injury.

Mr. STAFFORD. Where does that appear in the report?

Mr. FIESINGER. On page 2 of the report the doctor makes a statement as of August 13, 1929, and on November 21, 1931, he makes a report of the injury and says the condition is not yet remedied and still persists.

Mr. STAFFORD. Five hundred dollars would be a very liberal amount to be allowed in this case.

Mr. FIESINGER. He had $163.50 of damage to his truck.

Mr. BACHMANN. He got that. The War Department paid for the damage to his car.

Mr. PITTENGER. No; they offered to pay it.

Mr. FIESINGER. Yes; they offered to pay that, but did not do it, and this man is still suffering from his injury.

Mr. STAFFORD. Where is there any evidence of that?

Mr. FIESINGER. On page 2 of the report the doctor states as of November 21, 1931, "In my opinion this condition might persist through an indefinite time."

Mr. STAFFORD. "Might," from an interested doctor. I have had some acquaintance with doctors testifying as experts in cases, and that does not influence me very much.

Mr. BACHMANN. Let us see if we can straighten this out. There is a claim of $163.50 for damage to this man's car; and the board of Army officers that investigated the accident recommended that this be paid, and the Secretary of War certified it to the Comptroller General for payment. He is only claiming in this bill for personal injury.

Mr. FIESINGER. I do not so understand it.

Mr. PITTENGER. They offered to pay for the damages to his car, but he would not accept it.

Mr. BACHMANN. Read your bill. He is asking for reimbursement only for personal injuries in this bill. The other part is out of it, and now it is a question of what his injuries are and what he is entitled to by way of compensation for such injuries. I think the man is entitled to some compensation.

Mr. PITTENGER. There is no doubt about that.

Mr. FIESINGER. I am informed he never got the $163.50.

Mr. BACHMANN. The trouble with us is that we can not find out from the committee's report or from the report of the War Department the extent of this man's injury, except the two statements made by the doctor about the injury to this man's back.

Mr. PITTENGER. That was the best information we could get.

Mr. BACHMANN. If it is a permanent injury, he is entitled to more money. If it is not a permanent injury, he is not entitled to so much.

Mr. FIESINGER. He suffered for two years after this accident, according to the statement of the doctor.

Mr. BACHMANN. There is no competent statement here from the doctor as to how much time the man was confined in the hospital, for instance.

Mr. FIESINGER. He lost two months from his work.

Mr. BACHMANN. I accept the gentleman's statement as a fact; but I say the trouble is we can not tell how long he was in the hospital or how serious the injury was, and yet the bill has been reduced by the committee from $5,000 to $1,500.

Mr. PITTENGER. And that was done because the committee agreed that that was a reasonable amount.

Mr. FIESINGER. The bill was put in for $5,000 and the committee reduced it to $1,500.

Mr. STAFFORD. That is altogether too much. What is the gentleman's wish in the matter?

Mr. FIESINGER. We will take a thousand dollars.

The Clerk read the bill, as follows:

Be it enacted etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $1,500 to C. A. Cates, who sustained injuries when struck by a truck operated by a private soldier then acting in the course of the performance of his duties as an employee of the Government.

Mr. STAFFORD. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Strike out the figures "$1,500" and insert "$1,000."

The amendment was agreed to.

Mr. BLANTON. I offer the following amendment.

The Clerk read as follows:

In line 6, after the figures "$1,000," insert "in full settlement of all claims against the Government of the United States."

The amendment was agreed to.

Mr. STAFFORD. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Line 6, after the word "injuries," insert "on or about February 5, 1929, at Dayton, Ohio."

The amendment was agreed to.

Mr. STAFFORD. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

On line 7, after the word "by," where it occurs the first time, strike out the word "a" and insert "an Army."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DAVID A. WRIGHT

Mr. STAFFORD. Mr. Speaker, early in the evening, Calendar No. 551, H. R. 6424, granting jurisdiction to the Court of Claims to hear the case of David A. Wright, I objected to it, after an explanation by the gentleman from Illinois [Mr. CHINDBLOM]. Since then the gentleman has shown me some decisions not included in the report and I have changed my opinion. I ask unanimous consent to go back to that bill.

The SPEAKER. Is there objection to returning to the bill?

There was no objection.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. GRISWOLD. Reserving the right to object, this gives the court an order to hear certain evidence based on intent.

Mr. CHINDBLOM. It sets up the ground on which the court held that it did not have jurisdiction and, of course,

it is an exception from the Dent Act. I think it particularizes so much that it in fact makes it harder for the proof to be made. It provides that the evidence must relate to the particular officers who are mentioned in the report and in the previous decision of the Court of Claims. I think this feature improves the bill.

Mr. GRISWOLD. It not only sets aside the statute of limitations but provides that the court shall accept certain evidence based on intent. I object.

GOTTLEIB STOCK

The next business on the Private Calendar was the bill (H. R. 6851) to reimburse Gottleib Stock for losses of real and personal property by fire caused by the negligence of two prohibition agents.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Mr. Speaker, I reserve the right to object. I am of the opinion that the amount of damages is rather high when you consider the fact that the cause of the fire is somewhat conjectural. It is not certain that it arose by reason of a spark from a bush fire that was started and virtually extinguished more than 18 to 20 hours before.

Mr. MOUSER. If the gentleman will yield, it is a fact that Colonel Woodcock personally made the investigation.

Mr. HORR. Yes. He went out there with me.

Mr. MOUSER. And he found that they were negligent, and on the basis of his investigation suspended these agents as a punishment for negligence, and recommended the compensation.

Mr. STAFFORD. I am yielding my opinion as to the conjectural origin of the fire, but I am basing my present inquiry on the amount of damages.

Mr. HORR. I call the attention of the gentleman to the report of the committee. That matter was gone into very thoroughly by the Committee. Mr. Woodcock was out there and made this investigation personally with me.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. HORR. Yes.

Mr. BLANTON. Colonel Woodcock says that the claim is just, but he wants Congress to fix the amount. The committee has cut the claim down from $6,000 to $4,000. Will the chairman protect the House in lowering that amount?

Mr. STAFFORD. One moment. Investigator Shirley, as stated by Mr. Woodcock, in his report of January 12, 1932,

> It is my opinion from the above facts that the assessed value of the Stock house was unreasonably low, primarily to avoid the payment of taxes, but, from the insurance value, from $1,800 to $2,000 would be a reasonable value for the house and furniture.

Mr. BLANTON. If the gentleman would accept $2,500.

Mr. HORR. God knows I will accept anything that you give me, that you compel me to accept, but it looks as if we had gone into the business here of bargaining, and we might just as well set up three balls. It is easy enough to bargain, when I think the bargaining is fair. I want you to turn to page 4 of that report and read the latter part, in the last paragraph, of the statement by Mr. Woodcock:

> I have assured the representatives of these claimants that I believe their general claim to be just, without expressing any opinion as to the amount.

Why hold it up to an opinion of Agent Shirley, who went out on the grounds after the place had been burned down and there was nothing there but ashes, to make his determination.

Mr. BLANTON. He was the only one representing the Government, who knew anything about it.

Mr. HORR. No. After the committee made a request in respect to the amount of stuff that was burned, we then presented to the committee, and they investigated it, an itemized statement of the actual stuff. We were the only people who knew what was burned. Shirley merely went out and looked at it after the house was nothing but a mass of ashes.

Mr. BLANTON. The ones who have reserved the right to object have agreed to allow the bill to pass for $2,500. Why does not the gentleman accept it?

Mr. HORR. I have to meet my constituents out there, who know this man was burned out, and who has lived in a chicken house ever since waiting for the action of this Congress.

Mr. BLANTON. They will appreciate it lots more if you bring him back $2,500 than if you bring back nothing.

Mr. MOUSER. Why not give the man a reasonable amount with which to build a house.

Mr. HORR. Suppose for a moment that the gentleman were an innocent bystander and a man built a still within a mile and a half of his place, and an agent came along and set fire to it, and the fire comes through and burns his house, would you want to compromise for an amount which you think is unjust?

Mr. MOUSER. Make it $2,500.

Mr. HORR. I shall be compelled to take whatever is given me, but I know that we are entitled to $4,000.

Mr. BACHMANN. Did the man have any insurance?

Mr. HORR. We wrote to the man about his insurance.

Mr. BLACK. The suggestion is made that the amount should be $2,500. That is equally acceptable to me.

Mr. BACHMANN. Was there any insurance?

Mr. HORR. We have a letter showing that he did not have any insurance. I must take whatever you give me.

Mr. BLANTON. Mr. Speaker, regular order.

Mr. HORR. I will take whatever you give me.

Mr. BLANTON. With the understanding that has been had with the gentleman from New York [Mr. BLACK] as to reducing the bill to $2,500, I shall not object.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read as follows:

> *Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, the sum of $6,573.25 to Gottleib Stock as compensation for the total destruction of his home and personal property therein and trees and vines on the premises and other property during a fire set by the negligence of two prohibition agents in the employ of the Federal Bureau of Prohibition.

With the following committee amendment:

> Page 1, line 6, strike out "$6,573.25" and insert in lieu thereof "$4,000."

Mr. BLACK. Mr. Speaker, I offer a substitute for the committee amendment.

The Clerk read as follows:

> Substitute amendment offered by Mr. BLACK to the committee amendment: Page 1, line 6, strike out "$4,000" and insert in lieu thereof "$2,500."

The substitute amendment to the committee amendment was agreed to.

The Clerk read as follows:

> Further committee amendment: Page 2, line 2, insert the following: "*Provided*, That no part of the amount appropriated in this act, in excess of 10 per centum thereof, shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per centum thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BOSTON STORE CO.

The Clerk read the next bill, H. R. 7198, for the relief of the Boston Store Co., a corporation, Chicago, Ill.

Mr. MOUSER. Reserving the right to object, I will not object to a reasonable amount, but just how is that damage arrived at? I have read the report.

Mr. SABATH. That has been recommended and paid twice by the Government, and, due to technicalities, it still remains due. This has been recommended twice, and the

Secretary of the Treasury recommends it, and through some technicalities the check has been sent back and forth twice or three times. This is for merchandise paid for and not received in order as it should have been.

Mr. MOUSER. Who determines as to the condition of the merchandise, whether it was rusty or old or not?

Mr. SABATH. The Government inspectors and everyone concerned with it came to the conclusion that that was the correct amount.

Mr. MOUSER. And that was agreed upon?

Mr. SABATH. Yes; and the report from the Secretary of War is here. In fact, it has been paid twice and the checks were returned.

Mr. MOUSER. The Secretary of War said the goods were in damaged condition?

Mr. BLANTON. Mr. Speaker, the regular order. It is 10.30.

Mr. MOUSER. I do not want to object to this claim.

Mr. STAFFORD. Well, reserving the right to object, I do not understand the paragraph before the last in the letter of the Secretary of War, which says the amount has been heretofore allowed.

Mr. SABATH. They paid it and returned the money and asked for a voucher and it was returned again, and the amount is due.

Mr. PITTENGER. I will say to the gentleman from Wisconsin that this is certainly a fair bill.

Mr. STAFFORD. The money has not been paid heretofore?

Mr. PITTENGER. No.

Mr. STAFFORD. I will withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $6,246 to the Boston Store Co., a corporation of Chicago, Ill., such sum representing a loss incurred because of misrepresentation in the purchase of cots from the quartermaster supply officer of the surplus property branch at Chicago, Ill., August 16, 1921, which claim had at one time been allowed and paid, but subsequently, because of some technicality, now cured, returned to the Treasury upon request.

Mr. BLANTON. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment by Mr. BLANTON: At the end of the bill strike out the period, insert a colon, and add the following: "in full settlement of all claims against the Government of the United States."

The amendment was agreed to.

Mr. BLANTON. Mr. Speaker, I also offer, at the end of the bill the usual attorney's fee clause as an amendment.

The Clerk read as follows:

At the end of the bill insert the following:

"*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorneys or attorneys, to exact, collect, withold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ADJOURNMENT

Mr. BLACK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 30 minutes p. m.) the House adjourned until to-morrow, Saturday, January 28, 1933, at 12 o'clock noon.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Saturday, January 28, 1933, as reported to the floor leader:

WAYS AND MEANS

(10 a. m.)

Continue hearings on depreciated currency.

MILITARY AFFAIRS

(10.30 a. m.)

Hearings before subcommittee on private bills.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

891. A communication from the President of the United States, transmitting an amendment of the estimate of appropriation for the legislative establishment for public printing and binding, Government Printing Office, contained in the Budget for the fiscal year 1934, page 18, increasing the total amount from $2,500,000 to $2,750,000 (H. Doc. No. 532); to the Committee on Appropriations and ordered to be printed.

892. A communication from the President of the United States, transmitting supplemental estimates of appropriations pertaining to the legislative establishment, House of Representatives, in the sum of $6,150 (H. Doc. No. 533); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. WOODRUM: Committee on Appropriations. H. R. 14458. A bill making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1934, and for other purposes; without amendment (Rept. No. 1922). Referred to the Committee of the Whole House on the state of the Union.

Mr. BYRNS: Committee on Appropriations. H. R. 14436. A bill making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes; without amendment (Rept. No. 1923). Referred to the Committee of the Whole House on the state of the Union.

Mr. GILBERT: Committee on the District of Columbia. H. R. 12678. A bill to license and register master electricians, master fixture hangers, journeymen electricians, and journeymen fixture hangers engaged in the business of installing, repairing, or maintaining electric wiring, fixtures, apparatus, and appliances for light, heat, or power in the District of Columbia, and for other purposes; with amendment (Rept. No. 1924). Referred to the Committee of the Whole House on the state of the Union.

Mr. PALMISANO: Committee on the District of Columbia. House Joint Resolution 565. A joint resolution to provide for the maintenance of public order and the protection of life and property in connection with the presidential inaugural ceremonies in 1933; without amendment (Rept. No. 1925). Referred to the Committee of the Whole House on the state of the Union.

Mr. DICKSTEIN: Committee on Immigration and Naturalization. House Joint Resolution 577. A joint resolution to provide for the return to the Philippine Islands of unemployed Filipinos resident in the continental United States, to authorize appropriations to accomplish that result, and for other purposes; without amendment (Rept. No. 1926). Referred to the Committee of the Whole House on the state of the Union.

Mr. WILLIAMS of Texas: Committee on the Territories. S. 4374. An act to empower the superintendent of the Hawaii National Park to perform the functions now performed by the United States commissioner for the said

national park, and for other purposes; with amendment (Rept. No. 1927). Referred to the House Calendar.

Mr. STEAGALL: Committee on Banking and Currency. H. R. 14252. A bill to extend the time during which certain provisions of the act of February 27, 1932, relating to improving the facilities of the Federal reserve system to meet the needs of member banks in exceptional circumstances, shall be effective; without amendment (Rept. No. 1928). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. BLACK: Committee on Claims. H. R. 1769. A bill for the relief of Joseph Watkins; with an amendment (Rept. No. 1929). Referred to the Committee of the Whole House.

Mr. BRUMM: Committee on Claims. H. R. 2462. A bill for the relief of Thelma Lucy Rounds; without amendment (Rept. No. 1930). Referred to the Committee of the Whole House.

Mr. SCHAFER: Committee on Claims. H. R. 12436. A bill for the relief of Giuglio Zarella; without amendment (Rept. No. 1931). Referred to the Committee of the Whole House.

Mr. SMITH of Virginia: Committee on Claims. S. 465. An act for the relief of William H. Holmes; without amendment (Rept. No. 1932). Referred to the Committee of the Whole House.

Mr. SCHAFER: Committee on Claims. S. 3477. An act for the relief of the Playa de Flor Land & Improvement Co.; without amendment (Rept. No. 1933). Referred to the Committee of the Whole House.

Mr. THOMASON: Committee on Military Affairs. S. J. Res. 48. A joint resolution to authorize the acceptance on behalf of the United States of the bequest of the late William F. Edgar, of Los Angeles County, State of California, for the benefit of the museum and library connected with the office of the Surgeon General of the United States Army; without amendment (Rept. No. 1934). Referred to the Committee of the Whole House on the state of the Union.

Mr. LOOFBOUROW: Committee on Indian Affairs. S. 4578. An act conferring jurisdiction on the Court of Claims to adjudicate the rights of the Otoe and Missouria Tribes of Indians to compensation on a basis of guardian and ward; with amendment (Rept. No. 1935). Referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 14442) for the relief of Harvey Mincher, and the same was referred to the Committee on Military Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BACON: A bill (H. R. 14457) to amend the act of March 2, 1929 (45 Stat. 1512); to the Committee on Immigration and Naturalization.

By Mr. WOODRUM: A bill (H. R. 14458) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1934, and for other purposes; committed to the Committee of the Whole House on the state of the Union.

By Mr. DAVIS of Pennsylvania: A bill (H. R. 14459) to impose a tax on each sale in the United States of foreign securities; to the Committee on Ways and Means.

By Mr. KEMP: A bill (H. R. 14460) to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near Baton Rouge, La.; to the Committee on Interstate and Foreign Commerce.

By Mr. LANHAM: A bill (H. R. 14461) to provide for placing the jurisdiction, custody, and control of the Washington City Post Office in the Secretary of the Treasury; to the Committee on Public Buildings and Grounds.

By Mr. HOGG of West Virginia: A bill (H. R. 14462) to extend the times for commencing and completing the construction of a bridge across the Ohio River at or near Sistersville, Tyler County, W. Va.; to the Committee on Interstate and Foreign Commerce.

By Mr. GILCHRIST: A bill (H. R. 14463) to convey to Iowa, Wisconsin, and Illinois the beds and submerged lands of all nonnavigable meandered bodies of water within the borders thereof, respectively; to the Committee on Interstate and Foreign Commerce.

By Mr. VINSON of Georgia: A bill (H. R. 14464) to authorize the Secretary of the Navy to enter into contract with the Annapolis Metropolitan Sewerage Commission for the disposal of sewage of the United States Naval Academy, and for other purposes; to the Committee on Naval Affairs.

Also, a bill (H. R. 14465) to amend the act of June 10, 1926, entitled "An act to provide for the equalization of promotion of officers of the Staff Corps of the Navy with officers of the line" (44 Stat. 717; U. S. C., title 34, Supp. VI, sec. 348); to the Committee on Naval Affairs.

By Mr. HARE: Joint resolution (H. J. Res. 578) to prohibit the restriction of civil-service appointments to residents within areas less than a State, and for other purposes; to the Committee on the Civil Service.

By Mr. TREADWAY: Joint resolution (H. J. Res. 579) authorizing free postage on mail matter sent by Grace Coolidge; to the Committee on the Post Office and Post Roads.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DARROW (by request): A bill (H. R. 14466) granting a pension to D. Marion Geis; to the Committee on Pensions.

By Mr. DE PRIEST: A bill (H. R. 14467) granting a pension to Mary T. Gunn; to the Committee on Invalid Pensions.

By Mr. FISH: A bill (H. R. 14468) granting a pension to Anna McNamara; to the Committee on Pensions.

By Mr. HESS: A bill (H. R. 14469) granting a pension to Mary Yeager; to the Committee on Pensions.

By Mr. HORR: A bill (H. R. 14470) for the relief of Sarah E. Thompson; to the Committee on Pensions.

By Mr. HOUSTON of Delaware: A bill (H. R. 14471) granting an increase of pension to Eliza A. Carey; to the Committee on Invalid Pensions.

By Mr. JOHNSON of Missouri: A bill (H. R. 14472) for the relief of Margaret E. Gordon; to the Committee on Claims.

By Mr. PRATT: A bill (H. R. 14473) granting a pension to Lottie Smith; to the Committee on Invalid Pensions.

By Mr. STALKER: A bill (H. R. 14474) granting a pension to Mary M. Thomas; to the Committee on Invalid Pensions.

By Mr. SWICK: A bill (H. R. 14475) granting an increase of pension to Kate Smith; to the Committee on Invalid Pensions.

By Mr. TARVER: A bill (H. R. 14476) for the relief of Fred Epps; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

9953. By Mr. ANDREW of Massachusetts: Telegram from Hon. Arthur Guy, State commissioner of banks, Boston, Mass., protesting against publication of loans made by Reconstruction Finance Corporation as called for by the Howard resolution; to the Committee on Banking and Currency.

9954. By Mr. BOEHNE: Petition of North Side Business Men's Association, of Evansville, Ind., protesting against cancellation of foreign debts to the United States; to the Committee on Foreign Affairs.

9955. By Mr. BLOOM: Petition of the Senate of the State of New York, urging the enactment of Senate bill 5336; to the Committee on Banking and Currency.

9956. By Mr. CROWTHER: Petition of citizens of the thirtieth congressional district of New York, urging passage of the stop-alien representation amendment to the United States Constitution; to the Committee on the Judiciary.

9957. By Mr. CARTER of California: Petition of E. C. Thomas, Mary E. Thomas, J. A. Butterfield, and 25 other residents of Oakland, Calif., urging the passage of the stop-alien representative amendment to the Constitution; to the Committee on the Judiciary.

9958. By Mr. CROWTHER: Petition of citizens of Schenectady, N. Y., opposing any reduction in the enlisted strength of the United States Marine Corps; to the Committee on Appropriations.

9959. By Mr. GARBER: Petition urging support of the railway pension bills, S. 4646 and H. R. 9891; to the Committee on Interstate and Foreign Commerce.

9960. Also, petition of the Mount Vernon National Farm Loan Association, Alva, Okla., urging the enactment of the allotment plan or some plan that will restore the price of farm products; the reduction of interest rates on farm mortgages; the retention of the cooperative features and farmer control, in the event the Federal land-bank system is amended; and the removal of the Federal land-bank system from politics; to the Committee on Banking and Currency.

9961. Also, petition of the board of directors of the Cincinnati (Ohio) Chamber of Commerce, indorsing House bill 11642, relating to the policy of rate making, the recapture clause, and the valuation section of the interstate commerce act; to the Committee on Interstate and Foreign Commerce.

9962. Also, petition of J. W. Cavin, proprietor Thornwood Farm, Mutual, and Irl R. Gaston, Chester, Okla., urging the imperative necessity of enacting emergency relief measures to save the homes on the farm; to the Committee on Banking and Currency.

9963. By Mr. HANCOCK of New York: Petition of Mary E. Posthill and other residents of Syracuse, N. Y., favoring the stop-alien amendment to the Constitution; to the Committee on the Judiciary.

9964. By Mr. GARBER: Petition urging support of the railway pension bills, Senate bill 4646 and House bill 9891; to the Committee on Interstate and Foreign Commerce.

9965. Also, petition of the Ministerial Alliance of Grant County, of the State of Oklahoma, urging continued opposition to modification or repeal of the prohibition laws; to the Committee on the Judiciary.

9966. Also, petition of the Colorado Springs Chamber of Commerce, Colorado Springs, Colo., urging enactment of House bill 11642; to the Committee on Interstate and Foreign Commerce.

9967. Also, petition of a union temperance meeting of the five churches of Beaver, Okla., urging opposition to legislation intended to nullify, weaken, or repeal the eighteenth amendment and the Volstead Act, and urging support of adequate appropriations for law enforcement and a campaign of education in law observance; to the Committee on the Judiciary.

9968. By Mr. GIBSON: Petition of the Woman's Christian Temperance Union of Newport, Vt., opposing repeal of the eighteenth amendment; to the Committee on the Judiciary.

9969. By Mr. LUDLOW: Petition of citizens of Indianapolis, Ind., protesting against the legalization of beer, and favoring the upholding of the eighteenth amendment; to the Committee on the Judiciary.

9970. By Mr. MAPES: Petition of Dan Henry and 37 other residents of Grand Rapids, Mich., favoring the decentralization of wealth by revaluation of the gold ounce upward at least 100 per cent, issuance of new money to reduce the national debt instead of by the issuance of interest-bearing bonds, including immediate payment of the veterans' adjusted compensation in that manner, etc.; to the Committee on Ways and Means.

9971. By Mr. MEAD: Petition of Down Town Post, No. 64, American Legion, Buffalo, N. Y., opposing elimination of citizens' military training camps next year or any reduction in Federal appropriations for same; to the Committee on Appropriations.

9972. By Mr. MILLARD (by request): Petition signed by Clyde Blaylock and other residents in Westchester County, urging support of the proposal to revalue the gold ounce; to the Committee on Coinage, Weights, and Measures.

9973. By Mr. RUDD: Petition of Remington, Meek, Twitchell & Till, New York City, referring to the pending bankruptcy amendatory bill; to the Committee on the Judiciary.

9974. By the SPEAKER: Petition of E. M. Baker and others, urging Congress to give the President authority to lay embargoes on the shipment of arms to areas where armed conflict exists or is threatened; to the Committee on Foreign Affairs.

9975. By Mr. SPENCE: Petition of Mr. and Mrs. M. Schlosser, of Fort Thomas; Phil E. Steffen and others, of Covington; W. H. Ueberschlag and others, of Bellevue; and John F. McCabe and others, of Newport, Ky., urging revaluation of gold ounce, correction of financial abuses, and abuses growing out of mass production; to the Committee on Banking and Currency.

9976. Also, petition of Harriet E. Key and others, of Dayton; Bernard A. Klumper and others, of Covington; Francis H. Schweer and others, of Newport; and Frank Rickling and wife, of Bellevue, Ky., concerning the revaluation of gold ounce; to the Committee on Banking and Currency.

9977. By Mr. STALKER: Petition of Clayton I. Swayze and 250 other citizens of Ithaca, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

9978. Also, petition of citizens of Painted Post, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

9979. Also, petition of Annie N. Sloane and 50 other citizens of Montour Falls, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

9980. Also, petition of Minnie L. Young, president Woman's Christian Temperance Union, and 25 other members of West Danby, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

9981. Also, petition of Stella Hanford and 25 other citizens of Dryden, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

9982. By Mr. SWICK: Petition of Mrs. T. A. Preston, president, Mrs. Merle D. Allen, secretary, and members of the Frances Willard Woman's Christian Temperance Union, Union Township, New Castle, Lawrence County, Pa., urging the establishment of a Federal motion-picture commission for the purpose of regulating trade and distribution of motion pictures; to the Committee on Interstate and Foreign Commerce.

9983. Also, petition of Ella Rose, president; Mrs. J. L. Brown, secretary; and members of the Woman's Christian Temperance Union of New Wilmington, Lawrence County, Pa., urging the establishment of a Federal motion-picture commission for the purpose of regulating the trade and distribution of motion pictures; to the Committee on Interstate and Foreign Commerce.

9984. By Mr. THURSTON: Petition signed by Mrs. George Myers and 42 other citizens of Clarke County, Iowa, protesting against the modification or repeal of existing Federal laws in relation to prohibition; to the Committee on the Judiciary.

9985. Also, petition signed by Kate Bates and 492 other citizens of Lucas County, Iowa, protesting against the modification or repeal of existing Federal laws in relation to prohibition; to the Committee on the Judiciary.

SENATE

SATURDAY, JANUARY 28, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Chaffee, one of its clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 212. An act for the relief of Messrs. Short, Ross, Shaw, and Mayhood;

S. 213. An act authorizing adjustment of the claim of Kenneth Carpenter;

S. 219. An act authorizing adjustment of the claims of Orem Wheatley, Kenneth Blaine, and Joseph R. Ball;

S. 252. An act authorizing adjustment of the claim of Johnson & Higgins; and

S. 563. An act for the relief of George T. Johnson & Sons.

The message also announced that the House had passed the bill (S. 284) for the relief of William B. Thompson, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills of the Senate, each with amendments, in which it requested the concurrence of the Senate:

S. 487. An act for the relief of Herbert G. Black, owner of the schooner *Oakwoods*, and Clark Coal Co., owner of the cargo of coal on board said schooner; and

S. 3147. An act for the relief of Anna Pokorny.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 792. An act for the relief of William Joseph Vigneault;

H. R. 973. An act for the relief of John L. Dunn;

H. R. 1177. An act for the relief of Peter E. Anderson;

H. R. 1936. An act for the relief of Sydney Thayer, jr.;

H. R. 2294. An act for the relief of C. A. Cates;

H. R. 2907. An act for the relief of Walter Sam Young;

H. R. 2917. An act for the relief of Primo Tiburzio;

H. R. 3044. An act for the relief of Anthony Hogue;

H. R. 3045. An act for the relief of Gustav Welhoelter.

H. R. 3627. An act for the relief of James Wallace;

H. R. 5548. An act for the relief of George Brackett Cargill, deceased;

H. R. 6409. An act for the relief of William Joseph LaCarte;

H. R. 6851. An act to reimburse Gottleib Stock for losses of real and personal property by fire caused by the negligence of two prohibition agents;

H. R. 7198. An act for the relief of the Boston Store Co., a corporation, Chicago, Ill;

H. R. 7263. An act for the relief of Felix Maupin;

H. R. 7548. An act granting six months' pay to Ruth McCarn;

H. R. 8136. An act for the relief of John J. Moran;

H. R. 9231. An act for the relief of George Occhionero;

H. R. 9326. An act for the relief of John E. Davidson;

H. R. 9336. An act for the relief of Emily Addison;

H. R. 9355. An act for the relief of David Schwartz; and

H. R. 9457. An act for the relief of Sperry Gyroscope Co. (Inc.), of New York.

ENROLLED JOINT RESOLUTIONS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled joint resolutions, and they were signed by the Vice President:

S. J. Res. 239. Joint resolution authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and for other purposes; and

S. J. Res. 240. Joint resolution to provide for the quartering in certain public buildings in the District of Columbia of troops participating in the inaugural ceremonies.

WITHDRAWAL OF AMENDMENT TO DEFICIENCY BILL

Mr. BINGHAM. Mr. President, last evening I offered an amendment to the deficiency appropriation bill. I thought it was possible for the District Commissioners to borrow the money needed for the relief of the poor and unemployed. I find to-day that it is against the law for them to borrow this money, and that if the bill is not passed to-day there will be real suffering. Therefore, although I still believe, as I said last night, that the United States Government ought to pay its debts promptly and I am in hopes that this may be done without too great delay through another deficiency bill which will come before the Senate soon, I withdraw the amendment which I have offered. I hope the deficiency bill may promptly be passed in order that it may become a law to-day if possible.

The VICE PRESIDENT. The Senator from Connecticut withdraws his amendment.

CALL OF THE ROLL

Mr. FESS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Couzens	Johnson	Robinson, Ark.
Austin	Cutting	Kean	Robinson, Ind.
Bailey	Dale	Kendrick	Russell
Bankhead	Davis	Keyes	Schall
Barkley	Dickinson	King	Schuyler
Bingham	Dill	La Follette	Sheppard
Black	Fess	Lewis	Smith
Blaine	Fletcher	Logan	Smoot
Borah	Frazier	Long	Steiwer
Bratton	George	McGill	Stephens
Brookhart	Glass	McKellar	Swanson
Broussard	Glenn	McNary	Thomas, Idaho
Bulkley	Goldsborough	Metcalf	Thomas, Okla.
Bulow	Gore	Moses	Townsend
Byrnes	Grammer	Neely	Trammell
Capper	Hale	Norbeck	Vandenberg
Caraway	Harrison	Norris	Wagner
Carey	Hastings	Nye	Walsh, Mass.
Connally	Hatfield	Oddie	Walsh, Mont.
Coolidge	Hayden	Pittman	Watson
Copeland	Howell	Reed	Wheeler
Costigan	Hull	Reynolds	White

Mr. FESS. I wish to announce that the Senator from Missouri [Mr. PATTERSON] is detained from the Senate by reason of a death in his family.

The VICE PRESIDENT. Eighty-eight Senators have answered to their names. A quorum is present.

PERSONAL EXPLANATION—SENATE BARBER SHOP

Mr. LONG. Mr. President, I have never risen in the Senate for any matter of personal privilege until to-day, and I hope I shall not burden the Senate longer than a moment.

There has been a very widely circulated line of propaganda about privileges and immunities being granted to and indulged in by Members of the Senate. I have paid no attention to this kind of polecat publicity because it never has involved me until now. I see, however, that all over the United States a special press report is being circulated that it costs the United States Government $60 a year to give me a daily shave in the Senate barber shop.

Until a day or so ago I did not know we have a Senate barber shop. I have never been in the barber shop, but I have found out that there is such an institution now that it has received notice in the press.

In order that the gentlemen of the press may get the matter straight I wish it to be understood that while I have never been shaved in the Senate barber shop, Abraham Lincoln was shaved in it, Daniel Webster was shaved in it, John C. Calhoun was shaved in it, Grover Cleveland was shaved in it, as were other gentlemen from 80 years ago down until the present time.

ANNUAL REPORT OF WAR FINANCE CORPORATION

The VICE PRESIDENT laid before the Senate a letter from the Secretary of the Treasury, transmitting, pursuant

to law, a report on the War Finance Corporation (in liquidation) for the calendar year ended December 31, 1932; which, with the accompanying report, was referred to the Committee on Finance.

USELESS PAPERS IN WAR DEPARTMENT

The VICE PRESIDENT laid before the Senate a letter from the Secretary of War, transmitting, pursuant to law, a report of papers and documents on the files of the War Department, which are not needed in the transaction of current business and have no permanent value or historical interest, which, with the accompanying papers was referred to a Joint Select Committee on the Disposition of Useless Papers in the Executive Departments.

The VICE PRESIDENT appointed Mr. REED and Mr. FLETCHER members of the committee on the part of the Senate.

CHANGE IN DATE OF INAUGURATION

The VICE PRESIDENT laid before the Senate the following joint resolution adopted by the Legislature of the State of South Dakota, which was ordered to lie on the table:

House joint resolution (introduced by Mr. Painter) relating to the ratification of the lame-duck constitutional amendment

Be it resolved by the Legislature of the State of South Dakota:

Whereas both Houses of the Seventy-second Congress of the United States of America, by a constitutional majority of two-thirds thereof, proposed an amendment to the Constitution of the United States of America, which should be valid to all intents and purposes as a part of the Constitution of the United States when ratified by the legislatures of three-fourths of the States, which resolution is in words and figures following, to-wit:

SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

SEC. 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

SEC. 5. Sections 1 and 2 shall take effect on the 15th of October following the ratification of this article.

SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission: Be it

Resolved by the House of Representatives (the Senate concurring), That said proposed amendment to the Constitution of the United States of America be hereby ratified by the Legislature of the State of South Dakota: Be it further

Resolved, That copies of the resolution be forwarded by the governor of this State, to the Secretary of State at Washington, D. C., to the Presiding Officer of the United States Senate, and to the Speaker of the House of Representatives of the United States.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate the following joint memorial of the Legislature of the State of Washington, which was referred to the Committee on Finance:

HOUSE OF REPRESENTATIVES,
STATE OF WASHINGTON,
Olympia, January 23, 1933.

To the VICE PRESIDENT OF THE UNITED STATES,
Washington, D. C.

SIR: I have the honor to transmit herewith certified copy of House Joint Memorial No. 2, memorializing Congress in regard to the condition created by depreciated foreign currency.

Respectfully,

GEO. F. YANTIS,
Speaker of the House.

House Joint Memorial No. 2

To the Honorable the Senate and House of Representatives of the United States of America in Congress assembled:

We, your memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, most respectfully present and petition your honorable body as follows:

Whereas the immediate and greatest need of this Nation is to establish a fully employed citizenship, and normally functioning private industry offers the most desirable employment opportunities, and the primary and largest market for American produce and manufactures is found in meeting the wants of the American people, and the necessary employment in supplying these wants belongs first to American workmen; and

Whereas without the free flow of gold, the common medium of international values, the exchange rates of many nations' currencies have, by application of the law of supply and demand, become divorced from the actual values of those currencies as measured in buying power within the bounds of the nation issuing the currency; and

Whereas depreciated currency is seriously handicapping American industry, and our foreign markets are stifled, and our domestic industries face destruction by increased imports from depreciated-currency nations; and

Whereas the economic life of the State of Washington is derived from basic industries, such as lumber, fish, pulp, wheat, fruits, coal, cement, and their allied industries, and the very existence of capital, industry, employment, wages, and our standards of living are based on the profitable operation of these basic industries; and

Whereas the Nation faces an emergency and the differences in money levels have existed for a long period and have not become adjusted; and

Whereas nations whose currencies are depreciated are able to ship merchandise into the United States, pay the existing tariffs, accept American currency in payment, and to make a greater profit on their merchandise than if sold in their own markets; and

Whereas such importations from more than 40 nations of the world into the United States under the existing depreciated-currency conditions has the effect of not only eliminating all tariff structures but of enabling such merchandise to be sold at such a low price in the markets of the United States as to handicap and paralyze American industry and increase unemployment, and the industries of the United States are facing bankruptcy and destruction; and

Whereas we believe that unless this legislation is immediately passed, chaos and ruin threaten the financial and governmental structure of the United States; and

Whereas Congressman SAMUEL B. HILL, of the State of Washington has introduced in the present session of Congress H. R. 13999, the official title of which is: A bill "To prevent loss of revenue, to provide employment for American labor, and to maintain the industries and agriculture of the United States against the effects of depreciation in foreign currencies"; and

Whereas the delay in enacting this bill into law at the present session of Congress is causing continued and alarming increase in unemployment in our industries, American industry and agriculture are being seriously harmed, and in many instances ruined, by this disastrous new form of competition, which is forcing hundreds of thousands of workmen to sacrifice their jobs; and

Whereas the Government of the United States is being deprived of vast customs revenue under existing conditions; and

Whereas equalization measures must be adopted to preserve American jobs for American workmen: Now therefore be it

Resolved, That the Senate and House of Representatives of the State of Washington respectfully urge the present Congress now in session, and the President of the United States, to promptly enact into law H. R. 13999: And be it further

Resolved, That this memorial be immediately transmitted to the proper offices and committees of the United States Senate and House of Representatives, and a copy sent to each of the Representatives and Senators representing the State of Washington in the United States Congress; and be it further

Resolved, That this memorial be immediately forwarded to the legislatures of all the States of the United States requesting that they pass and present similar memorials to Congress:

And your memorialists will ever pray.

Passed the house January 18, 1933.

GEO. F. YANTIS,
Speaker of the House.

Passed the senate January 19, 1933.

VICTOR A. MEYERS,
President of the Senate.

The VICE PRESIDENT also laid before the Senate the following concurrent memorial of the Legislature of the State of Utah, which was referred to the Committee on Post Offices and Post Roads:

THE STATE OF UTAH,
OFFICE OF THE SECRETARY OF STATE,
Salt Lake City, January 21, 1933.

Hon. CHARLES CURTIS,
Vice President of the United States,
Senate Chamber, Washington, D. C.

MY DEAR MR. CURTIS: I have the honor to transmit to you herewith copy of Senate Concurrent Memorial No. 1, memorializing

the Congress of the United States to pass—and the President to approve—a bill authorizing an appropriation of $125,000,000 for highway construction.

Very respectfully yours,

M. H. WELLING, *Secretary of State.*

STATE OF UTAH,
OFFICE OF SECRETARY OF STATE.

I, M. H. Welling, secretary of state of the State of Utah, do hereby certify that the following is a full, true, and correct copy of Senate Concurrent Memorial No. 1, by Mr. Booth, entitled "Memorializing Congress to appropriate to Federal aid for highways," as passed by the Legislature of the State of Utah on January 18, 1933, and approved by Governor Henry H. Blood on January 19, 1933, as appears on file in my office.

In witness whereof I have hereunto set my hand and affixed the great seal of the State of Utah at Salt Lake City this 20th day of January, 1933.

[SEAL.] M. H. WELLING,
Secretary of State.

Memorializing the Congress of the United States to pass, and the President to approve, Senator Oddie's (of Nevada) bill authorizing appropriation of $125,000,000 for highways.

Be it resolved by the Legislature of the State of Utah (the governor concurring therein), That—

Whereas the Oddie bill authorizing the appropriation of $125,000,000 for Federal aid for highways, which has recently passed the Senate, will aid materially toward the completion of the at present incomplete Federal highway system in this and other States, and will make possible creating work for large numbers of our citizens now unemployed, we therefore respectfully urge the House of Representatives to pass, and the President to approve said bill that the provisions thereof may become effective at an early date; be it further

Resolved, That the secretary of state forward certified copies of this memorial to the President of the United States and Speaker of the House of Representatives, and to Utah's delegation in Congress.

The VICE PRESIDENT also laid before the Senate a resolution adopted by the Men's Bible Class of the Presbyterian Church of White Plains, N. Y., favoring the passage of the bill (H. R. 12044) for the exclusion and expulsion of alien communists, which was ordered to lie on the table.

He also laid before the Senate a resolution adopted by the Merchant Tailors Society of the City of New York, N. Y., favoring the balancing of the Budget, reductions in governmental expenditures, elimination of hospitalization or medical attention to war veterans with non service-connected disabilities, the taxation of the incomes of Government officials, a fair and equitable foreign-debt settlement, and the repeal of the prohibition laws, which was ordered to lie on the table.

He also laid before the Senate a resolution adopted by Sangamon Post, No. 32, the American Legion, Department of Illinois, of Springfield, Ill., favoring the maintenance of national defenses upon the same standard at least as now existing, and urging a continuation of citizens' military training camps, which was referred to the Committee on Appropriations.

Mr. BLAINE presented a paper in the nature of a petition of the Milwaukee City (Wis.) Council of Parent-Teacher Associations, praying for the passage of the so-called George bill, being Senate bill 5263, to amend the powers of the Reconstruction Finance Corporation so as to enable States, counties, municipalities, and school boards to borrow funds for the maintenance of the public schools, which was referred to the Committee on Banking and Currency.

Mr. DAVIS presented a resolution adopted by the Lackawanna Railroad Veterans Association, in meeting assembled at Scranton, Pa., representing members in the States of New Jersey, New York, and Pennsylvania, opposing the ratification of the Great Lakes-St. Lawrence deep-waterway treaty, which was referred to the Committee on Foreign Relations.

Mr. HULL presented a memorial, numerously signed, of sundry citizens of the State of Tennessee, remonstrating against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, and favoring the making of necessary appropriations for the enforcement of the eighteenth amendment, which was ordered to lie on the table.

Mr. CAPPER presented petitions of sundry citizens of Kansas City and Wellington, all in the State of Kansas, remonstrating against the repeal of the eighteenth amendment to the Constitution, or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

He also presented resolutions adopted by the Woman's Home Missionary Society of Manhattan; the Young Woman's Christian Association of Kansas City; and local chapters of the Woman's Christian Temperance Union of Bird City, Burns, Climax, Caldwell, Hugoton, Manhattan, Morland, Natoma, Uniontown, and Woodston, all in the State of Kansas, favoring the passage of legislation to regulate and supervise the motion-picture industry, which were ordered to lie on the table.

Mr. GRAMMER presented the petition of the North End Woman's Christian Temperance Union of Tacoma, Wash., praying for the prompt ratification of the World Court protocols, which was ordered to lie on the table.

He also presented the petition of the North End Woman's Christian Temperance Union of Tacoma, Wash., praying for the passage of legislation to regulate and supervise the motion-picture industry, which was ordered to lie on the table.

He also presented a resolution adopted at a community meeting of citizens of Kennewick, Wash., protesting against the repeal of the eighteenth amendment of the Constitution, or the modification of the national prohibition law, which was ordered to lie on the table.

Mr. COPELAND presented a resolution adopted by Down Town Post, No. 64, American Legion, of Buffalo, N. Y., remonstrating against the elimination or reduction of appropriations for the citizens' military training camps, which was referred to the Committee on Appropriations.

He also presented a resolution adopted by the National Guard Association of the State of New York, at Troy, N. Y., remonstrating against proposed reductions in appropriations for the National Guard, which was referred to the Committee on Appropriations.

He also presented a memorial of citizens of Fulton, N. Y., remonstrating against any reduction in the personnel of the Marine Corps, which was referred to the Committee on Appropriations.

He also presented a petition of citizens of Utica, N. Y., praying for the enactment of legislation effecting economies in governmental expenditures except for the national defense, and also the imposition of a sales tax, and remonstrating against the enactment of legislation proposing currency inflation; which was referred to the Committee on Banking and Currency.

He also presented a resolution adopted by the Dairymen's League Cooperative Association, of Le Roy, N. Y., favoring the revaluation of the dollar to a level more in keeping with that at which most debts were contracted, which was referred to the Committee on Banking and Currency.

He also presented a resolution adopted by the board of trustees of the village of Scotia, N. Y., favoring the enactment of legislation providing for the issuance of national currency to municipalities on the pledge of their bonds, which was referred to the Committee on Banking and Currency.

He also presented a resolution adopted by Harry B. Bentley Post, No. 443, American Legion, of Elmira, N. Y., favoring the use of American materials, labor, and contractors on the Boulder Dam project, which was referred to the Committee on Irrigation and Reclamation.

He also presented a resolution adopted by the New York Government Workers' Council and members and friends of the National Woman's Party, of New York City, N. Y., favoring the adoption of a measure providing equal rights to men and women, which was referred to the Committee on the Judiciary.

He also presented a resolution of the Council of the city of Rochester, N. Y., favoring the removal of restrictions applying to municipalities in the construction of Federal highways, which was referred to the Committee on Post Offices and Post Roads.

He also presented a resolution adopted by the Brotherhood of Locomotive Firemen and Enginemen, Lodge No. 316, of Omega, N. Y., favoring the passage of Senate bill 5125, to

provide for cooperation by the Federal Government with the several States in relieving the hardship and suffering caused by unemployment, and for other purposes, which was ordered to lie on the table.

He also presented memorials of sundry citizens and organizations of the State of New York, remonstrating against the repeal of the eighteenth amendment to the Constitution or the modification of the national prohibition law, which were ordered to lie on the table.

THE APPLE INDUSTRY AND TRADE BARRIERS

Mr. COPELAND. Mr. President, the apple growers of this country are in great distress. This morning I received a telegram from Mr. R. G. Phillips, secretary of the International Apple Association. I understand a number of other Senators, including the Senator from Idaho [Mr. BORAH], have received similar communications; and to save the time of the Senate, I ask that this telegram may be printed in the RECORD and referred to the Committee on Finance.

There being no objection, the telegram was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

ROCHESTER, N. Y., *January 28, 1933.*

Hon. ROYAL S. COPELAND,
Senate Office Building, Washington, D. C.:

Apple industry United States vitally dependent on maintaining foreign outlets, otherwise means laying ax to thousands of trees. Our exports have ranged up to over 4,000,000 barrels and nearly 11,000,000 boxes, constituting 19 to 21 per cent of our strictly commercial crop. Apple exports rank third among unmanufactured agricultural commodities, being exceeded only by wheat and raw cotton, and sixteenth among all exports. We were never confronted with so great trade barriers as to-day, which are paralyzing apple industry this country. This continuation international economic warfare is suicide, hence we emphatically object to House bill 13999 and all similar measures which in effect raise our tariffs against our best customers. We can not constantly slap rest of world in face and survive. We must be willing to receive in order to sell. It is fervently to be hoped that the absolutely vital question of war debts, world monetary situation, and trade barriers will be settled by friendly agreement rather than add to present disaster by raising tariffs and creating further economic warfare. It is time to call a halt on economic follies, otherwise United States producers, geared to world markets for a century, will suffer staggering capital losses. This association is composed leading apple shippers, cooperative associations, outstanding growers, wholesalers, and distributers from coast to coast, and located in all important United States producing and distributing sections.

INTERNATIONAL APPLE ASSOCIATION,
R. G. PHILLIPS, *Secretary.*

PROHIBITION AND LAW ENFORCEMENT

Mr. SHEPPARD. Mr. President, I present a number of telegrams and other communications in the nature of memorials remonstrating against the repeal of the eighteenth amendment and the Volstead law. I also submit a typewritten summary of these documents, which I ask the privilege of having printed in the RECORD, and that the summary and accompanying memorials lie on the table, the joint resolution reported from the Committee on the Judiciary being on the calendar.

The VICE PRESIDENT. Without objection, the order will be entered.

The summary, telegrams, and communications in the nature of memorials were ordered to lie on the table, and the summary was ordered to be printed in the RECORD, as follows:

1. From O. C. Crow, secretary mass meeting held Sunday, December 18, 1932, at San Benito, Tex., representing 7,000 members, Methodist, Baptist, Presbyterian, and Christian Churches of Cameron County, Tex.

2. From W. W. Lee, C. P. Owen, and C. W. Harrison, committee representing union meeting pastors of Protestant churches from four counties comprising lower Rio Grande Valley, held December 19, 1932.

3. From H. E. Draper, presiding elder Brownsville District, Methodist Episcopal Church, South, in behalf of Methodist ministers, Brownsville (Tex.) District, in session December 20, 1932, representing all Methodist churches and their constituency in the Rio Grande Valley.

4. From Rev. J. W. Hassell, president, and Mr. S. L. Cole, secretary, the United Forces for Prohibition, Guadalupe County, Tex., representing mass meeting at Seguin, Tex., December 18, 1932, of citizens of Seguin and Guadalupe County.

5. From Mrs. O. A. Mills, chairman, and Mrs. N. C. King, secretary, presenting resolutions adopted by the fourth quarterly zone meeting of the Uvalde Zone, Uvalde District, Woman's Missionary Society, Methodist Episcopal Church, South, at Uvalde, Tex.

6. From Rev. Marcus M. Chunn, pastor Herring Avenue Methodist Church, Waco, Tex., representing Methodist Orphan Home at Waco.

7. From W. H. Carder, W. J. Earles, and J. A. Dekle, representing Medina River Baptist Association, consisting of Kerr, Kemble, Bandera, and Gillespie Counties, Tex.

8. From Rev. Frank Eddy, Madden, pastor First Methodist Episcopal Church; Rev. Phil E. Chappell, pastor Asbury Methodist Episcopal Church; Rev. I. L. Yearly, pastor First Baptist Church; Rev. H. A. Bassett, pastor Orchard Park Methodist Episcopal Church; Rev. Westor R. Smith, pastor First Presbyterian Church; Rev. Arthur C. Hyde, pastor First Christian Church; Rev. R. L. Evans, pastor Trinity Methodist Church; Rev. Marshall Dawson, pastor First Congregational Church; Rev. Albert H. Schuake, pastor St. Paul's Lutheran Church; Rev. J. H. Walker, pastor Fort Boulevard Methodist Church; Rev. J. Fred Cole, pastor Grandview Baptist Church; Rev. A. G. Becker, pastor Altura Presbyterian Church, U. S. A.; Mr. J. N. Hooey; Mr. W. B. Gray; and Mr. Alfred Heininger; all of El Paso, Tex.

9. From Mrs. George W. Jones, legislative chairman Protestant Women's Association of San Antonio, Tex., representing regular meeting of that association on November 18, 1932.

10. From Rev. W. W. Jewell, pastor First Christian Church; Rev. Ed. Reeve, chairman of committee, First Baptist Church; and Rev. W. A. Hitchcock, pastor First Methodist Church, all of Stratford, Tex., representing their respective churches in that city.

11. From J. L. Taylor and Mrs. Naomi Huguelet, representing the Anti-Alcoholic League of Forreston, Tex.

12. From Miss Lois Pinson, Miss Virginia R. Williamson, and Mr. Lon Oakley, representing Methodist young people of the Greenville district, north Texas conference, in session at Mesquite, Tex., November 20, 1932.

13. From Rev. Warren T. Whiteside, chairman, and Arthur L. Losby, secretary, representing ministers and district stewards of Southern Methodist Churches of Greenville district, north Texas conference.

14. From Rev. W. E. B. Lockridge, chairman of mass meeting of church people and citizens of Terrell, Tex., held December 4, 1932.

15. From R. T. Ellis, secretary Texas State Teachers Association, assembled in convention at Fort Worth, Tex., November 26, 1932.

RESOLUTIONS OF TEXAS SHEEP & GOAT RAISERS ASSOCIATION

Mr. SHEPPARD. Mr. President, I present for publication in the RECORD and for appropriate reference resolutions adopted by the Sheep & Goat Raisers Association of Texas at their recent annual meeting at Del Rio, Tex., December 16, 1932.

There being no objection, the resolutions were referred to the Committee on Banking and Currency and ordered to be printed in the RECORD, as follows:

Resolutions adopted by Sheep and Goat Raisers' Association of Texas at recent annual meeting at Del Rio, Tex., December 16, 1932

FEDERAL LAND BANKS

Whereas the joint-stock land banks of the country have been unable to make any new loans for over two years past for reasons more or less generally known; and

Whereas this condition has resulted in making the Federal land banks the only source of credit for new land loans; and

Whereas the stipulation in the law limiting the maximum amount of any loan permitted by the Federal land banks to any one individual to $25,000 works a distinct hardship on landowners needing assistance; and

Whereas the law also provides that the combined aggregate amount of money loaned to any individual by the Federal land banks and the joint-stock land banks shall not exceed $50,000, which results in the fact that no borrower owing $50,000 to the joint-stock land bank can borrow anything at all from the Federal land banks regardless of security offered: Therefore be it

Resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention at Del Rio, Tex., on December 16, 1932, That we petition Congress to amend the law to enable the Federal land banks to make loans regardless of the amount of the borrower's debt to the joint-stock land bank, and that the maximum limit of loans permitted to be made by the Federal land banks to any individual be increased to $100,000, providing the security offered is acceptable.

IMPORTING LIVESTOCK UNDER BOND

Whereas it has been brought to our attention that large numbers of livestock are being brought into the United States from Mexico under bond and without paying any import duty thereon, representation being made that such livestock will be reexported; and

Whereas it is our belief that the intention of the importers of said stock is by some manner to be released from the payment of import duties on said stock, or that some future modification of the tariff law will become retroactive, thereby releasing said stock duty free: Therefore be it

Resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention at Del Rio, Tex., on December 16, 1932, That we most emphatically condemn such practice; that we urge the collector of customs to be most cautious in seeing that

proper duties are assessed against all such livestock and collected before any bonds are released; and be it further

Resolved, That we petition the Congress to amend the tariff act to prevent in the future any livestock from being admitted to this country under bond, but that payment of all duties be made when livestock is crossed over the border.

GOVERNMENT AID LIMITED TO DOMESTIC LIVESTOCK

Be it resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention at Del Rio, Tex., on December 16, 1932, That, whether or not it has been done in the past, or whether or not it is being contemplated at present, we heartily disapprove of money being loaned by any governmental institution, or any institution receiving direct aid from the Government, to any person, firm, or corporation on imported livestock or for the purpose of buying livestock imported into this country either before or after said stock might be imported, it being our view that all financial aid extended by the Government would be confined to the purchase and/or carrying of domestic livestock; and be it further

Resolved, That laws be passed or amended by Congress, or regulations be issued by the heads of all such governmental institutions embodying the idea herein expressed.

REDUCTION OF CHARGES

Whereas livestock prices have been extraordinarily reduced in the last three years, and all ranchmen are making supreme efforts to reduce expenses to an absolute minimum: Therefore be it

Resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention at Del Rio, Tex., on December 16, 1932, That we respectfully and urgently request the various stockyards companies and commission firms at the central markets to reduce their charges for handling and selling our livestock in proportion to which our income has been reduced; and be it further

Resolved, That we petition the railroad companies to reestablish the privilege, recently withdrawn, of allowing buyers of livestock at central markets to reship livestock bought at the through rate from point of origin to point of destination, this privilege being commonly known as the change-of-ownership rule; and be it further

Resolved, That the railroads reduce their charge for bedding cars to a cost commensurate with the services rendered and that they make no charge whatsoever for cars that are not freshly rebedded.

STATE RANGERS

Whereas the livestock men of west Texas have for years carried on a battle against stock thieves, which activity, we believe, belongs to the police authorities of the State; and

Whereas this association includes among its members sheep and goat raisers from over 100 counties of the State: Therefore be it

Resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention at Del Rio, Tex., on December 16, 1932, That we petition the Governor of the State of Texas to grant commissions of sergeants in the State rangers force to two men to be selected by the president of this association, said rangers to be paid by the State but to be subject only to orders of the president of this association, their entire duties being to work for the prevention of and the detection of the theft of sheep and goats.

DUES

Whereas the activities of the Texas Sheep and Goat Raisers' Association have in the 17 years of its existence proven the worth of this association in preventing losses and making savings for its members in ways already well known; and

Whereas the association is dependent entirely for its income upon dues voluntarily paid by its members; and

Whereas this source of income has been reduced to the point where the association's activities are nearly paralyzed because of the inability of most of its members to continue paying said dues: Therefore be it

Resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention at Del Rio, Tex., on December 16, 1932, That we respectfully urge the Federal intermediate-credit bank, the regional agricultural-credit corporation, commercial and private banks and loan companies to recognize dues to this association as a legitimate item of expense, and that borrowers from these institutions be permitted to include said dues in their allowances or budgets which are being allowed said borrowers for their running expenses.

BURNS AND POISON WEEDS

Be it resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That we hereby petition our State legislature to pass the necessary laws compelling the highway commission, counties, railroad companies, pipe-line companies, and all other persons or concerns owning fenced right of way, to keep it free and clear of all cockle burrs, grass burrs, sand burrs, bitterweed, beggar lice, hoarhound, loco, and all other poisonous or obnoxious vegetation that might be harmful to ranch and/or farm land.

BLOWFLIES

Be it resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That we petition our State legislature to pass laws providing for the cleaning up of this State of the worst known pest to the livestock men, viz, the blowfly; and be it further

Resolved, That the president of this association appoint a special committee which shall have for its sole purpose the framing and furthering the above-mentioned legislation.

AD VALOREM TAX

Whereas land has always been the prime source of governmental revenue from taxation; and

Whereas this policy has materially contributed to the burden which is now bearing down the landowner unto annihilation: therefore be it

Resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That we recommend that a sales tax be levied in place of the State ad valorem tax on property, but that neither sales nor income tax be levied unless the State ad valorem on land be removed; that only county and lesser governments place a tax on land and that these governments see to it that all personal property, especially investments such as notes, stocks, bonds, etc., bear its just share of taxation; and be it further

Resolved, That no State or other boards, commission or body of any kind be established which will displace or usurp the tax valuing, assessing or levying powers of the county commissioners.

STATE GASOLINE TAX LAW

Whereas it has come to our attention that there is a movement on foot to repeal that portion of the State gasoline tax law which exempts from said tax all gasoline not used for propelling vehicles over the highways: Therefore be it

Resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That we strenuously oppose the repeal of that section of the law.

ADDRESS OF ROGER GILLIS

Be it Resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That Judge Roger Gillis, of Del Rio, Tex., is hereby requested to reduce to writing the very excellent address which he made at the opening session of our convention and that such writing be either an abstract or an extension of his remarks, as he so desires.

AGRICULTURAL MARKETING ACT

Whereas as a result of the passage of the agricultural marketing act of 1929, numerous marketing and financing agencies have been set up which have been and are at the present time rendering a distinct service to the livestock interests of the country, and

Whereas the repeal of this act would most likely result in the immediate liquidation of these various agencies, and

Whereas such liquidation would work undue hardships, not only upon the direct borrowers from these agencies, but would be reflected to the entire livestock industry: Therefore, be it

Resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That we distinctly oppose the repeal of this act, but on the contrary we commend the act and believe it to be the most constructive piece of agricultural legislation ever enacted by Congress. We recommend its continuance in its present form, except in such instances, such as the stabilization clause, where experience has demonstrated its failure to obtain appropriate results beneficial to agriculture. We maintain that any and all amendments to this act should be made by its friends rather than by its enemies.

APPRECIATION

Be it resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That our sincere appreciation and thanks go forth to the people of Del Rio, the Del Rio Chamber of Commerce, the Roswell Hotel, and to all contributing organizations and persons for their efforts in making our seventeenth annual convention a most enjoyable and successful one, and

Be it further resolved, That our sincere thanks are also extended to our president, T. A. Kincaid, and to our secretary, E. B. Baggett, for their work, not only during the convention, but throughout the past 18 months.

ILLNESS OF SAM H. HILL

Be it resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That we are extremely grieved over the illness of our worthy member and friend, Sam H. Hill, and that we hereby extend to him our most earnest wishes for his speedy recovery, Mr. Hill being our only life member.

JUDGE JAMES CORNELL

Be it resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That we extend our heartfelt thanks and appreciation to our worthy and esteemed member and friend, Judge James Cornell, for his untiring efforts and faithfulness in behalf of this association and livestock men generally.

PRICKLY PEAR

Be it resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention, at Del Rio, Tex., on December 16, 1932, That we commend the activities of the committee appointed to act on the control of prickly pear, and that we urge that they redouble their efforts along this line, and if necessary, to secure the assistance of the agricultural and mechanical college.

RESOLUTIONS PASSED BY NATIONAL WOOL GROWERS ASSOCIATION

Be it resolved by the Sheep and Goat Raisers' Association of Texas, assembled in annual convention at Del Rio, Tex., on December 16, 1932, That we approve and adopt as our own the following resolutions adopted by the National Wool Growers Association at their sixty-eighth annual convention, held in Portland, Oreg., December 10, 1932:

The tariff

Consideration of the question of import duties upon foreign products must always recognize and be based upon the fostering and encouragement of promotion of all lines of agricultural production. This is essential not only in the interest of our rural population, but because of the great dependence of factory industry, transportation, and all lines of commerce upon the purchasing ability of those engaged in agriculture and livestock production.

We consider that the effectiveness of present import duties upon foreign agricultural products imported into the United States has largely contributed to the maintenance of a somewhat better economic business condition in the United States than has prevailed in many other countries.

The leaders of the incoming administration have assured the American farmer and livestock producer of their belief in the necessity of continuing import duties upon agricultural products. We urge upon President-elect Roosevelt, his official family, and the Seventy-third Congress that import duties on agricultural products be maintained upon a level no lower than that of the rates now prevailing.

We urge that these rates be maintained upon all livestock and meat products and upon wools (and mohair) imported in the raw or manufactured condition. It is also our belief that the raw wool (and mohair) duty should continue to be levied as a specific duty upon the clean content basis.

In consideration of tariffs as a source of revenue we suggest that duties might be levied upon wools (and mohair) imported for use in the making of carpets and floor coverings. We also suggest that examination be made of the probability of our domestic wools (and mohair) being used in carpet making and the inclusion of carpet wools (and mohair) under similar rates of duty as provided for clothing wools (and mohair).

Finance

Reconstruction Finance Corporation: We most heartily commend the Seventy-second Congress for having established the Reconstruction Finance Corporation. The acceptance and carrying by this corporation of a large amount of livestock and agricultural loans has been of untold value to those industries and to the whole country.

The further financial service of carrying such loans through regional agricultural-credit corporations and the Reconstruction Finance Corporation has given most timely support in some districts that could not have been furnished by any other agencies.

In other districts the policy of making it very difficult to obtain loans has not been in accord with what we believe to be the intent of the law by which these corporations were created.

We ask for a definition in the law as to what shall be accepted as "full and adequate security" and for a more liberal and reasonable attitude on this point on the part of the credit corporations and the Reconstruction Finance Corporation.

Intermediate-credit banks: Less than $100,000,000 of livestock loan paper was being held on December 31, 1931, by the nine Federal intermediate-credit banks in operation in the Western and Southwestern States. The fact that this comparatively small proportion of the total of this class of paper was so securely held protected livestock credits until the resources of the Reconstruction Finance Corporation were made available.

It is painfully apparent, as it also was in 1920, that the livestock industry can not safely rely upon ordinary commercial banks of deposit handling only 90-day paper for the financial service essential to protection. Future safety depends upon the handling of the main part of our livestock paper by agencies not subject to withdrawal of deposits and the necessary calling of loans. To provide this financial security a large increase is necessary in the capital structure of livestock-loan companies and agricultural-credit corporations that discount with intermediate-credit banks. This requirement is temporarily provided under the Steiwer-Carey amendment to the emergency relief and construction act of 1932, approved July 21, 1932.

We favor the enactment of such legislation as may be required for the continuation of this large-scale service which, in the public interest, is essential to efficient agricultural and livestock production under normal conditions.

Interest rates

Considering the present level of commodity prices and their relation to cost of sheep production, we find that the highest fixed charges to-day, other than taxation, are interest rates. Taxes of the Federal, State, and county governments are being reduced 25 to 50 per cent. We emphatically urge reduction in interest charges on the same basis.

Taxation

In the spirit of fairness, we realize that in order to contribute to the general movement toward tax reduction not only agriculture but all lines of business, and all persons generally must be willing to accept their proportionate share in cuts of Federal and State appropriations affecting them. We subscribe to this theory and are willing to accept our pro rata share of such cuts, but demand consideration for agriculture to the extent that Federal and State appropriations for agricultural purposes be not reduced in greater proportion than appropriations for all other purposes—that agriculture be not forced to stand all or the greater part of reduced appropriations.

Legislation

We instruct our officers to carefully investigate all new ideas proposed for legislation affecting agriculture, such as the so-called domestic-allotment plan and others, and take such steps as they deem necessary to fully protect the interests of the sheep and goat industry.

Commission merchants

We instruct our national officers to seek the enactment of a Federal law requiring wool (and mohair) merchants doing a commission business to be licensed and bonded under rules and regulations prescribed by the Department of Agriculture.

WATER RESOURCES OF THE SAN PEDRO RIVER

Mr. ASHURST presented a resolution adopted by the Douglas (Ariz.) Chamber of Commerce and Mines, which was referred to the Committee on Irrigation and Reclamation and ordered to be printed in the RECORD, as follows:

Whereas Senator HENRY F. ASHURST has introduced Senate Resolution 292 on December 7, 1932, providing for a subcommittee of the Senate Committee on Irrigation and Reclamation to come to Arizona and investigate the practicability of utilizing the water resources of the San Pedro River; and

Whereas we believe the said committee will find that the United States is justified in building a flood-control dam in said river near the Charleston station to the end that the agricultural resources of said river valley may be conserved and increased, and for the purpose of providing relief work for the citizens of this county not now employed; and

Whereas this organization, representing the business interests of Douglas and vicinity, welcomes any aid given the people of said valley, though outside of the immediate district: Now, therefore, be it

Resolved, That we commend the action of Senator ASHURST, thank him for his solicitude, and urge him and our congressional delegation to secure the adoption of said resolution; that a copy hereof be transmitted to each of the Arizona delegation.

DOUGLAS CHAMBER OF COMMERCE AND MINES,
[SEAL.] H. A. WIMBERLEY, *President,*
E. W. BROWDER, *Secretary.*

Adopted January 18, 1933.

PROHIBITION AND THE EIGHTEENTH AMENDMENT

Mr. WALSH of Massachusetts. Mr. President, I present and ask to be printed in the CONGRESSIONAL RECORD memorials from the American Temperance Society of Seventh-day Adventists of Worcester, Mass.; the Southern New England Conference of South Lancaster, Mass.; and from the Plymouth County Neighborhood Convention of Churches in federated meeting with the Woman's Christian Temperance Union of Middleboro, Mass., in opposition to the modification of the Volstead Act or the repeal of the eighteenth amendment to the Constitution.

There being no objection, the memorials and papers were ordered to lie on the table and to be printed in the RECORD, as follows:

AMERICAN TEMPERANCE SOCIETY
OF SEVENTH-DAY ADVENTISTS,
Takoma Park, Washington, D. C., January 26, 1933.

The Hon. DAVID I. WALSH,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR: I am inclosing in this a petition to Congress which was passed in a meeting at Worcester, Mass., on January 17, and also the signatures of a number of citizens of Massachusetts, protesting against the repeal of the eighteenth amendment. We

are requested to send these to you. Will you please note them in the CONGRESSIONAL RECORD and refer them to the proper committee for consideration.

Sincerely yours,

C. S. LONGACRE.

PETITION TO CONGRESS

To the honorable the Senate of the United States:

We, the citizens of Worcester, Mass., in a mass meeting held January 17, 1933, do hereby petition your honorable body—

1. To enact no legislation changing the per cent of alcohol contained in legalized beverages as specified in the Volstead Act.

2. Not to enact the present beer bill, H. R. 13742.

3. Not to pass any act favoring the repeal of the eighteenth amendment.

The reasons we offer for said petition are:

a. Alcohol is a narcotic. It poisons the system, disqualifying the user for business; it paralyzes industries by unfitting the users thereof for the regular performance of work.

b. It impoverishes the families of the ordinary workmen, leaving in its wake sorrow, poverty, shame, and often complete ruin.

c. It endangers life. Twenty-six million automobiles and automobile trucks carrying millions of our people at high rates of speed make it imperative that only people should drive who do not use alcohol in any degree. What affects one driver seriously might not affect another, but the one affected is a menace to life and property.

Why should a great country like America stoop to raising revenue for the maintenance of its Government from the sale of alcoholic beverages which have in their use all the elements of waste, crime, and death?

In the name of humanity, social justice, and the general welfare, we beseech your honorable body not to give your support to this measure that would legalize the sale of intoxicating beverages.

S. LUNDSTROM, *Chairman.*
HELFRED J. JORGENSEN, *Secretary.*

PETITION OPPOSING BEER BILL

To the honorable the Senate of the United States, Greetings:

Believing (1) that the eighteenth amendment is the best solution to the liquor question yet advocated.

(2) That beer, as authorized in bill H. R. 13742, with 4 per cent alcoholic content according to volume, is intoxicating and therefore unconstitutional.

(3) That the free use of this beer would greatly endanger the public safety and general welfare in this speed age of travel.

(4) That it is to the best interest of the public to keep this Nation saloonless and sober, which will be impossible if this bill is enacted.

Therefore, we, the undersigned adult residents of Worcester, etc., State of Massachusetts, earnestly petition your honorable body not to pass H. R. 13742, or any other measure that would override the eighteenth amendment of the Federal Constitution, but, instead, employ means to make national prohibition more effective.

Helfred Jorgensen, Trinity Avenue, Worcester, Mass.; Seth Forsberg, 19 Arnold Road, Worcester, Mass.; A. K. Johnson, 19 North Street, Worcester, Mass.; B. G. Lundquist, 1 Breck Street, Worcester, Mass.; E. Norilborg, 30 Walnut Street, Auburn, Mass.; G. H. Anderson, 53 Trinity Avenue, Worcester, Mass.; Mrs. H. Anderson, 53 Trinity Avenue, Worcester, Mass.; S. Jorgensen, 53 Trinity Avenue, Worcester, Mass.; Mrs. H. Jorgensen, Trinity Avenue, Worcester, Mass.; Conrad J. Hagstrom, 15 Colby Avenue, Worcester, Mass.; Mrs. Lora Westerman, 237 Turnpike Road, Shrewsbury, Mass.; C. W. Westerman, 237 Turnpike Road, Shrewsbury, Mass.; Elder J. P. Johnson, 36 Bailey Road, Shrewsbury, Mass.; Mrs. J. P. Johnson, 36 Bailey Road, Shrewsbury, Mass.; Mrs. C. A. Johnson, 9 Tatman Street, Worcester, Mass.; Carl A. Johnson, 9 Tatman Street, Worcester, Mass.; Lennart Johnson, 9 Tatman Street, Worcester, Mass.; Karl Johansen, 63 Belmont Street, Worcester, Mass.; Alma Carlson, 1 Lund Street, Worcester, Mass.; Mrs. H. Wallman, 1 Lund Street, Worcester, Mass.; Miss Anna K. Johnson, 19 North Street, Worcester, Mass.; Mrs. Axel Glandt, 14 Kosta Street, Worcester, Mass.; Axel Glandt, 14 Kosta Street, Worcester, Mass.; August Andeberg, 233 Wachcuret Street, Holden, Mass.; Mrs. Nellie Anderberg, 233 Wachcuret Street, Holden, Mass.; Mrs. Hanna Carlson, 487 Burncoat Street, Worcester, Mass.; Mrs. Ellen Johansen, 63 Belmont Street, Worcester, Mass.

SOUTHERN NEW ENGLAND CONFERENCE,
South Lancaster, Mass., January 24, 1933.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SENATOR WALSH: May I register my protest against the present attempt in Congress to again legalize alcoholic drinks?

There may be a question as to which is the wisest road back to prosperity, but the liquor route surely is not one of them, for it always leads downward, never upward.

Our infallible guidebook reminds us: "Wine is a mocker, strong drink is raging, and whosoever is deceived thereby is not wise."

Also, "Woe unto him that giveth his neighbor drink and maketh him drunken." And again: "Woe unto him that buildeth his house by unrighteousness."

The Scripture pictures the work of those who manufacture and who sell intoxicating liquor. Their business means robbery. For the money they receive no equivalent is returned. Every dollar they add to their gains has brought a curse to the spender.

For the sake of gain the liquor seller deals out to his victims that which corrupts and destroys mind and body. He entails on the drunkard's family poverty and wretchedness. Keep it outlawed.

The inclosed leaflets furnish many additional reasons.

Respectfully yours,

F. BOHNER,
Home Missionary Secretary.

MIDDLEBORO, MASS., *January 11, 1933.*

The Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SENATOR: Whereas there is pending in Congress an act to legalize the sale of beer; and

Whereas this Commonwealth in the year 1870 did legalize such sales and subsequently repealed the same because of an increase of drunkenness: Therefore be it

Resolved, That we, the members of the Plymouth County Neighborhood Convention of Churches and the local Woman's Christian Temperance Union in a federated meeting do most urgently call upon our Senators at Washington to vote against the proposed measure and would call attention to the words of the Hon. Robert C. Pittman, for so many years a judge in our superior court, when he said, we quote: "It is clear that the governor was amply justified in declaring in his message that the so-called beer shop has come to mean a place where all kinds of intoxicating liquors are sold."

Very respectfully submitted.

KENELM WINSLOW.
JOSEPHINE L. KELLEY,
Secretary Woman's Christian Temperance Union, Middleboro, Mass.
DAVID B. HOWARD,
Secretary Plymouth County Neighborhood Convention.

PETITION OPPOSING BEER BILL

To the honorable the Senate of the United States, Greetings:

Believing (1) that the eighteenth amendment is the best solution to the liquor question yet advocated; (2) that beer as authorized in bill H. R. 13742, with 4 per cent alcoholic content according to volume, is intoxicating and therefore unconstitutional; (3) that the free use of this beer would greatly endanger the public safety and general welfare in this speed age of travel; and (4) that it is to the best interest of the public to keep this Nation saloonless and sober, which will be impossible if this bill is enacted. Therefore we, the undersigned adult residents of the State of Massachusetts, earnestly petition your honorable body not to pass H. R. 13742 or any other measure that would override the eighteenth amendment of the Federal Constitution, but, instead, employ means to make national prohibition more effective.

Mrs. Edith M. Wilkinson, Main Street, South Lancaster; Carl Kennedy, Main Street, Clinton; E. Grace Soper, Prescott Street, South Lancaster; R. C. Silvers, Main Street, South Lancaster; L. W. French, South Street, Westminster; R. H. Libby, Prescott Street, South Lancaster; Letha B. Wendell, Kilbourn Street, South Lancaster; C. A. Cutting, Pratts Junction Road, South Lancaster; Dora Smith, Narrow Lane, South Lancaster.

ENROLLED JOINT RESOLUTIONS PRESENTED

Mr. VANDENBERG, from the Committee on Enrolled Bills, reported that on to-day, January 28, 1933, that committee presented to the President of the United States the following enrolled joint resolutions:

S. J. Res. 239. Joint resolution authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and for other purposes; and

S. J. Res. 240. Joint resolution to provide for the quartering, in certain public buildings in the District of Columbia, of troops participating in the inaugural ceremonies.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WALSH of Montana:

A bill (S. 5544) authorizing the Secretary of Agriculture to adjust debts arising from loans made to farmers for seed, feed, and crop production, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. DILL:

A bill (S. 5545) granting a pension to Margaret Keefe (with accompanying papers); to the Committee on Pensions.

By Mr. GOLDSBOROUGH:

A bill (S. 5546) granting a pension to Milton Carroll Merryman; to the Committee on Pensions.

By Mr. HOWELL:

A bill (S. 5547) granting an increase of pension to Mary S. Miller; to the Committee on Pensions.

By Mr. BRATTON:

A bill (S. 5548) relating to livestock loans made by the Reconstruction Finance Corporation through its regional agricultural credit corporations; to the Committee on Banking and Currency.

By Mr. REED:

A bill (S. 5550) to provide for the removal of the monument to Casimir Pulaski from the triangle at Pennsylvania Avenue, Thirteenth Street, and E Street NW. to the east end of the triangle formed by Pennsylvania Avenue, E Street, and Fifteenth Street, in the city of Washington, D. C., and to authorize the appropriation therefor; to the Committee on Public Buildings and Grounds.

By Mr. HASTINGS:

A bill (S. 5551) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto; to the Committee on the Judiciary.

By Mr. DICKINSON:

A bill (S. 5552) to provide for the liquidation of joint-stock land banks, and for other purposes; to the Committee on Banking and Currency.

DATE OF MEETING OF SECOND SESSION OF THE CONGRESS

Mr. DILL. Mr. President, I desire to introduce a bill for reference to the Judiciary Committee, but before doing so I want to say a word about it.

The VICE PRESIDENT. Is there objection? The Chair hears none.

Mr. DILL. The bill is to fix the date of meeting of the second session of the Congress. With the adoption of the "lame-duck" amendment to the Constitution Congress will meet on January 3 of each year, unless Congress by law fixes another date. That will probably mean that we shall be in session every summer. It seems to me that we ought to provide by law that the second session shall begin some time in the fall. The bill which I introduce provides that the second session shall begin on the first Monday in October.

The bill (S. 5549) to fix the date of meeting for the second session of Congress was read twice by its title and referred to the Committee on the Judiciary.

CHANGES OF REFERENCE

On motion of Mr. THOMAS of Oklahoma, the Committee on Public Lands and Surveys was discharged from the further consideration of the bill (S. 5427) authorizing the Secretary of the Interior to purchase certain lands in Ottawa County, Okla., and it was referred to the Committee on Indian Affairs.

On motion of Mr. COPELAND, the Committee on Military Affairs was discharged from the further consideration of the bill (S. 5535) for the relief of certain Army officers whose household and other effects were damaged on Government property, and it was referred to the Committee on Claims.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated below:

H. R. 792. An act for the relief of William Joseph Vigneault;

H. R. 1177. An act for the relief of Peter E. Anderson;

H. R. 1936. An act for the relief of Sydney Thayer, jr.;

H. R. 2907. An act for the relief of Walter Sam Young;

H. R. 5548. An act for the relief of George Brackett Cargill, deceased;

H. R. 6409. An act for the relief of William Joseph LaCarte;

H. R. 7263. An act for the relief of Felix Maupin;

H. R. 7548. An act granting six months' pay to Ruth McCarn;

H. R. 9231. An act for the relief of George Occhionero;

H. R. 9326. An act for the relief of John E. Davidson; and

H. R. 9355. An act for the relief of David Schwartz; to the Committee on Naval Affairs.

H. R. 973. An act for the relief of John L. Dunn;

H. R. 2294. An act for the relief of C. A. Cates;

H. R. 2917. An act for the relief of Primo Tiburzio;

H. R. 3044. An act for the relief of Anthony Hogue;

H. R. 3045. An act for the relief of Gustav Welhoelter;

H. R. 6851. An act to reimburse Gottleib Stock for losses of real and personal property by fire caused by the negligence of two prohibition agents;

H. R. 7198. An act for the relief of the Boston Store Co., a corporation, Chicago, Ill.;

H. R. 8136. An act for the relief of John J. Moran;

H. R. 9336. An act for the relief of Emily Addison; and

H. R. 9457. An act for the relief of Sperry Gyroscope Co. (Inc.), of New York; to the Committee on Claims.

H. R. 3627. An act for the relief of James Wallace; to the Committee on Military Affairs.

AMENDMENT TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. ODDIE submitted an amendment intended to be proposed by him to House bill 13710, the Interior Department appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 45, line 21, after the semicolon, to insert the following:

"For construction of power transmission line and distribution system, Fallon Subagency, Walker River Agency, Nev., fiscal year 1934, $800."

AMENDMENT TO TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. HASTINGS (for Mr. HEBERT) submitted an amendment intended to be proposed by Mr. HEBERT to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 79, line 18, after the figures "16," to insert "(a)."

On page 80, beginning with line 8, to strike out through line 8 on page 82, and in lieu thereof to insert the following:

"(b) Section 319 of Part II of the legislative appropriation act, fiscal year 1933, shall not apply to any refund or credit allowed by the Commissioner of Internal Revenue prior to July 1, 1932, on account of an overpayment in respect of any internal-revenue tax. Appropriations for the payment of any such refund, as well as for the payment of interest upon any such refund or credit, shall be available for the payment of principal and interest computed in accordance with the laws with respect to interest in force at the time of the allowance of such refund or credit: *Provided, however,* That where such laws have been repealed by section 614 of the revenue act of 1928, interest shall be computed in accordance with the provisions of said section 614 of the revenue act of 1928.

"(c) Interest shall be allowed and paid upon any refund or credit allowed by the Commissioner of Internal Revenue subsequent to June 30, 1932, in respect of any overpayment of internal-revenue tax for any period prior to July 1, 1932, in accordance with the provisions of section 614 of the revenue act of 1928; and for any period after June 30, 1932, shall be allowed and paid in accordance with the provisions of section 319 of Part II of the legislative appropriation act, fiscal year 1933, approved June 30, 1932."

URGENT DEFICIENCY APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 14436) making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes.

Mr. BINGHAM. Mr. President, I hope we may proceed to the passage of the deficiency bill at the earliest possible moment. As I have previously stated, I withdraw my amendment in order that the bill may be passed promptly.

Mr. McKELLAR. Mr. President, it seems to me we ought to have a vote on it immediately.

The VICE PRESIDENT. The bill is open to amendment. If there be no amendment, the question is, Shall the bill be read a third time?

The bill was read the third time.

Mr. NORRIS. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. NORRIS. The deficiency bill is before the Senate?

The VICE PRESIDENT. It is, by unanimous consent.

Mr. NORRIS. Was the Treasury and Post Office appropriation bill laid aside?

The VICE PRESIDENT. It was laid aside last evening by unanimous consent.

Mr. NORRIS. Is the deficiency bill subject to amendment?

The VICE PRESIDENT. The third reading of the bill has been ordered, the bill has been read a third time, and therefore an amendment is not now in order.

Mr. KING. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. KING. I presume by unanimous consent or motion to reconsider the third reading an amendment might be tendered?

The VICE PRESIDENT. Certainly; by unanimous consent or motion to reconsider that might be done. The question is, Shall the bill pass?

The bill was passed.

POEM ENTITLED "FARM WOMAN TO THE EARTH"

Mrs. CARAWAY. Mr. President, I ask leave to have published in the RECORD a poem written by Mrs. Anna Flournoy Bassett, of Pine Bluff, Ark., entitled "Farm Woman to the Earth."

There being no objection, the poem was ordered to be printed in the RECORD, and it is as follows:

FARM WOMAN TO THE EARTH

My bondage years to you will soon be past,
They'll fold my hardened hands upon my breast,
And I shall lie within your arms at last,
In that still state men call eternal rest.
You have been a strange lover, Earth, to me—
You have asked all in time and strength and art;
And in return you have but let me see
A fleeting glimpse of what is in your heart.

I have not had the things that women crave—
The touch of silks, perfumes, and jewels bright;
But in the years when I have been your slave
I have seen dewdrops in the morning light,
And I have felt your warm, sweet breath arise
And with your changing under changing skies,
Earth, I was wedded to you, mind and soul.

Now when death makes you take me to your heart,
And I become at last a part of you,
Let cool, green leaves and fragrant blossoms start,
From my poor clay, and let their brilliant hue
Draw butterflies to me who served you well;
And as they greet the blossoms with a kiss,
Let me be living in the buds that swell.
This is my prayer: O Earth, you owe me this.

—Anna Flournoy Bassett.

RADIO ADDRESS BY JOHN A. SIMPSON ON FARM PROBLEMS

Mr. THOMAS of Oklahoma. Mr. President, I ask unanimous consent to have printed in the RECORD an address delivered to-day over the National Broadcasting Co.'s network by John A. Simpson, president of the National Farmers' Union.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

GREETINGS

While conditions are no better, even worse than they were a month ago, there is a ray of hope that March 4 big business will have to move out of the National Capitol and turn the keys to the departments of government over to the common people of this country.

The position taken by the President elect on a number of questions justifies this statement.

Big business and its controlled press was railroading a general sales tax through Congress. The President elect, in no uncertain terms, publicly announced that he was against a general sales tax. That announcement killed the sales tax.

The fight has been on ever since the war as to what disposition should be made of Muscle Shoals. Big business, on one side, was demanding the Government to turn it over to it. Senator George NORRIS, of Nebraska, leader of the opposition in all these years, has prevented that thing being done. The other day the President elect and Senator NORRIS visited Muscle Shoals, after which the President elect announced this project would be completed by the Government and that it would be his policy that all undeveloped natural power should be taken over by the Government.

These, and other indications of a better day, cause me to greet you at this hour with a smile in my voice, I hope.

TRIP WEST

The 12th of this month wife, daughter, and I motored to Oklahoma City to attend the annual State convention of the Farmers' Union, held in that place the 16th, 17th, and 18th.

For many months it has been the usual thing to see passenger trains speeding by with empty coaches and empty Pullmans. On this trip we met and passed a number of big transcontinental busses with not a passenger in them.

Likewise, we found a noticeable decrease in the number of cars on the road. In the whole 1,500 miles there was no traffic interference.

The only method of transportation on the increase is hitch hiking. We never before saw so many men, women, and children with their worldly possessions in a ragged suit case or in a bundle on a stick as we did on the trip this month.

On this 3,000-mile round trip visiting at the filling stations, the hotels, and with farmers at meetings we held, I was impressed with two things.

First. The revolutions over the country are increasing in numbers, in size, and in quality. There are many States now where the courts have revolted. In a meeting I addressed in the auditorium of the Central High School, Oklahoma City, two district judges voluntarily came to the stage and announced there would be no more foreclosures in their courts until the prices of farm crops were reasonable. Such revolutions on the part of the courts are occurring all over the country. I found legislatures in open revolution passing moratorium laws that violate the terms of contracts. I found the farmers organizing by counties for the purpose of preventing sales of mortgaged property. In some instances these farmers have prevented these sales by force. In most instances by persuasion. However, in both instances it is revolution.

Second. I found more, bigger, and better organizations using their own medium of exchange. All over the United States the people are being forced for lack of a medium of exchange to organize trading associations in which they use their own scrip. One of the largest of these organizations it has been my pleasure to visit is the Natural Development Association of Salt Lake City, Utah. They have more than 40,000 members, with a number of large stores in Salt Lake and other cities not only in Utah, but several other States. I found in one of these stores in Salt Lake that you could buy anything from pins to pianos. I found that with their scrip you could have operations from a shave to removal of your appendix. They have their own coal mines with a fleet of trucks that deliver. They have their own refineries that furnish them gas and lubricants. They have put to work many unemployed on a scale of wages much higher than the laborers who are paid in United States money. The farmers who deal with them are paid about double for their products what purchasers pay who pay in United States money. In a way, this is also revolution. No one has a right to issue a medium of exchange except Congress or by authority of Congress.

Oh, what an indictment this is of what our Government is doing. The people without work, hungry and cold because big bankers have had the power transferred to them of issuing money, and which they refuse to furnish.

When these organizations can put idle men to work, paying them bigger wages and increasing the price of farm products, it is conclusive evidence that what this Nation lacks is a volume of currency with which to do business.

The Cincinnati Enquirer says, "Congress is busy passing bills for Hoover to veto, and Hoover is sending over recommendations for Congress to throw into the wastebasket."

GRAFT DISCLOSURES

Since last month's talk over NBC there have been disclosures of graft here in Washington that stinks to high heaven. Congressman LOZIER, of Missouri, in a speech found in the CONGRESSIONAL RECORD of December 30, discloses grafting under the merchant marine act.

In all the history of the United States down to the present administration mail carried by ships has been paid for on a pound basis. The price has run on an average of 80 cents a pound. Under President Hoover's administration the steamship companies have secured contracts on a mileage basis. Under this plan some steamship companies, for carrying a pound of mail, have been paid $10,000. Remember, these same steamship companies borrow large sums of money of the Government, sometimes at less than 1 per cent interest.

The following are a few instances of the way the Post Office Department has allowed the taxpayers of this Nation to be robbed:

The Grace Steamship Line operates over ocean mail route 38, between Tacoma and Valparaiso, Chile. In the fiscal year 1931 this company, under contract made by the Post Office Department, was paid $238,500 for carrying 2,892 pounds of mail, which, under the weight system and standard rates would have cost the Government only $458.88.

The Lykes Bros. Steamship Co. (Inc.) operates steamers over ocean mail route 23, from Galveston to Santo Domingo, Haiti. In the fiscal year of 1931, under contract made by the Post Office

Department, this company was paid $317,916.50 for transporting 741 pounds of mail, which under the weight system and standard rates would have cost the Government only $194.64.

Under a contract with the Post Office Department the American West African Line operates over ocean mail route 47, between New Orleans and the West Coast of Africa. It made five voyages in the fiscal year of 1931, carrying only 133 pounds of mail. On a weight basis this service would have cost the Government only $42.32, but this subsidized shipping concern was paid $87,862.50 for transporting an armful of mail that weighed less than 2½ bushels of wheat.

The United States Lines has a contract with the Post Office Department for carrying mails over ocean mail route 44, between New York and London, a distance of 3,369 miles. Under this contract, and without regard to the amount of mail carried, this company is paid $20,214 for each voyage, or at the rate of $6 per mile for each outbound trip. On June 12, 1931, one of its steamers, *American Merchant*, sailed from New York with only 2 pounds of letters. Under the weight basis that prevailed before the enactment of the merchant marine act the cost of carrying 2 pounds of mail would have been only $1.60, but for transporting less than a handful of letters this subsidized shipping corporation was paid $20,214, or twelve thousand six hundred and thirty-three times the standard rates. Also, remember the United States Lines last year borrowed over $15,000,000 at less than 1 per cent interest.

One of the interesting features of this graft disclosure is the fact that Kermit Roosevelt is an officer in the Roosevelt Steamship Co., that participated beyond the dreams of avarice in this wholesale looting of the taxpayers of the Nation. It will be remembered that this is the family of ex-President Theodore Roosevelt, and members of which fought valiantly for the present administration in the last campaign. They were also overcareful to let it be known that the relation between their family and Franklin D. Roosevelt's was very distant.

THE FARMER COMPLAINS

The farmer complains because he does not get as fair treatment from his Government as other groups get. The steamship companies that we have been talking about get loans from the Government in large sums, millions of dollars on 20 years' time and some of it at less than 1 per cent interest. The Dollar Steamship Co. about a year ago obtained a loan of over $5,000,000, 20 years' time, at less than 1 per cent interest. By the way, Mr. Dollar is on of those fellows on top the mountain shouting, "Buy American." It has just recently been developed that some of his ships are manned entirely by Chinese working at very low wages, even as low as $7 a month.

The Government loans farmers, but usually at from 6 to 9 per cent interest.

The Government lends a billion five hundred million dollars to the railroads, insurance companies, and banks. While they are so generous with these institutions they hand out just a few millions to farmers.

The facts are, based on value of the industry, agriculture should have had half of the Reconstruction Finance Corporation's funds. They did not get 10 per cent.

For 26 years the marketing of transportation has been Government regulated on a basis of rates that cover cost of production, including interest on investment. Farmers can not secure the same treatment from the Government. That is the reason they complain.

THE FRAZIER BILL

For two years the Frazier bill has been pending before Congress. You should write to one of your United States Senators and ask for a copy of this bill. It is S. 1197. This bill provides that the Government shall refinance farm mortgages at 1½ per cent interest and 1½ per cent on the principal each year until the debt is paid. Legislatures of the following States have passed resolutions memorializing Congress to enact the Frazier bill into law: Montana, North Dakota, South Dakota, Minnesota, Nevada, Nebraska, Tennessee, Illinois, and Wisconsin. Copies of the bill have been sent to every member of the house and senate in every State where the legislature is in session.

To all of you listening in who would like to see this bill become a law, write to your members of the legislature demanding they vote to memorialize Congress.

If we could get 20 State legislatures to do this it would be almost certain Congress would pass the bill.

THE WHEELER BILL

Senator BURTON K. WHEELER has introduced a bill known as S. 2487. This bill provides for the remonetization of silver at the present ratio of 16 to 1. If the bill should become a law, it means that silver has the same privilege at the United States mints that gold now enjoys.

You should write your Congressmen and Senators to support and vote for this bill.

A little later in this program I shall discuss the Wheeler bill more fully.

JOIN THE FARMER'S UNION

At this particular time, I want to call your attention just as forcibly as I know how to the fact that the Farmers' Union is the only farm organization working for and supporting the Frazier bill, the Wheeler bill, and working for a farm bill that will give farmers cost of production for that portion of their crops consumed in this country.

If you can get another farm organization leader here in Washington to write you that their organization in national convention has indorsed the Wheeler bill, has indorsed the Frazier bill, or that they are supporting them or are supporting any bill that provides for getting farmers cost of production for their products, I will make the first one sending me such a letter a present of a $20 bill.

What I want you all to know is that the Farmers' Union organization is the only farm organization in the United States working for these measures. These measures are called radical and the Farmers' Union is a radical organization.

If you farmers listening in who are not members of the Farmers' Union want these bills to become laws, then join the organization that sponsored these bills and is working for their passage here in Washington. There is no other way for you to help put them over. If you are real conservative and think along the lines of international bankers that remonetization of silver is too radical, you have no business joining the Farmers' Union. You do not belong with us. If you feel like the Wheeler bill is a good thing there is just one way for you to help put it through Congress and get it signed by the President, and that is to join the Farmers' Union. If you believe like the big bankers, big insurance companies that 1½ per cent interest is too low a rate for farmers and that the Frazier bill is too radical a measure, then you have no business joining the Farmers' Union. If you feel like farmers are entitled to as much as railroads, power companies, and telephone institutions, that farmers are entitled to cost of production just like they receive in their rates, then you ought to join the Farmers' Union because it is the only way you can help to get such legislation. If you feel like farmers are not entitled to get cost of production as the big interests that handle grain, cotton, livestock, and other farm products think, if you feel that such legislation would be too radical for you to support, then you should not join the Farmers' Union. Farmers listening in, what I mean is that you have the opportunity of getting these things if you will only place yourselves in position by joining the Farmers' Union where you can ask for them. If you sit back at home refusing to join and such legislation is not passed you are the one to blame.

I talked along these lines in November and again the day before Christmas over National Broadcasting Co. Our national secretary, Mr. E. E. Kennedy, Kankakee, Ill., tells me we are beginning to get results. Those of you interested in organizing a local of the Farmers' Union in your neighborhood or become a member at large, write to our national secretary, E. E. Kennedy, Kankakee, Ill., for instructions. He will also tell you how Farmers' Union members are making their organization pay in dollars and cents by placing themselves in position where they can do collective bargaining. A Farmers' Union membership card is as much a part of farm equipment as the plow or the cultivator. Write to Mr. Kennedy and get your card now.

REMONETIZATION OF SILVER

Returning to the subject involved in the Wheeler bill, the remonetization of silver.

Silver and gold have been used as money from time immemorial. There is evidence of the use of silver and gold as far back as 3,000 years before Christ. On down through time the two metals worked side by side like a team of horses until 1816, when through deception and fraud the English Parliament was induced to demonetize silver.

The demonetization of silver in this country is known as the Crime of 1873.

Congressman Bright, who was a Member of the House of Representatives at that time, declared: "It passed by fraud, never having been printed in advance, being a substitute for the printed bill; never having been read at the Clerk's desk. It was passed without discussion. It was passed under such circumstances as escaped the attention of the ablest statesmen in Congress at that time. It is a fraud that will stink in the nose of posterity, and for which some persons must give an account in the day of retribution."

President Garfield, who was Congressman at the time, said: "Perhaps I ought to be ashamed to say so, but it is the truth to say that, I at that time being chairman of the Committee on Appropriations, and having my hands overfull during all that time with work, I never read the bill. I took it upon the faith of a prominent Democrat and a prominent Republican, and I do not know that I voted at all. There was no call of the yeas and nays, and nobody opposed the bill that I know of. It was put through as dozens of bills are, as my friend and I know, in Congress on the faith of the report of the chairman of the committees. Therefore I tell you, because it is the truth, that I have no knowledge about it."

General Grant, who was President at the time, afterwards declared, "I did not know that the act of 1873 demonetized silver. I was deceived in the matter."

It was indeed a crime. It turned the control of the basic money of the country completely into the hands of a few big bankers.

President Garfield also said, "Whoever controls the volume of money of any country is absolute master of all industry and commerce."

A study of the world supply of gold and silver reveals the fact that for the last 400 years production of these two metals has been at a ratio of about 14 to 1. This fact completely destroys the often-made statement that there is too much silver for the purposes of using all of it for money.

Another startling revelation is the fact that in all the world there is only $11,000,000,000 of gold money. It is utterly impossible for the world to pay its debts and do the business of the world with only $11,000,000,000 of basic money. Certainly everyone agrees that with rapid transportation of 1933, with the vast production of both raw and manufactured articles in 1933, and with the increased demand for a higher standard of living on the part of the peoples of every nation there should be a rapidly increasing volume of basic money. A search of records show a steadily decreasing production of gold ever since 1915.

The following editorial from the Philadelphia Evening Ledger in March, 1930, is in point: "Economists and statesmen have been worrying in recent years about the possibility of a shortage of gold. Last September the gold delegation of the financial committee of the League of Nations reported that the supply of new gold for monetary purposes will be inadequate by 1934 unless measures are taken in time to prevent the disaster. It was informally suggested this month that the use of gold in the arts be prohibited so that the amount available for use in trade might be increased.

"It has been argued that the decline in prices since the World War is due to the shortage of gold."

Economists everywhere agree that to take care of the increased business of the world gold production should increase each year at least 3 per cent. In the period between 1913 and 1930 under this estimate gold production should have increased 51 per cent. The facts are, that in that period of time it actually decreased 10 per cent.

In the last 12 months we have seen our Government try one plan after another to relieve the terrible depression that has covered the whole country. In every instance the result has been utter failure. We were told the moratorium would bring prosperity. It failed. We were told the Reconstruction Finance Corporation loans would bring prosperity. Complete failure again. Then we listened to the beautiful song entitled, "Anti-Hoarding." The results were nil. The last popular piece of music is entitled, "Buy American." It is just as silly as the song "Anti-Hoarding." We have tried taxing ourselves into prosperity. We have tried borrowing prosperity. We have tried singing prosperity. A year ago the Republicans and Democrats alike were blaming the high tariffs contained in the Hawley-Smoot bill. To-day the papers are claiming the tariffs are too low.

When will these statesmen learn the truth? When will they inform themselves why Canada can ship poultry and dairy products into this country to-day that she could not ship two years ago? When will they learn why Japan makes a large portion of the American flags used in the United States? When will they know why every nation on the face of the earth is paying the high tariff and then selling their goods to our people? There is just one reason. Our ignorant, criminal, big bankers, blinded by greed and avarice, refuse to concede that a nation with a high-priced dollar can purchase the products of other nations that have low-priced money, but can not sell their products to those nations with the low-priced money.

We boast about our high-priced gold dollar when it is the biggest enemy the people of this Nation have. It is the cause of many of these big fellows jumping out of the windows of tall buildings. It is the cause of nine-tenths of the murders and other crimes committed in this country. It is the cause of millions of people being idle, hungry, and cold. It is the cause of millions of farmers forced onto the highways, homeless, and without bread.

The Israelites in their most heathenish days never approached in degree the worship of gold as have the people of this Nation.

Remonetize silver to-morrow and China can buy of us, more than half the countries of the world can buy of us that now are barred from buying here. Remonetize silver to-morrow in order that we may trade with other nations, let this Government issue the paper money used in this country instead of giving that privilege to a handful of bankers and in 30 days we will be a happy people, knowing that prosperity is not just around the corner, but in our midst.

PRODUCERS OF RAW MATERIALS

Let me again remind you, as I have in former talks, that the producers of raw materials have a common interest. The producers of raw materials are the ones crushed in a time like this. If the producers of raw materials of this country, our agricultural products, lumber, coal, copper, and oil were receiving proper protection from their Government and profitable prices, there would be no such thing as unemployment.

The big interests of the country, the billionaires of our Nation, are the ones who prevent proper protection of our independent producers of this country. These billionaires own oil fields, forests, and coal mines in other countries and produce them with labor that costs in many places 10 cents a day and with low ocean freight rates made low by crooked mail contracts bring their cheap products in and crush our independents.

STATE LEGISLATION

Many of our State legislatures are in session. You should be watching all bills on taxation. You should be watching all appropriations. You should be watching the efforts of the railroads to legislate against the use of trucks, busses, and automobiles.

MOTOR LEGISLATION

A month ago I gave advance warning of the flood of bills that would be introduced in the various State legislatures designed to restrict and interfere with motor-vehicle transportation and to divert gasoline-tax funds to nonroad purposes. A brief review of the hundreds of bills of this kind that have been introduced in the past few weeks in the 43 State legislatures now in session confirms my worst fears. In nearly every State bills are now pending which, unless defeated by farm forces and and other users of motor vehicles, will not only increase the cost of operating or using automobiles, trucks, and busses but will actually drive many of the commercial carriers off the highways.

We must remember that farmers not only own approximately 900,000 trucks but each year as they seek more distant markets they must rely more and more on the larger commercial trucks.

So important is this matter of guarding in the various States against adverse legislation intended to hamper motor transportation that the heads of the three leading national farm organizations held a conference here a few days ago and issued a joint statement urging the State farm leaders as well as other users of motor vehicles to take active steps to oppose such legislation in their State legislatures.

Our statement was directed particularly against the so-called "model" bill developed by railroad interests as adopted by the National Association of Railroad Utilities Commissioners and urged for enactment in each State.

To bring as many private operators as possible under the iron hand of the law, the bill provides that where goods are transported for more than one consignor or to more than three consignees this shall be considered prima facie evidence of operation as a common carrier. A farmer could not carry a load for hire for two of his neighbors or deliver to more than three consignees without being forced to qualify as a common carrier, pay the fee, and undertake to get a certificate of convenience and necessity.

BE ENCOURAGED

As I come to the close of this hour I want to insist again that you farmers who agree with the Farmers' Union program, and who are not members of our organization, write our nationaal secretary, E. E. Kennedy, Kankakee, Ill., for full information how you may become a member and organize a local of the Farmers' Union in your community. To all of you listening in let me ask you not to be discouraged. Relief is a thing of slow process.

About 12 years ago Senator GEORGE NORRIS offered a proposed constitutional amendment known as the lame-duck amendment. It provided that after a presidential election in November the President elected should be inaugurated January 20 instead of March 4. It also provided that a regular session of Congress should begin in January instead of a short session in December. Senator NORRIS was successful in getting this proposed amendment through the Senate a number of times, but he was never able to get it through the House of Representatives until about a year ago. In less than a year after submitting this proposed amendment to the various State legislatures it was ratified by the necessary 36 States. Not a legislature that has been in session since then has turned it down. In the last few days several more States have ratified it. It looks like it is so popular that every State will ratify it. Of course, it is a part of the Constitution now, but it continues to get ratification by State legislatures.

If Senator NORRIS could keep up this untiring fight for 12 years and then see his efforts adopted unanimously by the whole United States, it ought to encourage those of us working for the Wheeler bill, the Frazier bill, and the cost of production for farm products to continue our efforts until these measures become laws and prosperity and happiness the priceless possession of every family in the United States.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The VICE PRESIDENT. The pending amendment will be stated.

The LEGISLATIVE CLERK. On page 57, line 4, after the word "*Provided,*" the Committee on Appropriations report, to strike out—

That no part of the money herein appropriated shall be paid on contract No. 56 to the Seatrain Co.: *Provided further,*

Mr. ODDIE. Mr. President, last night when the Senate recessed the Senator from Florida [Mr. FLETCHER] had the floor, and it was the understanding that he would complete his statement this morning. When he has completed it I would like to make a very brief statement regarding the validity of ocean mail contracts.

Mr. FLETCHER. Mr. President, I discussed this subject just before we adjourned last evening, and I wish to add only a few words with regard to certain points involved. I propose to limit so far as I can what I have to submit further, very largely because of the assurance, or the statement at least, of the Senator from Tennessee to the effect that if this amendment shall be agreed to it will not stay in the bill; that if the amendment goes to conference, the conferees will eliminate it. I hope that will prove to be true. I protest against this amendment reported by the committee. I think the provision of the House bill ought to remain, and

I hope the Senate will disagree to the committee amendment.

I wish to refer now to two points. When application is made for a mail contract the applicant sets out the services and routes and all the conditions which make the applicant eligible for such contract. The Shipping Board certifies to the Postmaster General the kind of service that is needed. This procedure applies, of course, to foreign trade. The purpose of the particular provision of the law was to encourage commerce between the United States and foreign countries, to make available the facilities necessary to handle that trade and that commerce. It is the whole purpose of this provision to help shipping.

So the Seatrain Corporation makes application for a mail contract. The service proposed was the operation of the so-called seatrains on a route between New Orleans and Habana. Habana being a foreign port, the applicant was eligible for this kind of a contract, and it took the usual course, but the whole purpose was to develop trade and commerce and afford facilities by the operation of these vessels between New Orleans and Habana.

The same representation was made to the Shipping Board when the Seatrain Corporation applied for a loan to build these two seatrain ships. The application was granted, supposing that that contract was perfectly valid and legal and that the corporation would stand by the contract as it was made. What has happened? The trade between New Orleans and Habana did not measure up to the expectations of this corporation. It has decreased, so that 20 per cent of their capacity only is needed to do the business between New Orleans and Habana, while 80 per cent of their capacity is required to carry on their business between New Orleans and New York, which is a coastwise operation, an altogether different operation from that originally undertaken. So now they are actually operating their ships between New Orleans and New York, carrying freight cars. That is their main business. They carry the mail from New Orleans to Habana, it is true, but Habana, instead of being the terminus is merely a port of call, and the Habana business, instead of being the main and primary and major portion of their enterprise is inconsequential and incidental. They are, I repeat, making Habana merely a port of call. Their business is coastwise, which is an altogether different kind of business from that originally contemplated and on which the contract was based.

It is said that when this condition developed they applied to the Shipping Board for permission to operate their seatrains coastwise, and that the Shipping Board, by means of force and compulsion and a club, as it were, obliged them to waive their mail pay for six months. The facts about that are these:

There is not the remotest dispute, Mr. President, that the Seatrain coastwise operations were not permitted by the loan contract with the Shipping Board and were not contemplated by the mail contract with the Postmaster General. While it is now plain that the Seatrain Co. had for many months intended to enter the coastwise trade, it failed to request the board's permission until September 23, 1932, about 10 days before their first sailing from New York. They delayed requesting the Shipping Board for a permit to change the character of their operations, and the insistance that they could not sail until this matter was passed upon was due to their own fault.

The board called a public hearing on September 29, at which it received abundant evidence that such coastwise operations, in connection with a subsidy, would be greatly damaging to other shipping operators and to the railroads. There can be no question about that. It is an unheard of proposition that vessels operating along the coast, doing a coastwise business, are entitled to a subvention because they happen to make a foreign port a port of call, and, therefore, call it a foreign operation. In other words, this concern is being given a subvention in the way of a mail contract amounting to $240,000 a year, running for 10 years, involving in the aggregate of $2,400,000, when their business is mainly coastwise, thus giving them an advantage over all ships operating along the coast and over the railroads and all carriers engaged in that kind of commerce. I do not see that that is defensible at all.

So, after these hearings, and after weighing the evidence, the board decided that it would not grant coastwise permission unless the Seatrain Corporation waived their mail subsidy, especially as they had told the board that 80 per cent of their business would be coastwise and 20 per cent or less would be foreign trade to Cuba. That is their own statement.

The chairman of the Shipping Board took it up with the Acting Postmaster General and got the written approval of the Post Office Department to the proposal that no mail pay be granted. The board itself then adopted a resolution granting a coastwise permit but object to the Seatrain's waiving mail pay. I have a communication from the board to that effect, setting out the resolution, and I ask to have it inserted in the RECORD as a part of my remarks at this point.

The VICE PRESIDENT. Without objection, that order will be made.

The communication referred to is as follows:

UNITED STATES SHIPPING BOARD,
Washington, January 5, 1933.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

DEAR SENATOR FLETCHER: Acknowledgment is made of the receipt of your letter of January 4, 1933, in which you request advice as to what action the Shipping Board has taken as relates to mail-contract payments to the Seatrain Lines (Inc.).

The board, in its discretion on October 6, 1932, passed the following resolution:

"*Resolved*, That the Seatrain Lines (Inc.) be authorized to carry on coastwise trade between the ports of New York and New Orleans via Habana in the new Seatrain vessels for a period of six months from this date: *Provided, however*, That during said period said Seatrain Lines (Inc.) shall relinquish all mail compensation which may be payable under their mail contract No. 56 for services rendered during said six months' period, and all mail money which might otherwise be due during said six months' period shall be withheld and shall not be paid to the Seatrain Lines (Inc.) by the Postmaster General: *And provided further*, That this resolution shall become effective only upon the written consent and agreement of the said Seatrain Lines (Inc.), nor shall this temporary approval of said proposed service in any wise change or amend existing contracts between the Seatrain Lines (Inc.) and the United States, except so far as is hereinabove set forth, nor shall anything herein contained affect in any way the validity of said mail contract."

On December 21, 1932, the board, upon reconsideration and for the purpose of leaving to the Postmaster General the exercise of his authority with respect to mail pay, passed the following resolution:

"Whereas the United States Shipping Board, at a meeting on October 6, 1932, adopted a resolution, a copy whereof is hereto attached; and

"Whereas it has been brought to the attention of the United States Shipping Board that the requirement of the said resolution that Seatrain Lines (Inc.) shall relinquish all mail compensation which may be payable under their mail contract No. 56 for services rendered during said six months' period, and all mail money which might otherwise be due during said six months' period should be withheld and should not be paid to the Seatrain Lines (Inc.) by the Postmaster General, concerns only the Post Office Department of the Government: Be it

"*Resolved*, That said United States Shipping Board now declare that said requirement for the relinquishment of mail compensation and for the withholding of the same be, and the same is hereby, removed from the said resolution of October 6, 1932, and that the said resolution of October 6, 1932, in all other respects shall remain in full force and effect."

Should you desire any further information we will be pleased to respond to your requests.

Very truly yours, T. V. O'CONNOR, *Chairman.*

Mr. FLETCHER. The resolution was signed and accepted by the Seatrain people, and several weeks later ratified by their board of directors. Second Assistant Postmaster General Glover told the House committee, at page 142 of the hearings, as follows:

> They waived the claim, and the Shipping Board put it into a resolution, and the resolution was sent to the Comptroller General, so it would be impossible for the Post Office Department to make the payment.

That is the situation, and yet an effort is being made to have this appropriation made according to the original arrangement and undertaking.

With reference to the question raised by the Senator from New York, admitting the original contract was valid, saying nothing about that, they come now and ask to change and modify that contract so that they may do a coastwise business, which was never contemplated originally. I submit that they can not modify that contract; they can not change the contract so as to engage in the field of coastwise business, which would be a departure from their original undertaking entirely, without giving the public the right to bid on such contracts. In other words, the advertisements originally specified that the service was to be between New Orleans and Habana, and the contract was based upon that. They now admit that it was, but that they are actually operating between New York and New Orleans and making Habana merely a port of call. They changed their original purpose, and the only reason they give for it is that the business between Habana and New Orleans has decreased.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from New York?

Mr. FLETCHER. I yield.

Mr. COPELAND. I call the attention of the Senator from Florida to the fact that on the 11th of January of this year the Postmaster General, according to a letter which was put in the RECORD last night by the Senator from Nevada [Mr. ODDIE], which is found on page 2674, says—I will not attempt to read all the letter, but merely the last paragraph—

> In view of the premises and considerations stated in your letter, it would, in my opinion, be in the interest of the Government to accept your proposal, and I hereby agree to the modification of the contract on ocean mail route No. 56 accordingly.

So there is a contract.

Mr. FLETCHER. There was a contract, I admit.

Mr. COPELAND. Yes; but speaking about the act of June 5, 1921, whereby the General Accounting Office was established, section 618 expressly provides that the Comptroller General shall specifically report to the Congress every expenditure or contract made by any department or establishment in any year in violation of law. If there is a valid contract, certainly the Senator from Florida does not wish to set that aside. If this contract is not valid and the fact that it is not valid is the belief of the Comptroller General, it is his duty under the law to proceed in the matter.

As I said last night to the Senator, I have no particular interest in the Seatrain matter; I have much greater interest in many other lines; but I should dislike to see the Senate take any action which seems to be in the direction of abrogating a contract. My judgment is, I may say to the Senator, that there is a contract. Whether it was a wise contract I am not discussing; but there is a contract, and certainly the Senator would not wish, if there is such a contract, to set it aside. Am I right in that?

Mr. FLETCHER. The Senator is quite right; I do not want to violate any contract or set aside a valid contract. My contention is that when these people themselves agreed that they would not ask for this pay on condition that they should be allowed to operate their ships in the coastwise trade, they changed the contract; they abandoned their original contract; they destroyed that contract. They have proposed a new contract upon new conditions and a new consideration, and that is the matter that is pending now with the Postmaster General. I did not know he had decided it; I do not think he can decide it.

Mr. COPELAND. Mr. President, will the Senator yield further?

Mr. FLETCHER. Yes.

Mr. COPELAND. I heard the story for the first time from what the Senator from Pennsylvania [Mr. REED] said yesterday, that in a sense this line was coerced.

Mr. FLETCHER. I just made a statement with reference to that.

Mr. COPELAND. Oh, the Senator explained the matter?

Mr. FLETCHER. Yes. There was no coercion whatever. That is absurd. They never applied until 10 days before their first sailing. I gave the date here. That was the first time they asked the Shipping Board for permission to operate coastwise. Then the Shipping Board gave hearings on the matter; and the Shipping Board said, "We will not permit you to engage in this trade, contrary to your original undertaking, unless you waive mail pay"; and the company agreed to that.

Mr. COPELAND. So far as I am concerned, I do not believe in an arrangement which has a dual service—a foreign and a coastal service both. We must protect our coastal service; but, at the same time, as I view it, we have entered into a solemn contract with this company through the agency set up by the Congress.

Mr. FLETCHER. To operate a service between New Orleans and Habana.

Mr. COPELAND. But through an agency set up by the Congress, the Postmaster General, there has been made a new contract, in which the Postmaster General has sought to protect the country by subtracting from the total amount which the Seatrain Co. could receive under the original contract such earnings as it gets from this modification of that contract.

Mr. FLETCHER. How has that contract been made—by a communication, by letters from these people? There has been no new contract made. There has been no new document signed, no agreement made. It is simply suggested in that letter that the Postmaster General has written to the Seatrain people that he would do so-and-so. He has not any authority to do anything of the kind. Let me call the Senator's attention to this fact:

The Post Office officials are required by law to let these contracts subject to competitive bidding. They are required to advertise to the public what they propose to do, and call for bids. The whole public is entitled to submit bids. The advertisement in this case was for operating a service between New Orleans and Habana. That was the bid; and the department went so far as to specify boats that would be operated in such a way that only the Seatrain Co. could bid. But, assume that other people were allowed to bid, that was the bidding they were required to make, with reference to a service between New Orleans and Habana.

It is a different proposition altogether where the contract is proposed to be made with a concern that proposes to operate their ships coastwise and make Habana merely a port of call. It is altogether a different proposal, and the public is entitled to bid upon that proposal. The Postmaster General, under the law, must advertise for bids for carrying the mail between Habana and New Orleans by ships that only make Habana a port of call and are operating between New York and New Orleans. If that advertisement were inserted and the public had an opportunity to bid upon that service, we would get an entirely different bid from the bid that was obtained on the service from New Orleans and Habana.

There are plenty of ships engaged in the coastwise trade that would not mind making a little triangle off to Habana. Habana is only 96 miles from the coast of Florida. It is practically all coastwise trade; but Habana is in a foreign country, and therefore, technically, we call it foreign trade. The purpose was to build up the business between New Orleans and Habana.

This company proceeded to operate the ships between New York and New Orleans. Eighty per cent of their enterprise is devoted to that service and only 20 per cent of their enterprise to carrying business between New Orleans and Habana. Instead of Habana being the terminus of that service and the main thing to be served, now it is New York, coastwise business, and Habana is merely a port of call. So that that is a different proposition; and I submit that before the Postmaster General could let a contract for that kind of service, he must advertise it; he must offer it to the public and give the public the right to bid. There are plenty of ships owned by other companies that would have bid. His duty is to let this contract to the lowest and best bidder. There are plenty of shipping companies that would like to bid on a contract of that sort, much more than if they were required

to establish a service simply between New Orleans and Habana.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. FLETCHER. I yield to the Senator from New York.

Mr. COPELAND. No one in the Senate is more anxious to do the right and just thing than the Senator from Florida. I know that; but the Senator recites certain facts and the law, and if he is right the country is protected, because the Comptroller General has ample authority to deal with the problem.

I want to point out to the Senator, however, that, regardless of whether or not the Senator from Pennsylvania [Mr. REED] was right, the fact remains that the matter became in controversy and the parties appeared before the Shipping Board; and the Shipping Board, by a resolution adopted on the 6th of October last, amended a resolution adopted in December.

Mr. FLETCHER. Simply by striking out that part of the resolution with reference to the pay. That, of course, is a matter for the Postmaster General.

Mr. COPELAND. Well, the Shipping Board—and I think the Senator will agree with me that the Shipping Board has always sought to protect intercoastal shipping—the Shipping Board by resolution determined that it was a proper thing and a wise thing to modify this contract with the Seatrain Co. Then, as I have already indicated, on the 11th of January the Postmaster General, acting under the law, did modify the contract.

Mr. FLETCHER. If he could.

Mr. COPELAND. If he could. He did it, anyhow, as far as he could. Now, if he did it in violation of law, we have ample protection in that the Comptroller General must pass upon it.

Mr. FLETCHER. Yes.

Mr. COPELAND. But it is a fact, of course, that the Seatrain Co. has a smaller return by reason of this modification. We are paying the Seatrain Co. less money than we did before.

We have an interest in the Seatrain ships, in that we have a mortgage on those ships, have we not?

Mr. FLETCHER. Yes; and the Sun Shipbuilding Co. and these other people that built the ships have an interest in them, and they are the ones that are wanting this mail pay.

Mr. COPELAND. Regardless of who wants the mail pay, unless this line can be made to succeed, unless it is preserved from bankruptcy and destruction, the ships will come back on our hands. That is what is going to happen.

As I have frequently said, I am not particularly interested in this Seatrain business. I am much more interested in the coastwise service from New York; but the thing that impressed me in the first place about the Seatrain service was that it was represented to us that these ships would be useful in time of war as airplane carriers. Am I not right in that?

Mr. FLETCHER. There is some claim of that sort, but a good many people think that is buncombe.

Mr. COPELAND. Anyhow, the Government has a mortgage upon the ships?

Mr. FLETCHER. Yes.

Mr. COPELAND. And if the company is not permitted to operate—and in this time of economic depression it is doubtful if it could operate if it did not receive this assistance—probably the ships will come back on our hands. If we want them, that is all right; but my judgment is that we had better let the Comptroller General fight out the matter with this company; and if the contract has been made in violation of law, justice will be done to the United States.

Mr. FLETCHER. Of course, the Senator or anybody can build ships and operate them coastwise at any time. Nobody denies the right of this company to operate the ships in the coastwise business; but they are not entitled to a subsidy from the Government when they go into that business in competition with all other coastwise shipping and the railroads that also carry freight in the same direction. That is what the Shipping Board said: "You can go on; we will give you permission to operate coastwise, but you must waive your mail pay."

Mr. REED. Mr. President, will the Senator yield for a question?

Mr. FLETCHER. I yield.

Mr. REED. Is it not true that the people who are complaining of the mail contract of the Seatrain Co. themselves have mail contracts and always have had?

Mr. FLETCHER. I do not know anything about that. I do not know what people the Senator has in mind.

Mr. REED. The Senator knows that the Florida East Coast Railroad Co. and the Southern Pacific Railroad Co. both have mail contracts, have they not?

Mr. FLETCHER. They probably have. I do not know. I never inquired.

Mr. REED. Why do they find fault with the Seatrain Co., then, because it has a mail contract?

Mr. FLETCHER. I never inquired about that. I know that an American citizen, Henry M. Flagler, solely and alone, without asking anything from the Government from the day he was born to the day he died, put up the money to build three car-ferry ships to operate between Key West and Habana. He operated those ships at his own expense, at his own cost, at his own risk. He built them at his own risk. He never asked the Government for a single cent. These ferries were operating between Key West and Habana. Some people thought Mr. Flagler was wild, that it was a mere dream to think about building three ferryboats to carry freight between Key West and Habana; but I never will forget what he said to me on the subject when I happened to be invited to ride with him from St. Augustine to Jacksonville. This was before this road was completed to Key West, before the Overseas Railroad was built at all. The railroad then terminated in Miami. He said: "I hope to see the day when we can load a freight car in Chicago and unload it in Santiago."

I thought it was a perfectly wild idea; but he did live to see that day. He built that road to Key West at his own expense. He built these ferryboats—first, one, and then the business grew until he built another, and it continued to grow until he built a third at his own expense. He operated them, and the cars were loaded in Chicago, carried on the ferry from Key West to Habana, and from there by railroad to Santiago. He lived to see that time.

Later that business fell off. Those ferries became a tax, a burden, a liability on Mr. Flagler's hands—two of them, at least. He was willing to put those ferries into the business between New Orleans and Habana, because the trade from Habana to New Orleans had developed very largely, and Key West was somewhat eliminated from it. He was willing to put the car ferries on that route. He applied to the Interstate Commerce Commission for permission to operate these car ferries from New Orleans to Habana, and these other people came in and said, "We have a much better, bigger boat. Your boats carry only 30 cars each. We have an outfit that will carry 90 cars, and we want this business ourselves." So they proceeded to apply for a loan, for a contract, representing that they were going to do that business between New Orleans and Habana. That was their representation. While the petition of the car ferry company from Key West was pending before the Interstate Commerce Commission, these people stepped in and got this contract.

All right. That shut out the car ferry between Key West and Habana. Those car ferries are still idle, I presume; but they were ample to do that business. I contended when this contract was made that the business between New Orleans and Habana did not warrant this tremendous investment in these tremendous seatrains.

Now, you see what has happened. They do not intend to operate between New Orleans and Habana, as they undertook to do. They are engaged in the coastwise trade from New York to New Orleans, with Habana merely a port of call. It is not foreign commerce; it is coastwise trade in which they are engaged. That is the point I am making.

Mr. KING. Mr. President, will the Senator yield?

Mr. FLETCHER. I yield to the Senator.

Mr. KING. I ask the Senator if the evidence appearing in all of the records up to date, and the hearings, do not justify and, indeed, compel the conclusion that the Seatrain Co. obtained this contract from the Postmaster General fraudulently by the concealment of their purposes and of their plans?

Mr. FLETCHER. I do not care to go into all that. That is ancient history, in a way. I simply say they got the contract. I am not questioning the validity of that contract originally, but I am questioning the power of the Postmaster General or anybody else who so changed that contract as to destroy its substance and its characteristics. It was based upon the idea of foreign commerce. That was the only consideration upon which they had a right to let the contract. It was called foreign commerce because it passed from an American port to a port in Cuba. I am not questioning that. But now they are not doing what the contract calls for; they are not making Habana a terminus of their service at all. They are not making Cuban business the main part or a large part of the service. They testified that the Cuban business amounted to only 20 per cent of their capacity, that their main business, 80 per cent of it, was coastwise business. That never was contemplated in the beginning, and nothing was said about it until they got the loan from the Shipping Board to build the ships and had them built. Then they decided they were going to operate them coastwise. Whether they intended that originally or not I am not saying, but they did not so represent it, and it was not included in the advertisement or the call for bids for this contract.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER (Mr. CUTTING in the chair). Does the Senator from Florida yield to the Senator from Nebraska?

Mr. FLETCHER. I yield.

Mr. NORRIS. I have no knowledge about this contract, and I want to get the facts correctly in my mind if I can. I want to assume that they did what the Senator said and that they used Habana as a port of call only. What injury would result to anybody, assuming all of that to be true? Who was hurt by it? Was the Government injured in any way by that?

Mr. FLETCHER. In the first place, they are getting a Government subsidy, and they are competing with all vessels engaged in the coastwise trade of the United States.

Mr. NORRIS. Again I am uninformed, and I am inquiring for information only when I ask whether those other vessels which compete are also getting a subsidy in the coastwise trade?

Mr. FLETCHER. No; not one.

Mr. KING. They could not get it.

Mr. NORRIS. Why not?

Mr. FLETCHER. Because this mail contract applies only to vessels engaged in foreign commerce.

Mr. NORRIS. And they get their contract on the basis of going to Cuba?

Mr. FLETCHER. Yes.

Mr. NORRIS. And use that as a means by which they engage in coastwise trade?

Mr. FLETCHER. Yes; and get $240,000 a year advantage over every American vessel engaged in the coastwise business.

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. FLETCHER. I yield.

Mr. SMOOT. The Seatrain Co. admits that if the ships are partly loaded with freight for New York their operation then is not 100 per cent a foreign operation but is partly a domestic or coastwise operation, and they are willing to waive the proportion of their mail pay their coastwise cargo bears to the total earnings of the voyage. That is how it is connected with the coastwise trade and the contract of the Seatrain Co.

Mr. FLETCHER. In other words, they made a proposition for service between New Orleans and Habana, which is foreign service. They qualified in that way; they got a contract based on that service between New Orleans and Habana and nowhere else. Now they propose to change their service from New Orleans to New York, with a stopping place at Habana. That is the proposition.

I contend, in the first place, that the Postmaster General has not any right to change that advertisement and that classification and that contract, which was made for service between New Orleans and Habana, so as to let the contractor operate to New York in the regular coastwise trade, and merely make Habana a port of call. I say that if that had been the original proposition, if it is to-day the proposition—and that seems to be what they want—then it is the duty of the Postmaster General, under the law, to call for competitive bids and give all American vessels which are engaged in the coastwise business an opportunity to bid on the contract, advising them that they might be awarded the contract because they stop on their way from New Orleans to New York at Galveston, Mobile, Houston, or any other port on the Gulf. Let this opportunity be given to the public to bid on such a contract. Nobody else has had any chance to do that, because the only offer of service was between New Orleans and Habana. If the service is to be coastwise service, with a stop at Habana, let it be open to the public, and let other companies operating ships which are engaged in the coastwise business have an opportunity to bid.

It seems to me there can be no escape from my contention, because the law requires that the Postmaster General shall advertise for bids, and that the public shall be given the opportunity, and then the Postmaster General must accept the lowest and best bid.

Regarding the Comptroller General, I want to read from his statement to the Postmaster General with reference to this contract. He said:

> No charges against appropriated funds will be approved for payment to the Over-Seas Railways (Inc.), under the contract you report as having been awarded until there have been presented the facts requested in my letter of October 24, 1931, and such facts are shown to bring the contract within the terms of the statute.

It is doubtful whether the Comptroller General will allow any payment at all under the original contract. That is his holding. The facts he has requested have not been presented to him, and I am quite sure he would not approve of payment based upon a modification of a contract made by correspondence between the parties.

I beg pardon for taking so much time, and I shall not discuss the matter any longer. I submit it to the Senate.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had insisted upon its amendment to the bill (S. 4509) to further amend the act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. EVANS of Montana, Mr. YON, and Mr. COLTON were appointed managers on the part of the House at the conference.

THE FIVE-DAY WEEK

Mr. BLACK. Mr. President, I do not desire to divert the attention of the Senate for any length of time from the subject under discussion, but there seems to be in some places a misapprehension as to the reason for holding hearings at the present time on a bill providing for a 5-day week and a 6-hour day. I wish to call the Senate's attention at this time to an article appearing in this morning's Washington Herald containing a statement attributed to Mr. Henry Ford, in which he is reported to have said:

> My competitors are trying to stop another Ford car from being made. They have succeeded for a few hours, but I will fight them.
>
> The truth is that certain bankers, in cooperation with certain of my competitors, are trying to obtain control of this concern and their effort is to prevent the new Ford from leaving the factory.

At the very time that statement was being made a witness was testifying before a subcommittee of the Senate

Committee on the Judiciary considering the measure providing for a 5-day week and a 6-hour day. That witness was calling attention to the fact that a very small group of banks in the city of New York had practically obtained complete control of the financial affairs of this Nation. It is quite a coincidence that Mr. Ford, who can certainly not be said to be opposed to the money interests of this country, should have given out this statement at the present time.

Our attention was called in the committee to the fact that 8 New York commercial banks hold 3,741 directorships in other banks and businesses in this country. Among the companies in which these banks hold directorships are automobile manufacturing companies competing with Mr. Ford.

It was shown in the hearing that the Chase National Bank, of New York, holds directorships in 855 different industrial and manufacturing and banking institutions. It was shown that one man holds 125 different directorships in the large business institutions of this country. Of course, it is impossible for him to perform his duties as a director in 125 large institutions, but it does show the immense extent to which these large banking interests have taken control of the money affairs of this Nation and have spread their tentacles to every nook and hamlet in America.

I mention this matter in connection with the pending bill for this reason: We are holding hearings on a measure providing for a 5-day week and a 6-hour day. If there are those here who think those hearings are simply being conducted so as to collect evidence, without the idea of passing the measure before us, I want to let them know that they can abandon any such conception.

What connection is there between the control of the affairs of this Nation by these banking institutions and a 5-day week and a 6-hour day? In the current issue of the National City Bank Bulletin, published in January of this year, appears an argument against just such a movement. The argument is made that wages must be further deflated in order to bring about prosperity to the United States.

It is also stated in the same bulletin, showing the humane attitude taken, that the dairy interests of New York are suffering by reason of a surplus of dairy products, and it is stated in the bulletin that they are suffering from the surplus on account of the fact that the consumers, the men, women, and children of New York, are no longer able to buy milk.

They do not suggest as a remedy that the purchasing power of those who buy the milk be increased, but their remedy is further to deflate their wages and bring about, if possible, a decrease in the production of milk to be supplied to the hungry men, women, and children of New York City.

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield?

Mr. BLACK. I yield.

Mr. THOMAS of Oklahoma. A study of the submitted records shows that the three largest banks in New York have combined resources of slightly less than $6,000,000,000. If those banks can exert the power the Senator indicates they are exerting, with their present resources, what might be the result of a chain banking system, under which the banking facilities of the country might ultimately be centered in New York?

Mr. BLACK. I will state to the Senator that as the evidence is developing before the subcommittee, it is indicated that they have almost all the power they could have under any conditions. I agree with the Senator fully with reference to his objection to chain banks and to branch banking, but the evidence is developing before the committee that the eight banks which were named have extended their control to every business activity in America, that they have demanded that wages be reduced, that they have opposed keeping men on pay rolls, that they have coerced the business enterprises of the country into adopting the policy which this small group of banks desire to be adopted.

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield further?

The PRESIDING OFFICER. Does the Senator from Alabama yield further to the Senator from Oklahoma?

Mr. BLACK. I yield.

Mr. THOMAS of Oklahoma. If these few banks, with their small resources of a few billion dollars, can exert the power they exert now, under the chain system or branch bank system, I think the Senator will agree that very soon the entire banking resources of the United States, amounting to something like $60,000,000,000, would be centered in them. Then if they can exercise this power with so small a resource power as $6,000,000,000, what could they not do throughout the world with a $60,000,000,000 of resource power?

Mr. BLACK. The evidence tends to indicate that they have the $60,000,000,000 resource power now through their control of business activities—automobile manufactures, chemical enterprises, public utilities, and railroads. One of the strange things is that the evidence has already shown that some of the railroads which have borrowed money from the Reconstruction Finance Corporation have sitting on their boards of directors members of the board of directors of the Chase National Bank, of New York, and of the other banks in New York.

Mr. President, it is not my intention this morning to discuss this matter at any length. I expect early next week to give to the Senate a résumé of some of the evidence which has been brought before the Senate committee on the 5-day week and the 6-hour day. But at this time I wish to invite the attention of the Senate to the fact that there have been few matters proposed in this body, very few, which strike at the fundamentals of the widespread distress which exists in America to-day. There has been an attempt, of course, to give employment by lending money through the Reconstruction Finance Corporation to various business enterprises, some of which are tottering. That has not increased employment. There have been various other methods suggested, such as the moratorium on foreign debts, and other plans. It has even been suggested that all that is needed is to balance the Budget and everybody will be put to work.

Mr. President, the 5-day-week and 6-hour-day plan is one of the few measures that have been proposed which strike at the fundamentals of unemployment in the United States. I do not know whether we can bring in a report at this regular session or not. I hope we can. I believe the shorter work week and the shorter work day are inevitably going to help business recovery in this Nation. I have no question as to the Supreme Court sustaining the constitutionality of the bill which I have offered. I intend to bring before the Senate from time to time from now on, in an effort to get this remedy before the Senate and before the people of the country, the imperative necessity for taking action quickly in order to relieve the widespread distress, misery, human suffering, and poverty which exist all over the Nation.

I invite those Senators who may be interested in the form of the bill, who may be interested with reference to different phases of the bill which will come before the body, if they have constituents who have objections to the measure and who wish to suggest amendments or exceptions to make it work in a more satisfactory way, to have them come before the committee. We do not want any claim made after the bill is reported back to the Senate that there was not ample opportunity for hearing. We have let everyone come for or against the measure who desired to appear before the committee. We shall meet again next Tuesday morning, and it is our intention to remain in session long enough to give all who are interested a chance to appear before the committee. But we do not want anyone, after the bill has been returned to the Senate, to come here and make an effort to delay the consideration of one of the few measures which have been offered to give employment to the people of the country, by saying they did not have an opportunity for a hearing before the committee.

Mr. BROUSSARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Louisiana?

Mr. BLACK. I yield.

Mr. BROUSSARD. Has there been evidence produced before the committee as to certain corporations dealing with securities who have borrowed money from the Reconstruction Finance Corporation and within a month afterward have gone into the hands of receivers, after paying to certain banks large loans which they had secured?

Mr. BLACK. That is not within the scope of the activities of the committee. The only reason why the committee has had before it anything in connection with the consolidation of the huge power in the banking interests in New York is because Mr. Frey stated to the committee that he had found that it is no longer possible for the laboring men, through their organizations, to deal with the managers of business enterprises. They have discovered that the business enterprises are subject to the orders and to the coercion of bankers, who in turn are controlled by a small group of banks in New York. For that reason we have been going into the question of that power, and we intend to go into it just as fully as the scope of our power will permit.

Mr. COSTIGAN. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Colorado?

Mr. BLACK. I yield.

Mr. COSTIGAN. The Senator's forceful remarks on the measure introduced by him might well have been made in connection with section 11, page 76, of the pending bill, which provides, in part, that any employees of the Veterans' Administration homes, hospitals, or combined facilities are to be, in the discretion of the Veterans' Affairs Administrator, subject to orders to work for seven hours on Saturday. The section as drafted further provides that the work of such employees in excess of four hours on Saturdays shall not entitle such employees to an equal shortening of the work day on some other day or to additional compensation therefor. While the Senator is properly urging the Senate to recognize the merits and great importance of his general measure, I wish to inquire whether he does not think the Senate should carefully scrutinize any such provisions in pending legislation?

Mr. BLACK. May I state to the Senator from Colorado that I have in my office a letter from a veteran who sought a position with the Veterans' Bureau until he learned about the hours he would be compelled to work. He discovered they were so long in a certain hospital that he did not feel he could perform labor for the long period of time that would be required of him, and for that reason withdrew his application for the position. I certainly think the Senator is correct in connection with the suggestion that has been made.

Mr. President, I shall not longer detain the Senate at this time, because it is my intention to bring before the Senate next week a résumé of some of the evidence which has been brought to bear in connection with this bill and the imperative necessity for the Senate to begin to realize that, however important it may be to balance the Budget, the paramount question before the American people to-day is what we are going to do with the 12,000,000 who are wholly and completely out of work and perhaps 12,000,000 more who are working on half time.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

Mr. TRAMMELL. Mr. President, I hope the action of the committee in regard to the so-called Seatrain item in the appropriation bill will not be sustained and that, to the contrary, the action of the House in writing the provision in the pending measure shall prevail. At the time the House specified that no part of the appropriation for foreign mail service should be paid to the Seatrain Co., even the Postmaster General had not agreed to any part of the funds being used for that purpose, but, on the contrary, the Assistant Postmaster General, as appears from the hearings before the House committee, had stated that he did not believe the Postmaster General would make a payment to the Seatrain Co. under its old contract, considering the character of service in which it is now engaged.

The question now resolves itself into whether or not this branch of the Congress desires to go on record in favor of authorizing—or encouraging at least—the Postmaster General to make a modified contract under all the circumstances. As I said, according to the evidence of Mr. Glover, the Assistant Postmaster General, at the time the House took action, the Postmaster General had not made any modification whatever of the contract with this company.

I take it that any Senator knows full well that under a contract which provides for mail service from New Orleans to Habana, Cuba, under the subsidy provision of the law, the contractors are not entitled to any pay when they do not comply with the terms of their contract. Certainly they are not complying with the terms of that contract when they engage their vessels primarily in coastwise trade as they are doing at the present time.

Mr. LONG. Mr. President, will the Senator permit me to ask him a question?

Mr. TRAMMELL. Certainly.

Mr. LONG. What is the Senator's view about what we ought to do? We all know these contracts are merely mail subsidies, but I think we know too that if we are to keep the American merchant marine in operation there will have to be some help granted. What position does the Senator take on that question?

Mr. TRAMMELL. I think they will have to have considerable help if they keep on building ships which are not needed and are not required for maintenance of the merchant marine, but help to drive existing merchant-marine facilities out of business. Of course, that is a matter of decision for the Shipping Board in regard to the financing.

Mr. LONG. I am taking an absolutely disinterested view. The seatrain runs through my town; that is, it loads and unloads principally in New Orleans. I am taking no view at all. Ought we to continue, if necessary to keep up the merchant marine, to subsidize it? Is it necessary? If it is, I think we ought to try to keep the merchant marine. If it is not, then I am in favor of abolishing it.

Mr. TRAMMELL. I think at the time of the enactment of the subsidy provision of the law that it was necessary to encourage our merchant marine, and, of course, where we have legal, binding contracts, free of any fraud, it is the duty of the Government to maintain such contracts. I feel that way about it.

Mr. FLETCHER. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to his colleague?

Mr. TRAMMELL. I yield.

Mr. FLETCHER. May I suggest, relative to the inquiry of the Senator from Louisiana, that I am cordially in favor of continuing the Government mail contracts as a benefit to the American merchant marine. There is a necessity for doing that; but that is a different question from this. The question here is as to a specific contract, not affecting the general policy. I am for the law and policy as they stand; but where an agency of the Government is given power to enter into contracts there may be instances in the case of a particular contract where a mistake has been made and where the contract itself is seriously objectionable, without affecting the general policy and principle of ocean mail contracts.

Mr. LONG. I do not know but that this particular subsidy is doing as much harm as it is doing good. The Seatrain subsidy is doing this much harm: We have built considerable port facilities that are used for carrying on commerce. The Seatrain Co. just runs freight cars from the rails on the docks to the rails on the ships; and no benefit is derived from the subsidy that is paid by the Government.

Mr. TRAMMELL. Mr. President, I think it was a very serious mistake on the part of the Shipping Board and on the part of the Postmaster General to enter into the contract

originally, and that it was in contravention, at least, of the spirit of the law which authorizes the Shipping Board to assist in financing the construction of ships. It was certainly a violation of the spirit of the law, and now it would be doubly so for the Postmaster General to extend and enlarge that subsidy to a coastwise operation, which comprises about 80 per cent of the activities of the Seatrain Co.

Mr. LONG. We might just as well subsidize the passenger traffic.

Mr. TRAMMELL. We might just as well grant a subsidy to all ships which operate from New Orleans up the east coast to New York and which make Habana a port of call.

Ever since I was a boy in Florida I can recall that ships have been operating from New Orleans to New York by Florida ports and by Habana, making that a trade route. That is all the Seatrain ships are doing; primarily they are engaged in a coastal business, and they merely make Habana a port of call, Habana being some ninety-odd miles from the Florida coast.

The question plainly confronts this branch of Congress as to whether or not it is going on record in favor of permitting the Postmaster General to change the terms of that contract in such a way as will be violative of the spirit of the Shipping Board act and the merchant marine act, and violative of the spirit if not the letter—and I rather think the letter—of the law authorizing the Postmaster General to pay subsidies.

Mr. WALSH of Massachusetts. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Massachusetts?

Mr. TRAMMELL. I yield.

Mr. WALSH of Massachusetts. I understand the Senator from Florida to be in favor of the House provision?

Mr. TRAMMELL. I am in favor of the action of the House of Representatives whereby a proviso was inserted to the effect that no part of the appropriation should be used for the purpose of paying the Seatrain contract.

Mr. WALSH of Massachusetts. In other words, the Senator is opposed to the Senate committee amendment striking out the House provision?

Mr. TRAMMELL. That is my position, yes; I am opposed to that.

Mr. WALSH of Massachusetts. May I inquire if the House provision is a new provision in Post Office appropriation bills?

Mr. TRAMMELL. No; it is not a new one. The House inserted a similar provision last year.

Mr. WALSH of Massachusetts. How long has this provision been in the appropriation bill?

Mr. TRAMMELL. Last year was the first time, because the controversy did not arise until last year. What moved the House to its action last year was the manner in which the contract was made and the manipulations and scheming which clearly, from the evidence in the case, were carried on by the Post Office Department and the Shipping Board in connection with the initial steps in providing a subsidy, and so on.

Mr. WALSH of Massachusetts. The Senator from Maine [Mr. WHITE] tells me that this provision was in the House bill last year.

Mr. TRAMMELL. It was; that is what I say.

Mr. WALSH of Massachusetts. But that it was stricken out in the Senate, and in conference was eliminated from the bill as it was finally enacted. Is that true?

Mr. TRAMMELL. That is true; and I think, of course, the Senate made a mistake at that time. However, the view of the majority of the Senate was otherwise. But now we have a different situation.

Mr. WALSH of Massachusetts. Will the Senator state concisely and briefly just what change will be made in the mail contract of the Post Office Department if this proviso shall be eliminated from the bill?

Mr. FLETCHER. None.

Mr. TRAMMELL. I do not know. We can not tell. It has been stated here that the Postmaster General has agreed or will agree to a modification of the contract with the company. They themselves admit they are not entitled to any pay unless they can get a modification of the contract. They admit that by their own petition to the Postmaster General.

Mr. WALSH of Massachusetts. In other words, this provision is inserted in the bill in order to prevent the Postmaster General from making a contract with the Seatrain Co.?

Mr. TRAMMELL. It is to prevent him from modifying an existing contract.

Mr. WALSH of Massachusetts. With the Seatrain Co.?

Mr. TRAMMELL. Certainly, to modify the contract originally entered into for carrying the mail from New Orleans to Habana, Cuba. Now the company asks permission of the Shipping Board to let their ships sail from New Orleans via Habana to New York, admitting that they are engaged largely in the coastal business, and they ask the Shipping Board to permit that to be done.

Mr. WALSH of Massachusetts. What additional expense would be involved if such a mail contract were entered into as is contemplated and as the Postmaster General favors?

Mr. TRAMMELL. There would not be any additional expense involved; probably they would not get any more of a subsidy than they would for carrying the mail just to Cuba; but such a modification would be violative of the spirit of the law, violative of the policy of the Congress in the enactment of the merchant marine act and in providing that subsidies may be paid by the Postmaster General.

Mr. WALSH of Massachusetts. What effect would entering into this contract by the Postmaster General have upon the efficient transportation of the mail?

Mr. TRAMMELL. It would not add anything to the facilities by increasing the speed of the mail or otherwise, or be of any benefit whatever to the Government in the handling of the mail.

Mr. WALSH of Massachusetts. Would it tend to deteriorate or injure the expeditious transportation of the mail?

Mr. TRAMMELL. I think that it would be detrimental, in that it would subsidize ships on trade routes where there are now ample vessels, some of the best we have on the coast, and where ample service is afforded. It would not increase or enlarge the service.

Mr. WALSH of Massachusetts. Would this proviso, if adopted, lessen the amount of money the Government would have to pay out of the Federal Treasury for transporting this mail?

Mr. TRAMMELL. If this proviso were adopted, we would not have to pay anything; it would save the Government the amount now paid, unless the contract were modified or changed.

Mr. WALSH of Massachusetts. Under a new contract that might be entered into by the Postmaster General, would the amount be less?

Mr. TRAMMELL. I do not know whether it would be less than on the route from New Orleans to Habana or not. It probably would be somewhat less.

Mr. WALSH of Massachusetts. If the Senator will permit me to interrupt him further, I have not had an opportunity to hear the full discussion of this important amendment, and that is why I have made these inquiries. I infer from what the Senator says that so far as increasing or decreasing the appropriation of funds from the public Treasury there is no question involved, and that his objection is based entirely upon the fact that this proposed contract would be a violation of what he describes as the policy of the shipping laws of the country.

Mr. TRAMMELL. It would be violative of the policy of the shipping laws and of the post-office subsidy, and would not be in keeping with the intention of Congress; but, in effect, it would be in contravention of the intention of Congress. The purpose of Congress was to try to build up the American merchant marine.

Mr. WALSH of Massachusetts. The Senator says it would be a departure from our established policy dealing with sea-mail contracts? Is that true?

Mr. TRAMMELL. It would be absolutely a departure from it; and I myself do not feel that the Congress should go on record approving any such perversion of the law.

Mr. WALSH of Massachusetts. I confess that it is difficult for me to determine what loss or benefit is involved in the acceptance or rejection of this amendment.

Mr. TRAMMELL. So far as the purpose of the law is concerned, it is just contrary to the spirit of the law in the first instance. We are not now presenting the argument along the lines we did previously on the ground of fraud in the original contract. The whole contract, from its very inception, was carried on in the height of favoritism, the height of discrimination, and with no regard whatever for the question of building up the merchant marine or the United States mail service.

The record will disclose that upon that basis we opposed the contract from its inception. Now, however, we are opposing it upon the question of the old contract not being performed and the contractors asking for a modification. This question presents itself squarely to the Congress: Is the Congress going to agree to a modification under these circumstances? We think that to modify the contract in the way they wish it to be modified would be all wrong under the spirit of the law, so far as the merchant marine act is concerned.

Mr. FLETCHER. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to his colleague?

Mr. TRAMMELL. I yield.

Mr. FLETCHER. Mr. President, the Senator from Massachusetts seemed to ask a direct question about the effect on the Treasury. If the House provision should stand, the Treasury would not have to pay out $120,400 a year to the Seatrain Co., whereas if the Senate amendment prevails and we disagree to the House amendment, then the Government will have to make that payment.

Mr. WALSH of Massachusetts. That is very important.

Mr. WHITE. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Maine?

Mr. TRAMMELL. I yield for a question.

Mr. WHITE. Is it not a fact that, if the contract between the Government and the Seatrain Co. is a subsisting, legal contract, the Government will have to pay whether this appropriation shall be provided or not? If we strike the appropriation out, and a contractual obligation—assuming that there is a legal contract—continues, then at some time the Government will have to meet its obligation.

The real question at issue here is whether the Congress is going to pass upon the legality of contracts entered into by competent authority, or whether it is going to leave that determination to the proper legal and accounting officers of the Government. That is the real issue here.

Mr. TRAMMELL. Mr. President, the Senator would surrender much more of the prerogatives and the duties of a Senator to some of the department heads than I would surrender. If I see that a department in the administration of a law, commendable and wholesome in its purpose, acting in such a way as to violate the purpose and object and the spirit of the law, I think it is the duty of Congress to correct them instead of encouraging them in that character of administration.

If we give too much latitude to, and permit too much laxity on the part of, those administering law, they go ahead, and we get results contrary to those that were contemplated and intended under the original law.

Here is an instance where I feel that it is proper for the Senate, as the House has done, to assert itself, and put those in authority on notice that the intention and the purpose of law means something, and that the enactment is not for their own manipulation just as they see fit to administer it in favoritism, in discrimination, and in total disregard for the interests of the American merchant marine in this instance and of the Postal Service of this country.

Mr. WALSH of Massachusetts. Mr. President, will the Senator from Florida permit me to ask the Senator from Maine a question?

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Massachusetts?

Mr. TRAMMELL. I do.

Mr. WALSH of Massachusetts. I thank the Senator. May I inquire from the Senator from Maine whether the Postmaster General has made a contract such as is described in this proviso?

Mr. WHITE. Oh, yes.

Mr. WALSH of Massachusetts. And is it in force now?

Mr. WHITE. This contract No. 56 was entered into; and the very purpose of this amendment put into the bill by the House was to avoid the effect of that contract.

Mr. WALSH of Massachusetts. How can we avoid the effect of it after it has been entered into? I can understand that we would have power to take action here to prevent the renewal of a contract; but how can we, by legislative act, cancel a contract that the Government has entered into, without subjecting ourselves to damages?

Mr. WHITE. Mr. President, if the Senator will yield further, that is precisely the point. If this was a legal contract at the time it was entered into—and it has something like eight years more to run—we can not, by withholding in a particular year an appropriation designed to meet the payments called for by that contract, avoid the obligations under that contract; but, ultimately, we must meet them.

The real question at issue is whether this is or is not a legal contract, and the Senate is asked to pass upon that question—that is the real effect of what we are asked to do—and to take from the legal department of the Government and from the Comptroller General's office the authority which the law imposes upon them to pass upon the legality of contracts, and the appropriateness and propriety of payments under them.

Mr. WALSH of Massachusetts. I thank the Senator. In other words, what we are proposing to do here is to cancel a contract made and entered into by the Post Office Department and in force at the present time?

Mr. WHITE. To cancel a particular payment called for under that contract.

Mr. WALSH of Massachusetts. That is the same thing as canceling the contract.

Mr. WHITE. Yes.

Mr. TRAMMELL. Mr. President, I differ from that attitude. It is not a matter of canceling a contract. The Seatrain Co. have forfeited their rights under the contract. They have confessed that by going to the Postmaster General and asking for a modification. They have confessed that by going to the Shipping Board and asking for a modification. So it is not a matter of the Government canceling the contract; it is a matter of the Government, through Congress, saying: "We do not think it is advisable under the law that you permit this modification, even if you have a right to do it."

Certainly that is within the prerogative of Congress, and a legislative question, when we are called upon to make an appropriation to meet a certain condition. These people are not entitled to one dollar, according to their own petition—in substance, that is what it means—unless the Postmaster General attempts to modify the contract.

Senators talk about the sanctity of a contract on the part of the Government. I believe in keeping Government contracts; but those arguing in behalf of this company have not said one word about the agreement of the company with the Shipping Board which provided that they would not ask for their subsidy on the mail contract if the Shipping Board permitted them to modify their original route and run from New Orleans via Habana to New York.

Somebody has intimated that there was some coercion about that. No coercion whatever has been established. It is absurd and ridiculous to talk about coercion. These people were in a very desperate plight. They were in a situation where disaster was hanging over them. They either had

to have their ships idle, engaged in unprofitable trade, or else they had to get some modification through the Shipping Board that would permit them to operate on to New York and establish a business which, according to their own statement, is 80 per cent coastwise trade. So they go to the Shipping Board, asking them to modify the contract; and I will say that the Shipping Board are to be commended for their action. They say, "If you are going to divert your route, if you are going to change the situation completely, if you are going to enter into competition with all these ships that we have engaged in the coastal trade, many of which have to be tied up to the docks at the present time, we are not going to permit that change unless you will agree to let your subsidy go. You obtained that subsidy upon the basis of the idea that you would operate from New Orleans to Habana, a foreign port. You are carrying on a foreign mail service. You did not intimate to us that you wanted to operate 80 per cent in the coastal trade. Your presentation of this case to us was that you wanted to engage in foreign trade. Therefore, if you are going to change the whole situation, the whole character of your enterprise and your operations, you must not ask a continuation of this Government subsidy through the mail service."

I imagine at that time they were very willing to say, "Oh, we surrender that. We expect to surrender that, because if we do not get some change here we have no business whatever in which we can engage." It was absolutely unprofitable to run from New Orleans to Habana, so they readily surrendered their right to the mail subsidy. I do not think they were coerced at all. Yet there are some who want to go ahead and pay them for it when they surrendered it in their own agreement and under the resolution of the Shipping Board, because, forsooth, for some reason it appears possible now that they can get the Postmaster General to agree to this modification, although in December the First Assistant Postmaster General stated to the House that he did not think they were entitled to it.

I should like to have Senators say what they think of the statement of the Assistant Postmaster General, who has largely been in charge of this matter, when he stated to the House committee that he did not think the Seatrain Co. were entitled to the pay; he did not think they were entitled to a modification of the contract; he did not think the Postmaster General would agree to a modification. That was the position of the First Assistant Postmaster General before the House committee in December.

Mr. COPELAND. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from New York?

Mr. TRAMMELL. I yield.

Mr. COPELAND. Assuming that the Senator is entirely right, and that that was the attitude of the Assistant Postmaster General, in spite of that, on January 11 the Postmaster General wrote to the Seatrain Co., as follows:

> In view of the premises and considerations stated in your letter, it would, in my opinion, be in the interest of the Government to accept your proposal, and I hereby agree to the modification of the contract on ocean mail route No. 56 accordingly.

So, regardless of what the Assistant Postmaster General said in December, or whenever it was, on the 11th of this month the Postmaster General entered into an agreement to modify the contract.

Mr. TRAMMELL. Mr. President, my position is that those who come into courts of equity should come with clean hands. We hope there is some equity left in the Senate. If these people have obtained any such modification as that, then they went before the Shipping Board and by deception and by fraud, in substance, persuaded the Shipping Board to agree to a modification of their contract upon the specific promise that they would not ask for a continuation of the subsidy. I stand by the Shipping Board. They have two contracts. I stand by the contract which they made with the Shipping Board and not an act of favoritism and the height of discrimination by the Postmaster General, against the policy of the law.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from New York?

Mr. TRAMMELL. I do. I hope, however, that the Senator will not make a speech in my time. I shall be through in a few minutes, and then the Senator can take the floor. If he desires to ask a question, however, I yield to the Senator.

Mr. COPELAND. I do not want to make a speech, but I want the Senator to be accurate. I ask him if he knows that the Shipping Board, by a resolution, has authorized the Seatrain Lines to carry coastwise trade between the ports of New York and New Orleans by way of the new Seatrain vessels for a period of six months from October 6?

Mr. TRAMMELL. Why, certainly. They authorized it upon the representation to the Shipping Board and upon the agreement by the company that the company would surrender the mail subsidy and not ask for a continuation of it. They obtained that authorization upon a false representation or false pretenses then, if they are going to be permitted to draw pay for it now during that time. That is what the Shipping Board states. The letter was placed in the RECORD this morning by my colleague [Mr. FLETCHER].

I had not intended to make any reference to the early history of this Seatrain contract; but in view of the fact that some Senators seem so persistent now in their contention that we should not preserve the policy of the law, that we should not refuse to fall in line and march step and step with an administrative officer who is violating the spirit, if not the letter, of the law, I desire just briefly to say that this entire contract from its very inception was exceedingly suspicious, to say the least.

It has been said here before, but I may repeat it, that a certain company decided that they would obtain a subsidy and obtain some money from the Shipping Board. They went before the Shipping Board with a peculiar type of vessel and asked for loans, asked for a subsidy; and the advertisements for bids prescribed specifications that no one else could comply with within the time that was fixed. It was an absolute absurdity and a farce even to have advertised at all, and I am sure they would not have advertised had not the law required it, for three weeks. For three weeks they advertised under the law that they wanted bids on a ship that would carry 90 railroad cars, and certain other specifications. In this country there never had been a ship of that type before, or rather of that capacity. They probably got the idea from boats of that type that were operating between Key West, Fla., and Habana, Cuba, but the specifications in this case called for a ship of 90 railroad-car capacity and certain other specifications. Other people who were interested were unable to get any information whatever as to what was going on. Then they come out all at once, on a bright, sunshiny day, with specifications saying, "We invite bids on a ship that will carry 90 railroad cars," and certain other specifications.

They knew the whole stage had been set for the contract to be given to this company, for the subsidy, and for them to obtain a loan from the Shipping Board.

Mr. BROUSSARD. Mr. President, will the Senator yield to me?

Mr. TRAMMELL. I yield.

Mr. BROUSSARD. Is it not a fact that they extended the time one full year so as to give a chance to the Florida company to decide whether or not they would bid?

Mr. TRAMMELL. The Senator is wrong on the record entirely. There were delays, because this company was trying to keep other people out of the field by having them denied the right of entering New Orleans. They were trying to keep them out of the field by filing an application before the Interstate Commerce Commission for this company. Then there was considerable other delay, because the Navy Department and the Shipping Board did not work quite as freely in the transaction as did the Post Office Department from the beginning. The Navy Department first disapproved the contract, would not give the approval that was required under the law. Then of all the logrolling and

manipulation! Talk about force and coercion; they were used on the Navy Department to get an approval finally of a modified and changed character of vessel. Then they gave their approval reluctantly, half-hearted approval, as far as the vessel's availability or value as a naval ship was concerned, and as to being of any value in time of war was concerned.

Mr. BROUSSARD. Mr. President, will the Senator yield again?

Mr. TRAMMELL. Wait a moment. There were other delays, because the committee which had the jurisdiction of passing upon the proposition at the Shipping Board, and the Shipping Board itself, first disapproved of it. There was no approval of this transaction except in the Post Office Department to begin with. We never heard of such logrolling and manipulating, such star-chamber sessions, and such keeping of what was going on from other probable competitors. They did not want any other competitors. They wanted to drive everybody else out of the business, and give the contract to the company which finally got it.

Mr. BROUSSARD. Mr. President, will the Senator yield now?

Mr. TRAMMELL. I yield; yes

Mr. BROUSSARD. Is it not a fact that the Florida company applied to the Interstate Commerce Commission for the right to run their boats to New Orleans, that the Postmaster General extended the time for the bidding one full year, and that it was awarded to the Seatrain Co., not for old ships, but for new ships, to be constructed under the law which the senior Senator from Florida, as chairman of the Committee on Commerce, wrote into the United States statutes. Had not a whole year's delay been granted, when they were not proposing to build the ships which the Seatrain Co. built, two of them?

Mr. TRAMMELL. They did not delay on account of giving anybody an opportunity to bid. The attitude was the reverse, one of a closed door against other bidders and competitors. They delayed on account of this matter not being approved by authorities required to approve it, to begin with.

If they had wanted to give the competitors an opportunity, why did they not let the competitors know in time as to the specifications? One probable competitor, not for Government subsidy, but for the privilege of using the route, being willing to undertake it without a Government subsidy, in the nature of a mail subsidy, or in the nature of a loan from the Shipping Board, was trying to keep up with the situation, trying to ascertain what was going on, and they could not get information. The desire was that they should not have information as to what was going on.

Mr. BROUSSARD. Mr. President, is it not a fact that the mail subsidies are not granted to ships already built, but to ships that are to be built with the approval of the Shipping Board, the Navy Department, and the Post Office Department?

Mr. TRAMMELL. That is a fact, and it is also a fact that whenever the law has been so misadministered and so administered as to give a subsidy to ships that were unneeded, ships that were unnecessary to assist in the building of the American merchant marine, there has been a flagrant violation of the law, the spirit of the law at least.

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. TRAMMELL. I yield.

Mr. McKELLAR. I wish to call attention to the fact that no competitor had a chance to bid on these ships.

Mr. TRAMMELL. That is what I said, that no competitor even had notice long enough in advance to enable it to bid.

Mr. McKELLAR. I have before me the advertisement, and it did not permit the contractor to bid unless the contractor proposed to build, and would build, a ship of capacity sufficient to carry 90 cars. The mail amounted to about 1,500 pounds. Two other companies subsidized by our Government are already carrying mails between New Orleans and Habana, and this was a third subsidized company. The Postmaster General required in his advertisement that the contractor must build a ship capable of carrying not less than 90 cars, and the Seatrain Co. was the only company on the seas that had such a ship or that proposed to build such a ship. Necessarily, the law was violated in doing away with competition, and so, in my judgment, the contract is certainly fraudulent in law, and even worse might be said of it.

Mr. TRAMMELL. It was a flagrant violation of the spirit and purpose of the law, if not a violation of its letter, in my opinion.

Mr. BROUSSARD. Mr. President——

Mr. TRAMMELL. Does the Senator want to ask a question?

Mr. BROUSSARD. I want to ask the Senator from Tennessee a question.

Mr. TRAMMELL. Very well; but I want to get through.

Mr. BROUSSARD. How does the Senator from Tennessee expect to apply the law and build up a merchant marine unless new ships are built? Would the Senator think that the law was intended to give mail contracts and subsidies to ships that already belong under the American flag, or to new ships to be built for service under the American flag?

Mr. McKELLAR. Of course, the Post Office Department has made no rule about that. They give subsidies to ships already built, or subsidies to ships which may be built, if the contractor is "right," if he "stands in."

Mr. BROUSSARD. To ships the Shipping Board sold, yes; but not to other ships of private lines.

Mr. McKELLAR. While I am on my feet, let me call the attention of the Senator from Florida to the fact that the first requisite of the act of 1928, under which this contract was let, was that there should be competition, and competition was absolutely excluded by the advertisement. And let me call attention to the fact that at that time the Seatrain Co. was a British company, with a ship of the kind specified carrying the British flag, when the first application was made, and then an effort was made to favor the particular manager of this company, who in some marvelous way seems to have the whole country at his back. I am referring to Mr. Brush, the president of the old British company, the president of the new American company. He seems to have all the powers-that-be at his back, and can get any kind of a contract, or get any contract changed whenever he desires to do so. He obtained this contract under terms that certainly make it fraudulent in law.

Mr. TRAMMELL. And under terms the average person, without a lot of influence behind him, could not have obtained.

Mr. McKELLAR. No one in the United States could have obtained them except this man, because they did not allow anybody else to bid on the contract.

Mr. TRAMMELL. I do not blame him, but I blame the officials representing the United States Government whose duty it was to see to the carrying out of the spirit of the law, and to the conservation of the rights of the American people, and of other people engaged in this industry. They are entitled to some consideration.

I did not really care to refer to all this first chapter in connection with this transaction, which, to me, seems to have been very one-sided, and a transaction in which sight of the interests of the Government seems to have been entirely lost, and to have been given no consideration whatever.

The matter concerns Congress. The House has said we must not pay any money on account of a modification of this contract. The argument in regard to the contract being legal, when we had the question up a year ago, might have had a little semblance of force and merit in it, dealing with the original contract, but now we have a different situation, we have a situation of the company not having complied with its original contract, and coming and asking the Government for a modification of its contract, a modification which would in every respect violate the spirit and the purpose of the American merchant marine act, and be vio-

lative of the authority for the granting of a subsidy through the Post Office Department.

As far as I am concerned, I think Congress, in both branches, should act as the House did, and approve the proviso that would prohibit the Comptroller General approving of the item of $140,000 for this purpose.

Mr. BROUSSARD. Mr. President, we had the same proposition to deal with the last time a similar appropriation bill was before us. The amendment then was known as the Davis amendment. I suppose Representative DAVIS inserted it again in the House.

The amendment is to be found on page 57, line 4, and would strike out the words, "That no part of the money herein appropriated shall be paid on contract No. 56 to the Seatrain Co."

I heard the remarks of the senior Senator from Florida [Mr. FLETCHER], who was the chairman of the Committee on Commerce, I think, at the time when we tried to restore and revive and to give this Nation a merchant marine. Of course, many of us on this side do not like the word "subsidy," but everybody knows that that law was intended to subsidize lines to other nations in the world, and to encompass the entire earth. My friend the senior Senator from Tennessee [Mr. MCKELLAR] has been fighting this proposition because he realizes that it is a subsidy, and is very much opposed to it.

Mr. President, so far as the Senators from Florida are concerned, if the company operating the boat from Key West to Habana had gotten this contract, they would be standing here defending the contract. But they did not get it, and they did not get it for several reasons. First, the law provides that one can not get a mail subsidy by offering an old boat which is already built and under the American flag. But the Seatrain Co. offered to build two boats, with a capacity of 90 loaded freight cars, to run from New Orleans to Habana. Their plans were all drawn up, and after being submitted to the Navy Department, it appeared that that department wanted airplane carriers which could be used in case of emergency. They even provided that the pilot house should be put on the left side of the ship, and rearranged the whole structure of the ship.

The Seatrain Co. put in a bid for two ships that would carry 90 loaded freight cars. The Florida company was not excluded. As I recall the hearing—and I attended the hearings for three or four weeks last year, when a provision similar to the one under discussion was before the committee—they applied to the Interstate Commerce Commission to be given the right to go into the city of New Orleans, and to sail from New Orleans to Habana. For some reason this application was not acted upon promptly. I do not know what insinuations the Senators from Florida have to make about it. I never heard of it until the hearings after the contract had been duly executed between the Post Office Department and the Seatrain Co.

Before the contract was awarded, the Postmaster General extended the time for one year, in order to give a chance to any competing company to decide whether or not it was willing to undertake the construction of two boats that would carry 90 loaded freight cars from New Orleans to Habana and back. There was no response. When the contract was executed the Florida company had not yet obtained from the Interstate Commerce Commission, and I doubt if they have it now, a license to enter the port of New Orleans. The contract was executed. No one challenges the contract.

The amendment is intended to strike out the language providing that no part of this money shall be paid on contract No. 56. That is an admission that there is a contract. I do not care what anybody thinks about the contract. We are not sitting here to set aside contracts. We are here to pay whatever amount is stipulated in the contract, and it is up to the courts to set aside any duly executed contract entered into by the Government of the United States.

Mr. President, the two boats have been completed. They were constructed with the money borrowed largely from the Shipping Board and which is due the Shipping Board and, indirectly, the Treasury of the United States. Now that the boats are built, we find Senators who would deny the annual payment under the contract instead of offering a resolution to direct the Attorney General of the United States to move to declare the contracts illegal and void.

Mr. MCKELLAR. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Louisiana yield to the Senator from Tennessee?

Mr. BROUSSARD. I yield.

Mr. MCKELLAR. Will the Senator agree to vote for such a resolution, leaving it to the courts to determine?

Mr. BROUSSARD. I think the contract is valid. I have sat in the committee with the Senator from Tennessee for several years and he thinks that all of the contracts are invalid.

Mr. MCKELLAR. Oh, no. I think all of them except five are invalid. I think the courts ought to pass on them. If the Senator is willing for the courts to pass on them, I shall be very glad to vote for a resolution providing that that be done.

Mr. BROUSSARD. How many contracts does the Senator challenge?

Mr. MCKELLAR. Thirty-nine.

Mr. BROUSSARD. Did the Senator vote for the bill which permitted the payment of these subsidies?

Mr. MCKELLAR. I did not.

Mr. BROUSSARD. The Congress passed the bill, however,

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from New York?

Mr. BROUSSARD. I yield.

Mr. COPELAND. I was quite surprised to have brought up again in the Senate the original contract of the Seatrain Co. We have argued that here year after year and the Senate has always taken the view that it is all right. But now comes the further argument that this is an invasion of the intercoastal rights of our country.

Mr. BROUSSARD. It is no invasion at all. For the Senator's information I ask to have inserted in the RECORD at this point a communication from the Seatrain Co. to the Postmaster General and his acceptance of a modification which would deprive him of any right to claim anything under that contract because of the sailing from Habana to New York. That, I think, will dispose of the suggestion made by the Senator from New York.

The PRESIDING OFFICER. Without objection, it is so ordered.

The communication is as follows:

JANUARY 9, 1933.

THE POSTMASTER GENERAL,
Washington, D. C.

SIR: The contract for ocean mail service on route No. 56, made the 31st day of October, 1931, by the United States of America, represented by the Postmaster General and Seatrain Lines (Inc.), provides, inter alia, that the latter undertakes, covenants, and agrees with the United States of America, pursuant to the provisions of the merchant marine act, 1928, and the advertisement of the Postmaster General, as follows:

"1. (a) To carry all mails of the United States offered, whatever may be the size or weight thereof, or the increase therein during the term of this contract, in a safe and secure manner, free from wet or other injury, from New Orleans, La., to Habana, Cuba, on a schedule approved by the Postmaster General, that shall include not less than 50 trips per annum during the first two years and not more than 100 trips per annum during the remainder of the contract term (subject to other provisions of this contract for increase or decrease in frequency);

* * * * * * *

"(g) To provide and operate in the performance of this contract, cargo vessels of class 5, capable of carrying not less than 90 railroad cars and of maintaining a speed of 13 knots at sea in ordinary weather, and of a gross registered tonnage of not less than 6,500 tons;

"(h) To have constructed in American shipyards two (2) new cargo vessels of class 5, capable of carrying not less than ninety (90) railroad cars and of maintaining a speed of fourteen (14) knots at sea in ordinary weather, and of a gross registered tonnage of not less than six thousand five hundred (6,500) tons, and place them in service in lieu of or in addition to vessels specified in paragraph (g) hereof, as soon as practicable, but not later than the end of the second year of the term of this contract.

* * * * * * *

"6. (a) That the term of this contract shall be ten (10) years, beginning at a date optional with the contractor, but not earlier than January 1, 1932, or later than October 31, 1932."

Seatrain Lines (Inc.) has constructed in an American shipyard in compliance with the terms of said contract two new cargo vessels which have met the requirements referred to in paragraph 1 (h) above. One of said vessels was placed in service from New Orleans to Habana on the 13th day of October, 1932, and the second vessel on the 20th day of October, 1932. Since said dates said vessels have made regular sailings weekly from New Orleans to Habana, and have been and now are ready, able, and willing to perform all of the services required of Seatrain Lines (Inc.) by said mail contract.

Said vessels were constructed with the aid of construction loans under and pursuant to agreements the 3d day of December, 1931, between Seatrain Lines (Inc.) and the United States of America, represented by the United States Shipping Board. Said agreements contained, inter alia, the following provision:

"SEC. 38. The vessel will be operated in maintaining service on lines between New Orleans, La., and Habana, Cuba, and in other exclusive foreign service between Atlantic and/or Gulf ports and Cuba, or in such other service or services as the board may by resolution hereafter authorize, and not otherwise."

The United States Shipping Board, by a resolution adopted October 6, 1932, and subsequently amended by a resolution adopted December 21, 1932, has authorized Seatrain Lines (Inc.) to carry coastwise trade between the ports of New York and New Orleans via Habana in the new Seatrain vessels for a period of six months from October 6.

Said vessels, ever since the adoption of said resolution on October 6, have been and now are engaged in foreign trade between New Orleans and Habana and New York, and vice versa, and at the same time in coastwise trade between New Orleans and New York via Habana, and vice versa. While thus simultaneously carrying foreign trade from New Orleans to Habana and coastwise trade from New Orleans via Habana to New York, said vessels have performed the full mail contract service between New Orleans and Habana and have transported all cargo offered in foreign trade between said ports, all in compliance with said mail-contract and construction-loan agreements.

Inasmuch as the total mail compensation payable under said mail contract will through the performance by said vessels of not less than 50 voyages per annum during the first two years and 100 voyages per annum during the remaining eight years of said contract, being the schedule approved by the Postmaster General pursuant to section 1 (a) of said mail contract, amount to a sum which will be somewhat less than the excess cost of building said vessels in the United States and operating them under the American flag over what would have been the costs of their construction in foreign shipyards and of their operation under foreign flags; and as the mail compensation payable under and pursuant to the provisions of the merchant marine act, 1928, is designed to meet the amount of such differentials in cost so as to place the owner of an American vessel engaged in a foreign trade substantially on a parity with the owner of a similar foreign vessel in such trade as respects capital cost and cost of operation; and as Seatrain Lines (Inc.) is and will be benefited by reason of the authorization of the United States Shipping Board to carry coastwise trade between New Orleans and New York via Habana while fully performing said mail contract and maintaining its full foreign service under and pursuant to said construction-loan agreements; Seatrain Lines (Inc.) does not conceive it to be fair to the United States in the circumstances stated that it, Seatrain Lines (Inc.), should accept and retain the full mail compensation payable under said contract while it is simultaneously carrying foreign and coastwise trade in said vessels on said mail route between New Orleans and Habana.

Now, therefore, in consideration of the premises, Seatrain Lines (Inc.) hereby offers and undertakes, so long as it shall by reason of an authorization of the United States Shipping Board carry coastwise trade between New Orleans and New York via Habana, while performing said mail contract on route No. 56 to relinquish to the United States and to waive all claims to such proportion of the full mail compensation which would be payable under and in accordance with the terms and conditions of said mail contract as the revenue earned on the outward voyages on said route No. 56 by Seatrain Lines (Inc.) with the vessels performing said mail contract from coastwise trade from New Orleans to Habana bears to the total revenue earned as aforesaid on both foreign and coastwise trade from New Orleans to Habana, the revenue from coastwise trade from New Orleans to Habana being taken as such part of the revenue on coastwise trade from New Orleans to New York as the distance from New Orleans to Habana bears to the total distance from New Orleans via Habana to New York.

SEATRAIN LINES (INC.),
By GRAHAM M. BRUSH, *President*.

Witness:
G. S. AMORY.

Attest:
DONALD D. GRAVES,
Assistant Secretary.

JANUARY 11, 1933.

SEATRAIN LINES (INC.),
39 Broadway, New York, N. Y.

GENTLEMEN: Receipt is acknowledged of your letter of January 9, 1933, in which you state that, in consideration of the permission granted you by the Shipping Board in its resolutions of October 6 and December 21, 1932, to engage temporarily in coastwise trade between New Orleans and New York by way of Habana, you desire to request a modifiation of your contract on ocean mail route No. 56, between New Orleans and Habana, so that you shall be paid thereunder, during the period of said coastwise operation between the above-named points, only such proportion of the pay named in the contract as the revenue earned on outward voyages over the mail route from foreign traffic bears to the total revenue earned on such voyages, the revenue from other trade from New Orleans to Habana being taken as such proportion of the revenue on coastwise trade from New Orleans to New York as the distance from New Orleans to Habana bears to the total distance from New Orleans via Habana to New York.

In view of the premises and considerations stated in your letter, it would, in my opinion, be in the interest of the Government to accept your proposal, and I hereby agree to the modification of the contract on ocean mail route No. 56 accordingly.

Very truly yours,

WALTER F. BROWN.

Mr. BROUSSARD. The Senator from Tennessee, as he has just admitted, believes there are only five valid contracts. Of course, he lives away up at Memphis. If he lived on the coast we would have more, I suppose. Some are satisfied that the other 39 contracts are invalid. Therefore, without committing myself, I have subscribed to the subsidy. The Senator from Tennessee has not. The Senators from Florida have done so, and have voted for the bill. I would not promise the Senator from Tennessee to vote for a resolution to refer the matter of the contracts to the Attorney General. I think a resolution should be introduced to have them investigated, if that is his desire. But the contracts are valid. These people have spent more than $2,000,000 each on the two ships, and they are there for use of the Navy whenever emergency requires.

Mr. McKELLAR. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Tennessee?

Mr. BROUSSARD. Certainly.

Mr. McKELLAR. Can the Senator tell us whether or not they are in arrears in their payments to the Government on account of this contract?

Mr. BROUSSARD. I do not know. I am sure the Senator knows.

Mr. McKELLAR. I am told that the payments on practically all of the vessels for which money was borrowed at such remarkable rates of interest—one-fourth of 1 per cent, three-eighths of 1 per cent, one-half of 1 per cent, and other per cents which the favored companies were required to pay—are all in arrears, even with that small rate of interest. It seems to me they are in no position to come here and ask for favors.

Mr. BROUSSARD. I am not surprised that they are in arrears with the attacks made upon their contracts by men on the floor of the United States Senate who are desirous that we delegate the power to the Shipping Board and the Postmaster General to do these things. If we abrogate the law, I do not find it strange that they can not meet even the one-eighth of 1 per cent interest. That is my complaint about those who are seeking all the time to abrogate the contracts. Why not abrogate the law?

Mr. McKELLAR. If the Senator will vote for it——

Mr. BROUSSARD. No; I will not vote for it. Why does not the Senator abrogate the law?

Mr. McKELLAR. Because a majority of the Senate will not do it. That is one reason.

Mr. BROUSSARD. That is the way the Senator attacks their integrity and their credit by his annual assault upon these appropriations. That is not anything singular. The Senator will remember that I made an assault against the Philippine independence bill, when this body would not vote for it, by asking that a tax be applied. I did not want a tax, but I thought I would bring about some result. I did that in 1929.

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from New York?

Mr. BROUSSARD. I yield.

Mr. COPELAND. I do not like to let pass unchallenged the statement the Senator from Tennessee made about the standing of these various shipping lines with the Govern-

ment. The Shipping Board advises me that on December 31, 1932, the total cost of new ships built or reconditioned, receiving aid of construction loans, had reached the total of $210,000,000. That is, these private lines have expended with the aid of the Government $210,000,000. The total of loans outstanding at this time amounts to $123,000,000. In other words, the shipowners themselves have already paid in cash upon the cost of these ships more than 41 per cent. If they are given encouragement a little while longer, it will not be long before their equity is even greater than ours.

To my mind it would be a great mistake to let the country get the impression that we are giving this money to the shipowners. As a matter of fact, they have of their own money, as I have indicated, about $80,000,000 which they have invested, and from time to time they are making their payments. In addition, we have chosen to encourage the shipowners by reason of the fact that it costs more to build in our shipyards than it does abroad.

Mr. BROUSSARD. Yes; 50 per cent more.

Mr. COPELAND. It costs more to operate under our shipping laws than under foreign laws. We have chosen to assist our American merchant marine by these mail subventions. Here is one which was entered into in good faith. It has been modified in good faith. The Comptroller General refused to pass upon it and to make the payment a few months ago, but after adjustments and readjustments had been made and provision was made for a material saving in the annual outlay of the Government, the Postmaster General then entered into a new contract, a legal contract. I agree fully with the Senator from Louisiana that the Senate should not consider the thought of abrogating a solemn contract of the Government. It is unthinkable, as I see it.

Mr. BROUSSARD. I recall, and the Senator from New York will recall, that when we sat in the hearings there appeared the president of a shipping company which was asked to run a line of steamships to West Africa. The Senator from Tennessee asked how much mail he carried. He said, "I do not carry a hatful down to the African ports that I visit." The Senator from Tennessee thought that was a fine illustration of the basis for his opposition to mail contracts. That steamship line would not have been established, nor would the Shipping Board have been able to sell these ships unless it gave a subvention to carry mail. The Senator from Tennessee asked if he had not had one of these canceled and he said, "Yes. I forgot to write myself a letter, and there was no letter at that port, and therefore the Post Office Department canceled that port."

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. BROUSSARD. I yield.

Mr. McKELLAR. I understand the one about which the Senator speaks, who bought the Government ships and are carrying Government mail with this subsidy, have not even paid a single solitary installment on their ship. They got it on 20 yearly installments. They bought the ship for about one-tenth of what it cost and paid one-twentieth of the price, and since that time have not paid anything, but are getting the Government subsidy every month for the benefit of their stockholders.

Mr. BROUSSARD. Would we have such a line if we had not given them such a subsidy?

Mr. McKELLAR. I do not think it helps our foreign trade in the slightest. Indeed, it has been suggested on the floor of the Senate that the only purpose and the only reason why the line is running is to draw the subsidy. They do not have enough business to justify the operation of the line, and the only purpose in running it is to draw the Government subsidy.

Mr. BROUSSARD. How were we fixed during the World War?

Mr. McKELLAR. That is 14 years ago and we need not bother about that now. We have not one-third of the shipping we had when this act went into effect. Our merchant marine is going down annually since we have adopted the plan of granting these subsidies.

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from New York?

Mr. BROUSSARD. Certainly.

Mr. COPELAND. I want to invite the attention of the Senator from Tennessee to this fact. This is said in response to what he said about the West African Line. Is that the line?

Mr. McKELLAR. I believe that is the name of it.

Mr. COPELAND. I think that was the American-West African Line.

Mr. McKELLAR. It is the Herbermann Line, a prime favorite of the Shipping Board, its special pet, its special subsidy obtainer at large.

Mr. COPELAND. That is the American Export Line, I think.

Mr. WHITE. Mr. President, will the Senator yield?

Mr. BROUSSARD. I think I hold the floor.

Mr. McKELLAR. I beg the Senator's pardon.

Mr. COPELAND. Mr. President——

Mr. McKELLAR. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Louisiana yield, and, if so, to whom?

Mr. BROUSSARD. I yield first to the Senator from New York.

Mr. COPELAND. Mr. President, I wish to call the attention of the Senator from Tennessee to the fact that after the war when we found ourselves in possession of an enormous amount of shipping, we established various lines and operated them, and we did so with an operating deficit of from $40,000,000 to $50,000,000 a year. The Senator remembers the enormous appropriations we made. We determined under the Jones-White Act to get rid of these ships as fast as possible, to get them into private hands and let private citizens lose all this money; and now, instead of losing $40,000,000 or $50,000,000 a year, through mail subventions, in payment for services as well as to help the lines, we pay about $18,000,000 a year.

Mr. McKELLAR. Mr. President, we pay in subsidies to ocean-going vessels $28,500,000 a year. That is just what we pay to them. I have forgotten the exact number of millions we pay for the Shipping Board; but, as a matter of fact, we are paying out just as much in subsidies and in appropriations for the Shipping Board as we did in "the good old days" when we were losing $50,000,000 a year, and we are not getting anything like the service.

Mr. BROUSSARD. Of course, the service is not worth anything at all.

Mr. McKELLAR. I say we are not getting the service because we have not now as large a merchant marine in private hands by one-third as we had at that time.

Mr. COPELAND. If the Senator from Louisiana will permit me further, I know that my friend from Tennessee wants to be entirely accurate.

Mr. McKELLAR. I do; and if the Senator can give me facts showing that I have, in the slightest degree even, enlarged upon the figures, I shall be glad to take my statement back.

Mr. COPELAND. I have not imagination enough on my part to follow the Senator when he says that we are now paying in subsidies as much as we paid "in the good old days," as the Senator puts it, when we were operating the lines.

Mr. McKELLAR. We are paying $28,500,000.

Mr. COPELAND. I challenge those figures.

Mr. McKELLAR. If the Senator challenges them, then I can not read, because that is what is appropriated in this bill.

Mr. COPELAND. We are now paying for mail aid $18,000,000 a year to 44 lines, whereas we were operating 38 lines "in the good old days," at a deficit of from $40,000,000 to $50,000,000 a year.

Mr. McKELLAR. Mr. President, if the Senator from Louisiana will yield for a moment longer to allow me to

answer the Senator from New York, let me say that of course I may not be able to read, I sometimes wonder whether I am or not; but I am going to attempt to read from this bill the item at the bottom of page 56, as follows:

For transportation of foreign mails by steamship, aircraft, or otherwise, including the cost of advertising in connection with the award of contracts authorized by the merchant marine act of 1928 (U. S. C., title 46, secs. 861–889; Supp. V, title 46, secs. 886–891x), $35,500,000: *Provided*, That not to exceed $7,000,000 of this sum may be expended for carrying foreign mail by aircraft under contracts which will not create obligations for the fiscal year 1935 in excess of $7,000,000.

Seven from fifteen leaves eight, as I remember my arithmetic. So, $7,000,000 deducted from $35,500,000 leaves $28,500,000 appropriated for the shipping companies by this bill. The Senator may explain that if he can.

Mr. COPELAND. If the Senator from Louisiana will permit me, let me ask, Do we pay any money to any foreign ships to carry our mail?

Mr. McKELLAR. The Senator has asked a very pertinent question, and I shall be delighted to answer it. A number of these ships, notably those of the International Mercantile Marine, are owned, in large part, or controlled in large part, by foreigners, and that particular company, drawing, as I remember, something like $1,200,000 a year from our Government, is under contract with the British Government to turn its ships over to Great Britain in the event Great Britain should become involved in war, and that includes war with the United States. Yet this Government is furnishing the subsidy indicated to that very company.

Mr. WHITE. Mr. President, will the Senator from Louisiana yield to me?

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Maine?

Mr. BROUSSARD. I yield.

Mr. WHITE. Mr. President, it is rather difficult to know where to begin correcting the Senator from Tennessee in his statement of facts. He referred to the American-West African line. That is not the Herbermann Line. The Herbermann Line is the American Export Line, running to the Mediterranean area. The truth about the American-West African Line is that it——

Mr. McKELLAR. Does not Africa border on the Mediterranean? If it does not, I have lost all remembrance of my geography.

Mr. WHITE. Yes; it does; but that is not this line. The American-West African Line runs down toward the Cape of Good Hope. That line purchased ships of the Shipping Board and paid, or obligated itself to pay, $2,300,000 for those ships.

Mr. McKELLAR. What did they cost?

Mr. WHITE. I do not know what they cost. The line obligated itself under its contract to build new ships or to recondition old ships at an estimated expense of about $4,800,000, and that is a subsisting obligation.

Speaking of West Africa and of our trade there, back in those "good old days" there was not a single American ship going from the coast of the United States to Africa. Since 1927 there have been approximately 20 American ships operating in the service of that trade, and the trade of the United States, export and import, has increased approximately 325 per cent in that span of time.

If I am not trespassing unduly on the Senator from Louisiana, let me advert to what has been said about the expense of the merchant-marine legislation in comparison with the expenditures "in the good old days." I can illustrate the difference by citing figures as to the money that has been spent in various ways. In 1931 we paid, under our postal contracts, $18,818,000. The mail, if carried on a poundage rate under the provisions of the old law, would have cost something like $2,710,000. I am speaking from recollection, and there may be some inaccuracy, but what I am saying is substantially correct. In other words, in one year, 1931, the cost under our postal contracts was $16,108,000.

Go back to the period from 1921 to 1926—and 1926 was the last full year before serious consideration was begun of the merchant-marine legislation—and it will be found that the operating losses of the Fleet Corporation and the administrative expenses of the Shipping Board averaged $40,400,000 a year. In the year 1931, to which I have alluded, those operating losses and those administrative expenses had been cut to $6,900,000, a saving of approximately $33,500,000; and that is a saving of more than twice what the merchant-marine legislation cost us in the year 1931.

I could go on illustrating the point in various other ways if I were not trespassing on the time of the Senator from Louisiana.

Mr. BROUSSARD. Mr. President, I do not care to retain the floor longer. This matter has been threshed out on the floor. We had, as I recall, over three weeks of hearings in the Appropriations Committee last year and came to the conclusion that we should reinstate the item stricken out by the House that is known as the Davis amendment. I hope the Senate will now refuse to join the House; that it will stand with the committee upon this proposition and eliminate the provision inserted by the House.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

CHAIN STORES—REPORT OF FEDERAL TRADE COMMISSION

Mr. CAPPER. Mr. President, I hold in my hand the announcement made recently by the Federal Trade Commission of the transmittal of the ninth in the series of its reports under Senate Resolution 224.

The facts disclosed in this latest report in the chain-store inquiry are indicated by the captions of the commission's official announcements, which read:

Trade Commission studies short weights and overweights in chain stores. Latest report shows one-half of items bought in stores of four selected cities as lacking in weight.

This report provides conclusive proof of the methods by which the great chain organizations rob the unsuspecting public to recoup their price lure losses on popular, well-known articles.

The Senator from New York [Mr. COPELAND], the Senator from Iowa [Mr. BROOKHART], and I have called attention to evidence of the practice of those corporations in mulcting the consumer by extortionate prices on what they call "blind" or unidentifiable bulk goods. This report shows that they not only "long price" the buyer but also that they "short weight" him. This is the evil which we are seeking to eliminate by Senate bill 97, which is known as the fair trade bill and which I earnestly ask every Senator to consider in connection with this report from the commission.

I send to the desk and ask to have printed in the RECORD the commission's announcement and letter of transmittal to the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

FEDERAL TRADE COMMISSION,
Washington.

TRADE COMMISSION STUDIES SHORT WEIGHTS AND OVERWEIGHTS IN CHAIN STORES—LATEST REPORT SHOWS ONE-HALF OF ITEMS BOUGHT IN STORES OF FOUR SELECTED CITIES AS LACKING IN WEIGHT

(This is a summary of the ninth of a series of reports on chain-store practices. The complete report is to be printed.)

The Federal Trade Commission sends to the Senate to-day its latest report on chain-store practices showing, among other things, that out of all purchases of a selected list of commodities made especially for this investigation in chain stores in four widely separated cities, about one-half or 50.3 per cent of the items were short in weight.

The report is entitled "Short Weighing and Overweighing in Chain and Independent Grocery Stores."

On all purchases made for the commission from independent and cooperative chain-store retailers in the four cities, the short-weight items amounted to slightly less than half, or 47.8 per cent.

Overweights were obtained on only 34.1 per cent of the total purchases from chain stores as compared with 43.8 per cent of

the purchases from independent and cooperative chains combined.

Total net shortage (difference between total quantities short weight and overweight) on all items purchased from chain stores was slightly more than three-tenths of 1 per cent of the total quantity bought, as compared with a net overage for independents of .143 of 1 per cent. The overages and shortages from cooperatives exactly balanced. Combining the cooperative and independent dealer purchases the result is a net overage of .096 of 1 per cent.

While the size of the shortage for chains may seem insignificant to many, it would amount to 3.41 per cent on the investment in these bulk commodities, figured on the basis of the average stock turn of grocery and meat chains of 10.61 times per annum.

GOODS WEIGHED IN ADVANCE ARE OFTEN SHORT IN WEIGHT

The buyer of merchandise which is weighed and packaged in advance of sale stands about two chances out of three that he will get short weights from either the independent dealer or the cooperative chain and only a slightly better chance in the chain store.

A total of 795 items, or 12 per cent of the total purchases made for this report in the four cities, were preweighed and almost two-thirds of these were obtained from chain stores.

"As has been often alleged, short weights occurred more frequently on these preweighed items than on items weighed at the time of sale."

For the chains, the proportion of preweighed items which were short in weight was 59 per cent as compared with 50.3 per cent on both preweighed and other items.

For independents and cooperatives combined the difference was much more striking. The proportion of shortages on preweighed items was 65 per cent as against only 47.8 per cent on the total items purchased from those dealers.

The commission's report is based on the weights given on five bulk commodities bought in chain and independent stores and was undertaken to answer a charge frequently made that chain grocery stores obtain an advantage over independent stores through short-weighing of bulk commodities.

The commodities purchased were navy beans, dried prunes, lima beans, light-weight sweetened crackers, and sugar, the quantities varying from one-half pound to 4 pounds. They were obtained in a total of 1,691 stores situated in 4 cities, each having more than 100,000 population—1 situated in New England, 1 in the Middle Atlantic States, 1 in the South, and 1 in the Middle West.

Full text of the commission's letter of submittal of the report to the Senate is as follows:

LETTER OF SUBMITTAL

FEDERAL TRADE COMMISSION,
Washington, D. C., December 15, 1932.

TO THE SENATE OF THE UNITED STATES:

Under Senate Resolution 224, Seventieth Congress, first session, the commission was directed to make an inquiry into the chain-store system of marketing and distribution, including, among other things, "the advantages or disadvantages of chain-store distribution in comparison with those of other types of distribution." This report on short weighing and overweighing in chain and independent grocery stores deals with the subject of weights given on five bulk commodities purchased in chain and independent stores, and was undertaken to answer a charge frequently made that chain grocery stores obtain an advantage over independent stores through short weighing of bulk commodities.

It is often stated that in weighing out bulk commodities exact net weight can not be achieved in a large percentage of cases but that over a long period the shortages and overages will balance each other. Both shortages and overages are likely to occur when clerks weigh out bulk merchandise hurriedly while other customers are waiting to be served, or when the weight of a unit of the article sold is comparatively large.

SCOPE OF INVESTIGATION

To determine the extent to which the chain stores short weight commodities sold in bulk and also to determine whether this practice occurs more often in chain than in independent stores, five bulk articles were purchased for weighing from both kinds of stores without disclosing by whom and for what purpose such purchases were being made. The commodities purchased were navy beans, dried prunes, Lima beans, light-weight sweetened crackers, and sugar. The quantities of the commodities bought varied from one-half pound to 4 pounds.

The purchases were made in four cities, each having a population of over 100,000. To make the study representative the cities selected were located in different sections of the country; one in New England, one in the Middle Atlantic States, one in the South, and one in the Middle West. In each of these cities there were one or more of the six largest chain-store systems and also one or more local chains, as well as one or more cooperative chains with their membership of independent grocers. Practically all stores in the four cities were shopped, hence all types of stores in all types of neighborhoods are represented. In the four cities a total of 1,691 stores was shopped for the five bulk commodities.

Of the total number of stores shopped, 702, or 41.5 per cent, belonged to 11 different grocery or grocery and meat chains; 320, or 18.9 per cent, were independent stores affiliated with 11 cooperative chains; and 669, or 39.6 per cent, were independent stores without cooperative affiliations. As certain of the 11 chains operated stores in more than one of the four cities, the city comparisons are for 14 groups of chain stores.

PROPORTION OF SHORT, OVER, AND EXACT WEIGHT PURCHASES

On all purchases from chains in the four cities 50.3 per cent of the items were short in weight. On all purchases from independent and cooperative retailers 47.8 per cent were short weight. Overweights were obtained on only 34.1 per cent of the total purchases from chain stores as compared with 43.8 per cent of the purchases from independents and cooperative chains combined. Exact weights, however, were given on 15.6 per cent of the items purchased from chains but on only 8.4 per cent of those bought from cooperatives and independents combined.

AMOUNTS OF TOTAL SHORT OR OVERWEIGHT

The short weights (not including overweights) on total purchases from chains (0.987 of 1 per cent) were substantially below those of independents and cooperative chains combined (1.265 per cent).

However, the total net shortage (the difference between total quantities short weight and overweight) on all items purchased from chain stores was slightly over three-tenths of 1 per cent (0.321 of 1 per cent) of the total quantity bought, as compared with a net average for independents of 0.143 of 1 per cent. The overages and shortages from cooperatives exactly balanced. Combining the cooperative and independent dealer purchases the result is a net overage of 0.096 of 1 per cent.

While the size of the shortage for chains may seem insignificant to many, it would amount to 3.41 per cent on the investment in these bulk commodities, figured on the basis of the average stock turn of grocery and meat chains of 10.61 times per annum.

The turnover of certain other bulk commodities such as fresh meats and produce is probably much higher than the average, and these commodities constitute a substantial proportion of the total business of most chains selling groceries. A shortage of weight of the size found in this test, if it were applicable to all bulk commodities weighed by the chains, would obviously result in an increase in the rate of return on the investment in such commodities, and probably, because of their large volume, on total investment as well.

VARIATIONS IN CHAIN AND INDEPENDENT WEIGHTS BY CITIES

It should not be inferred that all chain stores gave short net weights or that all independent stores gave net overweights. In city No. 1 the chains gave short weights less frequently than either the cooperatives or independents. In the other three cities the former were more frequently short than the latter. In no one of the four cities did the chains give overages more frequently than shortages, although the cooperatives did so in one city, the independents in two, and the cooperatives and independents combined in two.

In city No. 1 the chains had a net overage in the total quantities purchased, but gave net shortages in the other three. The cooperatives likewise gave a net overage in only one city (No. 4) and were short in the other three.

The independents, excluding cooperatives, on the other hand, had a net shortage in total weight purchased in only one city and a net overage in three. Cooperatives and independents combined had net shortages in two cities and net overages in two.

Short weighing was found to be much more prevalent in city No. 2 for every group of distributors than it was in any other city. That city was the only one of the four in which every one of the three groups of distributors had a net shortage. The combined chain distributors in that city, with a net shortage of over 1 per cent (1.044 per cent) and 61.7 per cent of the total items purchased underweight, were responsible for a higher proportion of short-weight purchases and a higher net shortage than any other group of distributors tabulated in any of the four cities.

VARIATIONS IN WEIGHTS BETWEEN CHAINS

The proportion of purchases from the several chains which were short weight exceeded the proportion of purchases which were overweight in all but 2 of the 14 separate chain comparisons. For any chain the lowest proportion of short weights was 38.6 per cent of the total purchases made from it; the highest was 69.5. In most cases, overweights for the chains ranged from 30 to 40 per cent of the total items purchased. Eleven chains, or nearly 80 per cent of them, gave net shortages on the total quantities bought and in two cities, none of the chains had a net overage.

Of the 14 chain groups shopped in the 4 cities, there were only 3 which had net overages, the highest of which was 0.212 of 1 per cent of the total weight purchased. The range of net shortages for the different chain groups was from 0.036 of 1 per cent to 1.730 per cent.

VARIATIONS IN WEIGHTS BETWEEN COOPERATIVE CHAINS

The proportion of short weights given by cooperative chains exceeded the proportion of overweights in 5 of the 8 cooperative groups as compared with 12 out of 14 chain groups. The smallest proportion of short weights given by any cooperative was 37.8 per cent of the total number of items purchased from it, and the largest was 61.5 per cent. The proportion of overweight purchases from the various cooperatives ranged from 32.2 per cent to 53.2 per cent of the total number of purchases. The total quantities bought from each of 5 of the 8 cooperative groups of stores showed a net shortage in weight, while those from each of the remaining 3 showed a net overage. The largest net

shortage in weight for any one of these cooperative groups was 0.722 of 1 per cent of the quantity purchased; the largest net overage, 1.047 per cent.

SHORT WEIGHTS AND OVERWEIGHTS BY COMMODITIES

The chain stores were more frequently short weight than either the independent stores or cooperatives on two of the five items, navy beans and sweetened crackers, and were more frequently short than their independent competitors on dried prunes as well. On sugar and Lima beans the reverse was found, the chains giving short weights less frequently than their independent or cooperative competitors. Except on Lima beans, however, where the difference is very slight, the proportion of chain purchases which were short weight always exceeded the proportion which was overweight. The showing for the independents and cooperatives was slightly better, both of these types of distributors giving more overages than shortages on prunes and Lima beans. On sweetened crackers and sugar, however, the independents and cooperatives as well as the chains had substantially lower proportions of overages than shortages.

In actual net weight each type of distributor gave net overages on prune and Lima-bean purchases and set short weights on sweetened crackers. On navy beans the chains gave a net short weight, and the other type of distributors a net overweight, the reverse being true on sugar, where the chains had a slight net overage, and the other types of distributors were net short. Except in the case of sugar, where the chains had a slight overage, the overweights given by the chains were less and the shortages greater than was true of cooperative and independent distributors combined. The general and comparatively high shortages on sweetened crackers are possibly explained in part by the fact that this was relatively the most expensive article purchased in the various stores and also the one which was perhaps at the same time the least susceptible of accurate weighing.

EFFECT OF WEIGHING AND PACKAGING BY DISTRIBUTORS ON WEIGHING RESULTS

Since it is sometimes contended that preweighed bulk purchases reflect more clearly the attitude of grocery stores in the matter of accurate weights, considerable interest attached to the weight of such bulk items—that is, those items weighed by employees in advance of sale. A total of 795 items, or 12 per cent of total purchases (6,640 items) made, were preweighed and nearly two-thirds (64.4 per cent) of these were obtained from chains. As has been often alleged, short weights occurred more frequently on these preweighed items than on items weighed at the time of sale. For the chains, the proportion of preweighed items which were short in weight was 59 per cent, as compared with 50.3 per cent on both preweighed and other items. For independents and cooperatives combined, the difference was much more striking, the proportion of shortages on preweighed items being 65 per cent as against only 47.8 per cent on the total items purchased from those dealers. The chains therefore had a considerably smaller proportion of short weights on preweighed items than the independents or cooperatives separately or combined. They also gave exact weights on a larger proportion of items.

The buyer of commodities weighed and packaged in advance of sale stands about two chances out of three that he will get short weights from either the independent dealer or the cooperative, and only a slightly better chance in the chain store. Furthermore, the net shortage on these preweighed items is much greater, on the average, than is the case with items weighed at the time of purchase. On preweighed items the net shortage represented slightly over eight-tenths (0.813) of 1 per cent of the quantity purchased as compared with less than one-tenth of 1 per cent (0.091) on total quantities of all goods bought. Between chains and independent and cooperative chain dealers the difference in the size of the shortages on preweighed items was markedly in favor of the chains. The chains were net short 0.719 per cent of the total weight of the preweighed items bought, as compared with 1.005 per cent for the independents and cooperatives combined.

SHORT WEIGHTS AND OVERWEIGHTS, EXCLUDING PREWEIGHED COMMODITIES

Even after the exclusion of the preweighed items, the chains show, as they did in the case of total purchases, an appreciably higher proportion of exact weights, a somewhat higher proportion of short weights, and an appreciably lower proportion of overweights than do the other types of distributors.

Similarly, a comparison of the amounts of net overages and shortages for all purchases, excluding those preweighed, with the amounts of such net overages and shortages for all commodities purchased, showed a net shortage for the chains of two-tenths of 1 per cent, while the net overage for the cooperatives and independents combined was slightly over two-tenths of 1 per cent, the net difference amounting to about four-tenths of 1 per cent in favor of the independent stores.

FEDERAL RECLAMATION PROJECTS

Mr. STEIWER. Mr. President, my attention has been invited to a statement recently made before the joint meeting of the Senate and House Committees on Irrigation and Reclamation by the Hon. Marshall N. Dana. It is a very interesting statement, and I ask unanimous consent that it may be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF MARSHALL N. DANA, PRESIDENT OF NATIONAL RECLAMATION ASSOCIATION, PORTLAND, OREG., JANUARY 11, 1933

The business, industrial, transportation, and, I might say, publication interests of the West have become aware that an emergency confronts Federal reclamation. We share with the direct representatives of Federal reclamation projects an understanding of the plight of settlers upon the reclamation projects under conditions entirely beyond their control which have been created by the present depression. We are in sympathy with the proposal for time extensions on settler repayments of construction charges, but we realize that if these extensions are granted there will be a loss of revenue to the reclamation fund and that this loss will prevent the continuance of construction on authorized projects.

It is imperative that we maintain reclamation as a national policy in order to conserve the basic values of the West. It is also imperative that a balance be struck between the arrangements for so-called moratoriums and a Treasury loan that will provide for the continuance of necessary construction. If construction is suspended on July 1, 2,500 to 3,500 men will be thrown out of employment. They with their families represent at least 10,000 persons, who will be subjected to severe distress, and their loss of earning and buying power will be felt in all other channels. The situation of these workers will approximate the plight of project settlers who have been unable under existing conditions to make any return.

As to whether Reconstruction Finance Corporation funds could be made available to irrigation districts, Dr. W. L. Powers, secretary of the Oregon Reclamation Congress, took up this question in Oregon, and was told that such loans would not be possible, the reason being that these projects could not be considered self-liquidating projects, since they were maintained by taxation.

I have come here to Washington authorized to say in behalf of the National Reclamation Association that all of the interests of the West are standing together in support of the Bureau of Reclamation and in behalf of legislation at this session of Congress that will meet the emergencies of the projects and of continued construction.

The National Reclamation Association asks that the Senators and Representatives from the arid-land States undertake a concert of action on legislation at the present session of Congress that will meet the emergencies of settlers upon established Federal irrigation projects and maintain the continuity of authorized construction.

We ask at this time the inclusion of no new lands for reclamation and no new projects of construction.

To salvage the values already created and to preserve the solvency of established projects is, we believe, a sufficient duty to ask of Congress under existing economic conditions.

It is our considered view that reasonable time extensions on payments due from settlers should be granted and that revenues thereby lost but imperatively required for authorized construction shall be supplemented by loans from the Federal Treasury. We believe it to be merely correct procedure to maintain a balance between the time extensions of settler repayments and the period to be allowed for in Treasury loans for construction.

We are informed by the Reclamation Bureau, and wish to repeat as evidence of the urgent need for effective immediate action, that unless suitable measures are adopted by Congress, all construction must stop July 1 of this year.

The National Reclamation Association also wishes to call upon the congressional delegation of Western States, as it has already called upon the western governors' conference, for leadership:

First. To maintain and to reestablish reclamation as a continuing national policy of the Federal Government. Second. To maintain unimpaired the efficiency and organization of the Bureau of Reclamation as a division of the Department of the Interior.

To the foregoing the National Reclamation Association, able to speak for the first time with the united voice and the unanimous sentiment of the West, pledges its unremitting endeavors and cooperation.

May I say that the National Reclamation Association was formed December 5, 1932, at Salt Lake by the National Reclamation Conference, composed of delegates who had been appointed by their respective governors or other proper State authorities, from Arizona, California, Colorado, Idaho, Montana, Nebraska, Nevada, New Mexico, Oregon, Texas, Utah, Washington, Wyoming, Illinois, and Minnesota. The reclamation conference was held one day in advance of the western governors' conference, which by resolutions, unanimously adopted, supported the conclusions of the reclamation conference and pledged support to the National Reclamation Association.

From the constitution of the National Reclamation Association I quote that * * * "The purpose of the association shall be to promote the cause of reclamation by irrigation, and to exert its efforts for the continuation of the services of the Federal Bureau of Reclamation and to cooperate with and assist it in bringing about the speedy completion of various Federal reclamation projects and to promote the adoption of such legislation affecting reclamation as shall meet the approval of the board of directors."

From declarations adopted by the association in the form of resolutions, I quote the following:

"We believe that the broad principle of Federal aid to reclamation should be extended to economically sound projects of regional

and national importance too costly for local or community effort; we hold that the immediate construction activity of the Bureau of Reclamation should be mainly confined to providing supplemental water supplies and completing or reconstructing works on existing Federal and non-Federal projects which are economically sound and on which such aid is urgently needed.

"We recognize further that, due to several conditions, payments accruing to the revolving funds have been materially decreased. Under the principles heretofore set forth, the activities of the Reclamation Bureau will contribute materially to the recovery of now existing agricultural areas in the Western States and therefore assist in farm relief.

"We indorse the principle of further advances to the revolving fund of the Bureau of Reclamation, to be repaid at definite and stated periods.

"While seeking to bring support to a continuing and effective policy of Federal reclamation, consistent with the general economic situation, we can not fail to recognize that an emergency exists on reclamation projects comparable with that existing in all agricultural districts, as well as in other lines of industry, and due to the same causes. This condition makes necessary some provision for an extension in the repayments of construction charges commensurate with existing needs.

"We commend this problem to the sympathetic consideration of the Congress in the belief that it can and should be met in such a way as to maintain the ultimate integrity of the revolving reclamation fund.

"We deem the existence and continuance of the Bureau of Reclamation of vital importance to the West and the entire Nation.

"It has been the policy of every administration to appoint a western man as Secretary of the Interior, and selections have been able men with an intimate knowledge of western problems.

"We urge the Bureau of Reclamation be maintained as a part of the Interior Department, which alone has acquaintance with the problems of water administration and conservation."

A provision was made on recommendation of the committee on legislation that a program of education be carried on showing the benefits of reclamation and irrigation to the West and to the Nation, and how necessary it is to continue the work of the Bureau of Reclamation to prevent a great loss to the Nation and to the West in the investments already made and to continue the proper growth and development of the West.

The active direction of the National Reclamation Association was given to a board of directors consisting of one director from each of the States having Federal reclamation projects, Messrs. Thomas Maddock, Arizona; Arthur B. Tarpey, California; E. B. Debler, Colorado; N. V. Sharp, Idaho; Sam Stephenson, Montana; R. A. Smith, Nebraska; George W. Malone, Nevada; Marshall N. Dana, Oregon; Roland Harwell, Texas; William R. Wallace, Utah; A. E. Larson, Washington; Perry W. Jenkins, Wyoming.

The National Reclamation Association does not take a position as between States or Federal reclamation projects in support of one to the detriment or prejudice of others. But we do wish to urge in the strongest terms the necessity to support reclamation as a policy and to free it from hostile, sinister, and inaccurate propaganda.

The purpose of the reclamation act passed by Congress in 1902 was to make water for irrigation available for tracts of arid land owned by the Federal Government in the West. Such an act was most proper in view of the fact that the Federal Government is the largest landowner in the so-called public-land States, having the ownership of 52 per cent of their area. The original purpose has been widened to include the supply of irrigation water for tracts in private ownership when necessitated by the character of irrigation development undertaken.

In order that western resources might to an equitable extent be used to stimulate reasonable western progress by reclamation, a revolving fund was created by provision that 95 per cent of the receipts from the sale of public lands and 52½ per cent of royalties derived from the leasing of mineral lands should be used for this purpose. All repayments of construction charges to the revolving fund were to be used in the development of other projects. In the year 1930, the reclamation revolving fund received 7 per cent of its income from public-land sales, 26 per cent from royalties, and 67 per cent from project collections. From the Federal Treasury two loans totaling $25,000,000 have been made to the reclamation fund and $10,000,000 of this amount has been repaid. It was provided that retirement of these loans should be at the rate of $1,000,000. This rate was continued for 10 years. By amendatory legislation extensions in repayment were granted until July 1, 1934, when the rate will be $2,000,000 a year for five years. Thereafter the balance is repayable at the rate of $1,000,000 a year until fully repaid.

A little less than 3,000,000 acres, or four-tenths of 1 per cent of the national crop acreage, have been irrigated. Homes have been provided for more than 41,000 families of country-minded people of small means who dwell upon irrigated lands and continue in healthful, productive employment.

While the value of crops grown on irrigated land represents but three-fourths of 1 per cent of the total crop value of the Nation, the activity has been of the first value in balancing other agricultural and industrial pursuits of the West, including grazing and livestock, mining, manufacturing, transportation, commerce, and municipal development. It may be conservatively stated that of every dollar of irrigation investment now in the balance and dependent for solvency largely on measures now to be enacted, four other dollars of investment are involved. We are dealing with basic security and the stake is stability and, almost, the solvency of the West.

Although we are told that the industrial East is antagonistic to reclamation, we are scarcely able to believe that other than prejudiced individuals are playing this rôle, since Federal irrigation projects afford an ever-expanding market for the sale each year of approximately 100,000 carloads, valued at more than $100,000,000, of manufactured products. Incident to the Federal projects, some 13,000,000 acre-feet of water are stored in some of the greatest reservoirs of the world, built with no major defects. These storage reservoirs, part of an ultimately comprehensive program, conserve run-off and tend to prevent soil erosion and floods.

Under the present reclamation law and policy no projects are constructed until their feasibility has been definitely determined from all standpoints, and no new projects, as said before, are now being advanced in the program sponsored by this association, the Reclamation Bureau being engaged chiefly in completing projects heretofore authorized by Congress or in furnishing supplemental water to projects whose supply has been found inadequate to meet their needs.

Irrigation districts are in need of replacements or supplemental construction to save existing values and relieve settlers. This can best be accomplished by extending the services of the Federal Reclamation Bureau organization to aid in irrigation-district rehabilitation.

On Federal irrigation projects, since adoption of the act of 1902, some $280,000,000 have been spent by the Reclamation Bureau; values aggregating some $2,000,000,000 have been produced, largely of foods represented in the deficiency crops, of which, prior to the present depression, we were importing some $2,000,000,000 worth a year. Reclamation does not have any material effect upon alleged crop surpluses. I wish to call attention to an impressive statement made by John W. Haw, agricultural director of the Northern Pacific Railroad, before the National Reclamation Conference at Salt Lake:

"Now the argument in general use against Federal reclamation is that the production of lands reclaimed aggregates an agricultural surplus which is alleged to be chiefly responsible for present low prices.

"It has been conclusively and repeatedly shown that products on irrigated projects are almost entirely those in which domestic consumption far exceeds production; that in the aggregate project agricultural production is but an infinitesimal part of our total production and could not possibly have a controlling effect. It would not seem necessary here to enlarge upon these points. Rather, we should concern ourselves with the refutation of the major premise of this argument, namely, that surplus production generally is in any major extent responsible for the level of low agricultural prices prevailing in this depression. We should be in a position to say, both, that reclamation does not contribute appreciably to the surplus; but, if it did, so far as the present situation is concerned, what of it?

"The anthem of surplus-production responsibility for present ruinously low prices, sung by most farm-distress diagnosticians, will not stand either analysis or test. We propose to discuss this question here in some detail, as it is the foundation of the present agitation against reclamation; in fact, against any further land development. In fact, it is commonly used to show that lands and farms now in production should be allowed to slip out of production under the stress of present economic conditions. The price of agricultural products produced in surplus, or those produced at a balance between consumption and production, or, again, those produced in a quantity far less than normal consumption, are all about equally low in price. Wheat and cotton, both surplus crops, are miserably low in price; but no lower than potatoes or hay—crops produced about in balance—nor are they lower than flax, sugar, and wool, which are produced domestically in but a fraction of our requirement.

"We are not here saying that the law of supply and demand has been repealed or that it is suddenly inoperative. We contend that demand has suddenly and drastically been curtailed and that to shrink supply to the proportions of present demand would depopulate 25 per cent of the farming areas of this country; that with recovery from the depression demand will again return and fair prices will obtain for even our present production. We contend that it is unsound economics and poor national policy to urge correction of the present price situation from the supply side—rather, attention should be focused on a correction of the demand side. Flax, sugar, and wool are crops now flowing in large quantities over what we thought heretofore was a satisfactory tariff wall, yet the price comparatively is as low as on the so-called surplus crops. Further, the present argument falls flat when we consider the situation as to wheat. In the world, and in this country, wheat acreage in 1932 was nearly 15 per cent under predepression years; yet the price has not raised, it has declined. In 1929 this country produced 812,000,000 bushels of wheat on 62,000,000 acres. The average price that year was $1.03 a bushel. Three years later, in 1932, wheat acreage had shrunk to 55,000,000 acres and the crop, principally by reason of poorer growing conditions, amounted to only 712,000,000 bushels; but the price this year is around 50 cents a bushel. A drastic acreage and production shrinkage had absolutely no effect in checking price declines.

"What is true of wheat is likewise true of many other farm products. Certainly it is difficult, in view of statistics showing reduced production, yet declining prices, to arrive at the conclusion that either acreage or actual production has any direct correlation with price levels in a major depression such as we are now experiencing. In view of the fact that with 200,000,000 less bushels of wheat produced in this country this year as compared with 1928, and with the price 50 per cent lower, it is flatly absurd to be alarmed over the 1932 production of two and a half million bushels of wheat on 100,000 acres on Federal irrigation projects."

In 1926 the Reclamation Bureau began the 10-year program to complete unfinished works and works authorized by Congress. The program was based upon anticipated revenues to the reclamation fund of from ten to fifteen million dollars a year. The revenues have shrunk under the effect of world-wide conditions; the extension of payments to afford a merited relief to settlers who struggle as do other farms against conditions beyond their control create still further shrinkage, and the emergency of reclamation is at its crisis now.

The miserable and malicious sectional propaganda from which the West suffers is nowhere better exampled than in the article by A. Newton Edward in the May Atlantic Monthly.

This author, addressing himself to the citizens of Wyoming, Montana, Utah, Nevada, Colorado, New Mexico, Arizona, and Idaho and perhaps several other backward States, says:

"Either relinquish your privilege of selecting two Senators each year or get out of the Union. You may, if you elected to stay in, have among you one Senator, provided he promises to be seen but not often heard. The idea that a group of six so-called States, with a population of only 2,700,000, the least populous area in the whole civilized world, should each of them speak with as much authority as the great States of New York, Pennsylvania, Massachusetts, Illinois, and others is ridiculous. What good are they—to themselves or anyone else? What do they produce? What taxes do they pay? * * * These miserable Western States have nothing, and they are a drain upon the entire country."

While we recognize this as the work of a geographic moron, it nevertheless has its effect, and certainly it has its answer. Carried to logical conclusions, it would mean the maintenance of congested populations as human breeding warrens without expansion area. It would mean the cutting off of all but the heavily industrialized areas, turning over to others the markets offered by western irrigated areas for $100,000,000 of manufactured products. It would mean a premium on narrow homes, narrow jobs, narrow outlooks, and narrow graves. It would mean that the older sections of the country, with longer opportunity for development and growth, would now exclude the newer sections in which the forward steps of the Nation are being taken. It would mean that no longer is value placed upon inexhaustible resources in lumber, mines, range, and the superior qualities of fruit and dairy products. It would mean an America whose citizens no longer would be exalted by mountain heights, no longer intrigued by the sweep of endless plains, no longer thrilled by that adventuring into new lands that produced the resolute and stalwart American type, no longer led onward by the determination to carve homes and wealth out of the wilderness, and no longer claimed by the lure of lure of the shores of the setting sun. If the gauntlet is thrown down challenging our right to exist and to make progress, we take it up. These magnificent enterprises that quicken the pulse of every builder are creating no vacuum, but are the projection of the heroic present into a splendid future. These Federal reclamation projects are in the understanding of the individual settler and his family, the Nation's dare and Uncle Sam's partnership to building outpost homes on civilization's frontiers. In these people the pioneer spirit still is to be found at its height of exertion and independence. They no more classify as subsidy the advances from the reclamation revolving fund, which they know they will and must repay, than they thus consider the national administration or measures of national defense. In fact, they look upon the balanced development of the West as a measure of national defense in which reclamation is an integral and essential part and the Government's commitment in fostering it as firm a contract and certainly a more productive financial enterprise than the maintenance of the Army and Navy. To leave these settlers defenseless at this moment of emergency would be criminal.

A recent arrival in the National Capital, like myself, is bound to be impressed by the amazing amount of construction going on here at the expense and under the direction of the Federal Government. Beautiful buildings of marble and stone, of steel and brass, are going up on every hand. These are being prepared to meet the expanding administrative needs of a confident Nation that fears no backward step. Their construction at this time means very large employment relief. Such buildings awaken our pride in a country able to build so expensively and so permanently. We are told that these are structures intended to serve for the next 1,000 years. No suspension of construction has been allowed, we are further told, because authorization was granted and appropriations were made "when there was plenty of money."

I speak not for criticism, but only for contrast, when I say that we from the West speak for those who are building their castles not of marble and bronze, but from out of the soil—their castles, their homes. They also are engaged in carrying on as best they can with authorizations previously granted. Nor will we hear it said by anyone that these people who build at the very mudsills of the foundation of our national integrity are less deserving, their distress less a subject of governmental concern.

Reclamation justifies itself by its production of deficiency crops and avoidance of farm surpluses. It establishes a balanced relationship between the western farm and town and is contributive to every other form of productive activity. It has created a desirable and expanding market for manufactured products. When emergency necessity for production arises, as it is sure to do as a consequence of present repression, the reclaimed areas will help supply the need, particularly of western towns and of the ports and terminal cities of the Pacific coast. And reclamation helps the Nation take and maintain a strong front toward the problems of the Pacific. Farming by means of irrigation is not politics, is not propaganda, is not speculation and inflation, but is merely the method of farming made necessary by the character of the country. The Federal Government's cooperation is a solemnly assumed responsibility. Its relief of reclamation settlers and the continuance of projects should be undertaken through the established channel of the Reclamation Service.

And I am aware as these words are uttered of thousands of families of the best and most dependable people we have in America, who are waiting with strained attention and anxious hearts for the outcome of this conference and the action of Congress. Their homes, their families, their futures, are at stake. Their confidence rests in the business responsibility of their Government. It is an economic problem we present, but it is also a human problem. The cost is small compared with the vast sums made available to others no more meritorious. But the relief is imperative. When the National Reclamation Association asks that moderate Treasury loans be made for continuance of authorized construction and in amount corresponding to the loss of revenues by extension of settler payments, we speak in no narrow or provincial manner, but with a true nationalism, and we present an emergency. For its solution we look with confidence to the elected leadership of the West.

I have received this morning a letter from Charles E. Stricklin, State engineer of Oregon, in which he says that hundreds of men will be thrown out of work if authorized construction is suspended because of exhaustion of funds with which to continue, due to a moratorium. On the Owyhee project in Oregon alone, probably 1,000 men would be thrown out of work. While applications are being made for relief of the needy in Oregon through the Reconstruction Finance Corporation, those applications do not contemplate this additional number, together with their families, and it would seem absurd to place upon Federal charity those who under every consideration of good faith and contracted obligation expect to secure employment on these Government projects. I asked Dr. Elwood Mead, United States Commissioner of Reclamation, exactly what would be the situation confronted by the Reclamation Bureau at the beginning of the next fiscal year, July 1, 1933. I wish to present his answer to that question:

If a moratorium is granted on construction payments by the present Congress, a loan to the reclamation fund to replace the money thus withheld should be made. Without this, construction work will practically cease for lack of money by next July. The following facts show this.

On July 1, 1932, when the 1933 appropriation act went into effect, the balance in the fund was $3,700,000. Against that were appropriations amounting to $5,200,000. Six months later, on January 1, 1933, this balance had fallen to $2,000,000. Of this balance, $1,200,000 must be reserved to pay current debts, for labor and construction work for which the money is obligated under contracts, for material and supplies, and charges for transportation. This would leave on January 1, 1933, an unexpended balance of $800,000. Against this there are the obligations to meet payments on construction work in progress under contracts required to be completed before July 1, 1933, which will require $1,000,000, or $200,000 more than the balance in the fund available for construction January 1, 1933.

But there are other obligations in addition to this contract work. Construction work is in progress by the United States, mainly day-labor forces, which will require $600,000. Work authorized by Congress for which appropriations have been made but where the contracts have not been let, will require $850,000 more, making a total of obligations against the fund between now and July 1, 1933, of $2,450,000. In this 6-month period from January 1 to June 30, 1933, there will be an estimated income, outside of construction payments by settlers, of $1,250,000. This income plus the unexpended $800,000 in the fund, would make approximately $2,050,000 to meet obligations of $2,450,000, or a shortage of $400,000.

But that is not the only financial difficulty the bureau faces. The Treasury requires the bureau to maintain a working balance. All this money therefore can not be spent. Some of it must be held to protect the Treasury against unforeseen or unexpected demands, such as a flood to destroy canal banks. We will therefore face interruption in construction unless payments from settlers continue uninterrupted or a loan is given us.

There is another uncertainty regarding the money available for construction. There are certain cases where the bureau maintains and operates the works and later collects these expenses from the settlers. This is done where the settlers have not taken over the works. In the above we have assumed that these operation and maintenance payments will be made and that they will carry the cost of this operation. If, however, any project defaults in the payment of current operation and maintenance charges, there will be another reduction in the fund. Present conditions

indicate that some such defaults will occur, thus lessening the amount of construction money.

Construction work proposed in the bill now before Congress will require $3,000,000, which equals the entire estimated income, without settlers' payments, but that $3,000,000 appropriation will face a deficit on July 1, and the appropriation contains nothing for completing the reservoir needed at Vale, estimated at $1,100,000; nothing for completing the Salt Lake Basin project, estimated at $650,000; and nothing for the Stanfield project, estimated at $100,000.

This will mean, therefore, that in 1934 progress on work already begun, and where the water which these works would make available is sorely needed, will have to be at a standstill.

The estimates submitted to Congress under which the appropriation of $3,000,000 has been approved by the lower House were based on the assumption that the construction payments due from water users for one-half of 1932 and all those for 1933 would be made. If a moratorium is granted it will reduce these payments, and hence the money in the fund available to meet appropriations. A knowledge of this fact may cause Congress to yet withhold appropriations to carry on construction work in 1934 unless provision to make payments is made. If a moratorium is granted, this means a loan.

DEMANDS ON TIME OF SENATORS—INTERVIEW WITH SENATOR TYDINGS

Mr. GLENN. Mr. President, I notice a very timely statement in an interview with the senior Senator from Maryland [Mr. TYDINGS], which appeared recently in the newspapers. I ask that it may be made a part of the RECORD.

There being no objection, the article was ordered printed in the RECORD, as follows:

Economic conditions and a session of Congress have compelled Senator MILLARD E. TYDINGS to call for help in bringing about two reductions—in demands for personal interviews and in correspondence.

"During these days of stress," he said, "my correspondence approximates 300 letters daily. Assuming that only one minute—an impossible supposition—is given to reading each of these communications and making reply thereto, 300 minutes, or 5 hours, would be consumed.

"An average of 60 persons each day request personal interviews. Three minutes to a person would consume 180 minutes, or 3 more hours. Thus, to answer the mail and see the persons requesting appointments would require eight hours out of the day.

"I serve on five Senate committees, including the Committee on Appropriations, which has to deal with each dollar spent by the Government—about four billions a year. This committee meets practically every morning from 10 to 12 o'clock.

"Congress meets every day at 12 o'clock and soon will remain in continuous session every day until about 10 o'clock at night. There are hundreds of important measures with which a Senator must familiarize himself.

"It must be perfectly obvious to any reasonable person that no man can answer this vast correspondence, see personally all of those who wish to talk with him, attend the committee meetings, and attend the sessions of the Senate.

"In these times when 12,000,000 people are out of work, 5,000 banks have failed, and upward of a million farms have been sold under mortgage foreclosure, the first duty of a representative in Congress is to devote himself to legislation which, it is hoped, will at least bring about a partial cure of the depression.

"I say this so my constituency may understand that, with Maryland abutting the congressional district, it is humanly impossible—even if I were three men—to afford each of those asking a personal interview.

"The time I give to these individual interviews and individual matters, while important in themselves, particularly to those interested, is taking my attention from matters of grave importance to all of the people of Maryland as well as to the country as a whole. I have severed every personal indulgence which I can, both in the day and in the evening, with the hope of finding time to keep up with the tremendous demands now upon me.

"I am, therefore, making this appeal to the people of Maryland. If the matter they have in mind is a position, compensation, or some other matter with which the Federal Government has to deal, it will be of the greatest help to me if they will write me as briefly as possible and not ask for personal interviews unless the matter is of such grave importance that it can not be handled in any other manner.

"I realize that in some quarters this may be misunderstood, but, after having tried to see personally everyone requesting an interview, to give prompt attention to my correspondence, to attend the committee meetings and the meetings of the Senate, and to study and give my attention to the important legislation before the Congress, I find that even with working far into the night it can not be done.

"I like the job. This is no complaint. All I ask is helpfulness."

ANALYSIS OF IMPORT AND EXPORT TRADE—TARIFF BARGAINING

Mr. COSTIGAN. Mr. President, yesterday I asked unanimous consent for the consideration of two resolutions which had been reported favorably from the Committee on Finance. I desire at this time to renew my request for the consideration of those resolutions.

Mr. SMOOT. Mr. President, if they will lead to any discussion whatever, I shall have to object. I should like to get this appropriation bill through to-night.

Mr. COSTIGAN. I have spoken to the Senators in charge of the bill, and they have no objection to the immediate consideration of the resolutions.

Mr. SMOOT. With the understanding that they will not lead to any discussion, I have no objection.

The PRESIDING OFFICER. Are the resolutions on the calendar?

Mr. COSTIGAN. The resolutions are on the calendar, and I do not think they will require any discussion.

The PRESIDING OFFICER. The Senator from Colorado asks unanimous consent for the consideration of a resolution, which will be read.

Mr. SMOOT. I have no objection unless it leads to discussion. If it does, I shall object.

Mr. REED. Mr. President, what is the request for unanimous consent?

The PRESIDING OFFICER. The clerk will read the resolution for the information of the Senate.

The legislative clerk read Senate Resolution 334, submitted by Mr. COSTIGAN on the 18th instant, calling for an analysis of the import and export trade with certain foreign countries, and for other information concerning tariff problems, as follows:

Resolved, That the United States Tariff Commission is hereby directed under section 332 (g) of the tariff act of 1930, and for the purposes of that section, to investigate, particularly by resort to available files and records, and to report thereon to the Senate assembled data, furnishing the Senate completed portions thereof as promptly as conditions permit, on the following subjects:

(1) An analysis of the composition of the import and export trade of the United States with each of the foreign countries with which the United States has important commercial relations, accompanied, where feasible, by a list of the tariff and other trade restrictions imposed since January 1, 1922, by each such foreign country on articles now or formerly imported from the United States, a discussion of alternative sources of such articles, an analysis of the invisible items entering into the balance of trade with each such country, and other significant economic and competitive facts affecting trade therewith.

(2) Early revisions of the summaries of tariff information heretofore compiled by the United States Tariff Commission, which will particularly indicate (a) the character of production, of imports and of exports of the United States, and the production in foreign countries of articles or types and grades of articles not exported to the United States or so exported only in minor quantities, with the reasons therefor; (b) advantages and disadvantages affecting the sale of domestic and foreign products in the markets of the United States and in important foreign markets; (c) concentration of control in foreign and domestic industries; and (d) other tariff problems, including those arising from the use of substitute articles, presented by industries selected for specified and significant reasons by the United States Tariff Commission.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. REED. Mr. President, reserving the right to object, I had not intended to speak on this matter, but I should like the RECORD to show that I am opposed to the passage of both of these resolutions. I have no objection to their further consideration.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution just read? The Chair hears none.

The resolution was considered by the Senate and agreed to.

The PRESIDING OFFICER. The clerk will read the second resolution referred to by the Senator from Colorado.

The legislative clerk read Senate Resolution 325, submitted by Mr. COSTIGAN on the 13th instant, calling for a report from the Tariff Commission of relative imports of certain commodities for designated years, and for certain other information concerning imports and exports.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution? The Chair hears none.

The Senate proceeded to consider the resolution, which had been reported from the Committee on Finance with amendments, on page 2, line 4, after "1933," to strike out "(giving precedence to this resolution, so far as may be required, over other resolutions heretofore adopted by the Senate directing the United States Tariff Commission to make reports to the Senate)"; in line 12, after the word "in," to strike out "1920" and insert "1919"; on page 3, line 5, after "1928," to strike out "and 1929, the first half of 1930, the latter half of 1930, and the calendar year", and insert "1929, and"; and on page 4, line 10, after the word "from," to strike out "1919" and insert "1929"; so as to make the resolution read:

Resolved, That the United States Tariff Commission (as provided under sec. 334 of the tariff act of 1930, and so far as deemed advisable by said Tariff Commission, with the cooperation of the Departments of State, Commerce, Agriculture, Labor, and other departments or independent establishments of the Government, as and when requested by the United States Tariff Commission to cooperate) is hereby directed under section 332 (g) of the tariff act of 1930, and for the purposes of that section, to investigate, particularly by resort to available files and records, and to report thereon to the Senate assembled data (including tariff rates, foreign-trade statistics, production statistics, and other pertinent facts) successively on or before February 1, 1933, February 15, 1933, and, finally, March 1, 1933, on the following subjects:

(1) Any and all tariff classifications (including, when practicable, grades and styles thereof and articles included in basket clauses) with respect to which there were substantial imports from abroad in 1919 and/or 1929, and as to which imports have since substantially lessened or have ceased, with the approximate dates of such lessening or cessation of imports, together with relevant facts concerning domestic production.

(2) Any and all dutiable articles of which imports in either 1927, 1929, or 1931 have represented less than 5 per cent of the domestic production of similar articles, giving the percentages of imports to domestic production in each of said years and the tariff changes in 1930, together with a description of the grades, varieties, and quantities of the said respective dutiable articles and a description of the grades, varieties, and quantities of said respective similar articles produced in the United States.

(3) Any and all articles on which the tariff rates exceed 50 per cent ad valorem, arranged by schedules in order of height of said rates in 1931, including the ad valorem equivalent of specific and compound rates, based, respectively, on prices of the calendar years 1928, 1929, and 1931; together with quantities and values imported in the same periods and the domestic production for 1929 and 1931, where practicable, of the respective articles covered by said rates, and separate lists showing, for all agricultural products and agricultural raw materials carrying tariff rates exceeding 50 per cent ad valorem in 1931, the equivalent ad valorem of present rates based on average prices from 1920 to 1929, both inclusive.

(4) Dutiable articles the imports of which have increased in quantity or value since 1929, with amounts and values of increases.

(5) Statistics, arranged by tariff paragraphs and schedules, of all articles important in export trade, the exports of which have decreased in quantity or in value since 1929, with information on the extent of the resulting unemployment in domestic export business.

(6) The extent of exports of capital from the United States to foreign countries to build or buy factories and employ labor in such foreign countries, together with the number of employees in such American-owned foreign factories.

(7) The range and variety of costs of production related to the quantities produced in each cost range in the United States and in competing foreign countries for each industry investigated by the Tariff Commission since 1920 (so far as can be given without disclosing the costs of individual concerns).

(8) The value and, where available, the quantity during each year from 1929 to 1932 of articles or special grades of articles which are produced in the United States with advantages, including trade and market conditions, which were factors in causing such articles and grades to be exported in substantial quantities to foreign markets, together with a statement regarding the nature of such advantages.

(9) The value and, where available, the quantity of the imports during each year from 1929 to 1932 of dutiable articles (distinguishing so far as practicable grades and styles of such articles and separate items included in basket clauses) which are more or less noncompetitive with articles produced in the United States and in which foreign countries possess advantages in production, including seasonal advantages, or as to which the foreign product has some unusual appeal to purchasers in the United States, including articles produced abroad by the use of relatively large quantities of hand labor as well as so-called foreign specialties not adapted to mass production or other conditions of efficient and economic production in the United States, and with particular reference to articles produced in Canada, Great Britain, Germany, France, Spain, Belgium, Italy, Czechoslovakia, Mexico, Argentina, Russia, China, and Japan, and in such other foreign countries as may provide commercially important illustrations.

(10) The extent to which existing conditional and unconditional most-favored-nation clauses in commercial treaties, listed for convenient reference, may affect tariff bargaining with foreign countries, having in view early and reciprocal reductions in tariff rates in the United States and foreign countries and increased trade and commerce between the United States and foreign countries.

(11) Generally to advise such ways and means for tariff bargaining as may appear relevant for most advantageously promoting expanded trade between the United States and foreign countries, with the purpose of increasing employment in the United States and markets abroad for products of farms and factories of the United States.

The amendments were agreed to.

The resolution as amended was agreed to.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

Mr. ODDIE. Mr. President, I have been informed that a number of Members of the Senate will not be able to be here this afternoon, and that they would like the privilege of voting on the pending amendment. I, therefore, am going to ask the Senator from Tennessee [Mr. McKELLAR]—who, I understand, has some further remarks to make regarding it—whether he would be agreeable to a vote on Monday shortly after the Senate convenes.

Mr. McKELLAR. Mr. President, I think we should make more haste on this bill; but if requests of that sort have been made of the Senator, and the Senator wants to have the bill go over, that will be satisfactory to me.

Mr. SMOOT. Do I understand that the Senator's request is that we shall not continue the consideration of the bill to-night, but shall recess at this time until Monday?

Mr. ODDIE. Yes; that was the suggestion.

Mr. KING. We would require a quorum if we took a vote, I suppose.

Mr. SMOOT. If there is objection to it.

Mr. McKELLAR. Does the Senator mean if there is objection to agreeing to this amendment?

Mr. SMOOT. No; I do not mean that, but as to whether or not the Senate will take a recess.

Mr. ODDIE. Does the Senator from Tennessee think we could get a vote on this amendment by 1 o'clock Monday if we should recess until 12?

Mr. McKELLAR. I see no reason why we can not. We certainly can, so far as I am concerned; but I do not think we ought to make an agreement about it. Other Senators might want to say something on the subject. As far as I know we could vote at that time, but I should not want to bind other Senators.

Mr. SMOOT. I know of no one else who desires to speak.

Mr. McKELLAR. Does the Senator want a vote now?

Mr. SMOOT. Yes; I would just as soon have a vote now, although we have not a quorum.

The PRESIDING OFFICER. Has the Senator from Nevada submitted a request?

Mr. ODDIE. I ask unanimous consent that we vote on this amendment on Monday at 1 o'clock.

Mr. McKELLAR. It would require a quorum to make an agreement of that kind, would it not?

The PRESIDING OFFICER. No; only for a final vote. Is there objection to the request of the Senator from Nevada? The Chair hears none, and it is so ordered.

The agreement was reduced to writing, as follows:

Ordered, by unanimous consent, that a 1 o'clock p. m., on Monday, January 30, 1933, a vote be taken on the so-called Seatrain Co. amendment to H. R. 13520, the Treasury and Post Office appropriation bill.

RECESS

Mr. ODDIE. I now move that the Senate take a recess until 12 o'clock noon on Monday.

The motion was agreed to; and (at 2 o'clock and 33 minutes p. m.) the Senate took a recess until Monday, January 30, 1933, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

SATURDAY, JANUARY 28, 1933

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Lord God of the Ages, the eyes of whose glory can not look upon iniquity, be merciful unto us. Increase our faith that we may have rest and quiet in the discipline of life. May its light never fade into darkness, nor its goodness lose its vitality. O, may we magnify the grace of our God in the spirit of the deepest gratitude. With self-restraint and with true hearts may we bend ourselves to our country's need; live in fellowship with our people and in the service of this day. Bless the Congress with unity of purpose, vision, and motive. Stir our whole land with a great awakening; bring it to a realization that impoverishment, social suffering, and bereavement will pass by and that our Republic shall not be caught in the iron mesh of some remorseless fate. Through Jesus Christ, our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 14436. An act making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes.

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S. J. Res. 243. Joint resolution authorizing the President of the United States to extend a welcome to the Pan American Medical Association which holds its convention in the United States in March, 1933.

MINING ON THE PUBLIC DOMAIN

Mr. EVANS of Montana. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (S. 4509) to further amend the act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," with House amendments, insist upon the House amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

The SPEAKER. The Chair appoints the following conferees: Messrs. EVANS of Montana, YON, and COLTON.

COUNTY OF LOS ANGELES, STATE OF CALIFORNIA

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent that the bill (S. 636), to convey certain land in the county of Los Angeles, State of California, be rereferred to the Committee on Military Affairs.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

CONSPIRACY TO CONTINUE DEPRESSION

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, I believe that the depression will continue until certain parties like the Mellons and Morgans can secure desirable properties at their own prices, if they continue to have their way. It represents a deliberate conspiracy to defraud the American people. Andrew W. Mellon is still running this country. He and his brother own and control $8,000,000,000 in money and property, which is several billion dollars more than the amount of money in circulation in the entire Nation. The Department of Justice has had several pillow fights with the Mellon companies.

TAX EVASIONS AND BANKRUPTCY SALES

One of the Mellon companies, in order to evade income taxes, accumulated a reserve of more than $600,000,000 during Andrew W. Mellon's tenure in office; this reserve was on hand when the depression started; two-thirds of it has already been used to purchase the distressed properties of competitors and other properties and now although it has a reserve of more than $200,000,000, it has recently passed a dividend payment so additional distress properties may be secured at bankruptcy prices.

NO APPOINTMENT OF MELLON-MORGAN GROUP

I hope the incoming administration does not have an official in it who is in any way directly or indirectly connected with this Mellon-Morgan group. Our Nation is being destroyed by them.

INVESTIGATION OF TREASURY DEPARTMENT AND MONETARY SYSTEM

During the first session of the Seventy-second Congress I introduced a resolution to have a committee of the House investigate the Treasury Department, Federal Reserve Board, the monetary, banking, currency, and fiscal affairs of the United States in their entirety. This resolution was considered by the Rules Committee but favorable action was denied; the committee after considering the matter had a tie vote on its adoption. At this session favorable action can not be expected because the committee, if appointed before the expiration of this session, could not function after March 4, 1933, since the terms of office for all Members of the House expire at that time. I expect to urge favorable consideration of such a resolution at the coming special session of Congress.

FREE USE OF MONEY FOR A FEW

I believe that such an investigation will show that a few powerful bankers are using free of charge the money issued by the Government; that this money has a coverage of from 2 cents to 40 cents on the dollar, and that the people are charged from 5 per cent to 30 per cent annual interest for its use. The money represents a mortgage on all the homes and other property of all the people in the Nation. The credit of the Government should not be farmed out to private bankers; but if it is, certainly a reasonable charge should be made for the use of it.

BILLIONS TO LARGE TAXPAYERS

Such an investigation will show further that billions of dollars have been refunded to large income-tax payers during the last 12 years, and that a substantial part of this money has been illegally refunded; that tens of millions of dollars were refunded by Mr. Mellon, the Secretary of the Treasury, to himself, the private citizen Mr. Mellon, and to his wealthy corporations. These refunds can not be investigated by a Member of Congress; the records are secret. Secrecy is a badge of fraud. No honest man should desire the privilege of secretly administering the tax laws of our country, and no dishonest man should be allowed that privilege.

PUBLICITY OF TAX RETURNS

I doubt that the Budget would be unbalanced if all tax returns had been subject to public inspection. When a proper investigation is made I believe it will cause the collection of hundreds of millions of dollars.

EXTENSION OF REMARKS

Mr. CULLEN. Mr. Speaker, I ask unanimous consent to have inserted in the RECORD a telegram from the mayor of the city of New York dealing with the bankruptcy bill.

Mr. UNDERHILL. Mr. Speaker, I object.

DEPARTMENTS OF STATE, JUSTICE, COMMERCE, AND LABOR APPROPRIATION BILL, FISCAL YEAR 1934

Mr. OLIVER of Alabama. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14363) making appropriations for the Departments of State and Justice, and for the judiciary, and for

the Departments of Commerce and Labor for the fiscal year ending June 30, 1934, and for other purposes. Pending that, for the information of the House, I may say that so far as I know, we should finish reading the bill in a short time, there being no other items in the bill which are likely to provoke lengthy discussion, and there are but a few pages remaining.

Mr. DYER. Mr. Speaker, will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. DYER. Can the gentleman tell the House now whether or not he expects to ask for separate votes on the amendments that have been adopted in the committee?

Mr. BLANTON. Why not?

Mr. OLIVER of Alabama. Just as soon as we finish reading the bill I will make a statement.

The SPEAKER. The question is on the motion of the gentleman from Alabama that the House resolve itself into the Committee of the Whole House on the state of the Union for further consideration of the bill H. R. 14363.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14363, with Mr. OLIVER of New York in the chair.

The Clerk read the title of the bill.

The Clerk read as follows:

For the Commissioner of Patents and other personal services in the District of Columbia, $3,176,250: *Provided*, That of the amount herein appropriated not to exceed $25,000 may be used for special and temporary services of typists certified by the Civil Service Commission, who may be employed in such numbers, at $4 per diem, as may, in the judgment of the Commissioner of Patents, be necessary to keep current the work of furnishing manuscript copies of records.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent that we may return to page 35, line 1, for the purpose of offering an amendment so as to make this appropriation conform to what was done in reference to the Atlanta Prison as to funds that might be expended for salaries.

Mr. GOSS. Mr. Chairman, reserving the right to object, I would like to hear a statement from the gentleman from Alabama as to the proposed amendment.

Mr. OLIVER of Alabama. The gentleman from Georgia yesterday submitted an amendment which sought to increase the amount that might be paid for salaries of employees at the prison in Atlanta, without increasing in any way the appropriation, the need for it being that it was probable they might find it necessary to employ a few additional guards. So I consented that the amount should be increased by $20,000.

In order that we might place Leavenworth, which has a like request, on the same basis, I am now asking unanimous consent to return to page 35, so as to increase, without increasing the appropriation, the amount that may be expended for this purpose, $30,000. The population of the Atlanta prison is about 3,000, while that in the two prisons at Leavenworth is now approximately 4,800.

Mr. STAFFORD. Does the same situation exist in reference to other penitentiaries?

Mr. OLIVER of Alabama. No; only at these two at present.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. LAGUARDIA. Lest it might be misunderstood, this money is not required to complete, repair, or add to any existing institution?

Mr. OLIVER of Alabama. No; it is not.

Mr. LAGUARDIA. It is surplus, and it would be utilized for another item.

Mr. OLIVER of Alabama. In other words, if they find they can make savings from funds already approved, the savings may be used for this very helpful purpose of providing some relief to the guards that are now employed.

Mr. GOSS. Can the gentleman assure us there will be no other amendment to this amendment?

Mr. OLIVER of Alabama. I have heard of none.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. OLIVER of Alabama. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OLIVER of Alabama: Page 35, line 1, strike out "$591,500" and insert in lieu thereof "$623,500."

The CHAIRMAN. The question is on the amendment of the gentleman from Alabama.

The amendment was agreed to.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent to return to page 41 of the bill.

The CHAIRMAN. May the Chair call the gentleman's attention to the fact that we passed over a paragraph on page 29, dealing with the subject of salaries of clerks of court.

Mr. OLIVER of Alabama. Mr. Chairman, I think as soon as the proposed amendment on page 41 is disposed of disposition of the other paragraphs may follow.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to return to page 41, line 3, for the purpose of offering an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. OLIVER of Alabama: On page 41, after line 3, insert a new paragraph, as follows:

"In addition to the appropriations herein made for 'salaries and expenses, clerks of courts, salaries and expenses of district attorneys, and so forth,' and 'enforcement of antitrust laws,' the sum of $175,000 of the unexpended balance of the appropriation 'Federal jails, construction,' contained in the act making appropriations for the Department of Justice for the fiscal year 1932, is hereby made available for the fiscal year 1934, for the purposes enumerated in such appropriations and in such amounts as the Attorney General, in writing, may designate."

Mr. STAFFORD. Mr. Chairman, I reserve the right to object so as to give the gentleman an opportunity to explain the purpose of the amendment.

Mr. OLIVER of Alabama. Mr. Chairman, this amendment was shown to gentlemen on both sides of the aisle who had expressed interest in the amounts recommended by the committee for the payment of clerks, district attorneys, and for the enforcement of the antitrust laws.

I stated in my opening remarks that some of the amounts recommended for the Department of Justice were mere estimates and could not be more than that. Sometimes the business before the courts is much heavier than can be anticipated, and out of abundant precaution I stated I would offer later, with the consent of the committee, an amendment that would make possible an increase in these appropriations, if, in the judgment of the Attorney General, it was found necessary. Some years ago the House appropriated $1,500,000 for the purpose of building Federal jails. Your committee has tried to hold this construction down. This year we have refused to recommend to the House any new construction for 1934 and have already taken from this continuing appropriation, with your approval, a sum sufficient to complete the prison at Springfield, Mo.

There is left in this jail fund, which is a continuing appropriation, about the amount we now are making available for the payment of clerks, for the enforcement of antitrust laws, and for the payment of the salaries of district attorneys and assistant district attorneys with the written approval of the Attorney General, if such money is found necessary.

We will thus take from the department any temptation to spend more money in the construction of prisons at this time, and thereby will make available what doubtless will be required in 1934 because of increased business before the courts.

Mr. BRIGGS. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. BRIGGS. This is merely a reappropriation of funds?

Mr. OLIVER of Alabama. No; it does not have to be reappropriated. It is authority for the Attorney General to use a continuing appropriation for another purpose.

Mr. BRIGGS. This is to be taken from a continuing appropriation?

Mr. OLIVER of Alabama. Yes.

Mr. DYER. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. DYER. The gentleman does not want it understood that by taking some of the funds away from the Springfield institution that this is an abandonment in any way of the intention of Congress to carry out that plan?

Mr. OLIVER of Alabama. The gentleman misunderstood me. I have already added to the amount that may be expended at Springfield by taking money from this jail fund, which the House approved. There now remains unexpended in that fund an amount which, as the gentleman from New York [Mr. LAGUARDIA] has said, ought not to be used, and I agree with him, for further prison construction, and we are now making it available on the written approval of the Attorney General for another purpose.

Mr. GOSS. Is it not unusual to appropriate in this manner?

Mr. OLIVER of Alabama. I will not say it is unusual. We have already approved, not only in this bill but other bills, a like course. Where there is a continuing appropriation, in order that the appropriation may not be used in such way that the House would not now approve, we have sought to restrain those who had control over such appropriation by taking it from them for other purposes.

Mr. KETCHAM. Will the gentleman yield for a brief question?

Mr. OLIVER of Alabama. Yes.

Mr. KETCHAM. Having mentioned the Springfield construction proposition, has the gentleman at hand data that would enable him to inform the House what is the present condition of that project, both as to appropriation and construction?

Mr. OLIVER of Alabama. Yes. The Springfield plant will be ready for occupancy by July 1.

Mr. KETCHAM. Of this year?

Mr. OLIVER of Alabama. Yes. This is the prison hospital, the gentleman understands; and we have taken from this jail fund an amount sufficient to build quarters for the officers in charge, for the nurses' home, and for putting a fence around the prison, placing definite limitations on completed projects; and in 1934, out of funds now already appropriated, this hospital will be completed, and no further construction is contemplated.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of objection and shall ask for recognition.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. STAFFORD. Mr. Chairman, when the paragraph on page 29, providing for salaries and expenses of clerks of courts, was under consideration, I thought the committee had made too drastic a cut under the Budget estimate.

I have examined the hearings, which show that after the reduction of 8⅓ per cent there is required for this service an appropriation of $1,906,000. Of this amount $1,851,000 was for personal services. It is my information that the gentleman's amendment will give to the Attorney General a reserve fund on which he may call in case the appropriation in the three items referred to have been shaved too greatly. As far as the two or three items referred to, namely, payment for United States district attorneys and enforcement of the antitrust act, the committee did not go under the Budget estimate. So I think there is a leeway of more than fifty or sixty thousand dollars where the Attorney General may have access in case of need. So I think it is advisable to agree to the amendment.

Mr. EATON of Colorado. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

At the end of the amendment offered by Mr. OLIVER, insert the following: "*Provided further*, That no part thereof shall be expended in connection with the manufacture of canvas-made goods at the Atlanta penitentiary."

Mr. STAFFORD. Mr. Chairman, I make the point of order that the amendment is not germane.

Mr. EATON of Colorado. Mr. Chairman, as I read the amendment as offered it is in this language:

In addition to the appropriations herein made for "salaries and expenses, clerks of courts, salaries and expenses of district attorneys, etc.," and "enforcement of antitrust laws," the sum of $175,000 of the unexpended balance of the appropriation "Federal jails, construction," contained in the act making appropriations for the Department of Justice for the fiscal year 1932, is hereby made available for the fiscal year 1934, for the purposes enumerated in such appropriations and in such amounts as the Attorney General, in writing, may designate.

I do not know how wide this language is, but if the language is too narrow to permit of this amendment, then, of course, it is not in order. I offer the amendment in good faith for the purpose of having a restriction made on the Atlanta Penitentiary in connection with the manufacture of canvas-made goods.

Mr. LAGUARDIA. It has nothing to do with this appropriation. One is for construction, and the other is for the manufacture of goods.

Mr. STAFFORD. You might as well take the money out of the Treasury of the United States.

The CHAIRMAN. The Chair is ready to rule. The Chair sustains the point of order. The gentleman's amendment applies to manufacture, and there is no appropriation in this paragraph for manufacture. The amendment is not germane. The question is on the amendment offered by the gentleman from Alabama.

The question was taken, and the amendment was agreed to.

Mr. OLIVER of Alabama. Mr. Chairman, I ask the Clerk to turn to page 29 and read the paragraph beginning with line 12.

The Clerk read as follows:

Salaries and expenses, clerks of courts: For salaries of clerks of United States circuit courts of appeals and United States district courts, their deputies and other assistants, travel expenses pursuant to the subsistence expense act of 1926, as amended (U. S. C., Supp. VI, title 5, secs. 821–833), and other expenses of conducting their respective offices, $1,856,580.

The CHAIRMAN. The Clerk will continue the reading of the bill.

The Clerk read as follows:

For investigating the question of public use or sale of inventions for two years or more prior to filing applications for patents, and such other questions arising in connection with applications for patents and the prior art as may be deemed necessary by the Commissioner of Patents; for expense attending defense of suits instituted against the Commissioner of Patents, $700; and for expenses of attendance at meetings concerned with the work of the Patent Office when incurred on the written authority of the Secretary of Commerce.

Mr. BLANTON. Mr. Chairman, I offer the following amendment which I send to the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. BLANTON: Page 82, line 12, strike out the words "defense of."

Mr. BLANTON. Mr. Chairman, in defense of the Members who dared, in spite of threats, to go through the tellers here yesterday in opposition to the various emasculating amendments that would tend to tear down prohibition enforcement, I want to say a few words.

Mr. BOYLAN. Mr. Chairman, I make the point of order that the gentleman is not speaking to anything germane to the section.

The CHAIRMAN. The gentleman from Texas will proceed in order.

Mr. BLANTON. I am speaking "in defense" of those Members. I moved to strike out the words "defense of" in my amendment, which is rather a broad subject.

Mr. BOYLAN. Mr. Chairman, the language is not pertinent to the section.

Mr. BLANTON. My subject is "defense of," and I shall stick to my subject.

Mr. BOYLAN. Defense of what?

Mr. BLANTON. Defense of those Members who dared.

The CHAIRMAN. The gentleman from Texas must realize that the paragraph deals with the Commissioner of Patents, and he must confine his remarks to that sentence even though the words " defense of " are in the paragraph.

Mr. BLANTON. Mr. Chairman, I realize full well the limitations. In defense of the patent laws of the United States embraced in that paragraph, I want to speak a few words. A patent means nothing in the world but a personal right that is assured and guaranteed to an individual. Yesterday, when in behalf of our prohibition laws, we were exercising personal rights, we did not have a patent for them, but we had a constitutional authority for what we did.

Mr. BOYLAN. Mr. Chairman, I make the point of order that the gentleman from Texas is not speaking to his amendment.

The CHAIRMAN. The gentleman will proceed in order.

Mr. BLANTON. I know the rules, Mr. Chairman, and I am proceeding in order.

Mr. BOYLAN. There is no constitutional amendment involved here.

Mr. BLANTON. I am speaking about the inherent rights of individuals, whether patented or not.

Mr. BOYLAN. There are no inherent rights involved in this section.

Mr. BLANTON. Some are patented and some are not. Yesterday the gentleman from New York [Mr. O'CONNOR] made this statement, which I quote from the RECORD——

Mr. BOYLAN. Mr. Chairman, I object. The gentleman is not speaking of anything that is germane to the section.

Mr. BLANTON. The gentleman can not tell until he hears me complete my sentence.

Mr. BOYLAN. Of course I can, because I can read the gentleman's mind.

Mr. BLANTON. Mr. Chairman, I ask that these interruptions be not taken out of my time, otherwise they would deprive me of my right to make the remarks I desire to make.

Mr. BOYLAN. Mr. Chairman, the gentleman should proceed in order. The gentleman from Texas is a stickler for proper parliamentary procedure, and why not have it now?

Mr. BLANTON. The Chair has ruled that the gentleman from Texas is in order.

Mr. BOYLAN. The Chair has not so ruled.

The CHAIRMAN. The gentleman from Texas will proceed in order, and the Chair asks the gentleman from New York to withhold any objection until the gentleman from Texas has completed his sentence.

Mr. BLANTON. Mr. Chairman, as to the rights of Members, whether patented or not, and to show whether their rights were infringed upon yesterday, I want to read what the gentleman from New York [Mr. O'CONNOR] said.

Mr. BOYLAN. I object. The gentleman is not speaking to the section.

Mr. BLANTON. The gentleman may object as much as he pleases, but he can not keep me from discussing in order my subject.

Mr. BOYLAN. I insist that the gentleman proceed in order.

The CHAIRMAN. The Chair directs the gentleman from Texas to proceed in order under the rule.

Mr. BLANTON. Proceeding, Mr. Chairman, in order, under the ruling of the Chair, the gentleman from New York [Mr. O'CONNOR] said yesterday:

> When the votes are counted and the Members pass through that aisle a check will be made on everybody on the Democratic side who passes through there for or against these amendments, so we may know when we meet here in April who are the people who are abiding by the Democratic platform and who are those who pretend at one time to be wet and the next moment reverse to dry.

I have quoted the above from the RECORD of yesterday's proceedings.

Mr. BOYLAN. Mr. Chairman, the gentleman's language does not pertain to the section, and I ask that it be stricken out.

Mr. BLANTON. Mr. Chairman, there is some latitude allowed in debate.

The CHAIRMAN. The gentleman will proceed in order or take his seat. The section under consideration to which the gentleman's amendment is offered deals with the Commissioner of Patents. The gentleman from Texas is now alluding to an address made yesterday by one of the Members of the House upon the subject of prohibition. The Chair asks the gentleman to proceed in order under the rules. The Chair sustains the point of order.

Mr. O'CONNOR rose.

Mr. BLANTON. If the gentleman from New York [Mr. BOYLAN] does not object to my yielding, I yield.

Mr. BOYLAN. The gentleman from New York is utterly unable to control you, sir. You are subject to no rules. You follow no rules except your own.

Mr. BLANTON. Mr. Chairman, I ask that this be not taken out out of my time. I ask that these objections, Mr. Chairman, be not taken out of my time, because I am going to proceed in order, although I have about concluded what I wanted to say.

Mr. O'CONNOR. Will the gentleman yield?

Mr. BLANTON. Before I yield I wish to say that a patent right, as embraced within this paragraph of the bill, means nothing in the world but a guaranty to the American citizen that his rights shall be protected by the laws of the United States. I want to assure my friends in this House that whether patented or not they have a right to go through that aisle between the tellers and vote just as they please, regardless of the threat of the gentleman from New York [Mr. O'CONNOR].

Mr. BOYLAN. Mr. Chairman, the gentleman is clearly out of order.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order.

Mr. BLANTON. That is all I want to say to the Members.

The CHAIRMAN. Does the gentleman withdraw the pro forma amendment?

Mr. BLANTON. I just wanted to say what I have said to the gentleman from New York [Mr. O'CONNOR]. I withdraw the pro forma amendment.

Mr. Chairman, having obtained unanimous consent from the House to extend my remarks, I will discuss briefly the amendments we are to vote upon before the final passage of this bill. Before doing that, however, for the benefit of our friends in the various States who daily read this RECORD, I want them not to gather the impression that the gentleman from New York [Mr. BOYLAN] and I are unfriendly toward each other, for such is not the case. He is a fundamental, uncompromising wet who conscientiously believes in and zealously fights for his cause. On the other hand, I am a fundamental, uncompromising dry who conscientiously believes in and zealously fights for my cause. We respect each other's views, and we each accord to the other the inherent right of carrying on the fight without giving quarter.

I have for the gentleman from New York [Mr. BOYLAN] not only great respect and warm friendship, but deep affection as well. I sit with him much in the House and greatly enjoy his companionship. No man in Congress is wittier or more entertaining. When I attempt to further the interests of prohibition I do not blame him when he exhausts his parliamentary skill in trying to stop me. We take it on the chin from each other and then still remain friends.

The Tinkham amendment, which seeks to prevent our prohibition-enforcement officers from resorting to wire tapping, is the first one we will vote on to-day. Both Attorney General Mitchell and Colonel Woodcock assured our committee that without resorting to wire tapping in extreme cases it would be impossible for them to apprehend the master minds and leaders of the big liquor rings who operate secretly in the United States and from abroad. They are known to very few of their many employees. They keep their identity concealed even from their gang members. They are notorious criminal leaders outranking the Al Capones of gangdom. It is easy enough to catch the smaller criminals without wire tapping, but it requires the use of wire tapping to catch the master minds.

It simply resolves itself into the question of whether or not we want the master minds caught. Do we? Or do we not? If we do not, why not? Just what is our interest in the master minds that we do not want them caught? Have we such an interest in them? Do we want to protect them? Do we want to give them aid and comfort? Do we want to place safeguards around them? Do we want to make it very difficult for our enforcement officers to apprehend them? If we do, we ought to pass this Tinkham amendment, which prohibits our law-enforcement officers from resorting to wire tapping to catch criminal leaders.

We must keep in mind the fact that both Attorney General Mitchell and Colonel Woodcock testified before our committee that in no case did they allow any wire tapping unless and until the special agent made a full report of the facts and situation, showing the necessity and urgency, and each particular case had to be approved and authorized both by Colonel Woodcock and Attorney General Mitchell, or the Assistant Attorney General.

We ought to have a record vote on this Tinkham amendment, and each and every Member here ought to be willing to go down on record as to whether he is more interested in protecting criminal master minds from apprehension than he is in enforcing the laws of his country. To get a record vote it will require one-fifth of the Members present to stand up and demand the "yeas and nays." If you are willing to deprive our enforcement officers of this needed weapon, without which they can not apprehend criminal leaders, are you not willing to let your constituents know how you stand by having a record vote? I am.

Now, as to the Tarver amendment, which will follow the Tinkham amendment, it would stop all enforcement whatsoever in several States, if it passes; for the courts in several States have held that before there can be a conviction, there must be direct evidence of specific sales, and without proving sales, there can be no conviction.

Do we want to withdraw all enforcement efforts from such States? Do we want to leave them wholly without any enforcement? If we do, all that is necessary is to pass the Tarver amendment. For if it becomes law, then all enforcement in several States will stop.

If we want States like New York, New Jersey, Maryland, Pennsylvania, Illinois, and Missouri to run wide open, in the face of the Constitution, then we want to pass the Tarver amendment. If we want the Nation's Capital to be dripping wet, with dives and clubs in every block, with no chance to convict bootleggers, then we want to pass the Tarver amendment. It is absolutely necessary to make purchases in order to prove sales; and without proving sales, there will be no convictions. It is simply a question of whether we want to give our enforcement officers a chance to enforce the law in all States, or of whether we are in favor of not having any enforcement whatever in those States where it is necessary to prove sales to warrant a conviction. We ought to have a roll-call vote on the Tarver amendment.

Mr. BOYLAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I do not think the time has come when, in speaking about appropriations for the Commissioner of Patents, any Member of the House of Representatives should endeavor to rehash matters that the House has already passed upon. If we permit this course, we will get nowhere. I believe that proper courtesy is due to every Member and that he should be given due credit for his opinions.

Mr. BLANTON. A point of order, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. BLANTON. I make the point of order that the remarks of the gentleman from New York are no more based upon the paragraph in the bill with reference to patents than my own remarks, but I do not object to the gentleman saying anything he wants to.

Mr. BOYLAN. That is very kind of the gentleman from Texas to extend to me that privilege. I thank him. Of course, the mere fact that he transgresses the rules is no reason why I should. But I think it is unfair, in the gentleman's zeal, to try to make personal applications that are not altogether in conformity with the rules of the House. Of course, I know the gentleman's zeal for his cause, and I respect him for it. I find no fault with that; but, on the other hand, the gentleman should not find any fault with the opposition if they, too, adopt the same course.

Of course, I know it is extremely disagreeable, after riding in the saddle for 12 years, to be unhorsed. I know how it feels to lose. I know that it is not pleasant; but, of course, that is the way of all things human. Things go along slowly and then they rise to the peak and, after reaching the summit, they gradually decline and fade away and die. That is the fate of all causes. History has repeated itself thousands of times. While to-day we may bask in the sunshine of public approval, yet to-morrow thumbs may be turned down on us; but we must accept it. In the vernacular of the day, let us be good sports and take it on the chin and not get too much heated up about it.

This is a cause that the gentleman has espoused for several years very successfully. We wets have opposed it. The gentleman has basked in the sun of victory. Now it is our turn; we must push him into the shadow and take his seat in the golden approval of public confidence. So let us not lose our equilibrium, because, after all, what does it matter, the little things we are doing here to-day? This hour will pass and this day will pass, and others will say, "How foolish they were to get so excited about transient things that were of only minor benefit to the country." So let us proceed in decorum and charity, even if the tides are against us, and with a high regard for the opinions of others as well as for our own cherished and valued views.

With those few words, Mr. Chairman, I withdraw my objection to the amendment.

The pro forma amendment was withdrawn.

Mr. McGUGIN. Mr. Chairman, I move to strike out the enacting clause.

Mr. Chairman, in keeping with my idea that none of the appropriation bills should be passed in this session of Congress, I am rising to move to strike out the enacting clause of this appropriation bill.

This session of Congress, composed of this Membership, passes out of the picture on March 4, but here we are going on passing appropriation bills which determine the expenses of this Government for the fiscal year beginning July 1, 1933, and ending June 30, 1934. At the same time the House leadership has declared to the country it will not provide a revenue bill to meet those expenses. That is wrong from the standpoint of business. No business institution can survive, no individual can survive, going on spending money without taking into consideration where the money is coming from to meet the expenses. We should not do it. We are invading upon the next Congress when we do it. We are trying to tie the hands of the next Congress and say "Here is the money which must be spent by the next Congress and the next administration," but not having the courage to furnish the revenue to meet them.

Not only is the Budget unbalanced, not only is the Government spending more than it is taking in, but in another respect the Congress and the Government is practicing deceit upon the country. We will look at the money brought in since July 1 and the expenses since then and we say we are running a deficit of a particular amount. That is only a part of it. The Reconstruction Finance Corporation is spending money right along, and it is obtaining that money from the Federal Treasury, and we are not counting that in the Budget.

It is not right. If we were fair about it we would have made appropriation for every dollar for the Reconstruction Finance Corporation, and had we done it the Secretary of the Treasury would merely have gone out and sold some more short-term bonds or notes and obtained the money. That would be an honest, open obligation of the Government and would appear in our unbalanced Budget for this current year. Now, the Reconstruction Finance Corporation is selling its bonds to the Treasury Department. Where is the Treasury Department getting the money? The same

place it is getting the money to meet the appropriations for which we did not provide sufficient revenue. In the end the Government must bear that responsibility.

Our present policy of making appropriations without regard for the revenue to meet them is just as devoid of wisdom as the policy of the Osage Indian who dissipated his royalties and his income during the days of prosperity. We are following Osage Indian business methods when we create debts by passing these appropriations and not taking into consideration where the money is coming from. It is not right. We owe a greater consideration to our country.

Here is a bill where economy should be practiced. The next Congress and the next administration has pledged economy, and every one of us knows that when we get economy in government we are going to get more of it in the Department of Commerce than in probably any other department of the Government. For this reason we should not be making these appropriations for the Department of Commerce, because there is where the economy must come from more than from any other branch of the Government.

Another thing, our Democratic friends have pledged the beer bill. Certainly, when in the next Congress they modify the liquor laws they will not need as much money to enforce them, yet we are going ahead here and making appropriations for the enforcement of the liquor laws. Yesterday we were called upon by the wets not to make any appropriations for prohibition enforcement, but this is still the law, and it should be enforced, if we are to have any respect for constitutional law or government; but assuming that the next Congress passes the beer bill, assuming that the eighteenth amendment is repealed—and I do not think it can be under any circumstances during the next two years—this much is certain: There will not be so much need for these appropriations, but we are going ahead and appropriating money to perform a service which the incoming administration has pledged it is going to abandon. Therefore, that is another reason why this appropriation bill, which includes the appropriations for the Department of Justice, of all appropriation bills should be defeated.

[Here the gavel fell.]

Mr. OLIVER of Alabama. Mr. Chairman, I move that all debate on the pending motion do now close.

The motion was agreed to.

The CHAIRMAN. Does the gentleman from Kansas ask unanimous consent to withdraw his amendment?

Mr. McGUGIN. No. I ask that it be voted on. I would like to vote on it, at least.

The CHAIRMAN. The question is on the motion of the gentleman from Kansas to strike out the enacting clause.

Mr. BLANTON. Mr. Chairman, I demand a division.

Mr. McGUGIN. Mr. Chairman, I join in the request.

The question was taken; and on a division (demanded by Mr. BLANTON and Mr. McGUGIN) there were—ayes 5, noes 36.

Mr. HASTINGS. Mr. Chairman, I think this matter is of sufficient importance to have tellers on it. I demand tellers.

Tellers were refused.

So the motion was rejected.

Mr. OLIVER of Alabama. Mr. Chairman, I hesitate to do so, but in keeping a promise made to the Members before this bill was taken up that if some Member who had been prevented, because of official duties, from taking advantage of the general debate would make known to me that he had any important statement to make to the committee and would state what it was, I would ask unanimous consent that he be allowed to speak out of order.

The gentleman from Texas [Mr. JONES], the chairman of the Committee on Agriculture, who has been very busy with the duties of that committee, advises me that he has a statement to make which will take not over two minutes and which he thinks the House will be interested to hear. He wishes to call attention to an exhibit prepared by the gentleman from New York [Mr. LAGUARDIA].

Mr. Chairman, I therefore ask unanimous consent that the gentleman from Texas [Mr. JONES] may address the committee for two minutes out of order.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. JONES. Mr. Chairman, I merely wish to call attention of the Members to a display of garments in the meeting room of the Committee on Agriculture.

The garments on exhibition are the product of the cotton given by Congress to the American National Red Cross. The raw cotton was allocated to the States in accordance with their population.

In New York City, from whence these exhibits came, the cotton was delivered to the American Red Cross who, in conjunction with the Emergency Unemployment Relief Committee, negotiated for its exchange for all cotton textiles.

The Emergency Unemployment Relief Committee, in conjunction with the Association for Improving the Condition of the Poor, then arranged for its manufacture. Only unemployed needleworkers were used in the manufacture of these garments.

Full and complete cooperation was given by the needleworkers' unions of New York City.

There are some thirty different garments manufactured, each garment in all the necessary standard sizes, and several hundred thousand of each garment manufactured. Distribution is made in New York City by the various charitable and social organizations.

The cost of manufacture was $174,000, which was contributed from the funds of the Emergency Unemployment Relief Committee. This entailed no additional cost for the reason that only needleworkers who otherwise would have received relief were used and paid from these funds.

These garments were obtained by Representative F. H. LAGUARDIA through the courtesy of the New York Chapter of the American Red Cross, the Emergency Unemployment Relief Committee, and the Association for Improving the Condition of the Poor.

The Clerk read as follows:

For printing the weekly issue of patents, designs, trade-marks, prints, and labels, exclusive of illustrations; and for printing, engraving illustrations, and binding the Official Gazette, including weekly and annual indices, $900,000; for miscellaneous printing and binding, $50,000; in all, $950,000.

Mr. CELLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CELLER: Page 82, line 21, after the semicolon, insert: "Whenever savings may be effected thereby all such printing may be contracted for through public bidding and performed under the direction of the Commissioner of Patents under such limitations and conditions as the general Committee on Printing may from time to time prescribe.

Mr. LAGUARDIA. Mr. Chairman, I reserve a point of order on the amendment.

Mr. CELLER. Mr. Chairman, I admit the point of order is well taken and I shall withdraw the amendment if the point of order is pressed, but I should like an opportunity to make a brief statement with reference to the amendment I have offered.

If the gentleman will look at the report of the subcommittee he will find this very significant language on page 30 with reference to the printing done in the Printing Office:

The Budget estimate of $1,100,000 for printing and binding has been reduced to $950,000. The sum of $1,050,000 of the estimate is for the printing of the Official Gazette and specifications. The present cost of printing patents is over $6 per page. In 1921 it was $3.77 per page. We invite the attention of Congress to the interesting statement made by the Commissioner of Patents relative to the cost of printing. It will be noted that he takes the position that large savings can be effected by letting this printing to outside bidders.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield.

Mr. BLANTON. The gentleman knows that many bureaus are trying to break away from the Government Printing Office and have the privilege of letting their printing out by private contract.

It would lead to many abuses. What we want to do is to force a proper reduction in the expense of the Printing Office, and meet it in that way.

Ultimately I shall be compelled to make the point of order if the gentleman from New York [Mr. LAGUARDIA] does not; but if the gentleman wants to continue I will withhold it.

Mr. CELLER. Yes. I agree with the gentleman from Texas [Mr. BLANTON] that there is something wrong with the Government Printing Office, if we can believe what the Commissioner of Patents says. He testified on page 333 of the hearings that the cost in the Government Printing Office to print a page relative to the specifications is $6; whereas he has received estimates from reputable printers and publishers that this same work under union labor and with proper safeguards can be done for $4 a page. When you consider that the number of pages printed involves 195,000 pages, as the Commissioner of Patents testified, and multiply that by two, you have a saving of——

Mr. LAGUARDIA. Why $2 instead of $4?

Mr. CELLER. The difference is $2 a page. As a matter of fact, I was told the total possible saving would be $405,000. Now, we certainly should not avoid or ignore taking into consideration what the Commissioner of Patents says in that regard.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. CELLER. Yes.

Mr. LAGUARDIA. There is a reduction here of $300,000.

Mr. CELLER. Yes; I am coming to that. I believe that as a result of the testimony given by the Commissioner of Patents and the Government Printer a reduction in the appropriations was made of $300,000. I believe if this could be let under public bidding, with the usual safeguards of public bidding, under bonds and with union-labor requirements, the saving would be effected. Furthermore, the Government Printer could bid just like anybody else, and he could get the contract if he bids lowest.

Mr. LAGUARDIA. The gentleman is not getting the Shannon-Rich complex, is he?

Mr. CELLER. No; I do not wish to bring in the Shannon idea at all. It has nothing to do with this. The Secretary of Commerce took this matter up, and I shall ask permission to put into the RECORD correspondence that passed between the Public Printer, Mr. Carter, and the Secretary of Commerce, Roy D. Chapin. There are three brief letters which I shall ask unanimous consent to put into the RECORD, and I shall only read three paragraphs now. If authority were given the Public Printer so that he would do this work as cheaply as it may be done outside, he should do it, or in lieu thereof he should avail himself of the powers that he now has and give that work outside.

He has the power, subject to the approval of the Joint Committee on Printing, to do this work under public bidding, with the safeguards as to union labor and a bond for completion of the work, and so forth.

[Here the gavel fell.]

Mr. Chairman, I ask unanimous consent to proceed for two minutes, and I shall then withdraw the amendment.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CELLER. The Public Printer, in a letter to the Commissioner of Patents under date of June 14, 1932, said:

> Thanking you for this information at your earliest convenience, inasmuch as I intend to give serious consideration to having the work done by contract if any substantial saving can be made thereby other than a possible saving resulting from the better preparation of copy by the Patent Office.

Then the Secretary of Commerce investigated the matter, and he had this to say in a letter to the Public Printer under date of September 16, 1932:

> An investigation made before the receipt of your letter of June 14 indicated that at least $200,000 per year could be saved if the Patent Office printing were done by private contract. An investigation made since the receipt of said letter shows that the saving will be much greater, probably double that amount.

Under date of November 25, 1932, the Secretary of Commerce, Mr. Chapin, in a letter to the Public Printer said:

> You have written the commissioner that you have the power under the present law and will be willing to award the contract to a private contractor if we can show a substantial saving. We have shown this. In our views, $400,000 is a substantial saving. It is therefore believed that you should either perform the work at a reasonable price compared with private printers or make good your offer to have the work done privately, since your condition that a substantial saving be effected has been completely met.

I think I have made my point clear, and I withdraw my amendment.

I herewith insert the correspondence in question:

UNITED STATES GOVERNMENT PRINTING OFFICE,
Washington, D. C., June 14, 1932.

MY DEAR MR. COMMISSIONER: I have your letter of June 9, refusing to furnish this office any information concerning the investigation which you say has convinced you that the Patent Office could save at least $200,000 a year out of its appropriation by having its printing done under private contract instead of at the Government Printing Office. In view of the law (act of February 28, 1929, 45 Stat. 1400) authorizing the Public Printer to have printing produced elsewhere under contracts made by him, I believe I am entitled to the information which you say is in your possession in order that the best interests of the Government may be protected.

In any event I would like to know whether the estimated saving of $200,000 contemplates furnishing better copy to the private contractor than has been supplied to the Government Printing Office by the Patent Office for many years. You may recall that about two years ago I offered to make a reduction of approximately $50,000 annually in the charges for Patent Office printing if your office would prepare copy for specifications so that it could be handled in the same manner as copy furnished to this office by other establishments of the Government.

I would also like to be advised, in order to determine if it is practical to have Patent Office printing done by contract, whether it would be agreeable to the Patent Office to have the printing of patent specifications or the Gazette done elsewhere than in the city of Washington. Do you deem it essential that this work shall be done in or near Washington and would you be agreeable to having it awarded to the lowest bidder capable of doing the work, wherever his printing establishment might be located?

Thanking you for this information at your earliest convenience, inasmuch as I intend to give serious consideration to having the work done by contract if any substantial saving can be made thereby other than a possible saving resulting from the better preparation of copy by the Patent Office.

Respectfully yours,

GEORGE H. CARTER,
Public Printer.

Hon. THOMAS E. ROBERTSON,
The Commissioner of Patents, Washington, D. C.

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, September 16, 1932.

Hon. GEORGE H. CARTER,
Public Printer, Washington, D. C.

MY DEAR MR. CARTER: Your letters of June 14 and August 16, directed to the Commissioner of Patents and referring to printing for the Patent Office, have been referred to me.

An investigation made before the receipt of your letter of June 14 indicated that at least $200,000 per year could be saved if the Patent Office printing were done by private contract. An investigation made since the receipt of said letter shows that the saving will be much greater, probably double that amount.

In this connection I am transmitting a photostatic copy of a proposition in writing made by the Polygraphic Co. of America to print patent specifications at a cost not to exceed $4.25 per page and the Official Gazette at a cost of $10 per page. This, based upon the number of pages (191,933) printed in the fiscal year ending June 30, 1932, would effect a saving of $330,700 for printing the specifications and $71,500 for printing the Official Gazette; a total saving of at least $400,000.

In view of the fact that your letter states that you are now authorized to have the printing done under private contract instead of at the Government Printing Office (act of February 28, 1929, 45 Stat. 1400), and in view of the last paragraph of your letter where you state you will give "serious consideration to having the work done by contract if any substantial saving can be made thereby other than a possible saving resulting from the better preparation of copy of the Patent Office," I am transmitting this offer of the Polygraphic Co. for your consideration.

Incidentally, I might add that the Polygraphic Co. agrees to effect this saving without the necessity of the Patent Office "furnishing better copy to the private contractor than has been supplied to the Government Printing Office by the Patent Office for many years," as suggested in the second paragraph of your letter. In other words, the Polygraphic Co. would relieve the Patent Office of the necessity of specially preparing "copy," thus effecting a further saving of $30,000. In addition, the president of the Polygraphic Co. advises the commissioner orally that he has no doubt that he will be able to make a further reduction after the first year's operation.

As I understand it, the Polygraphic Co. would, and any other company to whom the contract might be awarded should, guarantee their fulfillment of the contract even to the extent of fur-

nishing an indemnifying bond. The photolithographing contract of the Patent Office with the Polygraphic Co. last year amounted to $140,000. The work was uniformly delivered on time and the quality was excellent.

Sincerely yours,

ROY W. CHAPIN.

NOVEMBER 25, 1932.

Hon. GEORGE H. CARTER,
Public Printer, Washington, D. C.

MY DEAR MR. CARTER: Receipt is acknowledged of your letter of November 15 relative to the Patent Office printing.

1. Your letter suggests that the Commissioner of Patents has not submitted to you the facts and figures which would reply to your letter requesting the same. While it is true the Commissioner of Patents has not directly given you the facts, it was the intention that my letter of September 16 was to be considered as a reply to your letter to the commissioner, and, in fact, my letter specifically referred to your letters of June 14 and August 16.

2. My letter of September 16 gives you full information regarding the question of printing. The Commissioner of Patents does not know to what you have reference when you mention the "new methods of printing" or the "new methods of procedure" which will enable the Polygraphic Co. to effect a saving of $400,000 referred to. In fact, the commissioner has had no "negotiations" with the Polygraphic Co. concerning the matter under discussion other than what has been frankly set forth in the information conveyed either in or with my letter of September 16.

3. Before the Polygraphic Co. had submitted its offer of August 1, this office authorized the Commissioner of Patents to have printed two of the patents already printed by your office, such work being done from the same files as were used by your office. (The work was not done by the Polygraphic Co.) When the work was done the commissioner was furnished with an itemized statement showing the cost of the composition, the cost of proof reading, the cost of correction, the cost of type metal, the cost of paper, etc. It was manifest from this that there would be a saving of over $300,000 on your charges for last year.

4. The offer of the Polygraphic Co. was not submitted by me to you as one to be necessarily accepted, but merely for the purpose of showing that the work could be done by an outside contractor for at least $400,000 less than you were doing it. In fact, the last paragraph of my letter of September 16 made it very evident that if the work were done by a private contractor the contract might be awarded to some other contractor than the Polygraphic Co. This department (including the Patent Office) was and is still willing to accept the offer in your letter of June 14 wherein you stated that you would give "serious consideration to having the work done by contract if any substantial saving can be made thereby other than a possible saving resulting from the better preparation of copy of the Patent Office." In other words, if in your judgment you decided to take advantage of the fact that the Patent Office could save at least $400,000 by having the printing done by private contract and should advertise for proposals, the contract would as a matter of course go to the lowest responsible bidder. Certainly the Polygraphic Co. could get the bid only if it were the lowest responsible bidder and would furnish the bond referred to in the last paragraph of my letter of September 16.

5. You are entirely correct in your belief that the Patent Office does not wish its original records to leave the city, and therefore agrees with your conclusion that it would be better not to accept the trial offer of the Polygraphic Co. Nevertheless you are under a misapprehension in believing that the Patent Office does not now permit private contractors to use its secret records in advance of the printing of the patent. Every drawing as soon as it is filed is sent out of the Patent Office to a private photographer to be photographed. Moreover, for years there have been two or three private contractors who are permitted to withdraw our original specifications and drawings, while the applications are still pending, to make copies. There would, therefore, be no objection to awarding the printing contract to a private printer, since he would be under bond for the faithful performance of his duties and would be required to make the same arrangements for secrecy as are now made in your office. In any event, it is to be noted that the Polygraphic Co. agrees to perform the work in this city.

6. Your letter states that in making this estimated saving of $400,000 we utterly ignored the fact that your letter of August 16 advised that the total charges for printing would be reduced by at least $50,000, and possibly by another $50,000, or $100,000 in all. This was not ignored but was given full consideration. Even if it is assumed that your charges for the first four months of the present fiscal year have reflected this saving, two factors must not be overlooked, to wit: (1) That the saving is made at a cost of $30,000 extra expense within the Patent Office; and (2) that even if your bills for the last four months having shown a saving of $50,000, or even $100,000, there would still remain a saving of at least $400,000 on your charges, as nearly as we can estimate from your bills as rendered for July, August, September, and October of the present year, this saving being based upon the offer of $4.25 per page of specification and $10 per page of Official Gazette.

7. It would seem appropriate to mention at this time that it is difficult for the department or the Patent Office to ascertain definitely what your charges are, except as to totals. Would it not be feasible for you to indicate in your future bills the number of pages printed and the rate per page?

You have written the commissioner that you have the power under the present law and will be willing to award the contract to a private contractor if we can show a substantial saving. We have shown this. In our views, $400,000 is a substantial saving. It is therefore believed that you should either perform the work at a reasonable price compared with private printers or make good your offer to have the work done privately, since your condition that a substantial saving be effected has been completely met.

Sincerely yours,

ROY D. CHAPIN,
Secretary of Commerce.

Mr. OLIVER of Alabama. Mr. Chairman, it is interesting to read the hearings relative to this matter. It was first called to the attention of the committee by the Secretary of Commerce. After a hearing with the Director of the Bureau of Patents in respect to the same subject, the committee felt it was but fair to send for the Public Printer, and after the hearings were closed we had a very interesting hearing with the Public Printer, and in justice to him, I should say that he seemed very willing to cooperate fully with the Director of the Bureau of Patents to effect savings in this item. When we called his attention to what the Budget had estimated for 1934, even after the director had made the reductions he thought were proper, the Public Printer said to the committee in effect, "I think you would be safe in taking $150,000 more from that appropriation, since we can do the work for that amount." Based on what the Public Printer stated, the committee reduced the estimate submitted by the Budget $150,000. So, really, the conferences led to a saving of approximately $400,000.

Mr. CELLER. Will the gentleman yield for a question?

Mr. OLIVER of Alabama. Yes.

Mr. CELLER. I believe the Commissioner of Patents will tell you that unless something is done in this regard and along the lines I have suggested, they may not be able to come within the appropriation you have made, since you have made deductions of almost $400,000.

Mr. OLIVER of Alabama. As I have just stated to the gentleman, the Public Printer, who knows what this printing should cost, estimates that we are safe in making the reduction recommended.

The amendment was withdrawn.

The Clerk read as follows:

Government fuel yards: For the purchase and transportation of fuel; storing and handling of fuel in yards; maintenance and operation of yards and equipment, including two motor-propelled passenger-carrying vehicles for inspectors, purchase of equipment, rentals, and all other expenses requisite for and incident thereto, including personal services in the District of Columbia, the unexpended balance of the appropriations heretofore made for these purposes is reappropriated and made available for such purposes for the fiscal year 1934, and for payment of obligations for such purposes of prior years, and of such sum not exceeding $500 shall be available to settle claims for damages caused to private property by motor vehicles used in delivering fuel: *Provided*, That all moneys received from the sales of fuel shall be credited to this appropriation and be available for the purposes of this paragraph: *Provided further*, That the term "fuel" wherever used in this appropriation shall be understood to include fuel oil: *Provided further*, That the requirements of sections 3711 and 3713 of the Revised Statutes (U. S. C., title 40, sec. 109) relative to the weighing of coal and wood and the separate certificate as to the weight, measurement, or quantity of coal and wood purchased shall not apply to purchases by the Government fuel yards at free-on-board destinations outside of the District of Columbia;

Mr. GOSS. Mr. Chairman, I reserve a point of order on the proviso beginning in line 16, in order to get an explanation of the provision from the gentleman from Alabama.

Mr. OLIVER of Alabama. Mr. Chairman, this is a proviso that has been carried in the bill for a number of years.

Mr. GOSS. This proviso seems to exempt the weighing of coal and wood purchased by the Government fuel yards at free-on-board destinations outside of the District of Columbia. Why should we do this?

Mr. OLIVER of Alabama. Inasmuch as they buy fuel in such large quantities, it has been found feasible to do this, since the Director of Mines is charged with the duty of supervising all purchases and making all tests.

Mr. GOSS. There is no chance of the Government's being short weighted?

Mr. OLIVER of Alabama. We understand it is watched very carefully and that this is an economical and efficient way of conducting the large purchases of the Government through this agency.

Mr. BRIGGS. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. BRIGGS. Does the Bureau of Mines engage in any particular investigational work here with reference to coal? I notice a vast movement of fuel, it seems to me, in wagons of the Bureau of Mines through the streets of Washington.

Mr. OLIVER of Alabama. That is the delivery of coal to the various departments.

Mr. BRIGGS. They simply use the wagons of the Bureau of Mines for that purpose?

Mr. OLIVER of Alabama. They purchase the coal for the different departments and deliver it as the departments may need it.

Mr. GOSS. I would ask the gentleman to look into this item at some time, because we may easily get short weighted.

Mr. OLIVER of Alabama. We have gone very fully into the matter with the Director of Mines, and he believes that this fund is economically expended. We took some money from the revolving fund, because we did not feel the full amount was required for another year. We did this in order to require the departments to pay more promptly for fuel when delivered, since appropriations are carried for that purpose.

The Clerk read as follows:

Helium plants: For helium production and conservation, including acquisition of helium-bearing gas land or wells by purchase, exchange, lease, or condemnation, or interest in such land or wells, the purchase, lease, construction, or modification of plants, pipe lines and accessories, compressor stations, camp buildings, and other facilities for the production, transportation, storage, and purification of helium and helium-bearing gas, including acquisition of sites and rights of way therefor, by purchase, lease, or condemnation, and including supplies and equipment, expenses of travel and subsistence, maintenance and operation of motor-propelled, passenger-carrying vehicles for official use in field work, and all other necessary expenses, including not to exceed $6,560 for personal services in the District of Columbia, and including the payment of obligations incurred under the contract authorization carried under this heading in the Department of Commerce appropriation act for the fiscal year 1932, the unexpended balances in the appropriation "Helium Plants, Bureau of Mines, 1933," less the sum of $50,000, are hereby continued available for the fiscal year 1934: *Provided*, That no part of the appropriation herein made may be expended except with the approval of the President: *Provided further*, That the acquirement of leases, sites, and rights of way under terms customary in the oil and gas industry, including obligations to pay rental in advance and to pay damages to lands, crops, or structures arising out of the Government's operations is authorized: *Provided further*, That should valuable products other than helium-bearing gas to be discovered in wells acquired or drilled for helium-bearing gas under this appropriation the Secretary of Commerce is authorized to provide for the disposal of said wells or the products therefrom, by the contracts under which the property is acquired, or otherwise, in accordance with the interests of the Government therein and in the manner which, in his opinion, is most advantageous to the Government.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word.

Is the Government now getting from its own plants all the helium that it requires for the Army and Navy?

Mr. OLIVER of Alabama. Yes.

Mr. BRIGGS. And the Government does not get any helium from any other source?

Mr. OLIVER of Alabama. No.

Mr. BRIGGS. Is there any other helium production on a commercial scale, other than what the Government produces?

Mr. OLIVER of Alabama. Not to my knowledge.

The Clerk read as follows:

Total, Bureau of Mines, $1,464,300.

Mr. GRIFFIN. Mr. Chairman, I move to strike out the period in the last line. Mr. Chairman, we have reached the conclusion of the bill for the Department of Commerce. I think it might be well to review the growth of that department briefly. I have prepared a tabulation showing its personnel and its appropriations for the years 1913, 1922, and 1932.

For instance, in 1913, in the beginning of the activity of this department, the personnel was 8,788 and the appropriation was $11,345,088.

In 1922 the department had grown to the extent that it employed a personnel of 11,355 and the appropriation was $20,012,907.

In 1932 the personnel had risen to 20,912 and the appropriation was $54,716,230, a jump of nearly nine times in the personnel and an increase in the appropriation of five times over 1913.

Now, the appropriations from that point have dropped—1932 was the peak. The appropriations for 1933 dropped to $44,784,408. The appropriations recommended in this bill for the next fiscal year are down to $36,605,465.

I think it is interesting for the House to know that with respect to that department the committee has shown a disposition to work in harmony with the economy plan.

Mr. STAFFORD. Will the gentleman yield?

Mr. GRIFFIN. I will.

Mr. STAFFORD. In the gentleman's study, has he been able to ascertain in which bureau of the Department of Commerce there has been any marked increase, or is the increase general to all the bureaus? The gentleman's figures are rather startling. The increase from 1913 to 1922 might have been expected, because of the war activities, and that is only $9,000,000, but from 1922 to 1932 they increase nearly 200 per cent.

In the consideration of the bill, I recently pointed out that the appropriations for the Bureau of Standards might be decreased without doing violence to that bureau by a cut of four or five hundred thousand dollars. In what bureaus have the exceptional increases been made?

Mr. GRIFFIN. I have made an analysis of the various bureaus, and I will put it in my remarks in answer to the gentleman.

In connection with this, I want to point out to Members that in the RECORD of January 23, page 2329, I published an analysis for the Department of State for the same years, showing the growth of that department and its personnel.

In 1913, the personnel for the Department of State was 213 and the appropriation $325,960. In 1922 the personnel had jumped to 644 and the appropriations to $1,002,675. In 1932 the personnel was 851, and the appropriation was $2,094,200.

Mr. DYER. Will the gentleman yield?

Mr. GRIFFIN. Yes.

Mr. DYER. Whose fault was it that these increases were made? Was it not the fault of the Committee on Appropriations? It gave them these additional appropriations from year to year.

Mr. GRIFFIN. The Appropriations Committee has tried to follow the law.

Mr. DYER. But sometimes the Committee on Appropriations appropriates for things not authorized.

The following is the table referred to by Mr. GRIFFIN:

Department of Commerce—Appropriations and personnel for years 1913, 1922, 1932

Bureau	1913		1922		1932	
	Personnel	Appropriations	Personnel	Appropriations	Personnel	Appropriations
Office of Secretary	139	$730,830	183	$690,300	170	$1,477,160
Foreign and Domestic Commerce	108	176,242	595	1,228,510	1,902	5,334,122
Census	1,376	1,251,886	1,664	1,000,000	4,043	6,270,580
Steamboat Inspection Service	262	534,740	366	990,790	420	1,395,120
Navigation	95	163,060	230	316,922	192	496,280
Standards	312	689,410	968	1,507,360	1,035	2,874,570
Lighthouses	5,624	5,563,910	5,909	8,856,790	7,814	12,082,410
Coast and Geodetic Survey	347	1,036,020	978	2,129,690	1,279	3,075,933
Fisheries	398	944,790	462	1,244,180	1,193	2,905,540
Bureau of Corporations	127	254,200				
Aeronautics Branch					272	10,362,300
Radio division					189	646,700
Patent Office					1,425	5,516,750
Mines					978	2,278,765
Increase of compensation				2,048,365		
Total	8,788	11,345,088	11,355	20,012,907	20,912	54,716,230

Appropriations for 1933	$44,784,408
Appropriations recommended in fiscal year 1934	36,605,465

The Clerk read as follows:

Printing and binding: For printing and binding for the Department of Labor, including all its bureaus, offices, institutions, and services located in Washington, D. C., and elsewhere, $225,000.

Mr. GARBER. Mr. Chairman, I move to strike out the last word.

The report of the subcommittee of the House Appropriations Committee on the pending bill making appropriations for the Departments of State, Justice, Commerce, and Labor for the fiscal year 1934 reflects a conscientious performance of duty by each Member and a determined effort to reduce the cost of Government, as far as it is possible to do so without serious injury to the service.

I am sure the members of this committee appreciate the services of the distinguished chairman and senior ranking member on this committee in being always willing to explain fully in detail the considerations determining their conclusions reached. In its report upon this bill, however, the following reference without clarifying statement is vague and indefinite.

Referring to the Court of Claims:

We are persuaded that the next Congress might well consider limiting the authority of the court as to some of the cases referred to them for trial to a finding of and a report on the facts.

The Court of Claims is not a court of reference. Its jurisdiction is not that of a referee or master in chancery. The Court of Claims is a court of original jurisdiction. Cases are not referred to the Court of Claims for trial, but are initiated and filed in that court by petition and procedure similar to the other civil courts. It is true that neither the ward of the Government nor the citizen can sue the Government without its permission, but that consent or permission of a sovereign is not a matter of favor, but is embedded in the morality of the duty of the Government to recognize the obligation of contract in the same degree that it requires the recognition of such obligation from the ward or citizen. In other words, it is just as much the duty of the Government to fulfill its obligations as it is the duty of the citizen.

Before the establishment of the Court of Claims those having claims against the Government could only be heard by Congress itself. This was recognized as most inefficient and cumbersome machinery to administer justice, even to the point of being almost a denial of such administration to the citizen.

For the purpose of relieving Congress of such grave responsibility and affording the citizen and the Government with a judicial agency, the Court of Claims was established by Congress in 1855 and by subsequent acts given a wide and varied jurisdiction, including all claims against the United States Government, with the exception of tort and pension claims. It has jurisdiction to hear and determine any claim against the Government founded upon any law of Congress or upon any regulation of an executive department or upon any contract, express or implied, or upon any treaty with the Government of the United States.

Originally it was a court merely in name, for its power extended only to the preparation of bills to be submitted to Congress. In 1863 the number of judges was increased from three to five. Its jurisdiction was enlarged, and instead of being required to prepare bills for Congress it was authorized to render final judgment, subject to appeal to the Supreme Court and to an estimate by the Secretary of the Treasury of the amount required to pay each claim. The Supreme Court, however, held that the provision of an estimate was inconsistent with the finality essential to judicial decisions, and Congress repealed that provision, since which time the Court of Claims has exercised all the functions of a court as exercised by the other inferior courts authorized by Congress.

The suggestion of our committee that—

We are persuaded that the next Congress might well consider limiting the authority of the court as to some of the cases referred to them for trial to a finding of and a report on the facts—

is not supported by any facts in the hearing or stated in the report. No reasons are given, no consideration is stated which persuaded the committee to make such suggestion, and we do not believe that mature consideration will justify any such action.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. GARBER. Mr. Chairman, I ask unanimous consent to continue for five minutes.

The CHAIRMAN. Is there objection?

Mr. STAFFORD. Mr. Chairman, there will be several roll calls this afternoon, and this is Saturday afternoon. I think we ought to get along with the bill.

Mr. DYER. Mr. Chairman, I ask unanimous consent that the gentleman may have three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DYER. Mr. Chairman, will the gentleman yield?

Mr. GARBER. Yes.

Mr. DYER. In the cases that the gentleman speaks of, why could not the Congress authorize the district courts to try them? We are going to have a surplus of district judges in this country very shortly, due to the fact that prohibition is going to be repealed. Why not give those district judges something to do and transfer jurisdiction to them, instead of creating so many other courts?

Mr. GARBER. Mr. Chairman, that is entirely within the jurisdiction of Congress.

The court was established to relieve Congress, to protect the Government by regular investigation, and to protect claimants by affording them a certain mode of examining and adjudicating their claims.

When the court has ascertained and determined what valid claims a plaintiff may have against the defendant, its function and power is ended. It can issue no execution to enforce the payment of the amount so ascertained. Plaintiffs must then appeal to the sovereign for an appropriation to pay the claim ascertained by the court to be due. This appeal must be made to the legislative department of the Government. It rests with the legislative branch of the Government; and if Congress refuses to appropriate the money to pay the judicially ascertained claim, the power does not reside in any court to enforce the payment thereof, and there is no other forum in which the plaintiffs can seek redress.

In commenting upon the court, the distinguished chairman took occasion to say that the aggregate of the pending claims, including interest and principal, amounted to $4,055,312,696.59, as shown in the following table:

Tax cases:		
675 actual claims	$66,097,106.65	
Estimated interest	14,688,245.92	
		$80,785,352.57
Patent cases:		
41 actual claims	238,347,640.08	
Estimated interest	52,966,142.24	
		291,313,782.32
Indian cases:		
58 actual claims	1,072,006,278.34	
25 estimated claims	354,000,000.00	
Estimated interest	2,112,449,581.39	
		3,538,455,859.73
General and special jurisdictional cases: 777 actual claims		144,757,701.97
		4,055,312,696.59

The implication, especially to the average layman, is that the court was being resorted to for the collection of claims against the Government which were unwarranted and unjustifiable in the jurisdiction which it exercises.

The distinguished chairman should have accompanied such statement with the percentage of results in judgments rendered and collections made, and the aggregate amount of claims pending would not be so terrifying. In his annual report for the fiscal year ending June 30, 1932, the Attorney General stated:

The total amount of judgments rendered against the Government during the year was $5,503,534.84 in cases in which the recovery sought was $470,513,986.48. The percentage of recovery for the current year was approximately 1 per cent of the amount claimed.

This means that the stupendous aggregate amount of claims pending in the Court of Claims in excess of $4,000,-

000,000, so far as practical results in the form of judgments are concerned, would amount to $40,000,000, and these claims include claims pending over a period of 10 years. The records of the court show that in all the suits filed in the court from 1920 to 1932, the aggregate amount claimed was $12,678,687,341, while the net amount on all of such claims during said period of 12 years is $75,190,563.

RECORD IN SUPREME COURT

From October, 1925, to November 1, 1932, inclusive, there were filed in the Supreme Court of the United States 332 petitions for writs of certiorari to review the judgments of the Court of Claims. The Supreme Court denied certiorari in 246 cases and granted 83. There are 3 cases pending, upon which no action has been taken. Of the 83 cases in which writs were granted, 17 are now pending in the Supreme Court, 43 were affirmed by the Supreme Court, and 33 have been reversed. In the 43 cases in which the Court of Claims was affirmed, 36 were decided by the Court of Claims in favor of the Government and 7 in favor of the plaintiff. In the 33 cases reversed by the Supreme Court, 23 had been decided by the Court of Claims against the plaintiffs and 7 had been decided by the Court of Claims against the Government. The 3 remaining cases which were reversed by the Supreme Court represent judgments in the Court of Claims for the plaintiff in which the Supreme Court increased the judgments for plaintiff. It will be seen from the above that the great majority of cases in which the Court of Claims is reversed, it had decided in favor of the United States and that over a period of seven years the Court of Claims has been reversed only seven times in cases which it decided against the United States.

* * * * * * *

We have 559 tax cases, 9 ship cases, 31 patent cases, 45 cotton linter cases, 5 railroad cases, 84 Indian cases under special jurisdictional acts, 27 cases for dependency allowances, 189 miscellaneous, and 416 congressional cases, for a total of 1,554.

Mr. OLIVER. Can you follow that with a statement of the cases disposed of during the last fiscal year?

Chief Justice BOOTH. Number of cases disposed of by the court from July 1, 1931, to June 30, 1932, 698.

* * * * * * *

In accordance with the annual report to Congress, dated December 5, 1932, it appears that for the year ended December 3, 1932, there were 463 cases disposed of, either by dismissal, judgments for plaintiffs or judgments for defendant.

Amount claimed	$51,071,743.46
Judgments for plaintiffs	4,635,526.41
Judgments for defendant (cost of printing)	8,763.34
Judgments on counterclaims	2,090,274.58

We submit that this record of judicial service by the Court of Claims will favorably compare with that of any of the other inferior courts established by Congress.

The Clerk read as follows:

EMPLOYMENT SERVICE

To enable the Secretary of Labor to foster, promote, and develop the welfare of the wage earners of the United States, including juniors legally employed, to improve their working conditions, to advance their opportunities for profitable employment by regularly collecting, furnishing, and publishing employment information as to opportunities for employment; maintaining a system for clearing labor between the several States; cooperating with the Veterans' Administration to secure employment for veterans; cooperating with and coordinating the public employment offices throughout the country, including personal services in the District of Columbia and elsewhere; traveling expenses, including expenses of attendance at meetings concerned with the work of the employment service when specifically authorized by the Secretary of Labor; supplies and equipment, telegraph and telephone service, and miscellaneous expenses; $734,865, of which amount not to exceed $46,750 may be expended for personal services in the District of Columbia: *Provided*, That no part of this appropriation shall be expended for the establishment or maintenance of any employment office unless suitable space therefor can be found in a Federal building or is furnished free of rent by State, county, or local authority, or by individuals or organizations: *Provided further*, That no part of this appropriation shall be used to pay any salary in any field employment office at an annual rate in excess of $2,000, except one director in each State whose salary shall not exceed $3,500, and 23 managers of the veterans' employment service whose salary shall not exceed $2,400 each.

Mr. CONNERY. Mr. Chairman, I move to strike out the last word to ask a question in reference to the Employment Service. I read the concluding proviso under Employment Service:

That no part of this appropriation shall be used to pay any salary in any field employment office at an annual rate in excess of $2,000, except one director in each State whose salary shall not exceed $3,500, and 23 managers of the veterans' employment service whose salaries shall not exceed $2,400 each.

Does this take care of all the offices that are now open in the employment service?

Mr. OLIVER of Alabama. I can not say that it does. This is the Budget estimate as submitted to us. The gentleman will recall that the House only recently approved a supplemental estimate sent up by the President, and it may be that some of these offices can not be kept open with the amount included in the original estimate; and that if it is important to keep them open in 1934, the next President would have to send up what has been done this year, namely, a supplemental estimate.

The Clerk read as follows:

UNITED STATES HOUSING CORPORATION

Salaries and expenses: For officers, clerks, and other employees, and for contingent and miscellaneous expenses, in the District of Columbia and elsewhere, including blank books, maps, stationery, file cases, towels, ice, brooms, soap, freight and express charges, communication service, travel expense, printing and binding not to exceed $150, and all other miscellaneous items and expenses not included in the foregoing and necessary to collect and account for the receipts from the sale of properties and the receipts from the operation of unsold properties of the United States Housing Corporation, the Bureau of Industrial Housing and Transportation, property commandeered by the United States through the Secretary of Labor, and to collect the amounts advanced to transportation facilities and others; for payment of special assessments and other utility, municipal, State, and county charges or assessments unpaid by purchasers, and which have been assessed against property in which the United States Housing Corporation has an interest, and to defray expenses incident to foreclosing mortgages, conducting sales under deeds of trusts, or reacquiring title or possession of real property under default proceeding, including attorney fees, witness fees, court costs, charges, and other miscellaneous expenses; for the maintenance and repair of houses, buildings, and improvements which are unsold; in all, $13,195: *Provided*, That no person shall be employed hereunder at a rate of compensation exceeding $4,000 per annum, and only one person may be employed at that rate: *Provided further*, That no part of the appropriations heretofore made and available for expenditure by the United States Housing Corporation shall be expended for the purposes for which appropriations are made herein.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. OLIVER of Alabama. Mr. Chairman, I wish to express to the Members of the House, on behalf of the committee having this bill in charge, our deep appreciation for their splendid cooperation, which alone made possible the expeditious consideration of the bill. It has been my purpose to ascertain in advance as far as possible what items the Members of the House were interested in discussing; and recognizing the value of intelligent discussion, I have sought to secure adequate time therefor as to such items. I know the House will understand that what I may state as my individual opinion in relation to the action taken on certain amendments is not intended as a criticism of the membership of the House but simply to submit for their further consideration my views relating thereto. Take the vote yesterday on the amendment offered by the distinguished gentleman from Ohio [Mr. COOPER] relating to the Federal prison in Pennsylvania. While time will not permit an oral discussion, I ask leave to insert as a part of and at the close of my remarks a prepared written statement, which the Members of the House are urgently requested to read.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. OLIVER of Alabama. You will conclude, I believe, after reading the facts respectfully submitted, that the committee has departed, perhaps unconsciously, from a well-defined and widely approved policy only recently adopted by almost a unanimous vote of the Senate and House in reference to prison industries. Unwittingly you are discriminating in favor of one single class of industry and against other industries equally if not more deserving, and which the original act, passed in May, 1930, very wisely and properly warned against. The gentleman from Missouri [Mr. DYER] inserted in last Thursday's RECORD a splendid statement by the Director of the Bureau of Prisons, in which will be found a very convincing and in-

forming discussion of our Federal industrial system now in vogue at our penal institutions in strict conformity to the express mandates of Congress. It is my hope that the House may correct this mistake of the committee.

The other two matters of which I wish to speak are the two amendments that were adopted by the committee and which, in my judgment, will seriously impair, if not prevent, any effective enforcement of the national prohibition law. I recognize how sharp differences may exist between Members as to the amount of the appropriation that should be now carried, and as to that I will not further complain; but I respectfully submit that when you have fixed the appropriation for this service, you should not make ineffective the enforcement of the law by imposing limitations which you have repeatedly heretofore rejected and disapproved. I concede absolute sincerity of opinion to those who entertain strong convictions against national prohibition; but, as I argued yesterday, so long as it remains in the Constitution, it should be enforced, and certainly those charged with the solemn and difficult duty of enforcement should not have limitations imposed on them which for years your committee has been informed will seriously interfere with the effective enforcement of the law.

As to the two amendments, one offered by the gentleman from Massachusetts [Mr. TINKHAM], the other by the gentleman from Georgia [Mr. TARVER], I feel that many Members have not had the benefit of the information supplied to the committee by the officials charged with the enforcement of the law in question. They have uniformly opposed these limitations as unwise, and Congress has previously given approval to the views thus expressed by our officials.

The amendment offered by the gentleman from Massachusetts [Mr. TINKHAM], which seeks to prevent any part of the appropriation being used for wire tapping, has been before the House a number of times. After exhaustive discussion the House has regularly voted it down. You have wisely, I think, heretofore vested broad discretion in those charged with the duty of administering this fund. I make bold to assert that if you have had occasion to inquire as to how during the past few years the funds have been administered by the Department of Justice, I am confident you have found no just ground for criticism.

You know the members of the Committee on Expenditures. They differ widely on the question of national prohibition; and one of the members of this committee had strongly favored the Tinkham limitation, up to about two years ago, but after the Attorney General appeared before the committee and submitted in executive session a full and complete report of the cases in which wire tapping had been employed and gave assurance of further definite regulations he would impose to prevent abuses, the full committee were deeply impressed thereby, and little, if any, objection has been heard since from that committee about the matter so long as they felt it was carefully guarded by strict regulations.

Mr. CONNERY. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. CONNERY. Regardless of how any Member of the House may feel on the question of prohibition, is it not the general opinion throughout the country that wire tapping is a bad practice; it is unconstitutional, aside from the prohibition side of it? I mean with reference to other offenses.

Mr. OLIVER of Alabama. I am very glad the gentleman asked that question because I hope he will permit me to place before him full information as to cases in which it has been resorted to; if so, it is my firm conviction that the gentleman will be convinced that it has only been resorted to in extreme cases against the worst type of criminals that this country has ever known, and who could never probably have been detected otherwise.

Mr. DYER. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes; I yield.

Mr. DYER. They have resorted to this in States where the people have expressly legislatively prohibited it in the prosecution of State offenses.

Mr. OLIVER of Alabama. And in those States where the question has come before the courts of last resort I can show the gentleman opinions of such courts, to the effect that the statute of a State prohibiting wire tapping is not to be construed as making it unlawful for an official who may wire tap for the purpose of preventing the unlawful use of a public wire. I called attention to that some time since.

Mr. JOHNSON of Texas. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. JOHNSON of Texas. Has the Supreme Court passed upon the question of wire tapping?

Mr. OLIVER of Alabama. It has, and, by a majority vote, upheld it.

Mr. BECK. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. BECK. Did the Supreme Court uphold wire tapping, or was not the decision of the Supreme Court merely that testimony acquired in that way could not be excluded because of the method whereby it was acquired?

Mr. OLIVER of Alabama. The gentleman is correct.

Mr. BLANTON. Well, that upholds it.

Mr. OLIVER of Alabama. I thought that was really what the gentleman from Texas [Mr. JOHNSON] had in mind, in asking the question, namely, whether evidence thus procured could be offered in court.

Mr. BECK. That is a somewhat different question than stating that wire tapping was legal.

Mr. OLIVER of Alabama. The gentleman from Pennsylvania has correctly interpreted the decision of the court to which reference was made, and I am glad to correct my statement so as to make it conform to his.

The Attorney General, who will soon retire, who appeared before the Committee on Expenditures and made a statement to which I have referred, and you will find statements from him in the last two hearings before our committee about this practice, and it is his opinion that you might seriously interfere in some cases with the proper enforcement of law against dangerous criminals by imposing a limitation like this on the appropriation.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

Mr. DYER. Mr. Chairman, reserving the right to object——

Mr. LAGUARDIA. Reserving the right to object——

Mr. DYER. I couple with that the request that the gentleman from Pennsylvania [Mr. BECK] may proceed for 10 minutes after the gentleman from Alabama has finished.

Mr. OLIVER of Alabama. Mr. Chairman, I will withdraw my request.

Mr. LAGUARDIA. Mr. Chairman, I ask for recognition. I move to strike out the last word.

Mr. DYER. Mr. Chairman, the remarks of the gentleman from Alabama [Mr. OLIVER] are very instructive. I do hope that he may be able to proceed for five minutes. The gentleman has withdrawn his request under the circumstances.

Mr. CONNERY. Mr. Chairman, I ask unanimous consent that the gentleman from Alabama may proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. OLIVER of Alabama. I hope the House understands that I will interpose no objection to others speaking.

Mr. COCHRAN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. COCHRAN of Missouri. I am glad the gentleman has referred to the hearings before the committee of which I am chairman and at which the Attorney General appeared with his assistant. There is another phase to wire tapping that was not brought out at that hearing. I, too, agree with the gentleman from Alabama that the Attorney General does not want any abuse as far as wire tapping is

concerned; but I may say to the gentleman from Alabama that when this matter is analyzed carefully it will be found that the wires of reputable citizens are tapped in connection with the tapping of the criminals' wires, and there might be listening-in upon conversations that might be held between a client and his attorney. The gentleman would not approve of that.

Mr. OLIVER of Alabama. No. Under the very stringent rules and regulations laid down by the Attorney General following the hearing before the gentleman's committee it is impossible for anyone now to wire tap until it has been approved first by the chief of the field forces in Washington, next by the Director of the Bureau of Prohibition, and then only after the Attorney General or the Assistant Attorney General has given approval thereto.

Mr. COCHRAN of Missouri. That was the agreement the Attorney General made with the committee.

Mr. OLIVER of Alabama. And it has been carried out in letter and spirit, the committee is informed. After the committee suggested it, the Attorney General made the regulations referred to, and so far as our committee knows there have been no grounds for complaint since.

Further answering the gentleman from Massachusetts, there is no prohibition against wire tapping by other investigating units of the Government; and the gentleman will find they have had to resort to it in some important cases.

For instance, in cases of abduction, if this offense is not broken up in the future, wire tapping may have to be often resorted to. Otherwise you will never be able to locate the parties directly responsible for such offenses, which everyone condemns, and the punishment for which should be death, certainly in the Lindbergh case if the culprit is ever found. The development of rapid communication by radio, telephone, telegraph, has placed these instrumentalities in the hands of very dangerous criminal groups, to whom no Member of this House would consciously lend the slightest aid or support. Often, however, they are located far from the scenes of operation. They use the code system transmitted by radio, telegraph, and telephone and paid agents carry out orders thus sent, while keeping in constant contact with those far away. Sometimes such conspirators make their base of operations in foreign countries, sometimes far out at sea. No one who will take time to read the history of the exceptional cases where wire tapping has been resorted to will disapprove any action taken within the last 18 months.

In conclusion, as to these two amendments, my thought is that since you have repeatedly and wisely, I think, refused to impose these limitations on officials now in office, you can at least repose a like confidence on others who soon are to come into office. [Applause.]

[Here the gavel fell.]

Mr. OLIVER of Alabama. The following is the prepared statement which the committee authorized to be added at the conclusion of and as part of my oral remarks:

The Federal prison labor program has been the outgrowth of years of study and investigation. In its present form it is in conformity with the most progressive thought on the subject. The prison law providing for the diversification of employment of Federal prisoners was enacted as a direct outgrowth of the recommendations of a special committee appointed by the House of Representatives to investigate Federal penal affairs. This committee consisted of the Hon. JOHN G. COOPER of Ohio, chairman; WILLIAM F. KOPP, of Iowa; JOHN TABER, of New York; JOHN J. BOYLAN, of New York; and Thomas M. Bell, of Georgia. This committee recommended that additional opportunities be provided for the employment of Federal prisoners in the following words:

"EMPLOYMENT

"The committee believes that every effort should be made to provide increased opportunity for employment of Federal prisoners.

"It is the committee's judgment that immediate steps should be taken to establish additional shops in the penitentiaries and other Federal penal institutions to make additional goods and articles which could be utilized by the United States Government. There is no doubt but that there is an ample market in the Federal Government for a sufficient quantity and variety of goods to keep all Federal prisoners employed."

In conformity with the recommendations of this committee, a bill (Public No. 271, 71st Cong.) providing for the diversification of employment of Federal prisoners, was presented to the Judiciary Committee of the House and enacted into law without serious objection by the House of Representatives, was indorsed unanimously by the Senate, and approved by the President on May 27, 1930.

This bill had the indorsement not only of all students of the problem but also was specifically approved by the American Federation of Labor. The principles upon which this bill was founded were:

(1) To restrict the market for the products made in Federal prisons to tax-supported institutions and agencies of the Government, thus eliminating any possibility that the labor of Federal prisoners might come into direct competition with free labor and free industry. Not one single dollar's worth of goods made in Federal prisons is sold in the open market—a policy which has so far been adopted by only four or five of the States.

(2) To diversify to the maximum types of employment upon which Federal prisoners were engaged so that no single industry could have just ground for complaint that it had to bear an unfair share of the burden of what little competition resulted from the methods adopted by the Federal Government.

(3) To permit the use of as large a number of Federal prisoners as possible on manual labor in the construction and repair of roads and other public ways and works.

(4) To permit the executive branch of the Government to consider the problem as a whole and determine the specific industry which should be installed in the Federal prisons, thus eliminating political influences, logrolling, and selfish interests.

In carrying out the mandate of the Congress the Department of Justice has gone even farther and adopted the policy of not monopolizing even the Federal market for any one type of commodity and has endeavored so to regulate the output of its industries that no single group of manufacturers could have just ground to complain. It has also attempted to spread the work of its prisoners to the maximum. It has adopted the 5-day week and a 7-hour day. During the present period of unemployment the Department of Justice has decided that it would not install any additional industries if there are already in the institution any means whatever for providing employment. It does not use high-speed, automatic, or labor-saving machinery. It uses machinery only where necessary to produce a satisfactory product. No person or individual has ever suggested a practical means of employment for prisoners which has not been adopted by the Federal Government.

At the present time the following industrial activities are carried on at the various Federal prisons.

Industrial activities at Federal prisons June 30, 1932

Institution	Name of industry	Institution population	Number of prisoners employed
Atlanta	Cotton textiles		851
Do	Canvas, baskets, and mail bags.		50
Do	Print shop		15
Do	Clothing		73
Do		3,281	989
Leavenworth	Shoes		477
Do	Brooms		52
Do	Wood furniture		55
Do		3,537	584
Fort Leavenworth	Brushes		127
Do	Print shop		53
Do	Laundry		105
Do	Dry-cleaning plant.		16
Do	Ice plant		18
Do		1,835	319
Chillicothe	Foundry		19
Do	Brick plant		98
Do		1,534	117
Alderson	Garments	470	70
Fort Eustis	Salvage, bakery	640	70
Camp Lee	Sawmill, wood, furniture.	635	60
Total			1,809
All institutions	Farming		2,000
Camps	Road work and manual labor.		800
Total population in all Federal institutions		13,698	

From the foregoing it can be seen that only about 15 per cent of the Federal prisoners are engaged in industries and only about 10 per cent are engaged in activities which supply goods to other Government departments and agencies.

The adoption of an amendment providing that the prison industries working capital fund can not be used to purchase machinery for the manufacture of metal furniture is a direct reversal of the policies heretofore adopted by the Congress and approved by all of those interested in the question. It discriminates in favor of a particular industry and will compel the Government and the Congress to repudiate their solemn promises to other industries that the activities of prisoners will be diversified and the burden

of competition spread equitably. It means, moreover, that there will be absolutely no means of employing those prisoners who must be kept within the walls of the new institution in Pennsylvania unless the machinery is purchased prior to July 1, 1933, with funds now available. Stripped of its camouflage, the proposal that no machinery may be used in the manufacture of metal furniture means that this industry can not after July 1, 1934, and during that year be established. No man can cut a $\frac{3}{16}$-inch steel plate with hand tools or bend accurately a 12-gage sheet of metal without the help of machines. To eliminate machines in an industry such as metal furniture strikes a death blow at its establishment.

It may deprive the inmates of this prison of the right to work at productive labor. It means that those who have been placed in this institution in order to protect society may be released no better trained to work than when they entered and inevitably they might leave the prison worse than when they were received. Idleness in a prison vitiates all efforts to reform the inmate. It complicates discipline and increases maintenance costs. It makes of the prisoner a parasite rather than a producer. An idle man is a charge upon the whole community and the unemployment problem does not stop at the prison wall. Most appalling, however, is the thought that human beings are condemned by the law of the Federal Government to idleness.

Experience shows that wherever men have been crowded into an institution with no means of occupying their hands and minds, depravity, bloodshed, and riots have followed inevitably. The responsibility will not rest only upon the prison officials for the safekeeping of 1,200 men caged up within the small compass of a prison if means of occupying their time is to be denied or curtailed. Recent riots in prisons have focussed the attention of the public on this question and most of the States have been seeking a solution to this baffling problem.

In their attempts to find a remedy the States have adopted various means of employing their convicts. In Wisconsin, for example, their largest industry is a hosiery shop, employing something over 300 men on the contract-labor plan; another 125 are employed in making binder twine; and the remainder of the approximately 1,000 inmates are on maintenance tasks. In Michigan the prisoners make textiles, cement, metal furniture, brushes, and chairs. Of the Ohio prisons the Handbook of American Prisons says:

"The second striking characteristic of the prison is idleness. From 1,200 to 2,000 men are on the idle list, which is made more conspicuous by the use of the 'idle room,' in which hundreds of men spend their days sitting on benches in absolute idleness."

In New York the prison employment situation is acute and such industries as are in operation compete with private industry in substantially the same manner and to the same extent as do the Federal prisons. Everywhere the situation is critical.

The Federal Government does not now seek a complete solution of this situation. It does not hope to be able to provide employment during the present crisis for all of the inmates of the institutions. It seeks merely to stop the relative reduction in employment opportunities. The population of the Federal prisons has increased by 6,000 in the past four years and industrial employment opportunities have decreased. Since June 30, 1932, to the present date, for example, the number of men employed in Atlanta has decreased 40 per cent. Substantial reduction has also been made at Leavenworth. At the new prison at Lewisburg, Pa., the Department of Justice has suggested that employment opportunities be provided for only 12 per cent of the inmates and this only because it is vitally necessary to the safety of the institution. The investment in machinery will approximate $25,000, and the value of the 1934 production will approximate $40,000, which represents about one-tenth of the Government's annual purchases of such metal furniture.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last two words.

As is always the case in the question of the prohibition appropriation, every class of criminals, and the enforcement of all criminal laws are brought in to reinforce the argument. Criminals did not create prohibition, but prohibition has made criminals. There is no comparison or analogy between the apprehension, prosecution, and punishment of a crime involving moral turpitude, a malum per se, and a strictly statutory artificially created offense, a malum prohibitum. There is nothing in the amendments before the House which would in any way disturb the practice and the efficient administration of the criminal laws of the United States Government. The detection and enforcement of the criminal laws of the United States Government are placed in the charge of the Bureau of Investigation, the head of which is Mr. J. Edgar Hoover, an excellent and efficient official. Under his administration there have been no abuses, and no commission of crime in the enforcement of the criminal laws under its jurisdiction. The trouble with the enforcement of prohibition laws, we have had as much violation of other laws on the part of officials as violations of the law itself.

I may remind the gentleman from Alabama that eight years ago I brought to the attention of this House, when one Bruce Bielaski was in charge of the undercover system of the Prohibition Bureau, the fact that several extortion cases occurred from information obtained as a result of wire tapping ostensibly for the purpose of enforcing law. It is the abuse of wire tapping in connection with the prohibition enforcement that has created the repulsion against this system of detection and has caused a storm of protest throughout the United States.

The gentleman from Alabama must admit that the House has cooperated with him, and always does in passing appropriations or enabling acts for the proper enforcement of the criminal laws, but the gentleman from Alabama has not yet realized that there is an entire change of attitude on the part of the American people on the question of prohibition. The funds which he asks, all of the money without the reduction, will not result in enforcement of the law, as we have learned from 12 years of experience. The amendments he seeks to defeat will not impair the proper lawful enforcement of the law. The practices he would continue will not aid one bit in enforcement but only place in the hands of irresponsible, petty officials a weapon of extortion and oppression.

Is there anyone here who would doubt for a minute that when the protest in New England against the practice of writs and seizures took place, which was one of the incentives which created the thought of liberation from the mother country, that had the telegraph been in existence wire tapping would have been included? Mr. Chairman, the leading case in the United States Supreme Court, the citation of which escapes me at this time, is one where Government agents broke into a home and took incriminating papers; and, although the very conviction depended upon the use of those incriminating papers, they were not admissible in evidence. Now, because we have a new means of communication, would the gentleman destroy what has taken centuries to acquire, what has taken the sacrifices of thousands and thousands of human lives to obtain, the protection of the individual only for the sake of continuing a fanatical law which has proved a failure? It is time the sponsors of prohibition realize that by their stubbornness and extreme methods they are jeopardizing the enforcement of all criminal laws. All this would not have happened, Mr. Chairman, had it not been for the attempt here to create and to make criminal something that in and of itself is not wrong. The entire enforcement of prohibition has broken down, a change of national policy on this question is soon to be brought about. We must therefore adjust ourselves to the coming change. The first thing we may properly do is to stop unlawful tactics and entrapment in the enforcement of the law. The second thing to do is to limit enforcement to sources of supply, importations, and unlawful manufacture of liquor. The retail and petty violations may be left, for the remaining period of prohibition, to the local communities. I trust the House will retain all of the amendments.

[Here the gavel fell.]

Mr. CONNERY. Mr. Chairman, I ask unanimous consent that the gentleman from New York be allowed to proceed for five additional minutes.

Mr. OLIVER of Alabama. Mr. Chairman, reserving the right to object, I move that all discussion on this paragraph close in 10 minutes.

Mr. LAGUARDIA. Why not close it now?

Mr. OLIVER of Alabama. Then, Mr. Chairman, I move that all debate on this paragraph do now close.

The motion was agreed to.

Mr. OLIVER of Alabama. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. OLIVER of New York, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under considera-

tion the bill H. R. 14363, the State, Justice, Commerce, and Labor Departments, and the judiciary appropriation bill, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to, and that the bill as amended do pass.

Mr. OLIVER of Alabama. Mr. Speaker, I move the previous question on the bill and all amendments thereto to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. OLIVER of Alabama. Mr. Speaker, I demand a separate vote on the amendment offered by the gentleman from Massachusetts [Mr. TINKHAM] and the amendment offered by the gentleman from Georgia [Mr. TARVER].

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put the amendments in gross.

The amendments were agreed to.

The SPEAKER. The Clerk will report the first amendment on which a separate vote is asked.

The Clerk read as follows:

Tinkham amendment: On page 24, line 26, after the period, insert the following proviso: *"Provided,* That no part of this appropriation shall be used for or in connection with wire tapping to procure evidence of violations of the national prohibition act, as amended and supplemented."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. OLIVER of Alabama. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were refused.

So the amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment on which a separate vote has been asked.

The Clerk read as follows:

Tarver amendment: On page 24, line 26, strike out the period, insert a colon, and add the following: *"Provided further,* That no funds hereby appropriated shall be used for the purchase of intoxicating liquors, nor to pay informers, nor for the purchase of evidence."

The question was taken; and on a division (demanded by Mr. OLIVER of Alabama) there were—ayes 121, noes 78.

Mr. OLIVER of Alabama. Mr. Speaker, I make the point of order there is not a quorum present.

The SPEAKER. The Chair will count. [After counting.] Two hundred and thirty-one gentlemen present, a quorum.

Mr. BLANTON. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 174, nays 165, not voting 87, as follows:

[Roll No. 152]

Dieterich	Hancock, N. C.	Romjue	Yates
Dominick	Hare	Rudd	

So the amendment was agreed to.

The following pairs were announced:

On this vote:

Mr. Rudd (for) with Mr. Rich (against).
Mr. Carley (for) with Mr. Kurtz (against).
Mr. Corning (for) with Mr. Jenkins (against).
Mr. Sullivan of New York (for) with Mr. Goldsborough (against).
Mr. Douglas of Arizona (for) with Mr. Stull (against).
Mr. Buckbee (for) with Mr. Goodwin (against).
Mr. Wolfenden (for) with Mr. Fuller (against).
Mr. Bacharach (for) with Mr. Stalker (against).
Mr. Granfield (for) with Mr. Cochran of Pennsylvania (against).
Mr. Cooke (for) with Mr. Culkin (against).
Mr. Connolly (for) with Mr. Green (against).

Until further notice:

Mr. Bland with Mr. Wood of Indiana.
Mr. Lea with Mr. Hartley.
Mr. Brand of Georgia with Mr. Free.

Mrs. Owen with Mr. Davis of Pennsylvania.
Mr. Pettengill with Mr. Chiperfield.
Mr. Romjue with Mr. Manlove.
Mr. Weaver with Mr. Lehlbach.
Mr. Hare with Mr. Johnson of Washington.
Mr. Gilbert with Mr. Beedy.
Mr. Flannagan with Mr. Carter of Wyoming.
Mr. Drewry with Mr. Reid of Illinois.
Mr. Collier with Mr. Cavicchia.
Mr. Kerr with Mr. McLeod.
Mr. Larsen with Mr. Chase.
Mr. Dominick with Mr. Seger.
Mr. Underwood with Mr. Doutrich.
Mr. Williams of Texas with Mr. Eaton of New Jersey.
Mr. Hancock of North Carolina with Mr. Sullivan of Pennsylvania.
Mr. Flood with Mr. White.
Mr. Doxey with Mr. Wolverton.
Mr. Haines with Mr. James.
Mr. Fishburne with Mr. Wyant.
Mr. Hall of Mississippi with Mr. Yates.
Mr. Abernethy with Mr. Cole of Iowa.

Mr. BACHMANN. Mr. Speaker, the following Members, if present, would have voted "aye": Mr. GOLDER, Mr. MCLEOD, Mr. LANKFORD of Virginia, and Mr. FREEMAN.

Mr. RAINEY. Mr. Speaker, the following Members, if present, would vote "aye": Mr. SIROVICH, Mr. SMITH of West Virginia, Mr. BEAM, Mr. HORNOR, Mr. HARLAN, Mr. TIERNEY, Mr. STEWART, Mr. KENNEDY of Maryland, Mr. IGOE, Mr. DIETERICH, and Mr. SHANNON.

Mr. BUSBY. Mr. Speaker, the gentleman from Maryland, Mr. GOLDSBOROUGH, is unavoidably absent. If present, he would vote "no."

Mr. PALMISANO. Mr. Speaker, the gentleman from Maryland, Mr. KENNEDY, is unavoidably absent at a funeral. If he were present, he would vote "aye."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. OLIVER of Alabama, a motion to reconsider the vote whereby the bill was passed was laid on the table.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. SHANNON, for to-day, on account of important business.

To Mr. HARE (at the request of Mr. MCMILLAN), indefinitely, on account of important business.

To Mr. RUDD, indefinitely, on account of illness.

To Mr. SULLIVAN of New York, indefinitely, on account of illness.

To Mr. HANCOCK of North Carolina, until Thursday, February 2, on account of illness in his family.

RATIFICATIONS OF THE TWENTIETH AMENDMENT

The SPEAKER laid before the House a communication from Guy B. Park, Governor of the State of Missouri, announcing that the legislature of that State had ratified the proposed amendment to the Constitution of the United States fixing commencement of the term of President, Vice President, and Members of Congress, and fixing the time of the assembling of Congress.

The SPEAKER also laid before the House a communication from C. D. Buck, Governor of Delaware, announcing that the General Assembly of Delaware had ratified the proposed amendment to the Constitution fixing the term of commencement of the President, Vice President, and Members of Congress, and fixing the time of the assembling of Congress.

The SPEAKER also laid before the House a communication from Clarence D. Martin, Governor of the State of Washington, announcing that the legislature of that State had ratified the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President, Vice President, and Members of Congress, and fixing the time of the assembling of Congress.

THE BANKRUPTCY BILL

Mr. MICHENER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks by inserting in the RECORD a memorandum prepared by the Solicitor General on the bill, H. R. 14359, the so-called McKeown-LaGuardia bankruptcy bill.

The SPEAKER. Is there objection?

Mr. BANKHEAD. Reserving the right to object, what is this, a criticism of the bill; what is the nature of it?

Mr. MICHENER. There was no opportunity given the Solicitor General to come before the committee to suggest amendments. This suggests amendments which we hope to offer to the bill. Many Members of the House are making inquiries about the matter, and I know of no way that we can get it before the House except to publish it in this way. It will be in to-morrow's RECORD, so that there will be some opportunity to present the matter, which we can not do if it is passed under suspension of the rules.

Mr. LAGUARDIA. Mr. Speaker, I reserve the right to object, though I shall not do so, in order to say that the gentleman from Michigan is slightly in error when he says that there was no opportunity for the Solicitor General to present his views. The matter under discussion has been under consideration by a joint committee of the House and Senate for several months. The Solicitor General presented his views repeatedly. He made his recommendations. He conferred with members of the committee, and he has had every opportunity to present his views.

Mr. BANKHEAD. Mr. Speaker, I withdraw my reservation of objection.

Mr. MICHENER. Mr. Speaker, in answer to the gentleman from New York, let me say that the Solicitor General did not appear before the Committee on the Judiciary of the House.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MICHENER. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following memorandum prepared by the Solicitor General on the bill H. R. 14359, the so-called McKeown-LaGuardia bankruptcy bill:

JANUARY 26, 1933.

MEMORANDUM RE H. R. 14359

(House Calendar No. 300; Rept. No. 1897)

This bill proposes to amend the bankruptcy act by repealing sections 12 and 13 and adding a new chapter—Chapter VIII. Provisions for the relief of debtors.

The bill extends to debtors unable to pay their debts in due course and to their estates the protection of the court pending negotiations with their creditors for the extension or composition of their debts, in the case of individuals, and the readjustment of their debts, in the case of corporations, through the adoption of plans of reorganization. When approved by requisite majorities of the creditors and confirmed by the court these arrangements are made binding upon dissenting minorities under conditions which are intended to afford protection to minority interests. Relief is afforded under a process which does not carry the stigma of adjudication in bankruptcy. Adjudication may follow the debtor's failure to reach agreement with his creditors; but if the arrangement is approved and confirmed there can be no adjudication, and the debtor may obtain relief without reproach and be restored to gainful pursuits of benefit to himself and his creditors.

The process designed to accomplish these general purposes is set forth in three main sections of the new Chapter VIII proposed to be added to the present bankruptcy act, section 74 providing for compositions and extensions and being applicable to individual debtors, section 75 providing for corporate reorganizations, and section 76 providing for the reorganization of railroads engaged in interstate commerce.

As reported, the bill seems to require certain amendments of a more or less formal or technical character, which will be treated in a separate memorandum. The following comments are believed to present matters of more fundamental importance:

SECTION 74. COMPOSITIONS AND EXTENSIONS

In brief, this section is intended to provide a process for the voluntary readjustment, either by composition or by extension of the time of payment, of the indebtedness of the individual debtor who appears in court and makes such a proposal to his creditors.

In subsection (e) clause (1) the debtor may apply for the confirmation of his proposal after it has been accepted in writing by a majority in number of all creditors whose claims are affected by an extension proposal, which number must represent a majority in number and amount of such claims; and in clause (2) there is a further provision that failing to obtain the acceptance of a majority in number of all creditors, as required in clause (1), the debtor may nevertheless file a proposal for an extension, which after hearing as provided in subsection (f) the court may confirm as provided in subsection (g) if satisfied that (1) it includes an

equitable and feasible method of liquidation for secured creditors whose claims are affected and for the financial rehabilitation of the debtor; (2) it is for the best interests of all creditors; (3) that the debtor has not been guilty of any of the acts, or failed to perform any of the duties, which will be a ground for denying his discharge; and (4) that the offer and its acceptance are in good faith, and have not been made or procured except as herein provided, or by any means, promises, or acts herein prohibited. The proposal, when confirmed, becomes binding upon the debtor and his secured and unsecured creditors "provided that such extension or composition shall not impair the lien of any secured creditor but shall affect only the time and method of its liquidation."

Such process as this is open to the objection that a secured creditor may not be delayed in the enforcement of his security without his consent, or (as in the case of negotiable bonds secured by a trust indenture) without the consent of a majority of those entitled to participate with him in the enforcement of the security. The Supreme Court, in Isaacs *v.* Hobbs (282 U. S. 734) and in Stratton *v.* New (383 U. S. 318), has recognized the right of a bankruptcy court to enjoin foreclosure proceedings in other courts affecting property within its jurisdiction—upon the principle, however, that the court is engaged in an orderly liquidation of the debtor's property, and may itself provide for the enforcement of the rights of the secured creditors. But the proceeding here in question is intended to avoid liquidation by a process of composition or agreement between the debtor and his creditors. Clause (2) of subsection (e) dispenses with the necessity of any agreement and permits the court to stay all creditors in the enforcement of their claims and liens without the consent of any of them, provided the extension shall not impair the lien and shall affect only the time and method of its liquidation.

This is a drastic extension of the power of a bankruptcy court, which under subsection (p) will be exercised by referees, receiving purely nominal compensation, appointed to administer the provisions of the statute in each county of the United States. The exercise of such power without the consent of creditors would be susceptible of grave abuse and injustice in its administration. If clause (2), commencing in line 1 on page 5 and continuing to include the words "are affected," in line 10 on the same page, is stricken out, the confirmation of the debtor's proposal will depend upon the assent of a majority in number and amount of his creditors. Questions which have not before been presented in the court may arise under this section involving the rights of secured creditors who do not agree to postpone the enforcement of their liens, but these novel questions involving the extent of the bankruptcy power may well be left for determination when they arise in the courts.

The compensation to be paid to referees in proceedings under this section, as provided in subsection (o), appears to be entirely inadequate either to fairly compensate the referees who are now serving or to make possible the appointment of qualified referees as contemplated in subsection (p). The referees are given broad powers, in the exercise of which minority creditors will be prevented from enforcing contractual rights. Persons who are not qualified to perform their duties with intelligence, independence, and courage should not be intrusted with such responsibility. Lines 5 to 15 on page 9 should therefore be stricken out.

SECTION 75. CORPORATE REORGANIZATIONS

This section, with modifications considered desirable, follows very closely the provisions of a bill introduced on June 15, 1932, by Senator HASTINGS (S. 4921), which was drafted in this department. Several minor and formal amendments are necessary and will be suggested in a separate memorandum.

There has been included in subsection (m) the provision:

"Whenever in this act the words 'receiver' or 'trustee' are used, the same shall mean a natural person; excepting, however, upon good cause affirmatively shown by any interested party or parties that it is for the best interests of the debtor or the plan generally, the court may appoint a corporation, but such corporation shall not be appointed in a multiplicity of cases."

It is not clear whether this provision was intended to have application to all estates administered in bankruptcy or merely to proceedings under section 75 of this bill. It should, in any event, be limited in its application to proceedings under this section, and if so limited there is no reason for referring to "receivers" because receivers are not appointed under section 75.

Unless limited to reorganization proceedings, this section will disrupt the administration of bankrupt estates by corporate trustees in some of our larger cities, notably New York, Detroit, and Chicago, and will restore conditions which previously resulted in grave abuses. The whole subject is dealt with in the report of the Attorney General to the President under date of December 8, 1931 (S. Doc. 65, 72d Cong., 1st sess.), and proposals were there made which are still under consideration by Congress designed to secure much-needed improvement in the administration of bankrupt estates by trustees and receivers qualified through experience to conduct the business of estates in bankruptcy. Reference is made to pages 31 to 38 and 107 to 123 of the Report of the Attorney General, which proposed fundamental changes in the qualification and selection of trustees and receivers, and to the President's statement in his message of February 29, 1932:

"The choice of the liquidating personnel should be limited to competent individuals or organizations after careful consideration by the courts of their qualifications and ability to maintain an efficient and permanent staff for the conduct of the business. The compensation for such services should be upon a scale which will attract trained business organizations."

Until these proposals, and the facts upon which they are predicated, have been given consideration by Congress, and conclusions have been reached as to the best methods for procuring the employment of a trained personnel in the administration of bankrupt estates, there should be no interference with the efforts of the judges to procure, through the employment of responsible corporate receivers and trustees, an efficient administration of estates in bankruptcy. A return to the haphazard selection of individuals untrained in such business, and having no permanent organization or staff at their command for its conduct, would lead to serious abuses. Certainly, without hearing the judges charged with the responsibility for the administration of the law, Congress would not be justified in yielding to the suggestions of lawyers that a law be passed preventing the judges from exercising their discretion in the appointment of receivers or of trustees where the statute imposes the responsibility of selection upon them. Section 45 of the bankruptcy act expressly authorizes the employment of corporate trustees.

The whole question is one which should be dealt with when Congress comes to consider bills now pending for the general revision of the bankruptcy act. Subsection (m) of section 75 should be omitted from this bill. If this provision is applicable to all proceedings in bankruptcy, it limits the creditors as well as the courts in their selection of trustees.

Aside from formal amendments to be included in a separate memorandum, and the elimination of subsection (m), section 75 provides for a process of reorganization in the bankruptcy courts which will vastly improve the existing process in equality and will greatly facilitate the voluntary readjustment of corporate debts.

SECTION 76. REORGANIZATION OF RAILROADS ENGAGED IN INTERSTATE COMMERCE

This section, a revision of the provisions of section 75 relating to corporations generally, has been changed substantially so as to give the Interstate Commerce Commission broad powers in the initiation, formulation, and approval of any plan for the reorganization of a railroad corporation which is engaged in interstate commerce.

In subsection (c) the court, in its selection of trustees, temporary or permanent, is limited to those persons recommended by the Interstate Commerce Commission. By clause (8) of subsection (c) the court, on its own motion or at the request of the Interstate Commerce Commission, may refer matters for consideration and report to special referees who are to be appointed by the President, by and with the advice and consent of the Senate. In determining and fixing the compensation of these referees the court may act only with the approval of the Interstate Commerce Commission.

In subsection (d) the commission is given power to formulate the plan of reorganization, and creditors and stockholders may not be asked to accept any plan of reorganization until the commission, after a hearing, has proposed a plan which has its approval. The plan thus evolved and approved by the commission is not transmitted to the court until it has been accepted in writing by the requisite majorities of creditors and stockholders, and until after the commission has reopened the proceeding and determined under subsection (f) all of the matters recited therein. Many of these matters require judicial determination, after hearing before a judge who has not already determined the questions presented for decision. It will be noted that under the corresponding subsection (f) of section 75 all of these matters are determined by the judge. Comparison of these corresponding sections will show that functions of the court to have been bodily transferred to the commission.

Upon decision of all these judicial questions by the commission, subsection (g) confines the court to a consideration of the plan accepted by the majority and approved by the commission, upon the findings of the commission and the record of the proceedings before it. In the report of the committee it is stated:

"Subsection (g) provides for the necessary court of review, but the commission transmits the approved plan, its findings, and the record to the court. The court's review must be based upon the record made before the commission. This is specifically so provided to avoid new hearings or a commencement of the proceedings de novo by the court upon the plan."

It thus appears that the Interstate Commerce Commission, having itself determined in advance that the plan which it proposes is fair and equitable, shall thereafter hear and determine the rights of individual security holders who are entitled to come into a court and be heard upon a question already determined by the commission in their absence, and before any opportunity has been afforded them to consider the provisions of the plan proposed and approved by the commission. (Compare subsections (d) and (f).)

This situation presents a fatal objection to the provisions of subsections (f) and (g) of section 76.

Furthermore, there are questions to be determined by the court which will not be included in the record of the proceedings before the commission, but which must be considered by the court in concluding whether the plan proposed and approved by the commission may be confirmed over the objection of dissenting security holders whose interests will be affected. For instance: Under clause (4) of subsection (c) questions affecting the validity of claims and liens, the division of creditors and stockholders into classes for the purposes of the plan; the determination of priorities, and many other matters affecting the equities as between groups of contending security holders, will undoubtedly arise for determination by the court. Another matter directly related to the rights of security holders to approve and participate in the

plan is the solvency or insolvency of the corporation, which the judge must determine under subsection (e).

These questions, having been decided by the court, must be considered in their bearing upon the confirmation of the plan, but under the provisions of subsection (g) are all excluded from the consideration of the court unless they have been made part of the record before the commission.

The very purpose of subsection (d) is that the commission shall take the lead in formulating a plan acceptable to two-thirds of the security holders of each class whose rights are to be affected by it. This is perhaps the most important function the commission will have to perform. It is nonjudicial because the action of the commission, to be effective, must, under the terms of the statute, be approved by two-thirds of the security holders of each class. The process is one of conciliation, not of adjudication. The commission will inevitably be required to consider the demands of the various groups of security holders and will not be in a position to resolve their conflicting claims unless agreement results from a process of trading over the provisions of the plan which is to be finally approved by the commission and accepted by the security holders. It being the function of the commission to formulate and approve the plan and to control the negotiations which lead to its acceptance by the security holders, it is obviously improper to give the commission the power to pass judgment upon questions directly affecting the property interests of the security holders whom it must conciliate. The two functions should not be exercised by the commission.

The creation of an impartial, disinterested, responsible agency which may lead and control the negotiations by which the requisite majorities of security holders may be brought into agreement upon the acceptance of a railroad reorganization plan approved by the commission will go very far toward solving the abuses which have been incident to railroad reorganizations in the past. The commission should have this power and in its exercise should have the widest powers of inquiry. It should be free to consider whether the plan is fair and equitable from the standpoint of the security holders and financially sound and desirable in the public interest.

In exercising its judgment upon a plan the commission should be fully informed regarding all fees, costs, and allowances, and should be free to condition its approval of the plan upon such expenses being kept within limits which it deems to be reasonable and in the public interest. Unless upon consideration of all these matters the commission shall affirmatively approve the plan, no court should be authorized to make it effective. But when the plan has thus been approved by the commission there must be a full judicial hearing before the court for those security holders whose interests will be affected by the confirmation of the plan and who have not accepted it.

A hearing before the commission, which has approved and recommended the plan, will not suffice, even though its conclusions may be subject to review in the court. It is important, in the interests of fair play and due process in the administration of justice, that the Interstate Commerce Commission should not be required to sit in judgment upon its own acts. Subsection (f), as presently drawn, requires it to do so, and subsection (g) confines the review of its determination to the record before the commission, which, as heretofore pointed out, may be entirely inadequate.

The inconvenience to security holders (particularly those in the minority) of traveling to Washington in order to appear before the commission in opposition to the plan which the commission has already formulated and approved should be considered in this connection.

Fortunately, section 76, having been predicated upon the provisions of section 75, may be easily amended so as to fully accomplish the important purposes of this legislation, as follows:

Leaving subsection (d) as it is, the commission will have full power to initiate and control negotiations leading to the formulation of the plan.

A merely formal amendment of subsection (e) is required, changing the word "transmitted," in line 15, to the word "approved," and striking out, in line 16, the words "to the court." Thus all the powers specified in subsections (d) and (e) are retained.

There should then be inserted a new subsection (f), defining with precision the powers of the commission, reading as follows:

"(f) A plan of reorganization, upon acceptance, shall be submitted to the Interstate Commerce Commission, which shall hear all interested parties upon such notice and subject to such rules and regulations as it shall prescribe. If after such hearing the commission determines (1) that the plan is equitable and does not discriminate unfairly in favor of any class of creditors or stockholders; (2) that all amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for services or expenses incident to the reorganization and cost of financing have been fully disclosed and are in its opinion reasonable; and (3) that in respect of the financial advisability of the plan and the issue of securities pursuant thereto the consummation thereof is in all respects compatible with the public interest, the commission shall thereupon certify to the court its approval of the plan, with a report of the proceedings before it and its findings and conclusions thereon. The commission shall also fix the maximum compensation which may be allowed by the court pursuant to clause (7) of subsection (c) of this section, provided that unless good and sufficient reasons appear therefor no allowance for fees or compensation shall be made to officers of corporations who have acted as managers or in any capacity in connection with the reorganization when such corporation had an interest in the matter. No plan of reorganization shall be confirmed in any proceeding under this section except upon the approval of the Interstate Commerce Commission thus certified to the court. If the commission shall decline to issue such a certificate it shall file in the proceedings before it its decision, specifying the particular grounds upon which it bases its disapproval of the plan."

Subsection (f) then becomes (g) and should be amended as follows: Strike out lines 11 to 15, inclusive, and the first two words in line 16, on page 33, and substitute in lieu thereof:

"(g) Upon such approval by the Interstate Commerce Commission, and after hearing such objections as may be made to the approved plan, the judges shall confirm the plan if satisfied (1)."

On page 35, line 3, insert after the word "charter" "or under applicable State or Federal laws," and strike out the words "and should be granted for that" and all that follows up to and including line 5, on page 36, these provisions having already been covered by the new subsection (f) above quoted, with such modifications as are disclosed in the quotation.

Subsection (g) then becomes (h) and should be amended by striking out lines 6, 7, 8, and 9 and the first word in line 10, and inserting in lieu thereof:

"(h) Upon confirmation by the judge, the provisions of the plan shall be binding upon (1)."

Substitute "confirmation" for "approval," in line 20, on page 36; strike out the sentence commencing in line 22 and add the following, at line 22, page 36:

"Upon confirmation of the plan by the judge, the debtor and other corporations affected by the plan, or organized or to be organized for the purpose of carrying out the plan, shall have full power and authority to put into effect and carry out the plan and the orders of the judge relative thereto, the law of any State or the decision or order of any State authority to the contrary notwithstanding; and they shall be, and they are hereby, relieved from the operation of the 'antitrust laws,' as designated in section 1 of the act entitled 'An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes,' approved October 15, 1914, and of all other restraints or prohibitions by law, State or Federal, in so far as may be necessary to enable them to do anything authorized or required by the plan or by any order made under and pursuant to the provisions of this section."

Subsections to be relettered accordingly and cross references corrected to conform.

These rather simple amendments will eliminate all confusion in regard to the functions to be exercised by the commission and by the court, and will, it is thought, remove the most fundamental objections to the bill in its present form.

Clause (8) of subsection (c), page 29, contains a provision that the President shall appoint special referees by and with the advice and consent of the Senate, to whom the court may, on its own motion or at the request of the Interstate Commerce Commission, refer matters for consideration and report, either generally or upon specified issues. It is expressly provided that these special referees shall sit in Washington, D. C., and in such other places as may be designated in any instance by the judge referring the matter to them. In allowing compensation for services to these special referees the action of the judge is made subject to the approval of the Interstate Commerce Commission.

These provisions seem to ignore the fact that the principal questions required to be determined by special referees will undoubtedly require the hearing of witnesses and the determination of questions of law relating to the validity of claims against the corporation; the priority, validity, and extent of the liens of secured creditors; the title to property in the possession of the trustee claimed by third parties; and a host of other questions affecting the rights of creditors and security holders against the corporation and among themselves, as well as all of the legal questions which may arise out of the operation of the railroad during the pendency of the proceeding, and to which the trustee will be a party.

In the settlement of such controversies the special referee will necessarily be required to spend most of his time in the jurisdiction where the court is sitting rather than in Washington. No specialist in the law is required to sit in all cases. The questions which will arise are of general application, affecting the rights of creditors and security holders, and the interpretation of agreements, mortgages, and trust indentures. It would be inconvenient to have such special referees living in Washington, where few, if any, such proceedings will be instituted, and it is thought desirable that such referees should be immediately available to the court, and that their selection should be uninfluenced by any considerations except their qualifications for the tasks which may be assigned to them. It is believed that a number of lawyers qualified to act as special referees in such proceedings should be designated by the judges of the circuit courts of appeal in each circuit.

Political appointment of judicial officers for short and temporary terms is contrary to American tradition. Life appointment is of course out of the question. The circuit judges in each circuit may be counted upon to choose those lawyers who are best qualified: First, because they are in a position to know the qualifications of the lawyers appearing before them, and, second, because they are themselves concerned that the work of the special referees be well done, for they themselves will be required in case of appeal to review their decisions. Accordingly, the following amendment is proposed:

Strike out all of lines 17 to 25, on page 29, and lines 1 to 13, inclusive, on page 30, and substitute the following:

"(8) may on his own motion or at the request of the Interstate Commerce Commission refer any matters for consideration and report, either generally or upon specified issues, to one of several special masters who shall have been previously designated to act as special masters in any proceedings under this section by the judges of the circuit court of appeals for the circuit in which the proceedings are pending, and may allow such master a reasonable compensation for his services. The circuit judges in each circuit shall designate three or more members of the bar as such special masters whom they deem qualified for such services, and shall from time to time revise such designations by changing the persons designated or reducing or adding to their number, as the public interest may require: *Provided, however,* That there shall always be three of such special masters qualified for appointment in each circuit. For all purposes of this section 76, claims against."

Subsection (m) of section 76 obviously does not have application to a railroad corporation which can not be liquidated or adjudicated bankrupt. The following amendment is therefore suggested:

"(m) In proceedings under this section 76, except as otherwise provided therein, the jurisdiction and powers of the court, the duties of the debtor, and the rights and liabilities of creditors, and of all persons with respect to the property of the debtor, shall be the same as if a voluntary petition for adjudication had been filed and a decree of adjudication had been entered on the day when the debtor's petition was filed."

Aside from more or less formal and technical amendments, which will be included in a separate memorandum, the foregoing are believed to include the changes fundamentally necessary in section 76.

THOMAS D. THACHER, *Solicitor General.*

EXTENSION OF REMARKS—DEPARTMENTS OF STATE, JUSTICE, COMMERCE, AND LABOR APPROPRIATION BILL, FISCAL YEAR 1934

Mr. OLIVER of Alabama. Mr. Speaker, I ask unanimous consent that all Members may have five legislative days within which to extend their own remarks on the appropriation bill just passed.

The SPEAKER. Is there objection?

There was no objection.

Mr. KERR. Mr. Speaker and Members of the House, since I have been in Congress I have on many occasions made close contact with the commodity divisions of the Bureau of Foreign and Domestic Commerce; I have gotten the most efficient service possible, and I want to add my commendation and go upon record in deep appreciation of the effectiveness of this service in the promotion of the export trade of the United States and the clear, concise understanding manifested by those who have charge of these matters in our domestic problems, as well as their accurate understanding of world conditions; this information and this service are especially useful at this time.

I have had occasion many times to refer matters to the commodity divisions of the Department of Commerce in my endeavor to take care of legislation which affected the vital welfare of the peanut and tobacco growers of the Nation; the splendid service which I have received has enabled me to have accurate knowledge of all facts which would be useful in the consideration of legislation involving these great agricultural industries, and I think the information which I have gotten through this governmental service has enabled me to render most useful service in my effort to vouchsafe the interests of my own constituents as well as many million farmers throughout the United States.

I have every reason to believe that the commodity divisions of the Department of Commerce are staffed with intelligent and industrious men drawn from business and trades and advised by those who have had large experience in our industrial activities as well as the industrial activities of other nations. If you want information about imports, exports, or tariff regulation and embargo restrictions, you can get it and feel perfectly safe in asserting it. This is a great comfort to those who like to confine themselves to facts when they are engaged in controversial matters.

I have been informed that through the commodity divisions and foreign offices of the Department of Commerce more than $47,000,000 of American business has been secured through foreign sales and savings during the last fiscal year. This department serves continuously over 24,000 export firms, and more than 50,000 business organizations make use of the bureau's domestic-trade service. It appears that the demands made upon the commodity divisions are increasing each year. I am informed that letters to the lumber division have doubled since 1929, and that curtailment of private sources of business information because of economic conditions, as well as the faith in the accuracy of this department of our Government, has compelled business to turn to this department for information it can not acquire through any other source. And I refer to both domestic and foreign business.

The service of the tobacco division in fortifying our exporters and cooperative associations with timely and accurate information regarding demands, competition of foreign tobaccos, trends in consumption and trade, tariff changes, credit risks, and so forth, is playing an important part in promoting our foreign trade. The tobacco trade is about the only foreign trade we can boast of now. During the past 10 years about 40 per cent of our total production of leaf tobacco has been exported to more than 100 countries, and it is an economic necessity to more than 500,000 tobacco growers that every agency be kept active to promote demands for our surplus production. To destroy the tobacco industry or even neglect it would imperil the greatest tax-producing commodity of this Nation.

Mr. LEA. Mr. Speaker, the action of the House in reducing appropriations carried in this bill for prohibition enforcement deals with only one superficial phase of this problem. The country hopefully awaits the action of Congress on many serious and important problems, of which prohibition repeal is one. This is the most controversial and the most concrete and definitely understood of all the important problems pressing for action by Congress. The issue is a simple one. There is no other problem that consumes our attention whose elimination from Congress and national politics would do more to clear the way for intelligent thinking and acting on the other great problems of the country.

The public sentiment of the Nation is fairly well crystallized on one general proposition, and that is that the will of the people of the country, constitutionally expressed, must determine what shall be done with the eighteenth amendment. The duty now clearly rests upon Congress to determine how the people of the country shall exercise this right to decide whether or not the eighteenth amendment shall be repealed.

Shall Congress keep faith with its duty on this question?

The proposal that the question be referred to the legislatures of the States was, in effect, repudiated in the platforms of both major parties in the last campaign. Each of these platforms promised State conventions. The substance of this promise was that the people themselves, through the election of delegates to conventions in the States, would be given the power to decide what should be done with the eighteenth amendment.

Three main steps must be considered in any plan of repeal by popular action. In any event, the first step is the submission of the question by two-thirds vote in each House of Congress.

The second step to be considered is as to what, if any, action must be taken by the State legislatures to authorize or provide for conventions, or for a popular vote on the question. Is it legally necessary that the legislature must authorize or call a State convention to comply with the Constitution? If it be not necessary for the legislature to authorize the convention, would it be a practical method of procedure for the Federal Government to ignore the State legislatures, authorize the convention, fix the manner of electing delegates thereto, the date of the convention, and other necessary details? These are the two main questions as to procedure that Congress must answer in adopting its policy of submission.

If it is unnecessary for the State legislatures to intervene in the matter, their omission can greatly facilitate prompt action upon the question of ratification in the States. Congress can call the conventions, fix the date, thereof, and make all other provisions necessary to conduct the election of delegates and hold the convention. Under this method of procedure all the States of the country can act upon ratifi-

cation within a very few months after the question is submitted.

The proposal of action in the State through conventions without State approval is a new and somewhat uncharted route. The details of the plan are not insuperable. The main problems are only whether or not there is constitutional authority for such procedure and whether or not it be a practical method.

The practicability of the plan is a question of public policy. From the standpoint of the proponents of repeal, it is a practical method of procedure unless the degree of opposition it incurs, due to the conduct of elections and the holding of conventions in the States without approval of the legal authorities thereof, would menace the success of the effort for reasons not going directly to the merits of the problem involved.

Without attempting to add anything to what has already been said in this controversy as to the rights of the Federal Government in acting through conventions without the consent of the States, let us consider a procedure for popular repeal which is free from the question of Federal conventions without State approval.

This brings us to the third step that must be considered, and that is as to the kind of election that shall be held by which the will of the people of the United States on this question shall be registered and made effective.

A DIRECT VOTE ON REPEAL

Under the convention plan the election of delegates and the holding of conventions are incidental to the main purpose of securing a vote of the people upon the question. The injection of the election of delegates and the holding of conventions are necessary only to comply with the technical provisions of the Constitution. They serve no other useful purpose. Otherwise, undoubtedly, it would be perferable to dispense with the delegates as well as the convention and let the people decide the question by a direct vote on the main question of repeal. The entire substance of the promise to refer the problem to State conventions can be kept by submitting to the State legislatures an amendment authorizing a direct vote for and against the repeal of the eighteenth amendment. That would afford the State legislature a chance to block action by this procedure, but that is improbable, because it is unlikely any, or any considerable number of legislatures, would refuse the people the simple right to vote on the question.

With this purpose in mind, I have filed House Joint Resolution 534, which provides for the submission to the State legislatures of an amendment authorizing a direct nation-wide controlling vote on the repeal of the eighteenth amendment.

This method of procedure requires, of course, the submission of the amendment to the State legislatures. In the second place it requires action by three-fourths of the legislatures to ratify the amendment, authorizing a referendum vote on repeal. The vote would follow automatically, be directly on the question of repeal, the election would be conducted by the State, and the question as to the constitutionality of the method of procedure as well as to the rights of the States are thus eliminated from this plan of procedure.

If three-fourths of the States by popular vote concurred in favor of repeal, the eighteenth amendment would thereby cease to be part of the Constitution.

As I view the matter, this proposal can secure the maximum number of votes in Congress and in our State legislatures. It does not require a committal by Congress or by the State legislatures on the question of repeal, but simply gives the people themselves the right to repeal the eighteenth amendment by their direct votes on that question.

A direct vote on the question appeals to the average man.

The plan is more understandable and free from complications that require explanation.

It eliminates all uncertainty as to the date when the election shall be held and as to what authority shall conduct the election.

It would permit the Federal Government to bear the expense and thus avoid the delay incident to any plan that leaves it optional with the State as to when or whether it shall act.

This proposed plan provides for repeal and conforms to the present practice of amending the Constitution by requiring concurrence of three-fourths of the States. A majority vote would be required in each of three-fourths of the States.

If a sufficient concurrence of States was not secured on the first nation-wide vote, States that voted in the affirmative would be counted as having ratified, and States which voted in the negative would have the privilege of holding another election within five years. This is analogous to the present practice of ratification by State legislatures.

LEGISLATURES NOW IN SESSION

The legislatures of most of the States are now in session. Their sessions are limited in some States to 40 days, with more extended, and no limits in other States.

These legislatures unless called in special session will not meet again for a long time. Within a few weeks their opportunity to provide for an election on the repeal of the eighteenth amendment without delay and without the expense of a special session will have gone.

In view of this situation and the universal recognition that the disposal of this Federal prohibition question is one of the things that should be gotten behind us for the good of the Nation at the earliest possible date, is it not possible that Congress can function on this question? Why can not the Judiciary Committee, the committee having jurisdiction of this subject in the House, report out a measure that will give the House the chance to do the useful thing of clarifying this subject and now advising the States so they can prepare while the legislatures are in session to handle the problem of the election effectively before adjourning? It is important to get the earliest possible action.

Legislatures can now provide in advance for taking care of conventions, and thus avoid delays and special sessions if they desire. It is improbable that any considerable number of State legislatures will do this unless Congress definitely determines what the method of ratification shall be before these legislatures adjourn. Those who insist on action by State legislatures to authorize the State vote should not now stand in the way of prompt action by Congress. If Congress would immediately decide on the method of submission, it would greatly encourage and facilitate prompt action by the States and do a good service to the Nation.

The direct referendum method involves a minimum of expense in conducting the election, because the questions as to the method of nominating candidates for delegates as well as their election are all eliminated.

A direct vote on constitutional amendments has become practically a fundamental of American government. Forty-seven of the forty-eight States permit the people to vote on amendments to their State constitutions. This practice of direct voting has grown up since the original Constitution was adopted. I believe the people of the country would welcome this practice of the States in acting upon this Federal amendment, preserving the old requirement that three-fourths of the States must concur to change the Constitution. This plan would preserve the relative importance of the smallest State as it now exists so far as the amendment to the Constitution is concerned.

The recent election clearly revealed that the eighteenth amendment is without the prestige of popular support. It has lost its vitality. It is dead timber on the constitutional tree. Its enforcement is impracticable. Nullification of the eighteenth amendment is demoralizing. An unenforceable eighteenth amendment in the Constitution is demoralizing. Public welfare demands prompt action on the question of repeal.

It will be a regrettable neglect for Congress to permit this large number of legislative sessions to adjourn without giving them an opportunity to provide intelligently for prompt action on the question of repeal.

THE SENATE PROPOSALS

What question shall be submitted? A Senate committee has reported a proposed form of amendment to be submitted to the State legislatures. It provides for the repeal of the

eighteenth amendment, and that the transportation of intoxicating liquors into a State in violation of its laws is "prohibited."

It is further provided that Congress shall have "concurrent" power to regulate or prohibit the sale of intoxicating liquors to be drunk on the premises where sold.

In submitting this amendment to the legislatures, instead of conventions, this proposal flies in the teeth of the platforms of both parties. It ignores public sentiment of the country, which is determined that the people themselves shall have a right to settle this question. No other method of settlement will command equal respect.

In view of the fact that Congress has authority, regardless of the eighteenth amendment, to prevent the interstate shipment of intoxicating liquor in violation of State laws, the provision of the Senate amendment "prohibiting" such shipment is perhaps not of great consequence. Congress properly exercises this power and it should not be handicapped by an inflexible rule of the Constitution. There is little reason to anticipate that Congress will ever desire to authorize State shipments in violation of State laws, or that Congress will repeal the existing laws preventing such interstate shipments.

The proposal to prohibit importations to the States in violation of their laws is illogical, even though unimportant in its practical effects. It is theoretically unsound to propose that each State in the country shall have the right to compel the Federal Government, without any discretion of Congress, to support whatever statutory liquor laws the State legislatures see fit to write, however unwise or improvident. It is for the legislature of the Federal Government, not for the legislature of a single State, to determine under what circumstances the Federal Government shall assume the unusual responsibility of enforcing State laws. Under this color of constitutional sanction a State might pass a law to interfere with legitimate interstate shipments. No one could measure the responsibility the Federal Government would thus assume. No one could anticipate the many varied, and perhaps unwise, provisions that might be written by the various States of the country. In this way their mere legislative action would compel this action of the Federal Government without the approval and even against the will of Congress.

That proposal, on principle, is the extreme of State rights.

CONCURRENT POWER

The proposal that Congress shall have concurrent power with the States to regulate and prohibit the sale of intoxicating liquors to be drunk on the premises where sold, is the extreme of centralized power or Federal interference in State affairs. This provision would give the Congress power to enforce prohibition on a State against its will and also to provide regulatory provisions in favor of the liquor traffic in opposition to the laws of dry or semidry States. The wildest friend of centralized government could scarcely approve of Congress enforcing the sale of liquors on dry States over the opposition of their laws and perhaps of their Constitution. I do not anticipate that this provision, if enacted, would in practice be so applied. The fact that such a power is seriously proposed to be placed in the Constitution should excite the opposition of all.

One of the weaknesses of Federal prohibition is the dual responsibility and irresponsibility of the State and Federal Governments. Concurrent power to enforce prohibition is quite different from concurrent power to regulate or prohibit the sale of intoxicating liquors. One government might want to prohibit the sale of liquor and the other might prefer to regulate it. The plan is simply impracticable of application. Two separate governments can not successfully regulate the same thing any more than can two separate heads of one business or any other enterprise. In division of responsibility there is weakness, not strength. Concurrent regulation might provoke more conflicts, more ill, more corruption, and more annoying details of administration than does prohibition. Prohibition is a unified policy even though enforcement responsibility is divided. Regulation assumes diversified policies between the regulatory authorities.

A sinister influence designing to harass and bedevil the Federal Government with the prohibition question for a generation to come could scarcely suggest a constitutional provision more calculated to accomplish that purpose than the regulatory provision of the Senate resolution. It seems especially designed to preserve the obnoxious and unworkable features of Federal prohibition.

If there is anything to be learned from our experiences with Federal prohibition, it is the unwisdom of the Federal Government interfering in State affairs and forcing on unwilling States obnoxious sumptuary legislation.

The Senate amendment in effect proposes to continue Federal interference with State affairs, injects new questions of Federal regulation, and retains the liquor problem in national politics for a generation to come.

Rather than authorize the Federal Government to go into the States to regulate their liquor affairs, I would prefer that Federal prohibition be maintained.

I never expect to see the States of this country, with their different viewpoints and customs, reconciled to a uniform system of regulation prescribed by Washington and generated under the constant bedevilment of Congress with the liquor problem as a national political question. The varied conditions of our separated States does not permit of one uniform rule or regulation that can be satisfactorily applied to all. If we are to have a happy administration of the affairs of this Nation, no State in this Union should be regarded as too unworthy to be trusted with the regulation of its own liquor problem. All States should have enough pride in the right of local State government and enough respect for the right and good will of their sister States to refrain from using any power they may have to force their power upon their unwilling neighbors. These same States that invoke their powers to impose obnoxious legislation upon their neighbors to-day may find themselves victims of the same bad philosophy to-morrow.

PREVENTING THE SALOON

If it is desired to use the power of the Federal Government only to prevent the maintenance of saloons, it is unnecessary to give the Federal Government regulatory powers to accomplish that result. A provision in the repealing amendment simply denying the States power to authorize or permit the conduct of a saloon, would be sufficient for that purpose. Such a provision would simply withhold from the State the power to legalize the saloon without forcing on the Federal Government the duty of interfering in the State affairs to regulate their liquor business. The saloon being made impossible of legalization could not survive under a State regulated system of liquor control. In that way, if it is desired to prohibit the saloon by the Federal Constitution, that purpose could be accomplished without the obnoxious regulatory provisions of the Senate amendment.

The substantial purposes of the Senate amendment could thus be accomplished without its unwarranted provisions. An amendment thus modified might afford a basis of compromise and agreement between the two Houses of Congress.

The good of the Nation requires prompt action on the question of Federal prohibition repeal. Congress should promptly adopt its plan of procedure. If possible, cooperation of the State legislatures should be secured. The question should be submitted to the people of the United States for their decision at the earliest date possible under constitutional methods of procedure.

Mr. GIBSON. Mr. Speaker, that portion of the appropriation for the Labor Department covering the Bureau of Immigration carries with it some items for the immigration service larger than for the present year.

A deficit for the current year was caused in part by the extra cost for the deportation of several thousand aliens at an expense greater than estimated. The zealous employees have helped to cover this deficit through furloughs without pay. The items of the bill were entirely proper in view of the situation. The employees have been indirectly penalized

for their zeal in enforcing the law. This situation should be taken into consideration by the President when he submits to the House of Representatives the recommendation of an additional sum to cover the cost of deportations, as suggested would be done, by the gentleman from Alabama [Mr. OLIVER].

Vermont has a hundred miles of border along the Canadian line. A network of roads makes the enforcement of immigration laws and regulations very difficult. The immigration and customs officers are high-grade men and women. They have been performing a splendid service for their country. They are faithful and patriotic.

As evidence of this fact, the employees along the Vermont border have voluntarily signed joint letters directed to the Commissioner General of Immigration calling his attention to the fact that because of the lay-off of employees without pay the work of the service can not properly be done; that as a result many aliens are obtaining entry in violation of law who later must be deported at a final cost far in excess of keeping the full staff on duty. The employees in these joint letters advise the Commissioner General of Immigration that they are willing to remain on duty during the 5-day-per-month furlough and the sixth day of each week without pay in order that the law may be enforced.

I am glad of the opportunity to publicly congratulate these employees and to commend their patriotic action to other employees of the Government and to the people as a whole. Let the word go out to the country that these men are loyal to their country in this period of difficulty.

SAN FRANCISCO BANK OF AMERICA

Mrs. KAHN. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

The SPEAKER. Is there objection?

There was no objection.

Mrs. KAHN. Mr. Speaker and Members of the House, in an Associated Press report yesterday I was very much surprised to read certain remarks of the gentleman from Nebraska [Mr. HOWARD]. As a rule, he is both fair and well informed, but in this instance I fear that he was neither. He remarks that he looks askance at the $64,000,000 loan that went to the San Francisco Bank of America. Said he to the newspapermen, quoting from the Associated Press dispatch:

> It seems strange that the corporation should make a $64,000,000 loan to a syndicate of foreigners.

I presume that he made this criticism because the head of the Bank of America is Mr. A. P. Gianini, and because the Bank of America is a successor to the Bank of Italy. Mr. Gianini was born in California and has lived there all of his life. He was educated in the public schools of California. He became a commission merchant, and in 1904 he founded the Bank of Italy. From that bank grew this great Bank of America which has now in the neighborhood of 500 branches in the State of California. Subsequently Mr. Gianini acquired the ownership of the Bank of America in New York City and changed the name of the Bank of Italy of California to the Bank of America. The stock of the former Bank of Italy of California and the Bank of America is owned by the Trans-America Corporation, and it is not an exaggeration to say that 80 per cent of that stock is owned by residents of the State of California.

Mr. Gianini retired from the bank about 1929, and upon retiring gave one million and a half dollars to the University of California to establish an agricultural department foundation.

In 1929 the management of the Bank of Italy passed to Elisha Walker, of New York. Just about a year ago, I think it was February, 1932, the management of the bank passed again into the hands of Mr. Gianini.

If the gentleman from Nebraska will make further inquiry, he will find that the loan of which he complains and concerning which he indulged in criticism is practically paid off. On January 6 of this year the status of that loan was as follows: $64,900,000 was granted as a loan to the corporation by the Reconstruction Finance Corporation. Of that, $64,488,644.61 was paid to them, and by January 6 of this year they had repaid $57,650,774.83, leaving a balance of $6,337,689.78 still owing the corporation on that loan. [Applause.]

The SPEAKER. The time of the gentlewoman from California has expired.

Mrs. KAHN. Mr. Speaker, I ask unanimous consent to proceed for one minute more.

The SPEAKER. Is there objection?

There was no objection.

Mrs. KAHN. Since Mr. Gianini resumed the control of the Bank of America the deposits have increased over $90,000,000. [Applause.] The Bank of America probably does a larger business with the farmers of California than any other bank, and its solvency and security are as important to the farming and mercantile interests of California as those of any other bank, on account of its great ramifications and the branch banks all over the State.

Mr. Speaker, I have felt compelled to make these remarks because criticism such as this is apt to work tremendous injury, not only to the Bank of America but to the entire State of California. [Applause.]

Mr. HOWARD. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. HOWARD. Mr. Speaker, first of all, I thank the gentlewoman from California [Mrs. KAHN] for her commendation of my usual sense of fairness and of goodness. And next I want to relieve the newspaper boys from any charge of falsely reporting my interview with them. As a rule, the newspaper boys are always right. I can see readily how the one to whom I gave that interview may have misinterpreted my remarks. I did use the term "foreigners," but I did not use it in the sense as reported. I referred to this loan as going to a syndicate largely composed of foreigners, as I was informed. For years the bank in question has borne a foreign name. I did not know that the name had recently been changed from Italian to American, as stated by the gentlewoman from California.

I do not know the gentleman of whom the lady from California speaks so beautifully. I take it for granted that he is the high-type gentleman the lady from California pictures him, because if he were not the lady would not so describe him.

Mr. Speaker, as long as this subject is before us, I deem it appropriate now to give the House my own story of the origin and passage of my resolution to lift the blanket of concealment from the doings of the Reconstruction Finance Corporation during the dark months of February, March, April, May, and June, 1932. Nobody urged me to draft that resolution. Good or bad, it was my own legislative child. It is true that after the resolution had been drawn it was submitted by me to Senator GEORGE NORRIS, my magnificent Senator from Nebraska. Why did I submit it to Senator NORRIS? Because I was inspired to draft the resolution after reading his remarks on the day when he caused the Flynn article on the subject of Reconstruction Finance Corporation loans and commitments to be inserted in the CONGRESSIONAL RECORD just as Flynn had written his article for that staid and conservative old magazine, Harpers. I felt that the better mind of NORRIS might suggest improvement of my resolution by amendment. However, he approved it as written.

On the day when my resolution was introduced I was told frankly by many colleagues that it could never be passed by the House. Next day it came very directly to me that the resolution was regarded by those to whom it was directed in the light of a joke. At the end of seven legislative days the resolution became privileged under the rules of the House. I called for consideration the first moment possible under the rules. All of my colleagues will recall how gladly the legislation was received by the House, and how it went

through to passage like a sweet girl high-school graduate through a box of chocolates.

Then came the deluge. It came in form of more than one hundred personal friends, each telling me that he had no personal interest in the matter, but that he came in the name of some bank which he feared might be closed if the corporation loan to that bank should be made public.

Mr. Speaker, the mighty men of money, who are represented on the Reconstruction Finance Corporation Board, are keen students of humanity. It has been written that every man has one certain weakness. Those keen manipulators quickly discovered my pet weakness. They discovered that perhaps I might be purchased with the coin of friendship. For 10 days and nights the friends who appealed to me in behalf of the big interests, for which they spoke, made one general plea. They told me what a big man I would be in the eye of the country if I should arise in my place in the House and ask that my own resolution be crucified by so modifying it as to give the report for which the resolution called only to the eyes of Members of the Congress, withholding public inspection. It was a hard battle between real friends on the one side and a great principle on the other side. To refuse the requests for crucifixion of my resolution would distress my friends. To grant their requests would be to stab to the heart a principle long espoused by me, a principle which runs against the transaction of any manner of the public business in secret. I admit frankly that at times, in presence of some very dear, pleading friend I felt myself slipping, but in the end, thank God, loyalty to principle prevailed. Somehow every time a special plea would come to me to crucify my resolution and shield the borrowings of the big banks and trust companies from the public eye would also come a mental picture of some American farmer who had secured a puny feed or seed loan from Federal funds, only to find his name posted in all the neighboring elevators, giving notice to the grain buyers that the farmer had given a chattel mortgage to the Government, virtually warning the grain buyer to be careful about purchasing grain from that particular farmer. Such discrimination inflamed me, and made me strong to resist the arguments and the blandishments of those who believe that it is right on the part of the Federal Government to regard a farmer who contracts a Federal seed or feed loan as a loathsome carp in the family of fishes, while regarding the banker who borrows millions as a gaudy plumaged fowl.

I feel I should not leave this subject before paying credit where credit is mostly due for the lifting of the blanket of concealment from the loans and commitments made by the Reconstruction Finance Corporation during the dark days in the early months of 1932. My colleagues will recall that it was the Speaker of this House who was responsible for publicity of the corporation loans, beginning last July. That splendid Speaker has long been the implacable foe of secret transaction of the public business. Last July he lifted the blanket of concealment from all future doings of the corporation. My own little part has been only to throw off the blanket and let the light of publicity shine full and fair upon every loan and commitment made by the corporation prior to the good day in which Speaker Garner lifted the blanket partially. I felt when I presented my resolution that I was simply building upon the fine foundation firmly laid by my Speaker. And always when carrying on in harmony with the teachings of that greatest and best loved one among us here I go gladly, confidently, and always unafraid.

The SPEAKER. The time of the gentleman from Nebraska has expired.

PRIVATE CALENDAR

Mr. RAINEY. Mr. Speaker, I ask unanimous consent to proceed for one minute in order to make an announcement.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. RAINEY. Mr. Speaker, after consultation with the gentleman from New York [Mr. SNELL] and with others, it has been determined to devote one night each week to the call of the Private Calendar, possibly Thursday night of each week until the end of the session, if nothing should interfere with selecting Thursday. If not Thursday, some other night. Next week the Private Calendar will be called on Thursday, and I move the adoption of the resolution that I now send to the desk.

The Clerk read as follows:

House Resolution 366

Resolved, That on Thursday, February 2, 1933, it shall be in order to move that the House take a recess until 8 o'clock p. m., and that at the evening session until 10.30 o'clock p. m. it shall be in order to consider bills on the Private Calendar unobjected to in the House as in Committee of the Whole, the call of bills on said calendar to begin at No. 575.

The resolution was agreed to.

LEE AND JACKSON

Mr. WHITTINGTON. Mr. Speaker, I ask unanimous consent to extend my remarks by including an address which I delivered before the Stonewall Jackson Chapter of the United Daughters of the Confederacy on January 21.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTINGTON. Mr. Speaker, under leave to extend my remarks, I am inserting an address I delivered before Stonewall Jackson Chapter, No. 20, United Daughters of the Confederacy, at Confederate Memorial Hall, Washington, D. C., January 21, 1933.

The address is as follows:

LEE AND JACKSON

A civilization should be judged by the character of the men it produces. "The true test of civilization," says Emerson, "is not the census nor the size of the cities nor the crops; no; but it is the kind of men the country turns out."

A country without heroic traditions is a country without liberty. A nation's place in history is determined by its leaders, and a people carve their own images in the monuments they erect to their heroes.

Robert E. Lee, the son of Gen. Henry Lee, known in history as Light Horse Harry Lee, was born in Westmoreland County, Virginia, January 19, 1807, and died in Lexington, Virginia, October 12, 1870, at the age of 63.

Thomas Jonathan Jackson, known as Stonewall Jackson, the son of Jonathan Jackson, a successful lawyer, was born January 21, 1824, in Clarksburg, Virginia, now West Virginia, and died at Guinea's Station on the Fredericksburg railroad, near Chancellorsville, Virginia, May 10, 1863, at the age of 39.

Lee, like Washington, was of English descent, and came from the aristocracy of colonial days. He married Mary Custis, the daughter of Washington's adopted son.

Jackson was the product of the American middle classes and descended from the Scotch Irish, who contributed much to the success of the Revolution.

Both were graduates of West Point. Lee finished second in his class and was assigned to the Corps of Engineers. Jackson was graduated seventeenth in his class and received a commission in the Artillery. Both saw active service, and had brilliant careers in the Mexican War. Lee continued in the Army and was the outstanding officer in the service when Virginia seceded from the Union. Jackson resigned his commission in the Army a few years after the Mexican War and became an instructor in Artillery Tactics and Philosophy at Virginia Military Institute in 1851, where he continued until Virginia joined the Confederacy in 1861.

Jackson, after two years in the Confederate Army, fell at the hands of his own men. Col. G. F. R. Henderson, of the British Army, who wrote an admirable life of him, said: "Stonewall Jackson was the greatest lieutenant general in all history."

Lee was in the Confederate Army the full four years and became the greatest soldier of his or any other age. For five years after the close of the war between the States he was probably greater in peace than in war.

THE MEN

Lee and Jackson were men of unusual personalities. They were both slightly under six feet in height and each had a military bearing. There was a striking difference in their personal appearances. Lee was graceful and handsome. His eyes were brown and his head was well proportioned. He was a man whom to see once was always to remember. Thomas Nelson Page, one of the foremost literary men of America, a student at Washington College under Robert E. Lee, says, "He was one of the handsomest men I ever knew and easily the most impressive figure." Mounted on the battlefield or seated in the classroom, he was an inspiration. His voice was calm. His presence was compelling. He was majestic and magnetic. Lee always presented a superb figure.

Jackson was erect and soldierly in bearing, with fair complexion, but his appearance generally was not prepossessing. His eyes were remarkable. All who came within their reach felt the force of his presence. "When I looked into his face," said a Federal prisoner, "my heart sank within me."

Lee was always careful in his dress and in his appearance. Jackson was indifferent as to both. The faded gray on both of them always appeared grander than the royal purple.

Lee possessed a greater intellect and more ability than Jackson. His thought covered a wider range and his accomplishments were more varied. He was familiar with the arts and sciences. Jackson knew philosophy. He was familiar with fewer subjects but of these he was the consummate master. Jackson cultivated the powers of concentration. He was a man of few words and when he reached a decision he was as immovable as the rock of Gibraltar.

If Lee had ability, Jackson had mastery. Many of the generals who fought with and against Jackson surpassed him in talent. He was not as widely accomplished as McClellan. He was not as scientific as Beauregard. He did not have the mental scope of Early, nor did he possess the intellectual powers of Joseph E. Johnston. But Jackson had qualities none of these possessed. He combined more than any of them cool audacity and determined resolution. His earnestness was unprecedented and it inspired his own soldiers, making them invincible, and at the same time it struck terror into the hearts of the enemy.

The northern soldiers regarded Stonewall Jackson as their most daring foe. In battle he seemed transformed if not transfigured. He was at his best when leading a charge or an attack. He was a soldier of the Oliver Cromwell type. The resolution of Stonewall Jackson has never been surpassed. His will has never been excelled. The enemy was half conquered before the battle was begun. He barely passed the initial examination for admission to West Point, but by persistence and determination he was graduated seventeenth in his class. His fellow cadets said of him, "If we had to stay here another year old Jack would be at the head of his class." At the basis of Jackson's achievements "there was the will to do, the soul to dare."

Lee was grand, Jackson was daring. Lee was preeminently the soldier, Jackson was preeminently the conqueror. Lee calculated, Jackson ventured. He was like an avalanche from some hidden or unexpected quarter. To the enemy he was like a thunderbolt from a clear sky. When the Union armies heard the ominous words, "Jackson is moving," they retired to their fortifications. The enemy feared him as the fox fears the bloodhound. His very name was synonymous with victory. He never really lost a battle. He never really suffered defeat. He and his troops went into battle with a moral power that was unconquerable. As he rode at the head of his columns, his hands were uplifted, and over and over again he would cry, "Forward, men; forward; press forward!" He always followed up his battles to the fruits of victory. When President Davis reached the battlefield of Manassas, as he crossed a stream, thinking that the Confederates were in retreat, he stood in his saddle and exclaimed with much agitation, "I am President Davis; follow me, soldiers!" as he advanced toward the enemy. Jackson, standing near, calmly replied, "We have beaten them to a frazzle. Mr. President, if you will give me 10,000 troops, I will be in Washington city by to-morrow night."

Great men must have other qualities than unusual personality and great ability. Moral virtues are essential. Men can not really be great without great characters. Honesty, bravery, kindness, and modesty must obtain. Lee and Jackson possessed all of these qualities.

Nature made Robert E. Lee both good and great. Jackson had the most marvelous individuality of any man of his time. He is unique in military annals. Each was the idol of his troops. Their soldiers followed because Lee and Jackson always led.

Neither Lee nor Jackson had the vices or imperfections of many other great men. They both abhorred profanity and seldom took wine or strong drink. They were preeminently Christian gentlemen. No historian would think of writing The True Lee or The True Jackson. They were always the same whether in the home or on the battlefield, whether in peace or war.

The army and the people had confidence in Lee and Jackson. Never were soldiers more devoted to commanders; never were people more loyal to generals.

After the second battle of Manassas General Jackson advanced into Maryland. An amusing story was told of him as he was on this march. He and his staff found themselves behind the troops, artillery, and supply wagons. The road was narrow and it was impossible to get to the front. General Jackson said it was absolutely necessary to reach a point ahead at a certain time, and he ordered his staff to throw down the fence, and rode along the edge of the field. The field was in oats, and when they reached the far end, they were in front of the owner's house, who came forward and asked them, in not very conventional language, what they were doing riding in his oats. He said, "You are nothing but commissaries or quartermasters, for no good soldiers would destroy private property." Addressing himself to Jackson, he asked his name. The general replied that his name was Jackson. "What Jackson? What is your full name? I am going to report you to General Jackson."

"Well," said the general, "they call me Stonewall Jackson."

The staff had all gathered around, much amused, and the owner, suspecting something, asked General Jackson "if he was Stonewall Jackson from the valley?"

"Yes, sir; I commanded in the valley."

The man immediately took off his hat, exclaiming:

"Hurrah for Stonewall Jackson! Hurrah for Stonewall Jackson! Ride all over the damned old oats, general. Trample them into the ground. Do anything you like here, but get off and take a drink with me."

After a great deal of persuasion, the general dismounted and took a drink with him—of buttermilk.

A story is told of General Grant when directing operations in the Wilderness in 1864. It was said Grant was riding behind his lines and, observing a young fellow plowing in the field, he reined in his horse and asked him his name. The young man told him. The general then asked what he was doing. The man replied, "Trying to raise some corn to feed our family, myself, and my horse next winter." General Grant was riding off when the young man asked him, "You have asked my name; can I know yours?"

Grant replied, "They call me Grant."

"What Grant?"

"General Grant."

"Are you the general commanding that army over there?"

"Yes, sir; I am the man."

"Well, General, I would like to ask you a question; where are you going?"

"Well," replied the general, "That would be hard to tell. I may be going to Richmond; I may be going to Petersburg; I may be going above," pointing with his hand, "or I may be going the other way."

"You can't go to Richmond," said the young man, "because General Lee is down there; you can't go to Petersburg, because General Beauregard is there; I know you can't go to heaven, because Stonewall Jackson is up there; you may go below, for I never heard of a Confederate officer or soldier being in hell."

The friendship between Lee and Jackson was close. Their relationship was intimate. Their attitude toward each other was a halo of glory around them both. Jackson said of Lee: "Lee is a phenomenon. I would follow him blindfold." Lee said of Jackson when wounded: "Jackson has lost his left arm. I have lost my right arm." He wrote to Jackson: "Could I have dictated events, I should have chosen for the good of the country to have been disabled in your stead." "Far better for the Confederacy," exclaimed Jackson when he read the note, "that ten Jacksons should have fallen than one Lee." Sometimes they differed, together they were invincible. If Lee commanded, Jackson executed. They spent the night before the Battle of Chancellorsville together. Capt. James P. Smith, on the staff of Jackson, relates that some time after midnight he was awakened in the chill of the morning. He says that he caught a glimpse of a little flame on the slope above him. Sitting up, he saw bending over a scant fire of twigs two men seated on cracker boxes, warming their hands over the fire. He recognized the figures of Robert E. Lee and Stonewall Jackson. They planned while their men slept. The scene is one for a master painter. It should be immortalized on canvas. The story of that last council of war is told in the victory of the following day.

No nobler general ever lived than Robert E. Lee; no braver soldier ever fought than Stonewall Jackson.

Lee was the supreme gentleman. The knightliest and the gentlest in Virginia's civilization found its flower in Robert E. Lee. Jackson was the ideal soldier. The bravery of Virginia found its full fruition in Stonewall Jackson.

Lee and Jackson shared the hardships of their soldiers. In his campaign between the Rappahannock and the James, with colonial mansions at his command, Lee slept in his tent among his soldiers. Jackson often slept in his saddle and frequently rested at the foot of a tree. Neither demanded more for themselves than they asked for their soldiers. General Lee's own son was captured. The Federals offered to exchange him for an officer of equal rank. Lee declined. He said that he could do no more for his own son than for any other soldier.

Lee and Jackson were kind and thoughtful. On the march to the First Battle of Manassas, Jackson was informed that the soldiers of his brigade, worn out from the march, had fallen asleep on the ground and there was no guard about the camp. He replied, "Let them sleep; I will watch." He rode around the camp, a lone sentinel for his brigade, while his men slept.

Lee and Jackson were ever ready to lead their men. Frequently they exposed themselves to danger. Jackson was never happy unless at the head of his troops. "General Lee, go back and we will advance," his soldiers often said, and then they would go forward into battle and into death. His soldiers loved Lee as soldiers never loved another general. His soldiers believed in Jackson as soldiers never believed in another general.

An army surgeon relates that while the Battle of the Crater raged, General Lee rode to the rear of the line where the wounded lay, and, dismounting, moved amongst them. "Doctor, why are you not doing something for this man?" he said, pointing to one sorely stricken. The doctor raised his gray jacket and pointed to the ghastly wound which made life hopeless. General Lee bent tenderly over the wounded man, and then, in a voice tremulous with emotion, exclaimed: "Alas! poor soldier! May God make soft his dying pillow."

At Gettysburg, Lee, who had sent his men into a hundred charges and watched them cut their way to victory, after Pickett's charge, was in retreat. A Union soldier badly wounded lay in his path. The soldier relates that he shouted "Hurrah for the Union," as Lee came near. The general dismounted and approached the wounded enemy. "I thought he meant to kill me," the soldier reported later. "But he looked at me with a sad expression and grasped my hand."

"My son," said Lee to the wounded man, "I hope you will soon be well."

The wounded Yankee wrote, "I cried myself to sleep there on the bloody ground."

Lee was noble in retreat as he was grand in victory. General Grant, after the war, said that the sentence, "It is all my fault," uttered by Lee after Gettysburg, was the greatest speech made by any general during the war.

The personal characters of Robert E. Lee and Stonewall Jackson far surpass other generals of history. Their influence and their example were felt by both students and soldiers. Jackson had taught for ten years before the war and probably Lee's greatest contribution came after the war when he taught the youth in peace as he had led them in war.

THE PATRIOTS

Lee, like his father, the friend of Washington, loved Virginia first. Light Horse Harry Lee said: "Virginia is my country. Her will I obey, however lamentable a fate it may subject me to." His son said: "I look upon secession as anarchy. If I owned the 4,000,000 slaves of the South, I would sacrifice them all for the Union; but I can not draw my sword against Virginia."

Lee favored the Union. He opposed secession. Lee would no sooner draw his sword against Virginia than Douglas would have drawn his sword against his native Scotland.

Never since the temptation of the Son of Man upon the Mount, when He saw all the kingdoms of the world and the glory of them, to turn away to the agony of Gethsemane and the Cross of Calvary, has a man been subjected to such temptation and such an ordeal as Robert E. Lee, when he was offered the command of the Union Army by Abraham Lincoln. I often pass by the building in the city of Washington in which Lincoln's offer was submitted by Francis Preston Blair. Lee's life had been spent in the Army. On the one hand was the realization of his ambition to be the commander in chief of the Army. His home was just across the Potomac from Washington. He thought of the command of the Union armies, with unlimited men and money; he thought of his own beloved Arlington. On the other hand, there was Virginia, the land of his fathers. He thought of the misery of his own people.

Winfield Scott and George H. Thomas were Virginians, but Robert E. Lee was a different Virginian. He was of the Washington mold. His first duty was to his native State. He declined the offer of Abraham Lincoln to accept the sword of Virginia. He exchanged ambition for service, glory for immortality.

Gen. Winfield Scott, commander in chief of the armies of the United States in the Mexican War, and for many years thereafter, had said of him: "He is the greatest soldier now living, and if he ever gets the opportunity he will prove himself the greatest captain of history."

For ten years before the war Stonewall Jackson mingled with the people. He knew the sentiments of the South. He was an intense advocate of State rights. He saw the approaching conflict. He believed in the Confederacy. He was animated by the conviction that he had been raised up to defend the Southland. No man in the South took a keener interest in the approaching strife than Jackson. He said: "As a Christian I abhor war, but as a soldier I love war."

Duty was the guiding star in Lee's career. He wrote to his son in 1852: "Duty is the sublimest word in the English language." Conviction was the controlling influence in the life of Jackson. If Lee fought from duty, Jackson fought from conviction.

Preeminent as patriots, Lee and Jackson became foremost as generals.

THE GENERALS

Lee and Jackson were trained soldiers. For years before the War between the States they were students of the campaigns of Napoleon. They were thoroughly familiar with his tactics and his battles. They regarded him as among the greatest of military commanders. Unconsciously by training, by experience, and by study each was being prepared for leadership in the inevitable conflict between the North and South.

The fame of Robert E. Lee rests upon his battles in the defense of Richmond. His most famous campaign and his most effective victories were in 1864, as he engaged Grant from the Rappahannock to the James. The armies met on May 4, 1864. Grant had 222,000 men, Lee had but 70,000. From June 3 to June 10 Grant had lost 117,000 men, while Lee had lost but 19,000. On this campaign alone Lee's eternal fame as a general is secure. He demonstrated his ability, and he is entitled to a place above Marlborough, Wellington, or Napoleon.

Theodore Roosevelt, in speaking of Lee, said: "He was the greatest of all the great captains that the English-speaking people have brought forth. As a mere military man Washington himself can not rank with the wonderful war chief who for four years led the Army of Northern Virginia."

Lord Wolseley said of General Lee in 1862, when he visited the Confederate Army: "Lee was the ablest general and to me seemed the greatest man I ever conversed with, and yet I have had the privilege of meeting von Moltke and Prince Bismarck. General Lee was one of the few men who ever seriously impressed and awed me with their natural and inherent greatness."

The fame of Stonewall Jackson rests upon the First Battle of Manassas, his celebrated valley campaign, and the glorious victory at Chancellorsville. He turned the tide and won the battle at Manassas July 21, 1861. When the Confederates were falling back, Gen. Bernard E. Bee met Jackson and found him cool and composed. General Bee said, "They are beating us back." Jackson replied: "Then, sir, we will give them the bayonet." Jackson's bravery and determined bearing inspired Bee. He turned in his saddle and rallied his officers. Riding in the midst of his troops he pointed with his sword toward the Virginians. "Look," he shouted, "there is Jackson standing like a stone wall. Rally behind the Virginians." The men took up the cry and a glorious victory was won.

Napoleon said of his faithful lieutenant Ney: "His presence on the battlefield alone was worth 20,000 men." But Jackson was superior to Ney. He could not only plan but he could execute. This was beyond the power of the great French marshal.

Jackson fell at the very noontide of his glory. The bullets of the enemy had left him unscathed on many a battlefield and in many a charge. At the very climax of his brilliant career, when he had won the admiration of friend and foe, the confidence of his superiors, the adoration of his own troops, and the applause of the world, he was wounded by his own soldiers by mistake. He was pressing the victory at Chancellorsville to the limit. He was riding long after the sun had set to crush the enemy. About 8 o'clock on the night of May 3, by his own men through mistake in the dark, General Jackson received three wounds at the same time. One bullet went through the palm of his right hand, a second passed around the wrist of his left hand, and a third passed through the left arm halfway between the shoulder and the elbow. It splintered the bone to the elbow joint and severed the artery. He was carried to the home of a friend at Guinea's Station, where pneumonia set in and he died on Sunday, May 10. Dr. Hunter H. McGuire, medical director of Jackson's corps, who attended Jackson said: "Modern surgery would have saved the life of Stonewall Jackson."

The greatest blow that befell the Confederacy was the death of Jackson. He was largely responsible for the victory at Chancellorsville. Lee accorded him the glory. Jackson knew the country and was familiar with the battlefields. He had studied the regions around Chancellorsville carefully the preceding winter, as Wellington had familiarized himself with the battlefield of Waterloo.

When it was announced that Jackson could not live there was universal sorrow in the army and throughout the Southland. A little girl said: "I wish that God would let me die in his stead, because then only my mother would cry, but if Jackson died all the people of the country would cry." When he fell all the people did weep, from the humblest child of the Southland to the commander in chief of the armies and the president of the Confederacy, both of whom wept as only brave and strong men could weep. There was universal sorrow from the sea captain who had never seen his face to the English lord whose name is a familiar word on both sides of the Atlantic, who remarked when the sad news came to him, "Jackson was in some respects the greatest man America ever produced."

Brave in life, Jackson was brave in death. Like Wolfe at Quebec, Jackson "was content to die," and the light of his marvelous life and brilliant career went out as he said: "No, no; let us cross over the river and rest under the shade of the trees."

Jackson's valley campaign has been studied in the textbooks and leading war colleges of both the Old World and the new. When General Ewell was asked as to Jackson in the valley campaign, he replied in his impetuous manner, "Well, sir, when he commenced it, I thought him crazy; before he ended it, I thought him inspired." It is said by military critics that Jackson's campaign in the valley was the finest example of strategy of which the world has any record. It is studied as a model in the military schools of England and Germany. Von Moltke, perhaps the greatest of modern masters of strategy, is reported as saying that Jackson's campaign in the Virginia Valley is without a rival in the world's history.

The brilliant strokes of the army of northern Virginia, after Lee assumed command, had been executed by Jackson. Except at Gettysburg, and as Mr. Swinton has observed "Lee ventured upon no strokes of audacity after Jackson passed away."

Jackson was at his best on the battlefield. He may not have possessed a versatile or a comprehensive mind, but he was the most successful commander that ever led an army. Lee often made the statement, "If I had had Stonewall Jackson with me, I could have won the Battle of Gettysburg, so far as man can see."

There are acts of bravery and deeds of heroism in peace as well as in war. It frequently takes more bravery to do one's duty in the quiet walks of life than on the field of carnage. It takes greater courage to do one's duty when alone or away from one's fellows, than when urged on by one's companions or followers. The fine spirit of heroism is exemplified by Cambronne when he exclaimed, "The guard dies, but never surrenders." The soldier discovered in the ruins of Pompeii, as he stands there buried at his post, amid the hot waves of lava that overwhelmed him, tells the story of Roman valor in grander language than the ruins of the Forum or the Coliseum. The brave Captain Herndon, the last on deck, thinking first of his passengers, deliberately chose death before dishonor with calm courage as he went down in the ocean's depth, is a truer picture of heroism than Cæsar leading his legions or Napoleon at the Bridge of Lodi.

There are heroes in defeat as well as in victory. Lee endured the shafts of criticisms without complaint. He was denied the privileges of citizenship accorded to his former slaves, although he advised loyalty and allegiance to the Union after the war. In defeat he exemplified his own statement, "Human virtue should be equal to human calamity."

The cause for which Jackson died and Lee fought was lost, but they are honored as no other military chieftains in history. As General Lee rode from Appomattox to Richmond on his favorite horse, Traveler, he was applauded by the remnant of his soldiers and by the people.

It takes a great general and a great army to win a great victory. The soldiers of the Army of Northern Virginia were the best

trained and the bravest soldiers who ever fought. Lee was grander in defeat than in victory. He had surrendered to overwhelming numbers, but his soldiers loved him still. The people worshiped him. They cheered him as he entered Richmond from Appomattox. Unions and Confederates alike bared their heads and applauded Robert E. Lee as he entered and rode along the streets of Richmond, the fallen capital of the Confederacy. Gen. Sir Frederick Maurice, of Great Britain, remarked: "This is the one instance in history in which people flocked to cheer a defeated general."

After the war the word of Lee carried greater weight among the people than the proclamations of governors or orations of senators. His advice was regarded as final in the tragic days of reconstruction.

Lee and Jackson both had ambition, but their ambition was unselfish, the one to do his duty, to defend his beloved Virginia, the other to defend the Southland. Lee and Jackson, preeminently soldiers, were ambitious to conquer in a righteous cause.

Great in war, Lee is noble in peace. He is the ideal man. We might well paraphrase the language of his father, Light Horse Harry Lee, in his eulogy on Washington, "Robert E. Lee was first in war, first in peace, and first in the hearts of his countrymen." Whether declining the command of the Federal armies, whether turning away from his beloved Arlington to fight the battles and share the miseries of his own people, whether proclaiming on the heights of Gettysburg that the fault of the disaster was all his own, or whether refusing the offer of a commercial post, carrying a salary of $50,000 a year, to accept the presidency of Washington College at a salary of $1,500 annually, to teach the youth of the Southland in the arts of peace as he had led the flower of the young manhood of the South in war, he is always the same grand and heroic spirit.

Lee and Jackson are together in death as they were in life. In their last moments they thought of their soldiers and of their battles. Jackson whispered, "Order A. P. Hill to prepare for action." Lee murmured, "Tell Hill he must come up."

They are both buried in Lexington, Virginia, in the valley where Jackson made himself famous in less than two years, and in the State on whose battlefields for four years Lee wrote his name among the immortals.

On this memorial occasion, in honor of the anniversary of the birth of Stonewall Jackson, January 21, we are reminded that the anniversary of the birth of Robert E. Lee is January 19. We recall their noble qualities and their splendid characters rather than their military victories. We are thinking of their greatness and nobility as men rather than as commanders. Lee and Jackson were among the greatest generals, but they were both superior as men. Great men are like the wind, small men are like the grass. The grass, when the wind passes over it, bends. Lee, the soldier, was great, but Lee, the man, was greater. His St. Helena at Lexington was more splendid and more glorious than his Austerlitz in the Wilderness. Robert E. Lee, the general, stands among the greatest captains of all times, and while greater as a man, he was not superior as a general to Stonewall Jackson.

The twin heroes of the Confederacy, Lee and Jackson, the Virginians, as Lee and Jackson, the Americans, are the noblest legacy of the War between the States.

H. R. 14363

Mr. BRIGGS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by incorporating some remarks I made before the Appropriations Committee on the Commerce Department bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. BRIGGS. Mr. Speaker, at no time have the people of the United States been more concerned with revival and development of foreign and domestic trade than at present; and it is of the greatest importance that the agencies which materially contribute to that result be preserved to the people. Feeling that information presented by me to the Committee on Appropriations will be of general interest, I am, with the permission of the House, incorporating it in my remarks.

STATEMENT OF HON. CLAY STONE BRIGGS, A REPRESENTATIVE IN CONGRESS FROM THE STATE OF TEXAS

Mr. OLIVER. Mr. BRIGGS has a matter that he wishes to present to the committee. Will you proceed, Mr. BRIGGS?

Mr. BRIGGS. Gentlemen, I am appearing here this morning in behalf of the appropriation for the Bureau of Foreign and Domestic Commerce with respect to the district offices which obtain in that department.

It is not necessary for me to bring to your attention the fact that the Department of Commerce has organized throughout the United States a number of district offices so as to promote, through the facilities which they have, the commerce of the United States and to encourage and develop trade. I am also appearing in behalf of the offices which they have established abroad.

Among the district offices are several in Texas, one of which is located at Galveston. The chairman indicated a while ago that he and the committee were interested particularly in the dollars and cents return to the people from that activity.

The expenditure which the Government makes for the support of the Galveston office has been about $8,000 a year. It is not that much now, Mr. Chairman, because under the economy program in the Department of Commerce one of the employees in that office was released. It probably is somewhere between $5,000 and $6,000 a year. They have now, I think, only the district manager and a stenographer in that office. That has handicapped its activities materially; but just the same, even if we have to work with these forces largely skeletonized, I feel that as long as we keep the directional force and the power there of carrying on that work, you are contributing very materially to the progress of American foreign and domestic trade.

VALUE OF GALVESTON OFFICE

Year before last the records show that the activities of the Galveston office resulted in an increase of trade to various citizens and business firms of this country amounting to nearly a million dollars; it was nine hundred and some odd thousand dollars, I think. Well, as everybody knows, the national depression has been felt even more acutely in the past year than it was the year before; but in spite of that fact, this office at Galveston aided the business firms of Texas and in my locality to obtain business amounting to $1,687,285.05.

Now, that is concrete information. It is not speculative. When I was home this summer I made a special point of ascertaining from business men what they thought about the service of this organization and of the district office there, and they told me that its value to them was constantly growing.

I would like to cite a few instances.

I would like to read a short letter first, which tells very concretely how valuable this agency has been. It is a letter from Mr. E. W. Rhodes, the general soliciting agent of the Galveston Wharf Co., dated July 19, 1932.

"During the fiscal year ended June 30, exports in a number of major items, such as sulphur, flour, and metals, suffered large decreases because of world-wide economic conditions. Commodity values also declined. But by forming new contracts we enjoyed large increases in exports of grains, cotton, rice, packing-house products, and a few less important commodities. We consider $1,200,000 a conservative estimate of the value of this new business combined with savings effected through the operation of your department.

"Also, we congratulate you upon the efficient manner in which your department has functioned."

This letter was directed to the district manager at Galveston of the Bureau of Foreign and Domestic Commerce.

Now, that is not a platitude. That is a statement of concrete facts given to the people of the United States in regard to the result of the expenditure of their money.

There is another concern in Galveston that operates on a very large scale; that is the Texas Star Flour Mills. These mills testify:

"The amount of this [new] business which we believe should be credited to the services of your bureau during the past 12 months was approximately $210,000."

That is signed by Mr. J. Haviland, president and general manager of the Texas Star Flour Mills.

At Galveston there are several large packing concerns that pack shellfish—shrimp particularly. They are all out for development of markets, and as everybody knows, again, the difficulty of obtaining markets anywhere is extremely great. One of these concerns, the Food Products Co., state in their letter:

"There is directly chargeable to your offices a total business available to us of $60,500, which we feel under present conditions is very flattering."

They closed a contract recently with Japan for 30 tons of frozen shrimp at a valuation of $6,000. They continue:

"We are also negotiating for another contract which will amount to $20,000, and have already made shipment of some 15 tons approximating $4,500. There is pending still another contract which will approximate $30,000."

There is another concern, a tractor concern, Atlas Trailers & Water Mufflers (Inc.), that credits to the Galveston office of the Department of Commerce business to the amount of $20,000.

Here is the Galveston Fisheries, another fish-packing concern, which testifies that through the good offices of the Bureau of Foreign and Domestic Commerce it was able to adjust claims abroad that they otherwise would have lost, amounting to $15,000.

Let me show you the variety of the service rendered—and I shall not attempt to go into any great detail, because I know you are not concerned in that; you are concerned in the general value of the services. Here is one concern that had some very extensive litigation in France over large shipments of cotton that they had made to that country. One of the first things it encountered there was the exorbitant character of the bond in carrying on some necessary litigation. The French required it to make a bond of 500,000 francs. Through its counsel it got it reduced to 250,000 francs. Finally it called on the good offices of the Department of Commerce—the office right there at Galveston of the Bureau of Foreign and Domestic Commerce—and they got it reduced to 20,000 francs.

Mr. CANNON. That was quite a drop from 500,000 francs.

Mr. BRIGGS. From 500,000 down to 20,000.

I want to call your attention to another instance. Last summer the representative of one of the largest grain importing concerns in the United States, the Continental Grain Co., came to me and said, "We are in quite a predicament, Congressman, and I wonder if you can help us." I said, "What is it?" He said, "Last year we developed quite a nice business from Texas and some portions

of the Southwest in the export of milo maize and kafir corn. We shipped about 7,000,000 bushels to Germany, but Germany now, by a new order in council, or whatever they call it over there, has embraced those two commodities in what is known as the corn monopoly. Germany conducts a corn monopoly, and that is ruining that export business. The farmers in Texas had no export market at all for kafir corn and milo maize until this time. We shipped out for the first time last year 7,000,000 bushels. We want to continue to do that business this year, and we do not know how we are going to do it, and we want to know if you can help us."

I said, "Why don't you gentlemen step across the hall here and consult the district manager of the Department of Commerce?" "Well," he said, "we call on him for a great deal of service. This last year he gave us benefits amounting to about $200,000 in the service he rendered in establishing contacts with Mexico, and that business may run up to $2,000,000, but it had not occurred to us to deal with them on this proposition." I said, "Suppose you do it," and he said, "I will."

The Department of Commerce took that matter up for them. Germany came into the market and bought a hundred thousand tons of corn to supply the corn monopoly in Germany, but when that came in she was going to buy corn alone, not including milo maize and kafir corn. As a result of the representations of the Department of Commerce, through the Galveston office, she allowed kafir corn and milo maize to go in with it, as well, which saved markets for those people that otherwise could not possibly have been saved. As you know, Germany has a system of rationing or prorating the materials that go into certain things, like wheat flour. She makes a large percentage of potato flour of German origin to go into the imported wheat flour, in combinations. The breads and things of that kind over in Europe, from the experience I have had with them, are usually atrocious, but they are sustaining, and the people buy them, and they consume a considerable amount of our commodities. If we do not have agencies like these district and foreign offices to deal with these things, we do not get anywhere.

Let me give you another illustration. The present year China undertook to impose visa regulations upon shipments and documents, manifests and things of that kind abroad. She levied an import tax of a certain character which needed consular representation in the United States. Now, China only has in the United States, or did at that time, about six consuls. She regarded them as very important, and she did not have a great number of consuls scattered throughout this country. It was very essential that the commerce moving through Galveston to China in such large volume should have consular representation. Texas had none whatever. The nearest was nearly 500 miles away, at New Orleans, and the next at Chicago.

We took that matter up. They took it up with me. I took it up both with the State Department and with the Department of Commerce. The Department of Commerce got particularly busy. I took it up, of course, with the Chinese minister here in Washington as well. It needed every agency. I found that the service that the Department of Commerce rendered through their far eastern representative here was invaluable in that matter, both at home and through the commercial attaché or trade commissioner in China, in bringing home to the Chinese Government the essential character of consular representation at Galveston. For instance, to expedite that business, so that shipments would not lay over for three or four weeks, possibly, with the chance that the shipment might be lost entirely, by reason of not having some one there to visa these documents at the time when they were needed.

Now, China did a business of something like $18,000,000 through Galveston last year in the purchase of cotton, and it was a very material thing to China, therefore, to have that business expedited, and it was worth a good deal to our people. The Department of Commerce also secured the cooperation of the State Department in an active and efficient way, and between them the consular representation was adopted and provided.

If you gentlemen will permit me, I would like to put in the record a statement of the business handled through the Galveston office and other Texas offices, which was compiled for me by the Department of Commerce. It shows the Galveston office, the Houston office, the Dallas office, and the El Paso office—Representative THOMASON will be here and appear for some of these items—and it puts it in a concrete way.

I do not know whether you gentlemen would like to have in the record all these dollar-and-cents results reported from the various district offices in the United States. I have them here, if you would like them.

Mr. CANNON. For the entire United States?

Mr. BRIGGS. For the entire United States; the various offices in the United States.

Mr. OLIVER. That may go in the record.

The matter referred to is as follows:

Dollars and cents results reported by Texas offices, fiscal year 1931–32

District office	Firms served	Firms reporting	Amount reported	Average benefit per firm reporting	1932–33 office budget
Galveston	36	12	$1,687,285.05	$140,607	$5,302
Houston	253	57	1,111,903.50	19,507	19,256
Dallas	142	34	482,557.69	14,193	12,066
El Paso	84	50	139,451.00	2,789	4,953

"A Galveston shipping concern reports: 'We consider $1,200,000 a conservative estimate of the value of this new business combined with savings effected through the operation of your department.'

"A flour-milling company writes: 'The amount of this business which we believe should be credited to the services of your bureau during the past 12 months was approximately $210,000. Through information your office furnished us last year on foreign tariffs, exchange regulations, etc., we estimate we were saved approximately $1,500. Then you personally rendered us an additional service by putting us in contact with a near-by casting manufacturer who could replace a casting that smashed up and caused a complete shutdown of the mill last July. We were enabled to resume operatives five days sooner and effected a saving in transportion costs on the part, all of which resulted in a saving to this concern of $5,000.'

"An exporter of cotton reports: 'We made the following sales which resulted either directly or indirectly from your cooperation and assistance: To Bombay, 500 bales of cotton, $22,240.26; to Oporto, 200 bales of cotton, $8,244.79.

"'We feel that you are entitled to credit for this business and we take pleasure in expressing herewith our appreciation for your assistance.'

"A sulphur company of Houston states: 'I can truthfully say as far as I am able to judge by the research work I have done, the information made available through your department and its branches throughout the world has undoubtedly resulted in at least $100,000 worth of business.'

"A flour miller reports to the Dallas office: 'We are pleased to tell you that the connections you have helped us to make in Europe and Latin America during the last 12 months have enabled us to do a volume of business which we estimate at $50,000.'

"A firm of general exporters in El Paso has the following to say: 'It is estimated that the total amount of our sales as a result of the services performed for us by your bureau at home and abroad amounted to approximately $50,000 actual on $500,000 potential.'"

District office	Firms served	Firms reporting	Amount reported	Average benefit per firm reporting
Atlanta	191	15	$574,125.72	$38,275.05
Birmingham	125	20	1,142,031.00	57,101.55
Boston	1,915	98	2,552,687.20	26,047.83
Buffalo	365	19	421,399.01	22,178.90
Charleston	61	4	24,900.00	6,225.00
Charlotte	184	7	179,023.99	25,574.86
Chicago	2,146	79	934,182.98	11,825.10
Cincinnati	331	13	128,690.00	9,899.23
Cleveland	663	17	311,953.00	18,350.18
Dallas	142	34	482,557.69	14,192.87
Denver	98	7	61,106.26	8,729.47
Des Moines	305	21	177,046.27	8,430.77
Detroit	896	37	2,567,870.00	69,401.89
El Paso	84	50	139,451.00	2,789.02
Galveston	36	12	1,687,285.05	140,607.09
Houston	253	57	1,111,903.50	19,507.08
Indianapolis	534	67	718,141.93	10,718.54
Jacksonville	176	17	660,107.03	38,829.83
Kansas City	850	25	189,880.00	7,595.20
Los Angeles	551	28	469,237.05	16,758.47

San Francisco	724	80	2,745,960.00	34,324.50
Seattle	534	26	2,214,035.79	85,155.22
St. Louis	629	197	1,637,406.62	8,311.71
Wilmington	92	13	244,600.00	18,815.38
Total	24,725	1,738	46,616,761.86	26,822.07

Mr. BRIGGS. I am not going to read, Mr. Chairman, from this report of the Secretary of Commerce referring to the Bureau of Foreign and Domestic Commerce, except to say that on pages 57 to 61, inclusive, will be found the statement of many services which this bureau has rendered in a concrete way in dollars-and-cents return to the American people, the users of these services.

Mr. CANNON. You do not connect that with the cost of maintaining those offices which supply that service?

Mr. BRIGGS. I am referring to this as evidence of the return that the people are getting upon the investment which they are making in this service.

They refer in the report to "intangible results." Some of those I have brought to your attention in the instances which I have given to this committee.

Now, gentlemen, I would like to say this to you: I notice that Congressman CANNON is somewhat interested in what foreign governments are doing also with reference to this trade promotional service.

Mr. CANNON. Foreign governments in the United States.

TRADE PROMOTIONAL SERVICE IN FOREIGN GOVERNMENTS

Mr. BRIGGS. Yes. Well, I do not know that it has been analyzed in that way, Mr. CANNON.

Mr. CANNON. This activity of foreign governments in the world, then?

Mr. BRIGGS. Take, for instance, Great Britain. Great Britain herself is spending about seven and a half million, or 16 cents per capita, according to the figures that I have here, for trade promotional work, in the Department of Overseas Trade, Empire Marketing Board, Imperial Conference, Colonial Development, and so forth.

Mr. CANNON. You have no figures to show what part of that is spent in the United States?

Mr. BRIGGS. No; I have not, but I imagine quite a large part of it is. A very large part of it is undoubtedly spent in the Far East and South American countries, as you gentlemen know from the visits of the Prince of Wales and others, to hold the trade she has gathered and to increase that trade. South America is one of the most fertile fields, and a lot of that country down there is a country where we must extend our markets—in the South American and Central American countries.

I feel very strongly that there is no service in this Government that pays better returns to the people than the investment in this service. It is not a large investment. This report shows that they have gotten voluntary reports from people in the United States who have used these services with returns amounting to $59,000,000, and they estimate that that is only about 10 per cent of those actively served who have obtained valuable returns.

UTILIZATION OF STATE DEPARTMENT FOR COMMERCE PROMOTION

One other phase of the question: I notice that Congressman CANNON referred to the organization of the State Department, raising the question as to why it could not be utilized to a larger extent than it is for trade-promotion purposes. As everybody knows, the State Department is cast upon entirely different lines from a trade-promotion organization. It is cast upon lines largely in the sense of diplomatic relations, and even where the consuls are concerned, they have a number of social functions to perform, and they perform a great deal of routine work in visaing documents, shipping documents, and things of that kind.

Mr. CANNON. Is it not true that their staffs are made up of experts along many and diverse lines, including not only diplomatic but also commercial and business activities?

Mr. BRIGGS. I do not think that they are made up so much along the lines of business experience and trade contacts of that kind as they are of ability to handle consular documents, invoices, and so forth, and make reports of various characters. But the experience that I have had with people who utilize the State Department is that it is infinitely slow as compared with the service given by the Department of Commerce; and, Mr. Cannon, you know and I know that if you are going to transact business in these days you have got to transact it speedily, and when the people want it transacted. You can not wait until the other fellow sits down and writes a long report and files it six months later. That is the way some of those reports come in, and that is not business. I think that is a waste of your money.

Mr. CANNON. Do you not think we might well take measures to expedite that service and speed it up?

Mr. BRIGGS. We have been trying it for 125 years, and I think we have accomplished it to some extent. I think some of the provisions that have been put in the statutes with reference to the State Department have helped. But it has certainly not displaced the function of the Department of Commerce. I think its work has been exceedingly valuable to the people of the United States.

RELATION WITH AGRICULTURE DEPARTMENT

Mr. CANNON. Mr. BRIGGS, you would also say that the work of the representatives of the Department of Agriculture is equally important in this field?

Mr. BRIGGS. Mr. CANNON, there is nobody, I think, who is more in sympathy with agriculture than I am, because I come, as you know, from the greatest agricultural State in the Union. Missouri is a great one, too.

Mr. CANNON. I was going to ask that you qualify that statement .

Mr. BRIGGS. I am not going to challenge that. People say that it is the size of Texas that accounts for it. But, at any rate, I am deeply interested in agriculture, and I have no complaint to make on account of the efforts that are made to put experts in agriculture in different fields throughout the world to help our trade. What the results have been in that direction I am not so familiar with.

Mr. CANNON. They have been very satisfactory.

Mr. BRIGGS. I assume that, and I am not quarreling with it. If you want my vote in Congress for that service, you are going to get it, because anything that stimulates and promotes the trade of this country and helps us to get foreign markets and markets at home, to my mind, means more to the American people in the revival of trade and relief from this depression than almost anything else we can do.

Mr. CANNON. You think that foreign markets for our agricultural products are as important as foreign markets for our manufactured products?

Mr. BRIGGS. It is a part of the whole thing. I do not think you can separate agriculture. We ship our raw products, such as cotton, raw wheat, wool, and so forth, going out from our farms, but much of it goes out processed as well, in mill form. I have had close contact very frequently with the millers in Kansas and Oklahoma, who appeal to me very often for shipping facilities through the port of Galveston to move their products to various ports of the world, particularly in South America and the West Indies.

Mr. OLIVER. I do not think there can be two opinions as to the importance of developing foreign markets for our farm products, and I assume that one of the problems that the next administration will have to solve is whether this can be done in a more economical and more efficient way than it has been done in the past. Whether you could efficiently develop foreign markets for our manufactured products and for our agricultural products through the same agency is a matter, of course, that will have to be determined in the future; and everyone feels that you must do it in a way that will bring the largest results.

Mr. BRIGGS. That is it. That is the test, Mr. Chairman. It is the way that brings the largest results to the people. It does not make any difference whether you say, "Here is a hundred thousand or two hundred thousand or five hundred thousand dollars over here to be handled by one agency, and four hundred thousand to be handled by another agency."

If they bring you in the returns that you expect, they have fulfilled their purpose; and if you combine them and put the two in one organization and cut their appropriation in two, or if you leave it as it was, and they do not yield the results, then it has been a failure.

I hope you gentlemen are not going to handicap the Bureau of Foreign and Domestic Commerce, and that you will allow it at least the same appropriation that you gave it last year.

So far as the expense of maintaining the Galveston office is concerned, I do not think it averages more than between five and six thousand dollars a year, because they have dismissed the leading clerk that they had there.

CONTACTS OF DISTRICT MANAGERS

I think there is a special thing to be said in favor of the contacts of the district managers themselves out in the field, because frequently people will not use the information made available through the Department of Commerce unless it is brought to them personally, and a lot of it never reaches the parties for whom it is really intended. The contacts that these representatives of the Government have made with the business interests have, to my mind, been of inestimable value.

I thank you.

Mr. OLIVER. Mr. BRIGGS has always manifested keen interest in our foreign trade, and no one in Congress is better qualified than he is to give accurate and helpful information to this committee; and I wish to express, Mr. BRIGGS, my personal appreciation for the very splendid statement that you have supplied to the committee to-day.

Mr. BRIGGS. I appreciate your kind expressions, Mr. Chairman.

EXTENSION OF REMARKS

Mr. BLANTON. Mr. Speaker, I ask unanimous consent to revise and extend the remarks I made to-day.

Mr. GOSS. Reserving the right to object, will the gentleman include the colloquy he had with the gentleman from New York [Mr. BOYLAN] in that request?

Mr. BLANTON. I will not include anything except that which already goes in.

Mr. GOSS. The gentleman will not take those remarks out of the RECORD?

Mr. BLANTON. Certainly not. That would not be according to the rule.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

GENERAL WELFARE

Mr. LANKFORD of Georgia. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. LANKFORD of Georgia. Mr. Speaker, I wish to briefly discuss my bill to create a department of general welfare. While it seeks only such appropriation as may be necessary, which would be small at first, it has not been my intention to urge its passage while we are in the midst of a fight to preserve our very national existence. I do not at all want it understood that I have decided that my bill is not meritorious. We are taking up much time on many bills not as good as mine, but this would not justify my urging that this bill be given precedence over real relief legislation which is so vital at this time. But let me first state briefly what I hope to accomplish by my bill.

It is the purpose of my measure to aid, encourage, and promote public gatherings, labor federations, farm organizations, organizations of war veterans and descendants of veterans, patriotic clubs, community gatherings, and other legal assemblies and organizations, so that all the people of the several States and Territories and of the District of

Columbia shall have larger educational, social, and recreational advantages in order to secure a better mental, physical, spiritual, moral, and patriotic development of the people and in order that the general welfare may be provided and promoted but without impairment of or the infringement upon the laws, the rights, duties, authority, or responsibilities of several States, Territories, and the citizens thereof, with respect not only to the public agencies and institutions mentioned and referred to in the bill but likewise as to all private institutions, agencies of said character in the several States and Territories and leaving to all the people the fullest and most complete religious liberty, unrestricted right of free speech, and most perfect freedom of conscience in the exercise of all constitutional rights.

In furtherance of the purposes of my bill the secretary of welfare provided for in the bill would immediately secure (a) any and all legal right or rights that may not now be owned by the United States Government to the fullest and most complete control of the sending and receiving of all radio communications within the United States, full authority to manage and control said radio communications to be vested in said secretary subject only to certain named exceptions; (b) sufficient motion-picture films of such a nature and standard as to encourage and promote the policy and purpose of the act to the end that all the people may be made stronger educationally, spiritually, morally, physically, and financially, enjoying wholesome, healthy, patriotic, instructive, and proper entertainment, becoming more sensible of the rights of each other and strengthened in their faith in constituted authority and their Government; and (c) such books, prints, maps, bulletins, other printed and written matter, and such equipment, apparatus, and paraphernalia as may be necessary to carry into effect the provisions of the act.

The bill also provides that the secretary shall make provision for supplying the executive, the legislative, and judicial branches of the Government such radio and film service as may be needed by them in the discharge of the duties and powers vested in them by law, and shall maintain for the Government and its branches the use of all radio communications and proper film or motion-picture service for the purposes of the act and for the whole people.

The department of general welfare under the bill would make available to and furnish whenever requested such motion-picture films and apparatus and such radio service as may be desired and approved by any and all public hospitals, orphans' homes, charitable organizations, community centers, patriotic organizations, and other organized gatherings in the United States. It is provided that no such film, motion-picture service, or radio service shall be inimical or antagonistic to the United States Government or the general welfare of the people thereof. The expense of producing and furnishing said films, motion-picture apparatus, and radio service shall be without cost to the people of the United States as patrons or users, and no admission charge shall be made when same are exhibited or used.

A State, county, city, or community may become an organization entitled to all the privileges and benefits of the act upon (a) electing or providing officials authorized to manage the entertainment and service herein provided and authorized to approve and select the class of moving pictures and radio service to be used and exhibited, and (b) providing suitable buildings or outdoor space with ample seating facilities for such exhibition and entertainment.

The bill also provides that the Department of General Welfare shall pay one-half the cost of school books, maps, and other equipment in all States which provide for the payment by the States of the other half of the cost of said maps, books, and equipment; the State authorities in all cases to select and approve the books, maps, and equipment to be used in such State.

The bill provides that the secretary shall confer and cooperate with the different departments of Government, the various State authorities, and any and all organizations mentioned therein as beneficiaries of said service, with a view and for the purpose of ascertaining what pictures and radio service will be requested and how best to fully carry out the purposes of this act.

It is also provided that in the event it is impossible to supply all the service that may be demanded under the provisions of the bill, then the service shall be apportioned among the groups or organizations requesting same in accordance with the respective memberships or patrons thereof.

The bill would prevent commercial advertising over the radio within the United States or by motion pictures authorized or shown under the provisions of the act. Commercial communications or messages could not be transmitted over the radio, except upon approval of the Department of General Welfare and in such a way as not to interfere with the uses to which the radio service is sought to be dedicated by the bill.

Political organizations or parties would be entitled to the service sought to be authorized by the bill. Candidates would have the privilege of presenting their cause to the electorate fairly and as may appear just to the secretary after giving due consideration to class of office to which the candidate aspires and the number of people to be reached and the availability of the radio service without undue conflict with other purposes of the service provided in the bill.

In case full service can not be given to all activities mentioned, then preference would be given to activities of the Government and its various services and the proper entertainment of children and their parents.

Mr. Speaker, I am sponsoring this legislation because in my heart I feel that as Members of Congress we owe to the children of the country laws that will give them a chance to become good citizens, capable of maintaining this Government after those of us now in life shall have passed off this stage of action. I fear that there are influences now very dominant in our Nation which, to a large extent, nullify all the splendid teachings of our fathers and mothers and other friends of our children who wish to help them rather than exploit them.

It is now most evident that more and more the workingman is to have shorter hours of labor and less working days per week, thus having at his disposal more time with his family and more opportunity to enjoy with his folks splendid free, instructive, clean, elevating entertainment. It is my firm belief that my bill, if enacted into law, would be a blessing to all our citizens, and more especially the average man, who now must spend much money to entertain his family and yet not secure for them the high-class entertainment which all good fathers and mothers must desire for their children. I believe that my bill provides for a course of entertainment, instruction, and teaching which would lessen the number of criminals in our country so as to save enough cost from this source alone to many times pay all the expenses of the entire program.

Then again my bill provides for assistance to our public schools in the way of free school books and otherwise, which will be most beneficial to the poor people of our country. I shudder when I realize that at this very time our schools are about to be closed for the lack of sufficient funds.

Mr. Speaker, I always endeavor to approach all questions of legislation from the standpoint of the average individual, keeping in mind his every right and doing my best to help him in his fight for a living, for a home, and for the opportunity to raise his children and give them a chance in life.

I shall not now further discuss my bill to create a department of general welfare. I felt that it might not be amiss for me to put in the RECORD this brief statement concerning its purposes and provisions.

I do though want to make a few further observations concerning the matter of education and real relief of our people at this awful time. Uppermost in my mind all the while have been the children of our Nation and their fathers and mothers. While down in Georgia, to vote at the November election, I had several conferences with my good friend, Prof. Melvin Tanner, of Douglas, Ga., then superintendent of education of my county, and we decided that the Re-

construction Finance Corporation act should be amended so as to provide for loans to the teachers of our country or to the State, county, and municipal authorities so as to insure prompt payment to our teachers of their salaries which are so much needed by them at this time. This kind of legislation would be real relief, and I sincerely hope for its speedy enactment.

Senator GEORGE, of Georgia, has a bill now pending in the Senate for this much-needed relief to our teachers and our people generally. Hearings are now being held on his bill, and it is my sincere hope that it may be enacted at the earliest possible moment.

I am most anxious for the Reconstruction Finance Corporation act to be amended so that it will be directly helpful to the average citizen, our teachers, the farmers, the workingman, and the people generally. Some people say it can not be done, as the act was set up to handle loans only to the corporations. This is an erroneous idea. The War Finance Corporation act was geared up so as to help the corporations and through them help the poorest of the poor. This can be done if proper amendments are adopted to the Reconstruction Finance Corporation act.

This kind of legislation must be enacted if Congress is to do something worth while to help solve the awful questions which now besiege us from every standpoint.

I know I am repeating what I have said many, many times, but I am doing so for the sake of emphasis and with the hope that I can at last get enough to join me to pass some real legislation for the average man, the farmer, and the laboring man. Real relief must come to the masses of our people before there is any permanent solution of our present economic difficulties. In fact, the solution of all our problems is dependent upon the proper solution of the farmers' questions. Let us solve these, and all other questions will be much more easily determined. Let us strengthen the base before we add more to the already top-heavy superstructure of our Nation.

Agriculture, the basic industry of the Nation, is crumbling into ruin. It is disintegrating, and our Nation is endangered because the superstructure is entirely too heavy and not enough attention and consideration has been given to the base or foundation—our agricultural interest. If our once-splendid national economic structure is to endure, special, prompt, extensive, well-considered work must be done on the very foundation of all our national greatness; our independent, individual, home-loving farmers and people must be saved—the farmer must be put on an equality with other enterprises.

Thousands of ill-considered, half-baked, quack remedies are being offered. Most of these will do more harm than good. Even their consideration will interfere with proper handling of good measures. Both the big political parties have promised to put the farmer on a parity with those engaged in other lines of business. It will solve all the farmers' problems and bring back prosperity as nothing else will if Congress—made up of Democrats and Republicans—will keep this most solemn promise. It has not at all been kept so far.

In order for the farmer to be on equality with other folks, he must at least be enabled to name the price of what he sells as fully as others fix the prices of what is sold to the farmer; the farmer must be authorized and empowered to secure tax-free, circulating currency based on his property just as the banker now does on the same monetary base; the farmer must get the same tax exemptions—including a home and a reasonable amount of other property tax free—as are accorded the banks and others when they are permitted to subtract the amount of their debts from the value of their property and pay on the balance; and the farmer must receive other similarly fair legislative relief.

To my mind, the principles just stated encompass all of farm relief and real aid to those—all of us—who depend on the farmer for food, clothing, and the necessaries of life.

Until some one shows me I am mistaken by his offering some better permanent farm relief plan, I pledge that I shall fight to the limit for the monetization of farm lands and farm products; that I will do all I can to secure tax-free homes for our people; and that, so far as is within me, I shall contend for a contract system of farm relief, to enable the farmers to name the price of what they sell as fully as others name the price of what they sell to the farmers.

BANKRUPTCY LAWS

Mr. McKEOWN. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. McKEOWN. Mr. Speaker, many centuries of civilization intervene between the law of Kubla Khan that the creditor, by his ability to draw a mark around his debtor, could force the debtor to pay his debt before he could move across the mark or forfeit his life, and that of preventative compositions before bankruptcies.

For many years the laws of European countries have had a tendency to make provisions whereby honest debtors can escape the humiliation of a bankruptcy proceeding by entering into an arrangement with their creditors under the supervision of a court or some public authority.

In February of last year bills were introduced in the Senate by Senator HASTINGS, of Delaware, and Representative EARL MICHENER, of Michigan, in the House, containing many amendments to the present bankruptcy act. Hearings were held before the subcommittee of the Senate sitting with a like committee from the House. The hearings continued from April until the latter part of June, 1932.

It became apparent that the portions of the bills dealing with the numerous amendments to the bankruptcy act could not be considered at this Congress.

After investigating the laws of other countries my attention was directed to the "debtors' respite law" of Louisiana.

As to the purpose of the French law I found much enlightenment in the statement of Monsieur Lyon-Caen, professor of law in the Paris Faculty of Law, which is as follows (speaking of the purpose of the framers of the law):

In the first place—

He says—

they wished to protect the unfortunate and innocent debtor by affording him a means to escape from bankruptcy with the harsh consequences which it involves. In theory it might undoubtedly be said that a debtor is always at liberty to treat with his creditors, even in the absence of any declaration of bankruptcy. But in practice such arrangements are almost impossible, because in their formation the consent of all creditors is necessary, and there are always recalcitrant creditors, who either refuse their consent from malice or demand in return therefor advantages prejudicial to others.

The second purpose of the law is to protect the creditors against the exhorbitant or even dishonest claims of others of their number. Liquidation, according to the provisions established by law on account of the expense and delay incident thereto, is sometimes ruinous to the creditors. It is often as desirable for them as for the debtor that there should be an arrangement by which the latter might himself liquidate his estate under agreed conditions. Finally the third object of the law is to encourage the debtor, who is on the verge of bankruptcy, not to wait as long as he frequently does before making known his true situation, and to endeavor to come to an arrangement with his creditors. The debtor who apprehends bankruptcy, in order to escape it, contracts ruinous loans or engages in speculation; then he calls his creditors together and seeks to conclude an arrangement which is nearly always impeded by some of them; to keep off the most exacting he pays them to the prejudice of the estate, and the most accommodating are not paid.

The actions brought against the debtor burden him with enormous expense and annihilate his credit. In spite of all, he does not escape bankruptcy, and numerous lawsuits are necessary to establish equality among the creditors in recovering the sums paid to the injury of the estate. It is hoped that when the debtor knows there exist some protective measures he will not wait so long and resort to these maneuvers, and that he will address himself as soon as possible to his creditors and endeavor to obtain, under the supervision of the court, a composition that will forestall bankruptcy.

This statement applies to the present bill.

On June 21, last, I introduced H. R. 12753, which contains the principle provisions of the debtors' respite law, and is in the main contained in section 74 of this bill. After

several conferences and meetings of the two subcommittees the Solicitor General, Hon. Thomas D. Thatcher, made the draft of section 74 by writing into the composition section of the present act the main provisions of H. R. 12753.

Section 75, in this bill, was originally contained in the bills introduced by Senator HASTINGS and Representative MICHENER. In the original bills section 75 included railroad reorganization with corporate reorganization.

In order to properly safeguard the public interest in the matter of the reorganization of railroads all reference to railroads was stricken from section 75 and a new section 76 was added, which is a bill introduced by Representative LAGUARDIA and offered as an amendment to this bill.

Section 73 places the jurisdiction in the bankruptcy courts to deal with debtors as well as bankrupts.

In my judgment there is a widespread misunderstanding among the legal fraternity as to what may or may not be done under the power vested in Congress by the Constitution under the provision "to establish uniform laws on the subject of bankruptcies throughout the United States." Strict constructionists in this country have contended that the word "bankruptcy," as used in the constitutional grant to Congress, should be limited in meaning to the narrow English sense, but the courts in an early period decided this clause was to be construed as giving power to Congress to adjust the affairs of all insolvent debtors. I refer you to the excerpts from the memoranda furnished by the able Solicitor General, contained in the report on the bill.

Congress has exercised its power to pass bankruptcy acts four times during the life of the Republic. The first act was passed in 1800 and repealed in 1803. The second act was passed in 1841 and repealed in 1843. The third act was passed in 1867 and was amended in 1874 and repealed in 1878. The fourth and last act was passed in 1898, and we have it with us yet.

The act of 1800 made provision for involuntary bankruptcy alone. No voluntary petition in bankruptcy could be filed under that act. Under the act of 1841 voluntary petitions could be filed by debtors. The right to offer compositions did not materialize until the act of June 22, 1874, which was an amendment to the bankruptcy act of 1867.

The constitutionality of this amendment was questioned because it was not necessary to be adjudged a bankrupt before offering composition. This contention was overruled by the courts. It would appear to me that inasmuch as the provision for extension of debts is in the composition section, and simply provides for the ultimate settlement by the debtor of his debts, in whole or in part, and permits the debtor himself to liquidate the debts instead of a trustee, that this bill lies within the constitutional power granted to Congress.

In 1843, Mr. Justice Catron, an Associate Justice of the Supreme Court, sitting in a case as circuit judge, in an opinion that was later incorporated in the Supreme Court Reports (42 U. S. (1 Howard) 277), said:

> In considering the question before me I have not pretended to give a definition but purposely avoided any attempt to define the mere word "bankruptcy." It is employed in the Constitution in the plural and as part of an expression, "the subject of bankruptcies." The ideas attached to the word in this connection are numerous and complicated; they form a subject of extensive and complicated legislation; of this subject Congress has general jurisdiction; and the true inquiry is, to what limits is that jurisdiction restricted? I hold it extends to all cases where the law causes to be distributed the property of the debtor among his creditors; this is its least limit. Its greatest is the discharge of a debtor from his contracts. And all intermediate legislation, affecting substance and form, but tending to further the great end of the subject—distribution and discharge—are in the competency and discretion of Congress * * *.

In the case of Kunzler *v.* Kohaus (5 Hill, 317) we find Judge Cowen said:

* * * * * * *

> Looking thus at the uniform popular acceptation of the word from the earliest times and in all English countries, and supposing that to be the true one, I read the Constitution thus: "Congress shall have the power to establish uniform laws on the subject of any person's general inability to pay his debts throughout the United States."

It is the purpose of section 74 to provide a forum where individuals, partnerships, and other associations not incorporated, may apply for compositions or extensions of time in which to pay the whole or any part of their debts. Such applicant is denominated a "debtor" and not a "bankrupt," and this avoids the stigma of bankruptcy. He is a distressed debtor, and to be qualified to enter this forum he must be either insolvent or unable to meet his debts as they mature.

He may enter this forum voluntarily by petition, in which he sets out the names of his creditors, the amount due, and their post-office addresses, and therein list his assets, also presenting the plan or means by which he will undertake to liquidate in whole or in part his indebtedness and specifying the terms and extension of time which he requests be granted to him.

If before filing a petition he should be proceeded against by an insolvency petition in bankruptcy, then by way of answer he may make the same pleading as required in a petition, in which case he shall not be adjudged a bankrupt until and after proceedings are had under this session for extension of time or composition.

The petition shall be filed with a United States district court in the district in which the debtor is domiciled, as is required under the present bankruptcy laws. If the petition or answer is approved by the judge as having been properly filed, an order is made staying all foreclosures or other proceedings pending against the debtor or his estate upon such conditions as shall be proper for the protection of the estate against loss during the stay, which shall be in force until the first meeting of the creditors.

The petition or answer is then forwarded to the referee of the county in which the debtor resides, who causes notice to be given to the creditors, stating in the notice the terms of composition or extension, together with a brief statement of the assets and indebtedness of the debtor, including a list of secured creditors, with their addresses, and a list of the 15 largest unsecured creditors, and stating the time and place for the first meeting.

At the first meeting all creditors may participate, both secured and unsecured, and if they desire they may examine the debtor. At this meeting the creditors may submit a plan of composition or extension if they are unwilling to accept the debtor's plan, and they may nominate a trustee to be appointed by the court if liquidation of the estate should be necessary upon the failure of the plan. The referee, after consulting with parties in interest, may fix a reasonable time within which application for confirmation shall be made. He may later extend the time for cause shown and may require as a condition of such extension, additional terms for the protection of and indemnity against loss by the estate as may be proper. No plan shall be presented for confirmation unless it has been accepted by a majority in number of all creditors, including secured creditors and representing a majority in number of claims.

However, should a debtor fail to obtain the consent of a majority in number and amount of his creditors, including secured creditors, he still may file an application for an extension, if in his application he can show a feasible method of financial rehabilitation for himself and which would be for the best interest of all his creditors, including an equitable liquidation for the secured creditors whose claims are affected, and if upon a hearing the court is satisfied that the debtor has presented an equitable method for liquidation for the creditors whose claims are affected; that it is for the best interest of the creditors; that the debtor is acting in good faith and has not been guilty of any of the acts or failed to perform any of the duties which would be a ground for denying his discharge from bankruptcy, then the court may approve the extension of time notwithstanding the objections of a creditor.

The debtor, in his proposal, may ask for extension of time of the payment of debts to either secured or unsecured creditors. He may include provisions for payment on account and may provide for a creditors' committee to supervise his affairs and for the termination of such period under certain specified conditions.

If the extension proposal is accepted and confirmed, it shall be binding upon the debtor and his secured and unsecured creditors; but the extension or composition shall not impair the lien of any secured creditor, but shall affect only the time and method of its liquidation.

Upon the confirmation of an extension proposal the court may dismiss the proceeding or retain jurisdiction of the debtor and his property during the period of the extension in order to protect and preserve the estate and enforce the terms of the extension proposal.

The referee may, upon the application of the parties in interest, filed at any time within six months after the composition or extension proposal has been confirmed, set the same aside and reinstate the case, if it shall be made to appear upon a trial that a fraud was practiced in the procuring of such composition or extension, and that knowledge thereof has come to the petitioners since the confirmation thereof.

If the debtor shall fail to comply with the terms required of him for the protection of the estate as provided under this plan, or without any sufficient reason defaults in any payment required to be made under the terms of the extension, the court may appoint a trustee named by the creditors at the first meeting to take over the estate and liquidate it, except debtors engaged in farming or the tillage of the soil, unless they consent, and the court may adjudge the debtor a bankrupt if satisfied that he commenced or prolonged the proceeding for the purpose of delaying creditors and avoiding bankruptcy.

When the debtor has filed his petition or answer pleading for relief under this bill, then his property, wherever located, is subjected to the exclusive jurisdiction of the court in which the order approving the petition or answer is filed, and the court may stay all proceedings pending against the debtor in any court.

The fee for filing a petition under the provisions of the bill is $5 and the compensation for the clerk is $2. For the referee, if the total assets are $10,000 or less, $10, with a charge of $5 for each $5,000 of assets or fraction thereof that exceeds $10,000. Provision is made for sufficient referees to be named to sit in convenient places to expedite the proceedings, and at least one shall be named in each county.

There is little that I can say that will clarify the procedure in sections 75 and 76 than that contained in the report of the bill, which I herewith call to your attention:

Section 75 deals with corporations, their debts, extension plans, and reorganizations, including drainage, irrigation, levee, sewer, or pavement improvement districts, established under the law of the State of their creation, but does not include interstate railroads, nor municipal, insurance, banking, or building and loan corporations.

The procedure under section 75 is similar to that under section 74 in so far as applicable to corporations. The plan of reorganization shall include a proposal to modify or alter the rights of creditors generally, or any class of them, secured or unsecured, through the issuance of new securities of any character, or otherwise. It may include proposals altering the rights of stockholders generally, or of any class of them. It shall provide adequate means for the execution of the plan, which may include the transfer of all or any part of the property of the debtor to another corporation or to other corporations, or the consolidation of the properties of the debtor with those of another corporation, and the issuance of securities of either the debtor or any such corporation or corporations, and may deal with all or any part of the property of the debtor. The judge may appoint a trustee or trustees who may operate the property pending a hearing within 30 days after the appointment of such trustee, at which time the debtor shall be required to file schedules and submit all information that is necessary to disclose the debtor's affairs and the fairness of any proposed plan.

A reasonable time shall be granted in which the claims of creditors and stockholders may be filed, after which time no such claims or interest may proceed in the plan except on order of the court for cause shown. For the purposes of the plan and its acceptance, creditors and stockholders are divided into classes according to the nature of their claims and interests, and shall be entitled to notice of all hearings for the consideration of any plan or of the dismissal of the proceeding, liquidation of the estate, allowance of fees or expenses, and a reasonable time shall be fixed by the judge for the acceptance of such a plan. If a proposed plan is not accepted or if it is accepted and is not confirmed the judge may dismiss the proceeding or direct the trustee to liquidate the estate as the interests of the creditors and stockholders may equitably require. If the proceeding is an involuntary proceeding he shall not dismiss it except after a hearing upon notice to the creditors and stockholders. The judge shall allow reasonable compensation and reimbursement of expenses incurred in the proceeding, including reorganization. The judge may refer any matter to a special master who may be a referee in bankruptcy. Any creditor or stockholder shall be heard on the question of the appointment of any trustee and on the proposed confirmation of any plan, and may petition to intervene on any other question arising in the proceeding as may be determined by the judge.

If a plan has been approved by not less than 25 per cent in amount of any class of creditors and not less than 10 per cent in amount of all the creditors whose interests are affected, it may be proposed by the debtor, or by any creditor or stockholder, and after due notice may be considered, or any other plan similarly proposed may be considered.

The court shall not confirm a plan unless it is accepted in writing filed by or on behalf of creditors holding two-thirds of the amount of claims of each class whose claims or interests have been allowed and will be affected by the plan, unless the judge should determine that the debtor is insolvent. Adequate provision is made in this section for the protection of interests, claims, or liens of any class of creditors or stockholders who do not accept any plan that is approved. Any person in interest may object to the confirmation of the plan, and the judge shall not confirm the same unless the plan is equitable and does not discriminate unfairly in favor of any class of creditors or stockholders. Stockholders who do not accept the plan are entitled to realize the value of their equity, if any, either by a sale of the property at not less than a fair upset price or by appraisal and payment in cash of the value of the stock or the objecting stockholders may elect to take securities allotted to stockholders under the plan. Creditors who do not accept the plan will have adequate protection for the realization by them of the value of their liens or claims against the property of the debtor. Creditors are protected in the same manner as the objecting stockholders.

When a plan is confirmed, it is binding upon the corporation, the stockholders, all creditors whose claims are payable in cash under the plan, and upon all other creditors, secured and unsecured, entitled to priority whose claims are not payable in cash, provided of each class two-thirds thereof have accepted the plan in writing, and binding upon all other unsecured creditors, provided two-thirds have accepted the plan in writing. Secured creditors unwilling to accept the plan as to their rights and procedure are dealt with as heretofore stated with regard to stockholders unwilling to accept the plan.

After confirmation the property shall be transferred as in the manner provided in the plan free and clear of all claims of the debtor, stockholders, and creditors, except as may be reserved in the order directing the transfer and when the proceedings are terminated a final decree shall be entered discharging the debtor and closing the case.

If all or any part of the property of the petitioning corporation shall have been placed in the hands of a receiver in the Federal or State court, whether before or after this act takes effect, the corporation may nevertheless file a petition or answer under this section at any time, and if the petition or answer is approved and a trustee is appointed he shall be entitled forthwith to the possession of such property and the judge shall make such orders as will be equitable for the protection of the obligations incurred by the receiver and payment of reasonable administrative expenses and allowances in the previous proceedings as shall be fixed by the court appointing the receiver. If a Federal or State court shall appoint a receiver prior to the dismissal of the proceedings under this section, the judge may include in the order of dismissal appropriate orders directing the trustee to transfer possession of the debtor's property within the jurisdiction of the court to the receiver so appointed under such terms as the judge may deem equitable and necessary to take care of the obligations incurred by the trustee and the payment of administrative expenses and allowances in the proceedings.

The district courts of the United States, the Territories, and Supreme Court of the District of Columbia, the United States Court of Alaska, and the District Court of the United States for the Territory of Hawaii shall have jurisdiction to hear and determine cases arising under this section.

The court may stay all suits and proceedings until the question of the confirmation of the plan shall have been determined.

A certified copy of an order confirming the plan shall be evidence of the jurisdiction of the court, the regularity of the proceedings, and the fact that the order was made; and the recording of a certified copy of any order shall impart the same notice that a deed, if recorded, would impart.

The provisions of this amendatory act do not apply to proceedings in bankruptcy cases which are pending when it takes effect. The act shall take effect and be in full force from the date of its approval, and apply fully to corporations, their creditors and stockholders, secured and unsecured, whether the debts were incurred prior to such date or after such date.

Section 76 is entitled "Reorganization of Railroads Engaged in Interstate Commerce." Railroads are at this time excluded from the operation of the bankruptcy law. The necessity for the enactment of this section grows out of the present expensive, protracted, confusing, and inefficient administration of affairs of railroad companies engaged in interstate commerce in equity receiverships. The necessity for its immediate enactment results from the fact that at the present time many of the railroad organizations of the country confront the necessity of reorganization. They have reached the limit of their ability to borrow

from the Reconstruction Finance Corporation. They must either reorganize under some arrangement such as is provided for by this section, or be administered in equity receiverships. The protracted period of such administration, the duplication of expense incident to ancillary receiverships, the waste, the opportunity for manipulation on the part of special groups, are too well known to require comment.

This section provides that a railroad corporation engaged in interstate commerce may file a petition in the Federal court, stating that the railroad is either insolvent or unable to meet its debts as they mature, and that it desires to effect a plan of reorganization. It is required that the judge shall ascertain that the petition is filed in good faith and complies with the provisions of this section, and upon such approval the judge procures jurisdiction of the debtor's property wherever located.

There is also provision made in the event the railroad company does not file such petition for the filing of a petition by 25 per cent in amount of any class of creditors and not less than 10 per cent of all creditors of such corporation, upon procuring the approval of the Interstate Commerce Commission.

Subdivision (b) permits the filing and consideration of practically any plan of reorganization. The general plan of this section is to utilize the expert knowledge of the Interstate Commerce Commission.

Subdivision (c) provides for appointment of a temporary trustee or trustees by the judge, recommended by the Interstate Commerce Commission. Permission for creditors to be heard is also provided in this section.

If a plan for reorganization is not proposed or accepted within such reasonable time as the judge may, upon cause shown, fix, or if proposed and accepted is not approved, shall dismiss the proceeding. The court may authorize, with the approval of the Interstate Commerce Commission, the trustee to sell certificates for new money which may be needed to provide reasonable compensation for specific expenses incurred.

It is provided that the President of the United States, by and with the advice and consent of the Senate, may appoint special referees to which it is contemplated matters arising under this section will be referred, who shall receive such compensation as shall be allowed them by such judge with the approval of the Interstate Commerce Commission, and are subject to general provisions of law regarding referees in bankruptcy except as to fees. This permits the building up of a group of men thoroughly informed in railroad reorganization matters.

There is a very broad provision for a hearing by any creditor or stockholder with regard to confirmation of any plan of reorganization, avoiding the necessity of the filing of a petition of intervention.

Subdivision (d) places the entire plan of reorganization under the jurisdiction, supervision, and control of the Interstate Commerce Commission. The commission may consider any and all plans presented to it. The corporation may present a plan of 25 per cent in amount of any class of creditors and not less than 10 per cent in amount of all the creditors whose claims may be affected by the plan may be proposed for consideration. Hearings are then held by the Interstate Commerce Commission on the various plans before it. The commission is then required to render a report in which it shall recommend a plan of reorganization which it shall find equitable, financially advisable, and compatible with the public interest. The section specifically provides that the plan recommended by the commission may be one of several plans presented, a modification of any, or an entirely new plan of the commission. The plan is then presented to the stockholders and creditors for acceptance by them.

Subdivision (e) provides for the transmittal by the commission to the court after it has been accepted in writing by or on behalf of creditors holding two-thirds in amount of the claims of each class whose claims or interests have been allowed and would be affected by the plan. This acceptance is also required by two-thirds of the stockholders unless, of course, the corporation has been found to be insolvent. If a class of creditors or stockholders are provided for by proper protection of their interests as hereinafter discussed, such class need not accept.

Subdivision (f) provides for the final approval of the plan by the Interstate Commerce Commission and, after such approval, for the certification of the plan to the court for its approval. After the acceptance is filed with the commission the proceedings are reopened for the purpose of considering the accepted plan. The commission is required to make certain specific findings. At this stage of the proceedings the commission exercises its powers under section 20a of the interstate commerce act on the approval of issuance of securities necessary in the reorganization. This obviates the necessity of the matter coming back to the commission after final approval by the court, which is only on the record, and at the same time retains an absolute and complete control of the reorganization in the Interstate Commerce Commission of the plan recommended and approved by it.

The commission is given the power to fix maximum compensation to reorganization managers, officers, parties in interest, committees, or other representatives of stockholders for services rendered and reimbursement for the actual and necessary expenses incurred in connection with the proceeding and plan.

This should definitely put a stop to the wholesale plundering by reorganization managers, both by way of fees and for commissions covering new securities.

The section provides that where two-thirds of a class of creditors accept the plan, then the plan is binding upon that particular class of creditors and the minority must accept the new securities issued under the plan of reorganization. This is fair because all the minority of a particular class should expect is that a fair and equitable plan be devised and if the plan is fair then all they are entitled to is equal participation in the new securities. The bill provides adequate machinery for the development of a fair and equitable plan.

In case the acceptance can not be secured of two-thirds of a particular class of creditors that particular class of creditors is not required to accept new securities under the plan. In such a case provision has been made for the adequate protection of their interests. The plan must provide one of three alternatives:

(1) That the sale of such property is subject to such liens. If this alternative is provided the rights of the particular class of creditors are not disturbed but the property is merely taken subject to that lien.

(2) That by the sale free of such liens at not less than a fair upset price and the transfer of such liens to the proceeds of the sale. If this alternative is exercised the particular class of creditors would be in exactly the same position had the property gone through receivership proceeding and the property sold at a fair upset price to the reorganized company with the further protection that the fair upset price is to be fixed by the commission. Under present practices the fair upset price is usually determined by the majority and approved by the court.

(3) By appraisal and payment in cash of the value either of such liens or at the objecting creditors' election of the securities allotted to such liens under the plan. If the plan provides for alternate (3), the creditors have the election of obtaining an appraisal and payment in cash of the old securities or the new securities allotted under the plan.

A similar method is provided for dealing with stockholders. In case there is no finding of insolvency, the bill contemplates that the assent to the plan of two-thirds of each class of stockholders, whether that class be either preferred or common stock. In case this acceptance can not be secured of a particular class, either common or preferred stockholders or both, then it is provided that their acceptance is not required if the plan makes adequate provision for their protection. Two alternatives are provided for dealing with classes of stockholders who refuse to accept, somewhat similar to that provided for creditors. Alternate (1) with reference to creditors is not applicable, of course, to stockholders, and the bill does not provide this alternate method; but alternates (2) and (3) with reference to creditors are used in dealing with classes of stockholders.

Subdivision (g) provides for the necessary court of review. The commission transmits the approved plan, its findings, and the record to the court. The court's review must be based upon the record made before the commission. This is specifically so provided to avoid new hearings or a commencement of the proceedings di novo by the court on the plan. Upon approval by the judge on the said record the plan shall be final and binding upon all parties interested and concerned. The approval of the plan by the court shall discharge the debtor from its debts except as provided in the plan. If the judge disapproves the plan, he is required to file his reasons for such disapproval.

Subdivision (h) exempts new issues, transfers, or exchange of securities necessary to carry out the reorganization from the provisions of the revenue act of 1932. While the committee has no jurisdiction over revenue matters, it felt that the reorganization of the railroads was of such national necessity at this time that it could consider the suggestion of exempting such issues and transfers of stock from the stamp tax of the revenue act. As the new issues will be mostly in lieu of retired certificates and the transfers of existing outstanding certificates simply a matter of exchange to carry out the scope of the reorganization, exemption of such taxation will be of great benefit to the reorganization and of not substantial loss to the Treasury.

Subdivision (i) provides merely for a summary method of transfer of properties which may be affected by the plan; and subdivision (j) makes the act applicable to Federal or State receiverships now pending.

Subdivision (k) provides that pending claims may be stayed during the procedure under reorganization; subdivisions (l), (m), (n), and (o) are formal, defining terms and regulating minor questions of procedure.

It is the purpose of this bill to bring the exercise of the bankruptcy powers more in line, from a practical and helpful standpoint, with the necessities and interest of both distressed debtors and of creditors and to reduce the expense and delay of administration. The plan of the bill is to enlarge and facilitate, as far as is consistent with the rights of all parties in interest, the opportunities for amicable adjustment between debtor and creditor, for rehabilitation and reorganization. While this bill has been framed with due regard for the present and immediately prospective unusual economic conditions, it is believed that an expansion of the opportunity for amicable adjustment by debtor and creditors under supervision and protection of bankruptcy courts and for holding the property of the debtor intact with its operation disturbed as little as practicable, such as is provided for in this bill, will prove itself to be of permanently helpful assistance both to distressed debtors and to creditors and in line with the public interest.

I wish to acknowledge my indebtedness for the assistance rendered me by the Solicitor General, Judge Thomas D. Thacher; Mr. Robert Cook, of Boston, Mass.; Mr. Paul H. King, of Detroit, Mich.; Professor Berle of Columbia Uni-

versity; Mr. Edward Hirsh of Oklahoma City, Okla.; Mr. Max Isaac, editor of the American Bankruptcy Review, New York City; Mr. Godfrey Goldmark, New York City; Mr. Isaac Taylor, Oklahoma City, Okla.; Mr. R. L. Beezley, of Salt Lake City; Mr. C. O. Abbott, Martinsville, Ind.; Mr. F. E. Riddle, of Tulsa, Okla.; Mr. U. S. Hart, of Shawnee, Okla.; Mr. A. L. Orberdorfer, Birmingham, Ala.; Mr. C. C. Moody, Indianola, Miss.; Judge John L. Ingram, Stuttgart, Ark.; Mr. Wm. R. Watkins, Fort Worth, Tex.; Mr. Herman H. Oppenheimer, New York City, N. Y.; Mr. William H. O'Brien, New York City; Mr. Harold Remington, New York City; Mr. W. Randolph Montgomery, New York City; Mr. Horace W. Leeds, Philadelphia, Pa.; Mr. W. F. McLaury, Oklahoma City, Okla.; and Mr. Carlton W. Waller, New York City.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. HARE, indefinitely (at the request of Mr. MCMILLAN), on account of important business.

IMPORTATIONS FROM FOREIGN COUNTRIES

Mr. SCHAFER. Mr. Speaker, I ask unanimous consent to address the House for two minutes, to make an announcement.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SCHAFER. Mr. Speaker, I am pleased to announce that sufficient signatures have been obtained to discharge the Ways and Means Committee from the consideration of the bill H. R. 8557, the Crowther bill, designed to protect American markets from invasion and destruction by floods of importations from foreign countries whose currencies have depreciated. [Applause.]

ENROLLED BILLS SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 14436. An act making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes.

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 212. An act for the relief of Messrs. Short, Ross, Shaw, and Mayhood;

S. 213. An act authorizing adjustment of the claim of Kenneth Carpenter;

S. 219. An act authorizing adjustment of the claims of Oren Wheatley, Kenneth Blaine, and Joseph R. Ball;

S. 252. An act authorizing adjustment of the claim of Johnson & Higgins; and

S. 563. An act for the relief of George T. Johnson & Sons.

ADJOURNMENT

Mr. RAINEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 12 minutes p. m.) the House adjourned until Monday, January 30, 1933, at 12 o'clock noon.

MOTION TO DISCHARGE COMMITTEE

JANUARY 28, 1933.

To the CLERK OF THE HOUSE OF REPRESENTATIVES:

Pursuant to clause 4 of Rule XXVII, I, JOHN C. SCHAFER, move to discharge the Committee on Ways and Means from the consideration of the bill (H. R. 8557) entitled "A bill to equalize tariff duties by compensating for depreciation in foreign currencies," which was referred to said committee January 28, 1932, in support of which motion the undersigned Members of the House of Representatives affix their signatures, to wit:

1. JOHN C. SCHAFER.
2. ROY O. WOODRUFF.
3. JOHN D. CLARKE.
4. C. B. MCCLINTOCK.
5. GUY E. CAMPBELL.
6. W. R. COYLE.
7. CHESTER C. BOLTON.
8. FRANCIS SEIBERLING.
9. E. W. GOSS.
10. HARRY L. ENGLEBRIGHT.
11. CARL G. BACHMANN.
12. JOE CRAIL.
13. DAVID HOPKINS.
14. ALBERT E. CARTER.
15. F. C. LOOFBOUROW.
16. CHARLES E. SWANSON.
17. JOHN W. SUMMERS.
18. O. B. LOVETTE.
19. JAMES WOLFENDEN.
20. GEORGE F. BRUMM.
21. JAMES G. STRONG.
22. MENALCUS LANKFORD.
23. CYRENUS COLE.
24. FRANK CLAGUE.

142. CHARLES B. TIMBERLAKE.
143. LLOYD THURSTON.
144. HAMILTON FISH, JR.
145. KENT E. KELLER.

This motion was entered upon the Journal, entered in the CONGRESSIONAL RECORD with signatures thereto, and referred to the Calendar of Motions to Discharge Committees, January 28, 1933.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Monday, January 30, 1933, as reported to the floor leader:

WAYS AND MEANS

(10 a. m.)

Continue hearings on depreciated currency bill.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

893. A letter from the Secretary of the Treasury, transmitting report on the War Finance Corporation (in liquidation) covering the period from January 1, 1932, to December 31, 1932 (H. Doc. No. 534); to the Committee on Banking and Currency and ordered to be printed.

894. A letter from the Secretary of War, transmitting a report from the Chief of Engineers, pursuant to the rivers and harbors act approved July 3, 1930, on preliminary examination and survey of channel from Rhodes Point to Tylerton, Smith Island, Md.; to the Committee on Rivers and Harbors.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. McCORMACK: Committee on Ways and Means. H. R. 12328. A bill to authorize the assignment of awards entered by the Mixed Claims Commission, United States and Germany; with amendment (Rept. No. 1936). Referred to the House Calendar.

Mr. COLLIER: Committee on Ways and Means. H. R. 14416. A bill to make the Federal gasoline tax effective until June 30, 1934; with amendment (Rept. No. 1937). Referred to the Committee of the Whole House on the state of the Union.

Mr. CHAVEZ: Committee on the Public Lands. H. R. 13745. A bill to provide for agricultural entry of lands withdrawn, classified, or reported as containing any of the minerals subject to disposition under the general leasing law or acts amendatory thereof or supplementary thereto; with amendment (Rept. No. 1938). Referred to the Committee of the Whole House on the state of the Union.

Mr. WILLIAMSON: Committee on Indian Affairs. H. R. 5070. A bill to authorize the Secretary of the Interior to lease concessions on reservoir sites and other lands in connection with Indian irrigation projects; with amendment (Rept. No. 1939). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. McSWAIN (by request): A bill (H. R. 14477) to repeal the proviso contained in the act of Congress approved February 20, 1931 (Public, No. 692, 71st Cong.), to revive certain acts of Congress repealed by the said proviso of the act approved February 20, 1931, and for other purposes; to the Committee on Military Affairs.

By Mr. McFADDEN. A bill (H. R. 14478) to authorize the Comptroller of the Currency to examine the operations of certain dealers in securities, and for other purposes; to the Committee on Banking and Currency.

Also, a bill (H. R. 14479) to authorize the Comptroller of the Currency to examine and report on the condition of Federal reserve banks; to the Committee on Banking and Currency.

By Mrs. WINGO: A bill (H. R. 14480) to extend the times for commencing and completing the reconstruction of a railroad bridge across the Little River at or near Morris Ferry, Ark.; to the Committee on Interstate and Foreign Commerce.

By Mr. McSWAIN: A bill (H. R. 14481) to amend the act of May 22, 1928, entitled "An act to authorize the collection in monthly installments of indebtedness due the United States from enlisted men, and for other purposes"; to the Committee on Military Affairs.

By Mr. GREGORY: A bill (H. R. 14482) to authorize the granting of Federal aid in the construction of certain highways leading to toll bridges, and for other purposes; to the Committee on Roads.

By Mr. HILL of Alabama: A bill (H. R. 14483) to amend section 201 of the emergency relief and construction act of 1932 to provide for certain loans by the Reconstruction Finance Corporation to aid in the support and maintenance of public schools; to the Committee on Banking and Currency.

By Mr. ALMON: A bill (H. R. 14484) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across Elk River between Lauderdale and Limestone Counties, Ala.; to the Committee on Interstate and Foreign Commerce.

By Mr. COCHRAN of Missouri: A bill (H. R. 14485) to amend section 215 of the act making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1933, and for other purposes, approved June 30, 1932; to the Committee on Expenditures in the Executive Departments.

By Mr. BANKHEAD: A bill (H. R. 14486) to authorize the purchase by the Government of silver, to provide for the issuance of silver certificates in payment therefor, and for other purposes; to the Committee on Coinage, Weights, and Measures.

By Mr. WHITTINGTON: A bill (H. R. 14487) to reduce the compensation of Senators, Representatives, Delegates, and Resident Commissioners to $7,500 per annum; to the Committee on Expenditures in the Executive Departments.

Also, a bill (H. R. 14488) to reduce and adjust the clerk hire of Representatives, Delegates, and Resident Commissioners; to the Committee on Expenditures in the Executive Departments.

By Mr. McCLINTIC of Oklahoma: A bill (H. R. 14489) relating to the construction of a Federal building at Mangum, Okla.; to the Committee on Public Buildings and Grounds.

MEMORIALS

Under clause 3 of Rule XXII, memorials were presented and referred as follows:

Memorial of the Legislature of the State of Minnesota, memorializing Congress to properly protect the owners of farm-wood lots and American workmen in industries facing unfair competition resulting from the depreciation of foreign currencies; to the Committee on Ways and Means.

By Mr. SELVIG: Memorial of the Legislature of the State of Minnesota, memorializing Congress to protect the owners of farm-wood lots and American workmen in industries facing unfair competition resulting from the depreciation of foreign currencies; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CARY: A bill (H. R. 14490) granting a pension to Donnie E. Moreland; to the Committee on Pensions.

By Mr. JENKINS: A bill (H. R. 14491) for the relief of William E. Bosworth; to the Committee on Claims.

Also, a bill (H. R. 14492) granting an increase of pension to Sarah A. Fox; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14493) granting an increase of pension to Violet S. Woodward; to the Committee on Invalid Pensions.

By Mr. McCORMACK: A bill (H. R. 14494) for the relief of John E. Ziniti; to the Committee on Naval Affairs.

By Mr. MILLIGAN: A bill (H. R. 14495) for the relief of Claude Benard Wilson; to the Committee on Claims.

By Mr. STALKER: A bill (H. R. 14496) granting an increase of pension to Lizzie O. Stearns; to the Committee on Invalid Pensions.

By Mr. STRONG of Pennsylvania: A bill (H. R. 14497) for the relief of Alena Barger; to the Committee on Claims.

By Mr. WELCH: A bill (H. R. 14498) granting a pension to Thomas Hamilton Peckham; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

9986. By Mr. BACON: Petition of sundry citizens of Long Island, N. Y., urging favorable action on joint resolution proposing an amendment to the Constitution eliminating the count of aliens for apportionment purposes; to the Committee on the Judiciary.

9987. By Mr. BOYLAN: Resolution adopted by the Brooklyn Chamber of Commerce, Brooklyn, N. Y., on war debts; to the Committee on Foreign Affairs.

9988. By Mr. BURDICK: Petition of James S. O'Brien, Henry Kunz, and John Good, of Newport; William D. Eddy, of Jamestown; Alva F. Weaver, of Middletown; Charles E. Whitford, of Riverside; and George E. Purdy, of Providence, all of the State of Rhode Island, in which 358 citizens of Rhode Island respectfully request that in the consideration and action on pension legislation for the veterans of any war in which the United States may have been engaged no repeal or modification of existing legislation beneficial to Spanish War veterans, their widows, or dependents be made; to the Committee on Pensions.

9989. Also, letter of Mrs. E. S. Latimer, of 27 Taber Avenue, Providence, R. I., opposing the recognition of Soviet Russia by the United States; to the Committee on Foreign Affairs.

9990. By Mr. CLARKE of New York: Petition of F. M. Conlon, superintendent Presbyterian Sunday School of Hancock, N. Y., requesting that instead of legalizing beer and repealing or modifying the eighteenth amendment that their United States Senators, their Congressmen at large, and their own Congressman vote for adequate appropriations for law enforcement and a campaign of education in law observance; to the Committee on the Judiciary.

9991. Also, petition of Grace Fox, president Home Missionary Society of the Methodist Episcopal Church of Hancock, N. Y., requesting that instead of legalizing beer and repealing or modifying the eighteenth amendment that their United States Senators, their Congressmen at large, and their own Congressman vote for adequate appropriations for law enforcement and a campaign of education in law observance; to the Committee on the Judiciary.

9992. Also, petition of Flora E. Lipp, chairman Baptist Church of Hancock, N. Y., requesting that instead of legalizing beer and repealing or modifying the eighteenth amendment that their United States Senators, their Congressmen at large, and their own Congressman vote for adequate appropriations for law enforcement and a campaign of education in law observance; to the Committee on the Judiciary.

9993. Also, petition of Margaret West, superintendent Hancock Baptist Church School, Hancock, N. Y., requesting that instead of legalizing beer and repealing or modifying the eighteenth amendment that their United States Senators, their Congressman at large, and their own Congressman vote for adequate appropriations for law enforcement and a campaign of education in law observance; to the Committee on the Judiciary.

9994. By Mr. CONDON: Petition of Albert E. Whitaker, Elmer A. Wade, John W. Burke, Alfred South, and 201 other citizens, protesting against any repeal or modification of existing legislation beneficial to Spanish War veterans, their widows, or dependents; to the Committee on World War Veterans' Legislation.

9995. Also, petition of John F. Dowling, Elston H. Beede, and 286 other citizens of Rhode Island, protesting against any repeal or modification of existing legislation beneficial to Spanish War veterans, their widows, or dependents; to the Committee on World War Veterans' Legislation.

9996. Also, petition of William E. Arnold, James D. King, and 202 other citizens of Rhode Island, protesting against any repeal or modification of existing legislation beneficial to Spanish War veterans, their widows, or dependents; to the Committee on World War Veterans' Legislation.

9997. By Mr. DELANEY: Petition of the New York State Builders' Branch of the Associated General Contractors of America (Inc.), opposing House bill 9921, requiring general contractors to name their subcontractors and material men in their bids on Government work; to the Committee on Expenditures in the Executive Departments.

9998. Also, petition of the Amateur Cinema League (Inc.), of New York, urging the return of the 2-cent rate for first-class mail; to the Committee on Ways and Means.

9999. Also, petition of the Sapolin Co. (Inc.), of New York, protesting against amendment C to House bill 13991, levying a duty of 5 cents per pound on vegetable oils and fats; to the Committee on Ways and Means.

10000. Also, petition of John McQuade & Co. (Inc.), of Brooklyn, N. Y., opposing the domestic allotment bill, H. R. 13991; to the Committee on Agriculture.

10001. By Mr. FULMER: Concurrent resolution requesting the Congress of the United States of America to amend the law creating the Reconstruction Finance Corporation in order that States and subdivisions thereof may borrow directly money to meet the need of the said States and subdivisions thereof; to the Committee on Banking and Currency.

10002. By Mr. GARBER: Petition of the members of the Martin Farm Loan Association, of Buffalo, Okla., urging enactment of legislation to relieve the distressed condition of the farmers facing mortgage-foreclosure proceedings and dispossession of their homes; to the Committee on Banking and Currency.

10003. By Mr. GILLEN: Petition of members of Presbyterian Church of Greencastle, and of Methodist Church of Crawfordsville, Ind., protesting action against repeal of eighteenth amendment and legalization of beer; to the Committee on the Judiciary.

10004. Also, petition of John H. Suttle, secretary-treasurer district 11, United Mine Workers of America, Terre Haute, Ind., asking relief for 10,000 coal miners of Indiana; to the Committee on Interstate and Foreign Commerce.

10005. By Mr. LAMBERTSON: Petition of M. M. Murrell, of Meriden, president of the Jefferson County Ministerial Association, and O. W. Tate, of Nortonville, Kans., secretary of the association, favoring the improvement of the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

10006. By Mr. LINDSAY: Petition of I. Rokeach & Sons (Inc.), Brooklyn, N. Y., opposing oils and fats tax in domestic allotment bill, H. R. 13991; to the Committee on Agriculture.

10007. Also, petition of Federal Bar Association of New York City, opposing passage of House bill 14359, the bankruptcy bill; to the Committee on the Judiciary.

10008. Also, petition of Amateur Cinema League (Inc.) of New York City, favoring the return of the 2-cent first-class postage; to the Committee on Ways and Means.

10009. Also, petition of Sapolin Co. (Inc.), of New York City, opposing oils and fats tax in domestic allotment bill, H. R. 13991; to the Committee on Agriculture.

10010. Also, petition of New York State Builders' Branch, Associated General Contractors of America (Inc.), Utica, N. Y., opposing the passage of House bill 9921; to the Committee on Expenditures in the Executive Departments.

10011. Also, petition of the Silk Association of America (Inc.), New York City, referring to House bill 14105; to the Committee on Labor.

10012. By Mr. McFADDEN: Petition of Farmers Mutual Fire Insurance Co. of Tuscarora, Spring Hill, Wyalusing, Pa., favoring the restoration of the price level of agricultural products; to the Committee on Agriculture.

10013. By Mr. MAPES: Resolution of the Board of Supervisors of Kent County, Mich., requesting that Congress begin within 30 days, with war-time rapidity, construction of national public works of sufficient size to employ all unemployed labor at fair wages, to be financed by any or all of

the three ways, namely, gas tax, bonding, and, if necessary, a limited and controlled currency inflation, or provide some other suitable solution, etc.; to the Committee on Ways and Means.

10014. By Mr. RUDD: Petition of the World's Poultry Science Association, Ithaca, N. Y., favoring the participation of the United States in the Fifth World's Poultry Congress to be held in Rome in 1933, and for the necessary appropriation; to the Committee on Foreign Affairs.

10015. Also, petition of Sapolin Co. (Inc.), New York, opposing the oils and fats tax in the domestic allotment bill, H. R. 13991; to the Committee on Agriculture.

10016. Also, petition of the Silk Association of America (Inc.), New York City, referring to the Connery bill, H. R. 14105; to the Committee on Labor.

10017. Also, petition of New York State Builders Branch, Utica, N. Y., opposing the passage of House bill 9921, the Goss bill; to the Committee on Expenditures in the Executive Departments.

10018. By Mr. SELVIG: Petition of the Woman's Christian Temperence Union of Thief River Falls, Minn., urging establishment of a motion-picture commission for Federal regulation of motion-picture industry; to the Committee on Interstate and Foreign Commerce.

10019. By Mr. STALKER: Petition of 400 members of the churches of Painted Post, N. Y., signed by the following secretaries of classes: John Griswold, Men's Bible Class of the Baptist Church; Mrs. Whiley, Ever Ready Class of the Methodist Episcopal Church; Mary Mills, Hamilton Circle, Woman's Christian Temperance Union; and George Randall, Men's Bible Class, Methodist Episcopal Church, protesting against the return of beer and the repeal of the eighteenth amendment; to the Committee on the Judiciary.

10020. Also, petition of Effie L. Courtright and 25 other residents of Lowman, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

10021. Also, petition of Mrs. John Hamilton and 50 other citizens of Horseheads, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

10022. Also, petition of Mrs. L. A. Van Arnam and 50 other residents of Millport, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

10023. Also, petition of Emma Cooper and 25 other residents of Chemung, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

10024. Also, petition of 500 citizens of Elmira, N. Y., and vicinity, opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

10025. By Mr. THURSTON: Petition signed by 177 citizens of Taylor County, Iowa, protesting against the modification or repeal of existing prohibition laws; to the Committee on the Judiciary.

SENATE

MONDAY, JANUARY 30, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Haltigan, one of its clerks, announced that the House had passed a bill (H. R. 14363) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1934, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 212. An act for the relief of Messrs. Short, Ross, Shaw, and Mayhood;

S. 213. An act authorizing adjustment of the claim of Kenneth Carpenter;

S. 219. An act authorizing adjustment of the claims of Orem Wheatley, Kenneth Blaine, and Joseph R. Ball;

S. 252. An act authorizing adjustment of the claim of Johnson & Higgins;

S. 563. An act for the relief of George T. Johnson & Sons; and

H. R. 14436. An act making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes.

CALL OF THE ROLL

The VICE PRESIDENT. The Senator from Tennessee [Mr. McKELLAR] has the floor on the unfinished business.

Mr. FESS. Mr. President, will the Senator yield to enable me to suggest the absence of a quorum?

The VICE PRESIDENT. Does the Senator from Tennessee yield for that purpose?

Mr. McKELLAR. If I may do so without losing the floor.

The VICE PRESIDENT. The Senator will not lose the floor if he yields for that purpose.

Mr. McKELLAR. Very well.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Cutting	Kendrick	Schuyler
Austin	Dale	Keyes	Sheppard
Bankhead	Davis	King	Shipstead
Barbour	Dickinson	La Follette	Shortridge
Barkley	Dill	Logan	Smoot
Bingham	Fess	Long	Steiwer
Black	Fletcher	McGill	Stephens
Blaine	Frazier	McKellar	Swanson
Borah	George	McNary	Thomas, Idaho
Bratton	Glass	Metcalf	Thomas, Okla.
Brookhart	Glenn	Moses	Townsend
Broussard	Gore	Neely	Trammell
Bulkley	Grammer	Norbeck	Tydings
Bulow	Hale	Norris	Vandenberg
Byrnes	Harrison	Nye	Wagner
Capper	Hastings	Oddie	Walcott
Caraway	Hatfield	Pittman	Walsh, Mass.
Carey	Hawes	Reed	Walsh, Mont.
Connally	Hayden	Reynolds	Watson
Coolidge	Howell	Robinson, Ark.	Wheeler
Copeland	Hull	Robinson, Ind.	White
Costigan	Johnson	Russell	
Couzens	Kean	Schall	

Mr. FESS. I desire to announce that the Senator from Missouri [Mr. PATTERSON] is detained by reason of a death in his family. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Ninety Senators have answered to their names. A quorum is present.

SENATOR FROM VERMONT

Mr. AUSTIN presented the credentials of PORTER H. DALE, chosen a Senator from the State of Vermont for the term commencing on the 4th of March, 1933, which were read and ordered to be placed on file, as follows:

STATE OF VERMONT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 8th day of November, 1932, PORTER H. DALE was duly chosen by the qualified electors of the State of Vermont a Senator from said State to represent said State in the Senate of the United States for the term of six years beginning on the 4th day of March, 1933.

Witness: His excellency our governor, Stanley C. Wilson, and our seal hereto affixed at Montpelier, this 12th day of January, A. D. 1933.

STANLEY C. WILSON, *Governor.*

By the governor:

[SEAL.]

RAWSON C. MYRICK,
Secretary of State.

CHANGE OF DATE OF INAUGURATION

The VICE PRESIDENT laid before the Senate a letter from the Secretary of State, transmitting a letter from the Governor of Arizona, together with a certified copy of House Joint Resolution 1, ratifying the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress and fixing the time of the assembling of Congress, which, with the accompanying paper, was ordered to lie on the table and to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, January 27, 1933.

The Hon. CHARLES CURTIS,
President of the Senate.

DEAR MR. CURTIS: I inclose a letter dated January 20, 1933, addressed to you by Governor Moeur, of Arizona, transmitting a certified copy of House Joint Resolution No. 1, "Ratifying the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress and fixing the time of the assembling of Congress." The letter, with its inclosures, was referred to me by the White House.

I may state for your information that I have also received a certified copy of House Joint Resolution No. 1 from the Governor of Arizona.

Sincerely yours,

H. L. STIMSON.

(Inclosures: Letter, Governor Moeur, of Arizona, to the honorable the President of the United States Senate, with inclosure.)

EXECUTIVE OFFICE, STATEHOUSE,
Phoenix, Ariz., January 20, 1933.

The honorable the
PRESIDENT OF THE UNITED STATES SENATE,
Washington, D. C.

SIR: I have the honor to transmit House Joint Resolution No. 1, ratifying the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress and fixing the time of the assembling of Congress, as passed by the eleventh legislature, now in session.

Very truly yours,

B. B. MOEUR, *Governor.*

STATE OF ARIZONA,
OFFICE OF THE SECRETARY.

UNITED STATES OF AMERICA,
State of Arizona, ss:

I, James H. Kerby, secretary of state, do hereby certify that the within is a true, correct, and complete copy of House Joint Resolution No. 1, regular session, Eleventh Legislature, State of Arizona, entitled "Ratifying the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress," all of which is shown by the original engrossed copy on file in this department.

In witness whereof I have hereunto set my hand and affixed the great seal of the State of Arizona. Done at Phoenix, the capital, this 16th day of January, A. D. 1933.

[SEAL.] JAMES H. KERBY,
Secretary of State.

House Joint Resolution 1 ratifying the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress

Whereas the Seventy-second Congress of the United States of America in both Houses, by a constitutional majority of two-thirds thereof, has made the following proposition to amend the Constitution of the United States in the following words, to wit:

"Joint resolution proposing an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following amendment to the Constitution be, and hereby is, proposed to the States, to become valid as a part of said Constitution when ratified by the legislatures of the several States as provided in the Constitution:

"SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

"SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

"SEC. 3. If at the time fixed for the beginning of the term of the President the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

"SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission":

Therefore be it

Resolved by the House of Representatives and the Senate of Arizona—

First. That the said proposed amendment to the Constitution of the United States of America be, and the same is hereby, ratified by the Legislature of the State of Arizona.

Second. That certified copies of this preamble and joint resolution be forwarded by the secretary of state to the Secretary of State at Washington, to the Presiding Officer of the United States Senate, and the Speaker of the House of Representatives of the United States.

Adopted by the house January 10, 1933, by the following vote—63 ayes, 0 nays, 1 absent, 0 excused.

S. A. SPEAR,
Speaker of the House.
LALLAH RUTH,
Chief Clerk of the House.

Adopted by the senate January 13, 1933, by the following vote—19 ayes, 0 nays, 0 not voting.

HARRY W. HILL,
President of the Senate.
W. F. GRAHAM,
Secretary of the Senate.

House concurred in senate amendments January 13, 1933, by the following vote—56 ayes, 0 nays, 0 absent, 7 excused.

S. A. SPEAR,
Speaker of House.
LALLAH RUTH,
Chief Clerk of House.

EXECUTIVE DEPARTMENT OF ARIZONA,
OFFICE OF GOVERNOR.

This resolution was received by the governor this 13th day of January, 1933, at 2.15 o'clock p. m.

H. H. HOTCHKISS,
Secretary to the Governor.

Approved this 14th day of January, 1933.

B. B. MOEUR,
Governor of Arizona.

EXECUTIVE DEPARTMENT OF ARIZONA,
OFFICE OF SECRETARY OF STATE.

This resolution was received by the secretary of state this 14th day of January, 1933, at 3.06 o'clock p. m.

JAMES H. KERBY,
Secretary of State.

The VICE PRESIDENT also laid before the Senate a letter from the Governor of Delaware, transmitting copy of House Concurrent Resolution No. 6, adopted by the General Assembly of the State of Delaware, which, with the accompanying resolution, was ordered to lie on the table, as follows:

STATE OF DELAWARE, EXECUTIVE DEPARTMENT,
January 26, 1933.

Hon. CHARLES CURTIS, *Vice President,*
The United States Senate, Washington, D. C.

SIR: Pursuant to section 2 of House Concurrent Resolution No. 6, adopted by the General Assembly of the State of Delaware, ratifying a proposed amendment to the Constitution of the United States, fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress, I, C. D. Buck, Governor of Delaware, herewith transmit to you a copy of said House Concurrent Resolution No. 6, duly certified, as required by law.

Respectfully,

C. D. BUCK, *Governor of Delaware.*

I, Charles H. Grantland, secretary of state of the State of Delaware, having custody of the great seal of said State, do hereby certify that the resolution hereto attached is a true and accurate copy of House Concurrent Resolution No. 6, approved by the General Assembly of the State of Delaware on January 19, 1933.

[SEAL.] CHARLES H. GRANTLAND,
Secretary of State.

House Concurrent Resolution 6 relative to the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress

Whereas at the first session of the Seventy-second Congress of the United States of America it was resolved by the Senate and House of Representatives of the United States in Congress assembled (two-thirds of each House concurring therein), that the following article be proposed as an amendment to the Constitution of the United States, which, when ratified by the legislatures of three-fourths of the several States, shall be valid to all intents and purposes as part of the said Constitution, viz:

"ARTICLE —

"SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January and the terms of Senators and Representatives at noon on the 3d day of January of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

"SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

"SEC. 3. If at the time fixed for the beginning of his term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified, and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

"SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission":

Therefore be it

Resolved by the House of Representatives of the State of Delaware (the senate concurring therein)—

SECTION 1. That the said proposed amendment to the Constitution of the United States of America be, and the same is hereby, ratified by the General Assembly of the State of Delaware and shall be to all intents and purposes a part of the Constitution of the United States.

SEC. 2. That certified copies of this preamble and concurrent resolution be forwarded by the governor of this State to the Secretary of State of the United States and to the Presiding Officer of the United States Senate and to the Speaker of the House of Representatives of the United States.

SEC. 3. That the secretary of the senate and the clerk of the house of representatives be, and are hereby, directed to deliver to the said governor a certified copy of this resolution at their earliest convenience.

J. THOMAS ROBINSON,
Speaker of the House.
W. A. SIMONTON,
President pro tempore of the Senate.

Approved January 26, 1933.

C. D. BUCK, *Governor.*

The VICE PRESIDENT also laid before the Senate a letter from the Governor of Idaho, transmitting a certified copy of House Joint Resolution No. 1 of the Legislature of the State of Idaho, which was ordered to lie on the table, and, with the accompanying resolution, to be printed in the RECORD, as follows:

STATE OF IDAHO,
OFFICE OF THE GOVERNOR,
Boise, January 24, 1933.

Hon. CHARLES CURTIS,
President of the Senate, Washington, D. C.

DEAR SIR: I have the honor to transmit herewith House Joint Resolution No. 1 of the twenty-second session of the Idaho State Legislature in accordance with its terms.

Yours very truly,

C. BEN ROSS, *Governor.*

STATE OF IDAHO,
DEPARTMENT OF STATE.

I, Franklin Girard, secretary of state of the State of Idaho, and legal custodian of the original enrolled copies of all acts passed at the various sessions of the Legislature of the State of Idaho, do hereby certify that the annexed constitute a full, true, and complete transcript of the original enrolled copy of House Joint Resolution No. 1, enacted by the twenty-second session of the Legislature of the State of Idaho, and filed in this office the 21st day of January, 1933.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State. Done at Boise, the capital of Idaho, this 23d day of January, A. D. 1933.

[SEAL.] FRANKLIN GIRARD,
Secretary of State.

House Joint Resolution 1 (by Graham and Harrington)

A joint resolution ratifying a proposed amendment to the Constitution of the United States of America fixing the commencement of terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress.

Received and filed January 21, 1933.

FRANKLIN GIRARD,
Secretary of State.

House Joint Resolution 1 (by Graham and Harrington)

A joint resolution ratifying a proposed amendment to the Constitution of the United States of America fixing the commencement of terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress

Whereas at the first session of the Seventy-second Congress of the United States of America it was resolved by the Senate and House of Representatives of the United States in Congress assembled (two-thirds of each House concurring therein) that the following article be proposed as an amendment to the Constitution of the United States, which, when ratified by the legislatures of three-fourths of the several States, shall be valid to all intents and purposes as part of the Constitution, viz:

"ARTICLE —

"SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January and the terms of Senators and Representatives at noon on the 3d day of January of the years in which such terms would have ended if this article had not been ratified, and the terms of their successors shall then begin.

"SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

"SEC. 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice may have devolved upon them.

"SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission":

Now, therefore, be it

Resolved by the Legislature of the State of Idaho:

SECTION 1. That the said proposed amendment to the Constitution of the United States of America be, and the same is, hereby ratified by the Legislature of the State of Idaho.

SEC. 2. That certified copies of this preamble and joint resolution be forwarded by the governor of this State to the President of the United States, to the Presiding Officer of the United States Senate, and to the Speaker of the House of Representatives of the United States.

This house joint resolution passed the house on the 21st day of January, 1933.

ROBERT COULTER,
Speaker of the House of Representatives.

This house joint resolution passed the senate on the 21st day of January, 1933.

GEO. E. HILL,
President of the Senate.

I hereby certify that the within House Joint Resolution No. 1 originated in the house of representatives during the twenty-second session of the Legislature of the State of Idaho.

DONALD D. STEWART,
Chief Clerk of the House of Representatives.

The VICE PRESIDENT also laid before the Senate a letter from the Governor of Missouri, transmitting copy of a joint resolution adopted by the Legislature of the State of Missouri, which was ordered to lie on the table, as follows:

EXECUTIVE OFFICE, STATE OF MISSOURI,
Jefferson City, January 26, 1933.

Hon. CHARLES C. CURTIS,
Vice President, United States Senate, Washington, D. C.

SIR: By virtue of the attached resolution which has been ratified by both the Missouri Senate and House, I am hereby forwarding the same to you duly certified by myself as governor.

Yours very truly,

GUY B. PARK, *Governor.*

Senate Joint Resolution No. 1 (introduced by Senator Donnelly), relating to the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress

Whereas at the first session of the Seventy-second Congress of the United States of America it was resolved by the Senate and House of Representatives of the United States in Congress assembled (two-thirds of each House concurring therein) that the following article be proposed as an amendment to the Constitution of the United States, which, when ratified by the legislatures of three-fourths of the several States, shall be valid to all intents and purposes as part of the Constitution, viz:

"ARTICLE —

"SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified, and the terms of their successors shall then begin.

"SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

"SEC. 3. If at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified, and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

"SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission":

Therefore be it

Resolved by the Legislature of the State of Missouri, That the foregoing amendment to the Constitution of the United States of America be, and the same is hereby, ratified to all intents and purposes as a part of the Constitution of the United States.

That the Governor of the State of Missouri is hereby requested to forward to the Secretary of State and to the Presiding Officer of the United States Senate and to the Speaker of the House of Representatives of the United States an authentic copy of the foregoing resolution. The secretary of the senate and the chief clerk of the house are hereby instructed to send to the governor a certified copy of the action of the Senate and House on this resolution.

We, R. E. L. Marrs, secretary of the Senate of Missouri, and Joseph A. Bauer, chief clerk of the House of Representatives of Missouri, hereby certify that the foregoing resolution was regularly adopted by the Legislature of Missouri on January 24, 1933.

R. E. L. MARRS,
Secretary of Senate.
J. A. BAUER,
Chief Clerk of House of Representatives.

EXECUTIVE OFFICE, STATE OF MISSOURI,
Jefferson City.

I, Guy B. Park, Governor of the State of Missouri, do hereby certify that the above and foregoing resolution is a full, true, and complete copy of Senate Joint Resolution No. 1, ratified by both branches of the General Assembly of Missouri, as fully as the same appears on file in my office and as certified to me by R. E. L. Marrs, secretary of the senate, and Joseph A. Bauer, chief clerk of the house of representatives of the fifty-seventh general assembly.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Missouri, in the governor's office in Jefferson City, Mo., this 24th day of January, 1933.

[SEAL.] GUY B. PARK, *Governor.*

The VICE PRESIDENT also laid before the Senate a joint resolution of the Legislature of the State of South Dakota, which was ordered to lie on the table, as follows:

House joint resolution introduced by Mr. Painter

A joint resolution relating to the ratification of the "lame duck" constitutional amendment

Be it resolved by the Legislature of the State of South Dakota—

Whereas both Houses of the Seventy-second Congress of the United States of America, by a constitutional majority of two-thirds thereof, proposed an amendment to the Constitution of the United States of America, which should be valid to all intents and purposes as a part of the Constitution of the United States when ratified by the legislatures of three-fourths of the States, which resolution is in words and figures following, to wit:

"SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

"SEC. 2. The Congress shall assemble at least once every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

"SEC. 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

"SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission."

Be it resolved by the house of representatives (the senate concurring), That said proposed amendment to the Constitution of the United States of America be hereby ratified by the Legislature of the State of South Dakota; be it further

Resolved, That copies of the resolution be forwarded by the governor of this State to the Secretary of State at Washington, D. C., to the Presiding Officer of the United States Senate, and to the Speaker of the House of Representatives of the United States.

I hereby certify that the within act originated in the house as Joint Resolution No. 2.

JOE ATKINS,
Secretary of the Senate.
H. A. USTRUD,
President of the Senate.

Attest:

JOE ATKINS,
Secretary of the Senate.
GEORGE ABILD,
Speaker of the House.

Office of Secretary of State, ss:
Filed January 25, 1933, at 3.10 o'clock p. m.

MYRTLE MORRISON,
Secretary of State.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate resolutions adopted by the Powers Lake National Farm Loan Association, of Powers Lake, N. Dak., favoring the passage of the so-called Frazier farm relief bill, which were referred to the Committee on Agriculture and Forestry.

He also laid before the Senate a communication from William J. Mundt, of Pierre, S. Dak., submitting a relief plan for the present economic situation providing for the issuance by the Government of $40,000,000,000 of full legal tender United States notes, based on the national wealth and not on bank credits or gold, etc., which was referred to the Committee on Banking and Currency.

He also laid before the Senate a resolution adopted at a meeting in Coliseum Hall, Minneapolis, Minn., under the auspices of the Friends of the Soviet Union, favoring immediate recognition of the Government of Soviet Russia, which was referred to the Committee on Foreign Relations.

He also laid before the Senate a letter from D. A. Skinner, secretary of the Chamber of Commerce of the United States

of America, transmitting copy of a resolution regarding depreciated currency legislation, adopted by the Legislature of California, favoring the passage of legislation to afford adequate protection to the industries and agriculture of the Nation in connection with depreciated currencies, which was referred to the Committee on Finance.

He also laid before the Senate resolutions adopted at a joint meeting of the executive and unemployment committees, League of Wisconsin Municipalities, at Madison, Wis., favoring the passage of legislation granting Federal unemployment relief, which were ordered to lie on the table.

He also laid before the Senate resolutions adopted by the Legislature of the State of Utah in support of measures to initiate a movement to stabilize the monetary and credit bases so as to improve world commodity prices, which were referred to the Committee on Banking and Currency.

(See resolutions printed in full when presented to-day by Mr. SMOOT.)

The VICE PRESIDENT also laid before the Senate a joint resolution adopted by the Legislature of the State of Wisconsin, favoring the passage of legislation giving protection to American producers of wood pulp against unfair competition resulting from the depreciation of foreign currencies, which was referred to the Committee on Finance.

(See joint resolution printed in full when presented to-day by Mr. LA FOLLETTE.)

The VICE PRESIDENT also laid before the Senate a joint resolution of the Legislature of the State of California, favoring the passage of legislation transferring certain oil lands in Kern County, Calif., from the jurisdiction of the Navy Department to the jurisdiction of the Department of the Interior, which was referred to the Committee on Naval Affairs.

(See joint resolution printed in full when presented to-day by Mr. JOHNSON.)

The VICE PRESIDENT also laid before the Senate the following resolution of the House of Representatives of the State of Nebraska, which was referred to the Committee on Agriculture and Forestry:

Resolution memorializing the Congress of the United States favoring the speedy passage of a bill providing for the liquidation and refinancing of farm mortgages and farm indebtedness at a reduced rate of interest through the Federal farm-loan system (Frazier bill—S. 1197)

Whereas the seventy-second session of Congress had before it for its consideration a bill to liquidate and refinance agricultural indebtedness and to encourage and promote agriculture, commerce, and industry by establishing an efficient credit system; and

Whereas this bill was designed to remove the unjust and unequal burdens placed upon agriculture, by providing for the liquidation and refinancing of farm mortgages and farm indebtedness at a reduced rate of interest through the Federal farm-loan system; and

Whereas it appears that through the passage of such a bill the burdens placed upon agriculture may be greatly lightened: Now, therefore, be it

Resolved by the House of Representatives of the State of Nebraska in forty-ninth regular session assembled—

1. That it is the conclusion of this house, based on a thorough survey of the agricultural conditions of the State of Nebraska as they now exist, that the Frazier bill (S. 1197) should be immediately considered and passed without delay by the Congress.

2. That the clerk of this house is hereby ordered and directed forthwith to forward a copy of this resolution, properly authenticated, to the Vice President of the United States, the Speaker of the House of Representatives, to the United States Senators representing the State of Nebraska, and to the Congressmen in the House of Representatives of the United States representing the State of Nebraska to work and to vote for the immediate adoption of said bill or similar legislation which will bring to our Nebraska farmers the constructive agricultural relief which is desperately needed by agricultural interests in Nebraska.

LINCOLN, NEBR., *January 27, 1933.*

I hereby certify that the above and foregoing is the true and correct copy of a resolution adopted by the house of representatives of the forty-ninth session of the Nebraska Legislature on January 24, 1933.

MAX ADAMS, *Chief Clerk.*

The VICE PRESIDENT also laid before the Senate the following resolution of the House of Representatives of the State of Nebraska, which was referred to the Committee on Appropriations:

Resolution memorializing the Congress of the United States for discontinuance of any further appropriation for the development of inland waterways

PREAMBLE

Whereas the Congress of the United States has during the past 12 years authorized the expenditure of millions of dollars for the purpose of improving the channel of the Missouri River and for the development of a system of inland waterways in the United States; and

Whereas, under general conditions, it is the sense of the House of Representatives of the State of Nebraska that all such appropriations for new construction of inland waterway projects should cease, at least during the years 1933 and 1934: Now, therefore, be it

Resolved by the House of Representatives of the State of Nebraska in forty-ninth regular session—

1. That the House of Representatives of the State of Nebraska does hereby emphasize its position for discontinuance of all further appropriations for new construction projects relating to the inland waterway system of the United States; and that it hereby memorializes and petitions the United States House of Representatives and the United States Senate to defeat any proposed appropriation which may come before it which contemplates the expenditure of any public funds whatsoever for such purposes.

2. That certified copies of this resolution be sent to the Vice President of the United States, the Speaker of the House of Representatives, and to each of the United States Senators and Representatives from Nebraska.

J. L. CARMAN.
CLINTON J. MITCHELL.
JOE E. GUNNERSON.
JAMES E. REED.

LINCOLN, NEBR., *January 27, 1933.*

I hereby certify that the above and foregoing is the true and correct copy of a resolution adopted by the house of representatives of the forty-ninth session of the Nebraska Legislature on January 23, 1933.

MAX ADAMS, *Chief Clerk.*

The VICE PRESIDENT also laid before the Senate the following resolution of the House of Representatives of the State of Nebraska, which was referred to the Committee on Finance:

Resolution memorializing the Congress of the United States favoring sound inflation of the currency

Whereas the economic and financial tides of the United States are at their lowest ebb since the price of commodities have decreased to a point where it now requires four, five, and, in many instances, ten times more commodities to purchase the necessaries of life than it did in 1927 and 1928 when the major portion of our national debt was contracted; and

Whereas it is estimated that from ten to fourteen millions of people are now out of employment, which curtails the buying power and thus greatly decreases home consumption until we, as a Nation, have reached the point where the supply of necessary commodities on hand is in excess of the public's power of consumption; and

Whereas money is an invention of civilized man and was intended to serve as a medium of exchange in place of the ancient barter system that prevailed among uncivilized peoples in the Dark Ages; and

Whereas our money system, which was by the fathers of this country intended to be a medium of service in the process of exchange of commodity values, or for labor or service rendered, has become the master of the captains of trade, commerce, and industry, and the weapon of financial tyrants to oppress the weak and unprotected citizen and his family; and

Whereas America, under the gold standard, has failed to provide an adequate medium of exchange for the vast commerce of our land, and, hence, which is responsible, more than any other factor in the present unprecedented business collapse; and

Whereas there is now pending in the Congress of the United States a bill to reestablish a bimetallic system of currency, employing gold and silver, to fix the relative value of gold and silver, and to provide for the free coinage of silver; and

Whereas it is the sense of this house that the theory of money volume has been vindicated and that a sound inflation of our currency is the only way to relieve distressed America: Now, therefore, be it

Resolved by the house of representatives in forty-ninth session assembled—

1. That this house hereby memorializes and petitions the United States House of Representatives and the United States Senate favorably to consider the Wheeler bill, S. 2487, now referred to the Finance Committee of the United States Senate, and this house further urges that the United States Senators and Congressmen from Nebraska exercise all possible influence for the passage of said Wheeler bill.

2. That the chief clerk of this house be ordered and directed forthwith to forward to the Vice President of the United States, to the Speaker of the House of Representatives of the United

States, and to each of the United States Senators and Congressmen from Nebraska a copy of this resolution, properly certified, to the end that our representatives in the Congress shall have before them the views of this house on said currency legislation.

JOHN HAVEKOST.

LINCOLN, NEBR., *January 27, 1933.*

I hereby certify that the above and foregoing is the true and correct copy of a resolution adopted by the house of representatives of the forty-ninth session of the Nebraska Legislature on January 23, 1933.

MAX ADAMS, *Chief Clerk.*

The VICE PRESIDENT also laid before the Senate the following resolution of the Senate of the State of Nebraska, which was referred to the Committee on Immigration:

Resolution—Mexican migratory labor memorial to the Congress of the United States introduced by Senators McCarter and Van Kirk

PREAMBLE

Whereas the regulations and the restrictions of aliens migrating from the Republic of Mexico into the State of Nebraska and surrounding States is a Federal problem; and

Whereas the Bureau of Immigration and Naturalization of the Departments of Labor and Commerce has been designated by Federal law with the duty of enforcing Federal statutes on the subject of alien immigration; and

Whereas all questions relating to the entrance of aliens into the United States and the restrictions upon their movements while within the United States have many times been held to be Federal problems and within the purview of the Federal Labor Department; and

Whereas Mexican migrants, constantly increasing each year in number, are each year coming into the State of Nebraska and lowering the standard of living of our splendid citizens who are skilled and trained in connection with the production of sugar in the sugar-beet industry of the State of Nebraska; and

Whereas no legislation enacted by the State of Nebraska can ever be enacted which will bring relief to the great mass of our sugar-beet workers without remedial legislation by the Congress of the United States limiting the quota of the Republic of Mexico or by more general powers granted to the Bureau of Immigration and Naturalization: Now, therefore, be it

Resolved by the Senate of the State of Nebraska in forty-ninth regular session assembled—

First. That we hereby memoralize and petition the United States House of Representatives and the United States Senate to act favorably upon any proposed legislation which will restrict and limit the perennial influx of cheap Mexican labor which seeks admission to the United States, and that at least during the present session of Congress that the Bureau of Immigration and Naturalization be directed to investigate ways and means of relieving Nebraska labor from competing with Mexican labor;

Second. That a certified copy of this resolution be sent to the Vice President of the United States, the Speaker of the House of Representatives, and to each of the United States Senators and Representatives from Nebraska.

Introduced January 18, 1933.

Adopted January 20, 1933.

The VICE PRESIDENT also laid before the Senate the following joint resolution of the Legislature of the State of Minnesota, which was referred to the Committee on Finance:

Joint resolution memorializing Congress to properly protect the owners of farm wood lots and American workmen in industries facing unfair competition resulting from the depreciation of foreign currencies.

Whereas it has come to the attention of the Minnesota Legislature that the products of foreign manufacturers, especially wood pulp, canned vegetables, and manganese ore are now being shipped into the United States and sold on the American market for much less than it costs American manufacturers to produce these products, even at the present low prices of materials and mill wages; and

Whereas it is apparent that importers of these products are being given an unfair advantage over American industries in view of the fact that they are paying for these products in depreciated foreign currency and selling them for American gold dollars; and

Whereas this competition has resulted in hardship, not only upon the American manufacturer, but also upon all large and small producers of the raw materials used in such industries, including farmers and wood-lot owners, and the employees of the same, together with all other persons directly or indirectly engaged in these industries; and

Whereas a continuation of this situation will result in the closing down of such American industries as can not meet this foreign competition and the throwing out of employment additional thousands of men in this State of Minnesota: Now, therefore, be it

Resolved by the house of representatives (the senate concurring), That the State of Minnesota, respectfully memorializes the Congress of the United States to enact remedial legislation to protect domestic producers against this unfair competition, due to depreciated foreign currencies, and so give employment to large numbers of American workmen in such industries, and be it further

Resolved, That properly attested copies of this resolution be submitted to both Houses of the Congress of the United States, the Ways and Means Committees of such Houses, and to all Minnesota Members thereof.

CHAS. MUNN,
Speaker of the House of Representatives.
K. K. SOLBERG,
President of the Senate.

Passed the house of representatives the 23d day of January, 1933.

FRANK T. STARKEY,
Chief Clerk, House of Representatives.

Passed the senate the 24th day of January, 1933.

G. H. SPAETH,
Secretary of the Senate.

Approved January 26, 1933, for transmittal.

FLOYD B. OLSON,
Governor of the State of Minnesota.

Filed January 26, 1933.

MIKE HOLM,
Secretary of the State of Minnesota.

I, Mike Holm, secretary of state of the State of Minnesota, do hereby certify that I have compared the annexed copy with record of the original resolution in my office of H. F. 281, being Resolution 7, Laws of 1933, and that said copy is a true and correct transcript of said resolution and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State at the capitol, in St. Paul, Minn., this 26th day of January, A. D., 1933.

[SEAL.]

MIKE HOLM,
Secretary of State.

The VICE PRESIDENT also laid before the Senate the following joint resolution of the Legislature of the State of Minnesota, which was referred to the Committee on Foreign Relations:

Joint resolution memorializing the United States Senate to ratify at the instant session of Congress the treaty between the United States of America and the Dominion of Canada for the building of the Great Lakes-St. Lawrence seaway.

Whereas the project of connecting the Great Lakes with tidewater by a deep waterway channel is of vital interest to all of the people of the State of Minnesota and others residing in the central and western part of the country; and

Whereas there has recently been concluded a treaty between the United States of America and the Dominion of Canada for the building of such channel; and

Whereas hearings have been held by a subcommittee of the Foreign Relations Committee of the United States Senate on such treaty; and

Whereas there are sound reasons for believing and expecting the Foreign Relations Committee of the United States Senate to report out said treaty for such seaway early in January of the present session of the United States Congress with the recommendation that said treaty be ratified: Now, therefore, be it

Resolved by the House of Representatives of the State of Minnesota (and the Senate of the State of Minnesota concurring), That the State of Minnesota memorialize the Senate of the United States, now in session, and by the adoption of this joint resolution the State of Minnesota does memorialize the Senate of the United States to ratify at the present session of the Congress of the United States the treaty between the United States of America and the Dominion of Canada providing for the building in accordance with the terms of said treaty a deep waterway channel connecting the Great Lakes with tidewater; and be it further

Resolved, That the governor of this State is hereby requested to forthwith transmit to the Senate of the United States a properly authenticated copy of this joint resolution of the House of Representatives and the Senate of the State of Minnesota.

CHAS. MUNN,
Speaker of the House of Representatives.
K. K. SOLBERG,
President of the Senate.

Passed the house of representatives the 12th day of January, 1933.

G. H. SPAETH,
Secretary of the Senate.

Approved January 26, 1933, for transmittal.

FLOYD B. OLSON,
Governor of the State of Minnesota.

Filed January 26, 1933.

[SEAL.]

MIKE HOLM,
Secretary of the State of Minnesota.

Mr. ASHURST presented the following joint memorial of the Legislature of the State of Arizona, which was referred to the Committee on Agriculture and Forestry:

Senate Joint Memorial No. 1

To the Senate and House of Representatives of the Congress of the United States:

Your memorialist, the Eleventh Legislature of the State of Arizona, in regular session assembled, respectfully represents:

Practically all Arizona farms are encumbered by some form of mortgage, and during the past two years or more owners have been faced with the necessity of meeting their principal payments and interest, plus taxes, water charges, and other operating costs on a 100 per cent basis, with products representing approximately 35 per cent of their former sale value.

In spite of this apparently impossible situation, farmers have with courage and determination continued their activities, kept production at a normal point, and, by great sacrifices, succeeded in meeting imperative obligations.

Liquid assets have necessarily been expended, and in most cases totally exhausted in this effort. There is a large surplus of hay, alfalfa seed, and other farm products now on the farms and in storage for which there is no market. Such products as can be sold at all are being disposed of at prices which provide only the barest sort of a living for farm families and the payment of water charges—the irreducible minimum of expenditures necessary for the continuation of farming operations.

Farm owners can not pay interest on their indebtedness and can no longer meet principal installments until better prices are to be secured for farm products. They have no assurance that leniency will be granted by their creditors for any specified time. This uncertainty threatens the morale of those engaged in the agricultural industry and the uncertainty of the future promises to bring about a wholesale abandonment of farm property in this State.

Those who find it impossible to meet their obligations are, in most cases, farmers who are willing to continue their efforts in an attempt to protect their creditors' security and to salvage at least a portion of their life savings. Because of their experience, training, and personal interest, the farmers are in a far better position to protect creditors' interests than are the creditors themselves, and will, with reasonable cooperation on the part of the creditors, willingly make further sacrifices to conserve the value of the security for which they are individually responsible.

Short time credits, contemplating the resumption at an early date of prinicpal payments, the additional payment of delinquent and maturing interest and other payments, offers no relief. The uncertainty of future markets precludes any constructive farm program, except it be based on present conditions, and such conditions require leniency on the part of creditors if operations are to be continued.

Wherefore your memorialist, the Eleventh Legislature of the State of Arizona, respectfully prays that Congress enact a measure which will afford the needed relief; providing, if necessary, for the refinancing by the Federal Government of all legitimate farm loans on a long-term basis, with an interest rate based upon the cost to the Government of carrying out the program.

And your memorialist will ever pray.

Adopted by the eleventh State legislature, January 18, 1933.

Mr. SMOOT presented the following concurrent memorial of the Legislature of the State of Utah, which was referred to the Committee on Banking and Currency:

THE STATE OF UTAH,
OFFICE OF THE SECRETARY OF STATE,
Salt Lake City, January 25, 1933.

Hon. REED SMOOT,
Senate Chamber, Washington, D. C.

MY DEAR MR. SMOOT: I have the honor to transmit to you herewith House Concurrent Memorial No. 1, by the Governor and the Legislature of the State of Utah, memorializing the President and Congress of the United States to support or initiate a movement to stabilize the monetary and credit bases so as to improve world commodity prices.

Very truly yours, M. H. WELLING,
Secretary of State.

I, M. H. Welling, secretary of state of the State of Utah, do hereby certify that the attached is a full, true, and correct copy of House Concurrent Memorial No. 1, by Mrs. Lund, entitled "Memorializing the President and Congress of the United States to support or initiate a movement to stabilize the monetary and credit bases, so as to improve world commodity prices."

Passed by the Twentieth Legislature of the State of Utah and approved by the governor, January 20, 1933.

As appears on file in my office.

In witness whereof I have hereunto set my hand and affixed the great seal of the State of Utah, at Salt Lake City, this 25th day of January, 1933.

[SEAL.] M. H. WELLING,
Secretary of State.

House Concurrent Memorial 1 (by Mrs. Lund), memorializing the President and Congress of the United States to support or initiate a movement to stabilize the monetary and credit bases, so as to improve world commodity prices

Be it resolved by the Legislature of the State of Utah (the governor concurring therein):

Whereas the people of this State, this Nation, and the world in general are struggling to maintain themselves, retain their property and business and meet their private and public obligations under the heavy and increasing burdens of steadily falling commodity prices, with consequent unemployment and other forms of hardship and distress; and

Whereas the various efforts that have been made to restore prosperity and confidence, apparently based on the thesis that relief of special groups would relieve all other groups also, and that forced expansion of credit would raise commodity prices, have either failed or proved inadequate; and

Whereas it is our conclusion that any expansion of credit beyond a safe ratio to the volume of the metallic money available for the support and validation of such credit is inevitably followed by an equal and opposite reaction to the great disadvantage of all those engaged in productive enterprises and is not, therefore, at all desirable as a permanent policy and justifiable as a temporary policy only at a time of great stress and emergency; and

Whereas attempts to improve commodity prices through general reduction of the amounts of public and private debtor obligations constitute an undertaking too stupendous and intricate to be applied safely or equitably or without incalculable injury to future business confidence and stability; and

Whereas proposals to decrease the amount of gold contained in the United States gold dollar would increase the already existing maldistribution of the world's supply of monetary gold, increase gold hoarding, restrict the velocity of money circulation and thus intensify the present unsatisfactory money and credit situation; and

Whereas it is our conviction that experience has demonstrated the inefficacy of the foregoing and other remedies and palliatives that have been proposed or applied to relieve the world-wide economic depression: Therefore, be it

Resolved by the Legislature of the State of Utah (the governor concurring therein), That we earnestly recommend the use of silver in our monetary systems as a basic money, thereby increasing the supply of metallic money for use as a circulating medium and as a base for currency and credit which, by amplification of the supply of basic money, will stabilize currency, credit, and international exchange and increase and stabilize prices of commodities, with the many and great advantages that will result therefrom; and be it further

Resolved, That we respectfully petition the President and Congress of the United States to arrange for the participation of the United States in any international conference called by another nation or other nations to consider an international agreement for such increased use of silver as money, or if no such conference be held in the immediate future, to call or obtain an international conference for that purpose under the auspices of the Government of the United States, and if no such international conference can be obtained, to take individual action for increased use of silver as money by the United States; and be it further

Resolved, That we especially request that the question of such increased use of silver as money be considered and decided on its economic merits, as we sincerely believe the question is of such vital importance to all the world as to render the welfare of those engaged in the industry itself a comparatively inconsequential part of the great issues involved and that consideration of the question should not be complicated by the introduction of group or individual interests, either of silver producers or others; and be it further

Resolved, That a copy of this memorial be sent to the President of the United States, the President elect of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, the United States Senators and Representatives from the State of Utah, the United States Senator elect and the United States Representatives elect from the State of Utah, and to the governors of the various States, with the request that said governors submit it for action by the legislatures of their States.

The foregoing House Concurrent Memorial No. 1 was publicly read by title and immediately thereafter signed by the president of the senate, in the presence of the house over which he presides, and the fact of such signing duly entered upon the journal this 18th day of January, 1933.

J. FRANCES FOWLES,
President of the Senate.

Attest:

LYNN S. RICHARDS,
Secretary of the Senate.

The foregoing House Concurrent Memorial No. 1 was publicly read by title and immediately thereafter signed by the speaker of the house, in the presence of the house over which he presides, and the fact of such signing duly entered upon the journal this 18th day of January, 1933.

I. A. SMOOT,
Speaker of the House.

Attest:

ERNEST R. MCKAY,
Clerk of House.

Received from the house this 18th day of January, 1933.

Approved January 20, 1933.

HENRY H. BLOOD, *Governor.*

Received from the governor and filed in the office of the secretary of state this 21st day of January, 1933.

M. H. WELLING,
Secretary of State.

Mr. LA FOLLETTE presented the following joint resolution of the Legislature of the State of Wisconsin, which was referred to the Committee on Finance:

STATE OF WISCONSIN

Joint resolution memorializing the Congress of the United States to give protection to American producers of wood pulp against unfair competition resulting from the depreciation of foreign currencies

Whereas the action of foreign countries which are large producers of wood pulp, in going off the gold standard, and the resulting depreciation in their currencies, has given foreign producers an unfair advantage over American producers and enabled them to flood the American markets; and

Whereas the effects of this situation are shown in the very great increase in the foreign wood pulp received at ports on the Great Lakes serving the Wisconsin and Michigan paper mills, no less than 146,540 net tons of foreign wood pulp being received at these ports in the year 1932, as compared with 16,173 tons in the year 1929, before the countries of origin went off the gold standard; and

Whereas the vast quantities of foreign wood pulp now imported deprive many thousands of American workmen of employment and will, if continued, completely ruin the American wood-pulp industry: Therefore be it

Resolved by the senate (the assembly concurring), That the Legislature of Wisconsin hereby respectfully memorializes the Congress of the United States to pass bill H. R. 13999, by Congressman HILL of Washington, or some similar measure, imposing a compensating tax on wood pulp and other articles imported from countries with depreciated currencies sufficient to offset the depreciation in their currencies; be it further

Resolved, That properly attested copies of this resolution be transmitted to both Houses of the Congress of the United States and to each Wisconsin Member thereof.

THOS. J. O'MALLEY,
President of the Senate.
R. A. COBBAN,
Chief Clerk of the Senate.
CORNELIUS YOUNG,
Speaker of the Assembly.
JOHN J. SLOCUM,
Chief Clerk of the Assembly.

Mr. SHIPSTEAD presented the following joint resolution of the Legislature of the State of Minnesota, which was referred to the Committee on Finance:

Joint resolution memorializing Congress to properly protect the owners of farm wood lots and American workmen in industries facing unfair competition resulting from the depreciation of foreign currencies

Whereas it has come to the attention of the Minnesota Legislature that the products of foreign manufacturers, especially wood pulp, canned vegetables, and manganese ore are now being shipped into the United States and sold on the American market for much less than it costs American manufacturers to produce these products, even at the present low prices of materials and mill wages; and

Whereas it is apparent that importers of these products are being given an unfair advantage over American industries in view of the fact that they are paying for these products in depreciated foreign currency and selling them for American gold dollars; and

Whereas this competition has resulted in hardship, not only upon the American manufacturer but also upon all large and small producers of the raw materials used in such industries, including farmers and wood-lot owners and the employees of the same, together with all other persons directly or indirectly engaged in these industries; and

Whereas a continuation of this situation will result in the closing down of such American industries as can not meet this foreign competition and the throwing out of employment additional thousands of men in the State of Minnesota: Now, therefore, be it

Resolved by the house of representatives (the senate concurring), That the State of Minnesota respectfully memorializes the Congress of the United States to enact remedial legislation to protect domestic producers against this unfair competition due to depreciated foreign currencies, and so give employment to large numbers of American workmen in such industries: And be it further

Resolved, That properly attested copies of this resolution be submitted to both Houses of the Congress of the United States, the Ways and Means Committees of such Houses, and to all Minnesota Members thereof.

CHAS. MUNN,
Speaker of the House of Representatives.
K. K. SOLBERG,
President of the Senate.

Passed the house of representatives the 23d day of January, 1933.

FRANK T. STARKEY,
Chief Clerk House of Representatives.

Passed the senate the 24th day of January, 1933.

G. H. SPAETH,
Secretary of the Senate.

Approved January 26, 1933, for transmittal.

FLOYD B. OLSON,
Governor of the State of Minnesota.

Filed January 26, 1933.

MIKE HOLM,
Secretary of the State of Minnesota.

I, Mike Holm, secretary of state of the State of Minnesota, do hereby certify that I have compared the annexed copy with record of the original resolution in my office of H. F. 281, being resolution 7, Laws of 1933, and that said copy is a true and correct transcript of said resolution and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State at the capitol, in St. Paul, Minn., this 26th day of January, A. D. 1933.

[SEAL.] MIKE HOLM, *Secretary of State.*

Mr. JOHNSON presented the following joint resolution of the Legislature of the State of California, which was referred to the Committee on Naval Affairs:

SENATE, LEGISLATIVE DEPARTMENT,
STATE OF CALIFORNIA,
Sacramento, Calif., January 20, 1933.

To the President of the United States, to the Vice President of the United States, and to each Member of the Senate and the House of Representatives of the United States:

I am directed to inform you that the California Legislature has adopted the following:

Senate Joint Resolution No. 4 (by Senator Wagy), relative to memorializing and petitioning Congress to enact legislation transferring certain oil lands in Kern County, Calif., from the jurisdiction of the Navy Department to the jurisdiction of the Department of the Interior

Whereas on September 27, 1909, by presidential Executive order of that date, certain lands in Kern County, Calif., were withdrawn from entry and, by presidential Executive order of September 2, 1912, naval petroleum reserve No. 2 was created therefrom embracing originally 31,181 acres, of which 19,620 acres were or have been patented to private parties, and 9,991 acres have been leased to private parties for operation and are being operated under the provisions of the general leasing act of February 25, 1920 (c. 85, 41 Stats. 450), and 570 acres remain unleased; and

Whereas by the act of June 4, 1920 (41 Stats. 812, 813) the Secretary of the Navy was directed to take possession of all properties within the naval petroleum reserves as are or may become subject to the control and use by the United States for naval purposes, and on which there were no pending claims or applications for permits or leases under the provisions of the said general leasing act of February 25, 1920, or pending applications for United States patents under any law, and to conserve, develop, use, and operate the same in his discretion, directly or by contract, lease, or otherwise; and by the act of February 25, 1928 (45 Stats. 148), jurisdiction over and the administration and enforcement of all oil and gas leases on lands in naval petroleum reserves, issued pursuant to the provisions of sections 18 and 18 (a) of the said general leasing act of February 25, 1920, were transferred to the Secretary of the Navy; and

Whereas section 35 of the said general leasing act provides that 37½ per cent of all amounts derived by the Federal Government from bonuses, royalties, and rentals on leased oil or gas lands or deposits within the public domain shall be paid, at stated intervals, by the Secretary of the Treasury to the State within the boundaries of which such leased lands or deposits are located, for the use by said State, or the subdivisions thereof, for the construction and maintenance of public roads or for the support of public schools or other public educational institutions, and that 52½ per cent of the amounts derived from such bonuses, royalties, and rentals shall be paid into, reserved, and appropriated as a part of the reclamation fund created by the act of Congress known as the reclamation act, approved June 17, 1902, and that all moneys accruing to the Federal Government from bonuses, royalties, and rentals from naval petroleum reserve lands shall be deposited in the United States Treasury as "miscellaneous receipts"; and

Whereas neither the State of California, nor Kern County, Calif., nor the Navy Department of the United States, nor the said reclamation fund, receives any benefit from or part of the amounts derived by the Federal Government from bonuses, royalties, or rentals on said lands within said naval petroleum reserve No. 2; and

Whereas by the enactment of the said acts of June 4, 1920, and February 25, 1928, the Navy Department of the United States is empowered to enter into the business of producing petroleum and its products from the said naval petroleum reserves, particularly from said naval petroleum reserve No. 2; and if such operation shall be engaged in by the Navy Department one of the results thereof will be to deprive Kern County, Calif., and the State of California, annually of tax revenues in excess of $250,000, and this although the quality of the petroleum producible from said lands in said naval petroleum reserve No. 2 is such that neither the said petroleum nor the gas produced from said lands can be used by the Navy except for purposes of sale; and

Whereas the extensive and continued production of petroleum and gas from the patented lands in said naval petroleum reserve requires the continued production of petroleum from the Government lands in said reserve to prevent the drainage and depletion thereof by the aforesaid production on the patented lands, and the necessity for such continued production from the Government lands effectually prevents and will continue to prevent the said lands from being or becoming a petroleum reserve in any sense; and

Whereas so long as jurisdiction over said lands and the administration and enforcement of oil and gas leases therein remain in the Navy Department, the formulation and enforcement of any state-wide conservation program to which the State of Cali-

fornia has heretofore committed itself by appropriate legislation, with respect to oil and gas production from the lands aforesaid, may be prevented because of the inability of the lessees to secure cooperation from the said Navy Department in respect of the duration of their tenure of the said leased lands: Now, therefore, be it

Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature of the State of California hereby memorializes and petitions Congress to enact legislation restoring the public lands within the external boundaries of naval petroleum reserve No. 2 as now constituted, to the public domain of the United States, and transferring the jurisdiction over and the administration thereof and of all leases thereof, to the Secretary of the Interior, and revoking and repealing any and all Executive orders and acts of Congress creating or confirming the creation of said naval petroleum reserve No. 2; and be it further

Resolved, That a copy of this joint resolution be transmitted to the President of the United States, to the Vice President of the United States, and to each Member of the Senate and the House of Representatives of the United States.

FRANK F. MERRIAM,
President of the Senate.
J. A. BEEK,
Secretary of the Senate.
By K. E. MORLEY,
Assistant Secretary.
WALTER J. LITTLE,
Speaker of the Assembly.
ARTHUR A. OHNIMUS,
Chief Clerk of the Assembly.

Mr. BROOKHART presented memorials of Rev. W. A. Howe, jr., and other citizens of Burlington, and W. P. Williamson and other citizens of Fairfield, all in the State of Iowa, remonstrating against the repeal or modification of the national prohibition law, which were ordered to lie on the table.

Mr. COPELAND presented memorials and papers in the nature of memorials of sundry citizens and organizations, all in the State of New York, remonstrating against the repeal of the eighteenth amendment to the Constitution or the modification of the national prohibition law, which were ordered to lie on the table.

Mr. KING presented a telegram from Tracy R. Welling, executive secretary, embodying a resolution adopted by the Utah State Farm Bureau Federation, Salt Lake City, Utah, favoring the passage of the bill (S. 5390) to meet the existing emergency in the agricultural industry, to provide new capital for agricultural development, to refund existing farm mortgages so as to provide long-term loans at lower interest rates, to permit the repurchase of foreclosed farm lands, to amend and supplement the Federal farm loan act, to provide methods for the unification of the Federal farm-loan system, and for other purposes, which was referred to the Committee on Banking and Currency.

He also presented resolutions adopted by the Legislature of the State of Utah in support of measures to initiate a movement to stabilize the monetary and credit bases so as to improve world commodity prices, which were referred to the Committee on Banking and Currency.

(See resolutions printed in full when presented to-day by Mr. SMOOT.)

Mr. CAPPER presented resolutions adopted by a mass meeting of citizens of Hesston sponsored by the Woman's Christian Temperance Union, a union meeting of the Methodist and Congregational churches sponsored by the Woman's Christian Temperance Union, and also local chapters of the Woman's Christian Temperance Union of Burns, Elsmore, and Oxford, all in the State of Kansas, protesting against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

He also presented resolutions adopted by the Methodist Sunday School of Elsmore, the Women's Council of the Congregational Church and the Ladies' Aid Society of the Methodist Episcopal Church of Wakefield, the Young Peoples' Branch of the Woman's Christian Temperance Union of Emporia, the Jefferson County Ministerial Association, and local chapters of the Woman's Christian Temperance Union of Hesston, La Crosse, Minneola, Ottawa, Oxford, Richfield, and Wellington, all in the State of Kansas, favoring the passage of legislation to regulate and supervise the motion-picture industry, which were ordered to lie on the table.

THE LATE SENATOR WESLEY L. JONES

Mr. GRAMMER. Mr. President, my predecessor in this body, the late senior Senator from the State of Washington, Hon. WESLEY L. JONES, left a record of accomplishment which no contemporary of his who knew him will ever forget. His personal attributes may not be quite so well known. I have received a copy of an address on the life of Senator JONES, delivered at memorial services at Seattle, Wash., by Melvin G. Winstock, Esq., of that city, which treats of him both as a statesman and as a man. I ask unanimous consent that it may be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, and it is as follows:

We meet to pay tribute to a fallen leader, a patriotic citizen, a public servant, a Christian gentleman. Vain are mere tears. Memorial exercises are useful only as they lift us out of ourselves and give a proper inspiration.

Memory is the most important quality of the human mind. Without it all knowledge is useless. Hope is but the fragment of a shattered dream, affection would be a forgotten emotion. Experience would vanish in its effect upon human conduct.

WESLEY JONES began life in toil and humble struggle. He arose to great eminence but never lost humility of faith. Even in the midst of strife, passion, ambition, he always had God in his heart, the National Constitution as his guide, a thorough confidence in the stability of American institutions. His private life and public career were devoted to the highest ideals. He always subordinated private hopes and ambitions to the general good. For more than third of a century he played a great part on the stage of State and national action.

Along the path which great men have trod are stars that light the way. Through the deeds of great leaders that make history God gives illumination that we may see the way and avoid the pitfalls that beset men. Before Washington became a State, WESLEY JONES cast his fortunes with us and at Yakima, began the practice of law.

He had his youthful ambitions. He wanted to be a judge in his own county, but the party leaders were not too anxious to satisfy that desire. A situation arose whereby this daring youngster might be satisfied without weakening the organization. They gave him a nomination to Congress, fully believing that the honor would be an empty one. Mr. JONES eagerly accepted the opportunity. He went into the campaign with enthusiastic thoroughness, and astonished his party by the vigor and brilliancy of the fight—and he won.

At about the same time a fellow student, WILLIAM E. BORAH, located in Idaho. The complete personal attachment between these two men has lingered always. There has, however, been a striking difference in their attitude toward national affairs. Mr. BORAH has always felt that he could stand alone, independent of political ties. WESLEY JONES has always believed in party rule. He consistently declared that unless he could remain loyal to his party, in whose principles he believed, he would not accept honor at its hands. On pure party issues that was his undeviating course. In all other concerns he courageously fillowed the dictates of his conscience. Five times he won, and for 10 years retained his seat in the House.

In the House of Representatives he encountered brilliant men. This contact sharpened his wit, gave him self confidence, and began the process of fitting him for higher service. He worked his way upward to fine committeeships. He acquired the power to do things for his State. He formed lasting friendships. As business agent for Washington he began to secure recognition, in those practical accomplishments that resulted in appropriations that meant the development, of every section of the Commonwealth. Actual practical results focused the eye of his constituents on him. His destiny pointed to higher honors and still greater opportunities.

There is no nobler activity than that of the public service. It can generally be reached only through the medium of politics. The importance of this congressional work alone can be readily appreciated when we know into the hands of these public servants is committed the safety, happiness, and prosperity of a Nation of 128,000,000 people. The Constitution gives to the President but limited powers, but to Congress the highest and most complete authority in legislation.

Under our Constitution the legislative is the most important of the three coordinate branches of the Government. The presidential power is limited by the Constitution. Of the two sections of Congress, the Senate has always been held as the more important. America's most distinguished men have been its Members. It has ever been the safety brake of the Nation. It has generally been steadfast against unrighteous public clamor and has held the people to safe and sane action. To be a Senator is not only a high honor; it is an opportunity for service supreme.

To be an outstanding Member of the Senate of the United States required qualities of the highest character. Through slow stages of advancement WESLEY JONES had attained the highest position in this great body. He had reached the very apex of power.

No effort of mine would be complete without a slight résume of the record. A friend may praise, a foe may condemn, but the record stands as a living testimony to the truth. After Thomas

Jefferson, the great commoner, passed on there was found a note among his papers. It said: "If it is deemed advisable to erect a monument to my memory, let it be of plain white marble and let there be inscribed thereon, 'Here lies the body of Thomas Jefferson. Author of the Declaration of Independence. Author of the Statutes for Religious Liberty for the State of Virginia. Founder of the University of Virginia.'" I once stood uncovered at Monticello and read this. I was overwhelmed with the vastness of the service which this man had rendered, not only to America but to the world. Any single one of these would have given any man the gratitude of posterity.

This idea of service was the outstanding motive of the life of WESLEY JONES. Let us lift the curtain and take a panoramic view of a mere outline of what he did in Congress. He was an open advocate of woman's suffrage long before it became popular to stand for the granting of the franchise to the womanhood of this Nation. He supported every move ever made for the protection of childhood. He battled for every plan made for public education. He consistently believed in and fought for protection to industry and labor and for every righteous policy that looked to the improvement of living conditions for the man of toil. He was an ardent exponent of temperance. When he took the oath of office at the bar of the Senate he swore that he would uphold the Constitution and laws of his country. So he fought for enforcement. Who, by his silent tomb to-day, will dare scorn him for that. I say, all honor shall be given him for standing by his principles.

He was the author of the bill under which the Panama Canal was constructed and the wise laws under which that zone has been so successfully governed and operated. He was at the very head of irrigation and reclamation and promoted in every way the conservation of our natural resources. He was the sponsor of and the author of amendments to the Federal water power act, that properly enforced will give every right and protection to the people in their battle against special privilege or monopoly.

He was the author of the Jones-White shipping bill which even his political foes confess would alone entitle him to everlasting fame. Every American sea captain and sailor will revere his memory for what he has done for their welfare. In the last session of the Senate he stood for every honest measure of direct relief of distress, for the complete construction program for the restoration of prosperity, and wrought miracles in putting through an economy program that saved hundreds of millions of the Nation's funds.

Mistakes he made, but they were honest ones. Through all these tremendous activities he contrived to gain and retain the respect and, in many instances, the abiding affection of his colleagues, even of the opposition. Even before he passed on, some of the highest tributes ever paid a public man were voluntarily offered by the most renowned Members on the other side of the Senate. They, with one voice, declared that he was honest, industrious, capable, faithful to the State, and that he played the game with a squareness and sportsmanlike quality that stamped him as something conspicuously fine.

I have had no time to tell you of his fine humanness. All of a Senator's work does not appear in the study, the committee rooms, or on the floor of the august body. Hundreds of requests come from the voters of the State. Here is a touch that tells of that other side, the human-interest side. When such services were called for, the Senator never stopped to ask a man's religion, his local standing, or his political pull. Not once in all his long public life did WESLEY JONES turn down a call to help, if that help was within the realm of possibility.

He was an unspectacular man, never seeking the limelight. He spoke but seldom, and then with authority and power. He had reached one of the highest and most powerful positions at the National Capital. Had he so desired, he might have been front-paged daily. He preferred the quiet of the study, the incessant grind of committee work where he had to withstand the pressure of conflicting interests and the tremendous labors involved on the floor of the Senate where men met national political giants and their ambitions. It was this constant devotion to great projects that, perhaps, brought about that final illness that resulted in his sudden taking off. When the final summons came he met it with head erect and unafraid.

We do not conserve our true public servants. We extract all they have to give. Then when too late we weep and pile a ton of roses on 6 feet of earth. This is the tragedy of American politics.

Often we are so close to the mountain that we do not appreciate its height. The State of Washington accepted WESLEY JONES as an ordinary matter of fact. His nearness and naturalness made him so much one of us that we did not know the full measure of his place in the national scheme. The Capital of the Nation knew him. The President was glad to use his talents. His colleagues in the Senate relied upon and trusted him.

His was a definite philosophy of government, that of the good of the many, based on the Constitution, wrought through the principles of a political party. The flattery of friend, the threat of foe, could not stampede him from this course.

During 34 years in Congress under pitiless publicity brought forth but few acts that called for adverse criticism. I have examined each one of these, as I hope a just judge would. It is possible that on these controversial questions he might have been mistaken. But of this I am certain—he obtained the best information available. He gave great study to each matter. He acted according to the dictates of his conscience.

He had faith in the ultimate judgment of the American people. He accepted without a murmur their verdict. In or out of office he stood ever willing to serve. He was never exultant in victory nor ungenerous in defeat.

He did not thrillingly dramatize himself. He was drama incarnate, because he was a leading actor in tremendous and ever-changing national action. A great Nation has gained, not lost, in that this man served through both happy and troublous times with an unblemished personal and political record.

He was not an opportunist nor a disciple of expediency, but a real leader whose record of the enduring service will illumine our pathway for generations to come. As time softens all bitterness and melts away all human ambition, the figure of WESLEY JONES will loom high as one whose whole life exemplified intelligent progress, steadfast devotion to American ideals, and a never-ending battle for the rights of his fellow man. The mere flesh of such a man may wither, he may be cut down like a blade of grass, but the spirit and the inspiration thereof liveth eternally in the hearts of men. And so beloved, we bid the body of you a long farewell. But we dedicate ourselves anew with high resolve to carry on under the inspiration of your life so gloriously spent in the service of your country.

REPORT OF THE FINANCE COMMITTEE

Mr. SMOOT, from the Committee on Finance, to which was referred the bill (H. R. 13742) to provide revenue by the taxation of certain nonintoxicating liquors, and for other purposes, reported it without recommendation and submitted a report (No. 1127) thereon.

WATER RESOURCES OF THE SAN PEDRO RIVER, ARIZ.

Mr. ASHURST, from the Committee on Irrigation and Reclamation, to which was referred the resolution (S. Res. 292) authorizing an investigation of the subject of the utilization of the water resources of the San Pedro River in Arizona, reported it without amendment and moved that it be referred to the Committee to Audit and Control the Contingent Expenses of the Senate, which motion was agreed to.

ENROLLED BILLS PRESENTED

Mr. VANDENBERG, from the Committee on Enrolled Bills, reported that on to-day, January 30, 1933, that committee presented to the President of the United States the following enrolled bills:

S. 212. An act for the relief of Messrs. Short, Ross, Shaw, and Mayhood;

S. 213. An act authorizing adjustment of the claim of Kenneth Carpenter;

S. 219. An act authorizing adjustment of the claims of Orem Wheatley, Kenneth Blaine, and Joseph R. Ball;

S. 252. An act authorizing adjustment of the claim of Johnson & Higgins; and

S. 563. An act for the relief of George T. Johnson & Sons.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CAPPER:

A bill (S. 5553) to relieve destitution in the District of Columbia; to the Committee on the District of Columbia.

By Mr. BINGHAM:

A bill (S. 5554) relating to the enactment of laws in the Virgin Islands; to the Committee on Territories and Insular Affairs.

By Mr. SHORTRIDGE:

A bill (S. 5555) to authorize an exchange of lands between the city of San Diego and the United States; to the Committee on Naval Affairs.

By Mr. BROOKHART:

A bill (S. 5556) exempting States and their political subdivisions from certain provisions of the revenue act of 1932; to the Committee on Finance.

A bill (S. 5557) granting an increase of pension to Mary A. Kiggins (with accompanying papers); and

A bill (S. 5558) granting a pension to Bridget Wagner (with accompanying papers); to the Committee on Pensions.

By Mr. WAGNER:

A bill (S. 5559) to amend the standard baskets act of August 31, 1916, to provide for a 1-pound Climax basket for mushrooms; to the Committee on Agriculture and Forestry.

A bill (S. 5560) to amend section 4 of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, as amended; to the Committee on Commerce.

By Mr. WALCOTT:

A joint resolution (S. J. Res. 246) to authorize the issuance of a special series of stamps commemorative of the one hundred and fiftieth anniversary of the naturalization as an American citizen of Brig. Gen. Thaddeus Kosciusko; to the Committee on Post Offices and Post Roads.

HOUSE BILL REFERRED

The bill (H. R. 14363) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1934, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

GOVERNMENT PURCHASE OF AMERICAN GOODS—AMENDMENT

Mr. WAGNER submitted an amendment intended to be proposed by him to the bill (H. R. 10743) to require the purchase of domestic supplies for public use and the use of domestic materials in public buildings and works, which was ordered to lie on the table and to be printed.

AMENDMENT TO TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. KING submitted an amendment intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 16, line 16, after the word "each," to insert the following: ": *Provided further*, That no refund in excess of $20,000 shall be paid until the determination by the Commissioner of Internal Revenue of the overpayment has been transmitted to and approved by the United States Board of Tax Appeals, under such rules as it may prescribe; and the commissioner shall disallow the part thereof not so approved."

WILLIAM B. THOMPSON

The PRESIDING OFFICER (Mr. FESS in the chair) laid before the Senate the amendment of the House of Representatives to the bill (S. 284) for the relief of William B. Thompson, which was, on page 1, line 6, after "$562.80," to insert "in full settlement of all claims against the Government."

Mr. TOWNSEND. I move that the Senate concur in the amendment of the House.

The motion was agreed to.

SILVER AS SUPPLEMENTARY CURRENCY

Mr. WHEELER. Mr. President, I ask leave to have published in the RECORD an article appearing in the Washington (D. C.) Herald, in its issue of January 30, 1933, entitled "Horne Radios United States Plea for Use of Silver."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington (D. C.) Herald of January 30, 1933]

HORNE RADIOS UNITED STATES PLEA FOR USE OF SILVER—FORMER BRITISH CHANCELLOR OF EXCHEQUER SAYS BIMETALLISM WOULD HELP STABILIZE

NEW YORK, January 29.—Sir Robert Horne, former British Chancellor of the Exchequer, in a radiobroadcast from London today expressed the belief that a larger use of silver as a supplementary currency would aid stabilization.

Sir Robert's talk was broadcast here over a National Broadcasting Co. network. He spoke under the auspices of the International Radio Forum.

TELLS OF CONDITIONS

He said in part:

"The whole world is in a condition of confusion. All mankind is in deep distress.

"The trade of the world has shrunk to a skeleton of what it was. Internal production has withered in most countries. These conditions sufficiently explain the appalling statistics of unemployment.

"To relieve the situation the United States has embarked on many schemes for expanding credit. In Britain we have taken the course of making the interest on money lent by the banks so low that the large mass of people may borrow freely. Unfortunately in both countries there are delaying factors. People have not yet acquired confidence.

"I rejoice at the invitation which the Government of the United States has recently conveyed to British ministers to send representatives to a meeting at Washington to discuss, among other things, monetary policies.

"THE SILVER QUESTION

"There is another important topic upon which I personally hope our two countries may possibly be found collaborating. That is the question of silver.

"It should be kept in mind that one-half the population of the world in India and China hold silver as their sole value for investment. Depreciation in silver has lessened the values of savings of thousands of millions of people in the east, and has imposed a check upon purchases which would have been made from the factories of America and Great Britain.

"If some of the leading nations were to adopt again the bimetallic standard of silver and gold this disintegrating process would be reversed."

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

Mr. McKELLAR. Mr. President, I want to discuss for a few minutes the provision in the bill which is to be found on page 57. The words are to be found in lines 4 and 5, as follows:

Provided, That no part of the money herein appropriated shall be paid on contract numbered 56 to the Seatrain Co.

The House inserted that language and the Senate Committee on Appropriations have struck it out, and the question arises on the approval of the action of the committee in striking out the language. I think the language ought to remain in the bill so that no payments can be made to the company under the appropriation.

Mr. President, let me briefly review, if I may, the Seatrain contract. The Seatrain Co. was organized some years ago by a Mr. Brush, who seems to be president of it. He undertook at first to organize in this country but did not succeed. Thereafter he organized a company in Canada or with Canadian capital. The ship, which is a kind of ferryboat with a capacity for carrying 90 freight cars, was built in England for the purpose of plying between New Orleans and Habana, Cuba. The ship was put under the British flag, of course. It was built in Great Britain, it was capitalized by Canadian money, and it was put under a foreign flag, naturally, and began operation.

After it began business it seems that Mr. Brush, the president of the company, felt that because he was an American citizen it ought to have the subsidy for carrying the mails. The fact was that two companies already had subsidies for carrying the mails from New Orleans to Habana, Cuba. One of the witnesses testified that the first company which obtained the contract carried about 1,500 pounds of mail a year, but the Post Office Department felt that the facilities were not sufficient and employed another company, making a contract providing some $400,000 a year to aid in carrying that 1,500 pounds of mail to Habana.

Then came the Seatrain Co., which at that time was a British company flying the British flag. Of course, it had no right to a subsidy, but Mr. Brush seems to have had great influence with the department. Negotiations were begun by which Mr. Brush sought a contract for the British company for carrying the mail from New Orleans to Habana. Of course, it could only operate in foreign commerce. It could not operate in coastwise shipping under our laws, but that did not seem to make much difference to Mr. Brush. The result was that Mr. Brush applied to the Postmaster General for the subsidy. He did not obtain it. It seems that the department finally concluded that inasmuch as they flew the foreign flag, although Mr. Brush was an American, the company could not receive the contract.

Thereupon it was suggested, by the Shipping Board apparently, that the Shipping Board would furnish three-fourths of the capital to Mr. Brush to build two other ships of exactly the same kind designed to carry 90 freight cars, the vessels being ferryboats or in the nature of ferryboats. Why any such vessels should be used for carrying United States mails it is almost impossible to conceive; but $600,000

was provided by the Shipping Board, at a low rate of interest, to Mr. Brush to build another ship of the kind that he had built in Great Britain.

Not satisfied with that, the Shipping Board loaned him another $600,000 to build another such ship. In other words, they furnished three-fourths of the money to build these two ships, and the Postmaster General, it seems, promised Mr. Brush that when he got the first one of these ships finished he would be allowed a mail contract.

Mind you, Mr. President, all this time during these negotiations Mr. Brush was acting as the head of the Seatrain Co. that was flying the British flag. The result was, I believe, that one of the ships has now been finished; but, at all events, whether finished or not, the Post Office Department entered into a contract with Mr. Brush on October 31, 1931, by which Mr. Brush was given the third contract to carry the mails from New Orleans to Habana, Cuba. Mind you, Mr. President, two other companies already had similar contracts for carrying the mail. Although the amount of mail is inconsequential, they had postal subsidies for carrying the mail from New Orleans to Habana. In the very nature of things two lines of shipping could have carried the mail; two lines of shipping were more than sufficient; but, even if they were not, it would seem to be a preposterous thing for the American Government to build two more ships in the nature of ferryboats for the purpose also of carrying mail from New Orleans to Cuba. Of course, it was merely the grant of a subsidy to this favored person, Mr. Brush, who seems to have had great influence with the Post Office Department. At all events that is the contract that is now under consideration.

After the new boat was built Mr. Brush found that there was not enough trade to keep his boats busy between New Orleans and Habana. Thereupon the proposal was made to the department that instead of plying only between New Orleans and Habana the boats should be allowed to ply between New Orleans and New York, stopping at Habana en route, and to carry loaded freight cars or empty freight cars, as the case might demand, from New York to New Orleans, stopping at Habana, thus engaging in the coastwise trade. So we have that peculiar situation.

What happened when they made that application? The Postmaster General was careful enough to say at that time, "If you do that you can not have a postal contract; you are debarred from having a postal contract if we let you engage in the coastwise trade." That action was very proper, it seems to me. So the Shipping Board and the Postmaster General required that the Seatrain Co. waive its claim to a subsidy, because they said if the company did not waive it they could not allow it to engage in the coastwise trade. The Seatrain Co. did waive its subsidy, but now Congress is asked to override what it itself did and to appropriate this money, and, if the company can get the Postmaster General and the Shipping Board to agree to it, to change the contract again and allow a subsidy to be paid for engaging in the coastwise trade.

Mr. REED. Mr. President, will the Senator yield for a question?

Mr. McKELLAR. Yes.

Mr. REED. Is it not so that they waived it for only six months, and that the six months will expire before the beginning of the fiscal year for which we are now appropriating?

Mr. McKELLAR. Yes; that is true. But if the Shipping Board and the Postmaster General required the Seatrain Co. in the beginning to waive it there must have been some reason for it; there was some reason for it; and they did waive it for that length of time.

Mr. REED. Mr. President, will the Senator yield for another question?

Mr. McKELLAR. I will yield in a moment. I think the Seatrain Co. ought to be required to waive it as long as they are engaged in the coastwise trade. It is not done for other companies and why should it be done for this company. Let me state what it means.

Mr. REED. Mr. President——

Mr. McKELLAR. I will yield in just a moment.

Mr. REED. Very well; I will speak in my own time.

Mr. McKELLAR. Let me tell you, Mr. President, what it means. This company, plying between New Orleans and New York, is going to be in direct competition with the railroads that now obtain business between those two points. It does not seem to me to be fair to the railroads, in the condition in which they now are, for the Congress to subsidize ships built in this way, to subsidize a line established in this way for the purpose of competing with our railroads that are already operating.

Mr. FLETCHER. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Tennessee yield to the Senator from Florida?

Mr. McKELLAR. I yield.

Mr. FLETCHER. Mr. President, it seems to me that the question comes down to one proposition, which is the gist and substance of the whole matter. We can well lay aside any question of whether the Missouri Pacific Railroad and its officers, with all their political influence, the Sun Shipbuilding Co., with its stockholders and directors and officers, with all their political influence, are for or against this amendment; we can well lay aside the question whether the Florida East Coast Railroad Co. or the Key West Ferry Co. or the coastal shipping interests or the railroads are for or against this amendment; the question is, Shall any Senator favor the giving of a subsidy or subvention to ships engaged in the coastwise trade? That is the whole subject. If we start upon that sort of policy now, this is as good a place as any, but if we are against it, then, we must vote down the amendment reported by the Senate committee. That is the whole question, whether the Senate is willing to vote subsidies or subventions, whatever one may care to call them, benefits, to ships engaged in the coastwise trade or whether we are against doing so. That is what they are doing; they are actually operating their ships in the coastwise trade.

Mr. WATSON. Mr. President, may I ask the Senator a question?

The VICE PRESIDENT. Does the Senator from Tennessee yield to the Senator from Indiana?

Mr. McKELLAR. I yield.

Mr. WATSON. Is this the only coastwise line that is receiving a subvention from the Government?

Mr. McKELLAR. It is not receiving it as yet, but this is the only company that will receive one.

Mr. WATSON. The only one?

Mr. McKELLAR. The only one, so far as I know.

Mr. REED. Mr. President——

Mr. McKELLAR. I yield.

Mr. REED. If I may have the attention of the Senator from Indiana, this company is not receiving any subsidy whatever for coastwise operations. It has a mail contract for service between New Orleans and Habana, which it is performing regularly, and it is entitled to be paid for that. It is performing that service, and has two ships engaged in it, and it can perform the contract and still have a lot of idle time. So, quite regardless of the subsidy allowed, the company has put these ships in their spare time to carrying totally private cargoes to and fro between New York and Habana.

Mr. McKELLAR. It is fair to say, Mr. President, talking about their "spare time" only being used in the coastwise business, that 80 per cent of the business of this concern is in the coastwise trade.

Mr. PITTMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Tennessee yield to the Senator from Nevada?

Mr. McKELLAR. I yield.

Mr. PITTMAN. As I understand, the law with reference to subsidies applies only to ships engaged in foreign commerce?

Mr. McKELLAR. That is right; of course, it applies only to ships engaged in foreign commerce.

Mr. PITTMAN. I should like to ask the Senator a further question.

Mr. McKELLAR. Just a moment, and I will yield. I wish first to call the attention of the Senator to the fact that this company first started out on the representation that it was engaged in commerce between New Orleans and Habana; but, when it found that that was not as profitable as it thought, the company then sought for a permit to engage in the coastwise trade. It has engaged in the coastwise trade; 80 per cent of its business is in the coastwise trade, and it is just picking up this subsidy, if it can get it, as that much lagniappe, as I believe they call it in New Orleans.

Mr. PITTMAN. Does the law require the advertising for bids for such contracts?

Mr. McKELLAR. Of course it does.

Mr. PITTMAN. As I understand, the contract was made under a bid for the route from New Orleans to Habana?

Mr. McKELLAR. That is right.

Mr. PITTMAN. And not from New York to New Orleans by way of Habana?

Mr. McKELLAR. The Senator is entirely right about that; and, by the way, in my judgment as a lawyer, to change this contract without again advertising it would make it void; I have not the slightest doubt about that.

Mr. PITTMAN. Let me call attention to the case of the United States against the Pan-American Co. In that case the United States Government entered into a contract with the Pan-American Co. to sink offset wells along the line of oil reserve No. 1. That was advertised, as was required, and the Pan-American Co. made a bid and obtained the contract. Subsequently the United States Government attempted to change that contract without advertising the change; it attempted to extend the contract to the entire reserve and enter into a contract for the entire reserve; but the Supreme Court of the United States held that that new contract was absolutely void. Now, a suit has been started to declare the original contract void. If we should allow the Postmaster General to change this contract without advertising again—and that is the purpose, I suppose, of the proposal to strike out the House provision—it would be a violation of the law, as it was violated with regard to oil reserve No. 1, which the Supreme Court declared was absolutely null and void.

Mr. McKELLAR. I remember that case; I think the Senator is exactly right about it, and I am happy that he has brought the case forward.

Mr. TYDINGS. Mr. President——

Mr. McKELLAR. I yield to the Senator from Maryland.

Mr. TYDINGS. Will the Senator state what the amount of this contract in money actually is?

Mr. FLETCHER. It is $240,000 a year.

Mr. McKELLAR. It amounts to $240,000 a year, aggregating just $2,400,000 in the 10-year term if the contract shall be entered into.

Mr. TYDINGS. Mr. President, will the Senator yield further?

Mr. McKELLAR. I yield.

Mr. TYDINGS. The basis of this contract is, of course, that it serves the public?

Mr. McKELLAR. Yes.

Mr. TYDINGS. To what extent does the service rendered by the Seatrain Co. duplicate services already in effect, thereby making it unnecessary?

Mr. McKELLAR. There are two companies already that hold contracts for carrying the small amount of mail that is transported between New Orleans and Habana. I think there are three companies already carrying mail from New York to Habana.

Mr. TYDINGS. Mr. President, is it not a fact also that airplanes are carrying the mail from the United States to Habana?

Mr. McKELLAR. My recollection is that they do; that Habana is on the direct route.

Mr. TYDINGS. So we have airplanes, the Seatrain boats, and the regular lines that have been running before the Seatrain boats were constructed?

Mr. McKELLAR. I think we have got everything except a tunnel under the Gulf of Mexico between Key West and Habana.

Mr. REED. Mr. President——

Mr. McKELLAR. I yield to the Senator from Pennsylvania.

Mr. REED. If I may have the attention of the Senator from Maryland, I gather that he does not approve of the competition, and that if there exists a service to-day he sees no reason why a competing service should be authorized?

Mr. TYDINGS. And according to the Senator's logic he would be in favor of having 10 more subsidies of the same kind to provide for doing the same work which one line can do.

Mr. REED. If we already had the competition, I would not expend money in order to get other competition.

Mr. TYDINGS. The Senator has argued that we ought to go ahead and encourage competition.

Mr. REED. If the Senator from Tennessee will permit me further, this company does not carry any mail between New York and Habana; it is not receiving any money for that; it has a contract for carrying mail between New Orleans and Habana, which service it has been performing.

Mr. TYDINGS. I am aware of that; and I say that we could very well do without this company carrying the mail and save the taxpayers a quarter of a million dollars a year. In my judgment, this contract was conceived not to benefit the people of America but to make money for the company that built the seatrains.

Mr. REED. Does the Senator think, the contract having been entered, that——

Mr. McKELLAR. Mr. President, I must ask my friends to allow me to proceed. I have only a few minutes.

Mr. REED. The Senator has been speaking on this question since we met, and we have an agreement to vote at 1 o'clock. Is the Senator going to give us any time?

Mr. McKELLAR. Oh, yes; I will. I shall be through in just a few moments. I have no desire to take up time—not a particle.

Mr. President, the Senator says this company does not propose to carry mail from New York to Cuba. I do not suppose it does; and, in like manner, it does not propose to carry mail from New Orleans to Cuba. Why do I say that? Why, who in the world, what reasonable man, what man with the intelligence of the ordinary moron, official of the Government or otherwise, would ever select a ship like this—a ferryboat for freight cars—to carry the mail? Who in the world would ever think of putting mail on a ship of that sort? The idea is preposterous. We all know that. The Senator would no more permit a letter that he might write to the ambassador to Cuba, for instance, or to some friend in Cuba, to go on such a boat as that than he would think of flying to heaven.

Mr. WALSH of Montana. Mr. President——

The VICE PRESIDENT. Does the Senator from Tennessee yield to the Senator from Montana?

Mr. McKELLAR. I do.

Mr. WALSH of Montana. Will the Senator tell us how much mail this line does carry and what revenue it receives?

Mr. McKELLAR. I regret that I can not, for this reason: While this company has been for a long time seeking this contract—apparently that has been the principal business of the president of the company for a number of years, seeking this subsidy from the Government or from the departments here—while that is the case, they have never carried any mail yet; or, if they have carried any mail, no report has been made of it. My recollection is, however, from the hearings, that the first company carried about 1,500 pounds of mail a year from New Orleans to Habana; and I think it got about the same amount, $240,000 a year, for carrying it across there. Then that was such a burden upon that company that the Postmaster General and the

Shipping Board got together and gave another contract to divide up the work, and the second concern also received a subsidy of about $240,000 a year for that, as I remember the figures. I believe one of the companies received $400,000 a year; but that is immaterial. At any rate, it was a very large sum.

Now, having two ship lines to carry the mail from New Orleans to Habana, they come with a third. As I said before, as a carrier of mail, it is something that can not be considered for a moment. It is just in the nature of a subsidy for building up that kind of a ship line.

Mr. BROUSSARD. Mr. President——

The VICE PRESIDENT. Does the Senator from Tennessee yield to the Senator from Louisiana?

Mr. McKELLAR. Yes; I yield.

Mr. BROUSSARD. When the amount referred to by the Senator was paid there was no subsidy. It was for carrying the mail by space.

Mr. McKELLAR. Perhaps that may have been. My recollection is that the whole amount paid for carrying the mail between these places was just a few thousand dollars, and now it will cost us something like twelve hundred thousand dollars a year to transport the mail by these three companies from New Orleans to Habana. It is a wicked waste of the American people's money, and I do not see how this body can go on record as thus wasting the money of the people.

I hope the Senate will vote down this amendment, which means keeping the provision of the House in the bill. I think it ought to be done. I think it ought to be done in justice to the taxpayers of America. I do not believe the amendment will help our foreign trade a particle. We see how it helps our foreign trade when we find this company going out of the foreign trade and getting into the domestic trade of the country, using this merely as a subterfuge, as a pretext for taking a Government subsidy.

Mr. BROUSSARD. Mr. President——

The VICE PRESIDENT. Does the Senator from Tennessee yield to the Senator from Louisiana?

Mr. McKELLAR. In just a moment I will yield.

It reminds me of an aircraft company, the Pan American Aircraft Co. One of its officers is reported to have said—and I can see how he might have said it—that the principal reason for running an air line around America at this time was to draw the subsidy of $7,000,000 that the Government gave it.

Now I yield to the Senator from Louisiana.

Mr. BROUSSARD. Mr. President, does the Senator consider a sailing from Habana to New York coastwise trade?

Mr. McKELLAR. No; but from New Orleans to New York, the two points between which the Seatrain service is going, is coastwise trade.

Mr. BROUSSARD. Oh, no; that is not involved here at all.

Mr. McKELLAR. I have received many protests against the Government subsidizing this line for the purpose of carrying freight cars when we have railroads that are almost nearing bankruptcy doing the same business and competing with this subsidized American line. I do not think it is just, I am frank to say. I differ from the Senator. I am sorry I do, because I love him; but I differ from the Senator about this matter. I do not think the American Government ought to subsidize this Seatrain Line under any circumstances; but certainly when it is in the coastwise shipping business, and does not come within the law, and when it has waived its own contract——

Mr. BROUSSARD. I hope the Senator will come down to the question whether or not a sailing from Habana to New York is coastwise trade.

Mr. McKELLAR. No; I said it was not, from Habana to New York.

Mr. BROUSSARD. All right.

Mr. McKELLAR. But those ships run between New Orleans and New York and merely touch at Habana.

Mr. BROUSSARD. Oh, no; they run to Habana.

Mr. McKELLAR. Then they have misled the members of the committee who examined them on the stand.

Mr. BROUSSARD. They have not misled anybody.

Mr. McKELLAR. They operate from New York, and 80 per cent of their business is coastwise shipping.

Mr. BROUSSARD. They have never had a ship go to New York yet.

Mr. McKELLAR. That is what they propose to do if they are allowed to do it.

Mr. BROUSSARD. That is what they propose to do, and that is what they have amended their contract to do.

Last Saturday, I think, the Senator from Tennessee said that he thought 5 legal contracts had been entered into by the Shipping Board and the Post Office Department and 39 illegal contracts.

Mr. McKELLAR. I think so.

Mr. BROUSSARD. Why not abrogate the law if that is the case?

Mr. McKELLAR. I will vote to abrogate the law any time in the world, and have introduced a bill to that effect; but I can not get the Senate to pass it, so we are trying to hold them within the law as far as we can.

Mr. BROUSSARD. All that you are trying to do now is to violate a legal contract entered into under authority of the Congress of the United States.

Mr. McKELLAR. Mr. President, I have stated all that I think I should state.

Mr. HOWELL. Mr. President——

The VICE PRESIDENT. Does the Senator from Tennessee yield to the Senator from Nebraska?

Mr. McKELLAR. I ought not to take up all the time. Other Senators want to talk about this matter, and I am going to yield the floor. I yield to my friend over here.

Mr. HOWELL. Mr. President, under the present law was the granting of this subsidy legal?

Mr. McKELLAR. Does the Senator mean to ask whether this particular contract was legal?

Mr. HOWELL. Yes.

Mr. McKELLAR. I think this particular contract is void for another reason: The Postmaster General advertised it in such a way that no company on the face of the earth except the Seatrain Co. could bid on it, and the subsidy act requires competition. Under those circumstances I think the contract is void, because it has not been properly advertised.

Mr. BROUSSARD. Mr. President——

Mr. McKELLAR. That, however, is a matter about which men may differ, and I do not want to pursue it any further.

Mr. HOWELL. Mr. President, I understand that this subsidy has been suspended for six months.

Mr. McKELLAR. Yes; by contract of the Seatrain Co. itself. It agreed to that because the Shipping Board would not let it go into the coastwise trade unless it did yield on that point and forego the subsidy. By special agreement, that ends in May, 1933.

Mr. HOWELL. In other words, there is a question as to whether this subsidy is legal under the law?

Mr. McKELLAR. It can not be legal if this line is engaged in coastwise shipping; and unquestionably it is engaged in coastwise shipping.

Mr. BROUSSARD. It is not, Mr. President.

Mr. HOWELL. In other words, the purpose of this provision in this bill is to extend the right of subsidy?

Mr. McKELLAR. Yes; to those engaged at least 80 per cent in coastwise shipping.

Mr. REED, Mr. BROUSSARD, and Mr. TRAMMELL addressed the Chair.

The VICE PRESIDENT. Does the Senator from Tennessee yield, and if so to whom?

Mr. McKELLAR. I promised to yield to the Senator from Louisiana.

Mr. BROUSSARD. Mr. President, then the question involved here at this moment is whether or not this is a legal contract. I will propound several questions to the Senator at one time, and let him answer them.

Mr. McKELLAR. All right. I may not be able to do it, but I will try.

Mr. BROUSSARD. First, is a sailing from Habana to New York coastwise trade?

Mr. McKELLAR. I have answered that question several times some time ago. It is not if the line sails only between those two points; but, as a matter of fact, this line sails between New Orleans and New York, merely stopping at Habana, and of course it is engaged in the coastwise trade.

Mr. BROUSSARD. I want to say to the Senator from Tennessee that that is not a fact as I understand it; but, if it were a fact, they have agreed, under a contract, to collect only such part of the sum provided by the contract as applies to the mail to Habana.

Mr. McKELLAR. Yes; I know.

Mr. BROUSSARD. And the coastwise trade would affect it in no respect at all.

The other part of the question is this: The Senator stated a while ago that no other company could bid. That is not the fact. The facts are that the Government officials held this contract open for a whole year to permit anybody else to bid on sailing from New Orleans to Habana, and no other company agreed to build new ships. The Senator, of course, knows that these contracts are awarded to ships that are sold by the Shipping Board with an obligation to alter them, or to new ships. The Flagler Line, whose ships running from Florida had a capacity of 15 cars, wanted to come to New Orleans in order to get this contract. Under the law they could not get it.

The VICE PRESIDENT. The Chair suggests to the Senator from Tennessee that he can yield only for a question. The time for debate expires at 1 o'clock.

Mr. McKELLAR. Then I yield to the Senator from Florida, and then I will surrender the floor. I have finished.

Mr. REED. Mr. President——

Mr. TRAMMELL. Mr. President, I just want to ask the Senator——

Mr. REED. Mr. President, a point of order. Who has the floor?

The VICE PRESIDENT. The Senator from Tennessee yielded for a question to the Senator from Florida. The Chair understands, however, that the Senator from Tennessee has yielded the floor. The Chair recognizes the Senator from Pennsylvania.

Mr. BROUSSARD. Mr. President, I was speaking.

The VICE PRESIDENT. The Senator did not have the floor. The Senator has no right to speak without having the floor or being yielded to.

Mr. BROUSSARD. I was up, and the Senator from Tennessee had not yielded the floor.

The VICE PRESIDENT. The Senator from Pennsylvania has the floor.

Mr. BROUSSARD. I thank the Chair.

Mr. REED. I am glad to yield to the Senator for a question, Mr. President.

Mr. TRAMMELL. Mr. President, what I wanted to ask the Senator from Tennessee was if the original contract for the loan from the Shipping Board and for the subsidy was not made through the Postmaster General upon the proposition of operating a steamer, or line of steamers, from New Orleans to Habana. That was the original contract. Is that true?

Mr. McKELLAR. That is true.

Mr. REED. No, Mr. President; there were two contracts, one with the Shipping Board and one with the Postmaster General. The one with the Shipping Board provided for running from Gulf or Atlantic ports to Habana and other ports. It was quite broad. The one with the Postmaster General provided for the carriage of mail between New Orleans and Habana.

Mr. McKELLAR. Mr. President——

Mr. REED. If Senators will permit me to have a little of my own time, I think I will answer the Senator's question.

Mr. TRAMMELL. Mr. President, I should like to ask the Senator a question.

Mr. REED. This makes a nice duet. I wonder what the Reporter is getting.

Mr. TRAMMELL. That was the original proposition upon which the original contract was entered into. The situation is a different one now. The situation now is that they do not wish to carry out their original contract, but they are asking for a modification of it for an entirely different proposition, to operate from New Orleans to Habana, and from Habana to New York.

Mr. REED. Mr. President, in answer to the Senator's question, I say the answer is, no; that is not the fact.

Mr. McKELLAR. Mr. President——

The VICE PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from Tennessee?

Mr. REED. I do.

Mr. McKELLAR. The Senator from Pennsylvania would not want to make a mistake about what the contract provides. It is to carry all mails of the United States between New Orleans and Habana, Cuba.

Mr. REED. The Senator did not listen to me. That is exactly what I said. I said the contract with the Shipping Board provided for sailings from Gulf and Atlantic coast ports and in foreign trade.

Mr. President, there are only 15 minutes left before the time set for taking the vote; and Senators will understand that it is not through a desire to be rude on my part, but because I am pressed for time that I do not yield for further interruptions.

This Seatrain Co. is American owned. It has built two vessels of a novel design, which carry freight cars without unloading them. It is the only car ferry of importance in America to-day doing service on the Atlantic Ocean. I am aware that there are some small exceptions, but nothing of importance. These are boats of a new design, into which the loaded freight car is placed and carried across the sea. The car itself is unloaded from the steamer, but the contents of the car travel without disturbance from the point of origin to their ultimate destination.

The Army is of opinion that the existence of these two ships would be of the very highest importance in possible national emergency.

The ships have been built exclusively with American money. The ownership is American, as I have said. They fly the American flag. It is true that a predecessor of this company did at one time endeavor to operate with some British capital, but the owners of that British capital, I am told, have been wholly repaid, and the Seatrain Co. is an American concern whose ships fly the American flag.

They made their contract with the Shipping Board, which provided for the construction of these two vessels on the usual terms of advances by the Government toward construction. Among the securities for those advances is this postal contract, which they subsequently made, then believing it to be, and still believing it to be, in entire accordance with the law.

It so happened that the slump hit them when they began their service, and the amount of freight to be carried between Habana and New Orleans was not so great as they had expected. They found that they could perform their mail contract efficiently, in strict accordance with the letter of the mail contract, and still have so much idle time for these two vessels that they would be able to get in a further voyage each time from Habana to New York, and they applied to the Shipping Board, whose consent they had to have, for permission to extend their voyage in that way.

They made no contract for carrying mail between New York and Habana. They carry no mail between New York and Habana, or between New York and New Orleans. They carry mail only between Habana and New Orleans.

When they applied for the right to extend their private operation on to New York City, that raised a hornet's nest. For 50 years, probably, the Morgan Line, which is owned by the Southern Pacific Railroad Co., has had a practical monopoly of carriage by water between New Orleans and New York, and they have fought like tigers to keep that monopoly every time any competition has appeared over the horizon.

Back before the World War, about 1910, there was a little concern in my State, in Philadelphia, which tried to organize a shipping service between Philadelphia and New

Orleans, which would have come into competition with the Morgan Line, and the Southern Pacific went after it so hard, and used such improper methods in their competition, that they drove that little concern into bankruptcy in three years. I am not making that statement on my own authority, but on the authority of the findings of the Interstate Commerce Commission, which sat on an application by the Southern Pacific shortly thereafter for some extension of the service they had applied for, relying on the fact that this Pennsylvania concern had gone out of business. The Southern Pacific has a monopoly there, and they are going to fight to the last ditch to hold it.

Besides that, this company stepped on some other people's toes, because the Florida East Coast Railroad now has practically a monopoly of the all-rail traffic between New York and Habana. They take the cars down to Key West or Miami—I do not remember which—put them on the car ferry there, and run them across the straits of Florida, that short trip, and not only was the Southern Pacific aroused to protect its monopoly, but the Florida East Coast Railroad saw freight cars being carried down, without transshipment, from New York to Habana, and so both those competitors of the Seatrain Co. went to work.

The Seatrain Co. applied for permission to extend its sailings on strictly private terms, and without interfering with the mail contract, on from Habana northward to New York. They advertised their first sailing for 3 o'clock in the afternoon of October 6, 1932. As I have said, they had applied to the board previously, some 10 days before. The board fixed their meeting to consider that proposition for 5 o'clock in the afternoon of October 6, two hours after the time advertised for the sailing.

When they met they notified the Seatrain Co. that while they had no objection to their extending the service to New York in the way proposed they would not let them sail a ship until they had agreed to forego every cent of compensation due them from the American Government for carrying the mail between New Orleans and Habana. In other words, with darkness coming on, on the day set for the sailing of that ship, an ultimatum was handed down here in Washington to this effect, "You can not budge your loaded ship unless you forego for all the time of the permit every cent you are entitled to for the service between these totally different ports in the Gulf of Mexico."

The company, with the Shipping Board's hand on its throat, did what it had to do. It said, "Very well, we will agree to do the service for nothing; we will carry your mails for nothing rather than be choked out of the business this way."

The Postmaster General then began to assert his authority. He said, "It is none of the Shipping Board's business to get my mail carried for nothing. I have made a contract, and the Shipping Board has no right to interfere with it. If the contract is illegal the Comptroller General will say so and the Attorney General will say so. If the contract is not performed, I will say so and the Comptroller General will say so. But the Shipping Board has no right whatsoever to abrogate my mail contracts or to make a condition of their action the surrender of a contract outstanding with me."

After considerable discussion the Shipping Board gave in and retracted their statement. The board realized its mistake and its lack of authority and rescinded that portion of the resolution relating to the mail pay.

The Seatrain Co., in the hope of being able to settle this thing to the satisfaction of all Government authorities, came in and said, "We will accept a reduction in our mail pay by that percentage which our coastwise trade constitutes of all our trade. We do not want, even by implication, to have it said that we are being subsidized for a coastwise trade."

That proposition appealed to the Postmaster General, and the present understanding between him and the company is that this mail pay will be abated by just that percentage which the New York-New Orleans business constitutes of the total business of the company. The Postmaster General is entirely satisfied with that.

Now, Mr. President, the Senate is faced with this question, whether an existing contract is to be abrogated by congressional action because we, had we been in the Postmaster General's place, would not have made such a contract, or whether these questions of illegality, or absence of advertisement, are to be left to be decided judicially. The question is whether we shall be the prosecuting attorney and the court, or whether we shall allow our Department of Justice, and our Federal courts, and our Comptroller General, to function as we intended them to function when we created those offices.

I do not know whether I would have made such a contract as the one in question had I been in the shoes of the Postmaster General. When I remember the bearing on the national defense the existence of these ships is bound to have, I think that perhaps I would have made the contract. But that is not the question. We are not in a position to judge; and when the Senator from Nevada suggests that perhaps this ought to have been advertised in a different way from what it was advertised, that again is a judicial question. We are in no position to pass upon those things. We do not know enough about the facts, and we have created courts for the purpose of disposing of just such questions.

Mr. COUZENS. Mr. President, will the Senator yield?

Mr. REED. I yield.

Mr. COUZENS. Would there be any objection, then, to leaving this item out until it shall have been settled in a judicial manner?

Mr. REED. It will have to be settled in a judicial manner before any payment is made. The Comptroller General is not going to authorize any payment until he is satisfied that this contract is legal.

Mr. COUZENS. Why not leave the item out of the legislation, then, until the matter shall have been determined and then legislate?

Mr. REED. How can any payment go up to the Comptroller General until we have made an appropriation for it? The question would never get to him unless we made an appropriation.

Mr. COUZENS. I understand; but there will be time enough between now and the effective date of the appropriation to have the matter determined.

Mr. REED. But unless we make the appropriation, unless we strike out the proviso, the question never can get to the Comptroller General. He will not pass on a moot question like that.

Mr. COUZENS. I quite understand, but I am not deceived by the suggestion of its being moot. I say that if the case shall be decided judicially in favor of the Seatrain Co., we can then legislate.

Mr. REED. Oh, yes; we can say that we are going to send this company into receivership by refusing to pay under our existing contract, so that the receiver then can bring suit in the Court of Claims, if we pass a special act to allow him to, and some day 8 or 10 years from now it will be decided that we were wrong, and then we will make an appropriation. But that is not the honest way to go about it.

Mr. FLETCHER. Mr. President, will the Senator yield?

Mr. REED. I yield.

Mr. FLETCHER. I want to ask the Senator whether or not it is not true that the original contract provided for service between New Orleans and Habana?

Mr. REED. It did; and that is the service that is being rendered.

Mr. FLETCHER. That being true, and the compensation for that service being fixed at $240,000 a year, is it not proposed to change that contract so completely in two essential respects as to enable them to do business between New Orleans and New York, a coastwise business?

Mr. REED. Not in the least.

Mr. FLETCHER. Mr. President——

Mr. REED. I can not yield further. I have only one minute more. It is not proposed to change the contract at all. The service called for by the contract is being performed, and will go on being performed; and the Seatrain Co., hav-

ing gotten the permission of the Shipping Board to go on to New York, it is no more the business of the Postmaster General than if they took their ships outside of Habana Harbor and sailed them around in a circle. As long as those ships perform faithfully the contract they have with the Post Office Department, it is no concern of the Post Office Department whether they lock them up in Habana Harbor or go on to New York.

The VICE PRESIDENT. The time of the Senator from Pennsylvania has expired.

Mr. McKELLAR. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Cutting	Kendrick	Schuyler
Austin	Dale	Keyes	Sheppard
Bankhead	Davis	King	Shipstead
Barbour	Dickinson	La Follette	Shortridge
Barkley	Dill	Logan	Smoot
Bingham	Fess	Long	Steiwer
Black	Fletcher	McGill	Stephens
Blaine	Frazier	McKellar	Swanson
Borah	George	McNary	Thomas, Idaho
Bratton	Glass	Metcalf	Thomas, Okla.
Brookhart	Glenn	Moses	Townsend
Broussard	Gore	Neely	Trammell
Bulkley	Grammer	Norbeck	Tydings
Bulow	Hale	Norris	Vandenberg
Byrnes	Harrison	Nye	Wagner
Capper	Hastings	Oddie	Walcott
Caraway	Hatfield	Pittman	Walsh, Mass.
Carey	Hawes	Reed	Walsh, Mont.
Connally	Hayden	Reynolds	Watson
Coolidge	Howell	Robinson, Ark.	Wheeler
Copeland	Hull	Robinson, Ind.	White
Costigan	Johnson	Russell	
Couzens	Kean	Schall	

The VICE PRESIDENT. Ninety Senators have answered to their names. A quorum is present. The question is on the committee amendment.

Mr. REED. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will State it.

Mr. REED. A vote "yea" will sustain the action of our Appropriations Committee, will it not?

The VICE PRESIDENT. That is correct.

Mr. McKELLAR. I demand the yeas and nays.

The yeas and nays were ordered.

Mr. KING. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. KING. A vote "nay" will sustain the action of the House, will it not?

The VICE PRESIDENT. That is correct.

Mr. BLACK. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. BLACK. I am confused by the statements. Does a vote "yea" mean a vote for or against the subsidy?

The VICE PRESIDENT. A vote "yea" means to sustain the Senate committee and a vote "nay" sustains the action of the House.

Mr. BLACK. Did the Senate committee amendment strike out the provision for a subsidy?

The VICE PRESIDENT. The House provision struck out the subsidy, and the Senate committee amendment strikes out the House provision. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WAGNER (when his name was called). I have a pair with the junior Senator from Missouri [Mr. PATTERSON], who I understand is absent because of a death in his family. If he were present, he would vote "yea." If I were permitted to vote, I would vote "nay."

Mr. WATSON (when his name was called). I transfer my general pair with the senior Senator from South Carolina [Mr. SMITH] to the junior Senator from Maryland [Mr. GOLDSBOROUGH] and vote "yea."

The roll call was concluded.

Mr. HASTINGS. On this question I have a pair with the junior Senator from Illinois [Mr. LEWIS]. Not knowing how he would vote, I withhold my vote.

Mr. FESS. I desire to announce that the Senator from Rhode Island [Mr. HEBERT] has a general pair with the Senator from North Carolina [Mr. BAILEY].

Mr. REYNOLDS. I wish to announce that my colleague the senior Senator from North Carolina [Mr. BAILEY] is necessarily out of the city. As just announced by the Senator from Ohio, he has a general pair with the Senator from Rhode Island [Mr. HEBERT]. If my colleague were present, he would vote "nay."

Mr. WAGNER. I am informed that I can transfer my pair with the junior Senator from Missouri [Mr. PATTERSON] to the junior Senator from Massachusetts [Mr. COOLIDGE], which I do, and vote "nay."

Mr. WALSH of Massachusetts. I desire to announce that my colleague the junior Senator from Massachusetts [Mr. COOLIDGE] is necessarily detained on official business.

Mr. SHEPPARD. I wish to announce that the junior Senator from Illinois [Mr. LEWIS] is necessarily absent on official business.

The result was announced—yeas 34, nays 53, as follows:

YEAS—34

Austin	Fess	Metcalf	Smoot
Barbour	Glenn	Moses	Steiwer
Bingham	Grammer	Norbeck	Townsend
Broussard	Hale	Oddie	Vandenberg
Carey	Hatfield	Reed	Walcott
Copeland	Johnson	Robinson, Ind.	Watson
Dale	Kean	Schall	White
Davis	Keyes	Schuyler	
Dickinson	McNary	Shortridge	

NAYS—53

Ashurst	Costigan	Kendrick	Sheppard
Bankhead	Couzens	King	Shipstead
Barkley	Cutting	La Follette	Stephens
Black	Dill	Logan	Swanson
Blaine	Fletcher	Long	Thomas, Okla.
Borah	Frazier	McGill	Trammell
Bratton	George	McKellar	Tydings
Brookhart	Glass	Neely	Wagner
Bulkley	Gore	Norris	Walsh, Mass.
Bulow	Harrison	Nye	Walsh, Mont.
Byrnes	Hawes	Pittman	Wheeler
Capper	Hayden	Reynolds	
Caraway	Howell	Robinson, Ark.	
Connally	Hull	Russell	

NOT VOTING—9

Bailey	Hastings	Lewis	Smith
Coolidge	Hebert	Patterson	Thomas, Idaho
Goldsborough			

So the amendment of the committee was rejected.

Mr. LONG obtained the floor.

Mr. TYDINGS. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Louisiana yield to the Senator from Maryland?

Mr. LONG. I will yield to the Senator for a question.

Mr. TYDINGS. Will the Senator yield a couple of minutes while the result of the vote is before us? I wish to make a very brief statement.

Mr. LONG. Very well; I yield to the Senator from Maryland.

Mr. TYDINGS. I thank the Senator from Louisiana. I just want to observe that over on the other side of the Chamber, when I attempted to withdraw my economy motion the other day, there were numerous Senators who rose and told how anxious they were to vote upon that proposition. First, there was my good friend the senior Senator from Utah [Mr. SMOOT], who said we had marched up the hill and then marched down again. He was wild to pour out his wrath upon governmental expenditures and extravagance which had marked this and other Congresses. But I notice that at the very first opportunity on the very first vote tending to bring about any kind of economy the Senator from Utah, without even making a sortie, voted "yea" on the question just before the Senate and therefore against a saving for the Government.

There was my good friend the junior Senator from Michigan [Mr. VANDENBERG], who also made sport of my position on the floor in reference to economy. He, too, was wild to vote for economy, and he regretted that the Senator from Maryland had changed his position and "about faced"; but when we have a specific proposition before us, I note that

the Senator does not vote to economize, although he was eager to support the proposition that was pending. And last, but not least, there is my good friend from Delaware [Mr. HASTINGS]; he took me to task for not being sound; he has come prepared to support the proposition, and lions and horses could not hold him back in his desire to give the people relief from the burden of taxation; but, lo and behold, when his name is called, he rises and says, "I have a general pair with the Senator from so-and-so; not knowing how he would vote, I withhold my vote." He does not even tell us how he would vote if he had the opportunity.

Mr. REED. Mr. President, will the Senator yield for a question?

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. The Senator from Louisiana has the floor. Does he yield; and if so, to whom?

Mr. LONG. I yield first to the Senator from Utah.

Mr. SMOOT. Mr. President, I have no apology to offer for the vote I have just cast. So long as the Government of the United States enters into a solemn contract, I want the Government of the United States to carry out the terms of that contract, just as I myself would expect to carry out any contract into which I entered. That is the reason I voted as I did.

Mr. REED. Mr. President, will the Senator from Louisiana yield to me?

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Pennsylvania?

Mr. LONG. I yield to all the Senators mentioned by the Senator from Maryland.

Mr. REED. I did not have the honor of being mentioned by the Senator from Maryland, but I should like to make a statement.

Mr. LONG. I yield.

Mr. REED. Mr. President, the Republican Party votes for upholding solemn contracts which its Government has entered into. It does not advocate economy on Thursday and retreat on Friday and come back and vote for what it calls economy on Monday, but it is consistent all along; and when we do vote for economy, we do not vote in order to perpetuate a monopoly of the Southern Pacific Railroad and the Florida East Coast Railroad.

Mr. TYDINGS. Mr. President, will the Senator from Louisiana yield to me?

Mr. LONG. I yield for one minute.

Mr. TYDINGS. The Senator from Pennsylvania dresses up the word "contract" with the adjective "solemn." I think if you will examine into the hearings, the adjective "fraudulent" would be a much more appropriate one to apply. [Laughter.]

Mr. FLETCHER. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. FLETCHER. What is the next amendment to the pending bill?

The PRESIDING OFFICER. The next amendment has not, as yet, been stated. The Senator from Louisiana has the floor.

LOUISIANA SENATORIAL ELECTION—PERSONAL EXPLANATION

Mr. LONG. I send to the desk and ask the clerk to read a dispatch from the Washington Herald of Sunday, January 29, 1933, beginning with the headline "Senate to Send Election Probers into LONG's State."

The PRESIDING OFFICER. Without objection, the clerk will read as requested.

The legislative clerk proceeded to read the article and read as follows:

NEW FRAUD CHARGE IN LOUISIANA BRINGS ACTION—"KINGFISH" IN IT—PAY ROLLS DECLARED PADDED TO FILL WAR CHEST

Aroused by startling new charges of election "racketeering" committed by the Louisiana political machine of Senator HUEY P. LONG, a senatorial investigating committee last night prepared to leave Washington immediately to conduct a sweeping investigation on the scene, the Washington Herald learned exclusively last night.

In a sweeping flank attack on the colorful "Kingfish," the Senate Committee on Campaign Expenditures will go to Louisiana to investigate the recent election of Senator-elect JOHN H. OVERTON, LONG's "crown prince."

ACCUSED BY BROUSSARD

Charges filed by Senator EDWIN S. BROUSSARD following his defeat by OVERTON and complaints by hundreds of Louisianans led to the investigation.

Undercover investigators working under direction of former Brig. Gen. Samuel Tilden Ansell have been in Louisiana for the past month gathering evidence against the Long machine, it was revealed.

Enemies of the "Kingfish" are rushing to battle against OVERTON, confident that if he can be kept out of the Senate, LONG will soon lose his place in the sun.

Among the charges to be investigated by the committee are:

1. A reported doubling of the State highway commission pay roll with one-half the funds going into the anti-Broussard campaign directed by LONG.

Mr. LONG. Mr. President, let me ask that those three charges be read a little more slowly and more distinctly. I want Senators to understand just what these startling charges are.

The PRESIDING OFFICER. The clerk will read, as requested.

The legislative clerk resumed and completed the reading of the article, as follows:

1. A reported doubling of the State highway commission pay roll with one-half the funds going into the anti-Broussard campaign directed by LONG.

2. Alleged irregularities in the appointment of precinct election judges.

3. Imprisonment of three newspapermen opposed to LONG for four days preceding the election.

LONG IS SILENT

Senator LONG had no comment to make on the investigation. Asked if he thought his enemies in the Senate were trying to attack him at home, the Kingfish said:

"They're barking up the wrong tree if they try to get me there."

A feud of long standing between LONG and BROUSSARD sent the Kingfish campaigning throughout the State last fall to obtain the election of OVERTON.

OVERTON, a boon companion of LONG's, was sent to the House of Representatives in 1930 to be groomed for the job of Senator. He was chief defense counsel for LONG in an abortive impeachment attempt when LONG was governor.

BREAK IS COMPLETE

When LONG came to the Senate a year ago, he refused to be escorted to the rostrum by BROUSSARD, in accordance with Senate custom, and since then has refused to cooperate with him.

Questioning of OVERTON's election marks the first major challenge of LONG's control over Louisiana in several years.

General Ansell has had five agents working day and night gathering evidence against the Long machine, it was said. The agents are said to have irrefutable evidence to lay before the committee.

One of the gravest charges laid before the agents was alleged arrests of qualified election judges favorable to BROUSSARD by LONG's "trusty State troopers."

Mr. LONG. Mr. President, that is only a sample of the publicity that has been going on. I myself am going to read a paragraph from the New York Times of January 28, 1933:

Inquiry ordered into Long faction.

I skip and read the following:

Interest has been heightened by Senator LONG's recent activities on the Senate floor in which he has vehemently opposed the leadership of his own party. * * * The contest is expected to develop into a controversy between Senator LONG and the committee of five, headed by Senator HOWELL.

It is stated in the reports, Mr. President—I will not read them all; they come along about one a day, and not always in the same newspapers—that I have been very silent amidst these sundry charges. I have been silent, Mr. President, more than anything else because I thought it was a gracious act, for I have never assailed a defeated opponent; I never after an election was a lion in victory, nor, I hope, have I been a craven in defeat.

FALSEHOODS ABOUT ARRESTS

The first charge which is reiterated and supposed to be published by the newspapers generally is that an organization with which I am connected in Louisiana arrested the election judges of the Broussard faction. A more damnable falsehood was never printed in a newspaper nor uttered anywhere else. My word does not have to be taken for that, Mr. President. When the contest between Representative OVERTON and Senator BROUSSARD started in the Democratic primary, it was stated in the newspapers to begin with that the Broussard element did not expect to win the election in

the State of Louisiana, but they wanted to build up a case to bring to the United States Senate.

On the day before the election a committee came to us, through me, stating that in order to avoid a charge of irregularity they asked that the election to be held in the city of New Orleans be placed in the hands of an arbitration committee composed of two elected from each side. I demanded that they come with responsible authority from Senator BROUSSARD himself. They came back authorized by the Broussard campaign committee asking for an arbitration committee to take charge of the election in the city of New Orleans, wherein it is alleged that these frauds have occurred. They appointed their two; we appointed our two. We made their appointee the chairman of the arbitration committee. We seated the arbitration committee in the mayor's parlor at the city hall. We gave them the police department; we gave them the absolute power to run the arbitration committee in the election, and the Overton men abdicated their functions into the hands of the two Broussard men and allowed them to run the election that day, as I will prove in a moment by written communications from them.

The only men who were arrested were some two or three election-law violators. Every Broussard man except one who was arrested was released immediately from prison and every Long supporter was incarcerated and kept there throughout the day, according to the report of the arbitrators themselves in the Broussard campaign.

Now I want to read a communication from this "honest" election crowd. I want to show what kind of publicity this is and how fair they have been in this matter. I want to show what advantages they have taken of efforts to support people who could not take care of themselves in that State. Mr. President, you do not have to go any further than the Broussard organization to get the proof. I have not been able to assemble all these data; some of what I have, had to be taken down over the telephone this morning; some of it I had, and some has been telegraphed to me; but here is a letter written on the letterhead of Sanders, Baldwin, Viosca & Haspel, which reads as follows:

NEW ORLEANS, *September 28, 1932.*

Hon. JOHN H. OVERTON,
Alexandria, La.

DEAR MR. OVERTON: In reply to your inquiry concerning the membership of the election arbitration committee in the recent primary election, I beg to say that it was understood that this committee should be composed of four members, two representing Senator BROUSSARD and two representing yourself, each side to have the privilege of substituting during the course of the day in order to relieve its members if necessary. Mr. Nicholas Callan and myself represented Senator BROUSSARD, and we did not find it necessary to make any substitution. You were represented at various times during the day by Mr. Michel Provosty, Mr. Bertrand Cahn, Mr. A. Miles Coe, and Mr. William J. Guste. While on some occasions more than two of your representatives were present, you were entitled in any disputes to only 2 votes, but this was of no importance, because, as stated in the written report, all decisions were unanimous. The most friendly feeling prevailed among the members of the committee, and all of them were extremely fair and were willing to make any necessary, reasonable concessions.

The written report is signed by all six of the members who acted from time to time, including myself as chairman of the committee.

Yours very truly,

RENÉ A. VIOSCA,
Chairman Election Arbitration Committee.

That is signed by René A. Viosca, chairman of the election arbitration committee, and a law partner of J. Y. Sanders, the leader of the anti-Long organization at the Chicago convention.

Now I want to read the few concluding lines of the report of this arbitration committee, in which they list everything that happened there during the day. Here is what they say. This is the conclusion. I will not burden the Senate with the whole report but will put it in the RECORD:

The committee began its proceedings at 5.45 a. m. and adjourned at 9 p. m.

All complaints came over the telephone with the exception of the one made by Mr. Garland, who called in person.

All complaints were investigated, fully discussed, and every decision was unanimous. It is the opinion of those members of the committee who have previously served on similar committees that there were far less complaints than in any previous election in recent years, and from the standpoint of the arbitration committee it was the most peaceful and orderly election in many years.

All public officials cooperated fully with the committee with a view to carrying out all of the committee's rulings.

That is signed by the entire six members, with René A. Viosca, the Broussard election arbitrator, as the chairman.

I send the entire report to the desk and ask that it be entered in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, that order will be made.

(See Exhibit A.)

Mr. LONG. Mr. President, the senior Senator from Louisiana was not defeated principally in the city of New Orleans. He was defeated in the country much more largely than he was in the city of New Orleans. He was defeated in practically every parish of the State of Louisiana, with the exception, perhaps, of eight, by outlandish majorities. The majorities in the country, outside of the city of New Orleans, were somewhere around 35,000, I think. The majority inside the city of New Orleans was around 25,000. I may misstate those figures. My recollection is that we defeated the senior Senator from Louisiana in the country by more than 30,000 votes, maybe 32,000, but in the city of New Orleans by about 26,000 votes. I am not giving the figures exactly accurately, although they are about accurate.

Mr. President, I have not the telegram with the exact details of the report that is made here. The telegram was sent from Louisiana some hours ago, although, for some reason, I have not been able to get it yet.

The next thing I want to come to is a reported doubling of the State highway commission pay roll, one-half the funds going into the anti-Broussard roll, campaign directed by LONG.

Before I conclude this speech I hope to have the details to put into this record. The facts are, according to my recollection is, on the highway-commission pay roll, and in roll having been doubled in that election year, we began that year with an employment of about 5,600 employees, my recollection is, on the highway commission pay roll, and in the month of September, when the primary election came off, we had about 2,000 employees on the highway-commission pay roll of the State of Louisiana; that instead of there having been an increase in the highway-commission pay roll in Louisiana in the year of this election, the facts will show that there had been a decrease from 5,600 employees down to somewhere around 2,000 or 2,500. I will not be exact on those figures, but it is somewhere close to that. The facts are that there was a material reduction in the highway commission pay roll in the year 1932 during this primary election.

Now, Mr. President, it is charged that funds were deducted from the wages of employees. That also is false. Employees in the State of Louisiana, and in the State of Wyoming, and in the State of Nebraska, and in the State of California, and in the District of Columbia did contribute. The time will never exist in politics, I think, as long as I am alive, and I am sure it has not existed since I have been alive, when people on the public pay roll will not voluntarily contribute, when they are asked to contribute, to the pay rolls of campaigns in which they are interested.

We do not have to go very far to find good examples of that in the last election from both parties. If the opposite party would be a criterion—and they are certainly no worse than ours—the speech of the Assistant Postmaster General certainly would have gone far enough to show that it was not any great crime for employees and persons holding public office to contribute to an election.

But here is the report that was given to the newspapers by the Louisiana Democratic Association. They have undertaken, knowing the facts to be to the contrary, to inform the people of the country at large—and that is all this effort has been made for; it is all that this kind of publicity has been for; it has been an effort, ex parte, to publish from day to day some so-called suspicion of some violent fraud that is unanswered, and can not be answered—they have undertaken to give the impression that several hundreds of

thousands of dollars that were deducted from the pay of employees of the city and State went into a campaign fund, when they know that to have been positively false.

The sums of money which were deducted from the employees, Mr. President, are here explained.

The amount was around $300,000. What was it deducted for? Five per cent of the wages of each employee on the pay roll of the State and on the pay roll of the city of New Orleans was deducted. Why?

A welfare committee was organized with the approval and under the sanction of friendly and contrary political forces and by the three newspapers of the city of New Orleans to take care of the unemployment of that city; and after having solicited private subscriptions and having received considerable money from private subscriptions, every employee on the State pay roll and every employee on the city pay roll was requested to contribute 5 per cent of his wages each month to care for the unemployed and the destitute people of that city. The money was turned over to a committee composed of business people of that city and social workers, under the approval of an opposition newspaper organization, who approved it in toto; and the $300,000 was deducted as a philanthropic proposition. Not one dime of it, in any remote corner, to any degree or extent whatever, has ever been charged—I should say, never should have been charged; I believe there was one irresponsible man who did charge it, but only one, and I do not think he charged it more than once—was ever charged except as having been deducted from the highest of good motives in order to care for the unemployed.

And what did the Government say about it? The reports of the unemployment-relief division of the Reconstruction Finance Corporation show that they took over the organization that we had down there in order to continue the work they had in Louisiana, and it has been rated by them, so I am reliably told from their own mouths, as being the best example of unemployment-relief work that is being done in the 48 States of America to-day. But the effort has been made to show that every dime of money that has been deducted and turned into a nonpartisan organization by the employees was deducted as a matter of politics, when, as a matter of fact, most of this money was deducted long before the campaign for the United States Senate ever started.

I will send to the desk in a moment the entire report of the Louisiana Democratic Association made on October 7, 1932. Now, there was solicitation of funds from office-holders and employees. We have done that, and everybody else has done that ever since there has been a political campaign going on in the United States.

Where are we going to get our campaign funds from?

We can not get them from the United Fruit Co., because we have been against keeping the soldiers in Nicaragua. [Laughter.] We can not get them from the Standard Oil Co., because we have raised their taxes; and they have tried to impeach the governors down there because we have done it. We can not get them from the interests we are fighting. We have to cover the State with circulars in campaigns, because in 90 per cent of the area of the State of Louisiana, I should say at least three-fourths to 100 per cent of the newspapers of the State are against us all the time; and it is only the rarest exception that any of them have ever been with us at any time. So the enormous thing was done that employees were asked to contribute to a campaign fund, for whom?

Why, our opposition in Louisiana announced that they were going to beat every man who had ever received the indorsement of the Long organization or of HUEY P. LONG individually. Every man had to be beaten who had ever been seen at a lunch table with me. Every man had to be beaten who had ever accepted my support. Oh, that was an ink and an odium that had to be erased from the clean escutcheon of anyone they were going to elect!

They did not say that the man who was running against us had received his nomination with my help six years before. That did not count. They did not say that the man who sat in the United States Senate before I came here held his office with my assistance. They did not mention anything about that. They did not say anything except that every man in that State who had accepted my support—eight Congressmen out of eight, the members of the courts, the Members of the Senate, and everyone else—had to be defeated in this campaign. So they put up a candidate against the justice of the supreme court. They put up candidates against all of the Congressmen. They put up candidates for the public-service commission. They had the member at that time, and they ran a great ticket, amply financed, as they have always been amply financed. They ran a great ticket from one end of the State to the other. They were going to lift the cover from the mantle and elect an entire set of officials who in no wise and in no manner, directly or indirectly, could not be held to have been on friendly speaking terms with the organization with which I was affiliated; but the election did not turn out quite so well. But they failed to elect anybody, Mr. President. Somehow or other, the vote did not turn out quite so well. None of the gentlemen that we heard about were sent out to redeem the State. It was following that election that this report was made; and here is the total sum collected, as reported, in all of it.

It was not during the election that any campaign fund was taken up, and there never was a campaign fund taken up for the senatorial campaign itself—not a copper cent. Here is the great collection against which they are contending, after having given it to be understood that the funds collected for unemployment relief fell in the same category:

Deficit for complete-the-work campaign, January, 1932, including candidates supported for governor, lieutenant governor, secretary of state, State auditor, treasurer, attorney general, superintendent of public education, registrar of the State land office, State senators and representatives	$9,500

That election had occurred 9 or 10 months before.

Obligations contracted for literature, stamps, stationery, sound truck, and traveling expenses for Wade O. Martin (candidate for public-service commissioner)	$4,500
Obligations contracted for circular issued in reference to J. Y. Sanders, jr., being on public pay roll	400
Deficit for special-train expense, New Orleans to Baton Rouge, for organization to opposition mass meeting opposing State administration's program	2,500

That is all right, Mr. President; they do not have to worry about a special train. If they get ready to get up a special train to go to Baton Rouge, they have the special train all right. They have plenty of them. If we want to bring a special train there in order to present opposition to these corncob and lightning-bug showings they make there, of course, that is bound to be called some fraudulent act. But this occurred clear outside of the campaign.

Deficit for account of unemployment-relief work in New Orleans and surrounding parishes	$8,500

That meant that when the Reconstruction Finance Corporation took over this work we owed $8,500 that we had to carry ourselves.

Deficit expense accompanying Federal Flood Control Committee	$650

The total was $26,050. Twenty-six thousand and fifty dollars was the total amount collected, whether it was 5 or 10 per cent, or more, or nothing. That was all explained, and put in the public press every time it was explained, covering work that had been done down in the city of New Orleans and in the State of Louisiana for a course of months; and I send the statement to the desk in order that it may be placed in the RECORD at the conclusion of my remarks, so that Senators may read the entire matter from one end to the other, if they see fit to do so.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

(See Exhibit B.)

Mr. LONG. Mr. President, I want the Senate to know where this row arose. I want the Senate to know how this thing came about. It came about when, as Governor of the State of Louisiana, I called the legislature into special ses-

sion in the month of April, 1929, I think it was, for the purpose of levying an occupational license tax of 5 cents a barrel on oil refined in the State. That is when this little fight started.

I had supported the junior Senator who sat in the United States Senate at that time, who is now the senior Senator; I had supported the senior Senator who sat in the Senate at that time. I had supported them against the very elements whom I was undertaking to tax at the time, and in every campaign that I had ever made in the State it had been fully understood what my position was.

In 1929, in the spring of the year, when the legislature was by me, as governor of the State, called into session for the purpose of considering whether or not, in order to carry on the work of the government, we should not have an occupational license tax of 5 cents a barrel on every barrel of gasoline, lubricating oil, and everything else of that kind manufactured in the State, a mass meeting was called, presided over by the Louisiana Association of Commerce, the music for which was furnished by the Standard Oil Refining Co. band, composed of, I think, 36 pieces. They took off the Standard Oil Co. uniforms that night and put on blue clothes, but they forgot to rub out the sign on the drum. [Laughter.]

They there and then held a mass meeting, and adopted a big set of resolutions, that whereas the governor of the State had undertaken to do the outlandish, unreasonable, unheard of, criminal act of putting a tax on the Standard Oil Co., therefore be it resolved, that he should and must be impeached. On the following day, or the next day, the impeachment proceeding was started. Those favoring impeachment swarmed into the capital of the State of Louisiana. Great advertisements began to appear in every newspaper in the State, advertising the refined products of the Standard Oil Co. They went out to little old weekly papers so small that I could walk outside of their circulation in a quarter of a minute and had inserted 2-page advertisements of oil and gasoline.

The big paper of the State, the Times-Picayune, which claims to be a paper for white supremacy, but one of the leading executives of which is part negro, at that, had come out on a Sunday morning with the statement that the legislature should adjourn and go home and stop that kind of business, but on Tuesday morning it came out with a double page advertisement of the Standard Oil Co. on the inside, and another editorial on the outside, to the effect that the legislature should not go home, that they ought to stay there and impeach HUEY P. LONG, the governor of the State.

We held a meeting, too, and I called on the two United States Senators, and I called on my other friends, men whom I had helped get into the offices which they held at that time, and who have yet ever to ask anybody to vote for me for anything, a statement I want to repeat. I called upon my friends, upon Senator Ransdell and Senator BROUSSARD, two men for whom I had fought all over that State, whom I had helped elect to the United States Senate. I fought for them against the same forces that were trying to impeach me.

I called on my friends to help me resist that impeachment, and I stated that I would call the roll again at the calling of the impeachment and that, however dim my chances looked at the time, I did not intend to bend one jot or tittle to that crowd. I did not hear from some of those upon whom I called and they did not hear from me when their time came.

Mr. President, that was not all of it. I did a little bit more about it. This clique had gotten hold of that State, Mr. President. There is a big lake outside of New Orleans over which one must come to get into the city. My friend the Senator from Mississippi knows of Lake Pontchartrain. In order to come from Mississippi and from some parts of northern Louisiana to New Orleans one has to come over Lake Pontchartrain.

The clique got hold of the State government, and they granted a franchise to a private corporation to build a bridge across the lake, allowing them to charge $3.60 for automobiles going to New Orleans, plus 15 cents for passengers, and $3.60 back the other way, plus 15 cents for passengers.

My distinguished colleague and myself both announced against that fraud. I had opened up the fight in the State of Louisiana and had gone into court after court and tried to stop that fraud. My distinguished colleague had announced that he favored the same position. They went ahead and built the bridge, with a provision in the contract that no other bridge could be built 30 miles east or 30 miles west of that bridge. It was to be the exclusive bridge over Lake Pontchartrain.

The people of the State had only one relief. There was a right that had been reserved to the State itself to build a bridge about 5 miles to the other side of this private bridge.

Substructures and piers for this bridge were started before I became governor. After the former governor had died, suddenly and unexpectedly, and the lieutenant governor had become governor, Governor Simpson, he started to put in substructures, only substructures. No contract was made for the bridge itself, only for the substructures, and it was after my election as governor of the State that I found out that, if they could prevent it, they never expected to allow the bridge itself to be built on top of those substructures and piers which had been put into the lake.

I ordered the drafting of the plans and specifications for the erection of a free bridge paralleling the other bridge where a fee of $3.60 could be charged. They were not charging $3.60; they had reduced the charge to about $2, in an effort to keep us from building the public bridge. But they opened up their bridge. Thereupon I put on free ferries paralleling the toll bridge, where they were trying to charge all the way from $2 to $3 or $4, and thereupon they joined the impeachment proceeding, and night after night senators came to me and told me that if they could keep that bridge from being built it meant $7,700,000, that they lacked only three votes in the senate of having enough to vote my impeachment, and that the sky was the limit for any man who would vote to impeach me in the senate on the next day.

We stood it out; we fought it out; we built the bridge; we put the free bridge beside the other, with a 40-foot concrete road on the north end and a similar road on the south end; and the buzzards are rooting on the fraudulent bridge they put up there by which they attempted to swindle the State out of $7,700,000.

That is not half of it; that is not half about this white-winged gang. I am going to tell the Senate why the people of Louisiana will not vote to put that gang back in power.

When I became governor, the State of Louisiana stood at the bottom of the list as the most illiterate State in the United States It had a greater percentage of people who could neither read nor write nor spell than any other State in the Union. It stood forty-eighth out of 48. When I put a tax on these interests in order to put night schools into the State, in order to open up schools in that State so that the adult illiterates could go to school at night and learn how to read and to write and to spell, that is when they began the attack and to consort to keep from paying taxes they ought to pay on the operations of their businesses, in order to keep that State in its illiteracy and to keep that State from having a revenue to get out of a state of illiteracy.

That is not all. There is another little thing we are doing. Up until the time I became Governor of the State of Louisiana there were 16 miles, I believe it was, maybe more, of No. 1 type roads in the State, and some of the 16 miles had cost an average of $80,000 a mile. The highway commission, the day I took the oath of office, was $5,000,000 in debt and did not have a dime to pay anybody a thing with. The revenues had already been spent for the year, and at the end of the year we would have been $5,000,000 in debt and did not have a dime. That is what they did.

They had gone out and floated $41,000,000 worth of bonds against the port of New Orleans and spent the money, and they did not have a tax behind the bonds to pay a dime with. It all had to come from earnings. Then they tried to paralyze the administrative arm of the State government, to keep me from paying the interest on the bonds

they had issued, to keep me from paying the deficit the highway commission had made, to keep me from building the bridge against the toll bridge they had put up, to keep me from wiping out illiteracy, and how did they attempt to do that?

Did they do it silently? Oh, no. They became bold. They organized the Constitutional League. They organized a league after every election. They never have been able to make a league last through more than one election, and sometimes not quite through that. They organized a league, and if that is disputed, I will file in the records of the Senate newspaper headlines showing it. The newspapers were contributors to the league to the extent of $15,000 apiece. It came out in a headline—I think about the month of July, 1929, or it might have been the month of June—that several hundred thousand dollars had been contributed to the Constitutional League for the purpose of running HUEY P. LONG out of the governor's office, disbarring him as a lawyer, and, if possible, putting him in the State penitentiary.

They did not make any bones about the money. They put it out that hundreds of thousands of dollars had been subscribed. The president of the Standard Oil Co. walked into that meeting as boldly as I ever walked into church—or, perhaps, I ought to say into a hotel. [Laughter.] He participated in those deliberations just as boldly as anyone else. The gentleman who is now president of the United Fruit Co. was there in person or by proxy, but I think in person. The newspaper representatives were there.

The sad thing about it is that we are now told that the city government of New Orleans is a bad government, but it was the political side of the Constitutional League with which these distinguished gentlemen surrounded themselves. They all went into the game together, and they met finally at the end of 9 or 10 months in the Legislature of the State of Louisiana.

Their first move was to remove the Long speaker. Surely they would have no trouble doing that, 61 out of 100 having voted to impeach me, and they only needed 51 to remove the speaker. But they did not get him removed. Something had happened. Fifty-seven voted against removing the speaker and 42 voted to remove him. I will say for my colleague that the representative of my colleague's district steadfastly voted for all impeachments and all removals of the speaker.
